DICTIONARY

OF

MUSIC AND MUSICIANS.

PLANCHÉ, James Robinson, of French descent, born in London Feb. 27, 1796; made Rouge Croix Pursuivant of Arms 1854, and Somerset Herald 1866; died in London, May 30, 1880. Mr. Planché's many dramas and extravaganzas do not call for notice in these pages; but he requires mention as the author of the librettos of 'Maid Marian, or the Huntress of Harlingford, an Historical Opera,' for Bishop (Covent Garden, Dec. 3, 1822), and 'Oberon, or The Elf-King's Oath, a Romantic and Fairy Opera,' for Weber (Covent Garden, April 12, 1826). In 1838 he also wrote for Messrs. Chappell a libretto founded on the Siege of Calais by Edward III., with a view to its being set by Mendelssohn. Mendelssohn however was not satisfied with the book, and it was ultimately transferred to Mr. Henry Smart, by whom a large portion was composed. The correspondence between Mendelssohn and Planché may be read in the Autobiography of the latter (1872; chap. 21). [G.]

PLANQUETTE, Robert, born in Paris, July 31, 1850; passed rapidly through the Conservatoire, and first appeared as a composer of songs and chansonettes for the Cafés-concerts. Encouraged by the popularity accorded to the bold rhythm and slightly vulgar melody of these songs, he rose to operettas,—'Valet de cour,' 'Le Serment de Mme. Grégoire,' and 'Paille d'avoine.' The decided progress evinced by this last piece was confirmed by 'Les Cloches de Corneville,' a 3-act operetta, produced with immense success at the Folies dramatiques on April 19, 1877, adapted to the English stage by Farnie and Reece, and brought out at the Folly Theatre, London, Feb. 23, 1878, with equally extraordinary good fortune. Planquette has since composed and published 'Le Chevalier Gaston,' 1 act (Monte Carlo, Feb. 8, 1879), and 'Les Voltigeurs de la 32me.' 3 acts (Théâtre de la Renaissance, Jan. 7, 1880). It is to be hoped that he will aim higher than he has hitherto done, and add refinement to his undoubted gift of melody. [G. C.]

PLANTADE, Charles Henri, born at Pontoise, Oct. 14, 1764; was admitted at 8 to the school of the king's 'Pages de la musique,' where he learned singing and the cello. On leaving this he studied composition with Honoré Langlé (born at Monaco, 1741, died at Villiers le Bel, 1807), a popular singing-master, the pianoforte with Hullmandel (born at Strassburg, 1751, died in London, 1823), an excellent teacher, and the harp, then a fashionable instrument, from Petrini (born in 1744, died in Paris, 1819). Having started as a teacher of singing and the harp, he published a number of romances, and nocturnes for 2 voices, the success of which procured him admission to the stage, for at that time the composer of 'Te bien aimer, O ma chère Zélie,' or some such simple melody, was considered perfectly competent to write an opera. Between 1791 and 1815 Plantade produced a dozen or so dramatic works, three of which, 'Palma, ou le voyage en Grèce,' 2 acts (1798), 'Zoé, ou la pauvre petite' (1800), and 'Le Mari de circonstance' (1813), 1 act each, were engraved. The whole of this fluent but insipid music has disappeared. His numerous sacred compositions are also forgotten; out of about a dozen masses, the 'Messe de Requiem' alone was published, but the Conservatoire has the MS. of a 'Te Deum' (1807), several motets, and 5 masses. From these scores it is evident that with an abundance of easy-flowing melody, Plantade had neither force nor originality. He had a great reputation as a teacher, was a polished man of the world, and a witty and brilliant talker. Queen Hortense, who had learned singing from him, procured his appointment as Maître de Chapelle to her husband, and also as professor at the Conservatoire (1799). He gave up his class in 1807, but resumed it in 1815; was dismissed on April 1, 1816, reinstated Jan. 1, 1818, and finally retired in 1828. He was decorated

with the Legion of Honour by Louis XVIII. in 1814. His best pupil was the celebrated Mme. Cinti-Damoreau. He died in Paris, Dec. 18, 1839, leaving two sons, one of whom, CHARLES FRANÇOIS,—born in Paris April 14, 1787, died March 25, 1870,—composed numerous chansons and chansonnettes, some of which have been popular. [G.C.]

PLAYFORD, JOHN, stationer, bookseller, musicseller and publisher, is commonly said to have been born in 1613. He was really born in 1623, as is evidenced by portraits taken at various dates on which his age is stated. He carried on business 'at his shop in the Inner Temple, near the Church door.' In middle life, probably from about 1663 to 1679, he had a house at Islington, where his wife kept a ladies' school, and afterwards, from 1680, resided 'in Arundel Street, near the Thames side, over against the George.' His first musical publications were issued in 1652, and comprised Hilton's 'Catch that catch can,' 'Select Musicall Ayres and Dialogues,' and 'Musick's Recreation on the Lyra Violl.' On Oct. 29, 1653, he was chosen clerk of the Temple Church. In 1654 he published his 'Breefe Introduction to the Skill of Musick for Song and Viall.' Of that impression but one copy is now known, which was for many years in the possession of the late Dr. Rimbault, and produced 10 guineas at the sale of his library in 1877. In 1655 Playford published an enlarged edition of it, which long passed as the first. It is divided into two books, the first containing the principles of music, with directions for singing and playing the viol; the second the art of composing music in parts, by Dr. Campion, with additions by Christopher Sympson. The book acquired great popularity; in 1730 it reached its 19th edition, independent of at least six intermediate unnumbered editions. There are variations both of the text and musical examples, frequently extensive and important, in every edition. In the 10th edition, 1683, Campion's tract was replaced by 'A brief Introduction to the Art of Descant, or composing Music in parts,' without author's name, which in subsequent editions appeared with considerable additions, by Henry Purcell. The 7th edition contained, in addition to the other matter, 'The Order of performing the Cathedral Service,' which was continued, with a few exceptions, in the later editions. Five different portraits of the author, taken at various periods of his life, occur in the several editions. In 1667 Playford republished Hilton's 'Catch that catch can,' with extensive additions and the second title of 'The Musical Companion,' and a second part containing 'Dialogues, Glees, Ayres, and Ballads, etc.'; and in 1672 issued another edition, with further additions, under the second title only. Some compositions by Playford himself are included in this work. In 1671 he edited 'Psalms and Hymns in solemn musick of four parts on the Common Tunes to the Psalms in Metre: used in Parish Churches'; and a few years later, 'The Whole Book of Psalms, with the .... Tunes .... in three parts,' which passed through many editions. In 1673 he took part in the Salmon and Lock controversy, by addressing a letter to the former, 'by way of Confutation of his Essay, etc.,' which was printed with Lock's 'Present Practice of Musick Vindicated.' The style of writing in this letter contrasts very favourably with the writings of Salmon and Lock. In place of abuse we have quiet argument and clear demonstration of the superiority of the accepted notation. Playford published the greater part of the music produced in his day, besides reprints of earlier works. His last publication appears to have been the 5th book of 'Choice Ayres and Dialogues,' published in 1684–5, in the preface to which he says that age and infirmity compel him to leave his business to his son and Carr, the publisher's son. He died in 1693 or 94. In his will (made in 1686, proved Aug. 14, 1694) he expresses fear that owing to 'losses and crosses' his estate will disappoint the expectations of those who succeed him. His burial-place has eluded all inquiry. [See MUSIC-PRINTING, vol. ii. p. 435.]

HENRY, his second, but eldest surviving son, born May 5, baptized May 14, 1657, had for godfathers Henry Lawes and Henry Playford. He succeeded to his father's business in 1685 in partnership with Robert, son of John Carr, music publisher at the Middle Temple Gate, and one of the King's band of music. Their first publication was 'The Theater of Music,' 1685. After a few years Henry Playford removed to the Temple Change, Fleet Street, and carried on business alone. In 1698 he advertised a lottery of music books. He published several important musical works, among which were Purcell's 'Ten Sonatas,' and 'Te Deum and Jubilate for St. Cecilia's day,' 1697; 'Orpheus Britannicus,' 1698–1702; and Blow's 'Ode on the Death of Purcell,' 1696, and 'Amphion Anglicus,' 1700. In 1703 he issued proposals for publishing monthly collections of songs and instrumental music by an annual subscription of one guinea. He resided in his father's house in Arundel Street, and is supposed to have died about 1710, but the precise date cannot be ascertained.

JOHN, the youngest child of John Playford, baptized at Islington Oct. 6, 1665, was a printer of music. About 1681 he entered into business with Anne, widow of William Godbid, of Little Britain, and with her, and afterwards alone, printed several of the publications of his father. He died early in 1686. An elegy on his death, by Nahum Tate, with music by Henry Purcell, was published in 1687. [W.H.H.]

PLEASANTS, THOMAS, born 1648, became about 1676 organist and master of the choristers of Norwich Cathedral. He died Aug. 5, 1689, and was buried in the cathedral. [W.H.H.]

PLEYEL, IGNAZ JOSEPH, a most prolific instrumental composer, born June 1, 1757, the 24th child of the village schoolmaster at Ruppersthal in Lower Austria. His musical talent showed itself early. He learnt to play the clavier and violin in Vienna, the former from Van Hal, or Wanhall, and found a patron in the then Count Erdödy, who put him under Haydn, as a pupil

in composition, in 1774. After remaining several years with Haydn he went to Italy, where he fully imbibed the taste of the Italian opera, and lived in intercourse with the best singers and composers. In 1783 he was called to Strassburg as Capellmeister to the cathedral. In 1791 he was invited to London to take the control of the Professional Concerts of the following season. He was probably not aware of the fact that his appointment was a blow aimed at Salomon, and that he would be in competition with Haydn. The blow, however, missed its aim. Pleyel conducted his first Professional Concert Feb. 13, 1792. Haydn was present, and the programme contained 3 symphonies, by Haydn, Mozart, and Pleyel himself (composed expressly for the concert). On May 14 he took his benefit. The visit was a satisfactory one, both in an artistic and a pecuniary point of view. On his return to France he found himself denounced as an enemy to the Republic, and was forced to fly. He succeeded in clearing himself from the charge, and at length settled in Paris as a music-seller. In 1800 the musicians of the opera proposed to perform Haydn's 'Creation,' and Pleyel was selected to arrange that Haydn should himself conduct the performance. He got as far as Dresden on the road to Vienna, but all the influence of Haydn and Artaria failed to obtain a pass for him any further, and the direction of the performance came finally into the hands of Steibelt. The evening of the concert—3 Nivôse, or Dec. 24, 1800—was a memorable one, since on his road to the opera house, in the Rue Nicaise, Bonaparte nearly met his death from an infernal machine. Pleyel was the first to publish the complete collection of Haydn's quartets (except the three last, of which two had not then been printed, and the third was not composed till some time afterwards). The edition, in separate parts only, has a portrait of Haydn by Darcis after Guerin, and is dedicated to the First Consul. It was followed by 30 quartets and 5 symphonies in score. In 1807 Pleyel founded the pianoforte factory which has since become so widely celebrated. [See PLEYEL & Co.] He died Nov. 14, 1831.

Haydn considered Pleyel as his dearest and most efficient pupil. He writes from London: 'Since his arrival (Dec. 23, 1791), Pleyel has been so modest to me that my old affection has revived; we are often together, and it does him honour to find that he knows the worth of his old father. We shall each take our share of success, and go home satisfied.' Pleyel dedicated to Haydn his opera 2, six quartets 'in segno di perpetua gratitudine.' When Pleyel's first six string quartets, dedicated to his patron, Count Ladislaus Erdödy, appeared in Vienna, Mozart wrote to his father (April 24, 1784): 'Some quartets have come out by a certain Pleyel, a scholar of Jos. Haydn's. If you don't already know them, try to get them, it is worth your while. They are very well written, and very agreeable; you will soon get to know the author. It will be a happy thing for music if, when the time arrives, Pleyel should replace Haydn for us.' This wish was not destined to be fulfilled. In his later works Pleyel gave himself up to a vast quantity of mechanical writing, vexing Haydn by copying his style and manner without a trace of his spirit, and misleading the public into neglecting the works of both master and scholar, including many of Pleyel's own earlier compositions, which were written with taste and care, and deserve a better fate than oblivion.

Pleyel was emphatically an instrumental composer, and wrote an enormous number of symphonies, concertanti, and chamber pieces, of which a list will be found in Fétis, comprising 29 symphonies; 5 books of quintets; and 7 of quartets, some of them containing as many as 12 compositions each; 6 flute quartets; 4 books of trios; 8 concertos; 5 symphonies concertanti; 8 books of duets for strings; 10 books of sonatas for PF. solo, and 12 sonatas for PF. and violin. When in Italy he wrote an opera, 'Iphigenia in Aulide,' which was performed at Naples. A 'Hymn to Night,' probably a revolutionary piece, was published by André at Offenbach in 1797. A series of 12 Lieder, op. 47, was published at Hamburg by Günther and Böhme. It has never yet been mentioned that his introduction to the world as a vocal composer was with an opera for the Marionette theatre at Esterház in 1776, 'Die Fee Urgele,' containing a quantity of vocal pieces. A portrait of him, painted by H. Hardy and engraved by W. Nutter, was published by Bland during Pleyel's residence in London.

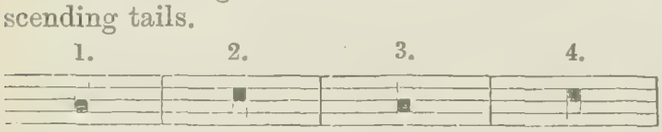
CAMILLE, eldest son of the foregoing, born at Strassburg 1792, took over the music business in 1824, associating himself with Kalkbrenner for the pianoforte department. He had had a good musical education from his father and Dussek; he lived for some time in London, and published several pieces which evince considerable talent. He died at Paris May 4, 1855, leaving AUGUST WOLFF at the head of the firm.

His wife, Marie Felicité Denise Moke, known as MADAME PLEYEL, was born at Paris, July 4, 1811, and at an early age developed an extraordinary gift for playing. Herz, Moscheles, and Kalkbrenner, were successively her masters, and she learnt much from hearing Thalberg; but her own unwearied industry was the secret of her success. Her *tournées* in Russia, Germany, Austria, Belgium, France, and England, were so many triumphal progresses, in which her fame continually increased. Mendelssohn in Leipzig, and Liszt at Vienna, were equally fascinated by her performances; Liszt led her to the piano, turned over for her, and played with her a duet by Herz. Not less marked was the admiration of Auber and Fétis, the latter pronouncing her the most perfect player he had ever heard. In this country she made her first appearance at the Philharmonic, June 27, 1846, in Weber's Concertstück. To Brussels she always felt an attraction, and in 1848 took the post of teacher of the PF. in the Conservatorium there, which she retained till 1872. Her pupils were numerous,

and worthy of her remarkable ability. She died near Brussels, March 30, 1875. [C.F.P.]

PLEYEL & CO. This distinguished Parisian firm of pianoforte-makers is now styled PLEYEL WOLFF ET CIE., and from particulars supplied by M. Wolff—formerly a pianist and professor at the Conservatoire, and for many years head of the house—its founder was Ignaz Pleyel, the composer, who established it in 1807. The Pleyel firm is remarkable for having always been directed by musicians, such as Camille Pleyel, who became his father's partner in 1821, and Kalkbrenner, who joined them three years later. At starting, the pianoforte-maker, HENRI PAPE, lent valuable aid. The influence of Chopin, who made his *début* in Paris at Pleyel's rooms, in 1831, has remained a tradition in the facile touch and peculiar singing tone of their instruments. Camille Pleyel was succeeded in the control of the business by M. A. Wolff above mentioned, who has much improved the Pleyel grand pianos in the direction of power, having made them adequate to the modern requirements of the concert room, without loss of those refined qualities to which we have referred. The firm has had since 1876 an agency in London. [A.J.H.]

PLICA (literally, a Fold, or Plait). A character, mentioned by Franco of Cologne, Joannes de Muris, and other early writers, whose accounts of it are not always very easily reconciled to each other. Franco describes four kinds: (1) the 'Plica longa ascendens,' formed by the addition, to a square note, of two ascending tails, of which that on the right hand is longer than that on the left; (2) the 'Plica longa descendens,' the tails of which are drawn downwards, that on the right being, as before, longer than that on the left; (3) the 'Plica brevis ascendens,' in which the longer of the ascending tails is placed on the left side; and (4) the 'Plica brevis descendens,' in which the same arrangement obtains with the two descending tails.



Joannes de Muris describes the Plica as a sign of augmentation, similar in effect to the Point. Franco tells us that it may be added at will to the Long, or the Breve; but to the Semibreve only when it appears in Ligature. Some other writers apply the term 'Plica' to the tail of a Large, or Long. The Descending Plica is sometimes identified with the Cephalicus, which represents a group of three notes, whereof the second is the highest. [See NOTATION, vol. ii. pp. 467, 468.] [W.S.R.]

PLINTIVO, 'plaintive.' A direction in use among the 'sentimental' class of writers for the pianoforte, of which, however, no specimen is found in the works of the great masters. [J.A.F.M.]

PLUS ULTRA. A sonata in A♭ by Dussek for pianoforte solo, op. 71. The motto 'Plus Ultra' appears to have been provoked by that of Woelfl's sonata, NON PLUS ULTRA; but whether it was affixed by the composer or by the publishers is not certainly known; probably by the latter, as the work was first published in Paris, to which Dussek had recently returned, with the title 'Le Retour à Paris.' The title-pages of the two works are as follows:—

'Non Plus Ultra. A Grand Sonata for the Pianoforte, in which is introduced the favourite Air Life let us Cherish, with Variations. Composed and dedicated to Miss E. Binny by J. Woelfl. Op. 41. London: Printed and sold for the author by J. Lavenu.'

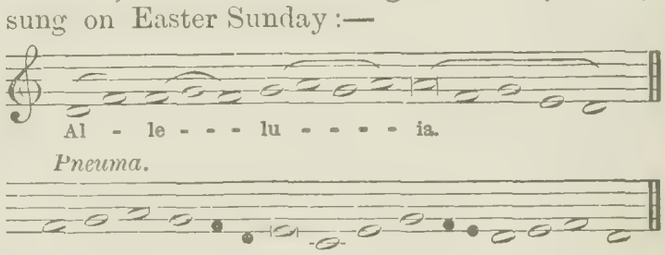
'Plus Ultra. A Sonata for the Pianoforte, composed and dedicated to Non Plus Ultra,* by J. L. Dussek. Op. 71. London: Cianchetti and Sperati.

* It alludes to a Sonata published under this title.'

The dates of publication of the two works are probably 1800 and 1808 respectively. [G.]

PNEUMA (from the Greek πνεῦμα, a breathing; Lat. *Pneuma, vel Neuma*). A form of Ligature, sung at the end of certain Plain Chaunt Melodies, to an inarticulate vowel-like sound, quite unconnected with the verbal text; in which particular it differs from the Perielesis, which is always sung to an articulate syllable. [See LIGATURE; PERIELESIS.]

The use of the Pneuma can be traced back to a period of very remote antiquity—quite certainly as far as the age of S. Augustine (350–430). Since then, it has been constantly employed in the Offices of the Roman Church; more especially at High Mass, on Festivals, in connection with the Alleluia of the Gradual, from which it takes its Tone, as in the following Alleluia (Tone 1), sung on Easter Sunday:—



The Alleluia is first sung twice by two Cantors, and then repeated, in full Choir, with the addition of the Pneuma, also sung twice through. The two Cantors then intone the Versus, and the Choir respond; after which the Alleluia is again sung by the Cantors, and the Pneuma by the Choir. The Preface to the Ratisbon Gradual directs that the Pneuma shall be sung upon the vowel A. There is no connection between this kind of Neuma and that described under NOTATION, vol. ii. p. 467. [W.S.R.]

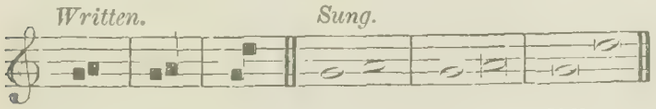
PNEUMATIC ACTION. A contrivance for lessening the resistance of the keys, and other moveable parts of an organ, previously attempted by others, and brought into a practical shape by CHARLES S. BARKER between 1832 and 41, in which latter year it was first applied by Cavaillé-Coll to the organ of S. Denis. The necessity of some such contrivance may be realised from the fact that in some of the organs on the old system, a pressure of several pounds was required to force down each key. In Willis's Organ at the

Alexandra Palace, London, if there were no pneumatic levers, the resistance to the finger at middle C with the couplers drawn would be 25 lbs. For a description of the invention see ORGAN, vol. ii. p. 599. [G.]

POCO, a little; rather; as poco adagio, not quite so slow as adagio itself; poco sostenuto, somewhat sustained. It is the opposite of Assai. POCHETTINO is a diminutive of poco and implies the same thing but in a smaller degree. This is a refinement of very modern invention. [G.]

PODATUS (*Pedatus, Pes.* A Foot, or Footed-note). A form of Ligature, much used in Plain Chaunt, and derived from a very antient Neuma, which will be found figured at vol. ii. p. 467.

The Podatus consists of two notes, of which the second is the highest; and, in the square form of Notation now in use, is represented thus—



The two notes may be of the same, or different lengths; but, as a general rule, the second note is the longest, more especially when the Ligature ascends only one Degree. [See LIGATURE, NOTATION.] [W.S.R.]

POELCHAU, GEORG, a distinguished amateur, born July 5, 1773, at Cremon in Livonia, left Russia during the reign of the Emperor Paul, and settled in Hamburg, where he formed an intimacy with Klopstock. On the death of Emmanuel Bach he bought the whole of his music, which contained many autographs of his father's. In 1813 he settled in Berlin, in 1814 became a member of the Singakademie, and assumed the charge of its library in 1833. At the request of the Crown Prince he searched the royal libraries for the compositions of Frederic the Great, and found 120 pieces. He died in Berlin, on Aug. 12, 1836, and his collection of music was bought by the Royal Library and the Singakademie. In 1855 the Singakademie sold their collection of the autographs of the Bach family to the Royal Library, which now has a larger number of these treasures than any other institution. There is a bust of Poelchau in one of the rooms. [F.G.]

POHL, CARL FERDINAND, writer on musical subjects, born at Darmstadt, Sept. 6, 1819, comes of a musical family, his grandfather having been the first maker of glass harmonicas, his father (died 1869) chamber-musician to the Duke of Hesse at Darmstadt, and his mother a daughter of the composer Beczwarzowsky. In 1841 he settled in Vienna, and after studying under Sechter became in 1849 organist of the new Protestant church in the Gumpendorf suburb. At this date he published Variations on an old 'Nachtwachterlied' (Diabelli), and other pieces. He resigned the post in 1855 on account of his health, and devoted himself exclusively to teaching and literature. In 1862 he published in Vienna an interesting pamphlet 'On the history of the Glass harmonica.' From 1863 to 1866 he lived in London, occupied in researches at the British Museum on Haydn and Mozart; the results of which he embodied in his 'Mozart und Haydn in London,' 2 vols. (Vienna, Gerold, 1867), a work full of accurate detail, and indispensable to the student. Through the influence of Jahn and von Köchel, and of his intimate friend the Ritter von Karajan, Mr. Pohl was appointed in January 1866 to the important post of archivist and librarian to the Gesellschaft der Musikfreunde in Vienna. [See vol. i. 591.] To his care and conscientiousness the present highly satisfactory condition of the immense collections of this great institution is due. In connection therewith he has published two works, which, though of moderate extent, are full of interest, and are marked by that accuracy and sound judgment which distinguish all Mr. Pohl's works, namely, 'Die Gesellschaft der Musikfreunde und ihr Conservatorium in Wien' (Braumüller, 1871), and 'Denkschrift aus Anlass des 100 jährigen Bestehens der Tonkünstler Societät in Wien' (Gerold, 1871). He has been for many years occupied on a biography of Haydn, which he undertook at the instigation of Jahn, and of which vol. i. was published in 1875 (Berlin, Sacco; since transferred to Breitkopf & Härtel). The main facts are contained in his article on Haydn in this Dictionary (vol. i. 702–722). The summaries of the musical events of each year which Mr. Pohl furnishes to the 'Signale für die musikalische Welt,' of which he is the Vienna correspondent, are most careful and correct, and it would be a boon to the student of contemporary music if they could be republished separately. Mr. Pohl's courtesy to students desiring to collate MSS., and his readiness to supply information, are well known to the musical visitors to Vienna. [F.G.]

POHL, DR. RICHARD, a German musical critic well known for his thoroughgoing advocacy of Wagner. We learn from M. Pougin's supplement to Fétis that he was born at Leipzig, Sept. 12, 1826, that he devoted himself to mathematics, and after concluding his course at Göttingen and Leipzig was elected to a professorial chair at Gratz. This he vacated for political reasons, and then settled at Dresden and Weimar as a musical critic. He is one of the editors of the 'Neue Zeitschrift für Musik,' and a frequent contributor to the musical periodicals. He began his Autobiography in the 'Mus. Wochenblatt' for Dec. 30, 1880. [G.]

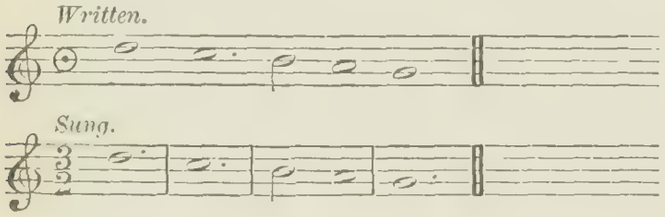
POINT or DOT (Lat. *Punctus*, vel *Punctum*; Ital. *Punto*; Germ. *Punct*; Fr. *Point*). A very antient character, used in mediæval Music for many distinct purposes, though its office is now reduced within narrower limits.

The Points described by Zarlino and various early writers are of four different kinds.

I. The POINT OF AUGMENTATION, used only in combination with notes naturally Imperfect, was exactly identical, both in form, and effect, with the modern 'Dot'—that is to say, it lengthened the note to which it was appended by one-half, and was necessarily followed by a note equivalent to itself in value, in order to complete the beat. The earliest known allusion to it is to be found in the 'Ars Cantus

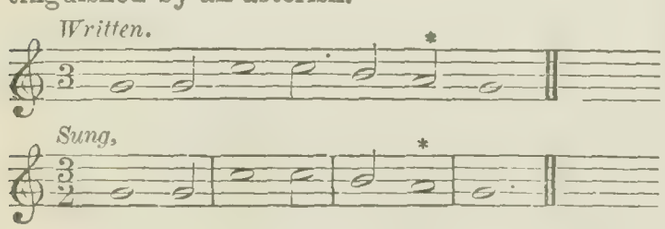
mensurabilis' of Franco of Cologne, the analogy between whose *Tractulus*, and the *Punctus augmentationis* of later writers, is so close that the two may be treated as virtually identical.

II. The Point of Perfection (*Punctus Perfectionis*) was used in combination with notes, Perfect by the Time Signature, but rendered Imperfect by Position, for the purpose of restoring their Perfection. In this case, no short note was needed for the purpose of compensation, as the Point itself served to complete the triple beat. Now, in mediæval Music, a Breve, preceded or followed by a Semibreve, or a Semibreve by a Minim, though perfect by virtue of the Time Signature, becomes Imperfect by Position. As the following example is written in the Greater (or Perfect) Prolation, each of its Semibreves is naturally equal to three Minims; but, by the rule we have just set forth, the second and fourth notes become Imperfect by Position—i. e. they are each equal to two Minims only. The fourth note is suffered to remain so, but the second is made Perfect by a Point of Perfection.



The term 'Punctus Perfectionis' is also applied to the Point placed, by mediæval Composers, in the centre of a Circle, or Semicircle, in order to denote either Perfect Time, or the Greater Prolation.

III. The Point of Alteration, or Point of Duplication (*Punctus Alterationis, vel Punctus Duplicationis*), differs so much, in its effect, from any sign used in modern Music, that it is less easy to make it clear. In order to distinguish it from the Points already described, it is sometimes written a little above the level of the note to which it refers. Some printers, however, so place it, that it is absolutely indistinguishable, by any external sign, from the Point of Augmentation. In such cases it is necessary to remember that the only place in which it can possibly occur is before the first of two short notes, followed by a longer one—or placed between two longer ones—in Perfect Time, or the Greater Prolation; that is to say, in Ternary Rhythm, of whatever kind. But its chief peculiarity lies in its action, which concerns, not the note it follows, but the second of the two short ones which succeed it, the value of which note it doubles—as in the following example, from the old melody, 'L'Homme armé,' in which the note affected by the Point is distinguished by an asterisk.



IV. The Point of Division, sometimes called the Point of Imperfection (*Punctus Divisionis, vel Imperfectionis; Divisio Modi*), is no less complicated in its effect than that just described, and should also be placed upon a higher level than that of the notes to which it belongs, though, in practice, this precaution is very often neglected. Like the Point of Alteration, it is only used in Ternary Measure; but it differs from the former sign, in being always placed between two short notes, the first of which is preceded, and the second followed, by a long one. Its action is, to render the two long notes Imperfect. But, a long note, in Ternary Rhythm, is always Imperfect by Position, when either preceded or followed by a shorter one: the use of the Points, therefore, in such cases, is altogether supererogatory, and was warmly resented by mediæval Singers, who called all such signs *Puncti asinini*.

In spite, however, of its apparent complication, the *rationale* of the Sign is simple enough. An examination of the above passage will show that the Point serves exactly the same purpose as the Bar in modern Music; and we can easily understand that it is called the Point of Division, because it removes all doubt as to the division of the Rhythm into two Ternary Measures.

The Composers of the 15th and 16th centuries frequently substituted, for the Points of Augmentation, Alteration, and Division, a peculiar intermixture of black and white notes, which will be found fully described in vol. ii. pp. 472, 473 of this Dictionary; and the Student will do well to make himself thoroughly acquainted with them, since, without a clear understanding of these and other similar expedients, it is impossible to decipher Music, either MS. or printed, of earlier date than the beginning of the 17th century. [W.S.R.]

POINT D'ORGUE, organ point, appears to have two different meanings in French, and to be used (1) for an organ point or pedal, that is, a succession of harmonies carried over a holding note [Pedal]; and (2), with what reason is not plain, for the cadenza in a concerto—the flourish interpolated between the chords of the 6–4 and 7–3 of the cadence—the place for which is indicated by a pause 𝄐. Rousseau gives a clue to the origin of the term by explaining (under 'Couronne') that when the above sign, which he denominates 'Couronne,' was placed over the last note of a single part in the score it was then called Point d'orgue, and signified that the sound of the note was to be held on till the other parts had come to the end. Thus the note so held on became a pedal, and is so in theory. [G.]

POINTS. A term applied, in modern Music, to the opening notes of the Subject of a Fugue, or other important Motivo, to which it is necessary that the attention of the Performer should be particularly directed by the Conductor.

For instance, one of the most striking Subjects in the 'Hallelujah Chorus,' is that adapted to the words 'For the Lord God Omnipotent reigneth.' After this has been twice enuntiated by the whole body of Voices, in unison, the 'Point' is taken up at the 22nd Bar by the Sopranos, at the 25th by the Tenors and Basses in unison, and at the 29th, by the Altos and Tenors. These, then, are three of the most important 'Points' in the Hallelujah Chorus.

The term 'Point' is also applicable to features of quite another kind. Thus, the entrance of the Horns in the First Movement of the Overture to 'Der Freischütz,' and that of the First Clarinet at the 60th Bar of the Molto Vivace, are 'Points' of such vital importance that a careless reading on the part of their interpreters would entirely fail to convey the Composer's meaning, and render the performance spiritless and uninteresting to the last degree.

These remarks concern, not only the performance of Orchestral and Church Music. They apply, with equal force, to Solo Performances of every kind: to Pianoforte Sonatas, and Organ Fugues, Violin Concertos, and Solos for the Flute or Oboe. In these, the Performer, having no Conductor to prompt him, must think for himself, and the success of his performance will depend entirely upon the amount of his capacity for doing so. [W.S.R.]

POISE, Ferdinand, born at Nîmes, June 3, 1828, as a child showed a turn for music, but was only allowed to adopt it after taking his degree as a bachelier-ès-lettres of Paris. He entered the Conservatoire in 1850, and in 1852 gained the second prize for composition, under Adolphe Adam, from whom he derived his taste for easy, flowing melody. 'Bonsoir Voisin,' a pleasing little opera produced at the Théâtre Lyrique, Sept. 18, 1853, was followed at the same theatre by 'Les Charmeurs' (March 15, 1855), also a success. He next produced 'Polichinelle' (1856) at the Bouffes Parisiens; and at the Opéra Comique, 'Le Roi Don Pèdre' 2 acts (1857); 'Le Jardinier Galant,' 2 acts (March 4, 1861); 'Les Absents,' a charming piece in one act (Oct. 26, 1864); 'Corricolo' 3 acts (Nov. 28, 1868); 'Les trois Souhaits' (1873); 'La Surprise de l' Amour,' 2 acts (Oct. 31, 1878); and 'L'Amour Médecin' (Dec. 20, 1880). The two last, arranged by Poise and Monselet from Marivaux and Molière, give a high idea of his powers. He has also composed another pretty little opera, 'Les deux Billets' (1858), revived at the Athenée in Feb. 1870. In their ease and absence of pretension his works resemble those of Adolphe Adam, but there the comparison ends; the latter had a real vein of comedy, while Poise's merriment has the air of being assumed to conceal his inward melancholy. Nevertheless his music is flowing and happy; and being well-scored, and never vulgar, it is listened to with pleasure, and is remembered. It would be more generally popular if M. Poise exerted himself more; but his health is delicate, he lives in retirement, writes only when so disposed, and instead of aspiring to fame and fortune, seeks only to secure his independence, and to enjoy the refined pleasures of music. [G.C.]

POLACCA (Italian for Polonaise). Polaccas may be defined as Polonaises treated in an Italian manner, but still retaining much of the rhythm characteristic of their Polish origin. Polaccas are both vocal and instrumental, and are generally of a brilliant and ornate description, gaining in brilliancy what they lose in national character. Thus Chopin, in a letter from Warsaw, dated Nov. 14, 1829 (Karasowski, vol. i.), speaks of an 'Alla Polacca' with cello accompaniment that he had written, as 'nothing more than a brilliant drawing-room piece—suitable for the ladies,' and although this composition is probably the same as the 'Introduction et Polonaise Brillante pour Piano et Violoncelle' (op. 3) in C major, yet from the above passage it seems as if Chopin did not put it in the same class as his poetical compositions for the pianoforte which bear the same name. [W.B.S.]

POLE, William, Mus. Doc., F.R.S, an instance of the successful union of science, literature, and music. He was born at Birmingham in 1814, and was bred to the profession of Civil Engineering, in which he has become eminent. He has written many works and papers on scientific subjects, and is a contributor to the leading Reviews, and an F.R.S. of London and Edinburgh.

His taste for music developed itself early; he studied hard at both theoretical and practical music, and was organist in a London West End church for many years. He graduated at Oxford as Mus. Bac. in 1860, and as Mus. Doc. in 1867. He was appointed Reporter to the Jury on Musical Instruments at the International Exhibition of 1862, and is one of the Examiners for Musical Degrees in the University of London, author of a Treatise on the Musical Instruments in the Exhibition of 1851, 'The Story of Mozart's Requiem,' 1879, 'The Philosophy of Music,' 1879, and various minor critical essays, three of which, written in 1858, on certain works of Mozart and Beethoven have been mentioned in the article Analysis. His only musical compositions printed are a well-known motet for 8 voices on the 'Hundredth Psalm,' and some four-handed PF. accompaniments to classical songs. [G.]

POLIUTO. An opera in 3 acts; the libretto conceived by Adolphe Nourrit (who designed the principal rôle for himself), and carried out by Cammarano; the music by Donizetti. It was completed in 1838, but the performance was forbidden by the Censure of Naples. It was then translated into French by Scribe, and under the title of 'Les Martyrs,' was produced at the Grand Opéra (4 acts), April 10, 1840; at the Théâtre Italien, as 'I Martiri,' April 14, 1859; in London, as 'I Martiri,' at the Royal Italian Opera, April 20, 1852. [G.]

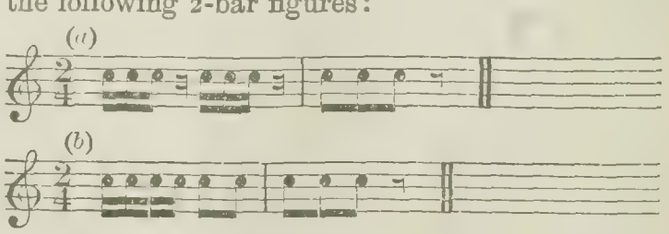
POLKA, a well-known round dance, said to be of Bohemian origin. According to Alfred Waldaw ('Böhmische Nationaltänze,' Prague, 1859 and 1860) the polka was invented in the year 1830 by a servant girl who lived at Elbeteinitz, the music being written down by a local musician named Neruda. The original name by which the polka was known in its birthplace and in the neighbourhood of Jičin, Kopidlno, and Dimokury, was the 'Nimra.' This was derived from the song to which it was danced, the first lines of which ran as follows :

Strejček Nimra
Koupil šimla
Za půl páta tolaru.[1]

In 1835 it was danced in Prague, where it first obtained the name of 'Polka,' which is probably a corruption of the Czech 'pulka' (half), a characteristic feature of the dance being its short half-steps. According to another account the polka was invented in 1834 by a native of Moksic, near Hitschin in Bohemia, and was from that place introduced into Prague by students. In 1839 it was brought to Vienna by the band of a Bohemian regiment under its conductor, Pergler; in 1840 it was danced at the Odéon in Paris by the Bohemian Raab; and in 1844 it found its way to London. Wherever the polka was introduced, it suddenly attained an extraordinary popularity. Vienna, Paris, and London were successively attacked by this curious 'polkamania'; clothes, hats, and streets were named after the dance, and in England the absurdity was carried so far that public houses displayed on their signs the 'Polka Arms.' In the 'Illustrated London News' for March 23, 1844, will be found a polka by Offenbach, 'a celebrated French *artiste*,' headed by two rather primitive wood-cuts, to which the following description of the dance is appended: 'The Polka is an original Bohemian peasant dance, and was first introduced into the fashionable saloons of Berlin and St. Petersburg about eight years since.[2] Last season it was the favourite at Baden-Baden. The Polka is written in 2-4 time. The gentleman holds his partner in the manner shown in the engraving; each lift first the right leg, strike twice the left heel with the right heel, and then turn as in the waltz'—a performance which must have presented a rather curious appearance. On April 13 the same paper, reviewing a polka by Jullien, says: 'It is waste of time to consider this nonsense. The weathercock heads of the Parisians have been delighted always by any innovation, but they never imported anything more ridiculous or ungraceful than this Polka. It is a hybrid confusion of Scotch Lilt, Irish Jig, and Bohemian Waltz, and needs only to be seen once to be avoided for ever!' In spite of this criticism the popularity of the dance went on increasing, and the papers of the day are full of advertisements professing to teach 'the genuine polka.' It was danced at Her Majesty's Opera by Cerito, Carlotta Grisi, and Perrot, and the following was published as 'the much celebrated Polka Dance, performed at Her Majesty's Theatre, by Carlotta Grisi and M. Perrot, composed and arranged for the Pianoforte by Alberto Sowinsky.'

Many ways of dancing the polka seem to have been in use, and in order to settle all disputes on the important matter, the 'Illustrated London News' on May 11 (having changed its opinions since April) was 'much gratified in being enabled to lay before its readers an accurate description of the *véritable*, or Drawing-room Polka, as danced at Almack's, and at the balls of the nobility and gentry in this country.' According to this description, which is accompanied by three very amusing illustrations, the polka began with an introduction (danced *vis à vis*), and consisted of five figures. Of these, the 'heel and toe' step, which was the most characteristic feature of the dance, has been quite abandoned, probably owing to the difficulty in executing it properly, which (according to 'Punch,' vol. vii. p. 172[3]) generally caused it to result in the dancers 'stamping their own heels upon other people's toes.' The account of the polka concludes as follows: 'In conclusion we would observe that La Polka is a noiseless dance; there is no stamping of heels, toes, or kicking of legs in sharp angles forward. This may do very well at the threshold of a Bohemian *auberge*, but is inadmissible into the *salons* of London or Paris. La Polka, as danced in Paris, and now adopted by us, is elegant, graceful and fascinating in the extreme; it is replete with opportunities of showing care and attention to your partner in assisting her through its performance.' The rage for the polka did not last long, and the dance gradually fell into disuse in England for many years. It has however recently come once more into vogue, but the 'toe and heel' step has happily not been revived with it.

The music of the polka is written in 2–4 time; according to Cellarius ('La Danse des Salons,' Paris, 1847) the tempo is that of a military march played rather slowly; Maelzel's metronome, ♩ = 104. The rhythm is characterised by the following 2-bar figures:

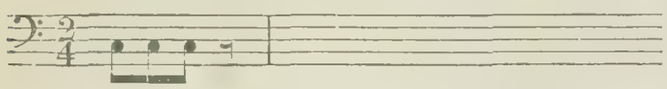


[1] Translation: 'Uncle Nimra bought a white horse for five and a half Thalers.'

[2] If this is true, the dates of Waldau's account of the origin of the dance can hardly be correct.

[3] See also 'Punch,' vol. vi, for an admirable cartoon by Leech, representing Lord Brougham dancing the polka with the woolsack.

The music can be divided into the usual 8-bar parts. In all early polkas the figure



is found in the accompaniment of the 4th and 8th bars of these parts, marking a very slight pause in the dance, but in recent examples this pause has disappeared, owing to the dance being performed somewhat faster, and more in the spirit of a waltz or galop. The first polka which was published is said to have been composed by Franz Hilmar, a native of Kopildno in Bohemia. The best national polkas are those by Labitzky, Liebmann, Prochaska, Swoboda, and Titl. [W.B.S.]

POLLEDRO, Giovanni Battista, an eminent violinist, was born at Piová near Turin June 10, 1781 (or according to another source 1776). He received his first instruction from local musicians, at 15 studied for a short time under Pugnani, and soon entered the royal band at Turin. In 1804 he became first violin in the Theatre at Bergamo, and after a short stay there began to travel. In Russia he remained for five years, and in 1814 accepted the appointment of leader of the band at Dresden, where he remained till 1824. In that year he accepted a brilliant engagement as Director general of the royal orchestra at Turin. He died at his native village Aug. 15, 1853.

Polledro was an excellent violinist and sound musician. He had the great tone and dignified style of the classical Italian school. All contemporaneous critics praise his faultless and brilliant execution not less than the deep feeling with which he played. In 1812 he met Beethoven at Carlsbad, and played with him one of Beethoven's violin-sonatas (see Thayer's Life of Beethoven, iii. 208). His published compositions consist of three concertos, some airs variés, trios and duos for stringed instruments, and a set of exercises for the violin; a Miserere and a Mass for voices and orchestra, and a Sinfonia pastorale for full orchestra. [P.D.]

POLLINI, Francesco, born at Lubiano, in Illyria, in 1763 (1774 or 1778), and a pupil of Mozart. He became a skilful pianist at an early age, his style having combined some of the distinguishing characteristics of that of his preceptor, of Clementi and of Hummel, each of whom he surpassed in some forms of the mere mechanism of the art. Pollini indeed may, in this respect, be considered as an inventor, having anticipated Thalberg in the extended grasp of the keyboard by the use of three staves (as in Thalberg's Fantasia on 'God save the Queen,' and 'Rule Britannia')—thus enabling the player to sustain a prominent melody in the middle region of the instrument, while each hand is also employed with elaborate passages above and beneath it. This remarkable mode of producing by two hands almost the effect of four, appears indeed to have been originated by Pollini in his 'Uno de' trentadue Esercizi in forma di toccata,' brought out in 1820. This piece was dedicated to Meyerbeer; the original edition containing a preface addressed to that composer by Pollini, which includes the following passage explanatory of the construction of the Toccata:—'I propose to offer a simple melody more or less plain, and of varied character, combined with accompaniments of different rhythms, from which it can be clearly distinguished by a particular expression and touch in the cantilena in contrast to the accompaniment.' Dehn appears to have been the first to draw attention to Pollini's specialty, in his preface to the original edition of Liszt's pianoforte transcriptions of the six great organ Preludes and Fugues of Bach.

Pollini's productions consist chiefly of pianoforte music, including an elaborate instruction book, many solo pieces, and some for two performers. These works are included in the catalogue of Ricordi, of Milan. Pollini also produced some stage music, and a Stabat Mater. He was highly esteemed—professionally and personally—by his contemporaries. Bellini dedicated his 'Sonnambula' 'al celebre Francesco Pollini.' The subject of this notice died at Milan in April 1847. [H.J.L.]

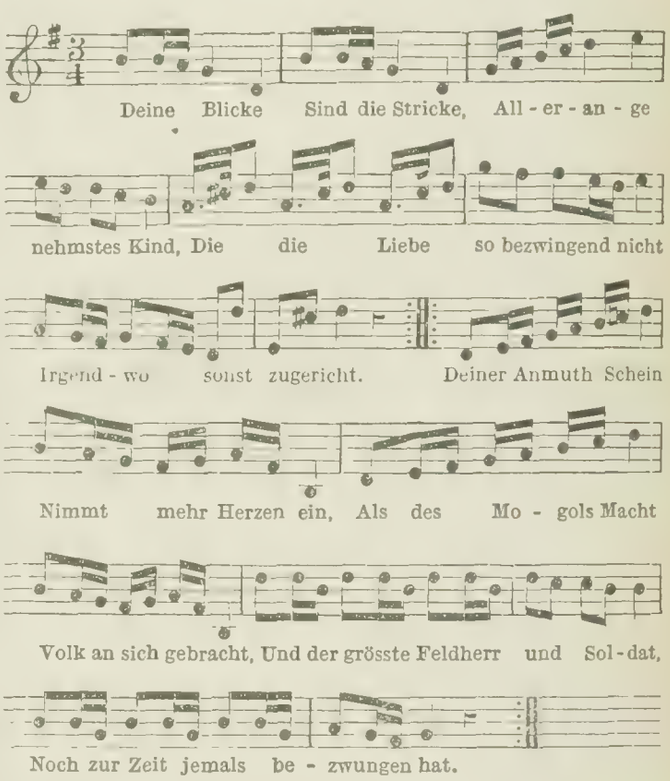
POLLY, a Ballad-opera, written by John Gay as a second part of his 'Beggar's Opera.' When about to be rehearsed a message was received from the Lord Chamberlain that the piece 'was not allowed to be acted but commanded to be suppressed,' the prohibition being supposed to have been instigated by Sir Robert Walpole, who had been satirised in 'The Beggar's Opera.' Failing to obtain a reversal of the decree Gay had recourse to the press, and in 1729 published the piece in 4to., with the tunes of the songs, and a numerous list of subscribers, by which he gained at least as much as he would have done by representation. Like most sequels, 'Polly' is far inferior to the first part, and when in 1777 it was produced at the Haymarket theatre, with alterations by the elder Colman, it was so unsuccessful that it was withdrawn after a few representations. It was revived at the same theatre June 11, 1782, and again at Drury Lane (for Kelly's benefit), June 16, 1813. [W.H.H.]

POLO or OLE, a Spanish dance accompanied by singing, which took its origin in Andalusia. It is said to be identical with the Romalis, which is 'danced to an old religious Eastern tune, low and melancholy, diatonic, not chromatic, and full of sudden pauses, which are strange and [1]startling,' and is only danced by the Spanish gipsies. It resembles the oriental dances in being full of wild energy and contortions of the body, while the feet merely glide or shuffle along the ground. The words ('coplas') of these dances are generally of a jocose character, and differ from those of the Seguidilla in wanting the 'estrevillo,' or refrain; several

[1] Walter Thornbury, 'Life in Spain.'

examples of them may be found in Preciso's 'Coleccion de Las Mejores Coplas de Seguidillas, Tirañas y Polos' (Madrid, 1816). They are sung in unison by a chorus, who mark the time by clapping their hands. Some characteristic examples of the music of the Polo will be found in J. Gansino's 'La Joya de Andalucia' (Madrid, Romero). [W.B.S.]

POLONAISE, a stately dance of Polish origin. According to Sowinski ('Les Musiciens Polonais') the Polonaise is derived from the ancient Christmas carols which are still sung in Poland. In support of this theory he quotes a carol, 'W zlobie lezy,' which contains the rhythm and close characteristic of the dance; but the fact that although in later times they were accompanied by singing, yet the earliest Polonaises extant are purely instrumental, renders it more probable than the generally received opinion as to their courtly origin is correct. According to this latter view, the Polonaise originated under the following circumstances. In 1573, Henry III. of Anjou was elected to the Polish throne, and in the following year held a great reception at Cracow, at which the wives of the nobles marched in procession past the throne to the sound of stately music. It is said that after this, whenever a foreign prince was elected to the crown of Poland the same ceremony was repeated, and that out of it the Polonaise was gradually developed as the opening dance at court festivities. If this custom was introduced by Henry III., we may perhaps look upon the Polonaise, which is so full of stateliness, as the survival of the dignified Pavans and Passomezzos which were so much in vogue at the French court in the 15th century. Evidence is not wanting to prove that the dance was not always of so marked a national character as it assumed in later times. Book vii. of Bésard's 'Thesaurus Harmonicus Divini Laurencini Romani' (Cologne 1603) consists of 'Selectiores aliquot choreæ quas Allemande vocant, germanico saltui maxime accomodatæ, una cum Polonicis aliquot et aliis ab hoc saltationis genere haud absimilibus,' and these 'choreæ Polonicæ' (which are principally composed by one Diomedes, a naturalised Venetian at the court of Sigismund III.) exhibit very slightly the rhythm and peculiarities of Polish national music. During the 17th century, although it was no doubt during this time that it assumed the form that was afterwards destined to become so popular, the Polonaise has left no mark upon musical history, and it is not until the first half of the 18th century that examples of it begin to occur.[1] In Walther's Lexicon (1732) no mention is made of it, or of any Polish music; but in Mattheson's 'Volkommener Capellmeister' (1739) we find it (as the author himself tells us) described for the first time. Mattheson notices the spondaic character of the rhythm, and remarks that the music of the Polonaise should begin on the first beat of the bar: he gives two examples (one in 3-4, the other in common time) made by himself out of the chorale 'Ich ruf' zu dir, Herr Jesu Christ.' At this time the Polonaise seems suddenly to have attained immense popularity, probably owing to the intimate connexion between Saxony and Poland which was caused by the election (1733) of Augustus III. to the Polish throne. In 1742-43 there was published at Leipzig a curious little collection of songs entitled, 'Sperontes Singende Muse,' which contains many adaptations of Polish airs: in the following example (from the second part of the work) some of the peculiarities of the Polonaise may be traced.



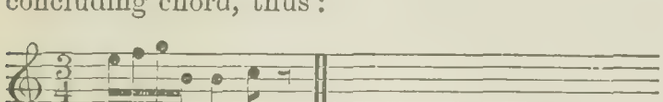
From this time the Polonaise has always been a favourite form of composition with instrumental composers, and has not been without influence on vocal music, especially in Italian opera. [See POLACCA.] Bach wrote two Polonaises (orchestral Partita in B minor, and French Suite, No. 6), besides a 'Polacca' (Brandenburg Concertos, No. 1, Dehn); and there are also examples by Handel (Grand Concerto, No. 3, in E minor), Beethoven (op. 89, Triple Concerto, and Serenade Trio, op. 8), Mozart ('Rondeau Polonaise,' Sonata in D minor), Schubert (Polonaises for 4 hands), Weber (op. 21, and the Polacca Brillante, op. 72), Wagner (for 4 hands, op. 2), as well as by the Polish composers Kurpinski and Ogniski, and above all by Chopin, under whose hands it reached what is perhaps the highest development possible for mere dance-forms. Attracted by its striking rhythmical capabilities, and imbued with the deepest national sympathy, Chopin animated the dry form of the old Polonaise with a new and intensely living spirit, altering it as (in a lesser degree) he altered the Waltz and the Mazurka, and changing it from a mere dance into a glowing tone-

1 In the Royal Library at Berlin there is preserved a MS. volume which bears the date 1725, and formerly belonged to Bach's second wife, Anna Magdalena. In it are six Polonaises, written in the owner's autograph; but it is improbable that they are all of Sebastian Bach's composition.

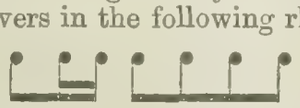
picture of Poland, her departed glory, her many wrongs, and her hoped-for regeneration. Karasowski (Life of Chopin, vol. ii.) divides his Polonaises into two classes. The first (which includes those in A major, op. 40, No. 1; F♯ minor, op. 44, and A♭ major, op. 53) is characterised by strong and martial rhythm, and may be taken to represent the feudal court of Poland in the days of its splendour. The second class (including the Polonaises in C♯ minor and E♭ minor, op. 26; in C minor, op. 40, No. 2; in D minor, B♭ major and F minor, op. 71) is distinguished by dreamy melancholy, and forms a picture of Poland in her adversity. The Fantaisie Polonaise (A♭ major, op. 61) is different in character to both classes, and is said to represent the national struggles ending with a song of triumph.

As a dance, the Polonaise is of little interest: it consists of a procession in which both old and young take part, moving several times round the room in solemn order. It does not depend upon the execution of any particular steps, although it is said to have been formerly danced with different figures, something like the English country dances. It still survives in Germany, and is danced at the beginning of all court balls. In Mecklenburg a sort of degenerate Polonaise is sometimes danced at the end of the evening; it is called 'Der Auskehr' ('The Turn-out'), and consists in a procession of the whole company through the house, each person being armed with some household utensil, and singing in chorus 'Un as de Grotvare de Grotmoder nahm.' [See GROSSVATER TANZ.]

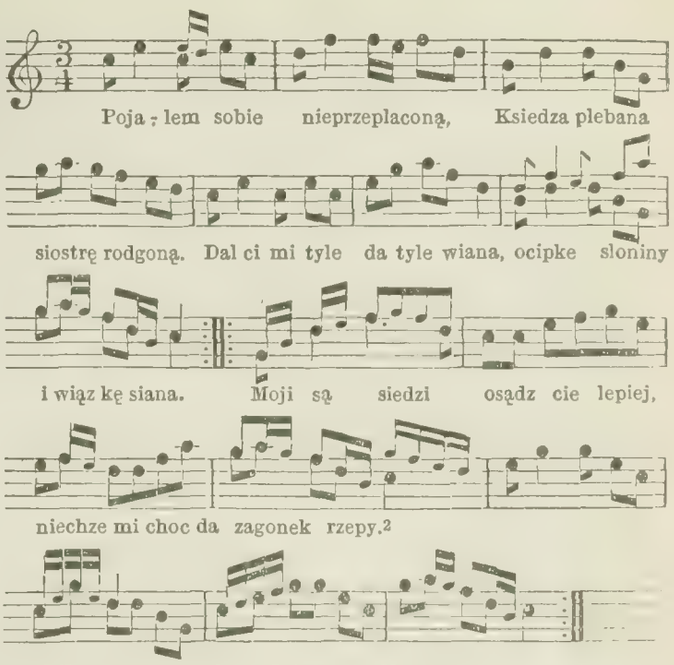
The tempo of the Polonaise is that of a march, played between Andante and Allegro: it is nearly always written in 3–4 time,[1] and should always begin on the first beat of the bar. It generally consists of two parts, sometimes followed by a trio in a different key; the number of bars in each part is irregular. The chief peculiarity of the Polonaise consists in the strong emphasis falling repeatedly on the half-beat of the bar, the first beat generally consisting of a quaver followed by a crotchet (see the Polonaise given below). Another peculiarity is that the close takes place on the third beat, often preceded by a strong accent on the second beat. The last bar should properly consist of four semiquavers, the last of which should fall on the major seventh, and be repeated before the concluding chord, thus:



The accompaniment generally consists of quavers and semiquavers in the following rhythm:



The following example, although not conforming entirely with the above rules, is nevertheless interesting as a genuine Polonaise danced and sung at weddings in the district of Krzeszowice in Poland at the present day.



The notes printed in small type are variations of the tune which are performed in some districts. [W.B.S.]

POLONINI, ENTIMIO, a singer who began his career in England April 13, 1847, at Covent Garden as Raimondo in 'Lucia,' with fair success, and displayed 'a very sonorous voice which told well in the concerted music.'[3] He next played, May 8, De Fiesque, on the production in England of Donizetti's 'Maria di Rohan,' Fiorello ('Il Barbiere'), Antonio ('Le Nozze') etc. 'He has a fine bass voice and sings like a thorough musician.'[4] For the space of 21 years he sang at the Royal Italian Opera, and proved of great service in small but not altogether unimportant parts, besides the above, such as, Masetto, Il Ministro (Fidelio), Melcthal, Mathisen (Prophète), Alberto (La Juive), Borella (Masaniello) etc., and occasionally in those of more importance, with success, viz. Orbazzano and Alidoro, on the revivals of 'Tancredi,' 'La Cenerentola,' Leporello, St. Bris, etc. The rest of the year he was engaged either at Paris, or St. Petersburg, etc. The enumeration of his parts is sufficient to show that Signor Polonini, in addition to his good qualities as a singer, was a versatile actor. He was characterised by Mr. Chorley as 'one of the most valuable artists of a second class ever possessed by a theatre.' He has for some years retired from public life. A son of his, ALESSANDRO, a baritone, has appeared in Italy and elsewhere. [A.C.]

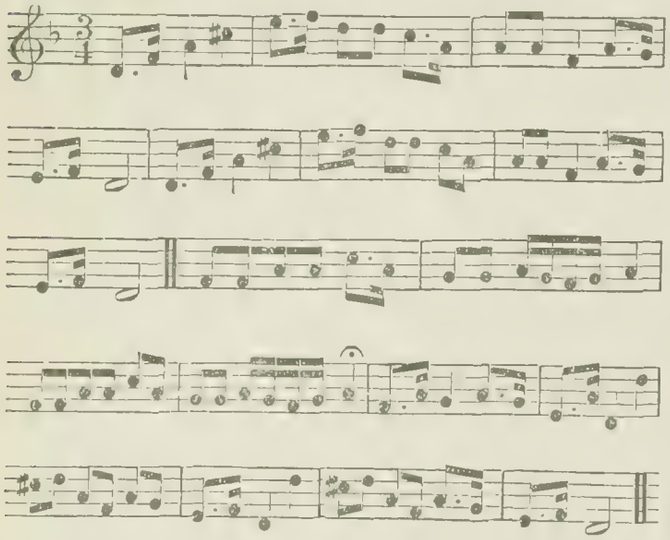
POLSKA, a national Swedish dance, popular in West Gothland, something like a Scotch reel in character. Polskas are usually written in minor keys, although they are occasionally found in the major. The example which is given below ('Neckens Polska') is well known, as Ambroise

[1] Mattheson says it may be written in common time.

[2] Translation:—I have taken for my wife the reverend Parson's own sister. He gave me as her marriage portion a piece of bacon and a bundle of hay. My neighbours, what do you think? The fellow has refused to give me even a little plot of land sown with turnips.

[3] 'Musical World,' April 17, 1847. [4] Ib. Aug. 21, 1847.

Thomas has introduced it in Ophelia's mad scene in 'Hamlet.' Other examples will be found in Ahlstrom's 'Walda Svenska Folksånga' (Stockholm, 1850).

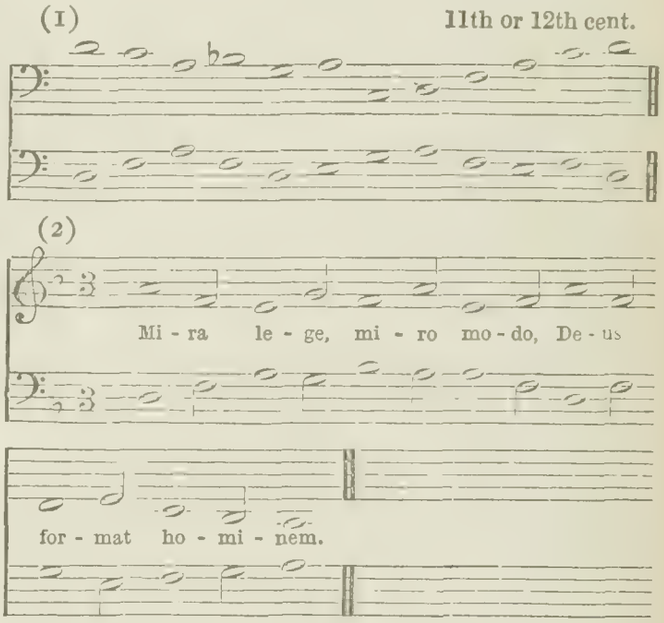


[W.B.S.]

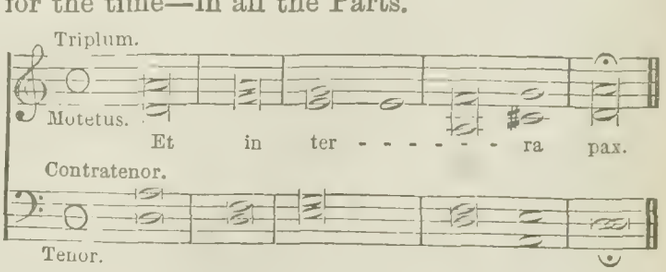
POLYEUCTE. Opera in 5 acts; the words (founded on Corneille's tragedy) by Barbier and Carré, the music by Gounod. Produced at the Opera, Paris, October 7, 1878. The name is the same as POLIUTO. [G.]

POLYPHONIA (Eng. Polyphony, from the Gr. *πολὺς*, many, *φωνὴ*, a voice). A term applied, by modern Musical Historians, to a certain species of unaccompanied Vocal Music, in which each Voice is made to sing a Melody of its own; the various Parts being bound together, in obedience to the laws of Counterpoint, into an harmonious whole, wherein it is impossible to decide which Voice has the most important task allotted to it, since all are equally necessary to the general effect. It is in this well-balanced equality of the several Parts that Polyphonia differs from Monodia; in which the Melody is given to one Part only, while supplementary Voices and Instruments are simply used to fill up the Harmony. [See MONODIA.]

The development of Polyphony from the first rude attempts at Diaphonia, Discant, or Organum, described by Franco of Cologne, Guido d'Arezzo, and others, was so perfectly natural, that, notwithstanding the slowness of its progress, we can scarcely regard the results it eventually attained in any other light than that of an inevitable consequence. The first quest of the Musicians who invented 'Part-Singing' was, some method of making a Second Voice sing notes which, though not identical with those of the Canto fermo, would at least be harmonious with them. While searching for this, they discovered the use of one Interval after another, and employed their increased knowledge to so good purpose, that, before long, they were able to assign to the Second Voice a totally independent Part. It is true, that, to our ears, the greater number of their progressions are intolerable; less, however, because they mistook the character of the Intervals they employed, than because they did not at first understand the proper method of using them in succession. They learned this in course of time; and, discarding their primitive Sequences of Fifths and Fourths, attained at last the power of bringing two Voice parts into really harmonious relation with each other. The rate of their progress may be judged by the two following examples, the first of which is from a MS. of the end of the 11th or beginning of the 12th century, in the Ambrosian Collection at Milan; and the second, from one of the 14th, in the Paris Library.

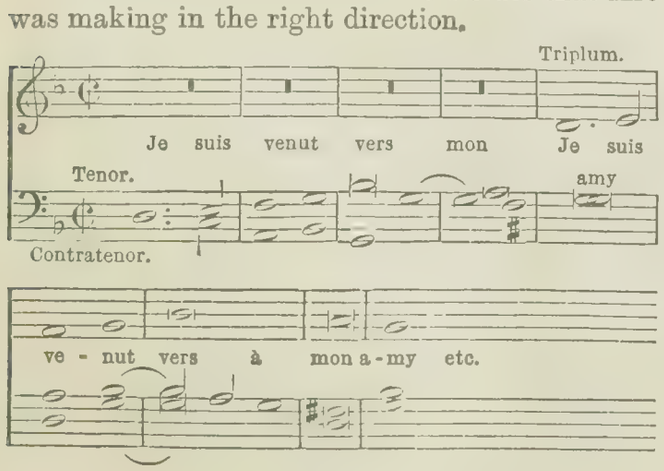


Now, in both these cases, the two Parts are equally melodious. There are no long chains of reiterated notes, merely introduced, as Guido would have introduced them, for the purpose of supporting the Melody upon a Pedal-Point: but, each Part has its own work to do; and it cannot fairly be said that one is more important than the other. [See ORGANUM.] Equal care was taken to preserve an absolutely independent Melody, in each several Part, when, at a later period, Composers attempted the production of Motets, and other similar works, in three and four Parts. We find no less pains bestowed upon the Melody of the Triplum,[1] in such cases, than upon that of the Tenor, or Motetus; and very rarely indeed does the one exhibit more traces of archaic stiffness than the other. The following example from a Mass composed by Guillaume de Machault for the Coronation of Charles V, in the year 1364, shews a remarkable freedom of Melody—for the time—in all the Parts.



[1] That is, the Third Part—whence our English word, Treble. The Fourth Part was sometimes called Quadruplum, and the Fifth, Quincuplum. The principal part, containing the Canto fermo, was sometimes called Tenor, and sometimes Motetus. The term Contratenor was applied to the part which lay nearest the Tenor, whether immediately above, immediately below, or exactly of equal compass with it. This part was also frequently called Medius.

Rude as this is, it manifests a laudable desire for the attainment of that melodious motion of the separate Parts, which, not long after the death of its Composer, became the distinguishing characteristic of mediæval Music. With all their stiffness, and strange predilection for combinations now condemned as intolerable, we cannot but see that the older writers did their best to provide every Singer with an interesting Part. Nevertheless, true Polyphony, was not yet invented. For that, it was necessary, not only that every Voice should sing a melodious strain; but, that each should take its share in the elucidation of one single idea, not singing for itself alone, but answering its fellow Voices, and commenting, as it were, upon the passages sung by them. In other words, it was necessary that every voice should take up a given Subject, and assist in developing it into a Fugue, or Canon, or other kind of composition for which it might be best suited. This was the one great end and aim of true Polyphony; and, for the practical realisation of the idea, we are undoubtedly indebted to the Great Masters of the early Flemish School, to whose ingenuity we owe the invention of some of the most attractive forms of Imitation and Fugal Device on record. The following quotation from a 'Chanson à trois voix' by one of the earliest of them, Antonius Busnois, who is known to have been employed as a Singer in the Chapel of Charles the Bold, Duke of Burgundy, in the year 1467, will serve to shew the enormous strides that Art was making in the right direction.



Here we see a regular Subject started by the Tenor, and answered by the Triplum, note for note, with a clearness which at once shews the unity of the Composer's design. When this stage was reached the Polyphonic School may be said to have been fairly established; and it only remained to bring out its resources by aid of the genius of the great writers who practised it. The list of these Masters is a long one; but certain names stand out before all others, as borne by men whose labours have left an indelible impression upon the Schools to which they belonged. Of these men, Guillaume Dufay was one, and Ockenheim another; but the greatest genius of the 15th century was undoubtedly Josquin des Prés, the ingenuity of whose contrupuntal devices has never been exceeded. Uberto Waelrant, Jacques Archadelt, and Adrian Willaert, wrote in simpler form, but bequeathed to their successors an amount of delicate expression which was turned to excellent account by their scholars in Italy. Their gentler fervour was eagerly caught up by Costanzo Festa, Giovanni Croce, Luca Marenzio, and a host of others whose talents were scarcely inferior to theirs; while, *facile princeps*, Palestrina rose above them all, and clothed Polyphony with a beauty so inimitable, that his name has been bestowed upon the School as freely as if he had lived in the 15th century to inaugurate it.

A careful study of the works of this great writer will shew that, when regarded from a purely technical point of view, their greatest merit lies in the strictness with which the Polyphonic principle has been carried out, in their development. Of course, their real excellence lies in the genius which dictated them: but, setting this aside, and examining merely their mechanical structure, we find, not only that every Part is necessary to the well-being of the whole, but, that it is absolutely impossible to say in which Part the chief interest of the Composition is concentrated. In this respect, Palestrina has carried out, to their legitimate conclusion, the principles we laid down in the beginning of our article, as those upon which the very existence of Polyphony depended. It would seem impossible that Art could go beyond this; and, in this particular direction, it never has gone beyond it. It is impossible, now, even to guess what would have happened had the Polyphonic School been cultivated, in the 17th century, with the zeal which was brought to bear upon it in the 16th. That it was not so cultivated is a miserable fact which can never be sufficiently deplored. Palestrina died in 1594; and, as early as the year 1600, his work was forgotten, and its greatest triumphs contemned as puerilities. Monteverde sapped the foundations of the School by his contempt for contrapuntal laws. Instrumental Accompaniment was substituted for the ingenuity of pure vocal writing. The Choir was sacrificed to the Stage. And, before many years had passed, the Polyphonic School was known no more, and Monodia reigned triumphant. Happily, the laws to which Palestrina yielded his willing obedience, and to the action of which his Music owes so much of

its outward and technical value, are as well understood now as in the days in which he practised them. There is, therefore, no reason why the practice of the purest Polyphony should not, some day, be revived among us. We see but little promise of such a consummation at the present moment; but it is something to know that it is not impossible. [W.S.R.]

POMPOSO, 'pompously,' is used by Schumann in the Humoreske, op. 20, for pianoforte. He marks the last movement but one 'Mit einigem Pomp,' or 'Un poco pomposo.' Handel had employed the term a century before in the first movement of the overture to Samson. It is also used by Sterndale Bennett as the title of the trio in the Symphony G minor, op. 43. [J.A.F.M.]

PONCHIELLI, Amilcare, was born at Paderno Fasolaro, Cremona, Sept. 1, 1834. In Nov. 1843 he entered the Conservatorio of Milan, and remained there till Sept. 1854. Two years afterwards, on Aug. 30, 1856, he was able to produce at the Concordia at Cremona his first opera, 'I promessi Sposi.' His next were 'La Savojarda,' Cremona, Jan. 19, 1861; 'Roderico,' Piacenza, 1864; and 'La Stella del Monte,' in 1867. Hitherto Signor Ponchielli's reputation had been confined to the provinces; but in 1872 he was fortunate enough to find an opportunity of coming before the general public at the opening of the New Theatre 'Dal Verme' at Milan, where his 'Promessi Sposi' was performed Dec. 5. He rewrote a considerable portion of the opera for the occasion, and its success was immediate and complete. The managers of the theatre of 'La Scala' at Milan at once commissioned him to write a ballet, 'Le due Gemelle,' which was produced there Feb. 1873, received with frantic enthusiasm, and immediately published (Ricordi). This was followed by a ballet, 'Clarina' (Dal Verme, Sept. 1873); a ('Scherzo' or comedy, 'Il parlatore eterno' 'Lecco, Oct. 18, 1873); and a piece in 3 acts, 'I Lituani,' given with immense success at the Scala, March 7, 1874. In the following year he wrote a cantata for the reception of the remains of Donizetti and Simone Mayr at Bergamo, a work of some extent and importance, which was performed there Sept. 13, 1875. On April 8, 1876, he produced a new opera at the Scala called 'Gioconda,' with the same success as before; and on Nov. 17, 1877, he gave at the 'Dal Verme,' the scene of his first triumph, a 3-act piece called 'Lina,' which was a *réchauffé* of his early opera 'La Savojarda,' and does not appear to have pleased. His last opera, 'Il Figliuol prodigo,' was produced at the Scala, Dec. 26, 1880, with astonishing success.

Signor Ponchielli is married to Teresina Brambilla, a singer, and a member of the musical family of that name. He enjoys a position in Italy second only to Verdi, whose successor he is universally regarded as being. Out of Italy his works have as yet hardly begun to penetrate. In England, the 'Danze delle Ore,' some brilliant and elegant ballet music from his 'Gioconda,' played at the Crystal Palace, Oct. 25, 1879, and a selection from 'Le due Gemelle,' also played at the Crystal Palace, Nov. 5, 1880, are probably the only productions of his that have been heard in public.

The above notice is indebted to Paloschi's 'Annuario' and Pougin's Supplement to Fétis. [G.]

PONIATOWSKI, Joseph Michael Xavier Francis John—nephew of the Prince Poniatowski who was a marshal of the French army and died in the battle of Leipzig, Oct. 19, 1812, and whose portrait was found by Mendelssohn at Wyler[1] inscribed 'Brinz Baniadofsgi'—Prince of Monte Rotondo, born at Rome, Feb. 20, 1816. He devoted himself so entirely to music that he can hardly be called an amateur. He regularly attended the musical classes at the Lycée at Florence, and also studied under Ceccherini. He made his début at the Pergola, Florence, as a tenor singer; produced his first opera, 'Giovanni da Procida'—in which he sang the title rôle—at Lucca in 1838, and from that time for more than 30 years supplied the theatres of Italy and Paris with a large number of operas. After the Revolution of 48 he settled in Paris as plenipotentiary of the Grand Duke of Tuscany, and was made Senator under the Empire. After Sedan he followed his friend Napoleon III. to England, produced his opera 'Gelmina' at Covent Garden, June 4, 1872, his operetta 'Au travers du mur' at St. George's Hall, June 6, 1873, and selections from his Mass in F at Her Majesty's Theatre, June 27, 1873, and died July 3 of the same year. He was buried at Chislehurst.

His operas are 'Giovanni da Procida' (Florence and Lucca 1838); 'Don Desiderio' (Pisa 1839, Paris 1858); 'Ruy Blas' (Lucca 1842); 'Bonifazio' (Rome 1844); 'I Lambertazzi' (Florence 1845); 'Malek Adel' (Genoa 1846); 'Esmeralda' (Leghorn 1847); 'La Sposa d'Abido' (Venice 1847); 'Pierre de' Medicis' (Paris 1860); 'Au travers du mur' (Ibid. 1861); 'L'Aventurier' (Ibid. 1865); 'La Contessina' (Ibid. 1868).

His music evinces much melody and knowledge of the voice, considerable familiarity with stage effect, fluency and power of sustained writing —everything in short but genius and individuality. His manners were remarkably simple and affable, and he was beloved by all who knew him. [G.C.]

PONS, Jose, a Spanish musician, born at Gerona, Catalonia, in 1768. He studied under Balins, chapel-master at Cordova. Pons was chapel-master of the cathedral of his native town, a post which he left for that at Valentia, where he died in 1818. He is distinguished for his Vilhancicos or Christmas pieces, a kind of oratorios for voices with orchestra or organ, which are said to be still extensively performed in his own country. He wrote also Misereres for the Holy Week. Eslava (Liro Sacro-hispana iv.) gives a 'Letrida' of his, 'O madre,' for 8 voices, and characterises him as the typical composer of the Catalan school, as opposed to that of Valencia. [G.]

[1] Letter, Aug. 9, 1831.

PONTE, Lorenzo da,[1] the elegant poet who wrote the words for three of Mozart's operas—Figaro, Don Giovanni, and Così fan tutte—was born at Ceneda, in the Venetian States, March 10, 1749. He borrowed his name from a bishop, his benefactor, but was the child of very poor parents, and was left without any education till he was fourteen. He was then allowed to enter the Seminary of his native town, and after studying five years went to Venice to seek his fortune by the aid of his pen. In this gay city, the home of theatres and every kind of pleasure, he had a number of amorous adventures, and was at last obliged to escape to Treviso, where he was appointed professor of rhetoric. But having spoken against the government of the Republic, he was ordered to leave. He then took refuge in Vienna, where Salieri[2] presented him to the Emperor Joseph II., who made him court poet in place of Metastasio recently deceased. Here, notwithstanding the difference of their characters, he became an intimate friend of Mozart, and wrote the libretti for the three operas above named. Michael Kelly, then in Vienna, says[3] that he was a great coxcomb, supposed to be originally a Jew who had turned Christian and dubbed himself an abbé. After the death of the Emperor, Feb. 20, 1790, he was obliged to quit Vienna, and at Trieste married an English lady. Finding no prospect of permanent employment in Austria, he took his wife to Paris in August 1792. But Paris was then too stormy for him, and he soon left for London. Here he became a favourite teacher of the Italian language, and was appointed poet to the Italian Opera, then under Taylor's management. As part of his duty he travelled in Italy in 1798[4] in search of singers. In 1801 he took a part of Domenico Corri's music shop to sell Italian books, but this soon ended in pecuniary difficulties. He was in the habit of getting bills discounted for Taylor, and was imprudent enough to endorse them, thus making himself liable for several thousand pounds. As Taylor was not accustomed to pay his debts, Da Ponte naturally got into great difficulties, and his only resource was to join his wife at New York. So on March 5, 1803,[5] this strange man sailed for America, and after a miserable passage of 86 days arrived at Philadelphia *en route* to New York. Here he was unsuccessful as a dealer in tea, tobacco, and drugs, but became a great favourite as professor of Italian. In 1811 he went to Sunbury (Pennsylvania) to manufacture liqueurs, but as usual lost his money, and returned to his pupils at New York. He now began to feel the weight of years and the disrepute into which his conduct had brought him, when in 1826 Manuel Garcia arrived with his family in New York. Though they had never met, Da Ponte rushed to Garcia's lodgings, and announced himself as 'Da Ponte, author of the libretto of Don Giovanni, and the friend of Mozart.' Garcia embraced the poet, singing 'Fin ch' han dal vino,' and ultimately the opera was performed at New York, Garcia playing the part of Don Giovanni, and his daughter (afterwards Madame Malibran) that of Zerlina. This was the last happy day for Da Ponte. He died at New York August 17, 1838, aged 89, neglected and in the deepest misery. [V. de P.]

[1] In his autobiography ('Memorie di L. da Ponte,' New York 1829-30) he spells his name thus, and so do all other writers, except M. de la Chavanne, his translator ('Memoires de L. d'Aponte,' Paris 1860).

[2] P. Scudo, in his charming account of Da Ponte and society in Venice in the 18th century ('Critique et Littérature Musicales,' Paris 1856), says Sarti, but Da Ponte in his autobiography says Salieri.

[3] 'Reminiscences,' London 1826.

[4] Date in Meyer's 'Grosses Conversations Lexicon,' Hilburghausen 1850.

[5] Mendel, 'Musikalisches Conversations Lexicon,' says 1805.

PONTICELLO (Ital. for the bridge of a stringed instrument) or 'sul ponticello'—a term indicating that a passage on the violin, tenor, or violoncello, is to be played by crossing the strings with the bow close to the bridge. In this way the vibration of the string is partially stopped, and a singular hissing sound produced. It occurs in solo pieces as well as in concerted music. The closing passage of the Presto, No. 5 of Beethoven's Quartet in C♯ minor, op. 131, is a well-known instance. [P.D.]

PONTIFICAL CHOIR. See Sistine Choir.

POOLE, Elizabeth, a very favourite English actress and mezzo-soprano singer, born in London April 5, 1820, made her first appearance in a pantomime at the Olympic Theatre in 1827, and continued for some years to play children's parts—Duke of York to Kean's Richard; Albert to Macready's Tell; Ariel, etc. In 1834 she came out in opera at Drury Lane, as the Page in 'Gustavus'; in 1839 visited the United States and sang in 'Sonnambula' and other operas; in 1841 was engaged by Mr. Bunn for his English operas at Drury Lane. Here she sang many parts, especially Lazarillo in 'Maritana.' At the same time her ballads and songs were highly popular at concerts, both in London and the Provinces. Miss Poole appeared at the Philharmonic, June 15, 1846. She was a leading singer in the operas brought out at the Surrey Theatre by Miss Romer, in 1852, where she sang in 'The Daughter of the Regiment,' 'Huguenots,' etc., and was also much engaged by Charles Kean, F. Chatterton, and German Reed. Miss Poole (then Mrs. Bacon) retired from public life in 1870, and is still living. She was a clever, indefatigable, artist, always to be relied upon. Her voice was good, extensive, and very mellow and sympathetic in quality; her repertoire in opera was very large, and in English songs and ballads she had no rival. Her portrait is preserved in the collection of the Garrick Club. [G.]

POOLE, Miss. See Dickons, Mrs., vol. i. p. 444*b*.

POPPER, David, born June 18, 1846, at Prague, in the Conservatorium of which place he received his musical education. He learnt the violoncello under Goltermann, and soon gave evidence of the possession of a remarkable talent. In 1863 he made his first musical tour in Germany, and quickly rose to very high rank as a player. In the course of the journey he met von Bülow, who was charmed with his playing,

performed with him in public, and induced Prince Hohenzollern to make him his 'Kammervirtuos.' Popper afterwards extended his tour to Holland, Switzerland, and England. At the festival conducted by Liszt at Carlsruhe in 1864, he was allowed to be the best of all the solo-players. In 1867 he played for the first time in Vienna, where he was made first solo-player at the Hof-oper, a post, however, which he resigned after a few years, that he might continue his concert tours on a great scale. His tone is large and full of sentiment; his execution highly finished, and his style classical. His compositions are eminently suited to the instrument, and are recognised as such by the first living cello-players. His most popular pieces are the Sarabande and Gavotte (op. 10), Drei Stücke (op. 11), and a Concert Polonaise (op. 28). [C.F.P.]

Early in 1872 Popper married Fräulein SOPHIE MENTER, a very distinguished pianoforte-player, daughter of Joseph Menter the cellist, who was born at Munich July 29, 1848, and after a childhood of great precocity entered the Munich Conservatorium under Professor Leonhard. At 13 she left that establishment for private tuition under Niest, and at a later period under Liszt; in her 15th year took her first artistic *tournée*; in 1867 appeared at the Gewandhaus, Leipzig, and has since taken her place throughout Germany as one of the great players of the day. [G.]

POPULAR ANCIENT ENGLISH MUSIC. The classical work on this subject is[1] entitled 'Popular Music of the Olden Time: a Collection of the Ancient Songs, Ballads, and Dance Tunes, illustrative of the National Music of England. With short introductions to the different reigns, and notices of the Airs from writers of the 16th and 17th centuries. Also a Short Account of the Minstrels. By W. Chappell, F.S.A. The whole of the airs harmonized by G. A. Macfarren. London: Cramer, Beale and Chappell.' The foundation of the above work was published in 1838–40 under the title of 'A Collection of National English Airs, consisting of Ancient Songs, Ballads and Dance Tunes, interspersed with remarks and anecdote, and preceded by an Essay on English Minstrelsy. The Airs harmonized for the Pianoforte, by W. Crotch, Mus. Doc., G. Alex. Macfarren, and J. Augustine Wade. Edited by W. Chappell.' This work contains 245 tunes, and was out of print in about 14 years time from the date of its publication. The 'Popular Music' was published in 17 parts (2 large 8vo. volumes, and 797 pages) and contains more than 400 airs with five facsimiles of music and two copious Indexes. The following are the headings of the chapters :—

VOL. I.

Minstrelsy from the Saxon period to the reign of Edward I. Music of the Middle Ages, and Music in England to the end of the 13th century.

English Minstrelsy from 1270 to 1480, and the gradual extinction of the old minstrels.

Introduction to the reigns of Henry VII., Henry VIII., Edward VI., and Queen Mary.

Songs and Ballads of the reigns of Henry VII., Henry VIII., Edward VI., and Queen Mary.

Introduction to the reign of Queen Elizabeth.

Songs and Ballads of the reign of Queen Elizabeth.

Introduction to the reign of James I.

Songs and Ballads of the reigns of James I. and Charles I.

VOL. II.

Conjectures as to Robin Hood.

Ballads relating to the adventures of Robin Hood.

Puritanism in its effect upon Music and its accessories; and Introduction to the Commonwealth Period.

Songs and Ballads of the Civil War, and of the time of Cromwell.

Introduction to the reign of Charles II.

Songs and Ballads from Charles II. to William and Mary.

Remarks on Anglo-Scotch Songs.

Specimens of Anglo-Scotch Songs.

Introduction to the reigns of Queen Anne, George I., and George II.

Songs and Ballads of the reigns of Queen Anne, George I., and George II.

Traditional Songs of uncertain date.

Religious Christmas Carols.

Appendix, consisting of additions to the Introductions, and of further remarks upon the tunes included in both volumes.

Characteristics of National English Airs, and summary.

[W.B.S.]

[1] The title has been somewhat modified in later editions.

PORPORA, NICCOLA,[1] or NICCOLO, ANTONIO, composer and celebrated teacher of singing, was born at Naples August 19, 1686. His father, a bookseller with a numerous family, obtained admission for him at a very early age to the Conservatorio of S. M. di Loreto, where he received instruction from Gaetano Greco, of Venice, Padre Gaetano of Perugia, and Francesco Mancini, all former pupils of the same school. His first opera was 'Basilio, re di Oriente,' written for the theatre 'de' Fiorentini.' On the title-page of this work he styles himself 'chapel-master to the Portuguese Ambassador.' The opera of 'Berenice,' written in 1710 for the Capranica theatre at Rome, attracted the notice and elicited the commendation of Handel. It was followed by 'Flavio Anicio Olibrio' (1711); by several masses, motets and other compositions for the church; by 'Faramondo' (1719) and 'Eumene' (1721), on the title-page of which last work he calls himself '*Virtuoso* to the Prince of Hesse Darmstadt.' Having been appointed master of the Conservatorio of San Onofrio, he wrote for it an oratorio, 'La Martiria di Santa Eugenia,' which had much success on its first performance there in 1722. In 1723 he wrote for the wedding of Prince Montemiletto a cantata, in which Farinelli sang. He had, before this time, established the school for singing whence issued those wonderful pupils who have made their master's name famous. After 'L'Imeneo' came 'Amare per regnare' and 'Semiramide' (according to Villarosa); and a MS. in the Conservatoire of Paris gives evidence of another opera, 'Adelaida,' belonging to 1723 and performed at Rome. In 1724 Hasse arrived at Naples, with the avowed intention of becoming Porpora's pupil. After a short trial however he deserted this master in favour of Alessandro Scarlatti, a slight which Porpora never forgave, and for which, in later years, he had abundant opportunity of revenging himself on Hasse. [See HASSE.]

Porpora's natural gifts were united to an extremely restless, changeable disposition. He seems never to have remained very long in one place, and the dates of many events in his life are uncertain. It appears that in 1725 he set off for Vienna, but he must have stopped at Venice on his way, as there is evidence to show that he was appointed to the mastership of one of the four great singing-schools for girls there, that of 'La Pietà.' He hoped to get a hearing for some

[1] In his autographs Niccola, but on the title-pages of works published by himself, and in contemporary MS. copies, Niccolo.

of his music at Vienna, but the Emperor Charles VI. disliked his florid style and profuse employment of vocal ornament, and gave him no encouragement to remain. He therefore returned as far as Venice, where he produced his opera 'Siface,' and was appointed master to another of the schools above mentioned, that of the 'Incurabili.' For his pupils at this institution he wrote the vocal cantatas, twelve of which he published in London in 1735, and which are among his best compositions.

In 1728 he set out for Dresden, where the Electoral Princess, Marie Antoinette, was eager to receive instruction from the famous *maestro*. On the way thither he revisited Vienna, hoping for a chance of effacing the unfavourable impression he had formerly made; but the Emperor's prejudice against him was so strong, and carried so much weight, as to make it seem probable that he would once more find nothing to do. He found a friend, however, in the Venetian ambassador, who not only received him under his own roof, but succeeded in obtaining for him an Imperial commission to write an oratorio, accompanied by a hint to be sparing in the use of trills and flourishes. Accordingly, when the Emperor came to hear the work rehearsed, he was charmed at finding it quite simple and unadorned in style. Only at the end a little surprise was reserved for him. The theme of the concluding fugue commenced by four ascending notes, with a trill on each. The strange effect of this series of trills was increased as each part entered, and in the final *stretto* became farcical outright. The Emperor's gravity could not stand it, he laughed convulsively, but forgave the audacious composer and paid him well for his work. The name of this oratorio is lost.

Porpora was warmly received at Dresden, where he was specially patronised by his pupil, the Electoral Princess, to whom he taught not only singing, but composition. So it happened that when Hasse, with his wife Faustina, appeared on the scene in 1730, he found his old master, who had never forgiven his pupil's defection, in possession of the field. A great rivalry ensued, the public being divided between the two *maestri*, who themselves lost no opportunity of exchanging offices anything but friendly. The erratic Porpora however did not by any means spend his whole time in the Saxon capital. Early in 1729 he had produced 'Semiramide riconosciuta' at Venice, and in April of the same year had obtained leave of absence in order to go to London, there to undertake the direction of the opera-house established by an aristocratic *clique* in opposition to that presided over by Handel. The speculation was a failure, and both houses suffered serious losses. Porpora never was popular in England as a composer, and even the presence of Senesino among his company failed to ensure its success, until, during a sojourn in Dresden, he succeeded in engaging the great Farinelli, who appeared in London in 1734, with Senesino and Signora Cuzzoni, and saved the house. Porpora got his Dresden engagement cancelled in order to remain in London, but that he must have paid several visits to Venice is certain, as 'Annibale' was produced there by him in 1731, and 'Mitridate' was written there in 1733. It seems that he finally quitted England in 1736, at the end of Farinelli's third and last season in that country, and that he established himself again at Venice; for on the title-page of a MS. in the Conservatoire at Paris dated 1744, he is described as director of the 'Ospedaletto' school of music there. About 1745 he once more went to Vienna, this time in the suite of the Venetian ambassador, Correr. During a sojourn there of some years he published a set of twelve sonatas for violin, with figured bass, one of his most esteemed compositions, of which he says in the dedicatory epistle that they are written 'in the diatonic, chromatic and enharmonic styles'; describing himself as now chapel-master to the King of Poland. At this time he became acquainted with the young Haydn, whom he helped with instruction and advice. [See vol. i. p. 704 *b*.]

He returned to Naples, his native town, between 1755 and 1760. Gazzaniga, his pupil, in a biographical notice, says it was in 1759, and that in 1760 he succeeded Abos in the chapel-mastership of the cathedral of Naples and of the Conservatorio of San Onofrio. In the same year his last opera 'Camilla' was represented, with no success, After that he wrote nothing but one or two pieces for the Church. He had outlived his reputation as a composer. His latest years were passed in extreme indigence, a fact hard to reconcile with that of his holding the double appointment named above, but which is vouched for by contemporary writers, and by Villarosa, and is a disgrace to the memory of his pupils, especially Farinelli and Caffarelli, who owed their fame and their vast wealth in great measure to his instructions. Villarosa says that he died of pleurisy in 1767: Gazzaniga affirms that his death was the result of an injury to his leg in 1766. Both may be true: it is at least certain that a subscription was raised among the musicians of the town to defray the expenses of the poor old *maestro's* burial.

Thirty-three operas of Porpora's are mentioned by Florimo, but he probably wrote many more. They may have been popular with singers as showing off what was possible in the way of execution, but he was devoid of dramatic genius in composition. Nothing can be more tedious than to read through an opera of his, where one conventional, florid air succeeds another, often with no change of key and with little change of time; here and there a stray chorus of the most meagre description. When not writing for the stage he achieved better things. His cantatas for a single voice, twelve of which were published in London in 1735, have merit, and elevation of style, and the same is asserted of the sonatas published at Vienna, for violin, with bass. The 'six free fugues' for clavichord (first published by Clementi in his 'Practical Harmony,' afterwards by M.

Farrenc, in the first number of the 'Trésor des Pianistes') will repay attention on the part of the modern student. There is a freshness and piquancy about them which contrasts strangely with his operas, and give an idea of what the talent was that so impressed his contemporaries. Specimens of his violin music will be found in Choron's 'Principes,' David's 'Hoheschule,' and Alard's 'Maîtres classiques'; and 6 Latin duets on the Passion, and some Solfeggi, were edited by Nava and published by Breitkopfs.

Porpora was well educated, and conversant with Latin and Italian literature; he wrote verses with success, and spoke with ease the French, German, and English languages. In his youth he was bold, spirited, and gay, full of wit and vivacity, but in age his disposition and temper became soured by misfortune. He was celebrated for his power of repartee. The following anecdote, extracted from the 'Dictionary of Musicians,' has been told of other people since his time, but seems to be true of him:—'Passing one day through an abbey in Germany, the monks requested him to assist at their office, in order to hear their organist, whose talents they greatly extolled. The office finished, Well, what think you of our organist? said the prior. Why, replied Porpora, he is a clever man. And likewise, interrupted the prior, a good and charitable man, and his simplicity is really evangelical. Oh! as for his simplicity, replied Porpora, I perceived that; for his left hand knoweth not what his right hand doeth.'

In one department he has earned for himself an unique and lasting fame. He was the greatest singing-master that ever lived. No singers, before or since, have sung like his pupils. This is made certain by the universal contemporary testimony as to their powers, by the music which was written for them and which they performed, and by the fact that such relics of a grand pure style of vocalisation as remain to us now, have been handed down in direct succession from these artists. He has left us no written account of his manner of teaching, and such *solfeggi* of his as we possess differ only from those of his contemporaries by being perhaps more exclusively directed than others are towards the development of *flexibility* in the vocal organ. In musical interest they are inferior to those of Scarlatti and Leo, and to some of those of Hasse. There is little difference between them and his songs, which are for the most part only so many *solfeggi*. The probability is that he had no peculiar method of his own, but that he was one of those artists whose grand secret lies in their own personality. To a profound knowledge of the human voice in its every peculiarity, and an intuitive sympathy with singers, he must have united that innate capacity of imposing his own will on others which is a form of genius. Powerful indeed must have been the influence that could keep a singer (as he is said to have kept Caffarelli) for five years to one sheet of exercises. And if we are inclined to think that when Caffarelli was dismissed with the words 'You may go, you are the greatest singer in Europe,' there must still have been a good deal for him to learn which that sheet of exercises could not teach him, still, no *mechanical* difficulty then stood between him and the acquisition of these qualities; the instrument was perfect. And the best proof of this is that when Charles VI. expressed to Farinelli his regret that so consummate a vocalist should devote himself entirely to exhibitions of skill and *bravura*, and Farinelli, struck by the truth of the criticism, resolved to appeal more to emotion and less to mere admiration, the vocal instrument proved adequate to the new demand made upon it, and its possessor 'became the most pathetic, as he had been the most brilliant of singers.'

Porpora himself aspired to be remembered by his compositions rather than by the solid work which has immortalised his name. To be useful to others was a lot not brilliant enough to satisfy his restless ambition, and that in this usefulness lay his real genius was a truth he never could willingly accept.

Lists of his works are to be found in Villarosa's notice of his life, and in those by Farrenc (Trésor des Pianistes, i.) and Fétis. Probably the most complete is that given in Florimo's 'Cenno storico sulla Scula di Napoli,' 1869, pp. 376–80. [F.A.M.]

PORTA, Francesco della, organist and church composer, born in Milan about 1590, as is conjectured from his having published in 1619 a collection of 'Villanelle a 1, 2, e 3 voci, accommodate per qualsivoglio stromento' (Rome, Robletti). This fact seems to confute Fétis and Mendel, who place his birth in the beginning of the 17th century. His master was Ripalta, organist of Monza, and he became organist and maestro di capella of more than one church in Milan, where he died in 1666. He published Salmi a capella, motets, ricercari, etc.; and was one of the first composers to make practical use of the basso continuo. [F.G.]

PORTAMENTO (Fr. *Porte de voix*). A gradual '*carrying* of the sound or voice with extreme smoothness from one note to another' [see vol. i. p. 43, note], which can only be really executed by the voice or by a bowed instrument. It is of frequent occurrence as a musical direction in vocal music or in that for stringed instruments, and also appears in music for keyed instruments. In old music one of the Agremens (see article before referred to) was so called, though of course it was always a very poor representation of the proper effect. [J.A.F.M.]

PORTENSE. The Florilegium Portense is a vast collection of church music published by Bodenschatz in 1603 and 1621. He belonged to Schul*pforta* near Leipzig, and hence the name of his collection. For the list of its contents see vol. i. p. 253. [G.]

PORTER, Samuel, born at Norwich in 1733, was a pupil of Dr. Greene. In 1757 he was elected organist of Canterbury Cathedral. In 1803 he resigned in favour of Highmore Skeats, organist of Salisbury Cathedral. He died Dec. 11,

1810, and was buried in the cloisters at Canterbury. A volume of his 'Cathedral Music,' containing 2 Services, 5 Anthems, a Sanctus, Kyrie, Suffrages, and 9 chants, with his portrait on the title, was published by his son, Rev. WILLIAM JAMES PORTER, Head Master of the College School, Worcester, who also published two anthems and four chants of his own composition, on the title-page of which he is described as 'of the King's School, Canterbury.' Porter's Service in D, which is of a pleasing character, is still (1880) frequently performed. [W.H.H.]

PORTER, WALTER, son of Henry Porter, Mus. Bac. Oxon. 1600, was on Jan. 5, 1616, sworn gentleman of the Chapel Royal without pay, 'for the next place that should fall void by the death of any tenor'; a contingency which happened on Jan. 27, 1717, in the person of Peter Wright, and Porter was sworn in his place on Feb. 1. In 1632 he published 'Madrigales and Ayres of two, three, foure and five voyces, with the continued bass, with Toccatos, Sinfonias and Rittornelles to them after the manner of Consort Musique. To be performed with the Harpsechord, Lutes, Theorbos, Basse-Violl, two Violins or two Viols.' Both Hawkins and Burney mention a collection bearing the title of 'Airs and Madrigals for two, three, four and five voices, with a thorough bass for the organ or Theorbo Lute, the Italian way,' dated 1639, which may probably have been a second edition of the same work. In 1639 Porter was appointed Master of the Choristers of Westminster Abbey. After losing both his places on the suppression of choral service in 1644 he found a patron in Sir Edward Spencer. In 1657 he published 'Mottets of Two Voyces for Treble or Tenor and Bass with the Continued Bass or Score. To be performed to an Organ, Harpsycon, Lute, or Bass-Viol.'

Porter was buried at St. Margaret's Church, Westminster, Nov. 30, 1659. His work, 'The Psalms of George Sandys set to Music for two Voyces with a Thorough-bass for the Organ,' was published about 1670. [W.H.H.]

PORTMAN, RICHARD, a pupil of Orlando Gibbons, in 1633 succeeded Thomas Day as organist of Westminster Abbey. In 1638 he was admitted a gentleman of the Chapel Royal upon the death of John Tomkins. A complete Service by him, including a Venite, is contained in the Tudway Collection (Harl. MS. 7337), where his Christian name is erroneously given as William; some of his anthems are extant in cathedral choir books and elsewhere, and the words of some may be found in Clifford's 'Divine Services and Anthems,' 1663, and in Harl. MS. 6346. It is presumed that he was deprived of his appointments on the suppression of choral service in 1644. [W.H.H.]

PORTMANN, JOHANN GOTTLIEB, Cantor, and writer on the theory of music, born Dec. 4, 1739, at Ober-Lichtenau near Königsbrück in Saxony. He received his musical education at the Kreuzschule in Dresden, and then went to Darmstadt, where he became first court-singer, and in 1768 Cantor, and Collaborator of the Pädagogium. He died at Darmstadt, Sept. 28, 1798. His theoretical works, which were not unknown in England, are full of thought, and as a rule clear and helpful to the student of harmony and counterpoint. They include 'Kurzer musikalischer Unterricht für Anfänger,' etc. with 28 plates of examples engraved by himself (Darmstadt, published by himself, 1785; 2nd ed., enlarged by Wagner; Heyer, Darmstadt, 1799); 'Leichtes Lehrbuch der Harmonie, Composition, und Generalbass,' etc., with numerous examples (Darmstadt, 1789; 2nd ed., Heyer, 1799); and 'Die neuesten und wichtigsten Entdeckungen in der Harmonie, Melodie, und Contrapunkt' (Darmstadt, 1798). He also published the following compositions —'Neues Hessen-Darmstädtisches Choralbuch' (Darmstadt 1786); 'Musik auf das Pfingstfest,' in score (about 1793); and a Magnificat (1790). As a contributor to the 'Allgemeine deutsche Bibliothek,' he was much dreaded for the severity of his criticisms. Among his pupils were G. A. Schneider—born in Darmstadt 1770, became Kapellmeister to the King of Prussia, and bandmaster of the Guards, and died in Berlin, Jan. 19, 1839—and Carl Wagner, a horn-player, Hofmusikus, and afterwards Capellmeister at Darmstadt, where he died in 1822. [C.F.P.]

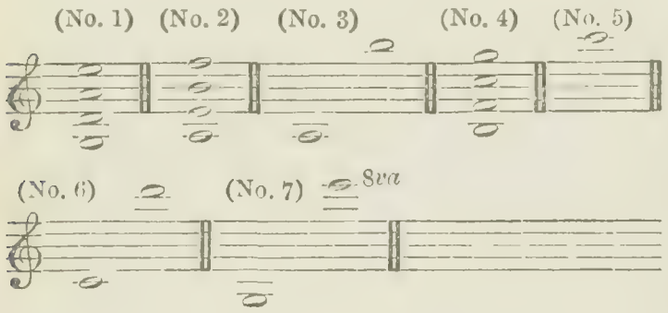
PORTOGALLO. The sobriquet of a Portuguese musician named SIMAO, who, residing in Italy, was known as Il Portogallo—'the Portuguese.' He was born at Lisbon in 1763, learned singing from Borselli of the Opera, and counterpoint from Orao, maitre de chapelle in the Cathedral. At 20 years of age he followed Borselli to Madrid, and became accompanyist at the opera there. The Portuguese ambassador sent him to Italy in 1787, and he began his career with 'L'Eroe Cineso' (Turin, 1788) and 'La Bachetta portentosa' (Genoa, 1788). After composing other operas and gaining a reputation, he paid a visit to Lisbon in 1790, and was made chapel-master to the king. He returned to Italy and composed opera after opera with great success at Parma, Rome, Venice, and Milan. Fétis quotes 'Fernando in Messico,' written for our Mrs. Billington (Rome, 1797) as his chef-d'œuvre. His duties called him occasionally to Lisbon, but Italy was the country of his choice. In 1807, however, the royal family were driven to Brazil by the French invasion. Portogallo accompanied them, and remained at Rio Janeiro till 1815. He then returned to Italy and resumed his position at Milan with 'Adriano in Siria.' On the return of the king he again went to Lisbon, and died there at the end of 1829 or beginning of 1830. Fétis gives a list of 26 of his operas.

Portogallo was not unknown in London. His 'Fernando in Messica' was played at Mrs. Billington's benefit, Mar. 31, 1803; his 'Argenide e Serse,' Jan. 25, 1806; 'Semiramide,' Dec. 13, 1806; 'La morte di Mitridato,' at Catalani's benefit, April 16, 1807; and 'Barseni, Regina di Lidia,' June 3, 1815.—His brother wrote for the church. [G.]

POSAUNE. The German name for the Trombone, also occasionally used for organ reedstops of a like character. [See TROMBONE.] [W. H. S.]

POSITIONS, or Shifts. In order to reach the different parts of the fingerboard of the violin, the left hand must be moved about, or placed in various 'positions.' The hand is said to be in the *first position*, when the thumb and 1st finger are at the extreme end of the neck of the violin, close to the nut. In this, the *first position*, on an instrument which is tuned in the usual way (as at No. 1), the 1st finger produces the four notes shown at No. 2, or their chromatic alterations. The compass[1] thus attainable by the four fingers in the first position extends from A to B (as at No. 3). The open strings are independent of the position of the left hand.

If by an upward movement of the hand the 1st finger is put on the place which, in the first position, was occupied by the 2nd finger, and the whole hand is similarly advanced, the four notes shown at No. 4 will be produced, and the hand

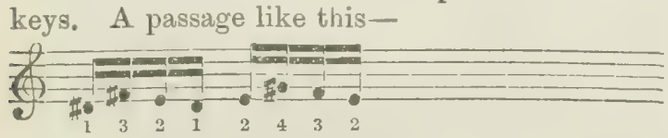


is said to be in the *second position*; and while in this position an additional note is reached on the 1st string (see No. 5), on the other hand, the low A—produced in the first position by the 1st finger on the 4th string—is lost. The notes which were taken in the first position on the other three strings by the 1st finger, are now produced by the 4th finger on the next lower string; the 2nd finger takes the place of the 3rd, and the 3rd the place of the 4th.

The *third position* extends from C to D (see No. 6), and stands in exactly the same relation to the second position, as the second stood to the first. And so does every following position to the one below it.

Eleven different positions exhaust all capabilities of the violin, and represent a compass from G to E in altissimo (see No. 7). Notes beyond this compass are almost always reached from lower positions, or harmonics are substituted for them. But even the positions above the seventh are but rarely employed.

The term 'half-position' (German *Sattel-Lage*) is used for a modified first position, in which the 2nd, 3rd, and 4th finger takes the places generally taken by the 1st, 2nd, and 3rd finger. It facilitates the execution of pieces in certain keys. A passage like this—



is best played in the half-position, with the fingering as marked.

It will appear from the above that the same note can be produced in different positions, on different strings, and by different fingers. For example: the note  , naturally taken in the first position by the 2nd finger on the 1st string, can also be produced

1. On 1st string by 1st finger in 2nd position.
2. On 2nd string by 4th „ 3rd „
   „ „ 3rd „ 4th „
   „ „ 2nd „ 5th „
   „ „ 1st „ 6th „
3. On 3rd string by 4th „ 7th „
   „ „ 3rd „ 8th „
4. On 4th string by 4th „ 11th[2] „

Theoretically every single note lying within the compass of a position can be produced in that position; but practically the choice of position for the rendering of a given phrase or passage is made

1. On grounds of absolute mechanical necessity, or
2. of convenience, or
3. to satisfy the requirements of good phrasing, or of a special musical character.

1. *Absolute necessity.* Many double-stops formed by notes within the compass of the first or any other position, cannot be executed in that position—

(*a*) if, in that position, both notes lie on the same string. Such double-stops as 
must be played in the second position (2nd and 4th finger) or in the third position (1st and 3rd finger), in either of which positions each note lies on a separate string, while in the first position they are both on one and the same string, and cannot therefore be sounded simultaneously.

(*b*) Double-stops formed by notes which lie in one position on non-contiguous strings (1st and 3rd, or 2nd and 4th) cannot be played in that position, but must be played in a position where the notes lie on strings that can be sounded together. This double-stop  is therefore impossible in the first position, where F lies on the 1st and G on the 3rd string. But it is easily given in the third position, where F lies on the 2nd and G on the 3rd string.

Again, in a passage like this—

MOZART, Violin Concerto.

in order to sound the open G-string at the same time, the whole of the upper part must be played on the 3rd string, thereby necessitating an ascent to the seventh position.

[1] Besides the natural compass of a position, notes which really lie beyond it are frequently reached by extension of the fingers, without the hand leaving its position.

[2] Generally taken as a harmonic.

2. *Convenience.* Many passages, especially those in which notes of widely different range succeed each other rapidly, would be impracticable but for the use of higher positions, even for those notes which might, theoretically speaking, be taken in lower positions.

In a passage like this—

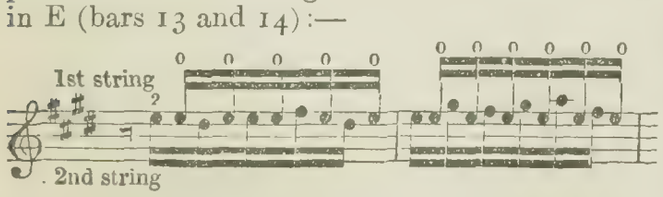
the three lower notes of each group might be played in the first position, if by themselves; but in connexion with the two high notes, the jump from the first to the fifth position, which is absolutely necessary in order to reach them, would make a smooth execution of the phrase, even at a moderately rapid pace, quite impossible. If started at once in the fifth position there is no difficulty at all.

3. The *tasteful* and *characteristic rendering* of many phrases and passages requires a careful choice of positions, based on the distinct and contrasting qualities of sound of the four different strings. Where sameness of sound is required, the change from one string to another will, if possible, be avoided; where contrast is wanted, different strings will be used even in cases where one string could give all the notes.

A phrase like this—

though lying entirely within the compass of the first position, must, in order to sound as *cantabile* as possible, be played entirely on the 2nd string, in the first and third or second position alternately. In the first position a constant change from the 1st to the 2nd string would be necessary, and the phrase would thereby sound jerky and uneven, the very opposite of what it ought to be. Or this passage in Spohr's Scena Cantate Concerto—

if not played entirely on the sonorous 4th string, would absolutely lose its peculiar character. In other instances the meaning of a passage is only made intelligible by its being played in the proper position. The following is from Bach's Preludium in E (bars 13 and 14):—



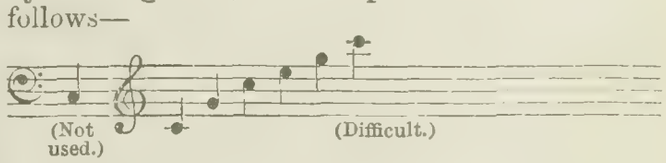
In this instance, unless the whole of the lower part is played on the 2nd string in higher positions, the necessary contrast to the pedal note E, which is strongly given by the open string, cannot be properly marked. It will thus clearly appear that a complete command of the fingerboard in all positions is one of the chief technical requirements of the art of violin-playing, and that the right choice of position, on which a truly musical, tasteful, and characteristic rendering of every composition largely depends, is one of the main tests of a violinist's artistic feeling and judgment. Studies in all the usual positions are given in every good violin school. The best known are those in Baillot's 'L'art du Violon,' but they have the defect of being all written in C major. [P.D.]

POSITIVE ORGAN (Fr. *Positif*; Ger. *Positiv*). Originally a stationary organ, as opposed to a *portative* or portable instrument used in processions. [See Organ, p. 575*b*.] Hence the term 'positive' came to signify a 'chamber organ'; and later still, when in a church instrument a separate manual was set aside for the accompaniment of the choir, this also was called a 'positive,' owing no doubt to the fact that it generally had much the same delicate voicing as a chamber organ, and contained about the same number and disposition of stops. By old English authors the term is generally applied to a chamber organ; the 'positive' of our church instruments being called from its functions the 'choir organ.' When placed behind the player (Ger. *Rückpositiv*) it was often styled a '*chair* organ,' but it is difficult to say whether this name arose from a play upon the terms 'choir' and 'chair,' or from a misunderstanding as to the origin of its distinctive title. With the French the 'Clavier de positif' is our 'Choir manual.' Small portable organs were called Regals. [See Regal.] [J.S.]

POSTANS, Miss. See Shaw, Mrs. Alfred.

POSTHORN. A small straight brass or copper instrument, varying in length from two to four feet, of a bore usually resembling the conical bugle more than the trumpet, played by means of a small and shallow-cupped mouthpiece. Originally intended as a signal for stage-coaches carrying mails, it has to a limited extent been adopted into light music for the production of occasional effects by exceptional players.

Its pitch varies according to length from the four-foot C to its two-foot octave. The scale consists of the ordinary open notes, commencing with the first harmonic. The fundamental sound cannot be obtained with the mouthpiece used. Five, or at most six, sounds, forming a common chord, are available, but no means exist for bridging over the gaps between them. In a four-foot instrument such as was commonly used by mail guards, the sequence would be as follows—



A post-horn galop was played on this instrument by the late Mr. Kœnig. Mr. T. Harper, the eminent trumpet-player, has composed another,

named 'Down-the-road Galop,' with obbligato parts for two posthorns, one in F and another in A. Beethoven has quoted a post-horn solo. [See POSTILLONS.] [W.H.S.]

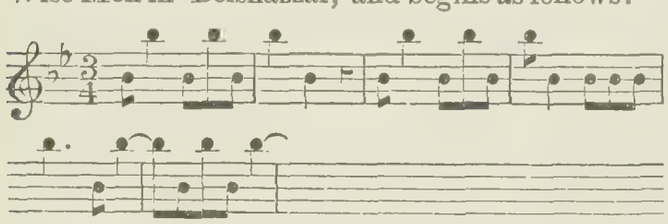
POSTHUMOUS. A term applied to works published after the death of the author. It is frequently used with reference to Beethoven's last five quartets, though the term is in no way applicable to the first of the five—op. 127, in Eb—which was published by Schott & Sons, on March 26, 1826, exactly a year before Beethoven's death, March 26, 1827. The following table of the order of composition, date of publication, and opus-number, of these five exceptional works may be useful.

Key.	Date of publication.	Opus-number.
Eb	March 26, 1826	Op. 127
A minor	Sept. 1827	,, 132
Bb	May 7, 1827	,, 130
C♯ minor	April, 1827	,, 131
F	Sept. 1827	,, 135

Schubert died Nov. 19, 1828, and all works by him after op. 88 are Posthumous, excepting 'Winterreise' part 1 (1–12); op. 90 (nos. 1 and 2); ops. 91, 92, 93, 94, 95, 96, 97, 100, 101, 105, 106, 108. Mendelssohn's posthumous works begin with op. 73; Schumann's with op. 136. [G.]

POSTILLON DE LONGJUMEAU, LE. An opéra-comique in 3 acts, or rather perhaps an extravaganza; words by De Leuven and Brunswick, music by A. Adam. Produced at the Opéra Comique, Oct. 13, 1836. [G.]

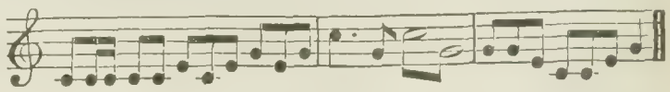
POSTILLONS. 'Symfonie allegro Postillons' is Handel's autograph inscription to the piece of orchestral music which precedes the entry of the Wise Men in 'Belshazzar,' and begins as follows:—



It is written for the strings, with oboes in unison; no horn is employed; some of the later passages resemble those which can be played on the ordinary posthorn; but there is nothing to say whether this was the origin of the indication, or whether it refers to the haste in which the Wise Men may be supposed to have arrived, or contains some allusion now lost.

Sebastian Bach, in his Capriccio describing the departure of his brother, has introduced an 'Aria di Postiglione' and a 'Fuga all' imitazione delle cornetta di Postiglione.' One of the figures in the former has some likeness to that quoted above.

Beethoven, in a sketch-book of 1812, quoted by Nottebohm (Mus. Wochenblatt, April 25, 1879), has quoted a flourish of the 'Postillon von Karlsbad':—



But this is a mere ordinary phrase, and may be heard from many a postilion or driver in Germany of less renown than the one from whose instrument Beethoven is supposed to have taken it down. (See Thayer, 'Beethoven,' iii. 183, with the remarks of Nottebohm, as above.) [G.]

POSTLUDE, a piece played after service, an outgoing voluntary. The term is an adaptation from the Latin-German 'Postludium.' Henry Smart has occasionally employed it. [G.]

POT-POURRI. A name first given by J. B. Cramer to a kind of drawing-room composition consisting of a string of well-known airs from some particular opera, or even of national or other familiar tunes having no association with each other. These were connected by a few showy passages, or sometimes by variations on the different themes. The pot-pourri was a less ambitious form of composition than the (modern) fantasia, as there was little or no working-out of the subjects taken, and very little 'fancy' was required in its production. It had its own class of admirers, and was at one time a very popular form of composition. Peters's Catalogue contains 38 by V. Felix, and 64 by Ollivier, on all the chief operas. Chopin, in a letter, calls his op. 13 a 'Potpurri' on Polish airs. The pot-pourri has been invaded by the 'transcription,' which closely resembles it in form although taking only one subject as a rule, instead of many. 'Olla podrida' was another name for the same sort of production. [J.A.F.M.]

POTT, AUGUST, born November 7, 1806, at Nordheim, Hanover, where his father was Stadtmusikus. He adopted the violin as his instrument, and shortly after Spohr's appointment to be Hof-Capellmeister at Cassel, went there as his pupil, and there made his first public appearance in 1824. He occupied the next few years in travelling through Denmark and Germany. In 1832 he was appointed Concertmeister to the Duke of Oldenburg, and afterwards advanced to the post of Capellmeister at the same court. This he resigned in 1861, and is now (1880) living at Gratz. In 1838 he visited England, and played Lipinski's concerto in B minor at the Philharmonic on May 21 with great applause. The critic of the 'Musical World' speaks with enthusiasm of the extraordinary power of his tone, his great execution, and the purity of his style. He has published two Concertos, and various smaller pieces for the violin with and without orchestra. [G.]

POTTER, PHILIP CIPRIANI[1] HAMBLY, born in London in 1792, began his musical education at 7, under his father, a teacher of the pianoforte. He

[1] He derived this name from his godmother, a sister of J. B. Cipriani the painter.

afterwards studied counterpoint under Attwood, and theory under Callcott and Crotch, and on Woelfl's arrival in England received instruction from him during five years. In 1816 an overture by Mr. Potter was commissioned and performed (March 11) by the Philharmonic Society, and on April 29 of the same year he made his first public appearance as a performer at the Society's concert, and played the pianoforte part in a sestet of his own composition, for pianoforte and stringed instruments. He again performed March 10, 1817. Shortly after this he went to Vienna and studied composition under Förster, receiving also friendly advice from Beethoven. Writing to Ries in London, on March 5, 1818, the great man says, 'Potter has visited me several times: he seems to be a good man, and has talent for composition.' After visiting other German towns he made a tour in Italy, and returned to London in 1821, when he performed Mozart's Concerto in D at the Philharmonic (Mar. 12). In 1822 he was appointed professor of the pianoforte at the Royal Academy of Music, and on the resignation of Dr. Crotch in June 1832 succeeded him as Principal. The latter office he resigned in 1859, in favour of Sterndale Bennett.

Mr. Potter's published works extend to op. 29, and include 2 sonatas, 9 rondos, 2 toccatas, 6 sets of variations, waltzes, a polonaise, a large number of impromptus, fantasias, romances, amusements, etc., and two books of studies[1] composed for the Royal Academy of Music—all for PF. solo. Also a 'Duet Symphony' in D, and 4 other duets, besides arrangements of 2 of his symphonies and an overture—all for 4 hands; a fantasia and fugue for 2 PFs.; a trio for 3 players on the PF.; a sestet for PF. and instruments; a duo for PF. and V.; a sonata for PF. and horn, 3 trios, etc., etc. His MS. works comprise 9 symphonies for full orchestra, of which 6 are in the Philharmonic Library; 4 overtures (3 ditto); 3 concertos, PF. and orch. (ditto); a concertante, PF. and cello; a cantata, 'Medora e Corrado'; an Ode to Harmony; additional accompaniments to 'Acis and Galatea,' and many other pieces of more or less importance. These compositions, though well received,[2] and many of them in their time much in vogue, are now forgotten, except the studies.

As a performer he ranked high, and he had the honour to introduce Beethoven's Concertos in C, C minor, and G, to the English public at the Philharmonic. As a conductor he is most highly spoken of, and it may be worth mentioning that he beat time with his hand and not with a baton. He died Sept. 26, 1871. His fresh and genial spirit, and the eagerness with which he welcomed and tried new music from whatever quarter, will not be forgotten by those who had the pleasure and profit of his acquaintance. One of the last occasions on which he was seen in public was assisting in the accompaniment of Brahms's Requiem, at its first performance in London, not three months before his death. He contributed a few papers to periodicals—'Recollections of Beethoven,' to the Musical World, April 29, 1836 (reprinted in Mus. Times, Dec. 1, 1861); 'Companion to the Orchestra, or Hints on Instrumentation,' Musical World, Oct. 28, Dec. 23, 1836, Mar. 10, May 12, 1837. Mr. Potter edited the 'Complete Pianoforte Works of Mozart,' for Messrs. Novello; and Schumann's 'Album für die Jugend' (op. 68) for Messrs. Wessel & Co. in 1857.

In 1860 a subscription was raised and an Exhibition founded at the Royal Academy of Music in honour of Mr. Potter. It is called after him, and entitles the holder to one year's instruction in the Academy. [W.H.H.]

POUGIN, Arthur, born Aug. 6, 1834, at Chateauroux, where he is registered as François Auguste Arthur Paroisse-Pougin. As the son of an itinerant actor he had few educational advantages, and his literary attainments are therefore due to his own exertions alone; his knowledge of music was partly obtained at the Paris Conservatoire, where he passed through the violin-class and harmony with Henri Reber. From the age of 13 he played the violin at a theatre; and at 21 became conductor of the Théâtre Beaumarchais, which however he soon quitted for Musard's orchestra. From 1856 to 59 he was vice-conductor and *répétiteur* (or conductor of rehearsals) at the Folies Nouvelles. Pougin soon turned his attention to musical literature, beginning with biographical articles on French musicians of the 18th century in the 'Revue et Gazette Musicale.' Musical biography remains his favourite study, but he has been an extensive writer on many other subjects. At an early period of his career he gave up teaching, and resigned his post among the violins at the Opéra Comique (1860 to 63) in order the better to carry out his literary projects. Besides his frequent contributions to the 'Ménestrel,' 'La France musicale,' 'L'Art musical,' and other periodicals specially devoted to music, he edited the musical articles in the 'Dictionnaire universel' of Larousse, and has been successively musical feuilletoniste to the 'Soir,' the 'Tribune,' 'L'Evènement,' and, since 1878, to the 'Journal Officiel' where he succeeded Eugène Gautier.

Among his numerous works, the following may be specified:—'Meyerbeer, notes biographiques' (1864, 12mo); 'F. Halévy, écrivain' (1865, 8vo); 'W. Vincent Wallace, étude biographique et critique' (1866, 8vo); 'Bellini, sa vie, ses œuvres' (1868, 12mo); 'Albert Grisar, étude artistique' (1870, 12mo); 'Rossini, notes, impressions, etc.' (1871, 8vo); 'Boieldieu, sa vie, etc' (1875, 12mo); 'Figures d'opéra-comique: Elleviou; Mme. Dugazon; la tribu de Gavaudan' (1875, 8vo); 'Rameau, sa vie et ses œuvres' (1876, 16mo); 'Adolphe Adam, sa vie, etc.' (1876, 12mo),—all

[1] Recently analysed by Mr. W. H. Holmes in 'Notes upon Notes' (1880). The studies are 24 in number and are arranged for a key and its relative minor—No. 1, C major; 2, A minor; 3, D♭ major; 4, B♭ minor, etc.

[2] The Symphonies were played at the Philharmonic as follows:—In —, May 29, 1826, Jan. 8, '35; in A, May 27, '33; in G minor, May 19, '34, May 28, '55; in D, Mar. 21, '36, Ap. 22, '50, May 3, '69.

published in Paris; and finally the 'Supplément et Complément' to the 'Biographie Universelle des Musiciens' of Fétis, a work of great extent and industry, and containing a mass of new names and information (2 vols. 8vo, Paris, 1878–80). [G.C.]

POWELL, WALTER, born at Oxford in 1697, was on July 1, 1704 admitted a chorister of Magdalen College. In 1714 he was appointed a clerk in the same college. On April 16, 1718 he was elected Yeoman Bedell of Divinity and on Jan. 26, 1732 Esquire Bedell of the same faculty. He was also a member of the choirs of Christ Church and St. John's Colleges. In July 1733 he sang in the oratorios given by Handel during his visit to Oxford, and later in the year at the Meeting of the Three Choirs at Gloucester. He is said, but erroneously, to have been afterwards appointed a gentleman of the Chapel Royal. His voice (countertenor) and singing were greatly admired. He died Nov. 6, 1744, and was buried at St. Peter's in the East, Oxford. [W.H.H.]

PRACTICAL HARMONY, INTRODUCTION TO. The title of a treatise, and collection of pieces by masters of different schools, edited and arranged by Muzio Clementi, in 4 volumes, oblong quarto. The original title is 'Clementi's Selection of Practical Harmony, for the Organ or Piano Forte; containing Voluntaries, Fugues, Canons and other Ingenious Pieces. By the most eminent composers. To which is prefixed an Epitome of Counterpoint by the Editor. (Here follow 5 lines from Paradise Lost, Bk. xi). London printed by Clementi, Banger, Hyde, Collard & Davis, No. 26 Cheapside.' The price of each volume was one guinea. Vols. 1 and 2 alone are in the British Museum. The following is a complete catalogue of the contents.

Vol. I.

Treatise on Harmony and Counterpoint by Clementi.
Kirnberger. 2 Voluntaries in F. 4 Fugues, in C♯ minor, A minor, B♭, and D minor. *Gavotte in D minor.* Fugue in D. Prelude and Fugue in G. Fugue and Polonaise in E♭. Fugue and Polonaise in F minor and major. Prelude and Fugue in C.
A set of Canons by C. P. E. Bach, Fasch, Turini, Padre Martini, and A. da Vallerano.
Caresano. Double Fugue in C.
Perti, Antonio. Fugue in D.
Bach, C. P. E. Canon in G.
Haydn, Joseph. Minuet and Trio in E minor.
Bach, C. P. E. Two minuets.
Handel. Fugue in B minor.
Porpora. 6 Fugues, in A, G, D, B♭, G minor and C.
Albrechtsberger. 9 Fugues, in B minor, E, A minor, F, C, E♭, C, A minor, and A.
Telemann. Fughetta in D.
Eberlin, J. E. 5 Voluntaries and Fugues, in D minor, A minor, E minor, C, and F.
Umstatt. Voluntary and Fugue in G minor.
Marpurg. Prelude and Fugue in G.
Mozart. Fugue in D minor from the Requiem, arranged by Clementi.
Bach, C. P. E. 2 Voluntaries and Fugues, in A and D minor. Fantasia and Fugue in G minor. Voluntary and Fugue in F minor.
Bach, Ernest. Fantasia and Fugue in F.
Bach, Joh. Seb. Organ Fantasia in G, arranged. Suite (5th French) in G.

Vol. II.

Albrechtsberger, 6 Fugues, in G, B minor, G, G minor, D, and D minor.
Eberlin. 4 Voluntaries and Fugues, in G minor, D, G, and E minor.
Mozart. Fantasia in F minor, arranged.
Bach, C. P. E. Fantasia and Fugue in C minor. Fantasia in C. Voluntary and Fugue in C minor. Organ Sonata in B♭.
Bach, Joh. Seb. Toccata and Fugue in D minor.
Handel. 11 Fugues, in G minor, C minor, B , A minor, G, B minor, G minor, F♯ minor, D minor, F, and F minor.
Padre Martini. 4 Sonatas, in F minor, G minor, A and E minor.
Scarlatti, A. Fugue in F minor.
Scarlatti, D. 2 Fugues in D minor and G minor (the 'Cat's Fugue').
Frescobaldi. 2 Canzone in G minor and G. 3 Fugues, in D minor, G minor, and E minor. Canzona in F. Corrente in F minor. Toccata in F.

Vol. III.

Bach, W. F. Fugue and Capriccio in D minor. 2 Polonaises in F. Fugue in D. Adagio in B minor. Vivace in D. Polonaise in D. Fugue and Polonaise in C. 2 Fugues, in C minor and B♭. 2 Polonaises in B♭ and G minor. Fugue and Polonaise in E♭. Fugue and Polonaise in E minor. Polonaise in E. Fugue and Polonaise in F minor. Fugue and Polonaise in C minor.
Bach, C. P. E. Fantasia in C minor. Fugue in C minor for organ [by J. S. Bach, wrongly attributed to C.P.E. Bach]. Rondo in C minor, Fantasia in C. Fugue in C minor on the name 'Bach.' Allegro in C. Andantino in C minor. Presto in C minor. Allegro in C. Sonata in F, and Sinfonia in F.
Bach, J. C. F. Fugue in C minor. Rondo in C. Minuet in C. Polonaise in G. Sonata in C.
Bach, J. Christoph (third son of J. S. Bach). 2 Sonatas, in E and C minor.
Bach, J. S. 2 Fugues, in A minor and C.

Vol. IV.

Padre Martini. 9 Sonatas—in E minor, B minor, D, D minor, B♭, G, C minor, C and F.
Albrechtsberger. 21 Fugues—in F, F minor, G, G minor. A and A minor; (these preceded by 'Cadenzas or Preludes') in D, A, E, E minor, G, B♭ and C; (these with Preludes) in D minor, E minor, G, A minor, B minor; (the rest without Preludes) in D minor —'Christus resurrexit,' in C —'Alleluja,' in C—'Alleluja' —'Ite Missa est.'

[J.A.F.M.]

PRAEGER, FERDINAND CHRISTIAN WILHELM, son of Heinrich Aloys Praeger, violinist, composer, and capellmeister, was born at Leipzig, Jan. 22, 1815. His musical gifts developed themselves very early; at nine he played the cello with ability, but was diverted from that instrument to the piano by the advice of Hummel. At sixteen he established himself as teacher at the Hague, meanwhile strenuously maintaining his practice of the piano, violin, and composition. In 1834 he settled in London, where he still resides, a well-known and much esteemed teacher. But though living in London Mr. Praeger has not broken his connexion with the Continent: he is still correspondent of the 'Neue Zeitschrift für Musik,' a post for which he was selected by Schumann himself in 1842. In Jan. 1851 he gave a recital in Paris of his own compositions with success; in 1852 he played at the Gewandhaus, Leipzig, and at Berlin, Hamburg, etc.; and later, in 1867, a new PF. trio of his was selected by the United German Musicians, and performed at their festival at Meiningen. He has always been an enthusiast for Wagner, and it was partly owing to his endeavours that Wagner was engaged to conduct the Philharmonic Concerts in 1855. He is beloved by his numerous pupils, and a concert of his compositions was organised by them in his honour, on July 10, 1879, in London. An overture from his pen entitled 'Abellino' was played at the New Philharmonic Concerts of May 24, 1854, and July 4, 1855 (under Lindpaintner and Berlioz); and a Symphonic Prelude to Manfred at the Crystal Palace, April 17, 1880. A selection of his best pieces is published in 2 vols. under the title of the 'Praeger Album' (Kahnt, Leipzig). [G.]

PRÆNESTINUS. The Latinised form of the name of the great Italian composer, derived from the town of Præneste, one of the most ancient cities of Italy, and now called Palestrina. 'Johannes Petrus Aloisius Prænestinus' answers to the Italian 'Giovanni Pier Luigi da Palestrina.' [G.]

PRÆTORIUS, or PRÄTORIUS. The assumed surname of more than one family of

distinguished German Musicians, whose true patronymic was Schultz.[1]

Of the numerous Composers whose works are published under this name, the most celebrated was MICHAEL PRÆTORIUS, a learned and industrious writer, of whose personal history very little is known, beyond the facts, that he was born at Creutzberg in Thuringia, on Feb. 15, 1571; that he began his artistic career, in the character of Kapellmeister, at Luneburg; that he afterwards entered the service of the Duke of Brunswick, first as Organist, and then as Kapellmeister and Secretary; was appointed Prior of the Monastery of Ringelheim, near Gozlar, without necessity of residence; and died at Wolfenbüttel, on his fiftieth birthday, Feb. 15, 1621.

The Compositions of Michael Prætorius are very voluminous. He himself has left us, at the end of his 'Syntagma Musicum,' a catalogue, the most important items of which are, 15 volumes of 'Polyhymnia,' adapted partly to Latin, and partly to German words; 16 volumes of 'Musæ Sioniæ,' of which the first five are in Latin, and the remainder in German; 9 volumes of a sæcular work, called 'Musa Aonia,' of which the several books are entitled 'Terpsichore' (2 vols.), 'Calliope' (2 vols.), 'Thalia' (2 vols.), 'Erato' (1 vol.), 'Diana Teutonica' (1 vol.), and 'Regensburgische Echo' (1 vol.); and a long list of other works, 'partly printed, and partly, through God's mercy, to be printed.' The first of these is the 'Syntagma Musicum' (Musical Treatise) itself—a book the excessive rarity and great historical value of which entitle it to a special notice.

The full title of this remarkable work is, 'Syntagma Musicum; ex veterum et recentiorum Ecclesiasticorum autorum lectione, Polyhistorum consignatione, Variarum linguarum notatione, Hodierni seculi usurpatione, ipsius denique Musicæ artis observatione: in Cantorum, Organistarum, Organopœorum, ceterorumque Musicam scientiam amantium & tractantium gratiam collectum; et Secundum generalem Indicem toti Operi præfixum, In Quatuor Tomos distributum, à Michaële Prætorio Creutzbergensi, Cœnobii Ringelheimensis Priori, & in aula Brunsvicensi Chori Musici Magistro. [V Vittebergæ (*sic*), Anno 1615.]' Notwithstanding this distinct mention of four volumes, it is morally certain that no more than three were ever printed, and that the much coveted copy of the fourth, noticed in Forkel's catalogue, was nothing more than the separate cahier of plates attached to the second.

TOM. I. (Wittenberg, 1615), written chiefly in Latin, but with frequent interpolations in German, is arranged in two principal Parts, each subdivided into innumerable minor sections. Part I. is entirely devoted to the consideration of Ecclesiastical Music; and its four sections treat, respectively, (1) of Choral Music and Psalmody, as practised in the Jewish, Ægyptian, Asiatic,[2] Greek, and Latin Churches; (2) of the Music of the Mass; (3) of the Music of the Antiphons, Psalms, Tones, Responsoria, Hymns, and Canticles, as sung at Matins and Vespers, and the Greater and Lesser Litanies; and (4), of Instrumental Music, as used in the Jewish and early Christian Churches, including a detailed description of all the Musical Instruments mentioned either in the Old, or the New Testament. Part II. treats of the Sæcular Music of the Antients, including, (1) Dissertations on the Invention and Inventors of the Art of Music, its most eminent Teachers, its Modes, and Melodies, its connection with Dancing and the Theatre, its use at Funeral Ceremonies, and many other kindred matters; and (2), Descriptions of all the Instruments used in antient Sæcular Music, on the forms and peculiarities of some of which much light is thrown by copious quotations from the works of Classical Authors.

TOM. II., printed at Wolfenbüttel in 1518,[3] and written wholly in German, is called Organographia, and divided into five principal sections. Part I. treats of the nomenclature and classification of all the Musical Instruments in use at the beginning of the 17th century—that critical period in the History of Instrumental Music which witnessed the first development of the Operatic Orchestra, and concerning which we are here furnished with much invaluable information. Part II. contains descriptions of the form, compass, quality of tone, and other peculiarities of all these Instruments, *seriatim*; including, among Wind Instruments, Trombones of four different sizes, the various kinds of Trumpet, Horns (Jäger Trommetten), Flutes, both of the old and the transverse forms, Cornets, Hautboys, both Treble and Bass (here called Pommern, Bombardoni, and Schalmeyen), Bassoons and Dolcians, Double Bassoons and Sordoni, Doppioni, Racketten, and the different kinds of Krumhorn (or Lituus), Corna-muse, Bassanello, Schreyerpfeiffe, and Sackpfeiffe, or Bagpipes. These are followed by the Stringed Instruments, divided into two classes—Viole da Gamba, or Viols played between the knees, and Viole da Brazzo, played upon the arm. In the former class are comprised several different kinds of the ordinary Viol da Gamba, the Violbastarda, and the Violone, or Double Bass: in the latter, the ordinary Viola da Braccio, the Violino da Braccio, the Violetta picciola, and the Tenor Viola da Braccio. The Lyres, Lutes, Theorbas (*sic*), Mandolins, Guitars, Harps, and other Instruments in which the strings are plucked by the fingers or by a Plectrum, are classed by themselves; as are the Keyed Instruments, including the Harpsichord (Clavicymbalum), Spinet (Virginall), Clavicytherium, Claviorganum, Arpichordum, the 'Nürmbergisch Geigenwerck,' and Organs of all kinds, beginning with the antient Regall, and Positieff. Part III., carrying on the subject with which the former division ended, treats of antient Organs, in detail, giving much valuable information concerning their form and construction. Part IV. gives a minute description of modern Organs—*i. e.* Organs which were considered modern 260 years ago—with details of

[1] The word *Schultze* signifies the Head-man of a village or small town; and may therefore be translated by Prætor.

[2] Called, in the German index, the Arabian Church.

[3] Fétis says, 1519; but this is an error.

their construction, the form of their Pipes, the number and quality of their Stops, or Registers, and other equally interesting and important matters relating to them. Part V. treats of certain individual Organs, celebrated either for their size or the excellence of their tone, with special accounts of more than 30 Instruments, including those in the Nicolaikirche and Thomaskirche at Leipzig, the Cathedrals of Ulm, Lübeck, Magdeburg, and Brunswick, and many other well-known Churches.

It would be difficult to exaggerate the interest of this part of the work, which is rendered still more valuable by an Appendix, printed at Wolfenbüttel in 1620, two years after the publication of Tom. II. and III., under the title of 'Theatrum Instrumentorum, seu Sciagraphia, Michaëlis Prætorii, C.' This consists of 42 well-executed plates, exhibiting woodcuts of all the more important instruments previously described in the text, drawn with sufficient clearness of detail to give a fair idea of many forms now so far obsolete that it would be difficult to find a real specimen in anything like working order. Among these, there are few more curious than the engraving of the 'Nürmbergisch Geigenwerck,' in which the clumsiness of the Treadle (mentioned under PIANO-VIOLIN, vol. ii. pp. 745–746), is brought into very strong relief.

TOM. III., also printed at Wolfenbüttel, in 1618, is arranged in three main sections. Part I. treats of all the different kinds of Sæcular Composition practised during the first half of the 17th century, in Italy, France, England, and Germany; with separate accounts of the Concerto, Motet, Fauxbourdon, Madrigal, Stanza, Sestina, Sonnet, Dialogue, Canzone, Canzonetta, Aria, Messanza, Quodlibet, Giustiniano, Serenata, Ballo or Balletto, Vinetto, Giardiniero, Villanella, Prélude, Phantasie, Capriccio, Fuga, Ricercare, Symphonia, Sonata, Intrada, Toccata, Padovana, Passamezzo, Galliarda, Bransle, Courante, Volta, Allemanda, and Mascherada, the distinctive peculiarities of each of which are described with a clearness which throws much light on certain forms now practically forgotten. Part II. deals with the technical mysteries of Solmisation, Notation, Ligatures, Proportions, Sharps, Flats, Naturals, Modes or Tones, Signs of all kinds, Tactus or Rhythm, Transposition, the Arrangement of Voices, the Management of Double, Triple, and Quadruple Choirs, and other like matters. Part III. is devoted to the explanation of Italian technical terms, the arrangement of a complete Cappella, either Vocal, or Instrumental, the Rules of General-Bass (Thorough-Bass), and the management of a Concert for Voices and Instruments of all kinds; the whole concluding with a detailed list of the author's own Compositions, both Sacred and Sæcular; and a compendium of rules for the training of Boys' Voices, after the Italian Method.

TOM. IV., had it been completed, was to have treated of Counterpoint.

The chief value of the 'Syntagma Musicum' lies in the insight it gives us into the technical history of a period lying midway between the triumphs of the Polyphonic School and the full development of Modern Music—an epoch less rich in such records than either that which preceded, or that which followed it. It has now become exceedingly scarce. There is no copy[1] in the British Museum, nor, so far as we have been able to discover, in any other Library in London; but one is preserved in the Euing Library in Anderson's University, Glasgow. For the use of the remarkably fine examplar which served as the basis of our description, we are indebted to the Rev. Sir F. A. Gore Ouseley, who placed it unreservedly at our disposal. One of the volumes contains the autograph of a Bach, and another of Telemann. Not less scarce and costly are the Author's Compositions. There is rather an extensive collection of separate volumes in the British Museum; but, of Part IX. of the 'Musæ Sioniæ,' embracing several of the last volumes, it is doubtful whether a copy is anywhere to be found.

Of the other Composers, who have written under the name of Prætorius, one of the most celebrated was GODESCALCUS PRÆTORIUS (or SCHULZ), born at Salzburg, in 1528, and for many years Professor of Philosophy at Wittenberg. He published, at Magdeburg, in 1556, a volume entitled 'Melodiæ Scholasticæ,' in the preparation of which he was assisted by Martin Agricola. He died July 8, 1573.

The famous Organist, HIERONYMUS PRÆTORIUS (JEROM SCHULZ), was born, in 1560, at Hamburg, where, after attaining an extraordinary reputation, he died, in 1629. Among his numerous Compositions, the best-known is a Christmas Carol for 8 voices, 'Ein Kindelein so lœbelich,' Hamburg, 1613[2].

JACOB PRÆTORIUS (or SCHULZ), the son of Jerom, whose talent as an Organist he richly inherited, was born at Hamburg, in the year 1600; attained a great reputation in his native city; and died there in 1651. He is best known by a 'Choralbuch,' which, in conjunction with Hieron. Prætorius, Joachim Becker, and David Scheidemann, he published at Hamburg in 1604.

BARTHOLOMÆUS PRÆTORIUS is known as the Composer of 'Newe liebliche Paduanen, und Galliarden, mit 5 Stimmen.' Berlin, 1617.

JOHANN PRÆTORIUS, a man no less remarkable for the depth of his learning than for his great musical talent, was born at Quedlinburg, in 1634; and, after holding several important appointments at Jena, Gotha, and Halle, produced an Oratorio called 'David' in the last-named city, in 1681, and died there in 1705. [W.S.R.]

PRATT, JOHN, son of Jonas Pratt, music-seller and teacher, was born at Cambridge in 1772. In 1780 he was admitted a chorister of King's College. After quitting the choir he became a pupil of, and deputy for, Dr. Randall, the college organist, and on his death in March 1799 was appointed his successor. In September following he was appointed organist to the Uni-

[1] Except of the cahier of Plates.
[2] Gerber erroneously attributes this work to Michael Prætorius.

versity, and in 1813 organist of St. Peter's College. He composed several services and anthems. He published 'A Collection of Anthems, selected from the works of Handel, Haydn, Mozart, Clari, Leo and Carissimi' (an adaptation to English words of detached movements from the masses, etc. of those composers), and a selection of psalm and hymn tunes entitled 'Psalmodia Cantabrigiensis.' He died March 9, 1855, possessed of a good local reputation. [W.H.H.]

PRATTEN, Robert Sidney, a very distinguished English flute-player, born Jan. 23, 1824, at Bristol, where his father was a professor of music. The boy was considered a prodigy on the flute, and in his 12th year was much in request at the Concerts at Bath and Bristol. From thence he migrated to Dublin, where he played first flute at the Theatre Royal and musical societies. In 1846 he came to London, and was soon engaged as first flute at the Royal Italian Opera, the Sacred Harmonic and Philharmonic Societies, the Musical Society of London, Mr. Alfred Mellon's Concerts, etc. Through the kindness of the Duke of Cambridge, Mr. Pratten passed some time in Germany in the study of theory and composition, and became a clever writer for his instrument. His Concertstück and Fantasia on Marie Stuart are among the best of his productions. He died at Ramsgate, Feb. 10, 1868, beloved by a large circle. Mr. Pratten had a very powerful tone and remarkable power of execution. His ear was extraordinarily sensitive, and in consequence his intonation and the gradation of his *nuances* were perfect, though his taste was perhaps a trifle too florid. His widow is a well-known professor of the guitar.—His brother, Frederick Sidney Pratten was an eminent contrabassist, engaged in the same orchestras as himself. He died in London, Mar. 3, 1873. [G.]

PREAMBULUM. See Prelude.

PRÉ AUX CLERCS, LE. An opéra comique in 3 acts; words by Planard, music by Hérold. Produced at the Opéra Comique, Dec. 15, 1832, a few weeks before the composer's death, Jan. 19, 1833. The 1000th representation, Oct. 10, 1871. Given in London (in French) at the Princess's, May 2, 1849, and in Italian (same title) at Covent Garden, June 26, 1880. [G.]

PRECENTOR (Greek, *Protopsaltes* and *Canonarcha*; French, *Grand Chantre*; Spanish, *Chantre, Caput scholae* or *Capiscol*; German, *Primicier*; at Cologne, *Chorepiscopus*). The director of the choir in a cathedral, collegiate, or monastic church. In the English cathedrals of the old foundation, as well as in the cathedrals of France, Spain, and Germany, the Precentor was always a dignitary, and ranked next to the Dean, although in a few instances the Archdeacons preceded him. At Exeter the Precentor installed the Canons; at York he installed the Dean and other dignitaries; and at Lichfield even the Bishop received visible possession of his office from his hands. At Paris the Precentor of Notre Dame divided with the Chancellor the supervision of the schools and teachers in the city, and of the respondents in the university. The dignity of Precentor was established at Exeter, Salisbury, York, and Lincoln in the 11th century; at Rouen, Amiens, Chichester, Wells, Lichfield, and Hereford in the 12th century; and at St. David's and St. Paul's (London) in the 13th century. In cathedrals of the new foundation (with the exception of Christ Church, Dublin) the Precentor is a minor canon appointed by the Dean and Chapter, and removable at their pleasure. The duties of the Precentor were to conduct the musical portion of the service, to superintend the choir generally, to distribute copes and regulate processions; on Sundays and great festivals to begin the hymns, responses, etc., and at Mass to give the note to the Bishop and Dean, as the Succentor did to the canons and clerks. In monasteries the Precentor had similar duties, and was in addition generally chief librarian and registrar, as well as superintendent of much of the ecclesiastical discipline of the establishment. In some French cathedrals he carries a silver or white staff, as the badge of his dignity. In the Anglican Church his duties are to superintend the musical portions of the service, and he has the general management of the choir. His stall in the cathedral corresponds with that of the Dean. (Walcott, 'Sacred Archæology'; Hook, 'Church Dictionary.') [W.B.S.]

PRECIOSA. A play in 4 acts by P. A. Wolff, with overture and music by Weber; music completed July 15, 1820. Produced in Berlin, Mar. 14, 1821, at the Royal Opera-house. In Paris, in 1825, at the Odéon, adapted and arranged by Sauvage and Cremont; and April 16, 1858, at Théâtre Lyrique, reduced to one act by Nuitter and Beaumont. In London, in English, at Covent Garden, April 28, 1825.

In the autograph of the overture the March is stated to be from a real gipsy melody. [G.]

PREDIERI, Luc-Antonio, born at Bologna, Sept. 13, 1688, became maestro di capella of the cathedral, and on the recommendation of Fux was appointed by the Emperor Charles VI. vice-Capellmeister of the court-chapel at Vienna in Feb. 1739. He was promoted to the chief Capellmeistership in 1746, but dismissed in 1751 with title and full salary, apparently in favour of Reutter. He returned to Bologna, and died there in 1769. Among the MSS. of the Gesellschaft der Musikfreunde at Vienna are many scores of his operas, oratorios, feste di camera, serenatas, etc., which pleased in their day, and were for the most part produced at court. [C.F.P.]

PREGHIERA, a prayer. A name which some modern writers for the pianoforte (Rubinstein among them) have chosen to prefix to drawing-room pieces, consisting, as a rule, of a well-defined melody, adorned with more or less showy passages. The form of piece is, as its name implies, supposed to be solemn in character, but the display which for some unaccountable reason is seldom separate from it quite destroys any devotional feeling which may have given rise to the piece and to its name. [J.A.F.M.]

PREINDL, Joseph, born 1758 at Marbach on the Danube, a pupil of Albrechtsberger in Vienna, became in 1790 choirmaster of the Peterskirche, and in 1809 Capellmeister of St. Stephen's, in which post he died Oct. 26, 1823. He was a solid and correct composer, a skilled pianist and organist, and a valued teacher of singing. His compositions include masses, a requiem, smaller church pieces, and pianoforte and organ-music, partly published in Vienna. He also printed a 'Gesanglehre' (2nd ed. Steiner), and 'Melodien aller deutschen Kirchenlieder welche in St. Stephansdom in Wien gesungen werden,' with cadences, symphonies, and preludes, for organ or pianoforte (Diabelli, 3rd ed. revised and enlarged by Sechter). Seyfried edited his posthumous work 'Wiener Tonschule,' a method of instruction in harmony, counterpoint, and fugue (Haslinger, 1827; 2nd ed. 1832). [C.F.P.]

PRELLEUR, Peter, was of French extraction and in early life a writing master. About 1728 he was elected organist of St. Alban, Wood Street, and shortly afterwards engaged to play the harpsichord at Goodman's Fields Theatre, which he continued to do until the suppression of the theatre under the Licensing Act in 1737, composing also the dances and occasional music. In 1730 he published 'The Modern Musick Master, or, the Universal Musician,' containing an introduction to singing, instructions for playing the flute, German flute, hautboy, violin, and harpsichord, with a brief History of Music, and a Musical Dictionary. In 1735 he was elected the first organist of Christ Church, Spitalfields. After the closing of Goodman's Fields Theatre he was engaged at a newly opened place of entertainment in Leman Street close by, called the New Wells, for which he composed some songs, and an interlude entitled 'Baucis and Philemon,' containing a good overture and some pleasing songs and duets, the score of which he published. Fifteen hymn tunes by him were included in a collection of twenty-four published by one Moze, an organist, in 1758, under the title of 'Divine Melody,' in which he is spoken of as if then dead. [W.H.H.]

PRELUDE (Fr. *Prélude*; It. *Preludio*; Lat. *Preludium*; Ger. *Vorspiel*). A preliminary movement, ostensibly an introduction to the main body of a work, but frequently of intrinsic and independent value and importance. [See Introduction, Overture.] The term is rarely used in connection with oratorio, cantata, or opera, either as a synonym for overture or as a title for the instrumental introduction taking the place of an overture in regular form. Wagner, however, employs the word *Vorspiel* in the majority of his music dramas, notably in 'Lohengrin' and 'Die Meistersinger.' In each of these several instances the movement so denominated is not only of extreme significance, but is capable, like an overture, of being performed apart from the opera. In 'Tristan und Isolde' he prefers *Einleitung* (Introduction), but in the four sections of 'Der Ring des Nibelungen' we have *Vorspiel*, and the terms in an operatic sense may be considered practically interchangeable.

The Prelude was for a long period a characteristic portion of the Sonata or Suite. For example, Corelli in his 'Sonate da Camera,' commences almost invariably with a Preludio, that is, an introduction of 8, 12, or 16 bars, *largo* or *adagio*, leading generally into an Allemande. In the works of Corelli's successors, Italian and German, we find the Prelude more developed, but it seems to have been a matter of choice with the composer whether a movement so named should precede the Allemande. Bach, whose commanding genius led him to improve upon the lines of his predecessors, has left some masterly preludes in what is generally known as the ancient binary or sonata form; these movements being as important and interesting as any in his suites. [See Sonata, Suite.] But the term is used in another sense, which must be dealt with here—that is, as a title to the movement introductory to a fugue. The Wohltemperirte Clavier of Bach affords a great variety of forms and styles included under the same heading. In some instances, as for example Book I. No. 1 in C, No. 2 in C minor, and No. 3 in C♯, the prelude is a mere study in arpeggios; in others it is in regular form, as in Book II. No. 5 in D and No. 9 in E. Sometimes it is of greater length than the succeeding fugue, of which Book II. No. 17 in A♭, is an instance in point.

The organ preludes of Bach are of far greater interest than even his masterly compositions for the clavichord. In Book II. of the complete organ works there are some magnificent preludes, especially those in A minor, E minor, G minor and B minor. The contrapuntal ingenuity and musical beauty of the one last-named are greater than they are in the fugue following. But perhaps the finest of the entire series is that in E♭, Book III., associated with the fugue popularly known as 'St. Ann's.' The form of the movement is very nearly that of the modern rondo, and in regard to symmetrical proportion, melodic beauty, and depth of feeling, it has few rivals in the instrumental works of any composer. But a lengthy treatise might be penned on the organ preludes of John Sebastian Bach. Among the multitudinous imitations by recent composers the three preludes of Mendelssohn in op. 37 hold the foremost place. His six Preludes (and Fugues) for piano (op. 35) are also interesting, more especially that in E minor No. 1, which almost deserves a place among the 'Lieder ohne Worte.' Chopin, who was a law unto himself in many things, has left a series of Préludes, each of which is complete in itself, and not intended as an introduction to something else. The apparent anomaly may be forgiven, out of consideration to the originality of the pieces, which whether they were suggested by his visit to Majorca or not, are among the most characteristic of Chopin's compositions. It will be seen by the foregoing remarks that the title of Prelude has never been associated with any particular form in music, but

is equally applicable to a phrase of a few bars or an extended composition in strict or free style.

Occasionally the synonymous word PREAMBULUM is employed, of which the most salient modern instance occurs in Schumann's 'Carnaval,' op. 9. Prelude is sometimes used to signify the introductory bars of symphony in a song or other vocal piece; also the brief improvisation of a player before commencing his performance proper. Beethoven's two Preludes through the 12 keys, op. 39, are in the improvisatory style. [H.F.F.]

PRELUDES, LES. The third of Liszt's 'Symphonic Poems' (Symphonische Dichtungen) for full orchestra; probably composed in the winter of 1849, and first performed at Weimar, Feb. 23, 1854. [G.]

PREPARATION. The possibility of using a very large proportion of the dissonant combinations in music was only discovered at first through the process of 'suspension,' which amounts to the delaying of the progression of a part or voice out of a concordant combination while the other parts move on to a fresh combination; so that until the delayed part moves also to its destination a dissonance is heard. As long as the parts which have moved first wait for the suspended notes to move into their places before moving further, the group belongs to the order of ordinary suspensions (Ex. 1); but when they move again while the part which was as it were left behind moves into its place, a different class of discords is created (Ex. 2). In both these cases the sounding of the

Ex. 1. Ex. 2.

discordant note in the previous combination (*i.e.* the upper C in the first chord of both examples) is called the 'preparation' of the discord, and the latter class are sometimes distinguished especially as prepared discords. The note which prepares a discord must be ultimately capable of being taken without preparation; hence for a long while only absolutely concordant notes could be used for the purpose. But when by degrees the Dominant seventh, and later the major and minor ninths of the Dominant, and some similarly constructed chromatic chords of seventh and ninth, came to be used as freely as concords, their discordant notes became equally available to prepare less privileged discords. [C.H.H.P.]

PRESA (literally, 'a Taking'). A sign, used to indicate the places at which the Guida (or Subject) of a Canon is to be taken up by the several Voices.

The following are the forms most frequently adopted:—

·S· :S: ·Ṣ· + ※

In the famous 'Enimme,' or Ænigmatical Canons, of the 15th and 16th centuries, an Inscription is usually substituted for the Presa, though in many cases even this is wanting, and the Singer is left without assistance. [See INSCRIPTION.] [W.S.R.]

PRESTISSIMO, 'very quickly,' indicates the highest rate of speed used in music. It is used, like Presto, generally for the whole movement, which is as a rule the finale. Examples in Beethoven's sonatas are, Op. 2, No. 1, and Op. 53. It is used for the second movement of Op. 109. [J.A.F.M.]

PRESTO, 'fast,' indicates a rate of speed quicker than allegro, or any other sign except prestissimo. It is generally used at the beginning of movements, such movements being as a rule the last of the work, or the finale, as for instance, Beethoven's sonatas, Op. 10, No. 2; Op. 27, No. 2; Op. 31, No. 3. It is used as the 1st movement in Sonata, Op. 10, No. 3, and in Op. 79. When the time becomes faster in the middle of a movement, Più presto is used, as for instance in Beethoven's Quartet in E♭ (Op. 74), 3rd movement (Presto), where the direction for the part of the movement that serves as the trio is 'Più presto quasi prestissimo.' A curious instance of the use of this direction is in the pianoforte sonata of Schumann, Op. 22, where the 1st movement is headed 'Il più presto possibile,' and in German below 'So rasch wie möglich.' At 41 bars from the end of the movement comes 'Più mosso,' translated 'Schneller,' and again, 25 bars from the end, 'Ancora più mosso,' 'Noch schneller.' [J.A.F.M.]

PRÉVOST, EUGÈNE, born in Paris, Aug. 23, 1809, studied harmony and counterpoint at the Conservatoire with Seuriot and Jelensperger, and composition with Lesueur; took the second *Grand prix* in 1829, and the *Prix de Rome* in 1831 for his cantata 'Bianca Capella.' Previous to this he had produced 'L'Hôtel des Princes,' and 'Le Grenadier de Wagram'—1-act pieces containing pretty music—both with success, at the Ambigu-Comique. On his return from Italy, 'Cosimo,' an opéra-bouffe in 2 acts, was well received at the Opéra Comique, and followed by 'Le bon Garçon,' 1 act, of no remarkable merit. After his marriage with Eléonore Colon, sister of the favourite singer Jenny Colon, Prévost left Paris to become conductor of the theatre at Havre. His unusually retentive memory proved a disadvantage in this post, for in constantly studying the works of others he lost his originality. In 1838 he left Havre for New Orleans, where he remained 20 years. He was in great request as a singing-master, conducted the French theatre at New Orleans, and produced with marked success a mass for full orchestra, and several dramatic works, including 'Esmeralda,' which contained some striking music. None of these were engraved. When the war broke out he returned to Paris, and became favourably known as a conductor. He directed the concerts of the Champs Elysées, and the fantasias which he arranged for them show great skill in orchestration.

'L'Illustre Gaspard' (1 act) was produced at the Opéra Comique (Feb. 11, 1863), but the fellow pupil of Berlioz, Reber, and A. Thomas, had virtually fallen out of the race. His son Léon, also a good conductor, recalled him to New Orleans, where he settled finally towards the end of 1867, and died July 1872. [G.C.]

PREYER, Gottfried, born at Hausbrunn in Lower Austria, March 15, 1808. He studied at Vienna with Sechter, became in 1835 organist of the Reformed Church, in 1844 supernumerary vice-Capellmeister to the court, in 1846 court-organist, in 1862 vice-Capellmeister, and retired on a pension in 1876. Since 1853 he has been, and still is (1880), Capellmeister of the Cathedral. His connection with the Conservatorium dates from 1838, when he became professor of harmony and counterpoint, and conductor of the pupils' concerts; from 1844 to 48 he directed the institution. The Tonkünstler-Societät performed his oratorio 'Noah' in 1842, 45, and 51. He has printed a symphony, op. 16 (Diabelli); several masses and smaller church pieces; music for pianoforte and organ, choruses, and a large quantity of popular Lieder (chiefly Diabelli); and 'Hymns for the Orthodox Greek Church,' in 3 vols., Vienna, 1847; a grand mass for four male voices with organ, op. 76, etc. He has a grand opera among his MSS. [C.F.P.]

PRICK SONG. The name given by old writers upon music to divisions or descant upon a Plain-song or Ground, which were written, or pricked, down, in contradistinction to those which were performed extemporaneously. (See Morley's Introduction, Second Part.) The term is derived from the word 'prick,' as used to express the point or dot forming the head of the note. Shakspere (Romeo and Juliet, Act ii. Sc. 4) makes Mercutio describe Tybalt as one who 'fights as you sing prick song, keeps time, distance, and proportion; rests me his minim rest one, two, and the third in your bosom.' The term 'pricking of musick bookes' was formerly employed to express the writing of them. Payments for so doing are frequently found in the accounts of cathedral and college choirs. [W.H.H.]

PRIEST, Josias, a dancing-master connected with the theatres in the last quarter of the 17th century, who also kept a boarding-school for gentlewomen in Leicester Fields, which he removed in 1680 to Chelsea. Priest's claim to notice is his having engaged Henry Purcell to compose his first opera, 'Dido and Æneas,' for performance at his school. He invented the dances for Purcell's operas, 'The Prophetess,' 'King Arthur,' and 'The Fairy Queen,' and other pieces. [W.H.H.]

PRIME (Lat. *Prima; Hora prima. Officium (vel Oratio) ad Horam primam*). The first of the 'Lesser Hours' in the Roman Breviary.

The Office of Prime consists of the Versicle and Response, 'Deus in adjutorium'; a Hymn, 'Te lucis orto sidere,' which never changes; and three Psalms, sung under a single Antiphon. These are followed, on Sundays, by the Hymn 'Quicunque vult,' commonly called the Creed of S. Athanasius. On other occasions the Antiphon is immediately succeeded by the Capitulum and Responsorium breve. The disposition of the next division of the Office, including the Preces and the Martyrologium for the day, depends entirely upon the rank of the Festival on which it is sung. Certain Prayers are said, next in order; and the whole concludes with the Lectio brevis and the Benediction.

The Plain Chaunt Music for Prime will be found in the 'Antiphonarium Romanum' and the 'Directorium Chori.' [W.S.R.]

PRIMER—from *primus*, first—a first or elementary book for beginners. The first of Messrs. Novello & Co's. Music Primers, edited by Dr. Stainer, was issued Aug. 1, 1877, and the following have appeared to Dec. 31, 1880:—Pianoforte (Pauer), Rudiments of Music (Cummings), Organ (Stainer), Harmonium (King Hall), Singing (Randegger), Speech in Song (Ellis), Musical Forms (Pauer), Harmony (Stainer), Counterpoint (Bridge), Fugue (Higgs), Scientific Basis of Music (Stone), Church-Choir Training (Troutbeck), Plain Song (Helmore), Instrumentation (Prout), Elements of the Beautiful in Music (Pauer), The Violin (Berthold Tours), Tonic Sol-fa (J. Curwen), Lancashire Sol-fa (Greenwood), Composition (Stainer), Musical Terms (Stainer and Barrett).

That on Pianoforte Playing by Mr. Franklin Taylor forms one of Messrs. Macmillan's series of Shilling Primers, and was issued Sept. 26, 1877. (Published in German by J.J. Weber, Leipzig.) [G.]

PRIMO, 'first,' is used in two ways in music. (1) In pianoforte duets, *Primo* or *1mo* is generally put over the right-hand page, and then means the part taken by the 'treble' player, while *Secondo* or *2do* is put over that for the 'bass.' (2) In the *reprise* of the first section of a movement, a few bars are often necessary before the double-bar to lead back to the repetition, which are not required the second time of playing the section. The words *Primo, 1mo, 1ma volta,* or *1st time* are then put over all these bars, so that when the repeated portion reaches this direction, the player goes on to the part after the double-bar, leaving out the bars over which 'Primo' is written. The first few bars after the double-bar are frequently, but not always, labelled *Secondo, 2do,* or *2nd time.* The 'Primo' varies greatly in length. Beethoven often does without it at all (C minor and Pastoral Symphonies); in his No. 2 Symphony it is 2 bars long, in his No. 4 it is 14 bars long, and in Mendelssohn's Italian Symphony 23 bars (1st movement in all cases). [J.A.F.M.]

PRINCE DE LA MOSKOWA, Joseph Napoléon Ney, eldest son of Marshal Ney, born in Paris, May 8, 1803. As a lad he showed great aptitude for music, and composed a mass, which was performed at Lucca, where he lived after his father's death. In 1831 he was made 'Pair de France,' but sought distinction in a totally

different line from that of his brother the Duc d'Elchingen. He contributed to various periodicals, especially some articles in the 'Revue des deux Mondes' and the 'Constitutionnel,' which excited considerable interest. His love of sport was great, and he was one of the founders of the Jockey Club of Paris. In 1828 he married the only daughter of Laffitte, the banker. The services rendered by the Prince to music are considerable. In connexion with Adolphe Adam he founded the 'Société des Concerts de musique religieuse et classique,' an association for the practice of vocal music, and to this he devoted a great amount of learning, taste, and judgment. We append a catalogue of the works contained in this fine collection (11 vols. 8vo.), published for the Society by the Prince, which has now become very scarce.[1] The Prince lived on intimate terms with Delsarte the singer, and with Niedermeyer the composer, whom he materially assisted in the foundation of his 'Ecole de musique religieuse.' In 1831 a mass of his for voices and orchestra was executed by the pupils of Choron, and called forth the strong encomiums of M. Fétis. Although naturally inclined to the madrigal style and sacred music, he also attempted the theatre, producing at the Opéra Comique, 'Le Cent-Suisse' (June 7, 1840), a one-act piece, which had a considerable run, and 'Yvonne' (March 16, 1855), a one-act opéra comique, a clever imitation of the antique style. The Prince died July 25, 1857, at St. Germain-en-Laye.

[G.C.]

PRINCIPAL. A word with various meanings.

I. An organ stop. In Germany the term is very properly applied to the most important

[1] There is a copy of this Collection in the British Museum.

8-feet stops of open flue-pipes on the manuals, and to open 16-feet stops on the pedals, thus corresponding to our 'open diapasons.' But in this country the Principal is, with very few exceptions, the chief open metal stop of 4-feet pitch, and should more properly be termed an Octave or Principal octave, since it sounds an octave above the diapasons. [J.S.]

II. PRINCIPAL or PRINZIPALE. A term employed in many of Handel's scores for the third trumpet part. This is not usually in unison with the first and second trumpets, which are designated as Tromba 1mo and 2ndo. It is often written for in the old soprano clef with C on the lowest line, and has a range somewhat lower than the trombe. The older works on instrumentation, such as those of Schilling, Koch, Schladebach and Lichtenthal, recognise the difference and draw a distinction between 'Principal-Stimme' and 'Clarin-Stimme.' It is obvious that whereas the tromba or clarino represented the old small-bored instrument now obsolete, for which the majority of Handel's and Bach's high and difficult solos were composed, the Principal, in tone and compass, more nearly resembled the modern large-bored military trumpet. The contrast can easily be recognised by an examination of the overture to the Occasional Oratorio Arnold's edition, or that of the Dettingen Te Deum as published by the German Handel Society. In the latter the old soprano, in the former the usual treble clef, is adopted.

III. Principals, in modern musical language, are the solo singers or players in a concert. [W.H.S.]

PRING, JACOB CUBITT, Mus. Bac.; JOSEPH, Mus. Doc.; and ISAAC, Mus. Bac., sons of James Pring, were all choristers of St. Paul's under Robert Hudson.

JACOB CUBITT PRING, born at Lewisham in 1771, was organist of St. Botolph, Aldgate. He graduated at Oxford in 1797, was the composer of several anthems, glees, and other vocal pieces, and one of the founders of the Concentores Sodales. He published a set of eight anthems. Seven glees and a catch by him are included in Warren's Collections. He died 1799.

JOSEPH PRING, born at Kensington, Jan. 15, 1776, was on April 1, 1793 appointed organist of Bangor Cathedral on the resignation of Olive, but not formally elected until Sept. 28, 1810. In 1805 he published 'Twenty Anthems,' and on Jan. 27, 1808 accumulated the degrees of Mus. Bac. and Mus. Doc. at Oxford. In June 1813 he and three of the vicars-choral of Bangor Cathedral presented a petition to the Court of Chancery for the proper application of certain tithes which had, by an act of Parliament passed in 1685, been appropriated for the maintenance of the cathedral choir, but had been diverted by the capitular body to other purposes. The suit lasted until 1819, when Lord Chancellor Eldon, setting at naught the express provisions of the Act, sanctioned a scheme, which indeed gave to the organist and choir increased stipends, but yet kept them considerably below the amounts they would have received if the Act had been fully carried out. Dr. Pring, in 1819, printed copies of the proceedings in the suit, and other documents, with annotations, forming a history of the transactions, which has long been a scarce book. He died at Bangor, Feb. 13, 1842.

ISAAC PRING, born at Kensington, 1777, became in 1794 assistant organist to Dr. Philip Hayes at Oxford, and on his death in 1797 succeeded him as organist of New College. He graduated at Oxford in March, 1799, and died of consumption Oct. 18, in the same year. [W.H.H.]

PROCH, HEINRICH, well-known composer of Lieder, Capellmeister, and teacher of singing, born July 22, 1809, in Vienna; was destined for the law, but studied the violin with enthusiasm, and in 1833–34 frequently played in public in Vienna. He became in 1837 Capellmeister of the Josephstadt theatre, Vienna, and in 1840 of the Court opera, retiring with a pension in 1870. On the foundation of the shortlived Comic Opera in 1874 he was appointed its Capellmeister. His popularity is mainly due to his Lieder, among the best-known of which we may cite 'Das Alpenhorn.' He trained a large number of celebrated singers—among others Dustmann, Csillag, and Tietjens. Several good German translations of Italian operas—the Trovatore for example—are from his pen. Proch died Dec. 18, 1878. His daughter LOUISE is a singer and actress of some ability, with a powerful mezzo-soprano voice. [F.G.]

PRODIGAL SON, THE. An oratorio by Arthur Sullivan, composed for the Worcester Festival, 1869, and produced there Sept. 8. The subject has been treated by Gaveaux, Auber, and others, under the title of 'L'Enfant prodigue'; and by Ponchielli, whose 'Figliuol prodigo' was produced at the Scala, Milan, Dec. 26, 1880. [See vol. i. 488 *a*.] [G.]

PROFESSOR. At Oxford, the Professorship of Music was founded by Dr. William Heather in 1626. The first Professors were college organists, not known outside the University. Crotch, who took the office in 1797, and held it till 1848, was the first musician of eminence. His successor was Bishop. The present Professor, Sir F. A. G. Ouseley, Bt., was appointed on Bishop's death in 1855. During a long period the office was a sinecure. In the reforms carried out about 25 years ago, it was attempted to restore reality to the School of Music at Oxford by requiring the Professor to lecture at least once in each term, and by instituting musical performances under the superintendence of the Choragus. [See CHORAGUS.] The latter part of the scheme has totally failed; so that the Professor's lectures, about three a year, and the examinations for Musical degrees, are the only form in which the University advances the study of music. The terminal lectures, which are usually illustrated by an orchestra, bear rather the character of an interesting public entertainment than that of technical instruction. The more strictly academic work of the Professor consists in the examination for

Musical degrees. [See DEGREES.] The endowment of the chair is little more than nominal.

The Cambridge Professorship was founded by the University in 1684, and has been held by Staggins (1684), Tudway (1705), Greene (1730), Randall (1755), Hague (1799), Clarke-Whitfeld (1821), Walmisley (1836), Sterndale Bennett (1856), and G. A. Macfarren (1875), successively. The duties, like those at Oxford, consist chiefly in examining candidates for Musical degrees, and in prescribing those objects of musical study in which changes are made from time to time. The salary of the Professor is £200 per annum.

The Edinburgh Professorship was endowed by General Reid in 1839. The Professor is appointed by the University Court. Sir Herbert Oakeley, the present occupant of the chair, was elected in 1865: his predecessors were John Thomson, 1839; Sir H. R. Bishop, 1841; H. H. Pierson, 1844; John Donaldson, 1845. Unlike the non-resident Professors at Oxford and Cambridge, the Professor at Edinburgh is a member of the educational staff of the University. He receives a salary of £420 per annum, and a further sum of £200 per annum is allowed for assistants and for class-expenses. There is a regular double course of musical instruction:—(1) Lectures by the Professor on the history and development of the art and science of music; the various schools and styles; the history and construction of the principal musical instruments; the modern orchestra, etc., or on the works of the great masters. Organ performances, with instructive remarks in programmes, are given from time to time during the session. (2) Separate and individual instruction in organ or pianoforte-playing is given to a certain number of the younger students. To these the theory of music is practically imparted. Sir Herbert Oakeley is also president and conductor of the Edinburgh University Musical Society, established in 1867.

The Dublin Professorship was dormant till 1764, when Lord Mornington was appointed. He held office for ten years, after which time the Professorship again sank into oblivion. It was revived in 1845, in the person of Dr. Smith, and a few examinations of a rudimentary character were held, and degrees given. It was, however, reserved for the present Professor, Sir Robert Stewart, elected in 1862, to raise the standard of musical science in Dublin by examining in history, counterpoint, orchestration, and all that is included in modern musical study. Although the statutory duties of the Professor are confined to examinations and to the conduct of business relating to Musical degrees, and although there exists no endowment at Dublin like that which defrays class-expenses at Edinburgh, yet the actual condition of musical study at Dublin resembles that of Edinburgh rather than the two English Universities. Sir Robert Stewart, who is resident at the University, and is the organist of Trinity College Chapel, both delivers courses of lectures and imparts practical instruction by training the University Choral Society, and conducting the orchestral concerts, which, after weekly rehearsals, are held from three to five times during the season. The important change lately made at Oxford and Cambridge, by introducing literary elements into the examination for Musical degrees, was effected at Dublin by the present Professor many years before. [C. A. F.]

PROGRAMME (from *πρό*, 'before,' and *γράμμα*, 'a writing'). A list of the pieces to be performed at a concert, usually accompanied by the names of the performers. The term seems to have come into use in this connexion in the present century, and is now often further applied to the books containing the words, and the remarks on the pieces, which are becoming so usual. It is not however used for the book of words of an oratorio or opera.

Programmes are now commonly restricted in length to 2 hours or $2\frac{1}{2}$. The concerts of the Philharmonic Societies of London and Vienna, the Gewandhaus at Leipsic, and the Conservatoire at Paris, are of that length, usually containing a symphony and a smaller orchestral piece, a solo concerto, two or three vocal pieces for solo or chorus, and one or two overtures. This is sometimes divided into two parts, sometimes goes on without break.

Formerly concerts were of greater length. In the old days of the Philharmonic two symphonies were *de rigueur*, and even such *colossi* as Beethoven's Eroica, No. 7, and No. 9, were accompanied by a symphony of Haydn, Mozart, or Spohr, besides 4 vocal pieces, 2 overtures (the concluding one often styled a 'Finale'), a concerto, and some such trifle as Beethoven's Septet. This was a survival from an older order of things. The Haydn-Salomon Concerts of 1792-6 contained each 2 (once at least 3) Symphonies, and a final orchestral piece, 2 concertos, and 4 vocal pieces; and these again were modelled on the programmes of the petty German Concerts. Jahn in his Life of Mozart (i. 294) mentions that at Vienna about 1778, Count Firmian's soirées lasted for 6 hours; at one of them 'several symphonies' by Christian Bach, and four by Martini, were performed; at another 'twelve new Violin Concertos' by Benda. At a private concert at Dresden, Sept. 21, 1772, given for the benefit of Dr. Burney (Tour, ii. 44), the programme was in two parts, each containing a symphony, a violin solo, a flute concerto, and an oboe concerto; and, in addition, 'by way of a *bonne bouche*, Fischer's well-known rondeau minuet.' It must be remembered that these pieces were probably not nearly so long as those which now go by the same names. Our next instance, however, contains pieces of which we can all judge. It is the programme of a concert given by Mozart at Vienna, on March 22, 1783. All the pieces are by him.

1. The Hafner Symphony (Allegro and Andante).
2. Air from Idomeneo 'Se il padre.' Mad. Lange.
3. PF. Concerto in C.
4. Scena and Aria, 'Misera dove son.' Herr Adamberger.
5. Andante grazioso and Rondo allegro, from Serenade in D; for orchestra.
6. The favourite PF. Concerto in D.
7. Scena, 'Parto' (Lucio Silla). Mad. Teyber.

8. Extempore Fantasia on the PF. on an air by Paisiello; encored, when Mozart again extemporised on an air by Gluck (10 variations).
9. Scena and Aria, 'Mia speranza adorata.' Mad. Lange.
10. The Hafner Symphony (Minuet and Finale).

Beethoven indulged in long programmes when his own compositions were concerned. At the concert, in March 1807, at which his B♭ Symphony was first performed, the new work was preceded by all the three foregoing ones! Later, on Nov. 29, 1813, he gave the Symphony in A, the 'Glorreiche Augenblick' (7 nos.), and the 'Battle of Vittoria,' in the same programme. But then, these were his own music, and orchestral concerts were rare. That his judgment on this subject, when unbiassed, was as sound as it was elsewhere, is evident from the note prefixed to the score of the Eroica Symphony, in which he requests that it may be played near the beginning of the programme, and be accompanied only by an Overture, an Air and a Concerto, that it may not fail to produce its 'own intended effect.' If this was his sober judgment we may doubt whether he would have approved such a programme as that in which a great artist lately played the whole of the five last Sonatas (op. 101, 106, 109, 110, 111) consecutively, without any relief—magnificent interpretations, but surely an undue strain on both player and hearer. A recent performance of the Choral Symphony twice in one programme, with an interval of half an hour, is more excusable, for who ever heard that magnificent work without wishing to hear it all over again? The arrangement of a programme is not without its difficulties, as the effect of the pieces may be much improved by judicious contrast of the keys, the style, and the nature of the composition. We have elsewhere mentioned Mendelssohn's fastidious care on these points, and all are agreed that his Programmes when he conducted at the Gewandhaus were models. [See vol. ii. 297*b*.] He is said to have proposed to write the music for an entire Programme, in which he would no doubt have completely satisfied his canons of taste.

Of Benefit Concerts we say nothing. They have been known in this country (1840–50) to contain 40 pieces, played or sung by nearly as many solo artists, and to last more than 5 hours!

It was once the custom in France, and even in Germany, occasionally to divide the *pièce de résistance* of the programme into two, and play half a symphony at the beginning of the concert and half at the end. Mozart himself gives an example in the programme quoted above. But now-a-days such an attempt would be treated by any good audience with merited displeasure.

When Beethoven's Violin Concerto was first played (Dec. 23, 1806) by Clement, to whom it is dedicated, the selection was as follows:—

Overture	Clement
Violin Concerto . .	Beethoven
Extempore piece . .	Clement
Sonata on one string, with the Violin reversed.	

But the curiosities of programmes are endless. [G.]

PROGRAMME-MUSIC is an epithet originally intended to apply to that small but interesting class of music which, while unaccompanied by words, seeks to pourtray, or at least suggest to the mind, a certain definite series of objects or events. But the term is also applied, with deplorable vagueness of meaning, to all dramatic, characteristic, or imitative music whatever. It must always remain an open question how far music is able of itself to influence the mind's eye, for the simple reason that some imaginations are vastly more susceptible than others, and can therefore find vivid pictures where others see and hear nothing. Also, in programme-music of all kinds, the imagination is always turned in the required direction by the title of the piece, if by nothing else. It is held by some that music should never seek to convey anything beyond the 'concourse of sweet sounds,' or at least should only pourtray states of feeling. But what is the opinion of the bulk of audiences, who, though artistically ignorant, are not of necessity vulgar-minded? To the uninitiated a symphony is a chaos of sound, relieved by scanty bits of 'tune'; great then is their delight when they can find a reason and a meaning in what is to them like a poem in a foreign tongue. A cuckoo or a thunderstorm assists the mind which is endeavouring to conjure up the required images. And two other facts should be borne in mind: one is that there is a growing tendency amongst critics and educated musicians to invent imaginary 'programmes' where composers have mentioned none—as in the case of Weber's Concertstück and Schubert's C major Symphony, for instance—and another, that music, when accompanied by words, can never be too descriptive or dramatic, as in Wagner's music-dramas and the 'Faust' of Berlioz.

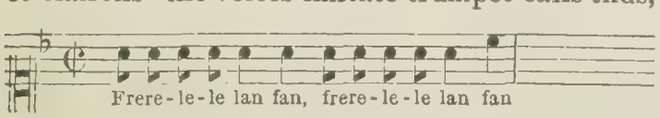
May it not at least be conceded that though it is a degradation of art to employ music in imitating the sounds of nature—illustrious examples to the contrary notwithstanding—it is a legitimate function of music to assist the mind, by every means in its power, to conjure up thoughts of a poetic and idealistic kind? If this be granted, programme-music becomes a legitimate branch of art, in fact the noblest, the *nature of the programme* being the vital point.

The 'Leit-motif' is an ingenious device to overcome the objection that music cannot paint actualities. If a striking phrase once accompany a character or an event in an opera, such a phrase will surely be ever afterwards identified with what it first accompanied. The 'Zamiel motive' in 'Der Freischütz' is a striking and early example of this association of phrase with character. [For a full consideration of this subject see LEIT-MOTIF.]

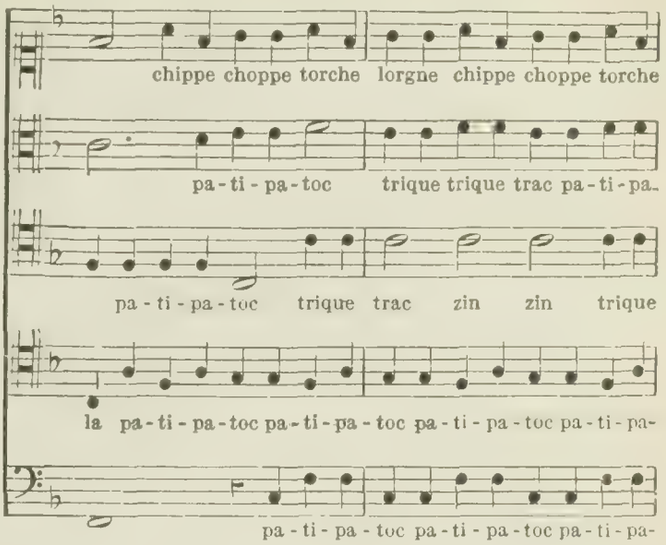
But admirable as this plan may be in opera, where the eye assists the ear, it cannot be said that the attempts of Liszt and Berlioz to apply it to orchestral music have been wholly successful. It is not enough for the composer to label his themes in the score and tell us, as in the 'Dante' Symphony for instance, that a monotone phrase for Brass instruments represents 'All hope abandon, ye who enter here,' or that a melodious phrase typifies Francesca da Rimini.

On the other hand, it is quite possible for a musical piece to follow the general course of a poem or story, and, if only by evoking similar states of mind to those induced by considering the story, to form a fitting musical commentary on it. Such programme pieces are Sterndale Bennett's 'Paradise and the Peri' overture, Von Bülow's 'Sänger's Fluch,' and Liszt's 'Mazeppa.' But as the extent to which composers have gone in illustrating their chosen subjects differs widely, as much as the 'Eroica' differs from the 'Battle Symphony,' so it will be well now to review the list of compositions—not a very bulky one before the present century—written with imitative or descriptive intention, and let each case rest on its own merits.

Becker, in his 'Hausmusik in Deutschland' mentions possessing a 16-part vocal canon 'on the approach of Summer,' by a Flemish composer of the end of the 15th century, in which the cuckoo's note is imitated, but given incorrectly. This incorrectness—D C instead of E♭ C—may perhaps be owing to the fact (discussed some time ago in the 'Musical Times') that this bird alters her interval as summer goes on.[1] It is but natural that the cuckoo should have afforded the earliest as well as the most frequent subject for musical imitation, as hers is the only bird's note which is reducible to our scale, though attempts have been made, as will be seen further on, to copy some others. Another canonic part-song, written in 1540 by Lemlin, 'Der Gutzgauch auf dem Zaune sass,' Becker transcribes at length. Here two voices repeat the cuckoo's call alternately throughout the piece. He also quotes a part-song by Antonio Scandelli (Dresden, 1570) in which the cackling of a hen laying an egg is comically imitated thus: 'Ka, ka, ka, ka, ne-ey! Ka, ka, ka, ka, ne-ey!' More interesting than any of these is the 'Dixieme livre des chansons' (Antwerp, 1545) to be found in the British Museum, which contains 'La Bataille à Quatre de Clem. Jannequin' (with a 5th part added by Ph. Verdelot), 'Le chant des oyseaux' by N. Gombert, 'La chasse de lièvre,' anonymous, and another 'Chasse de lièvre' by Gombert. Two at least of these part-songs deserve detailed notice, having been recently performed in Paris. The first has been transcribed in score by Dr. Burney[2] in his 'Musical Extracts' (Add. MS. 11,588), and is a description of the battle of Marignan. Beginning in the usual contrapuntal madrigal style with the words 'Escoutez, tous gentilz Gallois, la victoire du noble roy Françoys,' at the words 'Sonney trompettes et clairons' the voices imitate trumpet-calls thus,



and the assault is described by a copious use of onomatopeias, such as 'pon, pon, pon,' 'patipatoc,' and 'farirari,' mixed up with exclamations and war-cries. Two bars of quotation will perhaps convey some idea.



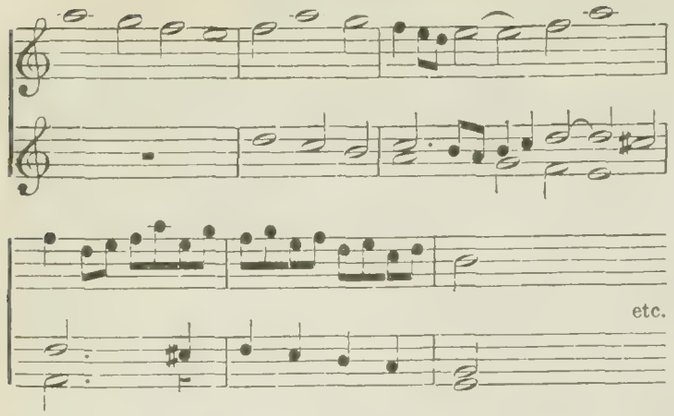
This kind of thing goes on with much spirit for a long while, ending at last with cries of 'Victoire au noble roy François! Escampe toutte frelon bigot!' Jannequin is said to have written some other descriptive pieces, in the list of which the 'Chant des oyseaux' of Gombert is wrongly included. [See JANNEQUIN.] This latter composition is chiefly interesting for the manner in which the articulation of the nightingale is imitated, the song being thus written down: 'Tar, tar, tar, tar, tar, fria, fria, tu tu tu, qui lara, qui lara, huit huit huit huit, oyti oyti, coqui coqui, la vechi la vechi, ti ti cū ti ti cū titi cū, quiby quiby, tu fouquet tu fouquet, trop coqu trop coqu,' etc. But it is a ludicrous idea to attempt an imitation of a bird by a part-song for Soprano, Alto, Tenor and Bass, although some slight effort is made to follow the phrasing of the nightingale's song. The 'Chasse de lièvre' describes a hunt, but is not otherwise remarkable.

The old musicians do not display much originality in their choice of subjects, whether for imitation or otherwise. 'Mr. Bird's Battle' is the title of a piece for virginals contained in a MS. book of W. Byrd's in the Christ Church Library, Oxford. The several movements are headed 'The soldiers' summons—the March of footmen—of horsemen—the Trumpets—the Irish march—the Bagpipe and Drum—etc.' and the piece is apparently unfinished. Mention may also be made of 'La Battaglia' by Francesco di Milano (about 1530) and another battle-piece by an anonymous Flemish composer a little later. Eckhard or Eccard (1589) is said to have described in music the hubbub of the Piazza San Marco at Venice, but details of this achievement are wanting. The beginning of the 17th century gives us an English 'Fantasia on the weather,' by John Mundy, professing to describe 'Faire Wether,' 'Lightning,' 'Thunder,' and 'A faire Day.' This is to be seen in 'Queen Elizabeth's Virginal Book.' The three subjects quoted overleaf alternate frequently, giving thirteen changes of weather, and the piece ends with a few bars expressing 'a cleare day.'

[1] Spohr, in his Autobiography, has quoted a cuckoo in Switzerland which gave the intermediate note—G, F, E.

[2] Reprinted in the Prince de la Moskowa's collection.

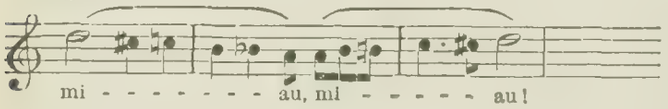
1. Faire wether.



2. Lightning.

3. Thunder.

There is also 'A Harmony for 4 Voices' by Ravenscroft, 'expressing the five usual Recreations of Hunting, Hawking, Dancing, Drinking, and Enamouring': but here it is probable that the words only are descriptive. A madrigal by Leo Leoni (1606) beginning 'Dimmi Clori gentil' contains an imitation of a nightingale. Then the Viennese composer Froberger (d. 1667) is mentioned by several authorities to have had a marvellous power of pourtraying all kinds of incidents and ideas in music, but the sole specimen of his programme-music quoted by Becker —another battle-piece—is a most feeble production. Adam Krieger (1667) gives us a four-part vocal fugue entirely imitative of cats, the subject being as follows—



Titles now begin to be more impressive, and the attempt of Buxtehude (b. 1637) to describe 'the Nature and Properties of the Planets' in a series of seven Suites for Clavier would be very ambitious had it extended further than the title-page. Kuhnau's 'Biblische Historien' are more noticeable. These were six Organ Sonatas describing various scenes in the sacred narrative. 'David playing before Saul' is one—a good musical subject; 'Jacob's wedding' is more of a programme piece, and contains a 'bridal song' for Rachel. 'Gideon' is of the usual order of battle-pieces, and 'Israel's death' is not very descriptive. Burney gives 'David and Goliath' and 'The ten plagues of Egypt' as the titles of the other two.

Amongst descriptive vocal pieces of this period should be noticed the Frost scene in Purcell's 'King Arthur,' in which the odd effect of shivering and teeth-chattering is rendered by the chorus. Also the following aria from an opera by Alessandro Melani (1660–96):—

Talor la granochiella nel pantano
Per allegrezza canta quà quà rè,
Tribbia il grillo tri trí tri,
L'Agnellino fa bè bè,
L'Usignuolo chiu chiu chiu,
Ed il gal curi chi chi.

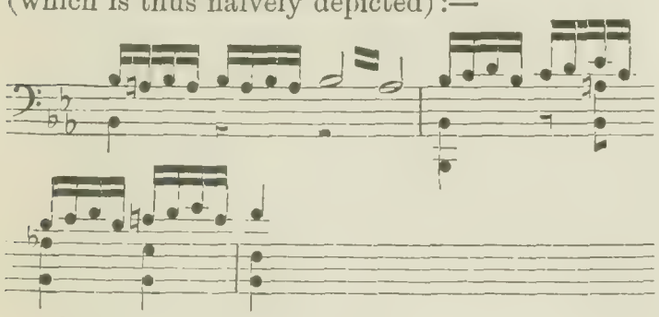
These imitations are said to have created much delight among the audience. Coming now to the great masters we find singularly few items for our list. J. S. Bach has only one, the 'Capriccio sopra la lontananza del suo fratello diletissimo,' for pianoforte solo, in which occurs an imitation of a posthorn. We cannot include the descriptive choruses which abound in cantatas and oratorios, the catalogue would be endless. We need only mention casually the 'Schlacht bei Hochstädt' of Em. Bach, and dismiss Couperin with the remark that though he frequently gives his harpsichord pieces sentimental and flowery names, these have no more application than the titles bestowed so freely and universally on the 'drawing-room' music of the present day. D. Scarlatti wrote a well-known 'Cat's Fugue.' Handel has not attempted to describe in music without the aid of words—for the 'Harmonious Blacksmith' is a mere after-invention, but he occasionally follows not only the spirit but the letter of his text with a faithfulness somewhat questionable, as in the setting of such phrases as 'the hail *ran* along upon the ground,' 'we have *turned*,' and others, where the music literally executes runs and turns. But this too literal following of the words has been even perpetrated by Bach ('Mein Jesu ziehe mich, so will ich *laufen*'), and by Beethoven (Mass in D, 'et *ascendit* in cœlum'); and in the present day the writer has heard more than one organist at church gravely illustrating the words 'The mountains *skipped* like rams' in his accompaniment, and on the slightest allusion to thunder pressing down three or four of the lowest pedals as a matter of course. Berlioz has ridiculed the idea of interpreting the words 'high' and 'low' literally in music, but the idea is now too firmly rooted to be disturbed. Who would seek to convey ethereal or heavenly ideas other than by high notes or soprano voices, and a notion of 'the great deep' or of gloomy subjects other than by low notes and bass voices?

A number of Haydn's Symphonies are distinguished by names, but none are sufficiently descriptive to be included here. Characteristic music there is in plenty in the 'Seasons,' and 'Creation,' but the only pieces of actual programme-music —and those not striking specimens—are the Earthquake movement, 'Il Terremoto,' in the 'Seven Last Words,' and the 'Representation of Chaos' in the 'Creation,' by an exceedingly unchaotic fugue. Mozart adds nothing to our list, though it should be remembered how greatly he improved dramatic music. We now come to the latter part of the 18th century, when programme pieces are in plenty. It is but natural

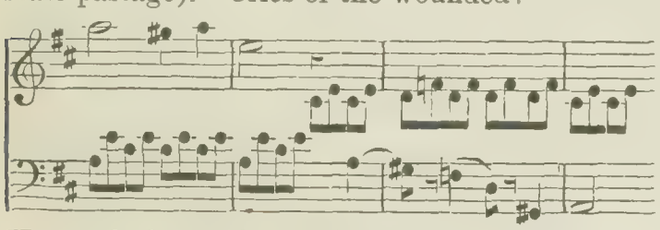
that the numerous battles of that stormy epoch should have been commemorated by the arts, and accordingly we find Battle Sonatas and Symphonies by the dozen. But first a passing mention should be made of the three symphonies of Ditters von Dittersdorf (1789) on subjects from Ovid's Metamorphoses, viz. The four ages of the world; The fall of Phaeton; and Actæon's Metamorphosis into a stag.

In an old volume of pianoforte music in the British Museum Library (g. 138) may be seen the following singular compositions:—

1. 'Britannia, an Allegorical Overture by D. Steibelt, describing the victory over the Dutch Fleet by Admiral Duncan.' In this, as well as all other similar pieces, the composer has kindly supplied printed 'stage directions' throughout. Thus —'Adagio: the stillness of the night. The waves of the sea. Advice from Captain Trollope' (which is thus naïvely depicted):—

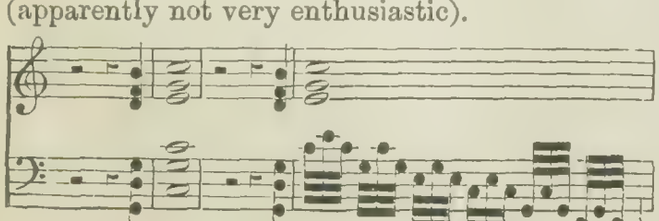


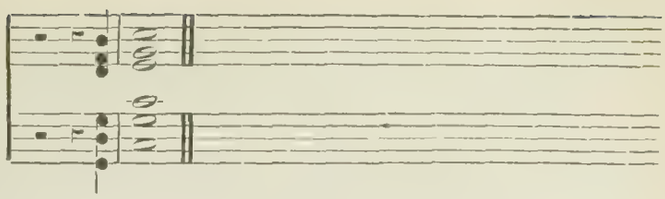
'Sailing of the Dutch Fleet announced (by a march!). Beat to arms. Setting the sails, "Britons, strike home." Sailing of the Fleet. Songs of the sailors. Roaring of the sea. Joy on sight of the enemy. Signal to engage. Approach to the enemy. Cannons. Engagement. Discharge of small arms. Falling of the mast (a descending scale passage). Cries of the wounded:—



Heat of the action. Cry of victory. "Rule Britannia," (interrupted by) Distress of the Vanquished. Sailing after victory. Return into port and acclamation of the populace. "God save the King."' This composer has also written a well-known descriptive rondo, 'The Storm,' as well as other programme pieces, the titles of which will be found under PIANOFORTE MUSIC [vol.ii.725b].

2. 'The Royal Embarkation at Greenwich, a characteristic Sonata by Theodore Bridault.' This piece professes to describe 'Grand Salutation of Cannon and Music. The barge rowing off to the Yatch. "Rule Britannia." His Majesty going on board. Acclamations of the people' (apparently not very enthusiastic).





3. 'The Battle of Egypt, by Dr. Domenico Briscoli.' This is a piece of the same kind, with full descriptions, and ending, as usual, with 'God save the King.'

4. 'The Landing of the Brave 42nd in Egypt. Military Rondo for Pianoforte, by T. H. Butler.' The programme is thus stated: 'Braving all opposition they land near Fort Aboukir, pursue the French up the sand-hills, and in a bloody battle conquer Buonaparte's best troops.'

5. Another 'Admiral Duncan's Victory,' by J. Dale.

6. 'Nelson and the Navy, a Sonata in commemoration of the glorious 1st of August, 1798, by J. Dale.' A similar sea-piece, in which the blowing up of L'Orient is represented by a grand ascending scale passage.

7. A third 'Admiral Duncan,' by Dussek.

8. 'The Sufferings of the Queen of France,' by Dussek. This is a series of very short movements strung together, each bearing a name. A deep mourning line surrounds the title-page. 'The Queen's imprisonment (largo). She reflects on her former greatness (maestoso). They separate her from her children (agitato assai). Farewell. They pronounce the sentence of death (allegro con furia). Her resignation to her fate (adagio innocente). The situation and reflections the night before her execution (andante agitato). The guards come to conduct her to the place of execution. They enter the prison door. Funeral March. The savage tumult of the rabble. The Queen's invocation to the Almighty just before her death (devotamente). The guillotine drops (a *glissando* descending scale). The Apotheosis.'

9. 'A complete delineation of the Procession .... in the Ceremony of Thanksgiving, 1797,' by Dussek. The full title nearly fills a page. Here we have horses prancing and guns firing, and the whole concludes with Handel's Coronation Anthem.

10. 'A Description in Music of Anacreon's L'Amour piqué par une abeille,' by J. Mugnié. This is perhaps the first attempt to illustrate a poem, and as such is commendable.

11. 'The Chace, or Royal Windsor Hunt,' by H. B. Schroeder; a descriptive hunting-piece.

12, 13. 'The Siege of Valenciennes,' and 'Nelson's Victory,' anonymous.

Far more famous, though not a whit superior to any of these, was Kotzwara's 'Battle of Prague.' It seems to be a mere accident that we have not a piece of the same kind by Beethoven on the Battle of Copenhagen![1] There is also a 'Conquest of Belgrade,' by Schroetter; and a composition by Bierey, in which one voice is accompanied by four others imitating frogs—'quaqua!'—belongs also to this period. Mr. Julian

[1] See his letters to Thomson, in Thayer, iii. 448, 9. He asked 50 gold ducats for the job.

Marshall possesses a number of compositions of an obscure but original-minded composer of this time (though perhaps a Prince), Signor Sampieri. He appears to have been a pianoforte teacher who sought to make his compositions interesting to his pupils by means of programmes, and even by illustrations placed among the notes. One of his pieces is 'A Grand Series of Musical Compositions expressing Various Motions of the Sea.' Here we have 'Promenade, Calm, Storm, Distress of the Passengers, Vessel nearly lost,' etc. Another is modestly entitled 'A Novel, Sublime, and Celestial, Piece of Music called NIGHT; Divided into 5 Parts, viz. Evening, Midnight, Aurora, Daylight, and The Rising of the Sun.' On the cover is given 'A short Account how this Piece is to be played. As it is supposed the Day is more Chearful than the Night, in consequence of which, the *Evening*, begins by a piece of Serious Music.—*Midnight*, by simple and innocent, at the same time shewing the Horror & Dead of the Night. *Aurora*, by a Mild encreasing swelling or crescendo Music, to shew the gradual approach of the Day. *Daylight*, by a Gay & pleasing Movement, the *Rising of the Sun*, concludes by an animating & lively Rondo, & as the Sun advance into the Centre of the Globe, the more the Music is animating, and finishes the Piece.'

In this composition occur some imitations of birds. That of the Thrush is not bad:

The Blackbird and the Goldfinch are less happily copied. Other works of this composer bear the titles of 'The Elysian Fields,' 'The Progress of Nature in various departments,' 'New Grand Pastorale and Rondo with imitation of the bagpipes'; and there is a curiously illustrated piece descriptive of a Country Fair, and all the amusements therein.

Coming now to Beethoven, we have his own authority for the fact, that when composing he had always a picture in his mind, to which he worked.[1] But in two instances only has he described at all in detail what the picture was. These two works, the Pastoral and the Battle Symphonies, are of vastly different calibre. The former, without in the slightest degree departing from orthodox form, is a splendid precedent for programme-music. In this, as in most works of the higher kind of programme-music, the composer seeks less to imitate the actual sounds of nature than to evoke the same feelings as are caused by the contemplation of a fair landscape, etc. And with such consummate skill is this intention wrought out that few people will be found to agree with a writer in the 'Encyclopædia Britannica' (former edition) who declares that if this symphony were played to one ignorant of the composer's intention the hearer would not be able to find out the programme for himself. But even were this the case—as it undoubtedly is with many other pieces—it would be no argument against programme-music, which never professes to propound conundrums. It may be worth mentioning that the Pastoral Symphony has actually been 'illustrated' by scenes, ballet and pantomime action in theatres. This was done at a festival of the Künstler Liedertafel of Düsseldorf in 1863 'by a series of living and moving tableaux in which the situations described by the Tone-poem are scenically and pantomimically illustrated.'[2] A similar entertainment was given by Howard Glover in London the same and following year.

Another interesting fact concerning the Pastoral Symphony is the identity of its programme with that of the 'Portrait Musical de la Nature' of Knecht, described below. The similarity however does not extend to the music, in which there is not a trace of resemblance. Mention has elsewhere been made of an anticipation of the Storm music in the 'Prometheus' ballet music, which is interesting to note. Some description of the little-known 'Battle Symphony' may not be out of place here. It is in two parts; the first begins with 'English drums and trumpets' followed by 'Rule Britannia,' then come 'French drums and trumpets' followed by 'Malbrook.' More trumpets to give the signal for the assault on either side, and the battle is represented by an Allegro movement of an impetuous character. Cannon of course are imitated—Storming March—Presto—and the tumult increases. Then Malbrook is played slowly and in a minor key, clearly, if somewhat inadequately, depicting the defeat of the French. This ends the 1st part. Part 2 is entitled 'Victory Symphony' and consists of an *Allegro con brio* followed by 'God save the King'—a melody, it may be remarked, which Beethoven greatly admired. The Allegro is resumed, and then the anthem is worked up in a spirited *fugato* to conclude.

Of the other works of Beethoven which are considered as programme, or at least characteristic music, a list has been already given at p. 206*b* of vol. i. It is sufficient here to remark that the 'Eroica' Symphony only strives to produce a general impression of grandeur and heroism, and the 'Pathetic' and 'Farewell' Sonatas do but pourtray states of feeling, ideas which music is peculiarly fitted to convey. The title 'Wuth über den verlorenen Groschen,' etc., given by Beethoven to a Rondo (op. 129) is a mere joke.

Knecht's Symphony here demands a more detailed notice than has yet been given it. The title-page runs as follows—

Le Portrait Musical de la Nature, ou Grande Simphonie . . . (For ordinary orchestra *minus* clarinets.) Laquelle va exprimer par le moyen des sons:

1. Une belle Contrée ou le Soleil luit, les doux Zephirs voltigent, les Ruisseaux traversent le vallon, les oiseaux gazouillent, un torrent tombe du haut en murmurant, le berger siffle, les moutons sautent, et la bergère fait entendre sa douce voix.

2. Le ciel commence à devenir soudain et sombre, tout le voisinage a de la peine de respirer et s'effraye, les nuages noirs montent,

[1] In a conversation with Neate, in the fields near Baden (Thayer, iii. 343). 'Ich habe immer ein Gemälde in meinen Gedanken, wenn ich am componiren bin, und arbeite nach demselben.'

[2] See 'Beethoven im Malkasten' by Jahn, 'Gesam. Aufsätze.'

les vents se mettent à faire un bruit, le tonnerre gronde de loin et l'orage approche à pas lents.

3. L'orage accompagné des vents murmurans et des pluies battans gronde avec toute la force, les sommets des arbres font un murm, et le torrent roule ses eaux avec un bruit épouvantable.

4. L'orage s'appaise peu à peu les nuages se dissipent et le ciel devient clair.

5. La Nature transportée de la joie éléve sa voix vers le ciel et rend au créateur les plus vives graces par des chants doux et agréables.

Dediée à Monsieur l'Abbé Vogler Premier Maitre de Chapelle Electorale de Palatin-Bavar, par Justin Henri Knecht.

[See KNECHT, vol. ii. p. 66.]

In spite of these elaborate promises the symphony, regarded as descriptive music, is a sadly weak affair; its sole merit lying in the originality of its form. In the first movement (G major, Allegretto) instead of the 'working out' section there is an episode, Andante pastorale, D major (*a*), formed from the first subject (*b*) by metamorphosis, thus—

The Abbé Vogler, to whom this composition is dedicated, was himself a great writer of programme-music, having described in his Organ Concertos such elaborate scenes as the drowning of the Duke Leopold in a storm, the Last Judgement, with graves opening, appearance of the mystic horsemen and choruses of damned and blessed—and a naval battle in the fashion of Dussek and the rest.

Coming now to modern times, we find a perfect mania for giving names to pieces—showing the bias of popular taste. Every concert overture *must* have a title, whether it be programme-music or not. Every 'drawing-room' piece, every waltz or galop, must have its distinctive name, till we cease to look for much descriptiveness in any music. It cannot be said that all Mendelssohn's overtures are programme-music. The Midsummer Night's Dream, with its tripping elves and braying donkey, certainly is, but the 'Meeresstille,' 'Hebrides,' and 'Melusine' are only pieces which assume a definite colour or character, the same as his 'Italian' and 'Scotch' symphonies. To this perfectly legitimate extent many modern pieces go; and some term like 'tinted music' should be invented for this large class of compositions, which includes the greater part of Schumann's pianoforte works, for instance. The 'Carneval' is decidedly programme-music, so are most of the 'Kinderscenen' and 'Waldscenen'; while others, despite their sometimes extravagant titles, are purely abstract music: for it is well known that Schumann often invented the titles after the pieces were written. Such pieces as the 'Fantasia in C' and the longer 'Novelletten,' from their poetic cast and free form give a decided impression of being intended for descriptive music.

Spohr's Symphony 'Die Weihe der Töne' (The Consecration of Sound) bears some relation to the Pastoral Symphony in its first movement; the imitations of Nature's sounds are perhaps somewhat too realistic for a true work of art, but have certainly conduced to its popularity. For no faults are too grave to be forgiven when a work has true beauty. His 'Seasons' and 'Historical' Symphonies are less characteristic.

Felicien David's wonderful ode-symphonie 'Le Désert' must not be omitted, though it is almost a cantata, like the 'Faust' of Berlioz. Modern dramatic music, in which descriptiveness is carried to an extent that the old masters never dreamed of, forms a class to itself. This is not the place to do more than glance at the wonderful achievements of Weber and Wagner.

Berlioz was one of the greatest champions of programme-music; he wrote nothing that was not directly or indirectly connected with poetical words or ideas; but his love of the weird and terrible has had a lamentable effect in repelling public admiration for such works as the 'Francs Juges' and 'King Lear' overtures. Music which seeks to inspire awe and terror rather than delight can never be popular. This remark applies also to much of Liszt's music. The novelty in construction of the 'Symphonische Dichtungen' would be freely forgiven were simple beauty the result. But such subjects as 'Prometheus' and 'The Battle of the Huns,' when illustrated in a sternly realistic manner, are too repulsive, the latter of these compositions having indeed lately called forth the severe remark from an eminent critic that 'These composers (Liszt etc.) prowl about Golgotha for bones, and, when found, they rattle them together and call the noise music.' But no one can be insensible to the charms of the preludes 'Tasso,' 'Dante,' and 'Faust,' or of some unpretentious pianoforte pieces, such as 'St. François d'Assise prédicant aux oiseaux,' 'Au bord d'une source,' 'Waldesrauschen,' and others.

Sterndale Bennett's charming 'Paradise and the Peri' overture is a good specimen of a work whose intrinsic beauty pulls it through. An unmusical story, illustrated too literally by the music,—yet the result is delightful. Raff, who ought to know public taste as well as any man, has named seven out of his nine symphonies, but they are descriptive in a very unequal degree. The 'Lenore' follows the course of Bürger's well-known ballad, and the 'Im Walde' depicts four scenes of forest life. Others bear the titles of 'The Alps,' 'Spring,' 'Summer,' etc., but are character-music only. Raff, unlike Liszt, remains faithful to classical form in his symphonies, though this brings him into difficulties in the Finale of the 'Forest' symphony, where the shades of evening have to fall and the 'Wild Hunt' to pass, twice over. The same difficulty is felt in Bennett's Overture.

That the taste for 'music that means something' is an increasing, and therefore a sound one, no one can doubt who looks on the enormous mass of modern music which comes under that head. Letting alone the music which is only intended for the uneducated, the extravagant

programme quadrilles of Jullien, and the clever, if vulgar, imitative choruses of Offenbach and his followers, it is certain that every piece of music now derives additional interest from the mere fact of having a distinctive title. Two excellent specimens of the grotesque without vulgarity in modern programme-music are Gounod's 'Funeral March of a Marionette' and Saint-Saëns' 'Danse Macabre.' In neither of these is the mark overstepped. More dignified and poetic are the other 'Poèmes Symphoniques' of the latter composer, the 'Rouet d'Omphale' being a perfect gem in its way. We may include Goldmark's 'Ländliche Hochzeit' symphony in our list, and if the Characteristic Studies of Moscheles, Liszt, Henselt and others are omitted, it is because they belong rather to the other large class of character-pieces.

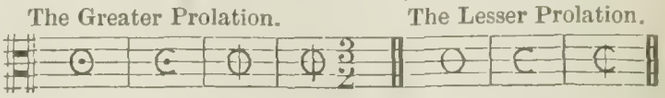
It will be noticed, on regarding this catalogue, how much too extended is the application of the term 'programme-music' in the present day. If every piece which has a distinct character is to be accounted programme-music, then the 'Eroica' Symphony goes side by side with Jullien's 'British Army Quadrille,' Berlioz's 'Episode de la vie d'un Artiste' with Dussek's 'Sufferings of the Queen of France,' or Beethoven's 'Turkish March' with his 'Lebewohl' sonata. It is absurd, therefore, to argue for or against programme-music in general, when it contains as many and diverse classes as does abstract music. As before stated, theorising is useless—the result is everything. A beautiful piece of music defies the critics, and all the really beautiful pieces in the present list survive, independently of the question whether programme-music is a legitimate form of art or not. [F.C.]

PROGRESSION is motion from note to note, or from chord to chord. The term is sometimes used to define the general aspect of a more or less extended group of such motions. It is also used of a group of modulations, with reference to the order of their succession. The expression 'progression of parts' is used with special reference to their relative motion in respect of one another, and of the laws to which such relative motion is subject. [See Motion.] [C.H.H.P.]

PROLATION (Lat. *Prolatio*; Ital. *Prolazione*). A subdivision of the rhythmic system, which, in Mediæval Music, governed the proportionate duration of the Semibreve and the Minim.

Prolation was of two kinds, the Greater, and the Lesser—called by early English writers, the More, and the Lesse, and by Italians, *Prolazione Perfetta*, and *Imperfetta*. In the former—usually indicated by a Circle, or Semicircle, with a Point of Perfection in its centre—the Semibreve was equal to three Minims. In the latter—distinguished by the same signs, without the Point—it was equal to two. [See Point.] The signs, however, varied greatly at different periods. In the latter half of the 16th century, for instance, the Circle was constantly either used in connection with, or replaced by, the figure 3, to which circumstance we owe the presence of that figure in our own Time-Signatures, the Time now known as 3–2 being, in fact, the exact modern equivalent of the Greater Prolation, and that commonly called *Alla Breve*, ₵, of the Lesser.

The Greater Prolation. The Lesser Prolation.



Prolation was generally intermixed with Mode, and Time, in curiously intricate proportions, which however were greatly simplified by the best Masters of the best Period. [See Mode, Time, Proportion, Notation.] [W.S.R.]

PROMENADE CONCERTS. Although the concerts given at Vauxhall, Ranelagh, Marylebone, and other public gardens, might be placed under this head, the class of entertainment now so well known in this country under the name was introduced into London from Paris. In 1838 some of the leading London instrumentalists gave concerts at the English Opera House (Lyceum) under the title of 'Promenade Concerts à la Musard.' The pit was boarded over and an orchestra erected upon the stage in the manner now familiar to all, though then so strange. The band consisted of 60 performers, including many of the most eminent professors; Mr. J. T. Willy was the leader, and Signor Negri the conductor; the programmes were composed exclusively of instrumental music, each consisting of 4 overtures, 4 quadrilles (principally by Musard), 4 waltzes (by Strauss and Lanner), and a solo, usually for a wind instrument. The first of the concerts was given on Dec. 12, and they were continued, with great success, during the winter. Early in 1839 the band of Valentino, the rival of Musard, came to London, and gave concerts at the Crown and Anchor Tavern; the programmes being composed of music of a higher class, the first part usually including a symphony; but they met with little support. In Oct. 1839 the original speculators resumed operations at the Lyceum. On June 8, 1840, 'Concerts d'Eté' were commenced at Drury Lane under the conductorship of Eliason, the violinist, with Jullien as his assistant, and a band of nearly 100, and a small chorus. Some dissensions among the original managers led to concerts of the same class being given by Mr. Willy in the autumn and winter at the Princess's Theatre, the majority of the band however still performing at the Lyceum. About the same period promenade concerts were given at Drury Lane, and Musard was brought over to conduct them. In Jan. 1841 'Concerts d'Hiver' were given in the same house by Jullien, who soon firmly established himself in public favour and continued to give this class of concerts until 1859. [See Jullien.] In 1851 promenade concerts conducted by Balfe were given at Her Majesty's Theatre under the title of 'National Concerts'; a large band and chorus and some eminent principal singers were engaged, but the speculation proved unsuccessful. Since Jullien's retirement, promenade concerts have been annually given in the autumn at Covent Garden, with Alfred Mellon

as conductor until 1866, and afterwards under various conductors, Signor Arditi, M. Hervé, Mr. Arthur Sullivan, M. Riviere, etc. [W.H.H.]

PROMETHEUS. Beethoven's only Ballet (op. 43); designed by Salvatore Vigano; composed in 1800, and produced, for Mlle. Casentini's benefit, March 28, 1801, in the Burg-theater, Vienna, under the title of 'Die Geschöpfe des Prometheus.' It contains an overture, an 'Introduction,' and 16 numbers. The title of the first edition, an arrangement for the piano (Vienna, 1801, numbered in error op. 24), is 'Gli Uomini di Prometeo'; English edition, 'The men of Prometheus.' If Beyle—who under the name of Bombet wrote the famous letters on Haydn—may be trusted, the representation of Chaos from the 'Creation' was interpolated by Vigano into Beethoven's Ballet at Milan, to express 'the first dawn of sentiment in the mind of beauty' (whatever that may mean).[1]

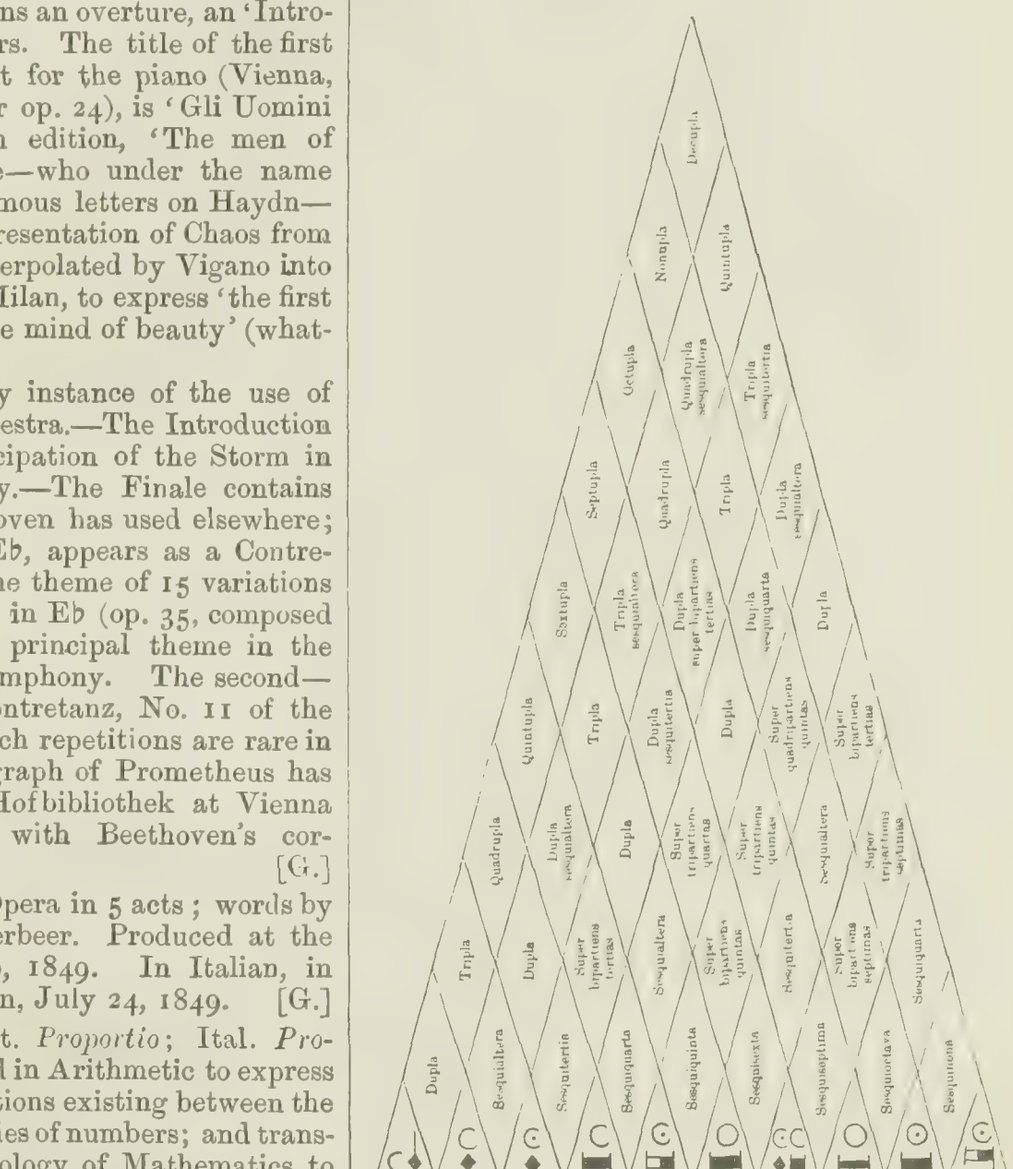
No. 5 is a very early instance of the use of the Harp with the Orchestra.—The Introduction contains a partial anticipation of the Storm in the Pastoral Symphony.—The Finale contains two tunes which Beethoven has used elsewhere; the first of these, in Eb, appears as a Contretanz, No. 7 of 12; as the theme of 15 variations and a fugue for the PF. in Eb (op. 35, composed in 1802); and as the principal theme in the Finale to the Eroica Symphony. The second—in G—appears as a Contretanz, No. 11 of the set first mentioned. Such repetitions are rare in Beethoven.—The autograph of Prometheus has disappeared, but the Hofbibliothek at Vienna possesses a transcript with Beethoven's corrections. [G.]

PROPHÈTE, LE. Opera in 5 acts; words by Scribe, music by Meyerbeer. Produced at the Opéra, Paris, April 16, 1849. In Italian, in 4 acts, at Covent Garden, July 24, 1849. [G.]

PROPORTION (Lat. *Proportio*; Ital. *Proporzione*). A term used in Arithmetic to express certain harmonious relations existing between the several elements of a series of numbers; and transferred from the terminology of Mathematics to that of Music, in which it plays a very prominent part. In Music, however, the word is not always employed in its strict mathematical sense: for, a true Proportion can only exist in the presence of three terms; in which point it differs from the Ratio, which is naturally expressed by two. Now, the so-called 'Proportions' of Musical Science are almost always expressible by two terms only, and should therefore be more correctly called Ratios; but we shall find it convenient to assume, that, in musical phraseology, the two words may be lawfully treated as synonymous—as, in fact, they actually have been treated, by almost all who have written on the subject, from Joannes Tinctor, who published the first Musical Dictionary, in the year 1474,[2] to the Theorists of the 18th and 19th centuries.

Of the three principal kinds of Proportion known to Mathematicians, two only—the Arithmetical and Geometrical species—are extensively used in Music: the former in connection with differences of Pitch and Rhythm; the latter, in the construction of the Time-table, the Scale of Organ Pipes, and other matters of importance.

Thomas Morley, in his 'Plaine and easie Introduction to Practicall Musicke' (London 1597),



1	2	3	4	5	6	7	8	9	10
2	4	6	8	10	12	14	16	18	20
3	6	9	12	15	18	21	24	27	30
4	8	12	16	20	24	28	32	36	40
5	10	15	20	25	30	35	40	45	50
6	12	18	24	30	36	42	48	54	60
7	14	21	28	35	42	49	56	63	70
8	16	24	32	40	48	56	64	72	80
9	18	27	36	45	54	63	72	81	90
10	20	30	40	50	60	70	80	90	100

gives a Table, which exhibits, at one view, all the different kinds of Proportion then in general use; thereby saving so much time and trouble, in the way of reference, that we have thought it well to

[1] Lettres sur Haydn, No. 18; May 31, 1809.

[2] 'PROPORTIO est duorum numerorum habitudo' (Joannis Tinctoris 'Terminorum Musicæ Diffinitorium.' Lit. P.)

reproduce his Diagram, before proceeding to the practical application of our subject.

To use this Table, (1) When the name of the Proportion is known, but not its constituents, find the name in the upper part of the Diagram; follow down the lines of the lozenge in which it is enclosed, as far as the first horizontal line of figures; and the two required numbers will be found under the points to which these diagonal lines lead. Thus, Tripla Sesquialtera lies near the left-hand side of the Diagram, about midway between the top and bottom; and the diagonal lines leading down from it conduct us to the numbers 2 and 7, which express the required Proportion in its lowest terms. (2) When the constituents of the Proportion are known, but not its name, find the two known numbers in the same horizontal line; follow the lines which enclose them, upwards, into the diagonal portion of the Diagram; and, at the apex of the triangle thus formed will be found the required name. Thus the lines leading from 2 and 8 conduct us to Quadrupla.

The uppermost of the horizontal lines comprises all the Proportions possible, between the series of numbers from 1 to 10 inclusive, reduced to their lowest terms. The subsequent lines give their multiples, as far as 100; and, as these multiples always bear the same names as their lowest representatives, the lines drawn from them lead always to the apex of the same triangle.

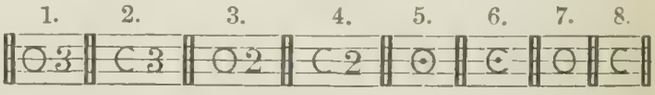
By means of the Proportions here indicated, the Theorist is enabled to define the difference of pitch between two given sounds with mathematical exactness. Thus, the Octave, sounded by the half of an Open String, is represented by the Proportion called Dupla; the Perfect Fifth, sounded by 2–3 of the String, by that called Sesquialtera; the Perfect Fourth, sounded by 3–4, by Sesquitertia. These Ratios are simple enough, and scarcely need a diagram for their elucidation; but, as we proceed to more complex Intervals, and especially to those of a dissonant character, the Proportions grow far more intricate, and Morley's Table becomes really valuable.

A certain number of these Proportions are also used for the purpose of defining differences of Rhythm; and, in Mediæval Music, the latter class of differences involves even greater complications than the former.

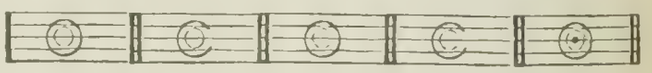
The nature of Mode, Time, and Prolation will be found fully explained under their own special headings; and the reader who has carefully studied these antient rhythmic systems will be quite prepared to appreciate the confusion which could scarcely fail to arise from their unrestrained commixture. [See Notation.] Time was, when this commixture was looked upon as the *cachet* of a refined and classical style. The early Flemish Composers delighted in it. Josquin constantly made one Voice sing in one kind of Rhythm, while another sang in another. Hobrecht, in his 'Missa Je ne demande,' uses no less than five different Time-signatures at the beginning of a single Stave—an expedient which became quite characteristic of the Music of the 15th and earlier years of the 16th centuries. It was chiefly for the sake of elucidating the mysteries of this style of writing that Morley gave his Table to the world; and, by way of making the matter clearer, he followed it up by a setting of 'Christes Crosse be my speed,' for Three Voices, containing examples of Dupla, Tripla, Quadrupla, Sesquialtera, Sesquiquarta, Quadrupla-Sesquiquarta, Quintupla, Sextupla, Septupla, Nonupla, Decupla, and Supertripartiens quartas, giving it to his pupil, Philomathes, with the encouraging direction—'Take this Song, peruse it, and sing it perfectly; and I doubt not but you may sing any reasonable hard wrote Song that may come to your sight.'

Nevertheless, Morley himself confesses that these curious combinations had fallen quite into disuse long before the close of the 16th century.

Ornithoparcus, writing in 1517,[1] mentions eight combinations of Proportion only, all of which have their analogues in modern Music, though, the Large and Long being no longer in use, they cannot all be conveniently expressed in modern Notation. (1) The Greater Mode Perfect, with Perfect Time; (2) the Greater Mode Imperfect, with Perfect Time; (3) the Lesser Mode Perfect, with Imperfect Time; (4) the Lesser Mode Imperfect, with Imperfect Time; (5) the Greater Prolation, with Perfect Time; (6) the Greater Prolation, with Imperfect Time; (7) Perfect Time, with the Lesser Prolation; (8) Imperfect Time, with the Lesser Prolation.



Adam de Fulda, Sebald Heyden, and Hermann Finck, use a different form of Signature; distinguishing the Perfect, or Imperfect Modes, by a large Circle, or Semicircle; Perfect, or Imperfect Time, by a smaller one, enclosed within it; and the Greater, or Lesser Prolation, by the presence, or absence, of a Point of Perfection in the centre of the whole; thus—



In his First Book of Masses, published in 1554, Palestrina has employed Perfect and Imperfect Time, and the Greater and Lesser Prolation, simultaneously, in highly complex Proportions, more especially in the 'Missa Virtute magna,' the second Osanna of which presents difficulties with which few modern Choirs could cope; while, in his learned 'Missa L'homme armé,' he has produced a rhythmic labyrinth which even Josquin might have envied. But, after the production of the 'Missa Papæ Marcelli,' in the year 1565, he confined himself almost exclusively to the use of Imperfect Time, with the Lesser Prolation, equivalent to our Alla Breve, with four Minims in the Measure; the Lesser Prolation, alone, answering to our Common Time, with four Crotchets in the Measure; Perfect Time, with the Lesser Prolation, containing three Semibreves

[1] Micrologus, lib. ii. cap. 5.

in the Measure; and the Greater Prolation, alone represented by our 3–2. A very little consideration will suffice to shew that all these combinations are reducible to simple Dupla, and Tripla.

Our modern Proportions are equally unpretentious, and far more clearly expressed; all Simple Times being either Duple, or Triple, with Duple subdivisions; and Compound Times, Duple, or Triple, with Triple subdivisions. Modern Composers sometimes intermix these different species of Rhythm, just as the Greater and Lesser Prolation were intermixed, in the Middle Ages; but, the simplicity of our Time-signatures deprives the process of almost all its complication. No one, for instance, finds any difficulty in reading the Third and Fourth Doubles in the last Movement of Handel's Fifth Suite (the 'Harmonious Blacksmith'), though one hand plays in Common Time, and the other in 24-16. Equally clear in its intention, and intelligible in the appearance it presents to the eye, is the celebrated Scene in 'Don Giovanni,' in which the First Orchestra plays a Minuet, in 3–4; the Second, a Gavotte, in 2–4; and the Third, a Valse, in 3–8; all blending together in one harmonious whole—a triumph of ingenious Proportion worthy of a Netherlander of the 15th century, which could only have been conceived by a Musician as remarkable for the depth of his learning as for the geniality of his style. Spohr has used the same expedient, with striking effect, in the Slow Movement of his Symphony 'Die Weihe der Töne'; and other still later Composers have adopted it, with very fair success, and with a very moderate degree of difficulty—for our Rhythmic Signs are too clear to admit the possibility of misapprehension. Our Time-table, too, is simplicity itself, though in strict Geometrical Proportion—the Breve being twice as long as the Semibreve, the Semibreve twice as long as the Minim, and so with the rest. We have, in fact, done all in our power to render the rudiments of the Art intelligible to the meanest capacity: and only in a very few cases—such as those which concern the 'Section of the Canon,' as demonstrated by Euclid, and other writers on the origin and constitution of the Scale; the regulation of Temperament; the Scale of Organ Pipes; and others of like nature—are we concerned with Proportions sufficiently intricate to demand the aid of the Mathematician for their elucidation. [W.S.R.]

PROPOSTA (Lat. *Dux*; Eng. Subject). A term applied to the Leading Part, in a Fugue, or Point of Imitation, in contradistinction to the Risposta, or Response (Eng. Answer; Lat. *Comes*). The Leading Part of a Canon is usually called the Guida, though the term Proposta is sometimes applied to that also. [W.S.R.]

PROPRIETAS, propriety (Germ. *Eigenheit*). A peculiarity attributed, by Mediæval writers, to those Ligatures in which the first note was sung as a Breve: the Breve being always understood to represent a complete Measure (Lat. *Tactus*; Old Eng. Stroke). Franco of Cologne describes Ligatures beginning with Breves, Longs, and Semibreves, as *Ligaturæ cum, sine,* and *cum opposita Proprietate,* respectively. [W.S.R.]

PROSE. [See Sequentia.]

PROSKE, Karl, editor of the celebrated collection of ancient church-music called Musica Divina, born Feb. 11, 1794, at Gröbing in Upper Silesia, where his father was a wealthy landowner. Having studied medicine he made the campaign of 1813–15 as an army surgeon, but being compelled to retire by his health, he took his degree as Doctor of Medicine at Halle, and settled as government physician at Oppeln in Upper Silesia. Here he suddenly became a religious enthusiast, a change to which his devotion to church music doubtless contributed. On April 11, 1826, he was ordained priest by Bishop Sailer at Ratisbon, where he became vicar-choral in 1827, and Canon and Capellmeister of the Cathedral in 1830. From this time, with the aid of his private fortune, he began his celebrated collection of church music, residing for long in Italy exploring the great MS. collections there, and scoring from the voice-parts many very beautiful, but hitherto unknown works, and publishing them in a cheap, accurate, and legible form as 'Musica Divina' [see vol. ii. p. 411]. Each volume is preceded by introductory remarks, biographical and bibliographical. Attention has been repeatedly called in this Dictionary to the merits of this collection. [See among others Mass; Improperia.] Proske died of angina pectoris, Dec. 20, 1861, bequeathing his collection to the episcopal library of Ratisbon, of which it forms one of the chief ornaments. [F.G.]

PROUT, Ebenezer, B.A., born at Oundle, Northamptonshire, March 1, 1835, graduated at London, 1854. He studied the pianoforte under Charles Salaman. In 1862 he gained the first prize of the Society of British Musicians for the best string quartet, and in 1865 their first prize for pianoforte quartet. From 1871 to 1874 he was editor of 'The Monthly Musical Record,' and since then has been successively music critic of 'The Academy' and 'The Athenæum.' He is conductor of the Borough of Hackney Choral Association, and Professor of harmony and composition at the Royal Academy of Music and the National Training School of Music. His compositions include String Quartet in E♭, op. 1; PF. Quartet in C, op. 2; PF. Quintet in G, op. 3; Concert for Organ and Orchestra, op. 5; Magnificat in C, op. 7; and Evening Service in E♭, op. 8, both with orchestra; 'Hereward,' dramatic cantata, op. 12 (produced at St. James's Hall, June 4, 1879); and two MS. symphonies in C major and G minor. [W.H.H.]

PRUDENT, Emile, born at Angoulême, April 3, 1817, never knew his parents, but was adopted by a piano-tuner, who taught him a little music. He entered the Paris Conservatoire at 10, and obtained the first piano prize in 1833, and the second harmony prize in 1834. He had no patrons to push him, and his want of education not being supplied by natural facility, he had a long struggle

with the stern realities of life, but by dint of patience and perseverance he overcame all obstacles. His first performance in public was at a concert with Thalberg, whose style he imitated, and the success of his fantasia on 'Lucia di Lammermoor' (op. 8) established him with the public. He then made constant excursions in France, and occasional trips abroad, but his home continued to be in Paris, and there he composed and produced his new pieces. His compositions, about 70 in number, include a trio for PF., violin, and cello; a concerto-symphonie 'Les trois Rêves' (op. 67); several brilliant and pleasing morceaux de genre, such as 'Les Bois,' and 'La Danse des Fées'; fantasias on opera-airs, or themes by classical composers; transcriptions with and without variations, cleverly calculated to display the virtuosity of a pianist; and finally 'Etudes de genre,' also intended to show off manual dexterity. His music is clear, melodious, and correct; pleasing the ear without straining the attention. Prudent is no fiery or original genius, but an artist with a real love for his instrument, and a thorough understanding of its resources, and a musician of taste and progress. From Thalberg to Mendelssohn is a long way to traverse, and Prudent was studying the latter composer with enthusiasm when he was carried off after 48 hours' illness, by diphtheria, on May 14, 1863. His kind and generous disposition caused him to be universally regretted. He was a good teacher, and formed several distinguished pupils, especially ladies; among these Mlle. Louise Murer, who took the first piano prize at the Conservatoire in 1854, was the best interpreter of his works. In England he was well known. He played a concerto in B♭ of his own composition at the Philharmonic, May 1, 1848; returned in 1852 and introduced his elegant morceau 'La Chasse,' which he repeated at the New Philharmonic Concert June 1, 1853. [G.C.]

PRUME, François Hubert, violinist, was born in 1816 at Stavelot near Liège. Having received his first instruction at Malmédy, he entered in 1827 the newly opened Conservatoire at Liège, and in 1830 that at Paris, where he studied for two years under Habeneck. Returning to Liège he was appointed professor at the Conservatoire, although only seventeen years of age. In 1839 he began to travel, and visited with much success Germany, Russia, and the Scandinavian countries. He died in 1849 at Stavelot. Prume was an elegant virtuoso, with most of the characteristic qualities of the modern Franco-Belgian school. He is chiefly remembered as the composer of 'La Melancholie' a sentimental *pièce de salon* which for a time attained an extraordinary popularity, without however possessing the artistic worth of the rest of Prume's compositions. [P.D.]

PRUMIER, Antoine, born in Paris July 2, 1794, learned the harp from his mother, and afterwards entered the Conservatoire, and obtained the second harmony prize in Catel's class in 1812. After this however he was compelled by military law to enter the Ecole polytechnique; but in 1815 he gave up mathematics, re-entered the Conservatoire, and finished his studies in counterpoint under Eler. He then became harpist in the orchestra of the Italiens, and, on the death of Nadermann in 1835, professor of the harp at the Conservatoire. In the same year he migrated to the Opéra Comique, but resigned his post in 1840 in favour of his son, the best of his pupils. Prumier composed and published about a hundred fantasias, rondeaux, and airs with variations for the harp—all well written but now antiquated. He received the Legion of Honour in 1845, and was vice-president of the Association des Artistes Musiciens for 17 years consecutively. He died from the rupture of an aneurism at a committee meeting of the Conservatoire, Jan. 21, 1868. He had retired on his pension the year before, and been succeeded by Labarre, at whose death (April 1870) the professorship devolved upon

Conrad Prumier, born in Paris, Jan. 5, 1820, and lauréat in 1838. Like his father he writes well for the instrument, and is considered a skilled performer and a musician of taste. [G.C.]

PSALTERY (*ψαλτήριον*; Old English *Sautry*; French *Psalterion*; Ital. *Salterio*; Ger. *Psalter*). A dulcimer, played with the fingers or a plectrum instead of by hammers. The French have adopted the Greek name without change. There exists a classic sculptured representation of the Muse Erato, holding a long ten-stringed lyre, with the name ΨΑΛΤΡΙΑΝ cut on its base. From this it has been inferred that the strings of this lyre were touched by the fingers without the usual plectrum of ivory or metal. Chaucer's 'sautrie' in the Miller's Tale[1] came direct from the East, perhaps imported by returning Crusaders, its kinship to the Persian and Arabic *santir* and *kanun* being unmistakable. The psaltery was the prototype of the spinet and harpsichord, particularly in the form which is described by Prætorius in his 'Organographia,' as the 'Istromento di porco,' so called from its likeness to a pig's head.

The illustration is drawn from a 15th-century painting by Filipino Lippi in the National Gallery, and represents a 'stromento di porco' strung vertically, a mode less usual than the horizontal stringing, but more like that of a harpsichord or grand piano. Notwithstanding the general use of keyed instruments in 1650 we read in the 'Musurgia' of Athanasius Kircher, that the psaltery played with a skilled hand stood second to no other instrument, and Mersenne, about the same date, praises its silvery tone in preference to that of any other, and its purity of intonation, so easily controlled by the fingers.

No 'Istromento di porco' being now known to exist, we have to look for its likeness in painted or sculptured representations. The earliest occurs in a 13th-century MS. in the library at Douai. It is there played without a plectrum. From

[1] 'And all above ther lay a gay sautrie
On which he made on nightes melodie,
So swetely, that all the chambre rong,
And *Angelus ad virginem* he song.'

the 14th century there remain frequent examples, notably at Florence, in the famous Organ Podium of Luca della Robbia, a cast of which is in the South Kensington Museum.

But other forms were admired. Exactly like an Arabic *kanun* is a psaltery painted A.D. 1348 by that loving delineator of musical instruments, Orcagna, himself a musician, in his 'Trionfo della Morte,' at Pisa. The strings of the instrument are in groups of three, each group, as in a grand piano, being tuned in unison to make one note. Sometimes there were groups of four, a not unfrequent stringing in the DULCIMER. There is a good coloured lithograph of Orcagna's fresco in 'Les Arts au Moyen Age,' by Paul Lacroix (Paris, 1874, p. 282); it is there called 'Le songe de la Vie.' A fine representation of such a psaltery, strung in threes, by Orcagna, will be found in our National Gallery (Catalogue No. 569). [A.J.H.]

PUCITTA, VINCENZO, was born at Rome, 1778, and brought up at the Pietà, at Naples, under Fenaroli and Sala. He wrote his first opera for Sinigaglia, near Ancona, and from that time till his death composed for the stage diligently. 'I due Prigionieri' (Rome 1801) was the first to make him widely known. He was, however, often away from Italy, first at Lisbon, where he brought out 'L'Andromacca,' and then in London, where he became for a time Director of the Music at the Opera.

His name first appears in 1809, when three of his operas were performed—'I Villeggiaturi bizarri,' 'La Caccia d'Enrico IV,' and 'Le quattro Nazioni.' In 1810 we find his 'La Vestale,' in 1811 'La tre Sultane,' in 1812 'La Ginevra di Scozia,' in 1813 'Boadicea,' and in 1814 'Aristodemo.' He then left the Opera and travelled with Madame Catalani; and when, in 1813, she took the direction of the Italian Opera at Paris, he became accompanyist, and three of his works were brought out there in 1815, 16 and 17. He then went to Rome, and remained in Italy till his death, at Milan, Dec. 20, 1861. Fétis gives a list of 23 of his operas, and says that his music shows great facility but no invention. Ten volumes of his songs, entitled 'Mille Melodie,' are published by Ricordi. [G.]

PUGET, LOISA, born at Paris about 1810; though an amateur, achieved an extraordinary popularity in the reign of Louis Philippe by her songs, composed to Gustave Lemoine's words. Among the best known of these were, 'A la grâce de Dieu,' 'Ave Maria,' 'Le Soleil de ma Bretagne,' 'Ta dot,' 'Mon pays,' 'Les rêves d'une jeune fille,' etc. Musically speaking they are inferior to those of Panseron, Labarre, or Masini; but the melodies were always so natural and so suited to the words, and the words themselves were so full of that good, *bourgeois* character, which at that time was all the fashion in France, that their vogue was immense. Encouraged by her success, Puget aspired to the theatre. She took lessons from Adolphe Adam, and on Oct. 1, 1836, produced at the Opera Comique a one-act piece, 'Le mauvais Œil,' which was sung to perfection by Ponchard and Mme. Damoreau. In 1842 she married Lemoine, and finding the popularity of her songs on the wane, had the tact to publish no more. She broke silence only once again with an operetta called 'La Veilleuse, ou les Nuits de Milady,' produced at the Gymnase, Sept. 27, 1869. Madame Lemoine has for some time resided at Pau, where she is still living (1881). [G.C.]

PUGNANI, GAETANO, celebrated violinist, was born at Turin (or according to another source at Canavese) in 1727. He must be considered as one of the best representatives of the Piedmontese School of violin-playing. Being a pupil first of Somis, who studied under Corelli, and afterwards of Tartini, he combined the prominent qualities of the style and technique of both these great masters. He was appointed first violin to the Sardinian court in 1752, and began to travel in 1754. He made lengthened stays at Paris and in London, where he was for a time leader of the opera band, produced an opera of his own (Burney, Hist. iv. 494), and published trios, quartets, quintets, and symphonies. In 1770 Burney found him at Turin, and there he remained as leader, conductor, teacher and composer, for the rest of his life. He died in 1803.

To Pugnani more than to any other master of the violin appears to be due the preservation of the pure grand style of Corelli, Tartini and Vivaldi, and its transmission to the next generation of violinists. Apart from being himself an excellent player he trained a large number of eminent violinists—such as Conforti, Bruni, Polledro and, above all, Viotti. He was also a prolific composer: he wrote a number of operas and ballets, which however appear not to have been very successful. Fétis gives the names of 9, and a list of his published instrumental compositions:—one violin-concerto (out of 9), 3 sets of violin-sonatas, duos, trios, quartets, quintets, and 12 symphonies for strings, oboes and horns. [P.D.]

PUPPO, GIUSEPPE, eminent violinist, was born at Lucca in 1749. He was a pupil of the Conservatorio at Naples, and when still very young gained considerable reputation in Italy as a virtuoso. He came to Paris in 1775; thence he went to Spain and Portugal, where he is reported to have amassed a fortune. After having stayed for some years in England he returned to Paris in 1784, and remained there till 1811, occupying the post of leader, first at the Théâtre de Monsieur, which was then under Viotti's direction, then at the Théâtre Feydeau, and finally conducting the band at the Théâtre Français. As he was an excellent accompanyist, he was much in request in the musical circles of the rich and noble, and might have secured for himself a competency if it had not been for his eccentricity and unsteadiness, which brought him into constant troubles. In 1811 he suddenly left Paris, abandoning his wife and children for ever. Arrived at Naples he was lucky enough to secure the leadership of the band at a theatre. He however did not stay long, but went to Lucca, thence to Florence, and finally found employment as teacher at a music school at Pontremoli. After two years he threw up this appointment and returned to Florence, was there found, utterly destitute, by Mr. Edward Taylor, Gresham Professor of Music, and by his generosity was placed in a hospice, where he died in 1827. Fétis gives interesting details of his adventurous life, and several of his *bon mots*. It was he who so happily described Boccherini as 'the wife of Haydn.' His published compositions are few and of no importance. [P. D.]

PURCELL. The name of a family of musicians in the 17th and 18th centuries, which included amongst its members the greatest and most original of English composers.

1. The name of 'Pursell,' presumably HENRY PURCELL the elder, is first found in Pepys's diary, under date Feb. 21, 1660, where he is styled 'Master of Musique.' Upon the re-establishment of the Chapel Royal (in 1660) Henry Purcell was appointed one of the Gentlemen. He was also Master of the Choristers of Westminster Abbey. On Dec. 21, 1663, he succeeded Signor Angelo as one of the King's Band of Music. He died Aug. 11, 1664. and was buried in the east cloister of Westminster Abbey, Aug. 13. There is a three-part song, 'Sweet tyranness, I now resign my heart,' in Playford's 'Musical Companion,' 1667, which is probably of his composition, although it is sometimes attributed to his more celebrated son. It was reprinted in Burney's History, iii. 486.

2. His eldest son, EDWARD, born 1653, was Gentleman Usher to Charles II, and afterwards entered the army and served with Sir George Rooke at the taking of Gibraltar, and the Prince of Hesse at the defence of it. Upon the death of Queen Anne he retired and resided in the house of the Earl of Abingdon, where he died June 20, 1717. He was buried in the chancel of the church of Wytham, near Oxford.

3. HENRY PURCELL, the second son of Henry Purcell the elder, is traditionally said to have been born in Old Pye Street, Westminster, in or about 1658. He lost his father before he was six years old,[1] and soon afterwards was admitted a chorister of the Chapel Royal under Capt. Henry Cooke, after whose death, in 1672, he continued under Pelham Humfrey. He is said to have composed anthems whilst yet a chorister, but there are now no means of verifying the fact, although it is highly probable. He may possibly have remained in the choir for a brief period after the appointment of Blow as successor to Humfrey as Master of the Children, but the probability is that, after quitting the choir on the breaking of his voice, he studied composition under Blow as a private pupil, and so justified the statement on Blow's monument that he was 'master to the famous Mr. H. Purcell.' In 1675, when only 17 years of age, Purcell was engaged by Josias Priest, a dancing-master connected with the theatres, who also kept a 'boarding school for young gentlewomen' in Leicester Fields, to compose an opera written by Nahum Tate, called 'Dido and Æneas,' for performance at his school. Purcell executed his task in a manner which would have added to the reputation of many an older musician. The opera is without spoken dialogue, the place of which is supplied by recitative; it contains some beautiful airs, and some spirited choruses, especially that beginning 'To the hills and the vales.' The work, although not performed on the public stage, acquired considerable popularity, as is evident from the number of manuscript copies in existence; but, with the exception of one song, printed in the 'Orpheus Britannicus,' and the rondo 'Fear no danger,' printed by Warren and others, it remained unpublished until 1840, when it was printed by the 'Musical Antiquarian Society.'[2] The production of 'Dido and Æneas' led to Purcell's introduction to the public theatre. In 1676 he was engaged to write music for Dryden's tragedy 'Aurenge-Zebe,' and for Shadwell's comedy 'Epsom Wells,' and part of the music for his tragedy 'The Libertine.' The latter contains the pleasing air 'Nymphs and Shepherds,' and the well-known chorus 'In these delightful pleasant groves.' In the same year a song by him appeared in the new edition of Book I. of Playford's publication, 'Choice Ayres, Songs and Dialogues.' In 1677 he furnished an overture, eight act and other tunes, and songs for Mrs. Behn's tragedy 'Abdelazor,' and composed an elegy on the death of Matthew Lock, printed in Book II. of the 'Choice Ayres,' etc., 1679. In 1678 he composed the overture and instrumental music and the masque in Shadwell's alteration of Shakspere's 'Timon of Athens,' representing the contest between Cupid and Bacchus for supremacy over mankind, and their

[1] His mother, Elisabeth, survived to witness the whole of her son's career, and died in August 1699.

[2] Priest removed his school in 1680 to Chelsea, where 'Dido and Æneas' was again performed, as appears from an undated printed copy of the words published in London. This copy contains a prologue for music which Purcell does not appear to have set. The piece was revived at the R.A.M. Concert-room, London, July 10, 1878, by Mr. Malcolm Lawson.

ultimate agreement to exercise a joint influence; a very beautiful and characteristic composition. He does not appear to have produced anything for the theatre in 1679, but several of his songs were published in that year in Playford's second Book just named; and an extant letter, dated Feb. 8, 1678-9, from his uncle Thomas, to the Rev. John Gostling, the celebrated bass singer, then at Canterbury, shows that he then produced something for the church; the writer telling Gostling that his son, Henry (as he affectionately called his nephew), was then composing and that the composition was likely to cause Gostling to be called to London. Gostling was appointed a gentleman extraordinary of the Chapel Royal Feb. 25, 1679, and a gentleman in ordinary soon afterwards. It would be very interesting to know which of Purcell's anthems was then produced, but at present there seems no clue. In 1680, however, he composed music for Lee's tragedy 'Theodosius,' and the overture and act tunes for D'Urfey's comedy 'The Virtuous Wife,' and produced the first of his numerous odes, viz. 'An Ode or Welcome Song for his Royal Highness [the Duke of York] on his return from Scotland,' and 'A Song to welcome home His Majesty from Windsor.' In the same year he obtained the appointment of organist of Westminster Abbey, and then gave up his connection with the theatre, which he did not renew for six years. In this interval it may be assumed that much of his church music was composed. In 1681 he composed another Ode or Welcome Song for the King, 'Swifter, Isis, swifter flow.' On July 14, 1682, he was appointed organist of the Chapel Royal in the place of Edward Lowe, deceased, but was not sworn in until Sept. 16 following. He composed an Ode or Welcome Song to the King on his return from Newmarket, Oct. 21,—'The summer's absence unconcerned we bear,'—and some songs for the inauguration of the Lord Mayor, Sir William Pritchard, Oct. 29. In 1683 Purcell came forward in a new capacity, viz. as a composer of instrumental chamber music, by the publication of 'Sonnatas of III parts, two Viollins and Basse to the Organ or Harpsichord,' with an engraved portrait of himself, at the age of 24, prefixed. These sonatas are 12 in number, and each comprises an adagio, a canzone (fugue), a slow movement, and an air; they are avowedly formed upon Italian models, as the composer in his preface says, 'For its author he has faithfully endeavoured a just imitation of the most famed Italian masters, principally to bring the seriousness and gravity of that sort of musick into vogue and reputation among our countrymen, whose humour 'tis time now should begin to loath the levity and balladry of our neighbours. The attempt he confesses to be bold and daring; their being pens and artists of more eminent abilities, much better qualified for the imployment than his or himself, which he well hopes these his weak endeavours will in due time provoke and enflame to a more accurate undertaking. He is not ashamed to own his unskilfulness in the Italian language, but that is the unhappiness of his education, which cannot justly be counted his fault; however he thinks he may warrantably affirm that he is not mistaken in the power of the Italian notes, or elegancy of their compositions.' In the same year he composed an Ode or Welcome Song for the King, 'Fly, bold Rebellion,' and in July an Ode to Prince George of Denmark on his marriage with the Princess, afterwards Queen, Anne,—'From hardy climes.' He likewise composed an Ode by Christopher Fishburn, 'Welcome to all the pleasures,' which was performed Nov. 22 at the annual celebration on St. Cecilia's Day, the score of which he published in the following year. He also composed another Ode, 'Raise, raise the voice,' and a Latin Ode or motet, 'Laudate Ceciliam,' in honour of St. Cecilia, both of which still remain in MS. In 1684 he composed an Ode or Welcome Song, by Thomas Flatman, 'on the King's return to Whitehall after his Summer's progress'—'From these serene and rapturous joys'—the last production of the kind he was to address to Charles. In 1685 he greeted the new king, James, with an Ode or Welcome Song, 'Why are all the Muses mute?' For the coronation of James and his queen on April 23 he produced two anthems, 'I was glad,' and 'My heart is inditing,' both remarkably fine compositions. He was employed in superintending the erection of an organ in the Abbey expressly for the coronation, and was paid—out of what was then termed the 'secret service money,' but was really the fund for defraying extraordinary royal expenses,—£34 12*s.* 0*d.* 'for so much money by him disbursed and craved for providing and setting up an organ in the Abbey church of Westm^r. for the solemnity of the coronation, and for the removing the same, and other services performed in his said Ma'ties chappell since the 25th of March, 1685, according to a bill signed by the Bishop of London.' In 1686 he returned to dramatic composition, and produced the music for Dryden's revived tragedy 'Tyrannic Love,' in which is the fine duet of the spirits, Nakar and Damilcar (or, as Purcell has it, Doridcar), 'Hark! my Doridcar, hark!' and the pleasing air, 'Ah! how sweet it is to love.' He also produced an Ode or Welcome Song for the King, 'Ye tuneful Muses.' In 1687 he composed another Ode of the same kind, 'Sound the trumpet, beat the drum,' in which is the duet for altos, 'Let Cesar and Urania live,' which continued so long in favour that succeeding composers of odes for royal birthdays were accustomed to introduce it into their own productions until after the middle of the 18th century. Later in the year Purcell wrote his anthem 'Blessed are they that fear the Lord,' for the thanksgiving for the queen's pregnancy, in January 1687-8. In 1688 he composed the songs for D'Urfey's comedy, 'A Fool's Preferment.' With one exception they all belong to the character of Lionel, a young man mad for love, and they express in the most admirable manner the varied emotions which agitate his mind—disdain, despondency, tender affection and wild fantastic delusion.

They were sung by William Mountford, the unfortunate actor who was murdered in the street by the ruffians Lord Mohun and Capt. Hill in revenge for his having frustrated their attempted forcible abduction of the celebrated actress Mrs. Bracegirdle, and who, we learn from Colley Cibber, 'sung a clear countertenor, and had a melodious warbling throat.' The music was published in 4to in the same year, and appended to the printed copy of the comedy. To this year also belongs a solo anthem for a bass voice with chorus, 'The Lord is king' (one of the very few of Purcell's church compositions of which the date of production is known), and a Welcome Song for the King, the last he wrote for James II. In 1689 he composed an Ode, 'Celestial Music,' which was 'performed at Mr. Maidwell's, a schoolmaster's, on the 5th of August,' and 'A Welcome Song at the Prince of Denmark's coming home.' He also composed for the annual gathering in London of the natives of the county of York the famous Ode in praise of that county and the deeds of its sons, particularly the part taken by them at the Revolution, which is commonly known as 'The Yorkshire Feast Song,' and which D'Urfey (the author of the words) justly calls 'one of the finest compositions he ever made.' It was performed at an expense of £100 at the County Feast held in Merchant Taylors' Hall, March 27, 1690. Many parts of it were printed in the 'Orpheus Britannicus'; it was printed entire by Goodison about 1788, and by the Purcell Society 90 years later, under the editorial care of Mr. W. H. Cummings. In this year Purcell became involved in a dispute with the Dean and Chapter of Westminster. He had received money from persons for admission into the organ-loft to view the coronation of William and Mary, considering the organ-loft as his, in right of his office; but the Dean and Chapter claimed the money as theirs, and called upon him to pay it over; and, upon his declining, went the length of making an order, dated April 18, 1689, that unless he paid over the money his place should be declared null and void, and his stipend detained by the Treasurer. It is presumed that the matter was in some way accommodated, as he retained his appointment until his death. In 1690 Purcell composed new music for Shadwell's version of 'The Tempest,' in which the advantageous result of his study of the great Italian masters is strikingly apparent. Smooth and easy flowing, yet nervous melodies, clearness and distinctness of form, and more varied accompaniment, are conspicuous. Two of the songs, 'Come unto these yellow sands,' and 'Full fathom five,' have retained uninterrupted possession of the stage from the time they were composed till this day, and much of the remainder of the music, especially that of the concluding masque, has only been laid aside because it is allied to verses not by Shakspere, and which the better judgment of our time has decreed shall no longer be permitted to supplant his poetry. In the same year Purcell produced the music for the 'alterations and additions after the manner of an opera' which Betterton had made to Beaumont and Fletcher's play, 'The Prophetess, or, The History of Dioclesian.' Here again the great advance made by the composer is visible. He calls into play larger orchestral resources than before; some of the movements are scored for two trumpets, two oboes, a tenor oboe, and a bassoon, beside the string quartet, and the wood wind instruments are occasionally made responsive to the trumpets and strings in a manner that was then new. The vocal music comprises some fine songs and bold choruses. Among the songs may be named 'What shall I do to show how much I love her?' (the air of which was long known from its adaptation to the words 'Virgins are like the fair flower in its lustre,' in 'The Beggar's Opera') and 'Sound, Fame, thy brazen trumpet,' with its bold and difficult obbligato trumpet accompaniment. Purcell published the score of this opera by subscription in 1691, with a dedication to the Duke of Somerset, in which he says, 'Musick and Poetry have ever been acknowledged sisters, which, walking hand in hand, support each other; As Poetry is the harmony of words so Musick is that of notes; and as Poetry is a rise above Prose and Oratory, so is Musick the exaltation of Poetry. Both of them may excel apart, but surely they are most excellent when they are joyn'd, because nothing is then wanting to either of their proportions; for thus they appear like wit and beauty in the same person. Poetry and Painting have arriv'd to perfection in our own country; Musick is yet but in its nonage, a forward child, which gives hope of what it may be hereafter in England when the masters of it shall find more encouragement. 'Tis now learning Italian, which is its best master, and studying a little of the French air, to give it somewhat more of gayety and fashion. Thus being further from the sun we are of later growth than our neighbour countries, and must be content to shake off our barbarity by degrees. The present age seems already disposed to be refin'd, and to distinguish between wild fancy and a just, numerous composition.' Here we see Purcell's modest estimate of the state of English musical art in his day, but we may see also that although he viewed his countrymen as standing only upon the threshold of the temple of music, he felt the strong conviction that it would be within their power to enter and explore its innermost recesses. The composer's desire to please his subscribers occasioned him to fix the subscription at so moderate a rate that it scarcely sufficed to meet the expense of the publication. He also wrote in 1690 the fine bass song, 'Thy genius, lo! from his sweet bed of rest,' for Lee's tragedy 'The Massacre in Paris,' and the overture, act-tunes and songs for Dryden's comedy 'Amphitryon.' Besides these he set D'Urfey's Ode for the queen's birthday, April 29, 'Arise, my Muse,'—an admirable composition—and an Ode for King William, 'Sound the trumpet.'

The next year witnessed the production of Purcell's dramatic *chef-d'œuvre*, 'King Arthur.' He had previously composed music for some of

Dryden's plays, but had had merely to set such verses as the poet had handed him. It is however apparent from Dryden's dedication of 'King Arthur' that in constructing that drama he had followed a different course, and had consulted Purcell as to where, when, and how music could be effectively introduced, and had acted upon his suggestions. He had supplied the composer, at his desire, with variety of measure, and disposed the scenes so as to afford striking contrasts. Purcell's music is a succession of beauties;—the sacrificial scene of the Pagan Saxons; the martial song of the Britons, 'Come if you dare'; the scene with the spirits, Philidel and Grimbald; the songs and dances of the shepherds; the admirably bold and original frost scene; the lovely duet of the Syrens in the enchanted forest, 'Two daughters of this aged stream,' and the songs of the other spirits; and the varied and well contrasted pieces in the concluding masque (including the beautiful melody 'Fairest isle, all isles excelling'), form a combination which no contemporary musician was able to equal, and which for long afterwards remained unrivalled. All contemporary testimony tells of the great success of 'King Arthur,' yet, with the exception of about a dozen songs which were included in the 'Orpheus Britannicus,' and those portions of the music which Arne retained in the version made in 1770, it remained unpublished until 1843, when it was printed by the Musical Antiquarian Society, four songs, however, having been lost in the interval. Purcell's other dramatic compositions in 1691 were the overture and act tunes for Elkanah Settle's tragedy 'Distressed Innocence,' and songs in the comedy 'The Gordian knot untyed,' and Southerne's comedy 'Sir Antony Love.' He also composed the Ode for the queen's birthday, 'Welcome, glorious morn.' In 1692 he composed the music for Howard and Dryden's 'Indian Queen,' in which are the recitative 'Ye twice ten hundred deities' (which Burney considered to be 'perhaps the best piece of recitative in our language'), with the air 'By the croaking of the toad,' and the beautiful little rondo 'I attempt from Love's sickness to fly.' The greater part of the songs in 'The Indian Queen' were printed in 1695 by May and Hudgebutt, who prefixed to their publication a curious letter to the composer informing him that as they had met with the score of his work they had printed it, lest others should put out imperfect copies, and craving his pardon for their presumption. The entire work was printed by Goodison. He also composed songs for Dryden's 'Indian Emperor' (a sequel to 'The Indian Queen') and 'Cleomenes,' Southerne's comedy 'The Wives' Excuse,' and D'Urfey's comedy 'The Marriage Hater match'd,' and the music in the third act of Dryden and Lee's tragedy 'Œdipus.' But perhaps the most important dramatic composition he produced this year was the opera of 'The Fairy Queen,' an anonymous adaptation of Shakspere's 'Midsummer Night's Dream' which was very well received by the public, although the great expense incurred for scenery, dresses, etc., rendered it but little productive to the managers. The composer published in the same year 'Some Select Songs as they are sung in The Fairy Queen,' 10 in number; 10 other pieces are in the 'Orpheus Britannicus,' and the instrumental music is in the 'Ayres for the Theatre'; the Sacred Harmonic Society possesses a MS. of nearly the whole of the fourth act, but the remainder of the choral portions and two or three more songs are irretrievably lost. The score was lost in or before 1700, in October of which year the patentees of the theatre offered a reward of £20 for the recovery of it or a copy of it. That they did not recover it may be inferred from the piece never having been revived. One of the songs which has been preserved, 'If love's a sweet passion,' long remained in favour: Gay wrote one of the songs in 'The Beggar's Opera' to the air. In the same year Purcell set Sir Charles Sedley's Ode for the queen's birthday, 'Love's Goddess sure was blind.' One of the airs in this Ode, 'May her blest example chase,' has for its bass the air of the old song 'Cold and raw'; the occasion of which was thus:—Queen Mary had one day sent for Arabella Hunt and Gostling to sing to her, with Purcell as accompanyist. After they had performed several fine compositions by Purcell and others, the queen asked Arabella Hunt to sing the ballad of 'Cold and raw.' Purcell, nettled at finding a common ballad preferred to his music, but seeing it pleased the queen, determined that she should hear it again when she least expected it, and adopted this ingenious method of effecting his object. He also set Brady's Ode 'Hail! great Cecilia,' which was performed at the annual celebration on St. Cecilia's day, Purcell himself singing the alto song ''Tis Nature's voice.' This Ode—one of the finest of its composer's works of that class—was printed by the Musical Antiquarian Society. In 1693 Purcell composed an overture and act-tunes for Congreve's comedy 'The Old Bachelor,' and songs for D'Urfey's comedy 'The Richmond Heiress,' Southerne's comedy 'The Maid's Last Prayer,' and Bancroft's tragedy 'Henry the Second.' He also set Tate's Ode for the queen's birthday, 'Celebrate this festival' (printed by Goodison), and his Ode in commemoration of the centenary of the foundation of Trinity College, Dublin, 'Great Parent, hail!' (also printed by Goodison), said to have been performed at Christ Church, Dublin, Jan. 9, 1693-4. Strange to say, Trinity College register does not contain any record of or allusion to the centenary celebration. In 1694 Purcell composed portions of the music for Parts I. and II. of D'Urfey's 'Don Quixote' (Part I. containing the duet 'Sing, all ye Muses,' and the fine bass song 'Let the dreadful engines'), an overture, act-tunes and songs for Congreve's comedy, 'The Double Dealer,' and songs for Crowne's comedy 'The Married Beau,' Southerne's tragedy 'The Fatal Marriage,' and Dryden's play 'Love triumphant.' He also composed the Ode for the queen's birthday, 'Come, come ye Sons of Art'; and, for the Cecilian celebration, his celebrated

'Te Deum and Jubilate in D,' with orchestral accompaniments—the first of the kind produced in this country. Queen Mary dying on Dec. 28 in this year, Purcell, immediately afterwards, composed for her funeral the passage from the Burial Service, 'Thou knowest, Lord, the secrets of our hearts,' in a manner so solemn, pathetic, and devout, that Croft, when setting the Burial Service, abstained from resetting the passage, and adopted Purcell's setting. Purcell also composed for the funeral an anthem, 'Blessed is the man.' Early in 1695 he composed two Elegies upon the queen's death, which were published with one by Dr. Blow. He composed an Ode for the birthday of the young Duke of Gloucester, son of the Princess Anne, July 24, 'Who can from joy refrain?' and also the music for Powell's adaptation of Beaumont and Fletcher's tragedy 'Bonduca,'[1] including the famous war-song 'Britons, strike home'; and songs for Scott's comedy 'The Mock Marriage,' Gould's tragedy 'The Rival Sisters,' Southerne's tragedy 'Oroonoko,' Ravenscroft's comedy 'The Canterbury Guests,' Beaumont and Fletcher's play 'The Knight of Malta,' and Part III. of D'Urfey's 'Don Quixote.' In the latter is contained 'the last Song that Mr. Purcell sett, it being in his sickness.' This was none other than the fine cantata 'From rosy bowers,' one of the greatest compositions he ever produced, and a most striking proof that, however the composer's frame might be enfeebled by disease, his mental powers remained vigorous and unimpaired to the last.

Purcell died at his house in Dean's Yard, Westminster, Nov. 21, 1695. On the day of his death he made his will, whereby he bequeathed the whole of his property to his 'loveing wife, Frances Purcell,' absolutely, and appointed her sole executrix. It was said that he contracted the disorder of which he died through his wife having purposely caused him to be kept waiting outside his own door because he did not return home until a late hour. But this seems inconsistent with the fact of his having made her his sole legatee, and with her expressions respecting him in the dedication of the 'Orpheus Britannicus.' Sir John Hawkins's conjecture that he died of a lingering, rather than an acute disease, probably consumption, is much more likely to be correct, and more in accordance with the recorded fact of Purcell's ability to continue to compose during his mortal sickness. He was buried Nov. 26 in the north aisle of Westminster Abbey, under the organ. A tablet to his memory, attached to a pillar, and placed there by his pupil, Lady Howard, wife of Sir Robert Howard, bears this inscription, attributed, but upon insufficient grounds, to Dryden—'Here lyes Henry Purcell, Esq.; who left this life, and is gone to that blessed place where only his harmony can be exceeded. Obiit 21mo die Novembris, Anno Ætatis suæ 37mo, Anno q: Domini, 1695.'[2] On a flat stone over his grave was inscribed the following epitaph:—

Plaudite, felices superi, tanto hospite, nostris
Præfuerat, vestris addite ille choris:
Invida nec vobis Purcellum terra reposcat,
Questa decus sêcli, deliciasque breves.
Tam cito decessisse, modo cui singula debet
Musa, prophana suos religiosa suos.
Vivit Io et vivat, dum vicina organa spirant,
Dumque colet numeris turba canora Deûm.[3]

This having long become totally effaced was, a few years ago, renewed in a more durable manner by a subscription originated by Mr. James Turle, the present organist of the Abbey. Purcell had six children, three of whom predeceased him, viz. John Baptist, baptized Aug. 9, 1682, buried Oct. 17, following; Thomas, buried Aug. 3, 1686; and Henry, baptized June 9, 1687, buried Sept. 23, following. His other children are mentioned hereafter. His widow survived him until Feb. 1706. She died at Richmond, Surrey, and was buried on Feb. 14, in the north aisle of Westminster Abbey, near her husband.

The compositions of Purcell not before mentioned, and irrespective of his sacred music, were 'Ten Sonatas in four parts,' published by his widow in 1697, the ninth of which, called, for its excellence, the Golden Sonata, is given in score in Hawkins's History (Novello's edit. 755); Lessons for the Harpsichord or Spinnet, published in 1696; numerous catches included in 'The Catch Club, or Merry Companions,' and other collections; and many single songs which are to be found in all the collections of songs of the period. In 1697 his widow published, under the title of 'A Collection of Ayres composed for the Theatre and upon other occasions,' the instrumental music in the plays of 'Abdelazor,' 'The Virtuous Wife,' 'The Indian Queen,' 'Dioclesian,' 'King Arthur,' 'Amphitryon,' 'The Gordian Knot unty'd,' 'Distressed Innocence,' 'The Fairy Queen,' 'The Old Bachelor,' 'The Married Beau,' 'The Double Dealer,' and 'Bonduca.' In 1698 she published, under the title of 'Orpheus Britannicus,' a collection of Purcell's songs for one, two, and three voices, chiefly selected from his odes and dramatic pieces, but including also several single songs, amongst them the famous 'Bess of Bedlam.' A second book was published in 1702. A second edition of the first book, with large additions and some omissions, appeared in 1706, and a second edition of the second book, with six additional songs, in 1711. A third edition of both books, now very rare, was issued in 1721. There is another composition, which is now pretty generally admitted to be the work of Purcell, viz. the music for the first act of Charles Davenant's tragedy 'Circe.' MS. scores are in the Fitzwilliam Museum at Cambridge, the Sacred Har-

1 This was printed by the Musical Antiquarian Society.

2 Other eminent composers have died about the same age as Purcell, *e. g.* Pergolesi, Mozart, Schubert, Mendelssohn, and Weber.

3 Which has been thus rendered in English:—

'Applaud so great a guest, celestial pow'rs,
Who now resides with you, but once was ours;
Yet let invidious earth no more reclaim
Her short-liv'd fav'rite and her chiefest fame;
Complaining that so prematurely died
Good-nature's pleasure and devotion's pride.
Died? no, he lives while yonder organs sound,
And sacred echoes to the choir rebound.'

monic Society's Library, and elsewhere. It was probably composed for some projected revival of the play, but, for reasons which cannot now be discovered, the completion of the work by the composition of music for the remainder of the piece was not effected. Purcell also made some valuable additions to the tract upon composition in the later editions of Playford's 'Introduction to the Skill of Musick.'

Purcell's sacred music consists of his church services and anthems, hymns, songs, duets, etc., and Latin psalms. His church music may be divided into two classes, viz. services and anthems, with orchestral accompaniments, and those with organ accompaniment only. The former, with two or three exceptions already mentioned, were composed for the Chapel Royal, the latter for Westminster Abbey. Many of the songs, duets, etc., and a few anthems were printed in the several editions of 'Harmonia Sacra,' 1688, 1693, 1714, etc., and several of the services and anthems in the collections of Boyce, Arnold, and Page. The noble collection edited by Vincent Novello (1829-1832), under the title of 'Purcell's Sacred Music,' includes the Te Deum and Jubilate for St. Cecilia's day, 3 services, 5 chants by different members of the Purcell family, a psalm-tune known as 'Burford,' 20 anthems with orchestral accompaniments, 32 anthems with organ accompaniment, 19 songs, some with choruses, 2 duets, a trio, 11 hymns for three and four voices, 2 Latin psalms, and 5 canons. MS. copies of 3 other anthems, a hymn, and 2 Latin motets, which Novello was unable to meet with, are now known to be in existence.

It will have been observed that Purcell essayed every species of composition. He wrote for the church, the theatre, and the chamber. His church music exhibits his great mastery of fugue, canon, imitation, and other scholastic devices, combined with fine harmony and expressive melody, and the introduction of novel and beautiful forms, enriching it whilst preserving its broad and solemn style. His secular music displays his imaginative faculty, his singular dramatic instinct and skill in marking character, his rare gift of invention, and great powers of expression. Although viewed by the light of our own day, his instrumental chamber compositions appear of an inferior order, they will yet, when compared with those of his predecessors and contemporaries, be found greatly in advance of his time. We see in him the improver of our cathedral music; the originator of English melody, as the term is now understood; the establisher of a form of English opera which was almost universally adopted for upwards of a century and a half; the introducer of a new and more effective employment of the orchestra in accompaniment; the man who excelled all others in his accurate, vigorous, and energetic setting of English words; and the most original and extraordinary musical genius that our country has produced. It is scarcely possible to estimate the loss to English art by the early death of Henry Purcell. Had his life been prolonged for him to have witnessed the introduction into England of the Italian opera and the early career in this country of Handel, what might not have been expected from him?

Several portraits of Purcell are extant; one, taken when a chapel boy, was formerly in Dulwich College; another, by Sir Godfrey Kneller (engraved for Novello's 'Purcell's Sacred Music'), was in the possession of the descendants of Joah Bates; a third was engraved as a frontispiece to the Sonatas, 1683. John Closterman painted two—one, now in the possession of the Royal Society of Musicians, and engraved in mezzotint by Zobel; the other engraved by White for the 'Orpheus Britannicus,' which we have here reproduced. Another, formerly in Dulwich College, and engraved by W. N. Gardiner, has now disappeared.

4. EDWARD, youngest, but only surviving, son of the great Henry Purcell, was baptized in Westminster Abbey, Sept. 6, 1689. He was therefore (like his father) only six years old when his father died. When sixteen years old he lost his mother, who by her nuncupative will stated that, 'according to her husband's desire, she had given her deare son good education, and she alsoe did give him all the Bookes of Musick in generall, the Organ, the double spinett, the single spinett, a silver tankard, a silver watch, two pairs of gold buttons, a hair ring, a mourning ring of Dr. Busby's, a Larum clock, Mr. Edward Purcell's picture, handsome furniture for a room, and he was to be maintained until provided for.' Embracing the profession of music, he became organist of St. Clement, Eastcheap. On July 8, 1726, he was appointed organist of St. Margaret's, Westminster. He died about the end of July or beginning of August, 1740. He left a son, HENRY, who was a chorister of the Chapel Royal, under Bernard Gates. On the death of his father he succeeded him as organist of

St. Clement, Eastcheap. He afterwards became organist of St. Edmund the King, Lombard Street, and of St. John, Hackney. He died about 1750. Hawkins says Edward Purcell was a good organist, but his son a very indifferent one.

5. FRANCES, eldest daughter of Henry Purcell, the composer, was baptized in Westminster Abbey May 30, 1688. In 1706 her mother appointed her her residuary legatee and her executrix, when she should reach the age of 18. She proved the will July 6, 1706. She married, shortly after her mother's death, Leonard Welsted, Gent., poet and dramatist, and died 1724. Her only daughter, FRANCES, born 1708, died unmarried 1726. Her younger sister, MARY PETERS, was baptized in Westminster Abbey, Dec. 10, 1693.[1] It is presumed that she survived her father, but predeceased her mother, as she is not named in the latter's will.

6. DANIEL, the youngest son of Henry Purcell the elder, born probably about 1660, was also a musician, but from whom he received instruction is unknown. In 1688 he was appointed organist of Magdalen College, Oxford. In 1693 he composed the music for Thomas Yalden's Ode on St. Cecilia's Day, which was probably performed at Oxford. In 1695 he resigned his appointment at Magdalen College, and came to London. In 1696 he composed songs for Mary Pix's tragedy 'Ibrahim XII.' and Cibber's comedy 'Love's Last Shift,' and the masque in the fifth act of 'The Indian Queen.' In 1697 he composed the music for Powell and Verbruggen's opera 'Brutus of Alba,' Settle's opera 'The New World in the Moon,' and the instrumental music for D'Urfey's opera 'Cynthia and Endymion.' In 1698 he composed the songs in Gildon's tragedy 'Phaeton, or, The Fatal Divorce,' an Ode for the Princess Anne's birthday, and Bishop's Ode on St. Cecilia's Day. In 1699 he joined with Jeremiah Clark and Richard Leveridge in furnishing the music for Motteux's opera 'The Island Princess,' and also set Addison's second Ode on St. Cecilia's Day for Oxford. In 1700 he set Oldmixon's opera 'The Grove,' and gained the third of the four prizes given for the composition of Congreve's masque 'The Judgment of Paris,' the others being awarded to John Weldon, John Eccles, and Godfrey Finger. In 1701 he wrote the instrumental music for Catherine Trotter's tragedy 'The Unhappy Penitent,' and in 1702 that for Farquhar's comedy 'The Inconstant.' In 1707 he composed an Ode for St. Cecilia's Day, which was performed at St. Mary Hall, Oxford. In 1713 he was appointed organist of St. Andrew, Holborn, but was displaced in Feb. 1717. He published 'The Psalmes set full for the Organ or Harpsicord, as they are plaid in Churches and Chappels in the maner given out, as also with their Interludes of great Variety'; a very singular illustration of the manner in which metrical psalms were then performed. Six anthems by him are in the choir books of Magdalen College, and songs in 'The Banquet of Musick,' 1689; 'Thesaurus Musicus' and 'Deliciæ Musicæ,' 1696; and 'Thesaurus Musicus,' circa 1750. He composed 'A Lamentation for the Death of Mr. Henry Purcell,' written by Tate, the words of which are prefixed to the 'Orpheus Britannicus.' He was also author of some sonatas for flute and bass and violin and bass. He died in 1718. He was held in great repute in his day as a punster.

7. KATHERINE, daughter of Henry Purcell the elder, was baptized in Westminster Abbey, March 13, 1662. She married in June 1691 the Rev. William Sale, of Sheldwich, Kent, and was her mother's administratrix, Sept. 7, 1699.

8. THOMAS, brother to Henry Purcell the elder, was appointed Gentleman of the Chapel Royal in 1660. In 1661 he was lay vicar of Westminster Abbey and copyist. On Aug. 8, 1662, he was appointed, jointly with Pelham Humfrey, Composer in Ordinary for the Violins to His Majesty, and on Nov. 29 following, 'Musician in Ordinary for the Lute and Voice in the room of Henry Lawes, deceased.' In 1672 he was, with Humfrey, made Master of the King's Band of Music. He died July 31, and was buried in the cloisters of Westminster Abbey, Aug. 2, 1682. He had probably been long before in ill-health, as on May 15, 1681, he granted a power of attorney to his son Matthew to receive his salary as Gentleman of the Chapel Royal. He was the composer of the well-known Burial Chant and other chants.[2] [W.H.H.]

PURCELL CLUB, THE, was constituted at a meeting held in August 1836: the first members were Messrs. Turle (conductor), King, Bellamy, Fitzwilliam, J. W. Hobbs, and E. Hawkins (secretary). The club was limited to twenty professional and twenty non-professional members, who met twice a year; on the second Thursday in February, when they dined together, and on the last Thursday in July, when they assembled in Westminster Abbey, at the morning service, by permission of the Dean, for the purpose of assisting in such Purcell music as might be selected for the occasion. On the evening of the same day the members again met to perform secular music composed by Purcell; the soprano parts were sung by the chorister-boys from Westminster Abbey, the Chapel Royal, and St. Paul's Cathedral, but ladies were admitted amongst the audience.

On Feb. 27, 1842, a special meeting was held, when Professor Taylor was elected President, and the dates of meeting were changed to Jan. 30 and the first Thursday in July. Interesting performances of many of Purcell's works were given year by year, and a book of words of 194 pages was privately printed for the use of the members, under the editorship of Professor Taylor. The Club was dissolved in 1863, and the valuable library, which had been acquired

1 One 'B. Peters' was one of the witnesses to Purcell's will; probably he was godfather to this girl.

2 I am indebted to Colonel Chester's Westminster Abbey Registers for much of the family history contained in the above article, and I gladly avail myself of this opportunity of acknowledging my obligations to that gentleman for the very kind and ready manner in which he has furnished me with much valuable information on many other occasions.

by gift and purchase, was deposited at Westminster Abbey, under the guardianship of the organists of Westminster Abbey and St. Paul's Cathedral. [W.H.C.]

PURCELL COMMEMORATION, THE, was held on Jan. 30, 1858, to celebrate the bicentenary of Purcell's birth: the members of the Purcell Club and a large number of professors of music and of eminent amateurs, anxious to do honour to the greatest of English musicians assembled in the evening at the Albion Tavern, Aldersgate Street, London, when, after a banquet, a selection of Purcell music was performed, and some interesting addresses were given by Professor Taylor, who presided. The programme consisted entirely of music composed by Purcell, and was as follows:—Grace, 'Gloria Patri'; anthems 'O give thanks,' 'O God, thou hast cast us out,' 'O sing unto the Lord'; song and chorus, 'Celebrate this festival'; a selection from 'King Arthur'; cantata, 'Cupid the slyest rogue alive'; song, 'Let the dreadful engines'; chorus, 'Soul of the world, inspired by thee.' [W.H.C.]

PURCELL SOCIETY, THE. Founded Feb. 21, 1876, 'for the purpose'—in the words of the prospectus—'of doing justice to the memory of Henry Purcell, firstly by the publication of his works, most of which exist only in MS., and secondly, by meeting for the study and performance of his various compositions.' The 'Permanent Committee' consists of the Rev. Sir F. A. G. Ouseley, Bart.; G. A. Macfarren; Sir Herbert S. Oakeley; Sir John Goss; Sir George Elvey; Joseph Barnby; Joseph Bennett; J. F. Bridge; W. Chappell; W. H. Cummings; J. W. Davison; E. J. Hopkins; John Hullah; Henry Leslie; A. H. Littleton, *Hon. Secretary*; Walter Macfarren; Julian Marshall; E. Prout; E. F. Rimbault; Henry Smart; John Stainer; Rev. J. Troutbeck; James Turle.—The prospectus, issued May 16, 1876, contains a list of Odes and Welcome Songs (28), and of Operas and Dramas (45), by Purcell; and an announcement that the first works published would be the Yorkshire Feast Song, and the masque in 'Timon of Athens,' both in full score. The Yorkshire Feast Song was issued on Oct. 14, 1878, edited, with a preface, by Mr. Cummings, and beautifully engraved and printed. 'Timon of Athens,' edited by the Rev. Sir F. A. G. Ouseley, with a preface by Mr. Julian Marshall, is now due. The subscription to the Society is 21*s.* a year for the publications, and 10*s.* 6*d.* extra for the music meetings. [G.]

PURFLING (Fr. *pourfiler*). The ornamental border with which the backs and bellies of stringed instruments are usually finished. It is the only remnant of the elaborate decoration with which stringed instruments were anciently covered. It usually consists of a slip of maple or sycamore glued between two slips of ebony. Some makers used whalebone, as more pliable. A groove is carefully cut all round the edges for its insertion, and the purfling is then let in. Next to cutting the scroll this is the most difficult operation in fiddle-making, as the purfling invariably breaks to pieces in the hands of the unskilled workman. The secret consists in getting it well bent to the required shape before letting it into the groove. In the works of the best makers the purfling is bold, even, solid, perfectly finished, and accurately joined in the angles. The prince of purflers was Stradivarius. Many old instruments have a painted border instead of structural purfling, and modern fiddles of the commonest class have often only a double line in ink or paint round the edges. Only a single strip of purfling is usually employed; but double purfling, which in general injures the tone without improving the looks of an instrument, is often found; and instruments may be seen with a second row of purfling by a different hand. The purfling is not merely ornamental, as the groove protects the body of the violin by checking fractures proceeding from the edge. In ornamental instruments the purfling is sometimes inlaid with mother of pearl. [E.J.P.]

PURITANI DI SCOZIA, I. Opera in 2 acts; words by Count Pepoli, music by Bellini. Written for Grisi, Rubini, Tamburini, and Lablache, and produced at the Théâtre Italien, Paris, Jan. 25, 1835. In London, at the King's Theatre, as 'I Puritani ed I Cavalieri,' May 21, 1835. [G.]

PURITAN'S DAUGHTER, THE. 'A grand romantic drama' in 3 acts; words by J. V. Bridgeman, music by Balfe. Produced at the English Opera House, Covent Garden, London, Nov. 30, 1861 (Pyne and Harrison). [G.]

PUTZLI. 'Prince Fitzli Putzli' was Beethoven's nickname for his friend Prince Lobkowitz. See Thayer's Beethoven, iii. 239. [G.]

PYE, Kellow John, well known in London musical circles; the son of a merchant; was born at Exeter, Feb. 9, 1812. His musical tendencies showed themselves early. He entered the Royal Academy of Music, London, in Feb. 1823, immediately after its foundation, and took the first pianoforte lesson ever given within its walls. This was under Cipriani Potter. He also studied harmony, counterpoint, and composition there, under Dr. Crotch, the Principal, and remained a pupil till 1829. He then returned to Exeter, and for some years enjoyed considerable local fame in the south-west of England. In 1834 he gained the Gresham medal for his full anthem 'Turn Thee again, O Lord' (Novello), which with other anthems of his are in use in the Cathedrals. In 1842 he took the degree of Mus. Bac. at Oxford. Soon after this he came to London, and though forsaking the profession of music for business, retained his connexion with the art by joining the direction of the R.A.M. where he succeeded Sir G. Clerk as chairman of the committee of management (1864-67). He is also a member of the Executive and Finance Committees of the Royal and National College of Music (President H.R.H. the Prince of Wales). His published works, besides those mentioned, comprise 'Stray Leaves,' 12 nos. (Lamborn Cock & Co.), 4 Full Anthems (Novello), 3 Short Full Anthems (Do.), Songs, etc. [G.]

PYNE, Louisa Fanny, daughter of George Pyne (alto singer, born 1790, died March 15, 1877), and niece of James Kendrick Pyne (tenor singer, died Sept. 23, 1857), was born in 1832. At a very early age she studied singing under Sir George Smart, and about 1842 appeared in public with her elder sister, Susan (afterwards Mrs. Galton), with great success. In 1847 the sisters performed in Paris. In Aug. 1849 Louisa made her first appearance on the stage at Boulogne as Amina in 'La Sonnambula.' On Oct. 1 following she commenced an engagement at the Princess's Theatre as Zerlina, in an English version of 'Don Juan.' Her first original part was Fanny in Macfarren's 'Charles the Second,' produced Oct. 27, 1849. On March 1850 she sang at the Philharmonic; was engaged the same year at Liverpool, and in 1851 at the Haymarket. On Aug. 14, 1851, she performed the Queen of Night in 'Il Flauto Magico' at the Royal Italian Opera. She also sang in oratorios and at concerts. In Aug. 1854 she embarked for America in company with her sister Susan, W. Harrison, and Borrani. She performed in the principal cities of the United States for three years, being received everywhere with the greatest favour. On her return to England she, in partnership with Harrison, formed a company for the performance of English operas, which they gave first at the Lyceum and afterwards at Drury Lane and Covent Garden Theatres, until 1862, when the partnership was dissolved. [See Harrison, William, vol. i. p. 692*b*]. Miss Pyne subsequently appeared at Her Majesty's Theatre. In 1868 she was married to Mr. Frank Bodda, the baritone singer. She has now retired from public life, and devotes herself to teaching. Her voice was a soprano of beautiful quality and great compass and flexibility; she sang with great taste and judgment, and excelled in the florid style, of which she was a perfect mistress. [W.H.H.]

PAPPENHEIM, Eugénie, a soprano singer who excited some attention in London for a couple of years. She is an Austrian by birth, and was first heard of at Mannheim, and then at Hamburg, where she was one of the opera troupe in 1872–75, and in 74 gave some 'Gastspiele' at Kroll's Theatre, Berlin, with great success, especially as Leonora (Fidelio). She next went to America as a member of a German company under Wachtel, and remained there till 1878, when on June 15 she made a successful début in London, at Her Majesty's Theatre, as Valentine in 'The Huguenots.' She followed this with a performance of Leonora in 'Fidelio,' and also appeared in the following seasons as Donna Anna, the Countess (Figaro), Leonora (Trovatore), Aïda, Reiza, Agatha, and Elsa (Lohengrin). Though not endowed with a voice of remarkable quality or compass, Madame Pappenheim is thoroughly good and careful both as a singer and an actress. Her parts are always studied with care and conscientiousness, and she is capable of considerable dramatic intensity. She is now a member of the German Theatre at Pesth. [A.C.]

PISCHEK, Johann Baptist, a fine baritone singer, born Oct. 14, 1814, at Melnick in Bohemia, made his début on the boards at the age of 21. In 1844 he was appointed Court-singer to the King of Wurtemberg at Stuttgart, an appointment which he retained until his retirement July 1, 1863. He entered on his duties May 1, 1844. At a later date he was also made 'Kammersänger.' Pischek travelled a great deal, and was known and liked in all the principal towns of North and South Germany, especially at Frankfort, where we find him singing, both on the stage in a variety of parts, and in concerts, year after year from 1840 to 1848. In England he was a very great favourite for several years. He made his first appearance here on May 1, 1845, at a concert of Madame Caradori Allan's; sang at the Philharmonic on the following Monday and thrice besides during the season there. He reappeared in this country in 1846, 47, and 49, and maintained his popularity in the concert-room, and in oratorio, singing in 49 the part of Elijah at the Birmingham festival with great energy, passion, and effect. On the stage of the German opera at Drury Lane during the same year his Don Juan was not so successful, his acting being thought exaggerated. He was heard again in 1853 at the New Philharmonic Concerts. He died at Stuttgart, Feb. 16, 1873.

In voice, enunciation, feeling, and style, Pischek was first-rate. His repertoire was large, embracing operas and pieces of Gluck, Mozart, Méhul, Beethoven, Spohr, Weber, Donizetti, Hérold, Lachner, Kreutzer, Lindpaintner. In his latter days one of his most favourite parts was Hassan in Benedict's 'Der Alte vom Berge' (Crusaders); others were Hans Heiling, Ashton (Lucia), and the Jäger, in the 'Nachtlager von Granada.' He also sang Mendelssohn's Elijah, as already mentioned. As an actor he was prone to exaggeration. But it was in his ballads, especially in Lindpaintner's 'Standard-bearer,' that he carried away his audience. His taste, as in Beethoven's 'Adelaide,' was by no means uniformly pure, but the charm of his voice and style always brought down the house. His voice was a fine rich bass, with a very pure falsetto of 3 or 4 notes, which he managed exquisitely. He does not seem to have attempted any of the songs of Schubert, Schumann, or Mendelssohn, which are now so well known. [A.C.]

POHLENZ, Christian August, born July 3, 1790, at Saalgast in Lower Lusatia. In 1829 we find him well established in Leipzig as a singing-master, a conductor of concerts, organist, director of the Singakademie and the Musikverein, etc. At the end of 1834 he resigned the post of Conductor of the Gewandhaus subscription

concerts, which he appears to have held for nine years, and in which he was succeeded by Mendelssohn in the following October. After the death of Weinlig, on March 6, 1842, and before the appointment of Hauptmann later in the same year, Pohlenz filled the office of Cantor at the St. Thomas's School. Indeed, in the then state of music at Leipzig, he seems to have been a person of consideration, which is confirmed by the fact of Mendelssohn's having chosen him as teacher of singing in the new Conservatorium there, in the prospectus of which his name appears, in the Allg. Musikalische Zeitung of Jan. 18, 1843. He was not however destined to take part in that good work, for he died of apoplexy at Leipzig on March 9, 1843, just three weeks before the operations were begun. He published Polonaises for the PF., but his best works are part-songs for equal voices, of which one or two good specimens are given in ORPHEUS. [See vol. ii. p. 613.] [G.]

Q.

QUADRILLE (German *Contretanz*), a dance executed by an equal number of couples drawn up in a square. The name (which is derived from the Italian *squadra*) was originally not solely applied to dances, but was used to denote a small company or squadron of horsemen, from 3 to 15 in number, magnificently mounted and caparisoned to take part in a tournament or carrousel. The name was next given to 4, 6, 8, or 12 dancers, dressed alike, who danced in one or more companies in the elaborate French ballets[1] of the 18th century. The introduction of 'contredanses' into the ballet, which first took place in the 5th act of Rousseau's 'Fêtes de Polymnie' (1745), and the consequent popularity of these dances, are the origin of the dance which, at first known as the 'Quadrille de Contredanses' was soon abbreviated into 'quadrille.' The quadrille was settled in its present shape at the beginning of the 19th century, and it has undergone but little change, save in the simplification of its steps. It was very popular in Paris during the Consulate and the first Empire, and after the fall of Napoleon was brought to England by Lady Jersey, who in 1815 danced it for the first time at Almack's[2] with Lady Harriet Butler, Lady Susan Ryde, Miss Montgomery, Count St. Aldegonde, Mr. Montgomery, Mr. Montague, and Mr. Standish. The English took it up with the same eagerness which they displayed with regard to the polka in 1845, and the caricatures of the period abound with amusing illustrations of the quadrille mania. It became popular in Berlin in 1821.

The quadrille consists of five distinct parts, which bear the name of the 'contredanses' to which they owe their origin. No. 1 is 'Le Pantalon,' the name of which is derived from a song which began as follows:

Le pantalon
De Madelon
N'a pas de fond,

and was adapted to the dance. The music consists of 32 bars in 6-8 time. No. 2 is 'L'Été,' the name of a very difficult and graceful 'contredanse' popular in the year 1800; it consists of 32 bars in 2-4 time. No. 3 is 'La Poule' (32 bars in 6-8 time) which dates from the year 1802. For No. 4 (32 bars in 2-4 time) two figures are danced, 'La Trénise,' named after the celebrated dancer Trenitz, and 'La Pastourelle,' perhaps a survival of the old 'Pastorale.' No. 5—'Finale'—consists of three parts, repeated four times. In all these figures (except the Finale, which sometimes ends with a coda) the dance begins at the 9th bar of the music, the first 8 bars being repeated at the end by way of conclusion. The music of quadrilles is scarcely ever original; operatic and popular tunes are strung together, and even the works of the great composers are sometimes made use of.[3] The quadrilles of Musard are almost the only exception; they may lay claim to some recognition as graceful original musical compositions. [W.B.S.]

QUANTITY. The duration of syllables, and therefore the varieties of metrical feet. This is fully explained under the head of METRE. [G.]

QUANTZ, JOHANN JOACHIM, celebrated flute-player and composer, born, according to his autobiography in Marpurg's 'Beiträge zur Aufnahme der Musik,' Jan. 30, 1697, at Oberscheden, a village between Göttingen and Münden. His father, a blacksmith, urged him on his death-bed (1707) to follow the same calling, but, in his own words, 'Providence, who disposes all for the best, soon pointed out a different path for my future.' From the age of 8 he had been in the habit of playing the double-bass with his elder brother at village fêtes, and judging from this that he had a talent for music, his uncle Justus Quantz, Stadtmusikus of Merseburg, offered to bring him up as a musician. He went to Merseburg in August 1708,[4] but his uncle did not long survive his father, and Quantz passed under the care of the new Stadtmusikus, Fleischhack, who had married his predecessor's daughter. For the next $5\frac{1}{2}$ years he studied various instruments,

[1] The Ballets were divided into 5 acts, each act into 3, 6, 9, or 12 'entrées,' and each 'entrée' was performed by one or more 'quadrilles' of dancers.

[2] See Captain Gronow's Reminiscences (1861).

[3] Some of our readers may recollect the clever 'Bologna Quadrilles' on themes from Rossini's 'Stabat Mater,' which were published shortly after the appearance of that work. The plates of these quadrilles were destroyed on the publishers learning the source from which the author had obtained the melodies.

[4] Not 1707, as Mendel states.

Kiesewetter being his master for the pianoforte. In Dec. 1713 he was released from his apprenticeship, and soon after became assistant, first to Knoll, Stadtmusikus of Radeberg, and then to Schalle of Pirna near Dresden. Here he studied Vivaldi's violin-concertos, and made the acquaintance of Heine, a musician in Dresden, with whom he went to live in March 1716. He now had opportunities of hearing great artists, such as Pisendel, Veracini, Sylvius Weiss, Richter and Buffardin, the flute-player. In 1717 he went, during his three months' leave, to Vienna, and studied counterpoint in the octave with Zerlenka, a pupil of Fux. In 1718 he entered the chapel of the King of Poland, which consisted of 12 players, and was stationed alternately in Warsaw and Dresden. His salary was 150 thalers, with free quarters in Warsaw, but finding no opportunity of distinguishing himself either on the oboe, the instrument for which he was engaged, or the violin, he took up the flute, studying it with Buffardin. In 1723 he went with Weiss to Prague, and the two played in Fux's opera 'Costanza e Fortezza' performed in honour of the coronation of Charles VI. Here also he heard Tartini. In 1724 Quantz accompanied Count Lagnasco to Italy, arriving in Rome on July 11, and going at once for lessons in counterpoint to Gasparini, whom he describes as a 'goodnatured and honourable man.' In 1725 he went on to Naples, and there made the acquaintance of Scarlatti, Hasse, Mancini, Leo, Feo, and other musicians of a similar stamp. In May 1726 we find him in Reggio and Parma, whence he travelled by Milan, Turin, Geneva, and Lyons to Paris, arriving on Aug. 15. In Paris—where his name was remembered[1] as 'Quouance'—he remained seven months, and occupied himself with contriving improvements in the flute, the most important being the addition of a second key, as described by himself in his 'Versuch einer Anweisung die Flöte zu spielen,' vol. iii. chap. 58 (Berlin, 1752). He was at length recalled to Dresden, but first visited London for three months. He arrived there on March 20, 1727, when Handel was at the very summit of his operatic career, with Faustina, Cuzzoni, Castrucci, Senesino, Attilio, and Tosi in his train. He returned to Dresden on July 23, 1727, and in the following March re-entered the chapel, and again devoted himself to the flute. During a visit to Berlin in 1728 the Crown Prince, afterwards Frederic the Great, was so charmed with his playing, that he determined to learn the flute, and in future Quantz went twice a year to give him instruction. In 1741 his pupil, having succeeded to the throne, made him liberal offers if he would settle in Berlin, which he did, remaining till his death on July 12, 1773. He was Kammermusicus and court-composer, with a salary of 2000 thalers, an additional payment for each composition, and 100 ducats for each flute which he supplied. His chief duties were to conduct the private concerts at the Palace, in which the king played the flute, and to compose pieces for his royal pupil. He left in MS. 300 concertos for one and two flutes—of which 277 are preserved in the Neue Palais at Potsdam—and 200 other pieces; flute solos, and dozens of trios and quatuors, of which 37 are to be found at Dresden. His printed works are three—'Sei Sonate' dedicated to Augustus III. of Poland, Dresden, 1734; 'Sei duetti,' Berlin, 1759; a method for the flute—'Versuch einer Anweisung die Flöte traversière zu spielen' dedicated to Frederick 'Könige *in* Preussen,' Berlin, 1752, 4to, with 24 copper-plates. This passed through three (or four) German editions, and was also published in French and Dutch. He left also a serenata, a few songs, music to 22 of Gellert's hymns, 'Neue Kirchenmelodien,' etc. (Berlin, 1760), and an autobiography (in Marpurg's Beiträgen). Three of the Melodien are given by von Winterfeld, 'Evang. Kircheng.' iii. 272. Besides the key which he added to the flute, he invented the sliding top for tuning the instrument. His playing, which was unusually correct for the imperfect instruments of the day, delighted not only Frederic, but Marpurg, a more fastidious critic. He married, not happily, in 1737; and died in easy circumstances and generally respected at Potsdam, July 12, 1773.

All details regarding him may be found in 'Leben und Werken,' etc., by his grandson Albert Quantz (Berlin, 1877). [F.G.]

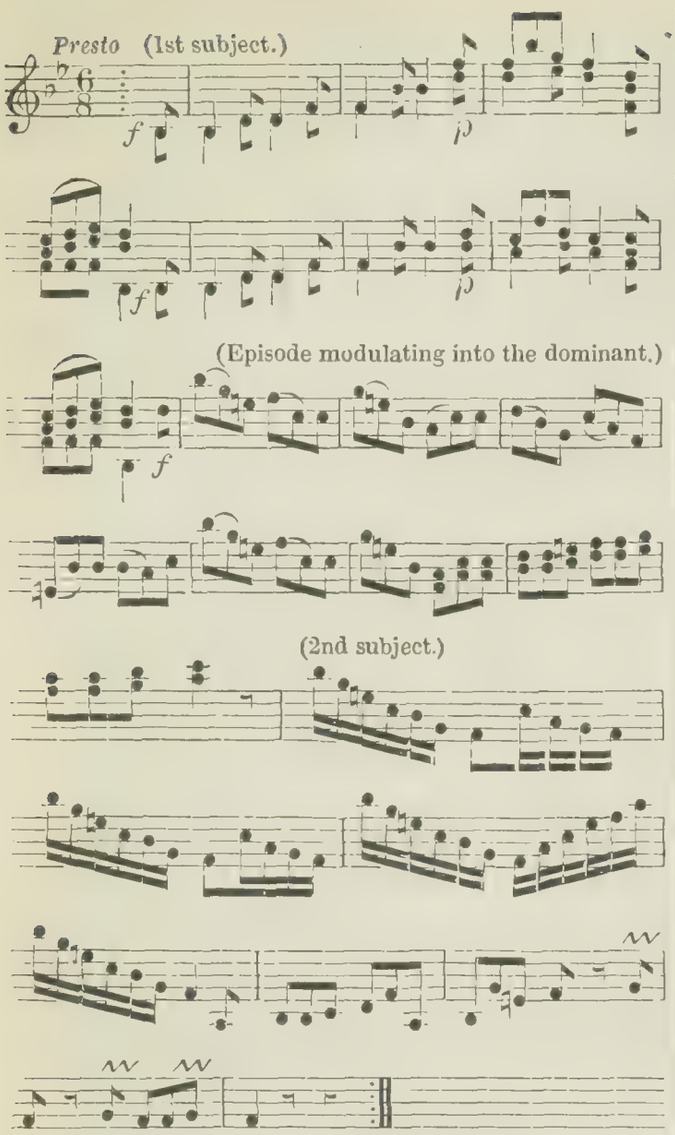
[1] In Boivin's Catalogue.

QUARLES, Charles, Mus. Bac., graduated at Cambridge in 1698. He was organist of Trinity College, Cambridge. He was appointed organist of York Minster, June 30, 1722; and died early in 1727. 'A Lesson' for the harpsichord by him was printed by Goodison about 1788. [W.H.H.]

QUARTERLY MUSICAL MAGAZINE AND REVIEW, conducted by R. M. Bacon of Norwich. [See vol. i. 288*a*; vol. ii. 427*a*.] [G.]

QUARTET (Fr. *Quatuor*; Ital. *Quartetto*). A composition for four solo instruments or voices.

I. With regard to instrumental quartets the favourite combination has naturally been always that of 2 violins, viola, and cello, the chief representatives since the days of Monteverde of soprano, alto, tenor, and bass, in the orchestra: in fact, when 'quartet' only is spoken of, the 'string quartet' is generally understood; any other combination being more fully particularised; and it is to the string quartet we will turn our principal attention. The origin of the quartet was the invention of four-part harmony, but it was long before a composition for four instruments came to be regarded as a distinct and worthy means for the expression of musical ideas. Even the prolific J. S. Bach does not appear to have favoured this combination, though he wrote trios in plenty. With the symphony was born the string quartet as we now understand it—the symphony in miniature; and both were born of the same father, Haydn. Although 24 bars comprise all the first part of the first movement of Haydn's 1st Quartet, we see there the embryo which Beethoven developed to such gigantic proportions.



These first quartets of Haydn seem to us sadly feeble in the present day; there is not enough flesh to cover the skeleton, and the joints are terribly awkward; but there is the unmistakeable infant quartet, and certainly not more clumsy and unpromising than the human infant. The due proportions are all there too—in fact, there are 5 movements instead of 4, Haydn usually writing two minuets to these early works. In the course of his long life and incessant practice in symphonic composition, Haydn made vast progress, so that the later quartets (op. 71, etc.) begin to show, in the lower parts, some of the boldness which had before been only allowed to the 1st violin. 83 quartets of Haydn are catalogued and printed, while of the 93 of his contemporary Boccherini, scarcely one survives.

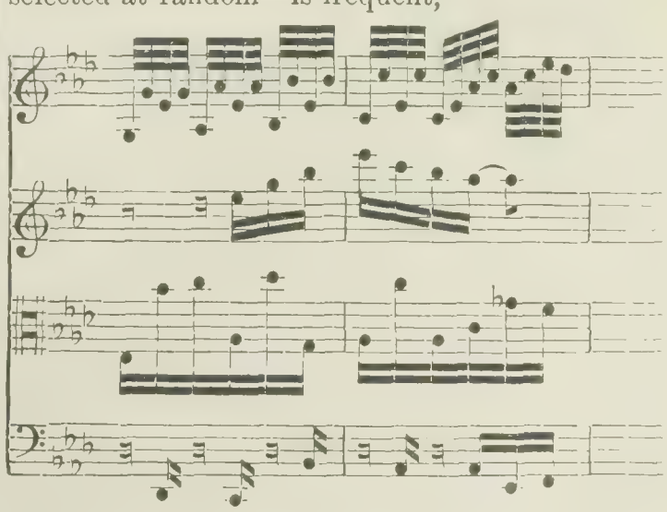
Mozart, with his splendid genius for polyphony as well as melody, at once opened up a new world. In the set of 6 dedicated to Haydn we notice, besides the development in form, the development of the idea, which it has only been given to Beethoven fully to carry out—the making each part of equal interest and importance. Theoretically, in a perfect quartet, whether vocal or instrumental, there should be no 'principal part.' The six quartets just spoken of were so far in advance of their time, as to be considered on all sides as 'hideous stuff.' In our time we find little that is startling in them, except perhaps the famous opening of No 6, which will always sound harsh from the false relations in the 2nd and 4th bars.

Mozart's 26 quartets all live, the 6 dedicated to Haydn, and the last 3 composed for the King of Prussia, being immortal.

Those writers whose quartets were simply the echo of Mozart's—such as Romberg, Onslow, Ries, and Fesca—made no advance in the treatment of the four instruments.

It is not our province here to speak of the growth of the symphonic form as exhibited in the string quartet, this subject having been already discussed under FORM, but rather to notice the extraordinary development of the art of part-writing, and the manner in which the most elaborate compositions have been constructed with such apparently inadequate materials. In these points the quartets of Beethoven so far eclipse all others that we might confine our attention exclusively to them. In the very first (op. 18, No. 1) the phrase

of the 1st movement is delivered so impartially to each of the four players, as though to see what each can make of it, that we feel them to be on an equality never before attained to. If the 1st violin has fine running passages, those of the 2nd violin and viola are not a whit inferior. Does the 1st violin sing a celestial adagio, the cello is not put off with mere bass notes to mark the time. All four participate equally in the merriment of the scherzo and the dash of the finale. This much strikes one in the earlier quartets, but later, when such writing as the following—selected at random—is frequent,



we find that we are no longer listening to four voices disposed so as to sound together harmoniously, but that we are being shown the outline,

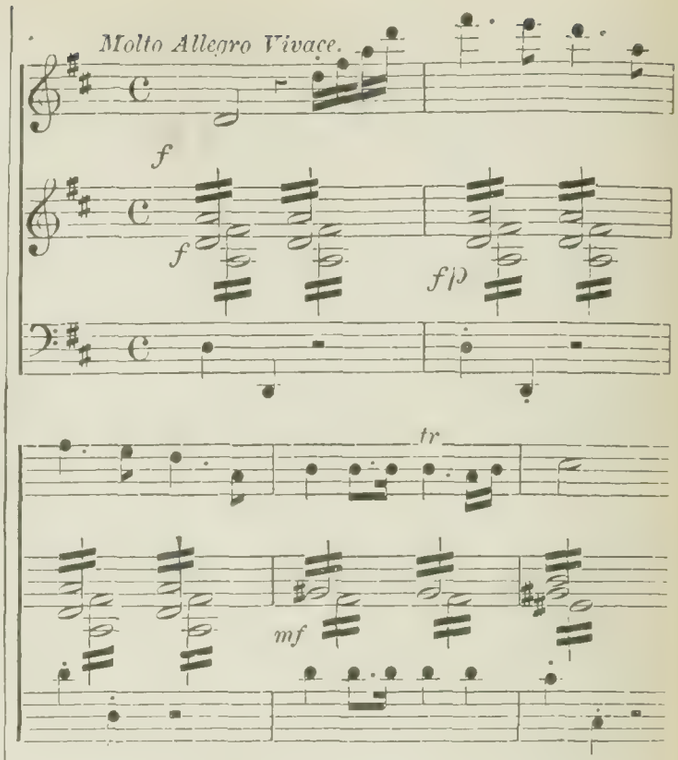
the faint pencil sketch, of works for whose actual presentation the most perfect earthly orchestra would be too intolerably coarse. The posthumous quartets are hardly to be regarded as pieces written for violins, but we are rather forced to imagine that in despair of finding colours delicate and true enough the artist has preferred to leave his conceptions as charcoal sketches. This fancy is borne out when we note how large a compass the four parts are constantly made to cover, a space of nearly five octaves sometimes being dashed over, with little care for the poorness and scratchiness of tone thus produced.

The 16 quartets of Beethoven are all constantly before the musical public, the last four naturally less frequently than the others.

There is a wide contrast between these stupendous works of genius and the polished and thoroughly legitimate workmanship of Schubert's quartets. Here we find everything done which ought to be done and nothing which ought not. They are indeed irreproachable models. One little point deserves notice here as illustrating the comparative strength of two great men: Beethoven gives frequent rests to one or two of the players, allowing the mind to fill in the lacking harmony, and thus producing a clearness, boldness and contrast which no other composer has attained; Schubert, on the other hand, makes all four parts work their hardest to hide that thinness of sound which is the drawback of the quartet.

Mention of Spohr's quartets might almost be omitted in spite of their large number and their great beauty. Technically they are no more advanced than those of Haydn, the interest lying too often in the top part. They also lose much through the peculiar mannerism of the composer's harmony, which so constantly occupies three of the parts in the performance of pedal notes, and portions of the chromatic scale.

Still more than Schubert does Mendelssohn seem to chafe at the insufficiency of four stringed instruments to express his ideas. Not only this, but he fails, through no fault of his own, in one point needful for successful quartet-writing. Beethoven and Schubert have shown us that the theoretically perfect string-quartet should have an almost equal amount of interest in each of the four parts; care should therefore be taken to make the merest accompaniment-figures in the middle parts of value and character. *Tremolos* and reiterated chords should be shunned, and indeed the very idea of *accompaniment* is barely admissible. The quartet, though differing from the symphony only in the absence of instrumental colouring and limitation of polyphony, is best fitted for the expression of ideas of a certain delicacy, refinement and complexity, anything like boldness being out of place, from the weakness of the body of tone produced. Now the chief characteristic of Mendelssohn's music is its broad and singing character, passage-writing is his weak point. Consequently, however good his quartets, one cannot but feel that they would sound better if scored for full orchestra. Take the opening of Op. 44, No. 1, for instance—



In the first place, this is not quartet-writing at all; there is a melody, a bass, and the rest is mere fill-up matter: in the second, we have here as thorough an orchestral theme as could be devised—the ear yearns for trumpets and drums in the fourth bar. A similar case occurs in the F minor Quartet (op. 80), and the expression 'symphony in disguise' has accordingly often been applied to these works. This is curious, because Mendelssohn has shown himself capable of expressing his ideas with small means in other departments. The 4-part songs for male voices, for instance, are absolutely perfect models for what such things ought to be. Schumann (op. 41) is the only writer who can be said to have followed in the wake of Beethoven with regard to using the quartet as a species of shorthand. All his three quartets have an intensity, a depth of soul, which, as with Beethoven, shrinks from plainer methods of expression.

Of the earnest band of followers in this school —Brahms (op. 51, 67), Bargiel, Rheinberger— all that can be said is that they *are* followers. If the quartet is yet capable of new treatment, the second Beethoven who is to show us fresh marvels has not yet come.

II. Quartets for strings and wind instruments are uncommon, but Mozart has one for oboe, violin, viola, and cello. Next to the string quartet ranks the pianoforte quartet, which, however, is built on quite a different principle: here the composition becomes either equivalent to an accompanied trio, or to a symphony in which the piano takes the place of the 'string quartet,' and the other instruments—usually violin, viola, and cello—the place of wind instruments. In any case the piano does quite half the work. Mozart has written two such quartets, Beethoven only one, besides three early compositions, Mendelssohn three, while Brahms (op. 23, 26, 60) and the modern composers have favoured this form of quartet still more.

III. Vocal quartets are so called whether accompanied by instruments or not. The 4-part songs of Mendelssohn have been mentioned. No modern oratorio is considered complete without its unaccompanied quartet, Spohr having set the fashion with his exquisite 'Blest are the departed' in the 'Last Judgment.' Modern opera is learning to dispense with concerted music, Richard Wagner having set the fashion. To enumerate the fine operatic quartets from 'Don Giovanni' to 'Faust,' would be useless. In light opera the 'Spinning-wheel' quartet in 'Marta' stands pre-eminent.

IV. The whole body of stringed instruments in the orchestra is often incorrectly spoken of as 'the Quartet,' from the fact that until the time of Beethoven the strings seldom played in other than four-part harmony. It is now the usual custom to write the parts for cello and double bass on separate staves, and in Germany these instruments are grouped apart, a practice which is decidedly unwise, seeing that the double bass requires the support of the cello to give the tone firmness, more especially the German four-stringed instrument, the tone of which is so wanting in body.

V. The term is also applied to the performers of a quartet, as well as to the composition itself. [F.C.]

QUARTET, DOUBLE—for 4 violins, 2 violas, and 2 cellos. This variety of quartet should bear the same relation to an octet that a double chorus bears to an 8-part chorus; the parts being divided into two separate sets of four. Spohr's three Double Quartets (Op. 65, 77, 87) are probably the only specimens in print. [F.C.]

QUARTETT ASSOCIATION, THE. A society for the performance of chamber music, started in 1852 by Messrs. Sainton, Cooper, Hill, and Piatti, with such eminent artists as Sterndale Bennett, Mlle. Clauss, Mme. Pleyel, Miss Goddard, Pauer, Charles Halle, etc., at the pianoforte. They gave six concerts each season at Willis's Rooms, but ended with the third season, the time not having yet arrived for a sufficient support of chamber music by the London public. The programmes were selected with much freedom, embracing English composers—Bennett, Ellerton, Loder, Macfarren, Mellon, etc.; foreign musicians then but seldom heard—Schumann, Cherubini, Hummel, etc., and Beethoven's Posthumous Quartets. The pieces were analysed by Mr. Macfarren. [G.]

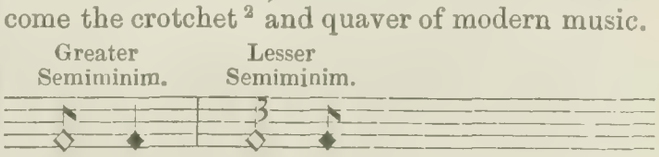
QUASI, as if—*i.e.* an approach to. 'Andante quasi allegretto' or 'Allegretto quasi vivace' means a little quicker than the one and not so quick as the other—answering to poco allegretto, or più tosto allegro. [G.]

QUATRE FILS AYMON, LES. An opéra comique; words by MM. Leuven and Brunswick, music by Balfe. Produced at the Opéra Comique, Paris, July 15, 1844, and at the Princess's Theatre, London, as 'The Castle of Aymon, or The Four Brothers,' in 3 acts, Nov. 20, 1844. [G.]

QUAVER (Ger. *Achtelnote*; Fr. *Croche*; Ital. *Croma*). A note which is half the length of a crotchet, and therefore the eighth part of a semibreve; hence the German name, which signifies 'eighth-note.' It is written thus , its Rest being represented by .

The idea of expressing the values of notes by diversity of form has been ascribed by certain writers to De Muris (about 1340), but this is undoubtedly an error, the origin of which is traced by both Hawkins (Hist. of Music) and Fétis (art. Muris) to a work entitled 'L'antica Musica ridotta alla moderna Prattica,' by Vicentino (1555), in which it is explicitly stated that De Muris invented *all* the notes, from the Large to the Semiquaver. It is however certain that the longer notes were in use nearly 300 years earlier, in the time of Franco of Cologne [NOTATION, vol. ii, p. 470], and it seems equally clear that the introduction of the shorter kinds is of later date than the time of De Muris. The fact appears to be that the invention of the shorter notes followed the demand created by the general progress of music, a demand which may fairly be supposed to have reached its limit in the quarter-demisemiquaver, or $\frac{1}{16}$ of a quaver,  occasionally met with in modern music.

The Quaver, originally called *Chroma* or *Fusa*, sometimes *Unca* (a hook), was probably invented some time during the 15th century, for Morley (1597) says that 'there were within these 200 years' (and therefore in 1400) 'but four[1] (notes) known or used of the musicians, those were the Long, Breve, Semibreve, and Minim'; and Thomas de Walsingham, in a MS. treatise written somewhat later (probably about 1440), and quoted by Hawkins, gives the same notes, and adds that 'of late a New character has been introduced, called a Crotchet, which would be of no use, would musicians remember that beyond the minim no subdivision ought to be made.' Franchinus Gafurius also, in his 'Practica Musicæ' (1496) quoting from Prosdocimus de Beldemandis, who flourished in the early part of the 15th century, describes the division of the minim into halves and quarters, called respectively the greater and lesser semiminim, and written in two ways, white and black (Ex. 1). The white forms of these notes soon fell into disuse, and the black ones have become the crotchet[2] and quaver of modern music.



The subdivision of the quaver into semiquaver and demisemiquaver followed somewhat later. Gafurius, in the work quoted above, mentions a note $\frac{1}{8}$ of a minim in length, called by various names, and written either or , but the true

[1] There were really five, including the Large, which Morley calls the Double Long.

[2] It is worthy of notice that in the ancient manuscript by English authors known as the Waltham Holy Cross MS., a note is mentioned, called a 'simple,' which has the value of a crotchet, but is written *with a hooked stem* like a modern quaver. That a note half the value of a minim should at any period have been written with a hook may help to account for the modern name *crotchet*, which being clearly derived from the French *croc.* or *crochet*, a hook, is somewhat anomalous as applied to the note in its present form, which has no hook.

semiquaver or *semichroma*, the earliest form of which was , does not appear until later, while the demisemiquaver must have been a novelty as late as 1697, at least in this country, judging from the 13th edition of Playford's 'Introduction to the Skill of Musick,' in which, after describing it, the author goes on to say 'but the Printer having none of that character by him, I was obliged to omit it.'

When two or more quavers (or shorter notes) occur consecutively, they are usually grouped together by omitting the hooks and drawing a thick stroke across their stems, thus . The credit of having invented this great improvement in notation is due, according to Hawkins, to John Playford, whose example in this matter was soon followed by the Dutch, and afterwards by the French and Germans. In Playford's 'Introduction etc.' the notes are described as 'Tyed together by a long stroke on the Top of their Tails,' and it is curious that in the example he gives (Ex. 2)the characteristic hook of the quaver or semiquaver is allowed to appear at the end of each group.

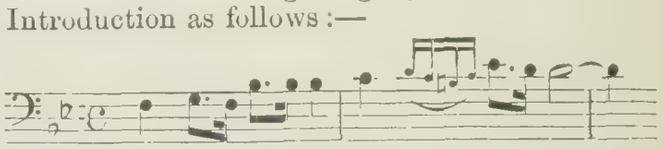
As late as the 13th edition, however (1697), the examples throughout Playford's book, with the single exception of the one just quoted, are printed with separate quavers and semiquavers, and it is not until the 15th edition (1703) which is announced as 'Corrected, and done on the New Ty'd-Note,' that the notes are grouped as in modern music.

In vocal music, notes which have to be sung to separate syllables are written detached, while those which are sung to a single syllable are grouped; for example—

[F.T.]

QUEISSER, Carl Traugott, a great trombone player, was born of poor parents at Döben, near Leipzig, Jan. 11, 1800. His turn for music showed itself early, and he soon mastered all the ordinary orchestral instruments. He ultimately confined himself to the viola, and to the trombone, which he may really be said to have created, since, for instance, the solo in the *Tuba mirum* of Mozart's Requiem was before his time usually played on a Bassoon. In 1817 he was appointed to play violin and trombone in the town orchestra, and by 1830 had worked his way into the other orchestras of Leipzig, including that of the Gewandhaus. He played the viola in Matthäi's well-known quartet for many years; was one of the founders of the Leipzig 'Euterpe,' and led its orchestra for a long time; and in short was one of the most prominent musical figures in Leipzig during its very best period.

As a solo trombone-player he appeared frequently in the Gewandhaus Concerts, with concertos, concertinos, fantasias and variations, many of them composed expressly for him by C. G. Müller, F. David, Meyer, Kummer, and others; and the reports of these appearances rarely mention him without some term of pride or endearment. 'For fulness, purity and power of tone, lightness of lip, and extraordinary facility in passages,' says his biographer,[1] 'he surpassed all the trombone-players of Germany.' There was a Leipzig story to the effect that at the first rehearsal of the Lobgesang, Queisser led off the Introduction as follows:—



to Mendelssohn's infinite amusement. *Se non e vero, e ben trovato.*

Queisser was well-known throughout Germany, but appears never to have left his native country. He died at Leipzig June 12, 1846. [G.]

QUICK-STEP (Fr. *Pas redoublé*; Ger. *Geschwind Marsch*) is the English name for the music of the Quick march in the army, a march in which 116 steps of 30 inches go to the minute. (See Boosé's Journal of Marches, Quicksteps, Dances, etc.) It may be well to mention that in the Slow march there are 75 steps of 30 inches, and in the 'Double' 165 of 33 inches. [See March, vol. ii. p. 212.] [G.]

QUILISMA. An antient form of Neuma, representing a kind of Shake. [See Notation, p. 468*a*.] [W.S.R.]

QUINAULT, Philippe, eminent French dramatist, born in Paris 1635, died Nov. 26, 1688, may be considered the creator of a new branch of the drama, the lyric tragedy. The numerous operas which he wrote for Lully long served as models to other French dramatic authors, and are still worthy of notice for their literary merit, and the smoothness and melody of the versification. [G.C.]

QUINTA FALSA (False Fifth). The forbidden Interval, between Mi, in the Hexachordon durum, and Fa, in the Hexachordon naturale—the Diminished Fifth of modern Music. [See Mi contra Fa.] [W.S.R.]

QUINTET (Fr. *Quintuor*; Ital. *Quintetto*). A composition for five instruments or voices with or without accompaniment.

I. Quintets for strings have been far less written than quartets, owing to the greater complexity demanded in the polyphony. Boccherini, however, published 125, of which 12 only were written for 2 violins, 2 violas, and 1 cello, the others having 2 cellos and 1 viola. The former is the more usual choice of instruments, probably because the lower parts are apt to be too heavy sounding with two cellos, owing to the greater body of

[1] Allg. musikalische Zeitung, July 8, 1846.

tone in this instrument. Schubert's noble Quintet in C (op. 163), is for 2 cellos, but the first cello is used constantly in its upper octave, soaring above the viola. Onslow's—34 in number—are for a double bass and cello.

Beethoven's two Quintets, in E♭ and C, belong to his earlier periods, and have therefore none of the extraordinary features of the later quartets. Mendelssohn's Quintet in B♭ (op. 87), is so orchestral as to seem almost a symphony in disguise, but that in A (op. 18) is an exquisite specimen of what a string quintet should be.

Many other combinations of five instruments have found favour with musicians, mostly including a pianoforte. Thus there is Mozart's Quintet in E♭ for oboe, clarinet, horn, bassoon, and piano—which the composer esteemed the best thing he ever wrote,—the beautiful one for clarinet and strings, and another for the piquant combination of flute, oboe, viola, cello, and musical glasses. Perhaps the most effective association is that of piano, violin, viola, cello, and double bass, as in Schubert's well-known 'Trout' Quintet (op. 114). Beethoven's Quintet for piano and wind instruments (op. 16), in E♭, is a noble representative of a very small class. Hummel has also written a well-known one.

II. In vocal music none who have ever heard it can forget the admirable quintet (for 2 soprani, contralto, tenor, and bass) which forms the finale to Act 1 of Spohr's 'Azor and Zemira.' In modern opera two most striking specimens occur in Goetz's 'Widerspänstige Zähmung,' and Wagner's 'Meistersinger.' Five-part harmony has a peculiarly rich effect, and deserves to be more practised than it is, especially in oratorio chorus. It is, however, by no means easy to write naturally. [F.C.]

QUINTOYER (Old Eng. Quinible). To sing in Fifths—a French verb, in frequent use among extempore Organizers during the Middle Ages. [See ORGANUM, PART-WRITING.] [W.S.R.]

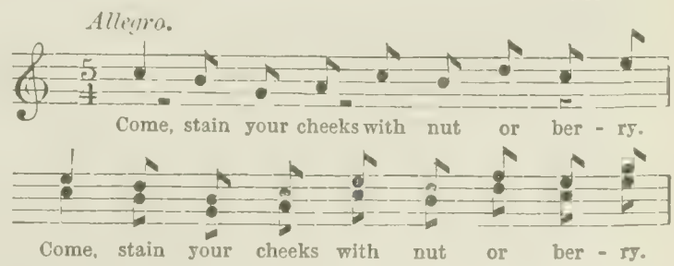
QUINTUS (the Fifth). The Fifth Part in a composition for five Voices: called also Pars quinta and Quincuplum. In Music of the 15th and 16th centuries, the Fifth Part always corresponded exactly, in compass, with one of the other four; it would, therefore, have been impossible to describe it as First or Second Cantus, Altus, Tenor, or Bassus. [W.S.R.]

QUINTUPLE TIME. The rhythm of five beats in a bar. As a rule, quintuple time has two accents, one on the first beat of the bar, and the other on either the third or fourth, the bar being thus divided into two unequal parts. On this account it can scarcely be considered a distinct species of rhythm, but rather a compound of two ordinary kinds, duple and triple, employed alternately. Although of little practical value, quintuple time produces an effect sufficiently characteristic and interesting to have induced various composers to make experiments therein, the earliest attempt of any importance being probably an air to the words 'Se la sorte mi condanna' in the opera of 'Ariadne' by Adolfati, written in 1750, and it is also met in some of the national airs of Spain, Greece, Germany, etc. Thus Reicha, in a note to No. 20 of his set of 36 fugues (each of which embodies some curious experiment in either tonality or rhythm), states that in a certain district of the Lower Rhine, named Kochersberg, the airs of most of the dances have a well-marked rhythm of five beats, and he gives as an example the following waltz—

In the above example the second accent falls on the third beat, the rhythm being that of 2–8 followed by 3–8, and the same order is observed in a very charming movement by Hiller, from the Trio op. 64, in which the quintuple rhythm is expressed by alternate bars of 2–4 and 3–4, as follows—

In Reicha's fugue above referred to, the reverse is the case, the fourth beat receiving the accent, as is shown by the composer's own time-signature, as well as by his explicit directions as to performance. The following is the subject :—

Other instances of quintuple rhythm are to be found in a Trio for strings by K. J. Bischoff, for which a prize was awarded by the Deutsche Tonhalle in 1853, in Chopin's Sonata in C minor, op. 4, in Hiller's 'Rhythmische Studien' op. 52, etc.; but perhaps the most characteristic example occurs in the 'Gypsies' Glee,' by W. Reeve (1796), the last movement of which runs as follows.

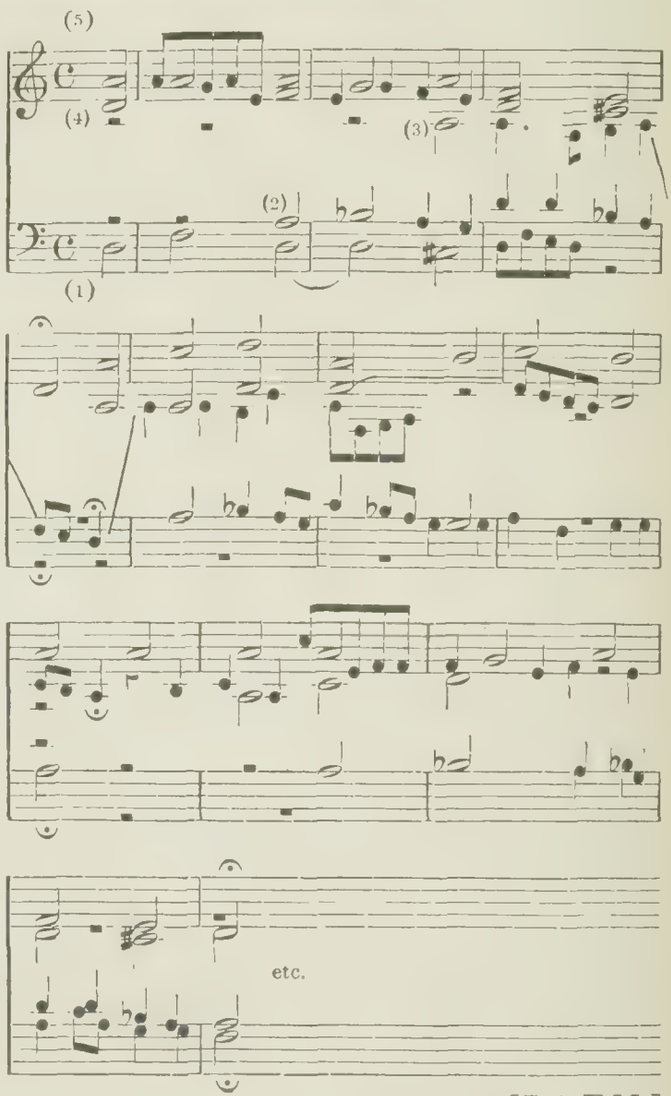


This may fairly be considered an example of genuine quintuple rhythm, for instead of the usual division of the bar into two parts, such as might be expressed by alternate bars of 3–4 and 2–4, or 2–4 and 3–4, there are five distinct beats in every bar, each consisting of an accent and a non-accent. This freedom from the ordinary alternation of two and three is well expressed by the grouping of the accompaniment, which varies throughout the movement, after the manner shown in the following extract :—

[F.T.]

QUIRE. Another mode of spelling CHOIR. [G.]

QUODLIBET (Lat. 'What you please'), also called QUOTLIBET ('As many as you please'), and in Italian MESSANZA or MISTICHANZA ('A mixture'). This was a kind of musical joke in the 16th and early part of the 17th centuries, the fun of which consisted in the extempore juxtaposition of different melodies, whether sacred or secular, which were incongruous either in their musical character, or in the words with which they were associated; sometimes, however, the words were the same in all parts, but were sung in snatches and scraps, as in the quodlibets of Melchior Franck. (See Prætorius, Syntagma Musicum, tom. iii. cap. v.) There were two ways of performing this: one was to string the melodies together simply and without any attempt at connecting them by passages such as those found in modern 'fantasias'; the other, the more elaborate method, consisted in singing or playing the melodies simultaneously, the only modifications allowed being those of time. The effect of this, unless only very skilful musicians engaged in it, must have been very like what we now call a 'Dutch chorus.' This pastime was a favourite one with the Bachs, at whose annual family gatherings the singing of quodlibets was a great feature. (See Spitta, 'J. S. Bach,' i. 152, ii. 654.) Sebastian Bach himself has left us one delightful example of a written-down quodlibet, at the end of the '30 variations' in G major, for a detailed analysis of which see Spitta, ii. 654. The two tunes used in it are 'Ich bin so lang bei dir nicht gewest,' and 'Kraut und Rüben, Haben mich vertrieben.' One of the best modern examples, although only two themes are used, is in Reinecke's variations for two pianos on a gavotte of Gluck's, where, in the last variation, he brings in simultaneously with the gavotte the well-known musette of Bach which occurs in the third 'English' suite. A good instance, and one in which the extempore character is retained, is the singing of the three tunes 'Polly Hopkins,' 'Buy a broom,' and 'The Merry Swiss Boy,' together, which is sometimes done for a joke. A very interesting specimen of a 16th-century quodlibet by Johann Göldel, consisting of five chorale-tunes—viz. (1) 'Erhalt uns, Herr bei deinem Wort,' (2) 'Ach Gott, vom Himmel,' (3) 'Vater unser im Himmelreich,' (4) 'Wir glauben all,' (5) 'Durch Adam's Fall'—is given as an appendix to Hilgenfeldt's Life of Bach. We quote a few bars as an example of the ingenuity with which the five melodies are brought together:—



[J.A.F.M.]

R.

RAAFF, ANTON, one of the most distinguished tenors of his day; born 1714 in the village of Holzem, near Bonn, and educated for the priesthood at the Jesuit College at Cologne. There he learned his notes for the first time at 20 years old, having previously sung by ear. His fine voice so struck the Elector Clement Augustus, that he offered to have him trained for a singer, and after making him sing in an oratorio, took him to Munich, where Ferrandini brought him forward in an opera. Raaff then determined to devote himself entirely to music, and after studying for a short time with Bernacchi at Bologna, became one of the first tenors of the day. In 1738 he sang at Florence on the betrothal of Maria Theresa, and followed up this successful début at many of the Italian theatres. In 1742 he returned to Bonn, and sang at several of the German courts, particularly at Vienna, where he appeared in

Jomelli's 'Didone' (1749), to Metastasio's great satisfaction. In 1752 he passed through Italy to Lisbon, where he was engaged for three years on highly advantageous terms. In 1755 he accepted a summons to Madrid, where he remained under Farinelli's direction, enjoying every possible mark of favour from the court and public. In 1759 he accompanied Farinelli to Naples, where he afterwards met with Naumann, and where his fine singing cured the Princess Belmonte Pignatelli of a profound melancholy into which she had fallen on the death of her husband. In 1770 he returned to Germany and entered the service of the elector, Karl Theodor, at Mannheim. In 1778 he was in Paris with Mozart, and in 1779 he followed the court to Munich, where Mozart composed the part of Idomeneo for him. Soon afterwards he quitted the stage, and took to teaching singing, but his pupils left him on account of his extreme strictness. Towards the close of his life he gave up music entirely, giving away his piano and his music, and abandoning himself to contemplation. He died in Munich, May 27, 1797. 'Raaff's voice was the finest possible tenor, full, pure in tone, and even throughout the register, from deep bass to extreme high notes. He was moreover a complete master of the art of singing, as is shown by his extraordinary power of reading at sight, by the skill with which he introduced variations and cadenzas, and by his wonderful expression, which made his singing seem an accurate reflection of his mind and heart. Another admirable quality was his pure and distinct pronunciation of the words, every syllable being audible in the largest space.' Mozart in his letters speaks of him as his 'best and dearest friend,' especially in one from Paris, dated June 12, 1778. He composed for him in Mannheim the air, 'Se al labro mio non credi' (Köchel 295). [C.F.P.]

RACCOLTA GENERALE DELLE OPERE CLASSICHE MUSICALI. A collection of pieces of which the full title is as follows:—'Collection générale des ouvrages classiques de musique, ou Choix de chefs d'œuvres, en tout genre, des plus grands compositeurs de toutes les Ecoles, recueillis, mis en ordre et enrichis de Notices historiques, par Alex. E. Choron, pour servir de suite aux Principes de Composition des écoles d'Italie.' A notice on the wrapper further says that the price of the work to subscribers is calculated at the rate of 5 sous per page, thus curiously anticipating Mr. Novello's famous reduction of his publications to $2\frac{1}{2}d.$ per page. The numbers were not to be issued periodically, but the annual cost to subscribers was fixed at from 36 to 40 francs. The work was in folio, engraved by Gillé fils, and published by Leduc & Co., Paris, Rue de Richelieu, 78, with agents at Bordeaux, Marseilles, Leipzig, Munich, Vienna, Lyon, Turin, Milan, Rome and Naples. It was got up with great care and taste. The parts are in blue-gray wrappers, with an ornamental title. The only numbers which the writer has been able to discover are as follows:—No. 1, Miserere a 2 core, Leo; No. 2, Missa ad fugam, Palestrina (à 4); No. 3, Stabat, Palestrina (8 voices); No. 4, Stabat, Josquin (à 5); No. 5, Miserere a cinque voci, Jomelli; No. 6, Missa pro defunctis, Jomelli. It is probable that the issue of the work did not continue beyond these six pieces.

For ALFIERI'S 'Raccolta di musica sacra' see Appendix. [G.]

RADICAL CADENCE. A term applied, in modern Music, to a Close, either partial or complete, formed of two Fundamental Chords. [See CADENCE.] [W.S.R.]

RADZIWIL, ANTON HEINRICH, Prince of, Royal Prussian 'Statthalter' of the Grand Duchy of Posen, born at Wilna, June 13, 1775, married in 1796 the Princess Luise, sister of that distinguished amateur Prince Louis Ferdinand of Prussia. [See vol. ii. p. 168*b*.] Radziwil was known in Berlin not only as an ardent admirer of good music, but as a fine violoncello player, and 'a singer of such taste and ability as is very rarely met with amongst amateurs.'[1] Beethoven was the great object of his admiration. He played his quartets with devotion, made a long journey to Prince Galitzin's on purpose to hear the Mass in D, was invited by Beethoven to subscribe to the publication of that work, and indeed was one of the seven who sent in their names in answer to that appeal. To him Beethoven dedicated the Overture in C, op. 115 (known as 'Namensfeier'), which was published as 'Grosses Ouverture in C dur *gedichtet*' etc., by Steiner of Vienna in 1825.

Further relations between the Prince and the composer there must have been, but at present we know nothing of them. No letters from Beethoven to him are included in those hitherto published, nor has Mr. Thayer yet thrown any light on the matter in his biography of the composer.

Radziwil was not only a player, a singer, and a passionate lover of music, he was also a composer of no mean order. Whistling's 'Handbuch' (1828) names 3 Romances for voice and PF. (Peters), and songs with guitar and cello (B. & H.), and Mendel mentions duets with PF. accompaniment, a Complaint of Maria Stuart, with PF. and cello, and many part-songs composed for Zelter's Liedertafel, of which he was an enthusiastic supporter,[2] and which are still in MS. But these were only preparations for his great work, entitled 'Compositions to Goethe's dramatic poem of Faust.' This, which was published in score and arrangement by Trautwein of Berlin in Nov. 1835, contains 25 numbers, occupying 589 pages. A portion was sung by the Singakademie as early as May 1, 1810; the choruses were performed in May 1816, three new scenes as late as Nov. 21, 1830, and the whole work was brought out by that institution after the death of the composer, which took place April 8, 1833. The work was repeatedly performed during several years in Berlin, Dantzig, Hanover, Leipzig, Prague, and many other places, as may be seen from the index to the A. M. Zeitung.

[1] A.M.Z. 1831, July 27. See also 1809, June 28; 1814, Sept. 28.

[2] Zelter's Correspondence with Goethe teems with notices of the Prince.

It curiously made its appearance in a performance at Hyde Park College, London, on May 21, 1880, under the direction of L. Martin-Eiffe. A lengthened analysis of it will be found in the A. M. Zeitung for 1836, pp. 601, 617; and there is a copy in the British Museum. [G.]

RAFF, JOSEPH JOACHIM, born May 27, 1822, at Lachen on the Lake of Zurich. He received his early education at Wiesenstetten in Würtemberg, in the home of his parents, and then at the Jesuit Lyceum of Schwyz, where he carried off the first prizes in German, Latin, and mathematics. Want of means compelled him to give up his classical studies, and become a schoolmaster, but he stuck to music, and though unable to afford a teacher, made such progress not only with the piano and the violin, but also in composition, that Mendelssohn, to whom he sent some MSS., gave him in 1843 a recommendation to Breitkopf & Härtel. This introduction seems to have led to his appearing before the public, and to the first drops of that flood of compositions of all sorts and dimensions which since 1844 he has poured forth in an almost unintermitting stream. Of Opus 1 we have found no critical record; but op. 2 is kindly noticed by the N. Zeitschrift (Schumann's paper) for Aug. 5, 1844, the reviewer finding in it 'something which points to a future for the composer.' Encouraging notices of ops. 2 to 6 inclusive are also given in the A. M. Zeitung for the 21st of the same month. Amidst privations which would have daunted any one of less determination he worked steadily on, and at length having fallen in with Liszt, was treated by him with the kindness which has always marked his intercourse with rising or struggling talent, and was taken by him on a concert-tour. Meeting Mendelssohn for the first time at Cologne in 1846, and being afterwards invited by him to become his pupil at Leipzig he left Liszt for that purpose. Before he could carry this project into effect, however, Mendelssohn died, and Raff remained at Cologne, occupying himself *inter alia* in writing critiques for Dehn's Cäcilia. Later he published 'Die Wagnerfrage,' a pamphlet which excited considerable attention. Lizst's endeavours to secure him a patron in Vienna in the person of Mechetti the publisher, were frustrated by Mechetti's death while Raff was actually on the way to see him. Undismayed by these repeated obstacles he devoted himself to a severe course of study, partly at home and partly at Stuttgart, with the view to remedy the deficiencies of his early training. At Stuttgart he made the acquaintance of Bülow, who became deeply interested in him, and did him a great service by taking up his new Concertstück, for PF. and orchestra, and playing it in public.

By degrees Raff attached himself more and more closely to the new German school, and in 1850 went to Weimar to be near Liszt, who had at that time abandoned his career as a virtuoso and was settled there. Here he remodelled an opera 'König Alfred,' which he had composed in Stuttgart three years before, and it was produced at the Court Theatre, where it is still often performed. It has also been given elsewhere. Other works followed—a collection of PF. pieces called 'Frühlingsboten' in 1852, the first string quartet in 1855, and the first grand sonata for PF. and violin (E minor) in 1857. In the meantime he had engaged himself to Doris Genast, daughter of the well-known actor and manager, and herself on the stage; and in 1856 he followed her to Wiesbaden, where he was soon in great request as a pianoforte teacher. In 1858 he composed his second violin-sonata, and the incidental music for 'Bernhard von Weimar,' a drama by Wilhelm Genast, the overture to which speedily became a favourite, and was much played throughout Germany. In 1859 he married. In 1863 his first symphony 'An das Vaterland' obtained the prize offered by the Gesellschaft der Musikfreunde in Vienna (out of 32 competitors), and was followed by the 2nd (in C) and the 3rd (in F, 'Im Walde') in 1869, the 4th (in G minor) in 1871, the 5th ('Lenore') in 1872, the 6th ('Gelebt, gestrebt, gelitten, gestritten, gestorben, umworben') in 1876, and the 7th ('Alpensinfonie') in 1877, the 8th ('Frühlingsklänge') in 1878, and the 9th 'Im Sommerzeit' in 1880. A 10th ('Zur Herbstzeit') was lately played at Wiesbaden. In 1870 his comic opera 'Dame Kobold' was produced at Weimar. A serious opera in 5 acts entitled 'Samson,' for which he himself wrote the libretto, has not yet been performed in public. Two cantatas, 'Wachet auf' and another written for the Festival in commemoration of the battle of Leipzig, were his first works for men's voices, and are popular with the choral societies. His arrangement of Bach's 6 violin sonatas for PF. is a work of great merit.

Detailed analyses of the first six of these Symphonies will be found in the 'Monthly Musical Record' for 1875, and from these a very good idea of the composer's style may be gathered. Remembering his struggles and hard life it is only a matter for wonder that he should have striven so earnestly and so long in a path that was not his natural walk. A glance at the nearly complete list of his works at the foot of this notice will explain our meaning. The enormous mass of 'drawing-room music' tells its own tale. Raff had to live, and having by nature a remarkable gift of melody and perhaps not much artistic refinement, he wrote what would pay. But on looking at his works in the higher branch of music—his symphonies, concertos, and chamber music—one cannot but be struck by the conscientious striving towards a very high ideal. In the whole of his nine published Symphonies the slow movements, without a single exception, are of extreme melodic beauty, although weak from a symphonic point of view: the first movements are invariably worked out with surprising technical skill, the subjects appearing frequently in double counterpoint and in every kind of canon. And however modern and common his themes may appear, they have often been built up with the greatest care, note by note, to this end; showing that he does not, as is often said, put down the first thing that comes into his mind.

Observe the following treatment of the first subject in his 1st Symphony 'An das Vaterland':—

a canon in augmentation and double augmentation. Such instances as this are numerous, and the art with which these contrapuntal devices are made to appear spontaneous is consummate. In the Pianoforte Concerto in C minor (op. 185), in each movement *all* the subjects are in double counterpoint with one another, yet this is one of Raff's freshest and most melodious works. To return to the Symphonies: the Scherzos are, as a rule, weak, and the *Finales* without exception boisterous and indeed vulgar. Writing here, as ever, for an uneducated public, Raff has forgotten that for a symphony to descend from a high tone is for it to be unworthy of the name.

A remarkable set of 30 Songs (Sanges-Frühling, op. 98) deserves notice for its wealth of fine melodies, some of which have become national property ('Kein Sorg um den Weg'; 'Schön' Else,' etc.); and among his pianoforte music is a set of 20 Variations on an original theme (op. 179) which displays an astonishing fertility of resource, the theme—of an almost impossible rhythm of 5 and 7 quavers in the bar—being built up into canons and scherzos of great variety and elegance.

Raff's Pianoforte Concerto is very popular, and his Suite for Violin and Orchestra (op. 180) only little less so. His versatility need not be enlarged upon. In all the forms of musical composition he has shown the same brilliant qualities and the same regretable shortcomings. His gift of melody, his technical skill, his inexhaustible fertility, and above all his power of never repeating himself—all these are beyond praise. But his very fertility is a misfortune, since it renders him careless in the choice of his subjects; writing 'pot-boilers' has injured the development of a delicate feeling for what is lofty and refined: in short, he stands far before all second-rate composers, yet the conscientious critic hesitates to allow him a place in the front rank of all.

Even those who have least sympathy with Raff's views on art must admire the energy and spirit with which he has worked his way upwards in spite of every obstacle poverty could throw in his way. He is a member of several societies, and has received various orders. In 1877 he was appointed with much éclat director of the Hoch-conservatoire at Frankfort, a post he still retains.

The first of his large works performed in this country was probably the Lenore Symphony at the Crystal Palace, Nov. 14, 1874. This was followed by the 'Im Walde,' and the PF. Concerto in C minor (Jaell), at the Philharmonic; the Symphonies in G minor, 'Im Walde,' 'Frühlingsklänge' and 'Im Sommerzeit,' with the Concertos for cello and violin, and the Suite for PF. and orchestra, at the Crystal Palace. His Quintet (op. 107), 2 Trios (op. 102, 112), Sonata (op. 128), and other pieces, have been played at the Monday Popular Concerts. [F.G.]

Catalogue of Raff's works.[1]

Op. 1. Serenade. PF. solo. Andre.
2. Trois pièces caracteristiques. PF. solo. B. & H.[2]
3. Scherzo (C minor). PF. solo. B. & H.
4. Morceau de Salon . . . sur 'Maria de Rudenz.' PF. solo. B. & H.
5. 4 Galops. PF. solo. B. & H.
6. Morceau inst. Fantaisie et Varns. PF. solo. B. & H.
7. Rondeau sur 'Io son ricco.' PF. solo. B. & H.
8. 12 Romances en form d'Etudes; en 2 Cahiers. PF. solo. B. & H.
9. Impromptu brillant. PF. solo. B. & H.
10. Hommage au Néoromantisme, Grand Caprice. PF. solo. B. & H.
11. Air suisse, transcrit. PF. solo. B. & H.
12. Morceau de Salon. Fant. gracieuse. PF. solo. B. & H.
13. Valse. Rondino sur 'les Huguenots.' PF. duet. B. & H.
14. Sonata & Fugue (Eb minor). PF. solo. B. & H.
15. 6 Poèmes. PF. solo. Schott.
16. Rondeau on Saloman's 'Diamantkreuz.' PF.
17. Album Lyrique. PF. solo. Schuberth (4 books containing 9 pieces).
18. Paraphrases (2). PF. solo. Eck.
19. Fantaisie dramatique. PF. solo. Litolff.
20. 2 Morceaux de Salon. Serenade italienne; Air Rhenan. PF. solo. Litolff.
21. Loreley, Dichtung ohne Worte. PF. solo. Spina.
22. 2 Rhapsodies élégiaques. PF. solo. Spina.
23. 3 Pièces caracteristiques. PF. solo. Kistner.
24. Valse mélancolique. PF. solo. Spina.
25. Romance-étude. PF. solo. Spina.
26. Den Manen Scarlattis. Scherzo. PF. solo. Spina.
27. Angelens letzter Tag im Kloster. Ein Cyclus etc. (12 pieces in 2 books). PF. solo. Kistner.
28.
29.
30.
31. 6 Liederübertragen. PF. solo. Ebner.
32. Am Rhein, Romanze. PF. solo. Spina.
33.
34.
35. Capriccietto (on motifs from 'Freischütz'). PF. solo. Schuberth.
36. Fantaisie Militaire (on motifs from 'Huguenots'). PF. solo. Schuberth.
37. Mélange (on motifs from 'Sonnambula'). PF. solo. Schuberth.
38. Grand Mazourka. PF. solo. Stoll.
39. Nocturne (on romance by Liszt). PF. solo. Kistner.
40. Capriccietto à la Bohémienne. PF. solo. Kistner.
41. Romance. PF. solo. Kistner.
42. 'Le Pretendant' . . de Kücken (3 Nos.). PF. solo. Kistner.
43. Divertissement sur 'La Juive.' PF. solo. Schuberth.
44. Fantasina sur 'Le Barbier de Seville.' PF. solo. Schuberth.
45. Souvenir de 'Don Giovanni.' PF. solo. Schuberth.
46. 'La dernière Rose'—(The last rose of summer). Impromptu. PF. solo. Cranz.
47. 3 Lieder (by J. G. Fischer) for Bar. or Alto and PF. Senff.
48. 2 Lieder for Voice and PF. Senff.
49. 3 Lieder (by J. G. Fischer) for Voice and PF. Heinrichsholen.
50. 2 Italienische Lieder (by Sternau) for Voice and PF. Heinrichshofen.
51. 5 Lieder for Voice and PF. Kistner.
52. 3 Lieder for Voice and PF. Schlesinger.
53. 2 Lieder vom Rhein for Voice and PF. Schloss.
54. Tanz-capricen (4). PF. solo. Bahn.
55. Frühlingsboten—12 short pieces for PF. solo. Schubert.
56. 3 Salon Stücke. PF. solo. Bachmann.
57. 'Aus der Schweiz.' Fantastische Egloge. Bachmann.
58. 2 Nocturnes. PF. and Violin. Schuberth.
59. Duo in A, PF. and Cello. Nagel.
60. Schweizerweisen (9 Nos.). PF. solo. Schuberth.

[1] The Editor desires to express his obligations to Messrs. Augener & Co. for great assistance kindly rendered him in the difficult task of drawing up this list.

[2] B. & H.=Breitkopf & Härtel.

Op. 61. No. 1. Wagner's 'Lohengrin,' Lyrische Fragmente. PF. solo.—No. 2. Do. 'Tannhäuser,' Fantasie. PF. solo. No. 3. Do. 'Fliegende Holländer,' Reminiscenzen. PF. solo. — No. 4. Schumann's 'Genoveva.' PF. solo. Schuberth.
62. Salon-Etuden from Wagner's operas. PF. solo. Schlesinger. No. 1. Andante from 'Fliegende Holländer.' — No. 2. Sestet from 'Tannhäuser.'—No. 3. Lohengrin's farewell.
63. Duos on motifs from Wagner's operas. PF. and V. Siegel. No. 1. 'Fliegende Holländer.'—No. 2. 'Tannhäuser.' — No. 3. 'Lohengrin.'
64. Capriccio in F minor. PF. solo. Leuckart.
65. No. 1. Fantaisie on motifs from Berlioz's 'Benvenuto Cellini.' PF. solo.—No. 2. Caprice on motifs from Raff's 'Alfred.' PF. solo. Schuberth.
66. 'Traum-König und sein Lieb' (Geibel). Voice and PF. Schott.

RAIMONDI, PIETRO, an Italian composer, Maestro di Capella at St. Peter's, who is characterised by Fétis as possessing an extraordinary genius for musical combination. He was born at Rome of poor parents, Dec. 20, 1786. At an early age he passed six years in the Conservatorio of the Pietà de' Turchini at Naples, and after many wanderings, mostly on foot—from Naples to Rome, from Rome to Florence, from Florence to Genoa—and many years, he at length found an opportunity of coming before the public with an opera entitled 'Le Bizarrie d'Amore,' which was performed at Genoa in 1807. After three years there, each producing its opera, he passed a twelvemonth at Florence, and brought out two more. The next 25 years were spent between Rome, Milan, Naples, and Sicily, and each year had its full complement of operas and ballets. In 1824 he became director of the royal theatres at Naples, a position which he retained till 1832. In that year the brilliant success of his opera buffa 'Il Ventaglio' (Naples, 1831) procured him the post of Professor of Composition in the Conservatorio at Palermo. Here he was much esteemed, and trained several promising pupils. In March 1850 he was called upon to succeed Basili as Maestro di Capella at St. Peter's; a post for which, if knowledge, experience, and ceaseless labour of production in all departments of his art could qualify him, he was amply fitted. Shortly before this, in 1848, he had after four years of toil completed three oratorios, 'Potiphar,' 'Pharaoh,' and 'Jacob,' which were not only designed to be performed in the usual manner, but to be played all three in combination as one work, under the name of 'Joseph.' On Aug. 7, 1852, the new Maestro brought out this stupendous work at the Teatro Argentini. The success of the three single oratorios was moderate, but when they were united—the three orchestras and the three troupes forming an *ensemble* of nearly 400 musicians, the excitement and applause of the spectators knew no bounds, and so great was his emotion that Raimondi fainted away. He did not long survive this triumph, but died at Rome Oct. 30, 1853.

The list of his works is astonishing, and all the more so when we recollect that Raimondi's existence was all but unknown on this side of the Alps. It embraces 55 operas; 21 grand ballets, composed for San Carlo between 1812 and 1828; 7 oratorios; 4 masses with full orchestra; 2 ditto with 2 choirs à capella; 2 requiems with full orchestra; 1 ditto for 8 and 16 voices; a Credo for 16 voices; the whole Book of Psalms, à la Palestrina, for 4, 5, 6, 7 and 8 voices; many Te Deums, Stabats, Misereres, Tantum ergos, psalms and litanies; two books of 90 *partimenti*, each on a separate bass, with three different accompaniments; a collection of figured basses with fugued accompaniments as a school of accompaniment; 4 fugues for 4 voices, each independent but capable of being united and sung together; 6 fugues for 4 voices capable of combination into 1 fugue for 24 voices; a fugue for 16 choirs; 16 fugues for 4 voices; 24 fugues for 4, 5, 6, 7 and 8 voices, of which 4 and 5 separate fugues will combine into one. Besides the above feat with the 3 oratorios he composed an opera seria and an opera buffa which went equally well separately and in combination. Such stupendous labours are, as M. Fétis well remarks, enough to give the reader the headache: what must they have done to the persevering artist who accomplished them? But they also give one the heartache at the thought of their utter futility. Raimondi's compositions, with all their ingenuity, belong to a past age, and we may safely say that they will never be revived. His operas especially belong to the præ-Rossinian epoch, and it would have been good for them if they had never been made. [G.]

RAINFORTH, ELIZABETH, born Nov. 23, 1814, studied singing under George Perry and T. Cooke, and acting under Mrs. Davison, the eminent comedian. After having fledged her wings at minor concerts, she appeared upon the stage at the St. James's Theatre, Oct. 27, 1836, as Mandane, in Arne's 'Artaxerxes,' with complete success. She performed there for the remainder of the season, and then removed to the English Opera House. Subsequently to her public appearance she took lessons from Crivelli. In 1837 she sang in oratorio at the Sacred Harmonic Society, and continued to do so for several years. She made the first of many appearances at the Philharmonic, March 18, 1839. In 1840 she was introduced at the Concert of Ancient Music, and in 1843 sang at the Birmingham Festival. After performing at Covent Garden from 1838 to 1843 she transferred her services to Drury Lane, where she made a great hit by her performance of Arline, in Balfe's 'Bohemian Girl,' on its production, Nov. 27, 1843. In 1844 she had a most successful season in Dublin. She was engaged as prima donna at the Worcester Festival of 1845. She continued to perform in the metropolis until about 1852, when she removed to Edinburgh, where she remained until about 1856. She then quitted public life, and in 1858 went to reside at Old Windsor, under the wing of her friend Miss Thackeray, and taught music in Windsor and its neighbourhood until her complete retirement in March 1871, when she removed to her father's at Bristol. Her voice was a high soprano, even and sweet in quality, but deficient in power, and she possessed great judgment and much dramatic feeling. Although her limited power prevented her from becoming a great singer, her attainments were such as enabled her to fill the first place with credit to herself, and satisfaction to her auditors. She died at Redland, Bristol, Sept. 22, 1877. [W.H.H.]

RALLENTANDO, RITARDANDO, RITENENTE, RITENUTO — 'Becoming slow again,' 'Slackening,' 'Holding back,' 'Held back.' The first two of these words are used quite indifferently to express a gradual diminution of the rate of speed in a composition, and although the last is commonly used in exactly the same way, it seems originally and in a strict sense to have

meant a uniform rate of slower time, so that the whole passage marked *ritenuto* would be taken at the same time, while each bar and each phrase in a passage marked *rallentando* would be a little slower than the one before it. That there exists a difference in their uses is conclusively proved by a passage in the Quartet op. 131 of Beethoven, where in the 7th movement (allegro) a phrase of three recurring minims, which is repeated in all five times, has the direction 'Espressivo, poco ritenuto' for its first three appearances, which are separated by two bars *a tempo*, and for the last two times has *ritardando*, which at length leads into the real *a tempo*, of which the former separating fragments were but a presage. This is one of the very rare instances of the use of the word *ritenuto* by Beethoven. The conclusion from it is confirmed by a passage in Chopin's Rondo, op. 16, consisting of the four bars which immediately precede the entry of the second subject. Here the first two bars consist of a fragment of a preceding figure which is repeated, so that both these bars are exactly the same; the last two bars however have a little chromatic cadence leading into the second subject. The direction over the first two bars is 'poco ritenuto' and over the last two 'rallentando,' by which we may be quite sure that the composer intended the repeated fragment to be played at the same speed in each bar, and the chromatic cadence to be slackened gradually.

Ritenente is used by Beethoven in the PF. Sonata, op. 110, about the middle of the first movement, and again in the Sonata, op. 111, in the first movement, in the seventh and fifteenth bars from the beginning of the *Allegro con brio*. It would seem that the same effect is intended as if 'ritenuto' were employed; in each case, the words 'meno mosso' might have been used. Beethoven prefers *Ritardando* to *Rallentando*, which latter is common only in his earlier works. [J.A.F.M.]

RAMANN, Lina, musical *litterateur* and educationist, was born at Mainstockheim, near Kitzingen, in Bavaria, June 24, 1833. Her turn for music and her determination to succeed were evident from a very early age. It was not, however, till her seventeenth year that she had any instruction in music. At that time her parents removed to Leipzig, and from 1850 to 1853 she there enjoyed the advantage of pianoforte lessons from the wife of Dr. F. Brendel, herself formerly a scholar of Field's. From this period she adopted the career of a teacher of music, and studied assiduously, though without help, for that end.

In 1858 she opened an institute in Glückstadt (Holstein) for the special training of music-mistresses, and maintained it till 1865, in which year she founded a more important establishment, the Music School at Nürnberg, in conjunction with Frau Ida Volkmann of Tilsit, and assisted by a staff of superior teachers, under Miss Ramann's own superintendence. With a view to the special object of her life she has published two works—'Die Musik als Gegenstand der Erziehung' (Leipzig, Merseburger, 1868), and 'Allgemeine Erzieh- und Unterrichts-lehre der Jugend' (Leipzig, H. Schmidt, 1869; 2nd ed. 1873), which were both received with favour by the German Press. Since 1860 Miss Ramann has been musical correspondent of the Hamburg 'Jahreszeiten.' A volume of her essays contributed to that paper has been collected and published, under the title of 'Aus der Gegenwart' (Nürnberg, Schmid, 1868). In the early part of 1880 she published a study of Liszt's 'Christus' (Leipzig, Kahnt), and later in the year the first volume of a Life of Liszt (1811–1840; Leipzig, Breitkopf & Härtel). This is an important work. It suffers somewhat from over-enthusiasm, but it is done with great care, minuteness, and intelligence, and has obviously profited largely by direct information from Liszt himself. Her cousin,

Bruno Ramann, was born about 1830 at Erfurt, and was brought up to commerce, but his desire and talent for music were so strong, that in 1857 or 58 he succeeded in getting rid of his business and put himself under Dr. F. Brendel and Riedel, for regular instruction. He then for five years studied under Hauptmann at Leipzig, and is now a resident teacher and composer at Dresden. His works have reached beyond op. 50, but they consist almost entirely of songs for one or more voices, and of small and apparently sentimental pieces for the pianoforte. He does not appear yet to have attempted any large composition. [G.]

RAMEAU, Jean Philippe, eminent composer, and writer on the theory of music, born at Dijon, Sept. 25, 1683, in the house now No. 5 Rue St. Michel. His father,[1] Jean, was a musician, and organist of Dijon cathedral, in easy circumstances. He intended Jean Philippe, the eldest of his three sons, to be a magistrate, but his strong vocation for music and obstinacy of character frustrated these views. According to his biographers he played the clavecin at seven, and read at sight any piece of music put before him: music indeed absorbed him to such an extent when at the Jesuit College that he neglected his classical studies, and was altogether so refractory that his parents were requested to remove him. Henceforth he never opened a book, unless it were a musical treatise. He quickly mastered the clavecin, and studied the organ and violin with success, but there was no master in Dijon capable of teaching him to write music, and he was left to discover for himself the laws of harmony and composition.

At the age of 17 he fell in love with a young widow in the neighbourhood, who indirectly did him good service, since the shame which he felt at the bad spelling of his letters drove him to write correctly. To break off this acquaintance his father sent him, in 1701, to Italy, where however he did not remain long, a mistake which, in after life, he regretted. He liked Milan, and indeed the attractions of so great a centre of music must have been great; but for some unknown reason he soon left with a theatrical manager whom he accompanied as first violin to Marseilles, Lyons, Nîmes, Montpellier, and

[1] His mother's name was Claudine Demartincourt.

other places in the south of France. How long the tour lasted it is impossible to ascertain, as no letters belonging to this period are to be found. From his 'Premier Livre de pièces de clavecin' (Paris, 1706) we learn that he was then living in Paris, at a wig-maker's in the Vieille Rue du Temple, as Haydn did at Keller's, though without the disastrous results which followed that connexion. Meantime he was organist of the Jesuit convent in the Rue St. Jacques, and of the chapel of the Pères de la Merci. No particulars, however, of the length of his stay in Paris are known, nor how he occupied the interval between this first visit and his return about 1717. In that year a competition took place for the post of organist of the church of St. Paul, and Rameau was among the candidates. Marchand, then at the head of the organists in Paris, was naturally one of the examiners; and either from fear of being outshone by one whom he had formerly patronised, or for some other reason, he used his whole influence in favour of Daquin, who obtained the post. Mortified at the unjust preference thus shown to a man in all points his inferior, Rameau again left Paris for Lille, and became for a short time organist of St. Etienne. Thence he went to Clermont in Auvergne, where his brother Claude[1] resigned the post of organist of the cathedral in his favour. In this secluded mountain town, with a harsh climate predisposing to indoor life, he had plenty of time for thought and study. The defects of his education drove him to find out everything for himself. From the works of Descartes, Mersenne, Zarlino, and Kircher he gained some general knowledge of the science of sound, and taking the equal division of the monochord as the starting-point of his system of harmony, soon conceived the possibility of placing the theory of music on a sound basis. Henceforth he devoted all his energies to drawing up his 'Treatise on Harmony reduced to its natural principles,' and as soon as that important work was finished he determined to go to Paris and publish it. His engagement with the chapter of Clermont had however several years to run, and there was great opposition to his leaving, owing to the popularity of his improvisations on the organ, in which, contrary to the usual course, his theoretical studies, instead of hampering his ideas, seemed to give them greater freshness and fertility.

Once free he started immediately for Paris, and brought out his 'Traité de l'Harmonie' (Ballard, 1722, 4to, 432 pp.).[2] The work did not at first attract much attention among French musicians, and yet, as Fétis observes, it laid the foundation for a philosophical science of harmony. Rameau's style is prolix and obscure, often calculated rather to repel than attract the reader, and the very boldness and novelty of his theories excited surprise and provoked criticism. His discovery of the law of inversion in chords was a stroke of genius, and led to very important results, although in founding his system of harmony on the sounds of the common chord, with the addition of thirds above or thirds below, he put both himself and others on a wrong track. In the application of his principle to all the chords he found himself compelled to give up all idea of tonality, since, on the principles of tonality he could not make the thirds for the discords fall on the notes that his system required. Fétis justly accuses him of having abandoned the tonal successions and resolutions prescribed in the old treatises on harmony, accompaniment, and composition, and the rules for connecting the chords based on the ear, for a fixed order of generation, attractive from its apparent regularity, but with the serious inconvenience of leaving each chord disconnected from the rest.

Having rejected the received rules for the succession and resolution of chords which were contrary to his system, Rameau perceived the necessity of formulating new ones, and drew up a method for composing a fundamental bass for every species of music. The principles he laid down for forming a bass different from the real bass of the music, and for verifying the right use of the chords, are arbitrary, insufficient in a large number of cases, and, as regards many of the successions, contrary to the judgment of the ear. Finally, he did not perceive that by using the chord of the 6–5–3 both as a fundamental chord and an inversion he destroyed his whole system, as in the former case it is impossible to derive it from the third above or below.[3] After more study, however, particularly on the subject of harmonics, Rameau gave up many of his earlier notions, and corrected some of his most essential mistakes. The development and modification of his ideas may be seen by consulting his works, of which the following is a list:—'Nouveau système de musique théorique . . . pour servir d'Introduction au traité d'Harmonie' (1726, 4to); 'Génération harmonique' etc. (1713, 8vo); 'Démonstration du principe de l'harmonie' (1750, 8vo); 'Nouvelles réflexions sur la démonstration du principe de l'harmonie' (1752, 8vo); 'Extrait d'une réponse de M. Rameau à M. Euler sur l'identité des octaves,' etc. (1753, 8vo)—all published in Paris. To these specific works, all dealing with the science of harmony, should be added the 'Dissertation sur les différentes méthodes d'accompagnement pour le clavecin ou pour l'orgue' (Paris, Boivin, 1732, 4to), and some articles which appeared in the 'Mercure de France,' and in the 'Mémoires de Trévoux.'

The mere titles of these works are a proof of the research and invention which Rameau brought to bear on the theory of music; but what was

[1] Claude Rameau, a man of indomitable will and capricious temper, and a clever organist, lived successively at Dijon, Lyons, Marseilles, Clermont, Orléans, Strassburg, and Autun. His son Jean François, a gifted musician, but a dissipated man, is admirably portrayed by Diderot in his 'Neveu de Rameau.' He published in 1766 a poem in 5 cantos called 'Le Raméide,' followed in the same year by 'La nouvelle Raméïde,' a parody by his schoolfellow Jacques Cazotte. He is mentioned by Mercier in his 'Tableau de Paris.'

[2] The Third Part of this was translated into English 15 years later, with the title 'A Treatise of Music, containing the Principles of Composition.' London, no date, 8vo, 180 pp.

[3] Fétis has explained, detailed, and refuted Rameau's system in his 'Esquisse de l'Histoire de l'Harmonie,' which has been used by the writer, and to which he refers his readers.

most remarkable in his case is that he succeeded in lines which are generally opposed to each other, and throughout life occupied the first rank not only as a theorist, but as a player and composer. Just when his 'Traité de l'Harmonie' was beginning to attract attention he arranged to make music for the little pieces which his fellow-countryman, Alexis Piron, was writing for the Théâtre de la Foire, and accordingly, on Feb. 3, 1723, they produced 'L'Endriague,' in 3 acts, with dances, divertissements, and grand airs, as stated in the title. In Jan. 1724 he obtained the privilege of publishing his cantatas, and various instrumental compositions, amongst others his 'Pièces de clavecin, avec une Méthode pour la mécanique des doigts,' etc., republished as 'Pièces de Clavecin, avec une table pour les agréments'[1] (Paris, 1731 and 1736, oblong folio).

As the favourite music-master among ladies of rank, and organist of the church of Ste. Croix de la Bretonnerie, Rameau's position and prospects now warranted his taking a wife, and on Feb. 25, 1726, he was united to Marie Louise Mangot, a good musician with a pretty voice. The disparity of their ages was considerable, the bride being only 18, but her loving and gentle disposition made the marriage a very happy one.

A few days later, on Feb. 29, Rameau produced at the Théâtre de la Foire a 1-act piece called L'Enrôlement d'Arlequin,' followed in the autumn by 'Le faux Prodigue,' 2 acts, both written by Piron. Such small comic pieces as these were obviously composed, by a man of his age and attainments (he was now 42), solely with the view of gaining access to a stage of higher rank, but there was no hope of admission to the theatre of the Académie without a good libretto, and this it was as difficult for a beginner to obtain then as it is now. There is a remarkable letter still extant from Rameau to Houdar de Lamotte, dated Oct. 1727, asking him for a lyric tragedy, and assuring him that he was no novice, but one who had mastered the 'art of concealing his art.' The blind poet refused his request, but aid came from another quarter. La Popelinière, the *fermier général*, musician, poet, and artist, whose houses in Paris and at Passy were frequented by the most celebrated artists French and foreign, had chosen Rameau as his clavecinist and conductor of the music at his fêtes, and before long placed at his disposal the organ in his chapel, his orchestra, and his theatre. He did more, for through his influence Rameau obtained from Voltaire the lyric tragedy of 'Samson,' which he promptly set to music, though the performance was prohibited on the eve of its representation at the Académie—an exceptional stroke of ill-fortune. At last the Abbé Pellegrin agreed to furnish him with an opera in 5 acts, 'Hippolyte et Aricie,' founded on Racine's 'Phèdre.' He compelled Rameau to sign a bill for 500 livres as security in case the opera failed, but showed more sagacity and more heart than might have been expected from one

> Qui dînait de l'autel et soupait du théâtre,
> Le matin catholique et le soir idolâtre,[2]—

for he was so delighted with the music on its first performance at La Popelinière's, that he tore up the bill at the end of the first act. The world in general was less enthusiastic, and after having overcome the ill-will or stupidity of the performers, Rameau had to encounter the astonishment of the crowd, the prejudices of routine, and the jealousy of his brother artists. Campra alone recognised his genius, and it is to his honour that when questioned by the Prince de Conti on the subject, he replied, 'There is stuff enough in Hippolyte et Aricie for ten operas; this man will eclipse us all.'

The opera was produced at the Académie on Oct. 1, 1733. Rameau was then turned 50 years of age, and the outcry with which his work was greeted suggested to him that he had possibly mistaken his career; for a time he contemplated retiring from the theatre, but was reassured by seeing his hearers gradually accustoming themselves to the novelties which at first shocked them. The success of 'Les Indes galantes' (Aug. 23, 1735), of 'Castor et Pollux,' his masterpiece (Oct. 24, 1737), and of 'Les Fêtes d'Hébé' (May 21, 1739), however, neither disarmed his critics, nor prevented Rousseau from making himself the mouthpiece of those who cried up Lully at the expense of the new composer. But Rameau was too well aware of the cost of success to be hurt by epigrams, especially when he found that he could count both on the applause of the multitude, and the genuine appreciation of the more enlightened.

His industry was immense, as the following list of his operas and ballets produced at the Académie in 20 years will show:—

Dardanus, 5 acts and prologue (Nov. 19, 1739).
Les Fêtes de Polymnie, 3 acts and prologue (Oct. 12, 1745).
Le Temple de la Gloire, Fête, in 3 acts and prologue (Dec. 7, 1745).
Zaïs, 4 acts and prologue (Feb. 29, 1748).
Pygmalion, 1 act (Aug. 27, 1748).
Les Fêtes de l'Hymen et de l'Amour, 3 acts and prologue (Nov. 5, 1748).
Platée, 3 acts and prologue (Feb. 4, 1749).
Naïs, 3 acts and prologue (April 22, 1749).
Zoroastre, 5 acts (Dec. 5, 1749).
La Guirlande, ou les Fleurs enchantées, 1 act (Sept. 21, 1751).
Acanthe et Céphise, 3 acts (Nov. 18, 1751).
Les Surprises de l'Amour, 3 acts (May 31, 1757).
Les Paladins, 3 acts (Feb. 12, 1760).

Besides these, Rameau found time to write divertissements for 'Les Courses de Tempé,' a Pastoral (Théâtre Français, Aug. 1734), and 'La Rose' (Théâtre de la Foire, March, 1744), both by Piron. From 1740 to 1745 the director of the Opéra gave him no employment, and in this interval he published his 'Nouvelles Suites de Pièces de clavecin' and his 'Pièces de clavecin en concerts avec un violon ou une flûte' (1741), remarkable compositions which have been reprinted by Mme. Farrenc ('Le Trésor des Pianistes') and M. Poisot. He also accepted the post of conductor of the Opéra-Comique, of which Monnet[3] was

[1] Both Fétis and Pougin have fallen into the mistake of considering this a separate work.

[2] Who dined at the altar and supped at the theatre; Catholic in the morning, and Idolater at night.

[3] See Monnet's 'Supplément au Roman comique,' 51. This fact seems to have escaped all Rameau's biographers.

manager, probably in the hope of attracting public attention, and forcing the management of the Académie to alter their treatment of him. Finally he composed for the Court 'Lysis et Délie,' 'Daphnis et Eglé,' 'Les Sybarites' (Oct. and Nov. 1753); 'La Naissance d'Osiris,' and 'Anacréon' (Oct. 1754), all given at Fontainebleau. Some years previously, on the occasion of the marriage of the Dauphin with the Infanta, he had composed 'La Princesse de Navarre' to a libretto of Voltaire's (3 acts and prologue, performed with great splendour at Versailles, Feb. 23, 1745). This was the most successful of all his *opéras de circonstance*, and the authors adapted from it 'Les Fêtes de Ramire' a 1-act opera-ballet, also performed at Versailles (Dec. 22, 1745).

In estimating Rameau's merits we cannot in justice compare him with the great Italian and German masters of the day, whose names and works were then equally unknown in France; we must measure him with contemporary French composers for the stage. These writers had no idea of art beyond attempting a servile copy of Lully, with overtures, recitatives, vocal pieces, and ballet airs, all cast in one stereotyped form. Rameau made use of such a variety of means as not only attracted the attention of his hearers, but retained it. For the placid and monotonous harmonies of the day, the trite modulation, insignificant accompaniments, and stereotyped ritornelles, he substituted new forms, varied and piquant rhythms, ingenious harmonies, bold modulations, and a richer and more effective orchestration. He even ventured on enharmonic changes, and instead of the time-honoured accompaniments with the strings in 5 parts, and flutes and oboes in 2, and with *tuttis* in which the wind simply doubled the strings, he gave each instrument a distinct part of its own, and thus imparted life and colour to the whole. Without interrupting the other instruments, he introduced interesting and unexpected passages on the flutes, oboes, and bassoons, and thus opened a path which has been followed up with ever-increasing success. He also gave importance to the orchestral pieces, introducing his operas with a well-constructed overture, instead of the meagre introduction of the period, in which the same phrases were repeated *ad nauseam*. Nor did he neglect the chorus; he developed it, added greatly to its musical interest, and introduced the syllabic style with considerable effect. Lastly, his ballet-music was so new in its rhythms, and so fresh and pleasing in melody, that it was at once adopted and copied in the theatres of Italy and Germany.

We have said enough to prove that Rameau was a composer of real invention and originality. His declamation was not always so just as that of Lully; his airs have not the same grace, and are occasionally marred by eccentricity and harshness, and disfigured by roulades in doubtful taste; but when inspired by his subject Rameau found appropriate expression for all sentiments, whether simple or pathetic, passionate, dramatic, or heroic. His best operas contain beauties which defy the caprices of fashion, and will command the respect of true artists for all time.

But if his music was so good, how is it that it never attained the same popularity as that of Lully? In the first place, he took the wrong line on a most important point; and in the second, he was less favoured by circumstances than his predecessor. It was his doctrine, that for a musician of genius all subjects are equally good, and hence he contented himself with uninteresting fables written in wretched style, instead of taking pains, as Lully did, to secure pieces constructed with skill and well versified. He used to say that he could set the 'Gazette de Hollande' to music. Thus he damaged his own fame, for a French audience will not listen even to good music unless it is founded on an interesting drama. His ballet-music, too, often only serves to retard the action of the piece and destroy its dramatic interest.

Much as Rameau would have gained by the cooperation of another Quinault, instead of having to employ Cahusac, there was another reason for the greater popularity of Lully. Under Louis XIV. the king's patronage was quite sufficient to ensure the success of an artist; but after the Regency, under Louis XV., other authorities asserted themselves, especially the 'philosophes.' Rameau had first to encounter the vehement opposition of the Lullists; this he had succeeded in overcoming, when a company of Italian singers arrived in Paris, and at once obtained the attention of the public, and the support of a powerful party. The partisans of French music rallied round Rameau, and the two factions carried on what is known as the 'Guerre des Bouffons,' but when the struggle was over, Rameau perceived that his victory was only an ephemeral one, and that his works would not maintain their position in the *répertoire* of the Académie beyond a few years. With a frankness very touching in a man of his gifts, he said one evening to the Abbé Arnaud, who had lately arrived in Paris, 'If I were 20 years younger I would go to Italy, and take Pergolesi for my model, abandon something of my harmony, and devote myself to attaining truth of declamation, which should be the sole guide of musicians. But after sixty one cannot change; experience points plainly enough the best course, but the mind refuses to obey.' No critic could have stated the truth more plainly. Not having heard Italian music in his youth, Rameau never attained to the skill in writing for the voice that he might have done; and he is in consequence only the first French musician of his time, instead of taking his rank among the great composers of European fame. But for this, he might have effected that revolution in dramatic music which Gluck accomplished some years later.

But even as it was, his life's work is one of which any man might have been proud; and in old age he enjoyed privileges accorded only to talent of the first rank. The directors of the Opéra decreed him a pension; his appearance in his box was the signal for a general burst of applause,

and at the last performance of 'Dardanus' (Nov. 9, 1760) he received a perfect ovation from the audience. At Dijon the Académie elected him a member in 1761, and the authorities exempted himself and his family for ever from the municipal taxes. The king had named him composer of his chamber music in 1745; his patent of nobility was registered, and he was on the point of receiving the order of St. Michel, when, already suffering from the infirmities of age, he took typhoid fever, and died Sept. 12, 1764. All France mourned for him; Paris gave him a magnificent funeral, and in many other towns funeral services were held in his honour. Such marks of esteem are accorded only to the monarchs of art.

Having spoken of Rameau as a theorist and composer, we will now say a word about him as a man. If we are to believe Grimm and Diderot, he was hard, churlish, and cruel, avaricious to a degree, and the most ferocious of egotists. The evidence of these writers is however suspicious; both disliked French music, and Diderot, as the friend and *collaborateur* of d'Alembert, would naturally be opposed to the man who had had the audacity to declare war against the Encyclopedists.[1] It is right to say that, though he drew a vigorous and scathing portrait of the composer, he did not publish it.[2] As to the charge of avarice, Rameau may have been fond of money, but he supported his sister Catherine[3] during an illness of many years, and assisted more than one of his brother artists—such as Dauvergne, and the organist Balbâtre. He was a vehement controversialist, and those whom he had offended would naturally say hard things of him. He was scrupulous in the use of his time, and detested interruptions; at the rehearsals of his operas he would sit by himself in the middle of the pit, and allow no one to speak to him; in the street he would walk straight on, and if a friend stopped him, he seemed to awake as if from a trance. Tall, and thin almost to emaciation, his sharply-marked features indicated great strength of character, while his eyes burned with the fire of genius. There was a decided resemblance between him and Voltaire, and painters have often placed their likenesses side by side. Amongst the best portraits of Rameau may be specified those of Benoist (after Restout), Caffieri, Masquelier, and Carmontelle (full length). In the fine oil-painting by Chardin in the Museum of Dijon, he is represented seated, with his fingers on the strings of his violin, the instrument he generally used in composing. The bust which stood in the *foyer* of the Opéra was destroyed when the theatre was burnt down in 1781; that in the library of the Conservatoire is by Destreez (1865). A bronze statue by Guillaume was erected at Dijon in 1880. The fine medal of him given to the winners of the *grand prix de Rome* was engraved by Gatteaux.

There are many biographies of Rameau; the most valuable are, among the older, Chabanon's 'Eloge' (1764); Maret's 'Eloge historique' (1766); and the very curious details contained in De Croix's 'L'Ami des Arts' (1776); among the more modern, the notices of Adolphe Adam, Fétis, Poisot (1864), and Pougin (1876).

Rameau had one son and two daughters, none of them musicians. He left in MS. 4 cantatas, 3 motets with chorus, and fragments of an opera 'Roland,' all which are now in the Bibliothèque Nationale in the Rue Richelieu. None of his organ pieces have survived; and some cantatas mentioned by the earlier biographers, besides two lyric tragedies 'Abaris' and 'Linus,' and a comic opera, 'Le Procureur dupé,' are lost; but they would have added nothing to his fame.

Some of his harpsichord pieces have been published in the 'Trésor des Pianistes'; in the 'Alte Klaviermusik' of Pauer (Ser. 2, pt. 5) and of Roitsch; also in Pauer's 'Alte Meister,' and in the 'Perles Musicales' (51, 52). [G.C.]

RAMM, Friedrich, eminent oboe-player, born Nov. 18, 1744, in Mannheim. He was a member of the Elector's celebrated band under Cannabich, first in Mannheim, and then in Munich, whither the court removed, and where he celebrated his fiftieth year of service in 1808. His tone was particularly pure and true, with great roundness, softness, and power in the lower notes; and he was also a master of the legato style. 'Ramm is a downright good fellow,' writes Mozart, 'amusing and honourable too; he plays finely, with a pretty delicate tone.' Mozart sent him the oboe-concerto (Köchel, 293) composed for Ferlendi (which became his cheval de bataille), and when in Paris composed a symphonie concertante for Wendling, Ramm, Punto, and Ritter, to be played at the Concerts Spirituels. It was however never performed, and all trace of it is lost (Jahn, i. 476).

Ramm played in London at the Professional Concerts in 1784. In Vienna he gave a concert at the Kärnthnerthor Theatre in 1787, and played three times at the concerts of the Tonkünstler-Societät between the years 1776 and 81.

He was in Vienna again, after April 1797, and assisted to accompany Beethoven at a performance of his PF. Quintet, op. 16. At one of the pauses of the Finale Beethoven went off into a long improvisation, and it was, says Ries,[4] most amusing to see the players putting up their instruments to their lips as they thought that Beethoven was approaching the reprise of the theme, and as regularly putting them down in disappointment as he modulated off in another direction. Ramm was especially annoyed. [C.F.P.]

[1] Rameau was asked to correct the articles on music for the Encyclopédie, but the MSS. were not submitted to him. He published in consequence: 'Erreurs sur la musique dans l'Encyclopédie' (1755); 'Suite des Erreurs etc.' (1756); 'Réponse de M. Rameau à MM. les éditeurs de l'Encyclopédie sur leur Avertissement' (1757); 'Lettre de M. d'Alembert à M. Rameau, concernant le corps sonore, avec la réponse de M. Rameau' (undated, but apparently 1759)—all printed in Paris.

[2] We refer to Diderot's violent satire on the morals and philosophic tendencies of the 18th century, entitled 'Le Neveu de Rameau.' It is a curious fact that this brilliantly written dialogue was only known in France through a re-translation of Goethe's German version. The first French edition, by Saur, appeared in Paris only in 1821.

[3] A good player on the clavecin; she lived in Dijon, and died there 1762.

[4] Biogr. Notizen, p. 80. The beginning of this anecdote—Am nämlichen Abend—on the same evening—would seem to show that Ries's recollections are not printed in the order in which he wrote them.

RAMSEY, Robert, organist of Trinity College, Cambridge, from 1628 to 1644 inclusive, and 'Magister Choristarum' from 1637 to 1644 inclusive; but whether before or after those dates is not certain in either case. He took the degree of Mus. Bac. at Cambridge about 1639. A Morning and Evening Service in F by him is contained in the Tudway Collection (Harl. MS. 7340) and in the Ely Library, where, and at Peterhouse College, Cambridge, there are also two anthems of his. Add. MS. 11,608 in the British Museum also contains a dialogue between Saul, the witch, and Samuel—'In guiltie night.' Tudway miscalls him John. [G.]

RANDALL, John, Mus. Doc., born 1715, was a chorister of the Chapel Royal under Bernard Gates. He was one of the boys who shared in the representation of Handel's 'Esther' at Gates's house, Feb. 23, 1732, he himself taking the part of Esther. He graduated as Mus. Bac. at Cambridge in 1744, his exercise being an anthem. About 1745 he was appointed organist of King's College, and on the death of Dr. Greene in 1755 was elected Professor of Music at Cambridge. In 1756 he proceeded Mus. Doc. He composed the music for Gray's Ode for the Installation of the Duke of Grafton as Chancellor of the University in 1768, and some church music. He died March 18, 1799. His name is preserved in England by his two Double Chants. [W.H.H.]

RANDALL, Richard, a tenor singer, born Sept. 1, 1736, whose life is sufficiently described in the inscription to his portrait, published May 1812 :—'This celebrated tenor singer so remarkable for his great strength of voice and unrivalled comic humour was born Sep^{br} 1st 1736 and educated under M^{r} Bern^{d} Gates in the Chapel Royal where he was early noticed and became a great favourite of his late Majesty George the second, by whose command he sung many Solo Anthems, he is the only remaining chorister who sung with M. Handel in his Oratorios, and whose compositions he still performs with most wonderfull effect at the age of 76.'

Randall died April 15, 1828, aged 92. In his last days he was an object of much curiosity as having known Handel, regarding whom he told several anecdotes. [G.]

RANDALL, William, an eminent publisher of music. [See Walsh, John.]

RANDALL. The name of Randall is attached to an anthem for 6 voices in the British Museum, Add. MS. 17,792, probably dating from the beginning of the 18th century. [G.]

RANDEGGER, Alberto, composer, conductor, and singing-master, was born at Trieste, April 13, 1832. He began the study of music at the age of 13, under Lafont for the PF., and L. Ricci for composition, soon began to write, and by the year 1852 was known as the composer of several masses and smaller pieces of Church music, and of two ballets—'La Fidanzata di Castellamare' and 'La Sposa d'Appenzello,' both produced at the Teatro grande of his native town. In the latter year he joined three other of Ricci's pupils in the composition of a buffo opera to a libretto by Gaetano Rossi, entitled 'Il Lazzarone,' which had much success, first at the Teatro Maurona at Trieste, and then elsewhere. The next two years were occupied as musical director of theatres at Fiume, Zera, Sinigaglia, Brescia, and Venice. In the winter of 1854 he brought out a tragic opera in 4 acts called 'Bianca Capello' at the chief theatre of Brescia. At this time Signor Randegger was induced to come to London. He gradually took a high position there, and has become widely known as a teacher of singing, conductor, and composer, and an enthusiastic lover of good music of whatever school or country. He has resided in England ever since, and is one of the most prominent musical figures in the metropolis. In 1864 he produced at the Theatre Royal, Leeds, 'The Rival Beauties,' a comic operetta in 2 acts, which has had much success in London and many other places. In 1868 he became Professor of Singing at the Royal Academy of Music, and has since been made a director of that institution and a member of the Committee of Management. In the autumn of 1857 he conducted a series of Italian operas at St. James's Theatre, and in 1879–80 the Carl Rosa company at Her Majesty's Theatre. He has recently been appointed conductor of the Norwich Festival *vice* Sir Julius Benedict resigned.

Mr. Randegger's published works are numerous and important. They comprise a large dramatic cantata (words by Mad. Rudersdorff), entitled 'Fridolin,' composed for the Birmingham Festival, and produced there with great success, Aug. 28, 1873 (Chappell); two soprano scenas—'Medea,' sung by Mad. Rudersdorff at the Gewandhaus, Leipzig, in 1869, and 'Saffo,' sung by Mad. Lemmens at the British Orchestral Society, March 31, 1875; the 150th Psalm, for soprano solo, chorus, orchestra and organ, for the Boston Festival, 1872; Funeral Anthem for the death of the Prince Consort, twice performed in London; and a large number of songs and concerted vocal music for voice and orchestra or PF. He is also the author of the Primer of Singing, in Dr. Stainer's series (Novello). As a teacher of singing Mr. Randegger has a large number of pupils now before the English public as popular singers. [G.]

RANDHARTINGER, Benedict, an Austrian musician, memorable for his connexion with Schubert. He was born at Ruprechtshofen, in Lower Austria, July 27, 1802; at 10 years old came to the Konvict school at Vienna, and was then a pupil of Salieri's. He afterwards studied for the law, and for ten years was Secretary to Count Széchényi, an official about the Court. But he forsook this line of life for music; in 1832 entered the Court Chapel as a tenor singer; in 1844 became Vice-Court-Capellmeister, and in 1862, after Assmayer's death, entered on the full enjoyment of that dignity. His compositions are more than 600 in number, comprising an opera, 'König Enzio'; 20 masses; 60 motets; symphonies; quartets, etc.; 400 songs, 76 4-part songs, etc. Of all these, 124, chiefly songs,

are published; also a vol. of Greek national songs, and a vol. of Greek liturgies. His acquaintance with Schubert probably began at the Konvict, and at Salieri's; though as he was Schubert's junior by five years, they can have been there together only for a short time; but there are many slight traces of the existence of a close friendship between them. He was present, for example, at the first trial of the D minor String Quartet (Jan. 29, 1826), and he was one of the very few friends—if not the only one—who visited Schubert in the terrible loneliness of his last illness. But for Randhartinger it is almost certain that Schubert's 'Schöne Müllerin' would never have existed. He was called out of his room while Schubert was paying him a visit, and on his return found that his friend had disappeared with a volume of W. Müller's poems which he had accidentally looked into while waiting, and had been so much interested in as to carry off. On his going the next day to reclaim the book, Schubert presented him with some of the now well-known songs, which he had composed during the night. This was in 1823. It is surely enough to entitle Randhartinger to a perpetual memory.

He had a brother JOSEF, of whom nothing is known beyond this—that he was probably one of the immediate *entourage* of Beethoven's coffin at the funeral. He, Lachner, and Schubert are said to have gone together as torch-bearers (Kreissle von Hellborn's 'Schubert,' p. 266). [G.]

RANELAGH HOUSE AND GARDENS were situated on the bank of the Thames, eastward of Chelsea Hospital. They were erected and laid out about 1690 by Richard Jones, Viscount (afterwards Earl of) Ranelagh, who resided there until his death in 1712. In 1733 the property was sold in lots, and eventually the house and part of the gardens came into the hands of a number of persons who converted them into a place of public entertainment. In 1741 they commenced the erection of a spacious Rotunda (185 feet external, and 150 feet internal diameter), with four entrances through porticos. Surrounding it was an arcade, and over that a covered gallery, above which were the windows, 60 in number. In the centre of the interior and supporting the roof was a square erection containing the orchestra, as well as fireplaces of peculiar construction for warming the building in winter. Forty-seven boxes, each to contain eight persons, were placed round the building, and in these the company partook of tea and coffee. In the garden was a Chinese building, and a canal upon which the visitors were rowed about in boats. Ranelagh was opened with a public breakfast, April 5, 1742. The admission was 2*s.* including breakfast. On May 24 following it was opened for evening concerts; Beard was the principal singer, Festing the leader, and the choruses were chiefly from oratorios. Twice a week ridottos were given, the tickets for which were £1 1*s.* each, including supper. Masquerades were shortly afterwards introduced, and the place soon became the favourite resort of the world of fashion. Ranelagh was afterwards opened about the end of February for breakfasts, and on Easter Monday for the evening entertainments. On April 10, 1746, a new organ by Byfield was opened at a public morning rehearsal of the music for the season, and Parry, the celebrated Welsh harper, appeared. In 1749, in honour of the Peace of Aix-la-Chapelle, an entertainment called 'A Jubilee Masquerade in the Venetian manner,' was given, of which Horace Walpole, in a letter to Sir Horace Mann, dated May 3, 1749, gave the following lively description:—

'It had nothing Venetian about it, but was by far the best understood and the prettiest spectacle I ever saw; nothing in a fairy tale ever surpassed it. . . . It began at three o'clock, and about five, people of fashion began to go. When you entered you found the whole garden filled with masks and spread with tents, which remained all night very commodely. In one quarter was a Maypole dressed with garlands, and people dancing round it to a tabor and pipe and rustic music, all masqued, as were all the various bands of music that were disposed in different parts of the garden, some like huntsmen with French-horns, some like peasants, and a troop of Harlequins and Scaramouches in the little open temple on the mount. On the canal was a sort of gondola adorned with flags and streamers, and filled with music, rowing about. All round the outside of the amphitheatre were shops, filled with Dresden china, Japan, etc., and all the shopkeepers in mask. The amphitheatre was illuminated; and in the middle was a circular bower, composed of all kinds of firs in tubs from twenty to thirty feet high; under them orange trees with small lamps in each orange, and below them all sorts of the finest auriculas in pots; and festoons of natural flowers hanging from tree to tree. Between the arches, too, were firs, and smaller ones in the balconies above. There were booths for tea and wine, gaming-tables and dancing, and about two thousand persons. In short it pleased me more than anything I ever saw. It is to be once more, and probably finer as to dresses, as there has since been a subscription masquerade, and people will go in their rich habits.'

This proved so attractive that it was repeated several times in that and succeeding years, until the suppression of such entertainments after the earthquake at Lisbon in 1755. In 1751 morning concerts were given twice a week, Signora Frasi and Beard being the singers. At that date it had lost none of its charm. 'You cannot conceive,' says Mrs. Ellison, in Fielding's 'Amelia,' 'what a sweet elegant delicious place it is. Paradise itself can hardly be equal to it.' In 1754 an entertainment of singing, recitation, etc. was given under the name of 'Comus's Court,' which was very successful. In 1755 a pastoral, the words from Shakspere, the music by Arne, was produced; Beard and Miss Young were the singers; Handel's 'L'Allegro ed Il Pensieroso' was introduced on Beard's benefit night, and Stanley was the organist. In 1759 Bonnell Thornton's burlesque Ode on St. Cecilia's day was performed with great success. In 1762 Tenducci was the principal male singer. In 1764 a new orchestra was erected in one of the porticos of the Rotunda, the original one being found inconvenient from its height. On June 29, 1764, Mozart, then eight years old, performed on the harpsichord and organ several pieces of his own composition for the benefit of a charity. In 1770 Burney was the organist. Fireworks were occasionally exhibited, when the price of admission was raised to 5*s.* In 1777 the fashionable world played one of its strange, unreasoning freaks at Ranelagh. Walpole wrote on June 18:—'It is the fashion now to go to Ranelagh two hours after it is over. You may not believe this, but it

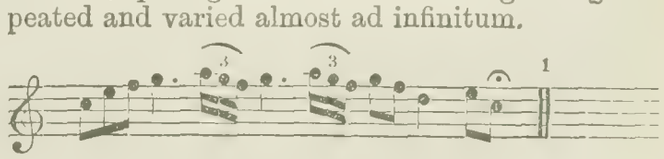
is literal. The music ends at ten, the company go at twelve.' This practice caused the concert to be commenced at a later hour than before. In 1790 a representation of Mount Ætna in eruption, with the Cyclops at work in the centre of the mountain, and the lava pouring down its side, was exhibited. The mountain was 80 feet high. In 1793 the Chevalier d'Eon fenced in public with a French professor, and about the same time regattas on the Thames in connection with the place were established. In 1802 the Installation Ball of the Knights of the Bath was given at Ranelagh, and also a magnificent entertainment by the Spanish Ambassador. These were the last occurrences of any importance; the fortunes of the place had long been languishing, and it opened for the last time July 8, 1803. On Sept. 30, 1805, the proprietors gave directions for taking down the house and rotunda; the furniture was soon after sold by auction, and the buildings removed. The organ was placed in Tetbury Church, Gloucestershire. No traces of Ranelagh remain: the site now forms part of Chelsea Hospital garden. [W.H.H.]

RANK. A rank of organ-pipes is one complete series or set, of the same quality of tone and kind of construction from the largest to the smallest, controlled by one draw-stop, acting on one slider. If the combined movement of draw-stop and slider admits air to two or more such series of pipes, an organ-stop is said to be of two or more ranks, as the case may be. Occasionally the twelfth and fifteenth, or fifteenth and twenty-second, are thus united, forming a stop of two ranks; but, as a rule, only those stops whose tones are reinforcements of some of the higher upper-partials of the ground-tone are made to consist of several ranks, such as the Sesquialtera, Mixture, Furniture, etc. These stops have usually from three to five ranks each, reinforcing (according to their special disposition) the ground-tone by the addition of its 17th, 19th, 22nd, 24th, 26th, 29th,—that is, of its 3rd, 5th, and 8th in the third and fourth octave above. [See SESQUIALTERA.] [J.S.]

RANSFORD, EDWIN, baritone vocalist, song-writer, and composer, born March 13, 1805, at Bourton-on-the-Water, Gloucestershire, died in London July 11, 1876. He first appeared on the stage as an 'extra' in the opera chorus at the King's Theatre, Haymarket, and was afterwards engaged in that of Covent Garden Theatre. During Mr. Charles Kemble's management of that theatre he made his first appearance as Don Cæsar in 'The Castle of Andalusia,' on May 27, 1829, and was engaged soon afterwards by Mr. Arnold for the English Opera House (now the Lyceum). In the autumn of 1829, and in 1830, he was at Covent Garden. In 1831 he played leading characters under Elliston at the Surrey Theatre, and became a general favourite. In 1832 he was with Joe Grimaldi at Sadler's Wells, playing Tom Truck, in Campbell's nautical drama 'The Battle of Trafalgar,' in which he made a great hit with Neukomm's song of 'The Sea.' At this theatre he sustained the part of Captain Cannonade in Barnett's opera 'The Pet of the Petticoats.' He afterwards fulfilled important engagements at Drury Lane, the Lyceum, and Covent Garden. At Covent Garden he played the Doge of Venice in 'Othello,' March 25, 1833, when Edmund Kean last appeared on the stage, and Sir Harry in 'The School for Scandal' on Charles Kemble's last appearance as Charles Surface. His final theatrical engagement was with Macready at Covent Garden in 1837–38. He wrote the words of many songs, his best being perhaps 'In the days when we went gipsying.' In later years his entertainments, 'Gipsy Life,' 'Tales of the Sea,' and 'Songs of Dibdin,' etc., became deservedly popular. As a genial *bon camarade* he was universally liked. [W.H.]

RANZ DES VACHES, (*Kuhreihen, Kuhreigen*; Appenzell patois *Chüereiha*), a strain of an irregular description, which in some parts of Switzerland is sung or blown on the Alpine horn in June, to call the cattle from the valleys to the higher pastures. Several derivations have been suggested for the words *ranz* and *reihen* or *reigen*. *Ranz* has been translated by the English 'rant,' and the French 'rondeau,' and has been derived from the Keltic root 'renk' or 'rank,' which may also be the derivation of *reihen*, in which case both words would mean the 'procession, or march, of the cows.' Stalder ('Schweizerisches Idiotikon') thinks that *reihen* means 'to reach,' or 'fetch,' while other authorities say that the word is the same as *reigen* (a dance accompanied by singing), and derive *ranz* from the Swiss patois 'ranner,' to rejoice.

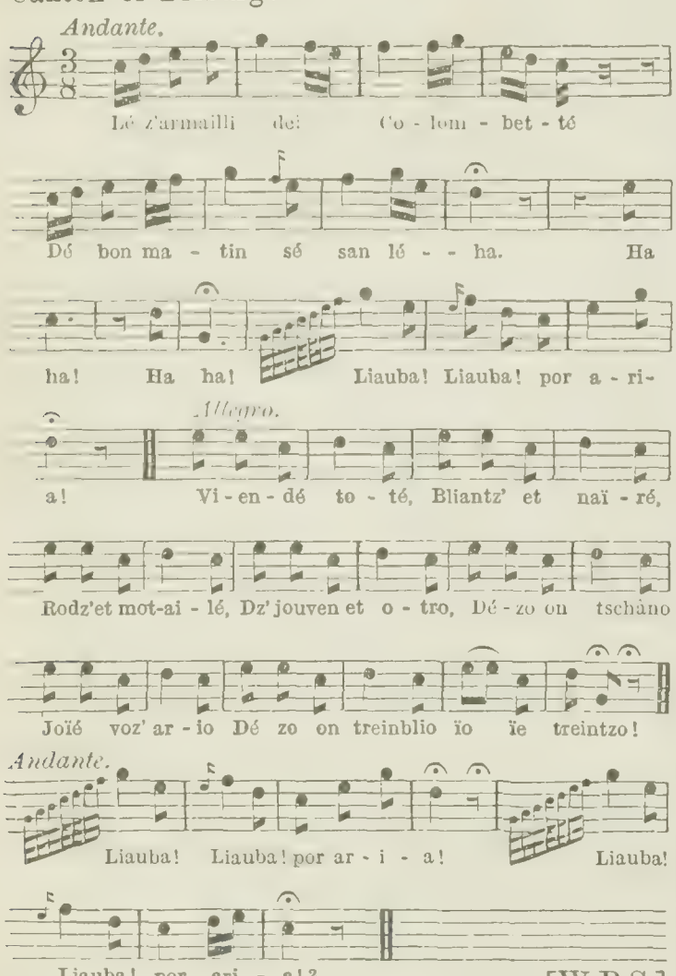
The Ranz des Vaches are very numerous, and differ both in music and words in the different cantons. They are extremely irregular in character, full of long cadences and abrupt changes of tempo. It is a curious fact that they are seldom strictly in tune, more particularly when played on the Alpine horn, an instrument in which, like the BAGPIPE, the note represented by F is really an extra note between F and F♯. This note is very characteristic of the Ranz des Vaches; passages like the following being repeated and varied almost ad infinitum.



Though of little musical value, a fictitious interest has been long attached to the Ranz des Vaches owing to the surroundings in which they are generally heard. Sung to a pianoforte accompaniment in a concert-room, they would sound little better than a string of semi-barbarous cadences, but heard at dawn or at sunset in some remote Alpine valley, and sung with the strange gradations of falsetto and chest-voice softened by distance, they possess a peculiar

[1] There is a curious analogy between the above and the following strain, which is sung with infinite variations in the agricultural districts near London to frighten away the birds from the seed. In both passages the F is more nearly F♯.

and undeniable charm. The most celebrated of them is that of Appenzell, a copy of which is said to have been sent to our Queen Anne, with whom it was a great favourite. The first work in which it was printed is Georg Rhaw's 'Bicinia' (Wittenberg, 1545). It is also to be found in a dissertation on Nostalgia in Zwinger's 'Fasciculus Dissertationum Medicarum' (Basle, 1710). Rousseau printed a version in his 'Dictionnaire de Musique,' which Laborde arranged for 4 voices in his 'Essai sur la Musique.' It was used by Grétry in his Overture to 'Guillaume Tell,' and by Adam in his 'Methode de Piano du Conservatoire.'[1] It has been also arranged by Webbe, Weigl, Rossini ('Guillaume Tell') and Meyerbeer. The following example is sung in the Alps of Gruyère in the Canton of Friburg:—



[W.B.S.]

RAPPOLDI, Eduard, born at Vienna, Feb. 21, 1839. He was placed by his father at an early age under Doleschall, and made his first appearance in his 7th year as violinist, pianist, and composer. His talent for the pianoforte was so great as to induce the Countess Banffy to put him under Mittag, Thalberg's teacher. But the violin was the instrument of his choice, and he succeeded in studying it under Jansa, who induced him to go to London in 1850. Here he made no recorded appearance. On his return to Vienna he was so far provided for by the liberality of the same lady, that he became a pupil of the Conservatoire under Hellmesberger from 1851 to 1854. He then put himself under Böhm, and shortly began to travel, and to be spoken of as a promising player. The first real step in his career was conducting a concert of Joachim's at Rotterdam in 1866. At the end of that year he went to Lübeck as Capellmeister, in 1867 to Stettin in the same capacity, and in 1869 to the Landestheater at Prague. During this time he was working hard at the violin, and also studying composition with Sechter and Hiller. From 1870 to 77 he was a colleague of Joachim's at the Hochschule at Berlin—where he proved himself a first-rate teacher—and a member of his Quartet party. In 1876 he was made Royal Professor, and soon after received a call to a Concertmeistership at Dresden. This however his love for Joachim and for Berlin, where he had advanced sufficiently to lead the Quartets alternately with his chief, induced him for a long time to hesitate to accept, notwithstanding the very high terms offered. At length, however, he did accept it, and is now joint Concertmeister with Lauterbach at the Dresden opera, and chief teacher in the Conservatorium. Though a virtuoso of the first rank, he has followed in the footsteps of Joachim by sacrificing display to the finer interpretation of the music, and has succeeded in infusing a new spirit into chamber-music at Dresden. He has composed symphonies, quartets, sonatas, and songs, some of which have been printed. They are distinguished for earnestness, and for great beauty of form, and a quartet was performed in Dresden in the winter of 1878 which aroused quite an unusual sensation. In 1874 Rappoldi married a lady who is nearly as distinguished as himself—Miss Laura Kahrer, who was born in Vienna in 1853, and whose acquaintance he made many years before at Prague. Her talent, like his, showed itself very early. On the nomination of the Empress Elisabeth she became a pupil of the Conservatorium at Vienna, under Dachs and Dessoff, from 1866 to 69. After taking the first prize, she made a *tournée* to the principal towns of Germany, ending at Weimar. There she studied under Liszt, and matured that beauty of touch, precision, fire, and intelligence, which have raised her to the first rank of pianists in Germany, and which induced Herr von Bülow—no lenient critic—to praise her playing of Beethoven's op. 106 in the highest terms. She is the worthy colleague of her husband in the best concerts of Dresden. Mme. Kahrer-Rappoldi has not yet visited England. [G.]

RASOUMOWSKY,[3] Andreas Kyrillovitsch, a Russian nobleman to whom Beethoven

[1] Other examples and descriptions will be found in the following works:—Cappeller's 'Pilati Montis Historia' (1757); Stolberg's 'Reise in Deutschland, der Schweiz, etc.' (1794); Ebel's 'Schilderung der Gebirgsvölker der Schweiz' (1798); Sigmund von Wagner's 'Acht Schweizer Kuhreihen' (1805); the article on Viotti in the 'Decade Philosophique' (An 6); Castelnau's 'Considerations sur la Nostalgie' 1806); Edward Jones's 'Musical Curiosities' (1811); Tarenne's 'Sammlung von Schweizer Kuhreihen und Volksliedern' (1818); Huber's 'Recueil de Ranz de Vaches' (1830); and Tobler's 'Appenzellischer Sprachschatz' (1837).

[2] Translation, by Fenimore Cooper:—'The cowherds of Colombette arise at an early hour, Ha, ha! Ha, ha! Liauba! Liauba! in order to milk! Come all of you, Black and white, Red and mottled, Young and old; Beneath this oak I am about to milk you, Beneath this poplar I am about to press. Liauba! Liauba! in order to milk!'

[3] Pronounced Rasumoffsky, which is Beethoven's spelling in the dedication of the 5th and 6th Symphonies; Rasoumoffsky in that of the Quartets.

dedicated three of his greatest works, and whose name will always survive in connexion with the 'Rasoumowsky Quartets' (op. 59). He was the son of Kyrill (i.e. Cyril) Rasum, a peasant of Lemeschi, a village in the Ukraine, who, with his elder brother, was made a Count (Graf) by the Empress Elisabeth of Russia. Andreas was born Oct. 22, 1752, served in the English and Russian navies, rose to the rank of admiral, and was Russian ambassador at Venice, Naples, Copenhagen, Stockholm, and Vienna. In England his name must have been familiar, or Foote would hardly have introduced it as he has in 'The Liar' (1762). At Vienna he married, in 1788, Elisabeth Countess of Thun, one of the 'three Graces,' elder sister of the Princess Carl Lichnowsky [see vol. ii. 132 *a*]; and on March 25, 1792, had his audience from the Emperor of Austria as Russian ambassador, a post which he held with short intervals for more than 20 years. He was a thorough musician, an excellent player of Haydn's quartets, in which he took 2nd violin, not improbably studying them under Haydn himself. That, with his connexion with Lichnowsky, he must have known Beethoven is obvious; but no direct trace of the acquaintance is found until May 26, 1806 (six weeks after the withdrawal of Fidelio), which Beethoven—in his usual polyglott—has marked on the first page of the Quartet in F of op. 59, as the date on which he began it—'Quartetto angefangen am 26ten May 1806.'

In 1808 the Count was in possession of his own palace, in the Landstrasse suburb, on the Donau Canal, an enormous building 'on which for nearly 20 years he lavished all his means,' now the Geological Institute; and in the summer or autumn of the same year formed his famous quartet party—Schuppanzigh, 1st violin; Weiss, viola; Lincke, cello; and he himself 2nd violin[1] —which for many years met in the evenings, and performed, among other compositions, Beethoven's pieces, 'hot from the fire,' under his own immediate instructions.

In April 1809 appeared the C minor and Pastoral Symphonies (Nos. 5 and 6), with a dedication (on the Parts) to Prince Lobkowitz and 'son excellence Monsieur le Comte de Rasumoffsky' (Breitkopf & Härtel). These dedications doubtless imply that Beethoven was largely the recipient of the Count's bounty, but there is no direct evidence of it, and there is a strange absence of reference to the Count in Beethoven's letters. His name is mentioned only once—July 24, 1813—and there is a distant allusion in a letter of a much later date (Nohl, Briefe B. 1865, No. 354). How different to the affection, the jokes, the grumbling, the intimate character, of his notes to his other friends and supporters! In the autumn of 1814 came the Vienna Congress (Nov. 1, 1814—June 9, 1815), and as the Empress of Russia was in Vienna at the time, the Ambassador's Palace was naturally the scene of special festivities. It was not however there that Beethoven was presented to the Empress, but at the Archduke Rodolph's.[2] The Count's hospitalities were immense, and, vast as was his palace, a separate wooden *annexe* had to be constructed capable of dining 700 persons.

On June 3, 1815, six days before the signature of the final Act of the Congress, the Count was made Prince (Fürst), and on the 31st of the following December the dining-hall just mentioned was burnt down. The Emperor of Russia gave 400,000 silver roubles (£40,000) towards the rebuilding, but the misfortune appears to have been too much for the Prince; he soon after sold the property, pensioned his quartet, and disappears from musical history. The quartet kept together for many years after this date, Sina playing 2nd violin. Beethoven mentions them à propos to the Gallitzin Quartets in the letter to his nephew already referred to, about 1825. [A. W. T.]

The three quartets to which Rasoumowsky's name is attached form op. 59, and are in F, E minor, and C respectively. The first of the three, as already mentioned, was begun May 26, 1806, and the whole three were finished and had evidently been played before Feb. 27, 1807, the date of a letter in the Allg. mus. Zeitung describing their characteristics.[3] They were published in Jan. 1808 (Vienna Bureau des Arts; Pesth, Schreyvogel), and the dedication (on the Parts) begins 'Trois Quatuors très humblement dediées à son Excellence Monsieur le Comte,' etc. Beethoven himself mentions them in a letter to Count Brunswick, which he has dated May 11, 1806, but which Mr. Thayer (iii. 11) sees reason to date 1807.

The Quartet in F is the one which Bernard Romberg is said to have thrown on the ground and trampled upon as unplayable.—The slow movement is entitled in the Sketchbook 'Einen Trauerweiden oder Akazienbaum aufs Grab meines Bruders'—A weeping willow or acacia tree over the grave of my brother. But which brother? August died in 1783, 23 years before, Carl not till 10 years after, and Johann not till 1848. Carl's marriage-contract had however been signed only on May 25, 1806. Is it possible that this inscription is a Beethovenish joke on the occasion? If so, he began in fun and ended in earnest.—Mendelssohn was accustomed to say that this Quartet, and that in F minor (op. 95), were the most Beethovenish of all Beethoven's works.—The finale has a Russian theme in D minor for its principal subject:—

Thème russe. *Allegro.*

[1] Afterwards played by Sina.

[2] Schindler, i. 233 (quoted by Thayer, iii. 321). The statement under BEETHOVEN [vol. i. 192 *a*] is incorrect.

[3] They are again alluded to in the number for May 5 as more and more successful, and possibly to be soon published; and then, with astonishing *naiveté*, follows 'Eberl's newest compositions, too, are anticipated with great pleasure'!

The 2nd of the three has a Russian theme in E major as the Trio of its third movement :—

(*Allegretto*). Thème russe.

It would be interesting to know the original names and forms of these two themes: they do not appear to have been yet identified. [G.]

RATAPLAN, like Rub-a-dub, appears to be an imitative word for the sound of the drum, as TAN-TA-RA is for that of the trumpet, and Tootle-tootle for the flute.[1] It is hardly necessary to mention its introduction by Donizetti in the 'Fille du Regiment,' or by Meyerbeer in the 'Huguenots'; and every Londoner is familiar with it in Sergeant Bouncer's part in Sullivan's 'Cox and Box,' especially in his first song, 'Yes, yes, in those merry days.' 'Rataplan, der kleine Tambour' is the title of a Singspiel by Pillwitz, which was produced at Bremen in 1831, and had a considerable run both in North and South Germany between that year and 1836. [G.]

RAUZZINI, VENANZIO, born 1747, in Rome, where he made his début in 1765, captivating his audience by his fine voice, clever acting, and prepossessing appearance. In 1767 he sang in Vienna, and then accepted an engagement in Munich, where four of his operas were performed. In London he made his first appearance in 1774. Here also he distinguished himself as an excellent teacher of singing, Miss Storace, Braham, Miss Poole (afterwards Mrs. Dickons), and Incledon, being among his pupils. In 1778 and 79 he gave subscription concerts with the violinist Lamotte, when they were assisted by such eminent artistes as Miss Harrop, Signor Rovedino, Fischer, Cervetto, Stamitz, Decamp, and Clementi. He also gave brilliant concerts in the new Assembly Rooms (built 1771) at Bath, where he took up his abode on leaving London. Here he invited Haydn and Dr. Burney to visit him, and the three spent several pleasant days together in 1794. On this occasion Haydn wrote a four-part canon (or more strictly a round) to an epitaph on a favourite dog buried in Rauzzini's garden, 'Turk was a faithful dog and not a man.'[2] Rauzzini's operas performed in London were 'La Regina di Golconda' (1775); 'Armida' (1778); 'Creusa in Delfo' (1782); and 'La Vestale' (1787). He composed string-quartets, sonatas for PF., Italian arias and duets, and English songs; also a Requiem produced at the little Haymarket Theatre in 1801, by Dr. Arnold and Salomon. He died, universally regretted, at Bath in 1810. His brother

MATTEO, born in Rome 1754, made his first appearance at Munich in 1772, followed his brother to England, and settled in Dublin, where he produced an opera, 'Il Rè pastore.' He employed himself in teaching singing, and died in 1791. [C.F.P.]

RAVENSCROFT, JOHN, one of the Tower Hamlets waits, and violinist at Goodman's Fields Theatre, was noted for his skill in the composition of hornpipes, a collection of which he published. Two of them are printed in Hawkins's History. He died about 1740. [W.H.H.]

RAVENSCROFT, THOMAS, Mus. Bac., born about 1582, was a chorister of St. Paul's under Edward Pearce, and graduated at Cambridge in 1607. In 1609 he edited and published 'Pammelia. Musickes Miscellanie: or Mixed Varietie of pleasant Roundelayes and delightful Catches of 3, 4, 5, 6, 7, 8, 9, 10 Parts in one'—the earliest collection of rounds, catches and canons printed in this country. A second impression appeared in 1618. Later in 1609 he put forth 'Deuteromelia; or the Second Part of Musick's Melodie, or melodius Musicke of Pleasant Roundelaies; K. H. mirth, or Freemen's Songs and such delightfull Catches'; containing the catch, 'Hold thy peace, thou knave,' sung in Shakspere's 'Twelfth Night.' In 1611 he published 'Melismata. Musicall Phansies, fitting the Court, Citie, and Countrey Humours, to 3, 4 and 5 Voyces.' In 1611 he published 'A Briefe Discourse of the true (but neglected) use of Charact'ring the Degrees by their Perfection, Imperfection, and Diminution in Mensurable Musicke against the Common Practise and Custome of these Times; Examples whereof are exprest in the Harmony of 4 Voyces Concerning the Pleasure of 5 usuall Recreations. 1. Hunting. 2. Hawking. 3. Dancing. 4. Drinking. 5. Enamouring'—a vain attempt to resuscitate an obsolete practice. The musical examples were composed by Edward Pearce, John Bennet, and Ravenscroft himself. In 1621 he published the work by which he is best known, 'The Whole Booke of Psalmes: With the Hymnes Evangelicall and Spirituall. Composed into 4 parts by Sundry Authors with severall Tunes as have been and are usually sung in England, Scotland, Wales, Germany, Italy, France, and the Netherlands.' Another edition 'newly corrected and enlarged' was published in 1633. Four anthems or motets by Ravenscroft are among the MSS. in the library of Christ Church, Oxford. The date of his death is not known. It is said by some to have been about 1630, and by others about 1635. [W.H.H.]

RAVINA, JEAN HENRI, a pianoforte composer, was born May 20, 1818, at Bourdeaux, where his mother was a prominent musician. At the instance of Rode and Zimmermann the lad was admitted to the Conservatoire of Paris in 1831. His progress was rapid—2nd prize for PF. in 1832; 1st prize for the same in 1834; 1st for harmony and accompaniment in 1835, a joint professorship of PF. Nov. 1835. In Feb. 1837 he left the Conservatoire and embarked on the world as a virtuoso and teacher. He has resided exclusively at Paris, with the exception

[1] Other forms are Patapataplan, Palalalalan, Bumberumbumbum. See the Dictionnaire Encyclopédique of Sachs & Villatte.

[2] For this Round see Pohl, Haydn in London, p. 276.

of a journey to Russia in 1853, and Spain in 1871. He received the Legion of Honour in 1861. His compositions—of which the latest is op. 80—are almost all salon pieces, many of them very favourite in their time, graceful and effective, but with no permanent qualities. He has also published a 4-hand arrangement of Beethoven's nine symphonies. Ravina is still living in Paris. The above sketch is indebted to M. Pougin's supplement to Fétis. [G.]

RAWLINGS, or RAWLINS, THOMAS, born about 1703, was a pupil of Dr. Pepusch, and a member of Handel's orchestra at both opera and oratorio performances. On March 14, 1753, he was appointed organist of Chelsea Hospital. He died in 1767. His son, ROBERT, born in 1742, was a pupil of his father, and afterwards of Barsanti. At 17 he was appointed musical page to the Duke of York, with whom he travelled on the continent until his death in 1767, when he returned to England and became a violinist in the King's band and Queen's private band. He died in 1814, leaving a son, THOMAS A., born in 1775, who studied music under his father and Dittenhofer. He composed some instrumental music performed at the Professional Concerts, became a violinist at the Opera and the best concerts, and a teacher of the pianoforte, violin and thorough-bass. He composed and arranged many pieces for the pianoforte, and some songs. [W.H.H.]

RAYMOND AND AGNES, a 'grand romantic English Opera in 3 acts'; words by E. Fitzball, music by E. J. Loder. Produced at St. James's Theatre, London, June 11, 1859. [G.]

RE. The second note of the natural scale in solmisation and in the nomenclature of France and Italy, as Ut (or Do) is the first, Mi the third, and Fa the fourth—

Ut queant laxis *resonare* fibris
Mira gestorum, *fa*muli tuorum.

By the Germans and English it is called D.

The number of double vibrations per second for D is —; Paris diapason 580·7; London Philharmonic pitch 606·2. [G.]

REA, WILLIAM, born in London March 25, 1827; when about ten years old learnt the pianoforte and organ from Mr. PITTMAN, for whom he acted as deputy for several years. In about 1843 he was appointed organist to Christchurch, Watney Street, and at the same time studied the pianoforte, composition, and instrumentation under Sterndale Bennett, appearing as a pianist at the concerts of the Society of British Musicians in 1845. On leaving Christchurch he was appointed organist to St. Andrew Undershaft. In 1849 he went to Leipzig, where his masters were Moscheles and Richter; he subsequently studied under Dreyschock at Prague. On his return to England, Mr. Rea gave chamber concerts at the Beethoven Rooms, and became (1853) organist to the Harmonic Union. In 1856 he founded the London Polyhymnian Choir, to the training of which he devoted much time, and with excellent results; at the same time he conducted an amateur orchestral society. In 1858 he was appointed organist at St. Michael's, Stockwell, and in 1860 was chosen by competition organist to the corporation of Newcastle on Tyne, where he also successively filled the same post at three churches in succession, and at the Elswick Road Chapel. At Newcastle Mr. Rea has worked hard to diffuse a taste for good music, though he has not met with the encouragement which his labours and enthusiasm deserve. Besides weekly organ and pianoforte recitals, he formed a choir of eighty voices, which in 1862 was amalgamated with the existing Sacred Harmonic Society of Newcastle. In 1867 he began a series of excellent orchestral concerts which were carried on every season for nine years, when he was compelled to discontinue them, owing to the pecuniary loss which they entailed. In 1876 he gave two performances of 'Antigone' at the Theatre Royal, and since then has devoted most of his time to training his choir (200 voices), the Newcastle Amateur Vocal Society, and other Societies on the Tyne and in Sunderland, besides giving concerts at which the best artists have performed. Mr. Rea's published works comprise four songs, three organ pieces, and some anthems. At the close of 1880 he was appointed organist of St. Hilda's, S. Shields. [W.B.S.]

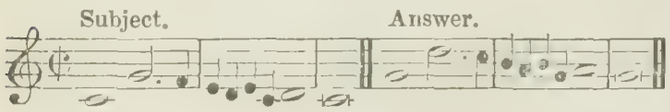
READING, JOHN. There were three musicians of these names, all organists. The first was appointed Junior Vicar choral of Lincoln Cathedral, Oct. 10, 1667, Poor Vicar, Nov. 28, 1667, and Master of the Choristers, June 7, 1670. He succeeded Randolph Jewett as organist of Winchester Cathedral in 1675, and retained the office until 1681, when he was appointed organist of Winchester College. He died in 1692. He was the composer of the Latin Graces sung before and after meat at the annual College election times, and the well-known Winchester School song, 'Dulce Domum'; all printed in Dr. Philip Hayes's 'Harmonia Wiccamica.' The second was organist of Chichester Cathedral from 1674 to 1720. Several songs included in collections published between 1681 and 1688 are probably by one or other of these two Readings. The third, born 1677, was a chorister of the Chapel Royal under Dr. Blow. In 1700 he became organist of Dulwich College. He was appointed Junior Vicar and Poor Clerk of Lincoln Cathedral, Nov. 21, 1702, Master of the Choristers, Oct. 5, 1703, and Instructor of the choristers in vocal music, Sept. 28, 1704. He appears to have resigned these posts in 1707 and to have returned to London, where he became organist of St. John, Hackney, St. Dunstan in the West, St. Mary Woolchurchaw, Lombard Street, and St. Mary Woolnoth. He published 'A Book of New Songs (after the Italian manner) with Symphonies and a Thorough Bass fitted to the Harpsichord, etc.,' and, whilst organist of Hackney, 'A Book of New Anthems.' He was also the reputed composer of the hymn 'Adeste fideles.' He died Sept. 2, 1764.

There was another person named Reading, who was a singer at Drury Lane in the latter part of the 17th century. In June 1695 he and

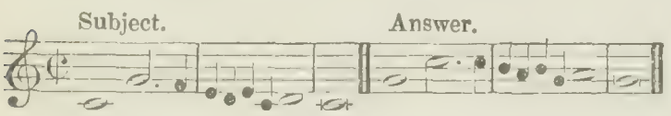
Pate, another singer at the theatre, were removed from their places and fined 20 marks each for being engaged in a riot at the Dog Tavern, Drury Lane, but were soon after reinstated.

A Rev. John Reading, D.D., Prebendary of Canterbury Cathedral, preached there a sermon in defence of church music, and published it in 1663. [W.H.H.]

REAL FUGUE. That species of Fugue in which the intervals of the Subject and Answer correspond exactly, without reference—as in Tonal Fugue—to the Tonic and Dominant of the scale in which they are written. Thus, in the following example, the Answer is an exact reproduction of the Subject, in the fifth above:—



whereas, according to the laws of Tonal Fugue, the Tonic in the Subject should have been represented in the Answer by the Dominant, and *vice versâ*; thus—



Real Fugue is an invention of much older date than its tonal analogue; and is, indeed, the only kind of Fugue possible in the Ecclesiastical Modes. For, in those antient tonalities, the Dominant differs widely from that of the modern Scale, and exercises widely different functions; insomuch that the Answer to a given Subject, constructed with reference to it, would, in certain Modes, be so distorted as to set all recognition at defiance. The idea of such a Dominant as that upon which we now base our harmonic combinations, is one which could never have suggested itself to the mediæval contrapuntist. Accordingly, the composers of the 15th and 16th centuries regulated their Subjects and Answers in conformity with the principles of the system of Hexachords. When a strict Answer was intended, its Solmisation was made to correspond exactly, in one Hexachord, with that of the Subject in another. Where this uniformity of Solmisation was wanting—as was necessarily the case when the Answer was made in any other Interval than that of the Fourth or Fifth above or below the Subject—the reply was regarded as merely an imitative one.[1] [See HEXACHORD.] But, even in imitative replies, the laws of Real Fugue required that a Fifth should always be answered by a Fifth, and a Fourth by a Fourth; the only license permitted being the occasional substitution of a Tone for a Semitone, or a Major for a Minor third. In practice both the strict and the imitative Answer were constantly employed in the same composition: *e.g.* in the *Kyrie* of Palestrina's 'Missa Brevis,' already quoted as an example under HEXACHORD, the Subject is given out by the Alto in the Hexachord of C; answered strictly by the Bass in that of F; again answered, in the same Hexachord, by the Treble; and then imitated, first by the Tenor, and afterwards by the Bass, with a whole Tone, instead of a Semitone, between the second and third notes. Among the best writers of the best period of Art we find these mixed Fugues—which would now be called 'Fugues of Imitation'—in much more frequent use than those which continued strict throughout, and forming the foundation of some of the finest polyphonic Masses and Motets.

When the Imitation, instead of breaking off at the end of the few bars which form the Subject, continues uninterruptedly throughout an entire movement, the composition is called a Perpetual Fugue, or, as we should now say, a Canon. A detailed classification of the different varieties of Real Fugue, perpetual, interrupted, strict, or free, in use during the 14th and 15th centuries, would be of very little practical service, since the student who would really master the subject must of necessity consult the works of the great masters for himself. In doing this, he will find no lack of interesting examples, and will do well to begin by making a careful analysis of Palestrina's 'Missa ad Fugam,' which differs from the work published by Alfieri and Adrien de Lafage under the title of 'Missa Canonica,' in one point only, and that a very curious one. In the 'Missa Canonica,' in the First or Dorian mode, two Voices lead off a Perpetual Real Fugue, which the two remaining Voices supplement with another, distinct from, but ingeniously interwoven with it; the two Subjects proceeding uninterruptedly together until the end of each several Movement—a style of composition which is technically termed 'Canon, four in two.' In the 'Missa ad Fugam,' in the Seventh Mode, the four Voices all start with the same Subject, but after a few bars separate themselves into two Choirs, each of which diverges into a Perpetual Real Fugue of its own, which continues uninterruptedly to the end of the Movement, after the manner of the 'Missa Canonica.'[2]

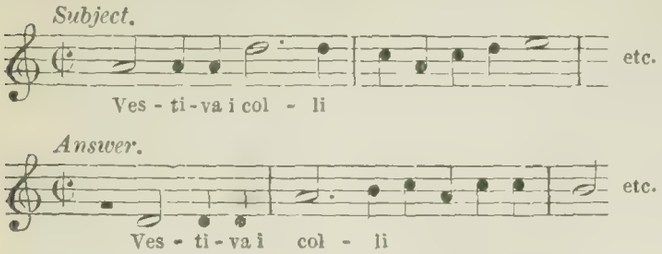
Though less esteemed by modern Composers than Tonal Fugue, Real Fugue is still practised with success even in modern tonalities. John Sebastian Bach has left us many masterly examples, both for Voices—as in the Mass in B minor—and for the Organ. Handel has done the same in some of his finest Choruses, as 'The earth swallowed them' in Israel in Ægypt, and the matchless 'Amen' in the Messiah; while in no less than five of his six beautiful Fugues for the Pianoforte (op. 25), Mendelssohn has forsaken the Tonal for the Real method of construction.

The converse practice, on the part of antient Composers, is exceedingly rare, though instances of pure Tonal Fugue may be found, even in the

[1] See the admirable exposition of the Laws of Fugue, by J. J. Fux, 'Gradus ad Parnassum,' Vienna 1725, pp. 143, *et seq.*

[2] Choron's edition of the 'Missa ad Fugam' is out of print; but several copies of the work are preserved in the Library of the British Museum. [See RACCOLTA GENERALE.] Albrechtsberger gives the Second Agnus Dei as an example in his 'Gründliche Anweisung zur Composition,' vol. ii. p. 330 of Merrick's Eng. Transl. (Cocks & Co.) The 'Missa Canonica' is printed in the 'Cinq Messes de Palestrina,' edited by Adrien de Lafage (Paris, Launer; London, Schott & Co.)

16th century; as in Palestrina's beautiful, though almost unknown Madrigal, 'Vestiva i colli.'[1]



The subject, in the Hypodorian Mode, here passes directly from the note which, in modern Music, would be the Dominant, to the Final; while the Answer, in the Dorian Mode, proceeds from the Final to the Authentic Dominant—a method of treatment which anticipates the supposed invention of Modern Fugue by more than a century. Other instances may occasionally be found among the works of *cinque cento* Composers—as in the Qui tollis of J. L. Hassler's Missa 'Dixit Maria'[2]—but they are very uncommon; and indeed it is only in certain Modes that they are possible. [W.S.R.]

REAY, Samuel, born at Hexham, Mar. 17, 1828; was noted for his fine voice and careful singing as a chorister at Durham Cathedral; and under Henshaw the organist, and Penson the precentor there, became acquainted with much music outside the regular Cathedral services. After leaving the choir he had organ lessons from Mr. Stimpson of Birmingham, and then became successively organist at St. Andrew's, Newcastle (1845); St. Peter's, Tiverton (1847); St. John's, Hampstead (1854); St. Saviour's, Southwark (1856); St. Stephen's, Paddington; Radley College (1859, succeeding Dr. E. G. Monk); Bury, Lancashire (1861); and in 1864 was appointed 'Song-schoolmaster and organist' of the parish Church, Newark, a post which he still holds. In 1871 Mr. Reay graduated at Oxford as Mus. Bac. In 1879 he distinguished himself by producing at the Bromley and Bow Institute, London, two comic cantatas of J. S. Bach's ('Caffee-cantate' and 'Bauern-cantate'), which were performed there—certainly for the first time in England—on Oct. 27, under his direction, to English words of his own adaptation. Mr. Reay is noted as a fine accompanyist and extempore player on the organ. He has published a Morning and Evening Service in F, several anthems, and 2 madrigals (all Novello); but is best known as a writer of part-songs, some of which ('The clouds that wrap,' 'The dawn of day') are deservedly popular. [G.]

REBEC (Ital. *Ribeca*, *Ribeba*; Span. *Rabé*, *Rabel*.) The French name (said to be of Arabic origin) of that primitive stringed instrument which was in use throughout western Europe in the middle ages, and was the parent of the viol and violin, and is identical with the German 'geige' and the English 'fiddle'; in outline something like the mandoline, of which it was probably the parent. It was shaped like the half of a pear, and was everywhere solid except at the two extremities, the upper of which was formed into a peg-box identical with that still in use, and surmounted by a carved human head. The lower half was considerably cut down in level, thus leaving the upper solid part of the instrument to form a natural fingerboard. The portion thus cut down was scooped out, and over the cavity thus formed was glued a short pine belly, pierced with two trefoil-shaped soundholes, and fitted with a

bridge and soundpost. The player either rested the curved end of the instrument lightly against the breast, or else held it like the violin, between the chin and the collar-bone, and bowed it like the violin. It had three stout gut strings, tuned like the lower strings of the violin (A, D, G). Its tone was loud and harsh, emulating the female voice, according to a French poem of the 13th century:

Quidam rebecam arcuabant,
Muliebrem vocem confingentes.

An old Spanish poem speaks of 'el rabé gritador,' or the 'squalling rebec.' This powerful tone made it useful in the mediæval orchestra; and Henry the Eighth employed the rebec in his state band. It was chiefly used, however, to accompany dancing; and Shakspere's musicians in Romeo and Juliet, Hugh Rebeck, Simon Catling (Catgut), and James Soundpost, were undoubtedly rebec-players. After the invention of instruments of the viol and violin type it was banished to the streets of towns and to rustic festivities, whence the epithet 'jocund' applied to it in Milton's L'Allegro. It was usually accompanied by the drum or tambourine. It was in vulgar use in France in the last century, as is proved by an ordinance issued by Guignon in his official capacity as 'Roi des Violons' in 1742, in which street-fiddlers are prohibited from using anything else; 'Il leur sera permis d'y jouer d'une espèce d'instrument à trois cordes seulement, et connu sous le nom

[1] Printed, with English words, beginning, 'Sound out my voice,' in N. Yonge's 'Musica transalpina' (Lond. 1558).

[2] Nuremberg, 1599. Reprinted in vol. i. of Proske's 'Musica divina.' Ratisbon 1853.

de rebec, sans qu'ils puissent se servir d'un violon à quatre cordes sous quelque prétexte que ce soit.' A similar order is extant, dated 1628, in which it is forbidden to play the treble or bass violin, 'dans les cabarets et les mauvais lieux,' but only the rebec. The rebec was extinct in England earlier than in France. It is now totally disused, and no specimen is known to exist. Representations of it in sculpture, painting, manuscripts, etc., are abundant. The illustration is from an Italian painting of the 13th cent. engraved in Vidal's 'Instruments à Archet.' [E.J.P.]

REBEL, Jean Ferry, born in Paris, 1669. After a precocious childhood entered the Opera as a violinist, speedily became accompanyist, and then leader. In 1703 he produced 'Ulysse,' opera in 5 acts with prologue, containing a *pas seul* for Françoise Prévôt, to an air called 'Le Caprice,' for violin solo. The opera failed, but the Caprice remained for years the test-piece of the *ballerine* at the Opéra. After this success, Rebel composed violin solos for various other ballets, such as 'La Boutade,' 'Les Caractères de la Danse,' 'Terpsichore,' 'La Fantaisie,' 'Les Plaisirs Champêtres,' and 'Les Eléments.' Several of these were engraved, as were his sonatas for the violin. Rebel was one of the '24 violons,' and 'compositeur de la chambre' to the King. He died in Paris, 1747. His son,

François, born in Paris, June 19, 1701, at 13 played the violin in the Opéra orchestra. He thus became intimate with François Francœur, and the two composed conjointly, and produced at the Académie, the following operas:—'Pyrame et Thisbé' (1726); 'Tarsis et Zélie' (1728); 'Scanderbeg' (1735); 'Ballet de la Paix' (1738); 'Les Augustales' and 'Le Retour du Roi' (1744); 'Zélindor,' 'Le Trophée' (in honour of Fontenoy, 1745); 'Ismène' (1750); 'Les Génies tutélaires' (1751); and 'Le Prince de Noisy' (1760); most of which were composed for court fêtes or public rejoicings.

From 1733 to 44 Rebel and Francœur were joint leaders of the Académie orchestra, and in 1753 were appointed managers. They soon however retired in disgust at the petty vexations they were called upon to endure. Louis XV. made them surintendants of his music, with the order of St. Michel. In March 1757 these inseparable friends obtained the privilege of the Opéra, and directed it for ten years on their own account, with great administrative ability.

Rebel died in Paris Nov. 7, 1775. He composed some cantatas, a Te Deum, and a De Profundis, performed at the *Concerts spirituels*, but all his music is now forgotten, excepting a lively air in the first finale of 'Pyrame et Thisbé,' which was adapted to a much-admired *pas seul* of Mlle. de Camargo, thence became a popular contredanse—the first instance of such adaptation—and in this form is preserved in the 'Clef du Caveau' under the title of 'La Camargo.' [G.C.]

REBER, Napoléon-Henri, born at Mulhausen, Oct. 21, 1807; at 20 entered the Conservatoire, studying counterpoint and fugue under Seuriot and Jelensperger, and composition under Lesueur. His simple manners and refined tastes, high sense of honour, and cultivated mind, gave him the *entrée* to *salons* where the conversation turned on art and intellectual subjects, instead of on the commonplaces of ordinary circles. This led him to compose much chamber-music, and to set poems by the best French poets of the period. The success of these elegant and graceful works induced him to attempt symphony and opera. His music to the 2nd act of the charming ballet 'Le Diable amoureux' (Sept. 23, 1840) excited considerable attention, and was followed at the Opéra-Comique by 'La Nuit de Noël,' 3 acts (Feb. 9, 1848), 'Le Père Gaillard,' 3 acts (Sept. 7, 1852), 'Les Papillotes de M. Benoît,' 1 act (Dec. 28, 1853), and 'Les Dames Capitaines' 3 acts (June 3, 1857). In these works he strove to counteract the tendency towards noise and bombast then so prevalent both in French and Italian opera, and to show how much may be made out of the simple natural materials of the old French opéra-comique by the judicious use of modern orchestration.

In 1851 he was appointed Professor of harmony at the Conservatoire, and in 1853 the well-merited success of 'Le Père Gaillard' procured his election to the Institut as Onslow's successor. Soon after this he renounced the theatre, and returned to chamber-music. He also began to write on music, and his 'Traité d'Harmonie' (1862), now in its 3rd edition, is without comparison the best work of its kind in France. The outline is simple and methodical, the classification of the chords easy to follow and well-connected, the explanations luminously clear, the exercises practical and well calculated to develop musical taste—in a word, everything combines to make it the safest and most valuable of instruction-books. The second part especially, dealing with 'accidental' notes—or, notes foreign to the constitution of chords—contains novel views, and observations throwing light upon points and rules of harmony which before were obscure and confused.

In 1862 M. Reber succeeded Halévy as Professor of composition at the Conservatoire; since 1871 he was also Inspector of the *succursales* or branches of the Conservatoire. He died in Paris, after a short illness, Nov. 24, 1880, and was succeeded as Professor by M. Saint-Saëns.

His compositions comprise 4 symphonies, a quintet and 3 quartets for strings, 1 PF. ditto, 7 trios, duets for PF. and violin, and PF. pieces for 2 and 4 hands. Portions of his ballet 'Le Diable amoureux' have been published for orchestra, and are performed at concerts. In 1875 he produced a cantata called 'Roland,' but 'Le Ménétrier à la cour,' opéra-comique, and 'Naïm,' grand opera in 5 acts, have never been performed, though the overtures are engraved. His best vocal works are his melodies for a single voice, but he has composed choruses for 3 and 4 men's voices, and some sacred pieces.

There is an admirable portrait of this distinguished composer by Henri Lehmann. [G.C.]

RECITAL, a term which has come into use in England to signify a performance of solo music by one instrument and one performer. It was probably first used by Liszt at his performance at the Hanover Square Rooms, June 9, 1840, though as applying to the separate pieces and not to the whole performance. The 'advertisement of the concert in question says that 'M. Liszt will give Recitals on the Pianoforte of the following pieces.' The name has since been adopted by Mr. Charles Halle and others.

The term Opera Recital is used for a concert in which the music of an opera is sung without costume or acting. [G.]

RECITATIVE (Ital. *Recitativo*; Germ. *Recitativ*; Fr. *Récitatif*; from the Latin *recitare*). A species of declamatory Music, extensively used in those portions of an Opera, an Oratorio, or a Cantata, in which the action of the Drama is too rapid, or the sentiment of the Poetry too changeful, to adapt itself to the studied rhythm of a regularly-constructed Aria.

The invention of Recitative marks a crisis in the History of Music, scarcely less important than that to which we owe the discovery of Harmony. Whether the strange conception in which it originated was first clothed in tangible form by Jacopo Peri, or Emilio del Cavaliere, is a question which has never been decided. There is, however, little doubt, that both these bold revolutionists assisted in working out the theory upon which that conception was based; for, both are known to have been members of that æsthetic brotherhood, which met in Florence during the later years of the 16th century, at the house of Giovanni Bardi, for the purpose of demonstrating the possibility of a modern revival of the Classic Drama, in its early purity; and it is certain that the discussions in which they then took part led, after a time, to the invention of the peculiar style of Music we are now considering. The question, therefore, narrows itself to one of priority of execution only. Now, the earliest specimens of true Recitative we possess are to be found in Peri's Opera, 'Euridice,' and Emilio's Oratorio, 'La Rappresentazione dell' Anima e del Corpo,' both printed in the year 1600. The Oratorio was first publicly performed in the February of that year, at Rome: the Opera, in December, at Florence. But Peri had previously written another Opera, 'Dafne,' in exactly the same style, and caused it to be privately performed, at the Palazzo Corsi, in Florence, in 1597. Emilio del Cavaliere, too, is known to have written at least three earlier pieces—'Il Satiro,' 'La Disperazione di Fileno,' and 'Il Giuoco della Cieca.' No trace of either of these can now be found: and, in our doubt as to whether they may not have contained true Recitatives, we can scarcely do otherwise than ascribe the invention to Peri, who certainly did use them in 'Dafne,' and whose style is, moreover, far more truly declamatory than the laboured and half rhythmic manner of his possible rival. [See OPERA, vol. ii. 498–500; ORATORIO, vol. ii. 534, 535.]

Thus first launched upon the world, for the purpose of giving a new impetus to the progress of Art, this particular Style of Composition has undergone less change, during the last 280 years, than any other. What Simple or Unaccompanied Recitative (*Recitativo secco*) is to-day, it was, in all essential particulars, in the time of 'Euridice.' Then, as now, it was supported by an unpretentious Thorough-Bass (*Basso continuo*), figured, in order that the necessary Chords might be filled in upon the Harpsichord, or Organ, without the addition of any kind of Symphony, or independent Accompaniment. Then, as now, its periods were moulded with reference to nothing more than the plain rhetorical delivery of the words to which they were set; melodious or rhythmic phrases being everywhere carefully avoided, as not only unnecessary, but absolutely detrimental to the desired effect—so detrimental, that the difficulty of adapting good Recitative to Poetry written in short rhymed verses is almost insuperable, the jingle of the metre tending to crystallise itself in regular form with a persistency which is rarely overcome except by the greatest Masters. Hence it is, that the best Poetry for Recitative is Blank Verse: and hence it is, that the same Intervals, the same Progressions, and the same Cadences, have been used over and over again, by Composers, who, in other matters, have scarcely a trait in common. We shall best illustrate this by selecting a few set forms from the inexhaustible store at our command, and shewing how these have been used by some of the greatest writers of the 17th, 18th, and 19th centuries: premising that, in phrases ending with two or more reiterated notes, it has been long the custom to sing the first as an Appoggiatura, a note higher than the rest. We have shewn this in three cases, but the rule applies to many others.

Typical Forms.

(c)

The universal acceptance of these, and similar figures, by Composers of all ages, from Peri down to Wagner, sufficiently proves their fitness for the purpose for which they were originally designed. But, the staunch conservatism of *Recitativo secco* goes even farther than this. Its Accompaniment has never changed. The latest Composers who have employed it have trusted, for its support, to the simple *Basso continuo*, which neither Peri, nor Carissimi, nor Handel, nor Mozart, cared to reinforce by the introduction

of a fuller Accompaniment. The only modification of the original idea which has found favour in modern times has been the substitution of Arpeggios, played by the principal Violoncello, for the Harmonies formerly filled in upon the Harpsichord, or Organ—and we believe we are right in asserting that this device has never been extensively adopted in any other country than our own. Here it prevailed exclusively for many years. A return has however lately been made to the old method by the employment of the Piano, first by Mr. Otto Goldschmidt at a performance of Handel's L'Allegro in 1863, and more recently by Dr. Stainer, at St. Paul's, in various Oratorios.

Again, this simple kind of Recitative is as free, now, as it was in the first year of the 17th century, from the trammels imposed by the laws of Modulation. It is the only kind of Music which need not begin and end in the same Key. As a matter of fact, it usually begins upon some Chord not far removed from the Tonic Harmony of the Aria, or Concerted Piece, which preceded it; and ends in, or near, the Key of that which is to follow: but its intermediate course is governed by no law whatever beyond that of euphony. Its Harmonies exhibit more variety, now, than they did two centuries ago; but they are none the less free to wander wherever they please, passing through one Key after another, until they land the hearer somewhere in the immediate neighbourhood of the Key chosen for the next regularly-constructed Movement. Hence it is, that Recitatives of this kind are always written without the introduction of Sharps, or Flats, at the Signature; since it is manifestly more convenient to employ any number of Accidentals that may be needed, than to place three or four Sharps at the beginning of a piece which is perfectly at liberty to end in seven Flats.

But, notwithstanding the unchangeable character of *Recitativo secco*, declamatory Music has not been relieved from the condition which imposes progress upon every really living branch of Art. As the resources of the Orchestra increased, it became evident that they might be no less profitably employed, in the Accompaniment of highly impassioned Recitative, than in that of the Aria, or Chorus: and thus arose a new style of Rhetorical Composition, called Accompanied Recitative (*Recitativo stromentato*), in which the vocal phrases, themselves unchanged, received a vast accession of power, by means of elaborate Orchestral Symphonies interpolated between them, or even by instrumental passages designed expressly for their support. The invention of this new form of impassioned Monologue is generally ascribed to Alessandro Scarlatti (1659–1725), who used it with admirable effect, both in his Operas and his Cantatas; but its advantages, in telling situations, were so obvious, that it was immediately adopted by other Composers, and at once recognised as a legitimate form of Art—not, indeed, as a substitute for Simple Recitative, which has always been retained for the ordinary business of the Stage, but, as a means of producing powerful effects, in Scenes, or portions of Scenes, in which the introduction of the measured Aria would be out of place.

It will be readily understood, that the stability of Simple Recitative was not communicable to the newer style. The steadily increasing weight of the Orchestra, accompanied by a correspondent increase of attention to Orchestral Effects, exercised an irresistible influence over it. Moreover, time has proved it to be no less sensitive to changes of School, and Style, than the Aria itself; whence it frequently happens that a Composer may be as easily recognised by his Accompanied Recitatives as by his regularly-constructed Movements. Scarlatti's Accompaniments exhibit a freedom of thought immeasurably in advance of the age in which he lived. Sebastian Bach's Recitatives, though priceless, as Music, are more remarkable for the beauty of their Harmonies, than for that spontaneity of expression which is rarely attained by Composers unfamiliar with the traditions of the Stage. Handel's, on the contrary, though generally based upon the simplest possible harmonic foundation, exhibit a rhetorical perfection of which the most accomplished Orator might well feel proud: and we cannot doubt that it is to this high quality, combined with a never-failing truthfulness of feeling, that so many of them owe their deathless reputation—to the unfair exclusion of many others, of equal worth, which still lie hidden among the unclaimed treasures of his long-forgotten Operas. Scarcely less successful, in his own peculiar style, was Haydn, whose 'Creation' and 'Seasons,' owe half their charm to their pictorial Recitatives. Mozart was so uniformly great, in his declamatory passages, that it is almost impossible to decide upon their comparative merits; though he has certainly never exceeded the perfection of 'Die Weiselehre dieser Knaben,' or 'Non temer.' Beethoven attained his highest flights in 'Abscheulicher! wo eilst du hin?' and 'Ah, perfido!' Spohr, in 'Faust,' and 'Die letzten Dinge.' Weber, in 'Der Freischütz.' The works of Cimarosa, Rossini, and Cherubini, abound in examples of Accompanied Recitative, which rival their Airs in beauty: and it would be difficult to point out any really great Composer who has failed to appreciate the value of Scarlatti's happy invention.

Yet, even this invention failed, either to meet the needs of the Dramatic Composer, or to exhaust his ingenuity. It was reserved for Gluck to strike out yet another form of Recitative, destined to furnish a more powerful engine for the production of a certain class of effects than any that had preceded it. He it was, who first conceived the idea of rendering the Orchestra, and the Singer, to all outward appearance, entirely independent of each other: of filling the Scene, so to speak, with a finished orchestral groundwork, complete in itself, and needing no vocal Melody to enhance its interest, while the Singer declaimed his part in tones, which, however

artfully combined with the Instrumental Harmony, appeared to have no connection with it whatever; the resulting effect resembling that which would be produced, if, during the interpretation of a Symphony, some accomplished Singer were to soliloquise, aloud, in broken sentences, in such wise as neither to take an ostensible share in the performance, nor to disturb it by the introduction of irrelevant discord. An early instance of this may be found in 'Orfeo.' After the disappearance of Euridice, the Orchestra plays an excited Crescendo, quite complete in itself, during the course of which Orfeo distractedly calls his lost Bride, by name, in tones which harmonise with the Symphony, yet have not the least appearance of belonging to it. In 'Iphigénie en Tauride,' and all the later Operas, the same device is constantly adopted; and modern Composers have also used it, freely—notably Spohr, who opens his 'Faust' with a Scene, in which a Band behind the stage plays the most delightful of Minuets, while Faust and Mephistopheles sing an ordinary Recitative, accompanied by the usual Chords played by the regular Orchestra in front.

By a process of natural, if not inevitable development, this new style led to another, in which the Recitative, though still distinct from the Accompaniment, assumed a more measured tone, less melodious than that of the Air, yet more so, by far, than that used for ordinary declamation. Gluck has used this peculiar kind of *Mezzo Recitativo* with indescribable power, in the Prison Scene, in 'Iphigénie en Tauride.' Spohr employs it freely, almost to the exclusion of symmetrical Melody, in 'Die letzten Dinge.' Wagner makes it his *cheval de bataille*, introducing it everywhere, and using it, as an ever-ready medium, for the production of some of his most powerful Dramatic Effects. We have already discussed his theories on this subject, so fully, that it is unnecessary to revert to them here. [See OPERA, vol. ii. pp. 526–529.] Suffice it to say that his *Melos*, though generally possessing all the more prominent characteristics of pure Recitative, sometimes approaches so nearly to the rhythmic symmetry of the Song, that—as in the case of 'Nun sei bedankt, mein lieben Schwann!'—it is difficult to say, positively, to which class it belongs. We may, therefore, fairly accept this as the last link in the chain which fills up the long gap between simple 'Recitativo secco,' and the finished Aria. [W.S.R.]

RECITING-NOTE (Lat. *Repercussio, Nota dominans*). A name sometimes given to that important note, in a Gregorian Tone, on which the greater portion of every Verse of a Psalm, or Canticle, is continuously recited.[1]

As this particular note invariably corresponds with the Dominant of the Mode in which the Psalm-Tone is written, the terms, Dominant, and Reciting-Note, are frequently treated as interchangeable. [See MODES, THE ECCLESIASTICAL, vol. ii. p. 342.] The Reciting-Notes of the first eight Tones, therefore, will be A, F, C, A, C, A, D, and C, respectively.

The Reciting-Note makes its appearance twice, in the course of every Tone: first, as the initial member of the Intonation, and, afterwards, as that of the Ending; as shewn in the following example, in which it is written, each time, in the form of a Large.

Tone I.

The only exception to the general rule is to be found in the Tonus Peregrinus (or Irregularis), in which the true Dominant of the Ninth Mode (E) is used for the first Reciting-Note, and D for the second.

The Reciting-Notes of Tones III, V, VII, VIII, and IX, are so high that they cannot be sung, at their true pitch, without severely straining the Voice; in practice, therefore, these Tones are almost always transposed. An attempt has been sometimes made so to arrange their respective pitches as to let one note—generally A—serve for all. This plan may, perhaps, be found practically convenient: but it shews very little concern for the expression of the words, which cannot but suffer, if the jubilant phrases of one Psalm are to be recited on exactly the same note as the almost despairing accents of another. [W.S.R.]

RECORDER. An instrument of the flute family, now obsolete. Much fruitless ingenuity has been exercised as to the etymology of the name; a specimen of which may be seen in the Pictorial Edition of Shakespeare, on the passage in Hamlet, Act iii, Sc. 2. The English verb 'to record' may be referred to the Latin root *Cor*. 'Recordare Jesu pie' forms the opening of one of the hymns of the ancient church, embodied in the requiem or funeral mass. Here it has simply the sense of 'to remember'[2] or 'to take note of'—a signification which has descended to the modern words Records and Recorder. But there was evidently from early times a parallel meaning of 'to sing, chant,' or 'to warble like birds.' This appears plainly in the beautiful passage of Shakespeare[3]—

> To the lute
> She sang, and made the night-bird mute
> That still *records* with moan.

'To record,' says an old writer, 'among fowlers, is when the bird begins to tune or sing within itself.'

It is possibly from this that the name of the instrument is derived. In any case it appears in one of the 'proverbis' written about Henry VII.'s time on the walls of the manor house at Leckingfield. It is there said to 'desire' the mean part, 'but manifold fingering and stops bringeth high notes from its clear tones.' In the catalogue of instruments left by Henry VIII. are Recorders of box, oak, and ivory, great and

[1] In accordance with this definition, the term should also be applied to the first notes of the first and third sections of a Double Chaunt; but, as the selection of these notes is subject to no rule whatever, the word is very rarely used in connection with them.

[2] Compare the expression, 'to get by *heart*.'

[3] Pericles, Act. iv.

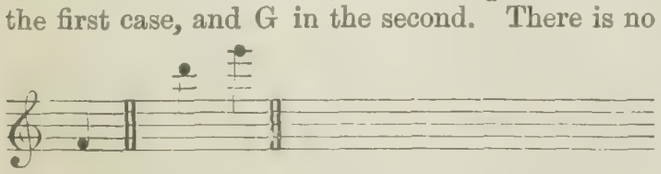
small, two base Recorders of walnut, and one great base Recorder.

The passage in Hamlet referring to the instrument (Act iii. Sc. 2), is well known, and in the Midsummer Night's Dream, Shakespeare says: 'He hath played on his prologue like a child on a recorder.' Sir Philip Sidney describes how 'the shepherds, pulling out recorders, which possessed the place of pipes, accorded their music to the others' voice.' Bacon, in the Sylva Sylvarum, Century III. 221, goes at length into the mechanism of the instrument. He says it is straight, and has a lesser and a greater bore both above and below; that it requires very little breath from the blower, and that it has what he calls a 'fipple' or stopper. He adds that 'the three uppermost holes yield one tone, which is a note lower than the tone of the first three.' This last paragraph begets a suspicion that the learned writer was not practically acquainted with the method of playing this instrument. Milton[1] speaks of

> The Dorian mood
> Of flutes and soft recorders.

But the most definite information we possess as to the instrument is derived from two similar works published respectively in 1683 and 1686. The former is named 'The Genteel Companion, being exact directions for the Recorder, with a collection of the best and newest tunes and grounds extant. Carefully composed and gathered by Humphrey Salter, London. Printed for Richard Hunt and Humphrey Salter at the Lute in St. Paul's Churchyard, 1683.' The latter is entitled 'The delightful Companion, or choice New Lessons for the Recorder or Flute, etc. London: printed for John Playford at his shop near the Temple Church, and for John Carr at his shop at the Middle Temple Gate 1686. Second edition corrected.'

The first of these works has a frontispiece showing a lady and gentleman sitting at a table, with two music books; the gentleman, with his legs gracefully crossed, is playing a recorder. The lower end rests on his knee, and the flageolet-shaped mouthpiece at the top end is between his lips. The book describes the peculiarity of the instrument, from which Mr. Chappell considers the name to have been derived—namely, a hole situated in the upper part, between the mouthpiece and the top hole for the fingers, and apparently covered with thin bladder, or what is now termed 'goldbeater's skin,' with a view of affecting the quality of tone. Two scales or gamuts are given in the usual G clef, the former containing 13, the other 16 notes. The lowest note in both cases is F, and the highest is D in the first case, and G in the second. There is no

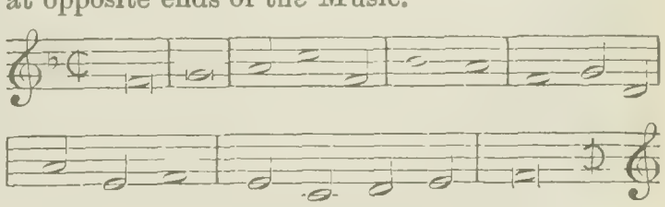


evidence of any keys for producing semitones, which are shown by the scales to have been obtained by cross-fingering. The keys in which the tunes are set comprise C, with G, D and A on the sharp side, F and B♭ on the flat side.

The edition of 'The delightful Companion' printed three years later gives very explicitly the number of holes, but omits mention of the closed intermediate orifice. It will be remarked that 'Recorder' and 'Flute' are used synonymously on this title-page. 'Observe', says the writer, 'there is eight holes upon the pipe, viz. seven before, and one underneath which we call the uppermost, and is to be stopped with your thumb, the next with your forefinger,' etc. Cross-fingerings are here also given to produce the first two or there intermediate semitones on either side of the natural key.

Mr. Chappell quotes the late Mr. Ward as his authority for having seen 'old English flutes' with a hole bored through the side in the upper part of the instrument, and covered with a thin piece of skin. An English Recorder of the 17th century was shown in the Loan Exhibition of Musical Instruments at South Kensington. It was 26 inches in length—agreeing well with the frontispiece of the Genteel Companion—and therefore not at all like the little pipe usually brought on the stage in Hamlet. Near the top, about an inch from the mouth-hole, it was furnished with a hole covered with thin bladder as above described. [W.H.S.]

RECTE ET RETRO, PER (*Imitatio cancrizans, Imitatio per Motum retrogradum, Imitatio recurrens*; Ital. *Imitazione al Rovescio, o alla Riversa*; Eng. Retrograde Imitation). A peculiar kind of Imitation, so constructed that the melody may be sung backwards as well as forwards; as shewn in the following Two-Part Canon, which must be sung, by the First Voice, from left to right, and by the Second, from right to left, both beginning together, but at opposite ends of the Music.



The earliest known instances of Retrograde Imitation are to be found among the works of the Flemish Composers of the 15th century, who delighted in exercising their ingenuity, not only upon the device itself, but also upon the Inscriptions prefixed to the Canons in which it was employed. The Netherlanders were not, however, the only Musicians who indulged successfully in this learned species of recreation. Probably the most astonishing example of it on record is the Motet,[2] 'Diliges Dominum,' written by William Byrd for four voices—Treble, Alto, Tenor, and Bass—and transmuted into an 8-part composition, by adding a Second Treble, Alto, Tenor, and Bass, formed by singing the four First Parts backwards. It is scarcely possible to study this complication attentively, without feeling one's brain turn

[1] Paradise Lost, i. 550.

[2] Reprinted by Hawkins, 'History,' ch. 96.

giddy; yet, strange to say, the effect produced is less curious than beautiful.

There is little doubt that the idea of singing music from right to left was first suggested by those strange Oracular Verses[1] which may be read either backwards or forwards, without injury to words or metre; such as the well-known Pentameter—

Roma tibi subito motibus ibit amor.

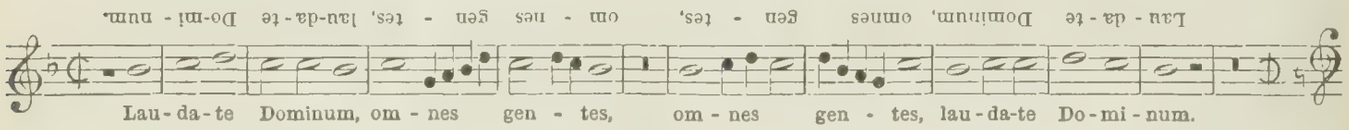
or the cry of the Evil Spirits—

In girum imus noctu ecce ut consumimur igni.

The Canons were frequently constructed in exact accordance with the method observed in these curious lines; and innumerable quaint conceits were invented, for the purpose of giving the Singers some intimation of the manner in which they were to be read. 'Canit more Hebræorum' was a very common Motto. 'Misericordia et veritas obviaverunt sibi' indicated that the Singers were to begin at opposite ends, and meet in the middle. In the Second 'Agnus Dei' of his 'Missa Græcorum,' Hobrecht wrote, 'Aries vertatur in Pisces'—Aries being the first Sign of the Zodiac, and Pisces the last. In another part of the same Mass he has given a far more mysterious direction—

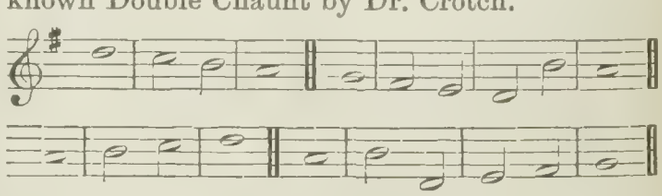
Tu tenor cancriza et per antifrasin canta,
Cum furcis in capite antifrasizando repete.

This introduces us to a new complication; the secret of the Motto being, that the Tenor is not only to sing backwards, but to invert the intervals ('per antifrasin canta'), until he reaches the 'Horns'—that is to say, the two cusps of the semicircular Time-Signature—after which he is to sing from left to right, though still continuing to invert the Intervals. This new Device, in which the Intervals themselves are reversed, as well as the sequence of the notes, is called 'Retrograde Inverse Imitation' (Lat. *Imitatio cancrizans motu contrario*; Ital. *Imitazione al contrario riverso*). It might have been thought that this would have contented even Flemish ingenuity. But, it did not. The Part-Books had not yet been turned upside down! In the subjoined example, we have endeavoured to show, in an humble way, the manner in which this most desirable feat may also be accomplished. The two Singers, standing face to face, hold the book between them; one looking at it from the ordinary point of view, the other, upsidedown, and both reading from left to right—that is to say, beginning at opposite ends. The result, if not strikingly beautiful, is, at least, not inconsistent with the laws of Counterpoint.



This species of Imitation was indicated by the Inscriptions, 'Respice me, ostende mihi faciem tuam,' 'Duo adversi adverse in unum,' and others equally obscure. The last-named Motto graces Morton's 'Salve Mater'—a triumph of ingenuity which, no doubt, was regarded, in its time, as an Art-Treasure of inestimable value. The style was, indeed, for a long time, exceedingly popular; and, even as late as 1690, Angiolo Berardi thought it worth while to give full directions, in his 'Arcani Musicali,' for the manufacture of Canons of this description, though the true artistic feeling—to say nothing of the plain common-sense—of the School of Palestrina had long since banished them, not only from the higher kinds of Ecclesiastical Music, but from the Polyphonic 'Chanson' also. This reform, however, was not effected without protest. There were learned Composers, even in the 'Golden Age,' who still clung to the traditions of an earlier epoch; and, among them, Francesco Suriano, the Second 'Agnus Dei' of whose Missa 'Super voces musicales' contains a Canon, with the Inscription, 'Justitia et Pax osculatæ sunt,' in which the Guida, formed on the six sounds of the Hexachordon durum, is sung, by the First Tenor, in the usual way, and in the Alto Clef, while the Cantus Secundus replies, reading from the same copy, in the Treble Clef, backwards, and upsidedown. But, in this instance, the simple notes of the Guida are accompanied by six 'Free Parts,' by the skilful management of which the Composer has produced an effect well worthy of his reputation.[2]

Retrograde Imitation has survived, even to our own day; and, in more than one very popular form. In the year 1791, Haydn wrote, for his Doctor's Degree, at the University of Oxford, a 'Canon cancrizans, a tre' ('Thy Voice, O Harmony') which will be found in vol. i. p. 710*b*; and he has also used the same Device, in the Minuet of one of his Symphonies. Some other modern Composers have tried it, with less happy effect. But, perhaps it has never yet appeared in a more popular form than that of the well-known Double Chaunt by Dr. Crotch.



It would be difficult to point to two Schools more bitterly opposed to each other than those of the early Netherlanders, and the English Cathedral writers of the 19th century. Yet, here we see an Artifice, invented by the former, and used by one of the latter, so completely *con amore*, that, backed by the Harmonies peculiar to the modern 'free style,' it has attained a position quite unassailable, and will probably last as long as the Anglican Chaunt itself shall continue in

1 Versus recurrentes, said to have been first invented by the Greek Poet, Sotades, during the reign of Ptolemy Philadelphus. The examples we have quoted are, however, of much later date; the oldest of them being certainly not earlier than the 7th century.

2 The entire Mass is reprinted, from the original edition of 1609, in vol. i. of Proske's 'Selectus novus Missarum'; and the Canon is there shewn, both in its ænigmatical form, and in its complete resolution.

use. With this fact before us, we shall do well to pause, before we consign even the most glaring pedantries of our forefathers to oblivion. [W.S.R.]

REDEKER, Louise Dorette Auguste, a contralto singer, who made her first appearance in London at the Philharmonic Concert of June 19, 1876, and remained a great favourite until she retired from public life on her marriage, Oct. 19, 1879. She was born at Duingen, Hanover, Jan. 19, 1853, and from 1870 to 73 studied in the Conservatorium at Leipzig, chiefly under Konewka. She sang first in public at Bremen in 1873. In 1874 she made the first of several appearances at the Gewandhaus, and was much in request for concerts and oratorios in Germany and other countries during 74 and 75. In England she sang at all the principal concerts, and at the same time maintained her connexion with the Continent, where she was always well received. Her voice is rich and sympathetic; she sings without effort and with great taste. [G.]

REDFORD, John, was organist and almoner, and master of the Choristers of St. Paul's Cathedral in the latter part of the reign of Henry VIII (1491–1547). Tusser, the author of the 'Hundred good points of Husbandrie' was one of his pupils. An anthem, 'Rejoice in the Lorde alway,' printed in the appendix to Hawkins's History and in the Motett Society's first volume, is remarkable for its melody and expression. Some anthems and organ pieces by him are in the MS. volume collected by Thomas Mulliner, master of St. Paul's School, afterwards in the libraries of John Stafford Smith and Dr. Rimbault, and now in the British Museum. A motet, some fancies and a voluntary by him are in MS. at Christ Church, Oxford. His name is included by Morley in the list of those whose works he consulted for his 'Introduction.' [W.H.H.]

REDOUTE. Public assemblies at which the guests appeared with or without masks at pleasure. The word is French, and is explained by Voltaire and Littré as being derived from the Italian *ridotto*—perhaps with some analogy to the word 'resort.' The building used for the purpose in Vienna, erected in 1748, and rebuilt in stone in 1754, forms part of the Burg or Imperial Palace, the side of the oblong facing the Josephs-Platz. There was a *grosse* and a *kleine* Redoutensaal. In the latter Beethoven played a concerto of his own at a concert of Haydn's, Dec. 18, 1795. The rooms were used for concerts till within the last ten years. The masked balls were held there during the Carnival, from Twelfth Night to Shrove Tuesday, and occasionally in the weeks preceding Advent; some being public, *i.e.* open to all on payment of an entrance fee, and others private. Special nights were reserved for the court and the nobility. The 'Redoutentänze'—Minuets, Allemandes, Contredanses, Schottisches, Anglaises, and Ländler—were composed for full orchestra, and published (mostly by Artaria) for pianoforte. [1] Mozart, Haydn, [2] Beethoven, Hummel, Woelfl, Gyrowetz, and others, have left dances written for this purpose. Under the Italian form of *Ridotto*, the term was much employed in England in the last century. [C.F.P.]

REDOWA, a Bohemian dance which was introduced into Paris in 1846 or 47, and quickly attained for a short time great popularity, both there and in London, although now seldom danced. In Bohemia there are two variations of the dance, the Rejdovák, in 3-4 or 3-8 time, which is more like a waltz, and the Rejdovacka, in 2-4 time, which is something like a polka. The following words are usually sung to the dance in Bohemian villages:

Kann nicht frei'n, weil Eltern
Nicht ihr Jawort gaben:
Weil ich kommen könnte,
Wo kein Brot sie haben—
Wo kein Brot sie haben,
Keine Kuchen backen,
Wo kein Heu sie mähen
Und kein Brennholz hacken.

The ordinary Redowa is written in 3–4 time (Maelzel's Metronome ♩ = 160). The dance is something like a Mazurka, with the rhythm less strongly marked. The following example is part of a Rejdovák which is given in Köhler's 'Volkstänze aller Nationen'—

[W.B.S.]

REED (Fr. *Anche*; Ital. *Ancia*; Germ. *Blätt, Rohr*). The speaking part of many instruments, both ancient and modern; the name being derived from the material of which it has been immemorially constructed. This is the outer silicious layer of a tall grass, the *Arundo Donax* or *Sativa*, growing in the South of Europe. The substance in its rough state is commonly called 'cane,' though differing from real cane in many respects. The chief supply is now obtained from Fréjus on the Mediterranean coast. Many other materials, such as lance-wood, ivory, silver, and 'ebonite,' or hardened india-rubber, have been experimentally substituted for the material first named; but hitherto without success. Organ reeds were formerly made of hard wood, more recently of brass, German silver, and steel. The name Reed is, however, applied by organ-builders to the metal tube or channel against which the

1 See Köchel's Catalogue, No. 599, etc.
2 See Nottebohm's Thematic Catalogue, Section ii, pages 135–137.

vibrating tongue beats, rather than to the vibrator itself.

Reeds are divided into the Free and the Beating; the latter again into the Single and the Double forms. The Free reed is used in the harmonium and concertina, its union with Beating reeds in the organ not having proved successful. [See FREE-REED, vol. i. p. 562.] The vibrator, as its name implies, passes freely through the long slotted brass plate to which it is adapted; the first impulse of the wind tending to push it within the slot and thus close the aperture. In 'percussion' harmoniums the vibrator is set suddenly in motion by a blow from a hammer connected with the keyboard. [See HARMONIUM, vol. i. p. 667 *b*.] The Beating reed is that of the organ and clarinet. In this the edges of the vibrator overlap the wind-passage so as to beat against it. In the organ reed, however, the brass tongue is burnished backwards so as to leave a thin aperture between it and the point of the channel against which it strikes; this the pressure of wind at first tends to close, thus setting it in vibration. In the clarinet, the reed is flat and spatula-like (hence the German name *Blätt* opposed to *Rohr* in the oboe and bassoon), the mouthpiece being curved backwards at the point to allow of vibration. [See CLARINET.] The Double reed has already been described under oboe and bassoon [See OBOE; BASSOON.] It is possible to replace it in both these instruments by a single reed of clarinet shape, beating against a small wooden mouthpiece. The old Dolcino or Alto-fagotto was so played in the band of the Coldstream Guards by a great artist still living, Mr. Henry Lazarus, when a boy. The double reed, however, much improves the quality of tone, and gives greater flexibility of execution to both the instruments named above. [W.H.S.]

REEDSTOP. When the pipes controlled by a draw-stop produce their tone by means of a vibrating reed, the stop is called a Reedstop; when the pipes contain no such reeds, but their tone is produced merely by the impinging of air against a sharp edge, the stop is called a Flue-stop. Any single pipe of the former kind is called a Reed-pipe, any single pipe of the latter kind, a Flue-pipe. Pipes containing Free reeds are seldom used in English organs, but are occasionally found in foreign instruments under the name of Physharmonika, etc. [See REED.] The reedstops consisting of 'striking-reeds' are voiced in various ways to imitate the sounds of the Oboe, Cor Anglais, Clarinet, Bassoon, Horn, Cornopean, Trumpet, etc., all of which are of 8ft. pitch (that is, in unison with the diapason). The Clarion 4-ft. is an octave-reedstop. The Double Trumpet 16-ft. is a reedstop one octave lower in pitch than the diapason; it is also called a Contra-posaune, or sometimes a Trombone. Reedstops of the trumpet class are often placed on a very high pressure of wind under such names as Tuba mirabilis, Tromba major, etc.; such high-pressure reedstops are generally found on the Solo-manual; the reedstops of the Great organ being of moderate loudness; those on the Choir organ altogether of a softer character. A very much larger proportion of reedstops is usually assigned to the Swell organ than to any other manual, owing to the brilliant *crescendo* which they produce as the shutters of the swell-box open. Reedstops are said to be 'harmonic' when the tubes of the pipes are twice their normal length and perforated halfway with a small hole. Their tone is remarkably pure and brilliant. The best modern organ builders have made great improvements in the voicing of reedstops, which are now produced in almost infinite variety both as to quality and strength of tone. [J.S.]

REED, THOMAS GERMAN, born at Bristol June 27, 1817. His father was a musician, and the son first appeared, at the age of ten, at the Bath Concerts as a PF. player with John Loder and Lindley, and also sang at the Concerts and at the Bath Theatre. Shortly after, he appeared at the Haymarket Theatre, London, where his father was conductor, as PF. player, singer, and actor of juvenile parts. In 1832 the family moved to London, and the father became leader of the band at the Garrick Theatre. His son was his deputy, and also organist to the Catholic Chapel, Sloane Street. German Reed now entered eagerly into the musical life of London, was an early member of the Society of British Musicians, studied hard at harmony, counterpoint, and PF. playing, composed much, gave many lessons, and took part in all the good music he met with. His work at the theatre consisted in great measure of scoring and adapting, and getting up new operas, such as 'Fra Diavolo' in 1837. In 1838 he became Musical Director of the Haymarket Theatre, a post which he retained till 1851. In 1838 he also succeeded Mr. Tom Cooke as Chapelmaster at the Royal Bavarian Chapel, where the music to the Mass was for long noted both for quality and execution. Beethoven's Mass in C was produced there for the first time in England, and the principal Italian singers habitually took part in the Sunday services. At the Haymarket, for the Shakespearian performances of Macready, the Keans, the Cushmans, etc., he made many excellent innovations, by introducing, as overtures and entractes, good pieces, original or scored by himself, instead of the rubbish usually played at that date. During the temporary closing of the theatre Reed did the work of producing Pacini's opera of 'Sappho' at Drury Lane (April 1, 1843 —Clara Novello, Sims Reeves, etc.). In 1844 he married Miss Priscilla Horton, and for the next few years pursued the same busy, useful, miscellaneous life as before, directing the production of English opera at the Surrey, managing Sadler's Wells during a season of English opera, with his wife, Miss Louisa Pyne, Harrison, etc., conducting the music at the Olympic under Mr. Wigan's management, and making prolonged provincial tours.

In 1855 he started a new class of performance which, under the name of 'Mr. and Mrs. German Reed's Entertainment,' has made his name widely

and favourably known in England. Its object was to provide good dramatic amusement for a large class of society who, on various grounds, objected to the theatres. It was opened at St. Martin's Hall, April 2, 1855, as 'Miss P. Horton's Illustrative Gatherings,' with two pieces called 'Holly Lodge' and 'The Enraged Musician' (after Hogarth), written by W. Brough, and presented by Mrs. Reed, with the aid of her husband only, as accompanyist and occasional actor. In Feb. 1856 they removed to the Gallery of Illustration, Regent Street, and there produced 'A Month from Home,' and 'My Unfinished Opera' (April 27, 57); 'The Home Circuit' and 'Seaside Studies' (June 20, 59)—all by W. Brough; 'After the Ball,' by Edmund Yates; 'Our Card Basket,' by Shirley Brooks; 'An Illustration on Discord' ('The Rival Composers') by Brough (Ap. 3, 61); and 'The Family Legend,' by Tom Taylor (Mar. 31, 62). They then engaged Mr. John Parry, and produced the following series of pieces specially written for this company of three, and including some of Mr. Parry's most popular and admirable songs, in the characters of Paterfamilias at the Pantomime, Mrs. Roseleaf, etc., etc.

'The Charming Cottage.' Ap. 6, 1863.
'The Pyramid.' Shirley Brooks. Feb. 7, 64.
'The Bard and his Birthday.' W. Brough. Ap. 20, 64.
'The Peculiar family.' Do. Mar. 15, 65.
'The Yachting Cruise.' F. C. Burnand. Ap. 2, 66.
'A Dream in Venice.' T. W. Robertson. Mar. 18, 67.
'Our Quiet Chateau.' R. Reece. Dec. 26, 67.
'Inquire within.' F. C. Burnand. July 22, 68.
'Last of the Paladins.' R. Reece. Dec. 23, 68.

At this period the company was further increased by the addition of Miss Fanny Holland and Mr. Arthur Cecil, and soon after by Mr. Corney Grain and Mr. Alfred Reed. The following was the repertoire during this last period:—

'Lischen and Fritschen.' Offenbach. Feb. 8, 59.
'No Cards,' W. S. Gilbert, and 'Cox and Box,' Burnand and Sullivan. Mar. 29, 69. (A. Cecil's 1st appearance.)
'Ages Ago.' W. S. Gilbert and F. Clay. Nov. 22, 69.
'Beggar my Neighbour.' F. C. Burnand. Mar. 28, 70.
'Our Island Home.' W. S. Gilbert. June 20, 70.
'The Bold Recruit.' F. Clay. July 19, 70.
'A Sensation Novel.' Do. Jan. 30, 71.
'Near Relations.' Arthur Sketchley. Aug. 14, 71.
'King Christmas.' Planché. Dec. 26, 71.
'Charity begins at Home.' B. Rowe and Cellier. Feb. 7, 72.
'My Aunt's Secret.' Burnand and Molloy. Mar. 3, 72.
'Happy Arcadia.' W. S. Gilbert and F. Clay. Oct. 28, 72.
'Very Catching.' Burnand and Molloy. Nov. 18, 72.
'Mildred's Well.' Burnand and German Reed. May 5, 73.

When the lease of the Gallery of Illustration expired, the entertainment was transferred to St. George's Hall, and there the following entertainments were produced:—

'He's Coming.' F. C. Burnand and German Reed.
'Too Many by One.' F. C. Burnand and F. Cowan.
'The Three Tenants'; 'Ancient Britons.' Gilbert a Beckett and German Reed.
'A Tale of Old China.' F. C. Burnand and Molloy.
'Eyes and no Eyes.' W. S. Gilbert and German Reed.
'A Spanish Bond'; 'An Indian Puzzle'; 'The Wicked Duke.' Gilbert a Beckett and German Reed.
'Matched and Match.' F. C. Burnand and German Reed.
'A Puff of Smoke.' C. J. Rowe and Mme. Goetz.
'Our Dolls' House.' C. J. Rowe and Cotsford Dick.
'A Night's Surprise.' West Cromer and German Reed.
'Foster Brothers.' F. C. Burnand and King Hall.
'Happy Bungalow.' A. Law.

During the Galley of Illustration period a diversion was made by the introduction of 'Opere di Camera,' for four characters. These comprised:—

'Jessy Lea.' Oxenford and Macfarren.
'Too Many Cooks.' Offenbach.
'The Sleeping Beauty.' Ballé.
'The Soldier's Legacy.' Oxenford and Macfarren.
'Widows bewitched.' Virginia Gabriel.
'A Fair Exchange'; 'A Happy Result'; 'Ching Chow Hi.' All three by Offenbach.

While the entertainment still remained at the Gallery of Illustration, Reed became lessee of St. George's Hall for the production of Comic Opera. He engaged an orchestra of 40 and a strong chorus, and 'The Contrabandista' (Burnand and Sullivan), 'L'Ambassadrice' (Auber), 'Ching Chow Hi' and the 'Beggar's Opera' were produced, but without the necessary success. Mr. Reed then gave his sole attention to the Gallery of Illustration, in which he has been uniformly successful, owing to the fact that he has carried out his entertainments, not only with perfect respectability, but always with great talent, much tact and judgment, and constant variety.

His brothers, ROBERT HOPKÉ and WILLIAM, are violoncello players; Robert has been Principal Cello in the Crystal Palace Band for many years.

MRS. GERMAN REED, *née* PRISCILLA HORTON, was born at Birmingham, Jan. 1, 1818. From a very early age she showed unmistakable qualifications for a theatrical career, in a fine strong voice, great musical ability, and extraordinary power of mimicry. She made her first appearance at the age of ten, at the Surrey Theatre, under Elliston's management, as the Gipsy Girl in 'Guy Mannering.' After this she was constantly engaged at the principal metropolitan theatres in a very wide range of parts. Her rare combination of great ability as a singer, with conspicuous gifts as an actress, and most attractive appearance, led to a very satisfactory step in her career. On Aug. 16, 1837, she signed an agreement with Mr. Macready for his famous performances at Covent Garden and Drury Lane, in which she acted Ariel, Ophelia, the Fool[1] in 'Lear,' the Attendant Spirit in 'Comus,' Philidel in 'King Arthur,' and Acis in 'Acis and Galatea.' After the conclusion of this memorable engagement, Miss Horton became the leading spirit in Planché's graceful burlesques at the Haymarket Theatre. On Jan. 20, 1844, she married Mr. German Reed, and the rest of her career has been related under his name. [G.]

REEL (Anglo-Saxon *hreol*, connected with the Suio-Gothic *rulla*, to whirl). An ancient dance, the origin of which is enveloped in much obscurity. The fact of its resemblance to the Norwegian *Hallung*, as well as its popularity in Scotland, and its occurrence in Denmark, the north of England, and Ireland, has led most writers to attribute to it a Scandinavian origin, although its rapid movements and lively character are opposed to the oldest Scandinavian dance-rhythms. The probability is that the reel is of Keltic origin, perhaps indigenous to Britain, and from there introduced into Scandinavia. In Scotland the reel is usually danced by two couples; in England—where it is now almost only found in connection with the Sword Dance, as performed in the North Riding of Yorkshire—it is danced

[1] See Macready's Reminiscences, by Sir F. Pollock, ii. 97.

by three couples. The figures of the reel differ slightly according to the locality; their chief feature is their circular character, the dancers standing face to face and describing a series of figures of eight. The music consists of 8-bar phrases, generally in common time, but occasionally in 6-4. The Irish reel is played much faster than the Scotch; in Yorkshire an ordinary hornpipe-tune is used. The following example, 'Lady Nelson's Reel,' is from a MS. collection of dances in the possession of the present writer.

An example of the Danish reel will be found in Engel's 'National Music' (London, 1866).

One of the most characteristic Scotch reels is the Reel of Tulloch (Thulichan) :—

Others, equally good, are 'Colonel McBean's Reel,' 'Ye're welcome, Charlie Stuart,' 'The Cameronian Rant,' 'Johnnie's friends are ne'er pleased,' and 'Flora Macdonald.'

For the slow Reel see STRATHSPEY. [W.B.S.]

REEVE, WILLIAM, born 1757; after quitting school, was placed with a law stationer in Chancery Lane, where his fellow writer was Joseph Munden, afterwards the celebrated comedian. Determined however upon making music his profession, he became a pupil of Richardson, organist of St. James, Westminster. In 1781 he was appointed organist of Totnes, Devonshire, where he remained till about 1783, when he was engaged as composer at Astley's. He was next for some time an actor at the regular theatres. In 1791, being then a chorus singer at Covent Garden, he was applied to to complete the composition of the music for the ballet-pantomime of 'Oscar and Malvina,' left unfinished by Shield, who, upon some differences with the manager, had resigned his appointment. Reeve thereupon produced an overture and some vocal music, which were much admired, and led to his being appointed composer to the theatre. In 1792 he was elected organist of St. Martin, Ludgate. In 1802 he became part proprietor of Sadler's Wells Theatre. His principal dramatic compositions were 'Oscar and Malvina,' and 'Tippoo Saib,' 1791; 'Orpheus and Eurydice,' partly adapted from Gluck, 1792; 'The Apparition,' 'British Fortitude,' 'Hercules and Omphale,' and 'The Purse,' 1794; 'Merry Sherwood,' 1795; 'Harlequin and Oberon,' 1796; 'Bantry Bay,' 'The Round Tower,' and 'Harlequin and Quixote,' 1797; 'Joan of Arc,' 'Ramah Droog' (with Mazzinghi), 1798; 'The Turnpike Gate' (with Mazzinghi), and 'The Embarkation,' 1799; 'Paul and Virginia' (with Mazzinghi), 1800; 'Harlequin's Almanack,' 'The Blind Girl' (with Mazzinghi), 1801; 'The Cabinet' (with Braham, Davy, and Moorehead), and 'Family Quarrels' (with Braham and Moorehead), 1802; 'The Caravan,' 1803; 'The Dash,' 'Thirty Thousand' (with Davy and Braham), 1804; 'Out of Place' (with Braham), 1805; 'The White Plume,' and 'Au Bratach,' 1806; 'Kais' (with Braham), 1808; 'Tricks upon Travellers' (part), 1810; and 'The Outside Passenger' (with Whitaker and D. Corri), 1811. He wrote music for some pantomimes at Sadler's Wells; amongst them 'Bang up,' by C. Dibdin, jun., containing the favourite Clown's song, 'Tipitywichet,' for Grimaldi. He was also author of 'The Juvenile Preceptor, or Entertaining Instructor,' etc. He died June 22, 1815. [W.H.H.]

REEVES, JOHN SIMS, son of a musician, was born at Shooter's Hill, Kent, Oct. 21, 1822. He received his early musical instruction from his father, and at 14 obtained the post of organist at North Cray Church, Kent. Upon gaining his mature voice he determined on becoming a singer, and in 1839 made his first appearance in that capacity at the Newcastle-upon-Tyne Theatre, as Count Rudolpho in 'La Sonnambula,' and subsequently performed Dandini in 'La Cenerentola,' and other baritone parts. The true quality of his voice, however, having asserted itself, he placed himself under Hobbs and T. Cooke, and in the seasons of 1841–42 and 1842–43 was a member of Macready's company at Drury Lane, as one of the second tenors, performing such parts as the First Warrior in Purcell's 'King Arthur,' Ottocar in 'Der Freischütz,' and the like. He then went to the continent to prosecute his studies, and in a short time afterwards appeared at Milan as Edgardo in Donizetti's 'Lucia di Lammermoor' with marked success. Returning to England he was engaged by Jullien for Drury Lane, where he made his first appearance on Monday, Dec. 6, 1847, as Edgar in 'The Bride of Lammermoor,' and at once took position as an actor and singer of the first rank. 'His voice had become a pure high tenor of delicious

quality, the tones vibrating and equal throughout, very skilfully managed, and displaying remarkably good taste. His deportment as an actor was natural and easy, his action manly and to the purpose, and exhibiting both passion and power, without the least exaggeration.' A fortnight later he performed his first original part, Lyonnel in Balfe's 'Maid of Honour.' In 1848 he was engaged at Her Majesty's Theatre, and came out as Carlo in Donizetti's 'Linda di Chamounix.' In the autumn he was engaged at the Norwich Musical Festival, where he showed his ability as an oratorio singer by an extraordinarily fine delivery of 'The enemy said' in 'Israel in Egypt.' On Nov. 24 following he made his first appearance at the Sacred Harmonic Society in Handel's 'Messiah.' The rapid strides which he was then making towards perfection in oratorio were shown—to take a few instances only—by his performance in 'Judas Maccabeus' and 'Samson,' 'Elijah,' 'St. Paul,' and 'Lobgesang,' and 'Eli' and 'Naaman' (both composed expressly for him). But his greatest triumph was achieved at the Handel Festival at the Crystal Palace in 1857, when, after singing in 'Messiah' and 'Judas Maccabeus' with increased reputation, he gave 'The enemy said' in 'Israel in Egypt' with such remarkable power, fire, and volume of voice, breadth of style, and evenness of vocalisation, as completely electrified his hearers. He repeated this wonderful performance at several succeeding festivals. On the stage he has been uniformly successful in all styles, from the simplest old English ballad opera to the most complex modern grand production. A recent letter from Mr. Reeves, published in the Times in Nov. 1880, speaks of his intended retirement from public life as an artist in 1882, and shows in its whole tenor how deep an interest is felt by this great singer in the welfare, in his own country, of the art in which he himself has been so successful. Mr. Reeves married, Nov. 2, 1850, Miss Emma Lucombe, soprano singer, who had been a pupil of Mrs. Blane Hunt, and appeared at the Sacred Harmonic Society's concert of June 19, 1839, and sang there and at other concerts until 1845, when she went to Italy. She returned in 1848, and appeared in opera as well as at concerts. Mrs. Reeves has for some years past retired from public life and occupied herself as a teacher of singing, for which she has a deservedly high reputation. His son Herbert, after a careful education under his father and at Milan, made his successful debut at one of Mr. Ganz's concerts (June 12, 1880), and has already met with great favour from the public. His voice, though not yet so strong as his father's, is of beautiful quality, and in taste, intelligence and phrasing he is all that might be expected from his parentage and education. [W.H.H.]

REFORMATION SYMPHONY, THE. Mendelssohn's own name, and that adopted in England, for his Symphony in D minor, written with a view to performance at the Tercentenary Festival of the Augsburg Protestant Confession, which was intended to be celebrated throughout Germany on June 25, 1830. The first mention of it appears to be in a letter of his own from North Wales, Sept. 2, 1829. On May 15, 1830, he writes from Weimar that it is finished, and when copied will be sent to Leipzig. It was not however then performed; the political troubles of that year prevented any festive demonstrations. In January and March, 1832, it was in rehearsal in Paris, but it did not come to actual performance till Nov. 1832, when it was played under his own direction at Berlin. It was not repeated during his life, but was revived at the Crystal Palace, Sydenham, Nov. 30, 1867. It was published in score and parts by Novello & Co., and by Simrock as 'Symphony No. 5'—Op. 107, No. 36 of the posthumous works. The first Allegro is said to represent the conflict between the old and new religions, and the Finale is founded on Luther's Hymn, 'Ein' veste Burg ist unser Gott.' [G.]

REFRAIN (Fr. *Refrain*; Germ. *Reimkehr*). This word is used in music to denote what in poetry is called a 'burden,' *i. e.* a short sentence or phrase which recurs in every verse or stanza. It was probably first employed in music in order to give roundness and unity to the melody, and was then transferred to the poetry which was written especially for music. Such collections as the 'Échos du temps passé' give an abundance of examples in French music, where songs with refrains are most frequently to be found. 'Lilliburlero' may be cited as one English instance out of many. [See vol. ii. p. 138.] [J.A.F.M.]

REGAL (Fr. *Régale*; It. *Regale* or *Ninfale*). An old German name for a very small organ—also called 'Bibelorgan' or 'Bibelregal,' because it was sometimes so small as to fold up into the size of a Church Bible. It had a single rank of reed-pipes only. Prætorius in his Syntagma, vol. iii. pl. iv. gives a view of one, which in its extended condition, bellows and all, appears to be about 3 ft. 6 in. by 3 ft. He ascribes (ii. p. 73) the invention to a nameless monk; others give it to Roll, an organ-builder at Nuremberg in 1575. The specimen preserved in the Musée of the Conservatoire at Paris is said to date from the end of the 16th century, and has a compass of 4 octaves. The instrument has been long since extinct, but the name 'regal' is still applied in Germany to certain reedstops.

In the inventory of Henry VIII's musical instruments we find 13 pairs of single regalls (the 'pair' meant only one instrument) and 5 pair of double regalls (that is with two pipes to each note). The name continued in use at the English Court down to 1773, the date of the death of Bernard Gates, who was 'tuner of the Regals in the King's household.' [G.]

REGAN, Anna, soprano singer. [See Schimon.]

REGIBO, Abel Benjamin Marie, born at Renaix in Belgium, April 6, 1835, received his first lessons in music from his father, who was director of the choir of the College of St. Hermès in that town. From infancy Regibo showed a

great inclination to music. In 1848 he entered the Conservatoire at Ghent, where he was placed for piano under Max Heyndericks; and in two years, while following the instruction of Joseph Mengal, he obtained the prize for harmony. Gevaert gave him lessons in counterpoint. In 1854 his father removed him to the Conservatoire at Brussels, where Lemmens taught him the organ, and Fétis composition. Among his numerous compositions, the fruit of these studies, there is a trio for piano, harmonium, and cello, dedicated to Fétis. A second trio for the same combination is dedicated to Gevaert. In 1856 Regibo contracted for two years with Messrs Mercklin and Schütze to display their organs and harmoniums, and was publicly heard on the latter in Holland, in London and in Paris. Having found in a garret of his father's house a spinet by Albert Delin of Tournai, dated 1756, which had been the musical instrument of his childhood, he conceived the idea of collecting all the old Belgian clavecins, spinets and dulcimers possible —an idea the successful carrying out of which is likely to make his name widely known. Regibo has proposed to himself the patriotic task of redeeming the works of the old Belgian makers from their unmerited obscurity, and after a quarter of a century's research he has now the largest collection existing of the clavecins of the great Antwerp makers, including the greatest of all, the family of Ruckers. [See RUCKERS; also COLLECTIONS in the Appendix.] To justify the importance of his object he is now engaged upon a technical treatise, soon to be published, upon the last three centuries of this instrumental art of his native country, which has no early rival even of approximate importance except the still earlier efforts of Northern Italy in the same direction. In 1872 Regibo was summoned to his native town to take the direction of the School of Music, a post which he still holds (1881). [A.J.H.]

REGISTER, of an organ. Literally, a set of pipes as recorded or described by the name written on the draw-stop; hence, in general, an organ-stop. The word 'register' is however not quite synonymous with 'stop,' for we do not say 'pull out, or put in, a register,' but, 'a stop,' although we can say indifferently 'a large number of registers' or 'of stops.' The word is also used as a verb; for example, the expression 'skill in registering' or 'registration' means skill in selecting various combinations of stops for use. The word 'stop' is however never used as a verb, in this sense. [J.S.]

REGISTER is now employed to denote a portion of the scale. The 'soprano register,' the 'tenor register,' denote that part of the scale which forms the usual compass of those voices; the 'head register' means the notes which are sung with the head voice; the 'chest register,' those which are sung from the chest; the 'upper register' is the higher portion of the compass of an instrument or voice, and so on. How it came to have this meaning, the writer has not been able to discover. [G.]

REGISTRATION (or REGISTERING) is the only convenient term for indicating the art of selecting and combining the stops or 'registers' in the organ so as to produce the best effect and contrast of tone, and is to the organ what 'orchestration' is to the orchestra. The stops of an organ may be broadly clased under the two divisions of 'flue-stops' and 'reed-stops.' [See ORGAN.] The flue-stops again may be regarded as classed under three sub-divisions—those which represent the pure organ tone (as the diapasons, principal, fifteenth, and mixtures), those which aim at an imitation of string or of reed tone (as the violone, viola, gamba, etc.), and those which represent flute tone. In considering the whole of the stops *en masse*, a distinction may again be drawn between those which are intended to combine in the general tone ('mixing stops') and those, mostly direct imitations of orchestral instruments, which are to be regarded as 'solo stops' to be used for special effects, as the clarinet, orchestral oboe, vox humana, etc. Some stops, such as the harmonic flute, are capable of effective use, with certain limitations, in either capacity.

The use of the pure solo stops is guided by nearly the same æsthetic considerations as the use in the orchestra of the instruments which they imitate [see ORCHESTRATION], by suitability of *timbre* for the expression and feeling of the music. These stops form, however, the smallest and on the whole the least important portion of the instrument.

In the combination of the general mass of stops there are some rules which are invariable—*e.g.* a 'mutation stop,' such as the twelfth, can never be used without the stop giving the unison tone next above it (the fifteenth), and the mixtures can never be used without the whole or the principal mass of the stops giving the sounds below them, except that on the swell manual the mixture may sometimes be used with the 8-feet stops only, to produce a special effect. On the great-organ manual it is generally assumed that the stops are added in the order in which they are always placed, the unison diapason stops and the 16-feet stops lowest, the principal, twelfth, fifteenth, and mixtures in ascending order above them; and the reeds at the top, to be added last, to give the full power of the instrument. But this general rule has its exceptions for special purposes. If it be desired to play a *fugato* passage with somewhat of a light violin effect, the fifteenth added to the 8-feet steps, omitting the principal and twelfth, has an excellent effect,[1] more especially if balanced by a light 16-feet stop beneath the diapasons. The 8-feet reeds, again, may be used with the diapasons only, with very fine effect, in slow passages of full harmony. The harmonic flute of 4-feet tone is usually found on the great manual, but should be used with caution. It often has a beautiful effect in addition to the diapasons, floating over them and

[1] For this reason the twelfth and fifteenth should never be combined on one slide, as is occasionally done for the sake of economy in mechanism.

brightening up their tone, but should be shut off when the 4-feet principal is added, or when the 'full to fifteenth' is used, as the two tones do not amalgamate. The 16-feet stops on the manuals are intended to give weight and gravity of tone, and are always admirable with the full or nearly the full organ. In combination with the diapasons only their use is determined by circumstances; with a very full harmony they cause a muddy effect; with an extended harmony in pure parts they impart a desirable fullness and weight of tone, and seem to fill in the interstices of the unison stops: *e.g.*—

No. 1 would be injured by the addition of a 16-feet stop below the diapasons; No. 2 would be improved by it.

The swell organ stops are very like the great organ in miniature, except that the reed-stops predominate more in tone, and are more often used either alone or with diapasons only, the stronger and more pronounced tone of the reeds being requisite to bring out the full effect of the *crescendo* on opening the swell box. The oboe alone, in passages of slow harmony, has a beautiful effect, rich yet distant. The choir organ is always partially composed of solo stops, and the bulk of its stops are usually designed for special effects when used separately, though with a certain capability of mixing in various combinations. It may be observed that qualities of tone which mix beautifully in unison will often not mix in different octaves. The union of one of the soft reedy-toned stops, of the gamba class, with an 8-feet clarabella flute, has a beautiful *creamy* effect in harmonised passages, but the addition of a 4-feet flute instead is unsatisfactory; and the combination with the clarabella, though so effective for harmony, would be characterless as a solo combination for a melody. The effect of a light 4-feet flute over a light 8-feet stop of not too marked character is often admirable for the accompanying harmonies to a melody played on another manual; Mendelssohn refers to this in the letter in which he speaks of his delight in playing the accompaniment in Bach's arrangement of the chorale 'Schmücke dich' in this way; the flute, he observes, 'continually floating above the chorale.' This class of effect is peculiar to the organ; it is quite distinct from that of doubling a part with the flute an octave higher in the orchestra; in the organ the whole harmony is doubled, but in so light and blending a manner that the hearer is not conscious of it as a doubling of the parts, but only as a bright and liquid effect.

In contrasting the stops on the different manuals, one manual may be arranged so as to be an echo or light repetition of the other, as when a selection of stops on the swell manual is used as the *piano* to the *forte* of a similar selection on the great manual; but more often the object is contrast of tone, especially when the two hands use two manuals simultaneously. In such case the stops must be selected, not only so as to stand out from each other in tone, but so that each class of passage may have the tone best fitted for its character. In this example, from Smart's Theme and Variations in A, for instance—

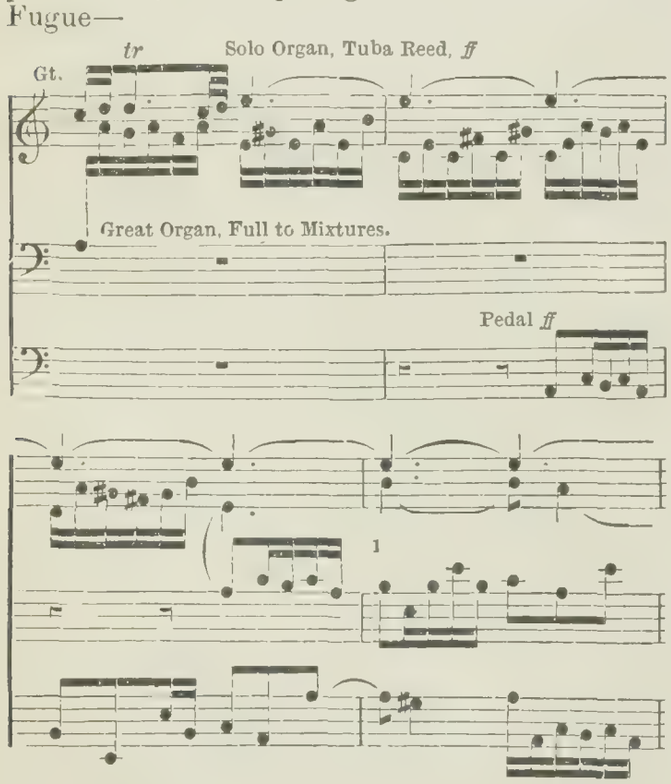
if the registering were reversed, the chords played on the flute-stop and the brilliant accompaniment on the swell reeds, it would not only be ineffective but æsthetically repugnant to the taste, from the sense of the misuse of tone: this of course would be an extreme example of misuse, merely instanced here as typical. The use of flute tone over reed tone on another keyboard is often beautiful in slow passages also; *e.g.* from [1]Rheinberger's Sonata in F♯:—

where the flute seems to glide like oil over the comparatively rough tones of the reed. Differing tones may sometimes be combined with good effect by coupling two manuals; swell reeds coupled to great-organ diapasons is a fine combination, unfortunately hackneyed by church organists, many of whom are so enamoured of it that they seldom let one hear the pure diapason tone, which it must always be remembered is the *real* organ tone, and the foundation of the whole instrument. Special expression may sometimes be obtained by special combinations of pitch. Slow harmonies played on 16-feet and 8-feet flutes, or flute-tuned stops, only, produce a very funereal and weird effect.[2] Brilliant scale passages and arpeggios, accompanying a harmony on another keyboard, may be given with an effect at once light and *bizarre*, with the 16-feet bourdon and the fifteenth three octaves above it. Saint-Saëns, in his first 'Rhapsodie,' writes

1 The registering is our own; the composer gives no indication.
2 See a little piece entitled 'Adagio Elegiaco,' in Best's 'Organ Pieces for Church Use.'

an arpeggio accompaniment for flutes in three octaves—

though it is perhaps better with the 4-feet flute omitted. The clarinet, though intended as a solo stop, may occasionally be used with great effect in harmonised passages (in combination with a light flue-stop to fill up and blend the tone), and should therefore always be carried through the whole range of the keyboard, not stopped at tenor C, as most builders do with it. The vox-humana should never be combined with any other stop on the same manual; the French organists write it so, but it is a mistake; and, it may be added, it should be but sparingly used at all. It is one of the tricks of organ effect, useful sometimes for a special expression, but very liable to misuse. The modern introduction of a fourth keyboard, the 'solo manual,' entirely for solo stops, puts some new effects in the hands of the player, more especially through the medium of brilliant reed-stops voiced on an extra pressure of wind. These give opportunity for very fine effects in combination with the great-organ manual; sometimes in bringing out a single emphatic note, as in a passage from Bach's A minor Fugue—



where the long blast from the solo reed, sounding above the sway and movement of the other parts, has a magnificent effect. The solo reeds may be used also to give contrast in repeated phrases in full harmony, as in this passage from the *finale* of Mendelssohn's first Sonata—

Combinations and effects such as these might be multiplied *ad infinitum*; in fact, the possible combinations on an organ of the largest size are nearly endless; and it must be observed that organs vary so much in detail of tone and balance, that each large instrument presents to some extent a separate problem to the player.

It is remarkable that in the great organ works of Bach and his school there is hardly an indication of the stops to be employed. It is perhaps on this account that it was long the custom, and is so still with a majority of players, to treat Bach's fugues for the organ as if they were things to be mechanically ground out without any attempt at effect or colouring; as if, as we heard a distinguished player express it, it were sufficient to pull out all the stops of a big organ 'and then wallow in it.' It is no wonder under these circumstances that many people think of organ fugues as essentially 'dry.' The few indications that are given in Bach's works, as in the Toccata in the Doric mode, show, however, that he was fully alive to the value of contrast of tone and effect; and with all the increased mechanical facilities for changing and adjusting the stops in these days, we certainly ought to look for some more intelligent 'scoring' of these great works for the organ, in accordance with their style and character, which is in fact as various as that of any other branch of classical music, and to get rid of the idea that all fugues must necessarily be played as loud as possible. Many of Bach's organ works are susceptible of most delicate and even playful treatment in regard to effect; and nearly all the graver ones contain episodes which seem as if purposely intended to suggest variety of treatment. There must, however, be a distinction made between fugues which have 'episodes,' and fugues which proceed in a regular and unbroken course to a climax. Some of Bach's organ fugues, and nearly all of Mendelssohn's, are of the latter class, and require to be treated accordingly.

In arranging the effective treatment of organ music of this class, it is necessary often to make a special study of the opportunities for changing the stops so as to produce no perceptible break in the flow of the whole. The swell-organ is the most useful bridge for passing from loud to soft

[1] In this case the solo reed is supposed to be coupled to the choir manual (immediately below the great manual), and the lower notes on the treble stave are taken by the first finger of the right hand, the fourth finger of the same hand continuing to hold the E on the lower manual. In some modern organs the solo manual is placed immediately above or below the great manual, in order to facilitate such a combination, which is often exceedingly useful.

and back again; when open it should be powerful enough to be passed on to from the great organ without a violent contrast, when the tone can be reduced gradually by closing it; the reverse proceeding being adopted in returning to the great-manual. It is possible to add stops on the great-manual in the course of playing, so as hardly to make any perceptible break, by choosing a moment when only a single note is being sounded; the addition of a stop at that moment is hardly noticed by the hearer, who only finds when the other parts come in again that the tone is more brilliant. If it be a flue-stop that is to be added, a low note is the best opportunity, as the addition of a more acute stop of that class is least felt there; if a reed is to be added, it should be drawn on a high note, as the reed tone is most prominently felt in the lower part of the scale. It should be added that it is absolutely inadmissible to delay or break the *tempo* to gain time for changing a stop; the player must make his opportunities without any such license.

Tolerably close imitations of orchestral effects are possible on the organ, and an immense number of 'arrangements' of this kind have been made; but as it is at best but an imperfect imitation, this is not a pursuit to be encouraged. On the other hand, arrangements of piano music for the organ, provided that a careful selection is made of that which is in keeping with the character of the instrument, may often be very interesting and artistically valuable, as giving to the music a larger scale and new beauties of tone and expression, and affording scope for the unfettered exercise of taste and feeling in the invention of effects suitable to the character of the music.

The foregoing remarks may, we hope, afford some answer to the question so often asked by the uninitiated, 'how do you know which stops to use?' but it must be added that a sensitive ear for delicacies of *timbre* is a gift of which it may be said, *nascitur, non fit*; and no one will acquire by mere teaching the perception which gives to each passage its most suitable tone-colouring. [H.H.S.]

REGONDI, Giulio, of doubtful parentage, born at Geneva in 1822. His reputed father was a teacher in the Gymnasium of Milan. The child appears to have been an infant phenomenon on the guitar, and to have been sacrificed by his father, who took him to every court of Europe, excepting Madrid, before he was nine years old. They arrived in England in 1831 or 1832; and Giulio seems never to have left the United Kingdom again except for two concert tours in Germany, one with Herr Lidel, the violoncello player in 1841, the other with Mad. Dulcken in 1846. On the former of these tours he played both the guitar and the melophone (whatever that may have been), and evoked enthusiastic praises from the correspondents of the A. M. Zeitung in Prague and Vienna for his extraordinary execution on both instruments, the very artistic and individual character of his performance, and the sweetness of his *cantabile*. The concertina was patented by Sir Charles Wheatstone in 1829 [see Concertina], but did not come into use till Regondi took it up. He wrote two concertos for it, and a very large number of arrangements, as well as of original compositions, among which a graceful piece, 'Les Oiseaux,' was perhaps the most favourite. He also taught it largely, and at one time his name was to be seen in almost all concert programmes. He was a great friend of Molique's, who wrote for him a Concerto for the Concertina (in G) which he played with great success at the Concert of the Musical Society of London, Apr. 20, 1864. When he went abroad for his second tour, his performance and the effect which he got out of so unpromising and inartistic an instrument astonished the German critics. (See the A. M. Zeitung for 1846, p. 853.) Regondi appears to have been badly treated by his father and to have had wretched health, which carried him off on May 6, 1872. He was a fine linguist and a very attractive person. His talent was exquisite, and in better circumstances he might have been one of the really great artists. [G.]

REHEARSAL (Fr. *Répetition*, Ger. *Probe*). In the case of Concerts, a performance preliminary to the public one, at which each piece included in the programme is played through at least once, if in MS. to detect the errors inevitable in the parts, and in any case to study the work and discover how best to bring out the intentions of the composer, and to ensure a perfect *ensemble* on the part of the performers. In England, owing to many reasons, but principally to the over-occupation of the players, sufficient rehearsals are seldom given to orchestral works. The old rule of the Philharmonic Society (now happily to be altered) was to have one rehearsal on Saturday morning for the performance on Monday evening, and this perhaps set the example. Unless the music is familiar to the players this is not enough. No new works can be efficiently performed with less than two rehearsals; and in the case of large, intricate, and vocal works, many more are requisite. We have it on record that Beethoven's Eb Quartet, op. 127, was rehearsed seventeen times before its first performance; the players therefore must have arrived at that state of familiarity and certainty which a solo player attains with a concerto or sonata.

An ingenious method of adding to the attraction of a series of concerts has been sometimes adopted in England of late years by making the rehearsals public; but a rehearsal in face of a large well-dressed audience, unless the conductor and performers are above ordinary human weaknesses, is no rehearsal in the true sense of the word, and can be of little or no avail for the efficient performance of the music.

In the case of Operas, every practice of either chorus, principals, or orchestra, separately or together, is termed a rehearsal. These will sometimes continue every day for six weeks or two months, as the whole of the voice-music, dialogue, and action has to be learnt by heart. Whilst the chorus is learning the music in one part of the theatre, the principals are probably at work with

the composer at a piano in the Green-room, and the ballet is being rehearsed on the stage. It is only when the music and dialogue are known by heart that the rehearsals on the stage with action and business begin. The orchestra is never used until the last two or three rehearsals, and these are termed Full Band Rehearsals (Germ. *General-probe*). Last of all, before the public production of the work, comes the Full Dress Rehearsal, exactly as it will appear in performance. [G.]

REICHA, Anton Joseph, born at Prague, Feb. 27, 1770, lost his father before he was a year old; his mother not providing properly for his education he left home, and took refuge with his grandfather at Glattow, in Bohemia. The means of instruction in this small town being too limited, he went on to his uncle Joseph Reicha (born in Prague, 1746, died at Bonn, 1795), a cellist, conductor, and composer, who lived at Wallerstein in Bavaria. His wife, a native of Lorraine, speaking nothing but French, had no children, so they adopted the nephew, who thus learned to speak French and German besides his native Bohemian. He now began to study the violin, pianoforte, and flute in earnest. On his uncle's appointment, in 1788, as musical director to the Elector of Cologne, he followed him to Bonn, and entered the Chapel of Maximilian of Austria as second flute. The daily intercourse with good music roused the desire to compose, and to become something more than an ordinary musician, but his uncle refused to teach him harmony. He managed, however, to study the works of Kirnberger and Marpurg in secret, gained much practical knowledge by hearing the works of Handel, Mozart, and Haydn, and must have learned much from his constant intercourse with Beethoven, who played the viola in the same band with himself and was much attached to him. At length his perseverance and his success in composition conquered his uncle's dislike. He composed without restraint, and his symphonies and other works were played by his uncle's orchestra.[1]

On the dispersion of the Elector's Court in 1794, Reicha went to Hamburg, where he remained till 1799. There the subject of instruction in composition began to occupy him, and there he composed his first opera, 'Obaldi, ou les Français en Egypte' (2 acts). Though not performed, some numbers were well received, and on the advice of a French émigré, he started for Paris towards the close of 1799, in the hope of producing it at the Théâtre Feydeau. In this he failed, but two of his symphonies, an overture, and some 'Scènes italiennes,' were played at concerts. After the successive closing of the Théâtre Feydeau and the Salle Favart, he went to Vienna, and passed six years (1802–1808), in renewed intimacy with Beethoven, and making friends with Haydn, Albrechtsberger, Salieri, and others. The patronage of the Empress Maria Theresa was of great service to him, and at her request he composed an Italian opera, 'Argina, regina di Granata.' During this happy period of his life he published symphonies, oratorios, a requiem, 6 string quintets, and many solos for PF. and other instruments. He himself attached great importance to his '36 Fugues pour le piano,' dedicated to Haydn, but they are not the innovations which he believed them to be; in placing the answers on any and every note of the scale he merely reverted to the Ricercari of the 17th century, and the only effect of this abandonment of the classic laws of the Real fugue was to banish tonality.

The prospect of another war induced Reicha to leave Vienna, and he settled finally in Paris in 1808. He now realised the dream of his youth, producing first 'Cagliostro' (Nov. 27, 1810), an opéra-comique composed with Dourlen; and at the Académie, 'Natalie' (3 acts, July 30, 1816), and 'Sapho' (Dec. 16, 1822). Each of these works contains music worthy of respect, but they had not sufficient dramatic effect to take with the public.

Reicha's reputation rests on his chamber-music, and on his theoretical works. Of the former the following deserve mention: a diecetto for 5 strings and 5 wind instruments; an ottet for 4 strings and 4 wind instruments; 24 quintets for flute, oboe, clarinet, horn, and bassoon; 6 quintets and 20 quartets for strings; 1 quintet for clarinet and strings; 1 quartet for PF., flute, cello, and bassoon; 1 do. for 4 flutes; 6 do. for flute, violin, tenor, and cello; 6 string trios; 1 trio for 3 cellos; 24 do. for 3 horns; 6 duets for 2 violins; 22 do. for 2 flutes; 12 sonatas for PF. and violin, and a number of sonatas and pieces for PF. solo. He also composed symphonies and overtures. These works are more remarkable for novelty of combination and striking harmonies, than for abundance and charm of ideas. Reicha was fond of going out of his way to make difficulties for the purpose of conquering them; for instance, in the ottet the strings are in G, and the wind in E minor, and in the sestet for 2 clarinets *concertanti* one is in A, and the other in B. This faculty for solving musical problems brought him into notice among musicians when he first settled in Paris, and in 1818 he was offered the professorship of counterpoint and fugue at the Conservatoire. Among his pupils there were Boilly, Jelensperger, Bienaimé, Millaut, Lefebvre, Elwart, Pollet, Lecarpentier, Dancla, and others; Barbereau, Seuriot, Blanchard, Mme. de Montgeroult, Bloc, Musard, and George Onslow, were private friends.

His didactic works, all published in Paris, are: 'Traité de Mélodie,' etc. (4to, 1814); 'Cours de composition musicale,' etc. (1818); 'Traité de haute composition musicale' (1st part 1824, 2nd 1826), a sequel to the two first; and 'Art du compositeur dramatique,' etc. (4to, 1833).

Fétis has criticised his theories severely, and though highly successful in their day, they are now abandoned, but nothing can surpass the clearness and method of his analysis, and those who use his works will always find much to be grateful for. Czerny published a German

[1] See an interesting notice by Kastner, quoted by Thayer, 'Beethoven,' i. 188.

translation of the 'Traité de haute composition' (Vienna, 1834, 4 vols. folio), and in his 'Art d'improviser' obviously made use of Reicha's 'Art de varier'—57 variations on an original theme.

Reicha married a Parisian, was naturalised in 1829, and received the Legion of Honour in 1831. He presented himself several times for election to the Institut before his nomination as Boieldieu's successor in 1835. He only enjoyed his honours a short time, being carried off by inflammation of the lungs, May 28, 1836. His death was deplored by the many friends whom his trustworthy and honourable character had attached to him. A life-like portrait, somewhat spoiled by excessive laudation, is contained in the 'Notice sur Reicha' (Paris, 1837, 8vo), by his pupil Delaire.[1] [G.C.]

REICHARDT, Alexander, a tenor singer, was born at Packs, Hungary, April 17, 1825. He received his early instruction in music from an uncle, and made his first appearance at the age of 18 at the Lemberg theatre as Rodrigo in Rossini's 'Otello.' His success there led him to Vienna, where he was engaged at the Court Opera, and completed his education under Gentiluomo, Catalani, etc. At this time he was much renowned for his singing of the Lieder of Beethoven and Schubert, and was in request at all the soirées; Prince Esterhazy made him his Kammersänger. In 1846 he made a *tournée* through Berlin, Hanover, etc., to Paris, returning to Vienna. In 1851 he made his first appearance in England, singing at the Musical Union, May 6, and at the Philharmonic May 12, at many other concerts, and lastly before Her Majesty. In the following season he returned and sang in Berlioz's 'Romeo and Juliet,' at the new Philharmonic Concert of April 14, also in the Choral Symphony, Berlioz's 'Faust,' and the 'Walpurgisnight,' and enjoyed a very great popularity both in songs and in more serious pieces. From this time until 1857 he passed each season in England, singing at concerts, and at the Royal Opera, Drury Lane, and Her Majesty's Theatre, where he filled the parts of the Count in 'The Barber of Seville,' Raoul in 'The Huguenots,' Belmont in 'The Seraglio,' Florestan in 'Fidelio,' Don Ottavio in 'Don Juan,' etc. etc. His Florestan was a very successful impersonation, and in this part he was said 'to have laid the foundation of the popularity which he has so honourably earned and maintained in London.' He also appeared with much success in oratorio. In the provinces he became almost as great a favourite as in London. In 1857 he gave his first concert in Paris, in the Salle Erard, and the following sentence from Berlioz's report of the performance will give an idea of his style and voice. 'M. Reichardt is a tenor of the first water—sweet, tender, sympathetic and charming. Almost all his pieces were redemanded, and he sang them again without a sign of fatigue.' Shortly after this he settled in Boulogne, where he is now residing. Though he has retired from the active exercise of his profession, he is not idle. He has organised a Philharmonic Society at Boulogne; he is President of the Académie Communale de Musique, and his occasional concerts for the benefit of the hospital—where one ward is entitled 'Fondation Reichardt'—are not only very productive of funds but are the musical events of the town. M. Reichardt is a composer as well as a singer. Several of his songs, especially 'Thou art so near,' were very popular in their day. [G.]

REICHARDT, Johann Friedrich, composer and writer on music; son of a musician; born Nov. 25, 1752, at Königsberg, Prussia. From childhood he showed a great disposition for music, and such intelligence as to interest influential persons able to further his career. Under these auspices he was educated and introduced into good society, and thus formed an ideal both of art and of life which he could scarcely have gained had he been brought up among the petty privations incident to his original position. Unfortunately, the very gifts which enabled him to adopt these high aims, fostered an amount of conceit which often led him into difficulties. His education was more various than precise; music he learned by practice rather than by any real study. His best instrument was the violin, on which he attained considerable proficiency, under Veichtner, a pupil of Benda's; but he was also a good pianist. Theory he learned from the organist Richter. On leaving the university of Königsberg he started on a long tour, ostensibly to see the world before choosing a profession, though he had virtually resolved on becoming a musician. Between 1771 and 1774 he visited Berlin, Leipzig, Dresden, Vienna, Prague, Brunswick, and Hamburg, made the acquaintance of the chief notabilities—musical, literary, and political—in each place, and became himself in some sort a celebrity, after the publication of his impressions in a series of 'confidential letters'—'Vertraute Briefen eines aufmerksamen Reisenden,' in 2 parts (1774 and 76). On his return to Königsberg he went into a government office, but hearing of the death of Agricola of Berlin, he applied in person to Frederic the Great for the vacant post of Capellmeister and Court-composer, and though barely 24 obtained it in 1776. He at once began to introduce reforms, both in the Italian opera and the court orchestra, and thus excited much opposition from those who were more conservative than himself. While thus occupied he was indefatigable as a composer, writer, and conductor. In 1783 he founded the 'Concerts Spirituels' for the performance of unknown works, vocal and instrumental, which speedily gained a high reputation. He published collections of little-known music, with critical observations, edited newspapers, wrote articles and critiques in other periodicals, and produced independent works. But enemies, who were many, contrived to annoy him so much in the exercise of his duties, that in 1785 he obtained a long leave of absence, during which he visited London and Paris, and heard Handel's oratorios and Gluck's operas, both of which he heartily

[1] Delaire, Jacques Auguste, died in 1864, is known as the author of a 'Histoire de la Romance' and other pamphlets on music.

admired. In both places he met with great success as composer and conductor, and was popular for his social qualities; but neither of his two French operas 'Tamerlan' and 'Panthée,' composed for the Académie, were performed. On the death of Frederic the Great (1786) his successor confirmed Reichardt in his office, and he produced several new operas, but his position became more and more disagreeable. His vanity was of a peculiarly offensive kind, and his enemies found a weapon ready to their hand in his avowed sympathy with the doctrines of the French Revolution. The attraction of these views for a buoyant, liberal mind like Reichardt's, always in pursuit of high ideals, and eager for novelty, is obvious enough; but such ideas are dangerous at court, and after further absence, which he spent in Italy, Hamburg, Paris, and elsewhere, he received his dismissal from the Capellmeistership in 1794.[1] He retired to his estate, Giebichenstein, near Halle, and occupied himself with literature and composition, and occasional tours. In 1796 he became inspector of the salt works at Halle. After the death of Frederic William II. he produced a few more operas in Berlin, but made a greater mark with his Singspielen, which are of real importance in the history of German opera. In 1808 he accepted the post of Capellmeister at Cassel to Jerome Bonaparte, refused by Beethoven, but did not occupy it long, as in the same year we find him making a long visit to Vienna. On his return to Giebichenstein he gathered round him a pleasant and cultivated society, and there, in the midst of his friends, he died, June 17, 1814.

Reichardt has been, as a rule, harshly judged; he was not a mere musician, but rather a combination of musician, litterateur, and man of the world. His overweening personality led him into many difficulties, but as a compensation he was endued with great intelligence, and with an ardent and genuine desire for progress in everything—music, literature, and politics. As a composer his works show cultivation, thought, and honesty; but have not lived, because they want the necessary originality. This is specially true of his instrumental music, which is entirely forgotten. His vocal music, however, is more important, and a good deal of it might well be revived, especially his Singspielen and his Lieder. The former exercised considerable influence in the development of German opera, and the latter are valuable, both as early specimens of what is now written by every composer, and for their own individual merit. The Goethe-Lieder in particular show a rare feeling for musical form. Mendelssohn was no indulgent critic, but on more than one occasion he speaks of Reichardt with a warmth which he seldom manifests even towards the greatest masters. He never rested until he had arranged for the performance of Reichardt's Morning Hymn, after Milton, at the Cologne Festival of 1835; and his enthusiasm for the composer and his wrath at those who criticised him, are delightful to read.[2] Years afterwards, when his mind had lost the ardour of youth, and much experience had sobered him, he still retained his fondness for this composer, and few things are more charming than the genial appreciation with which he tells Reichardt's daughter of the effect which her father's songs had had, even when placed in such a dangerous position as between works of Haydn and Mozart, at the Historical Concert at the Gewandhaus in Feb. 1847. It is the simplicity, the naïveté, the national feeling of this true German music that he praises, and the applause with which it was received shows that he was not alone in his appreciation. Amongst Reichardt's numerous works are 8 operas; 8 Singspielen, including 4 to Goethe's poems, 'Jery und Bätely,' 'Erwin und Elmire,' 'Claudine von Villabella' and 'Lilla'; 5 large vocal works, including Milton's 'Morning Hymn,' translated by Herder, his most important work, in 1835; a large number of songs, many of which have passed through several editions, and been published in various collections.

Reichardt's writings show critical acumen, observation, and judgment. Besides the letters previously mentioned, he published—'Das Kunstmagazin,' 8 numbers in 2 vols. (Berlin, 1782 and 91); 'Studien für Tonkünstler und Musikfreunde,' a critical and historical periodical with 39 examples (1792); 'Vertraute Briefe aus Paris,' 3 parts (1802–3); 'Vertraute Briefe auf einer Reise nach Wien, etc.' (1810); fragments of autobiography in various newspapers; and innumerable articles, critiques, etc. The 'Briefe' are specially interesting from the copious details they give, not only on the music, but on the politics, literature, and society of the various places he visited. A biography, 'J. F. Reichardt, sein Leben und seine musikalische Thätigkeit,' by Herr Schletterer, Capellmeister of the cathedral of Augsburg, is in progress, the 1st vol. having been published at Augsburg in 1865. [A.M.]

REID, General John, born towards the middle of last century, formerly Colonel of the 88th Regiment, a great lover of music. By his will made in 1803 he directed his trustees, in the event of his daughter dying without issue, to found a Professorship of Music in the University of Edinburgh, 'for the purpose also, after completing such endowment as hereinafter is mentioned, of making additions to the library of the said University, or otherwise promoting the general interest and advantage of the University in such . . . manner as the Principal and Professors . . . shall . . . think most fit and proper.' In a codicil, dated 1806, he adds—'After the decease of my daughter . . . I have left all my property . . . to the College of Edinburgh where I had my education . . . and as I leave all my music books to the Professor of Music in that College, it is my wish that in every year after his appointment he will cause a concert of music to be performed on the 13th of February, being my

[1] There was apparently some dissatisfaction with Reichardt's efficiency as a musician as well as with his political opinions, for Mozart's remark that the King's band contains great virtuosi, but the effect would be better if the gentlemen played together,' certainly implied a reflection on the conductor. Neither does Reichardt seem to have appreciated Mozart: Jahn's 'Mozart,' ii. 460.

[2] Letters, Dec. 28, 1833; April 3, 1835.

birthday.' He also directed that at this annual 'Reid Concert' some pieces of his own composition should be performed 'by a select band.'

When by the death of General Reid's daughter in 1838 some £70,000 became available, it seems to have been handed over to the University authorities without sufficient attention to the italicised portion of the following instruction in the will: 'that . . . my said Trustees . . . shall and do, *by such instrument or instruments as may be required by the law of Scotland* make over the residue of my . . . personal estate to the Principal and Professors of the said University.' And as no particular sum was specified for foundation and maintenance of the Chair of Music, considerable latitude being allowed to the discretion of the University authorities, the secondary object of the bequest received far greater care and attention than the primary one, and for years the Chair was starved. The Professorship was instituted in 1839, when the first Professor, Mr. John Thomson, was appointed. He lived only a short time after his election, and in 1842 was succeeded by Sir Henry Bishop, who resigned after two years. Mr. H. H. Pierson was elected in 1844, but he also resigned shortly after. In 1845 Mr. John Donaldson, an advocate, and a good theoretical musician, received the appointment, and from the first seems to have resolved to obtain a more just and satisfactory bestowal of the bequest. It would be out of place to allude further to the state of matters existing up to 1855. Suffice it to say that in 1851, anticipating Mr. Donaldson's intention of petitioning Parliament, the Edinburgh Town Council, as 'Patrons' of the University, raised an action against the Principal and Professors for alleged mismanagement and misappropriation of the Reid Fund. A long litigation followed, and by decree of the Court of Session in 1855 the University authorities were ordered to devote certain sums to the purchase of a site, and the erection of a building for the Class of music. The class-room and its organ were built in 1861, and the Professor's salary—which had been fixed at the very lowest sum suggested by the Founder, viz. £300—as well as the grant for the concert, were slightly raised, and a sum set apart, by order of the Court, for expenses of class-room, assistants, instruments, etc.

These hardly-earned concessions are mainly due to the determined energy of Prof. Donaldson, who seems to have considered them sufficient when compared with what formerly existed. He at all events obtained for the Chair a far better position than that which it occupied before the lawsuit. But the disappointments and mortifications to which he was subjected by such long and painful conflicts not improbably shortened his life, and he died in 1865. In that year Mr. Herbert Oakeley was elected, who has held the appointment up to the present time. [H.S.O.]

REID CONCERTS. These concerts have not reached their present high position without vicissitudes almost as unfortunate as those to which the Reid Professorship was subjected. The earliest concerts under Professors Thomson and Bishop, considering the then musical taste of Scotland, were not unworthy of General Reid's munificent bequest. The £200 allowed out of the Reid Fund was wholly inadequate to the cost of a grand concert 400 miles from London. The Senate therefore decided that, besides this grant, all the tickets should be sold, and that the proceeds should assist Professor Thomson in giving a fine concert; and the following note was printed in the first Reid Concert Book[1] in 1841:—'The Professors desire it to be understood that the whole of these sums'—*i.e.* the grant and the proceeds—'is to be expended on the concert; and that in order to apply as large a fund as possible for the purpose, they have not reserved any right of entry for their families or friends.'

This system was continued by Sir H. R. Bishop, and in 1842 and 43 the sale of tickets enabled him to give concerts which were at least creditable for the time and place.

Upon Professor Donaldson's accession, a plan was initiated by him which proved most unfortunate. He altered the system of admission by payment to that of invitation to the whole audience; and in consequence the Reid Concerts began to decline, and became an annual source of vexation to the University, public, and Professor. The grant, which under legal pressure afterwards seems to have been raised to £300, was then only £200, and therefore not only was it impossible to give an adequate concert without loss, but the distribution of free tickets naturally caused jealousies and heartburnings to 'town and gown,' and the Reid Concert became a byword and the hall in which it was held a bear-garden. Matters seem to have culminated in 1865, when a large number of students, who thought that they had a right of entry, broke into the concert-hall.

Such was the state of matters on Professor Oakeley's appointment in 1865. Finding it impossible after twenty years to return to the original system of Thomson and Bishop, he made a compromise, by giving free admissions to the Professors, the University Court, the students in their fourth year at college, and a few leading musicians in the city, and admitting the rest of the audience by payment. From this date a new era dawned on the Reid Concerts; the university and the city were satisfied, and the standard of performance at once rose.

In 1867 a practical beginning was made, by the engagement of Mr. Manns and a few of the Crystal Palace orchestra, with very good results.

Since 1869 Mr. C. Halle and his band have been secured, and each year the motto seems 'Excelsior.' The demand for tickets soon became so great that the present Professor organised two supplementary performances on the same scale as the 'Reid,' and thus, from concerts which on some occasions seem to have been a mere performance of ballads and operatic music by a starring party, the Reid Concert has grown into the 'Edinburgh Orchestral,' or 'Reid Festival,'

[1] Remarkable as the first programme issued in Great Britain with analytical notes.

an annual musical gathering on the completest and most satisfactory scale as to materials, selection, and execution — one which would do honour to any city either of Great Britain or Germany. To have achieved so splendid a result in the teeth of so many difficulties does honour to the tact, ability, and devotion of Sir Herbert Oakeley, and is sufficient, even without his popularisation of the organ, to perpetuate his name in Scotland. [G.]

REINAGLE, Joseph, son of a German musician resident in England, was born at Portsmouth. He was successively trumpeter and horn-player, violoncellist, violinist, and violoncellist again, and a very able performer. About 1785 he visited Dublin, where he remained two years. Returning to London he obtained a prominent position in the best orchestras, and was principal cello at Salomon's concerts when directed by Haydn. He afterwards settled at Oxford. He composed violin concertos, violoncello concertos, string quartets, duets and trios for violin and pianoforte, etc., and was author of 'A Treatise on the Violoncello.'

His younger brother, Hugh, an eminent violoncellist, died at an early age at Lisbon, where he had gone for the benefit of his health.

His son, Alexander Robert, born at Brighton, Aug. 21, 1799, for some time organist of St. Peter-in-the East, Oxford, was the composer of several psalm and hymn tunes. He retired to Kidlington, near Oxford, where he died April 6, 1877. [W.H.H.]

REINE DE CHYPRE, LA. Opera in 5 acts; words by Saint-Georges, music by Halévy. Produced at the Grand Opéra, Paris, Dec. 22, 1846. [G.]

REINE DE SABA, LA. Opera in 4 acts; words by Barbier and Carré, music by Gounod. Produced at the Opéra Feb. 28, 1862. It was adapted to English words under the title of 'Irene' by H. B. Farnie, and in this form was produced as a concert at the Crystal Palace, Aug. 12, 1865. The beautiful Airs de ballet contain some of Gounod's best music, and are frequently played at the same place. [G.]

REINE TOPAZE, LA. Opera comique in 3 acts; words by Lockroy and Battes, music by Victor Massé. Produced at the Théâtre Lyrique Dec. 27, 1856. In English, as Queen Topaze, at Her Majesty's Theatre, Dec. 24, 1860. [G.]

REINECKE, Karl, composer, conductor, and performer, director of the Gewandhaus concerts at Leipzig, the son of a musician, born June 23, 1827, at Altona, was from an early age trained by his father, and at 11 performed in public. As a youth he was a first-rate orchestral violin player. At 18 he made a concert tour through Sweden and Denmark, with especial success at Copenhagen. In 1843 he settled in Leipzig, where he studied diligently, and eagerly embraced the opportunities for cultivation afforded by the society of Mendelssohn and Schumann, with a success which amply shows itself in his music. In 1844 he made a professional tour with Wasielewski to Riga, returning by Hanover and Bremen. He was already in the pay of Christian VIII. of Denmark, and in 1846 he again visited Copenhagen, and played before the court. On both occasions he was appointed court-pianist. In 1851 he went with Otto von Königslöw to Italy and Paris; and on his return Hiller secured him for the professorship of the piano and counterpoint in the conservatoire of Cologne. In 1854 he became conductor of the Concertgesellschaft at Barmen, and in 1859 Musikdirector to the University of Breslau. On Julius Rietz's departure from Leipzig to Dresden in 1860 Reinecke succeeded him as conductor at the Gewandhaus, and became at the same time professor of composition in the Conservatorium. Between the years 1867 and 1872 he made extensive tournées; in England he played at the Musical Union, Crystal Palace, and Philharmonic, on the 6th, 17th, and 19th of April, 1869 respectively, and met with great success both as a virtuoso and a composer. He reappeared in this country in 1872 and was equally well received.

Reinecke's industry in composition is great, his best works, as might be expected, being those for piano; his three PF. sonatas indeed are excellent compositions, carrying out Mendelssohn's technique without indulging the eccentricities of modern virtuosi; his pieces for 2 PFs. are also good; his PF. Concerto in F♯ minor is a well-established favourite both with musicians and the public. Besides other instrumental music—quintets, quartets, concertos for violin and cello, etc.—he has composed an opera in 5 acts, 'König Manfred,' and two in one act each 'Der vierjährigen Posten' (after Körner) and 'Ein Abenteuer Händel's'; incidental music to Schiller's 'Tell'; an oratorio, 'Belsazar'; a cantata for men's voices, 'Hakon Jarl'; overtures, 'Dame Kobold,' 'Aladin,' 'Friedensfeier'; 2 masses, and 2 symphonies; and a large number of songs and of pianoforte pieces in all styles, including valuable studies and educational works, numbering in all more than 160. His style is refined, his mastery over counterpoint and form is absolute, and he writes with peculiar clearness and correctness. He has also done much editing for Breitkopf's house. His position at Leipzig speaks for his ability as a conductor; as an accompanyist he is first-rate; and as an arranger for the pianoforte he is recognised as one of the first of the day. [F.G.]

REINHOLD, Hugo, a very promising young Austrian musician, born at Vienna March 3, 1854. He began, like Haydn and Schubert, by being a choir-boy in the Imperial Chapel, after which, in 1868, at the instance of Herbeck, he entered the Conservatorium, under the endowment of the Duke of Coburg-Gotha, where he was put under Bruckner, Dessoff, and Epstein, remained till 1874, and obtained a silver medal. His published works have reached op. 18. They consist of pianoforte music and songs; of a suite in five movements for pianoforte and strings, of a prelude, minuet and fugue also for stringed orchestra, and of a string-quartet in A (op. 18). The two larger works were played at the Vienna

Philharmonic concerts of Dec. 9, 1877, and Nov. 17, 1878, respectively. The composer was loudly called for on both occasions, and they are praised by the intelligent and impartial Vienna critic of the 'Monthly Musical Record' for their delicate character and absence of undue pretension. The quartet was recently executed by Hellmesberger. [G.]

REINHOLD, Thomas, born at Dresden about 1690, was the reputed nephew, or, as some said, son, of the Archbishop of that city. He had an early passion for music, and having met Handel at the Archbishop's residence conceived so strong a liking for him that after a time he quitted his abode and sought out the great composer in London, who received him with favour. In July 1731 he appeared at the Haymarket Theatre as a singer in 'The Grub Street Opera,' and afterwards sang at the King's Theatre. He was one of the original singers of 'The Lord is a man of war,' in Handel's 'Israel in Egypt,' and the original representative of the following characters in Handel's works:—Harapha in 'Samson'; Somnus in 'Semele'; Cyrus and Gobryas in 'Belshazzar'; Chelsias and the Second Elder in 'Susanna'; Caleb in 'Joshua'; Simon in 'Judas Maccabeus'; the Levite in 'Solomon'; and Valens in 'Theodora.' He died in Chapel Street, Soho, in 1751.

His son, Charles Frederick, born in 1737, received his musical education first in St. Paul's, and afterwards in the Chapel Royal. On Feb. 3, 1755, he made his first appearance on the stage at Drury Lane as Oberon in J. C. Smith's opera, 'The Fairies,' being announced as 'Master Reinhold.' He afterwards became organist of St. George the Martyr, Bloomsbury. In 1759 he appeared as a bass singer at Marylebone Gardens, where he continued to sing for many seasons. He afterwards performed in English operas, and sang in oratorios, and at provincial festivals, etc. He was especially famed for his singing of Handel's song, 'O ruddier than the cherry.' He was one of the principal bass singers at the Commemoration of Handel in 1784. He retired in 1797, and died in Somers Town, Sept. 29, 1815. [W.H.H.]

REINKEN, Johann Adam, eminent German organist, born at Deventer, in Holland, April 27, 1623, a pupil of Swelinck at Amsterdam, became in 1654 organist of the church of St. Catherine at Hamburg, and retained the post till his death, Nov. 24, 1722, at the age of 99. He was a person of some consideration at Hamburg, both on account of his fine playing, and of his beneficial influence on music in general, but his vanity and jealousy of his brother artists are severely commented on by his contemporaries. So great and so widespread was his reputation that Sebastian Bach frequently walked to Hamburg from Lüneburg (1700 to 1703), and Cöthen (1720), to hear him play. Reinken may be considered the best representative of the North-German school of organists of the 17th century, whose strong points were, not the classic placidity of the South-German school, but great dexterity of foot and finger, and ingenious combinations of the stops. His compositions are loaded with passages for display, and are defective in form, both in individual melodies and general construction. His works are very scarce; 'Hortus Musicus,' for 2 violins, viola and bass (Hamburg 1704) is the only one printed; and even in MS. only five pieces are known—2 on Chorales, 1 Toccata, and 2 Variations (for Clavier).[1] Of the first of these, one—on the chorale 'An Wasserflüssen Babylons'—is specially interesting, because it was by an extempore performance on that chorale at Hamburg in 1722 that Bach extorted from the venerable Reinken the words, 'I thought that this art was dead, but I see that it still lives in you.' [A.M.]

REINTHALER, Karl, conductor of the Private Concerts at Bremen, born Oct. 13, 1822, in Luther's house at Erfurt, was early trained in music by G. A. Ritter, then studied theology in Berlin, but after passing his examination, devoted himself entirely to music. His first attempts at composition, some psalms sung by the Cathedral choir, attracted the attention of King Frederic William IV., and procured him a travelling grant. He visited Paris, Milan, Rome, and Naples, taking lessons in singing from Geraldi and Bordogni. On his return in 1853 he obtained a post in the Conservatoire of Cologne, and in 1858 became organist in the Cathedral of Bremen. He had already composed an oratorio 'Jephta' (performed in London by Mr. Hullah, April 16, 1856, and published with English text by Novellos), and in 1875 his opera 'Edda' was played with success at Bremen, Hanover, and elsewhere. His 'Bismarck-hymn' obtained the prize at Dortmund, and he has composed a symphony, and a large number of part-songs. Reinthaler's style bears a considerable resemblance to that of Mendelssohn and Gade. [F.G.]

REISSIGER, Karl Gottlieb, son of Christian Gottlieb Reissiger, who published 3 symphonies for full orchestra in 1790. Born Jan. 31, 1798, at Belzig near Wittenberg, where his father was Cantor, he became in 1811 a pupil of Schicht at the St. Thomas School, Leipzig. In 1818 he removed to the University with the intention of studying theology, but some motets composed in 1815 and 1816 had already attracted attention, and the success of his fine baritone voice made him determine to devote himself to music. In 1821 he went to Vienna and studied opera thoroughly. Here also he composed 'Das Rockenweibchen.' In 1822 he sang an aria of Handel's, and played a PF. concerto of his own composition at a concert in the Kärnthnerthor theatre. Soon after he went to Munich, where he studied with Peter Winter, and composed an opera 'Dido,' which was performed several times at Dresden under Weber's conductorship. At the joint expense of the Prussian government and of his patron von Altenstein, a musician, he undertook a tour through Holland, France, and Italy, in order to

[1] Spitta's Bach, i. 195, 196.

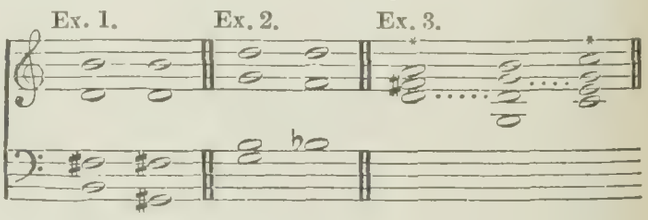
report on the condition of music in those countries. On his return he was commissioned to draw up a scheme for a Prussian national Conservatoire, but at the same time was offered posts at the Hague and at Dresden. The latter he accepted, replacing Marschner at the opera, where he laboured hard, producing both German and Italian operas. In 1827 he succeeded C. M. von Weber as conductor of the German Opera at Dresden. Among his operas, 'Ahnenschatz,' 'Sibella,' 'Turandot,' 'Adele von Foix,' and 'Der Schiffbruch von Medusa,' had great success in their day, but the term 'Kapellmeistermusik' eminently describes them, and they have almost entirely disappeared. The overture to the Felsenmühle, a spirited and not uninteresting piece, is occasionally met with in concert programmes. Masses and church music, a few Lieder, and particularly some graceful and easy trios for PF. violin and cello, made his name very popular for a period. He is generally supposed to have been the composer of the piece known as 'Weber's Last Waltz.' Reissiger died Nov. 7, 1859, and was succeeded at Dresden by Julius Rietz. [F.G.]

REISSMANN, August, musician and writer on music, born Nov. 14, 1825, at Frankenstein, Silesia, was grounded in music by Jung, the Cantor of his native town. In 1843 he removed to Breslau, and there had instruction from Mosewius, Baumgart, Ernst Richter, Lüstner, and Kohl, in various branches, including pianoforte, organ, violin, and cello. He at first proposed to become a composer, but a residence in 1850–52 at Weimar, where he came in contact with the new school of music, changed his plans and drove him to literature. His first book was 'From Bach to Wagner' (Berlin, 1861); rapidly followed by a historical work on the German song, 'Das deutsche Lied,' etc. (1861), rewritten as 'Geschichte des Deutschen Liedes' (1874). This again was succeeded by his General History of Music—'Allg. Musikgeschichte' (3 vols. 1864, Leipzig), with a great number of interesting examples; and that by 'Compositionslehre' (3 vols. Berlin, 1866–70). His recent works have been of a biographical nature, attempts to show the gradual development of the life and genius of the chief musicians—Schumann (1865), Mendelssohn (1867), Schubert (1873), Haydn (1879). All books about these great men are interesting, especially when written by practical and intelligent musicians; and Dr. Reissmann's are illustrated by copious examples (in Schubert's case from MS. sources), which much increase their value. In 1877 he published a volume of lectures on the history of music, delivered in the Conservatorium of Berlin, where he has resided since 1863. His chief employment since 1871 has been the completion of the 'Musik Conversationslexikon,' in which he succeeded Mendel as editor, after the death of the latter. The 11th volume, completing the work, appeared in 1879, and it will long remain as the most comprehensive Lexicon of music. Dr. Reissmann unfortunately thought it necessary to oppose the establishment of the Royal High School for Music at Berlin in 1875, and to enforce his opposition by a bitter pamphlet, which however has long since been forgotten. [See Musik, Königliche Hochschule für, vol. ii. p. 437*b*.] As a practical musician Dr. Reissmann has been almost as industrious as he has been in literature. The list given in the Lexicon comprises 2 grand operas and one comic ditto; an oratorio; 2 dramatic scenes for solos, male chorus, and orchestra; a concerto and a suite for solo violin and orchestra; 2 sonatas for pianoforte and violin; and a great quantity of miscellaneous pieces for piano solo and for the voice—in all nearly 50 published works. He is now (1881) at Leipzig, editing an Illustrated History of German music. [G.]

RELATION is a general term implying connection between two or more objects of consideration, through points of similarity and contrast. In other words, it is the position which such objects appear to occupy when considered with reference to one another. It is defined by its context.

The relations of individual notes to one another may be described in various ways. For instance, they may be connected by belonging to or being prominent members of the diatonic series of any one key, and contrasted in various degrees by the relative positions they occupy in that series. A further simple relation is established by mere proximity, such as may be observed in the relations of grace-notes, appoggiaturas, turns, and shakes to the essential notes which they adorn; and this is carried so far that notes alien to the harmony and even to the key are freely introduced, and are perfectly intelligible when in close connection with characteristic diatonic notes. The relations of disjunct notes may be found, among other ways, by their belonging to a chord which is easily called to mind; whence the successive sounding of the constituents of familiar combinations is easily realised as melody; while melody which is founded upon less obvious relations is not so readily appreciated.

The relations of chords may be either direct or indirect. Thus they may have several notes in common, as in Ex. 1, or only one, as in Ex. 2,



to make simple direct connection, while the diversity of their derivations, or their respective degrees of consonance and dissonance, afford an immediate sense of contrast. Or they may be indirectly connected through an implied chord or note upon which they might both converge; as the common chord of D to that of C through G, to which D is Dominant, while G in its turn is Dominant to C (Ex. 3). The relation thus established is sufficiently clear to allow the major chord of the supertonic and its minor seventh and major and minor ninth to be systematically affiliated in the key, though its third and minor ninth are not in the diatonic series.

A further illustration of the relations of chords is afforded by those of the Dominant and Tonic. They are connected by their roots being a fifth apart, which is the simplest interval, except the octave, in music; but their other components are entirely distinct, as is the compound tone of the roots, since none of their lower and more characteristic harmonics are coincident. They thus represent the strongest contrast in the diatonic series of a key, and when taken together define the tonality more clearly than any other pair of chords in its range.

The relations of keys are traced in a similar manner; as, for instance, by the tonic and perfect fifth of one being in the diatonic series of another, or by the number of notes which are common to both. The relations of the keys of the minor third and minor sixth to the major mode (as of E♭ and A♭ with reference to C) are rendered intelligible through the minor mode; but the converse does not hold good, for the relations of keys of the major mediant or submediant to the minor mode (as of E minor and A minor with reference to C minor) are decidedly remote, and direct transition to them is not easy to follow. In fact the modulatory tendency of the minor mode is towards the connections of its relative major rather than to those of its actual major, while the outlook of the major mode is free on both sides. The relation of the key of the Dominant to an original Tonic is explicable on much the same grounds as that of the chords of those notes. The Dominant key is generally held to be a very satisfactory complementary or contrast in the construction of a piece of music of any sort, but it is not of universal cogency. For instance, at the very outset of any movement it is almost inevitable that the Dominant harmony should early and emphatically present itself; hence when a fresh section is reached it is sometimes desirable to find another contrast to avoid tautology. With some such purpose the keys of the mediant or submediant have at times been chosen, both of which afford interesting phases of contrast and connection; the connection being mainly the characteristic major third of the original tonic, and the contrast being emphasised by the sharpening of the Dominant in the first case, and of the Tonic in the second. The key of the subdominant is avoided in such cases because the contrast afforded by it is not sufficiently strong to have force in the total impression of the movement.

The relations of the parts of any artistic work are in a similar manner those of contrast within limits of proportion and tonality. For instance, those of the first and second section in what is called 'first movement' or 'sonata' form are based on the contrast of complementary tonalities as part of the musical structure, on the one hand; and on contrast of character and style in the idea on the other; which between them establish the balance of proportion. The relation of the second main division—the 'working-out' section—to the first part of the movement is that of greater complexity and freedom in contrast to regularity and definiteness of musical structure, and fanciful discussion of characteristic portions of the main subjects in contrast to formal exposition of complete ideas; and the final section completes the cycle by returning to regularity in the recapitulation.

The relations of the various movements of a large work to one another are of similar nature. The earliest masters who wrote Suites and Sonate di Camera or di Chiesa had but a rudimentary and undeveloped sense of the relative contrasts of keys; consequently they contented themselves with connecting the movements by putting them all in the same key, and obtained their contrasts by alternating quick and slow movements or dances, and by varying the degrees of their seriousness or liveliness: but the main outlines of the distribution of contrasts are in these respects curiously similar to the order adopted in the average modern Sonata or Symphony. Thus they placed an allegro of a serious or solid character at or near the beginning of the work, as typified by the Allemande; the slow or solemn movement came in the middle, as typified by the Sarabande; and the conclusion was a light and gay quick movement, as typified by the Gigue. And further, the manner in which a Courante usually followed the Allemande, and a Gavotte or Bourrée or Passepied, or some such dance, preceded the final Gigue, has its counterpart in the Minuet or Scherzo of a modern work, which occupies an analogous position with respect either to the slow or last movement. In modern works the force of additional contrast is obtained by putting central movements in different but allied keys to that of the first and last movements; the slow movement most frequently being in the key of the Subdominant. At the same time additional bonds of connection are sometimes obtained, both by making the movements pass without complete break from one to another, and in some cases (illustrated by Beethoven and Schumann especially) by using the same characteristic features or figures in different movements.

The more subtle relations of proportion, both in the matter of the actual length of the various movements and their several sections, and in the breadth of their style; in the congruity of their forms of expression and of the quality of the emotions they appeal to; in the distribution of the qualities of tone, and even of the groups of harmony and rhythm, are all of equal importance, though less easy either to appreciate or to effect, as they demand higher degrees of artistic power and perception; and the proper adjustment of such relations are as vital to operas, oratorios, cantatas, and all other forms of vocal music, as to the purely instrumental forms.

The same order of relations appears in all parts of the art; for instance, the alternation of discord and concord is the same relation, implying contrast and connection, analogous to the relation between suspense or expectation and its relief; and to speak generally, the art of the composer is in a sense the discovery and exposition of intelligible relations in the mutifarious material at his command, and a complete explanation of

the word would amount to a complete theory of music. [C.H.H.P.]

RELFE, JOHN—whose father, Lupton Relfe (died, Oct. 1805), was for fifty years organist of Greenwich Hospital—was born about 1766. He received his first instruction from his father, and at eighteen was articled to Keeble, organist of St. George's, Hanover Square. About 1810 he was appointed one of the King's band of music. He had much reputation as a teacher of the pianoforte, and composed some sonatas, a popular ballad, 'Mary's Dream,' and other pieces. In 1798 he published 'The Principles of Harmony,' in which nearly the whole theoretical plan of Logier, so far as it was connected with offering elementary instruction through the medium of exercises, was anticipated. He was also author of 'Remarks on the Present State of Musical Instruction,' 1819, and 'Lucidus Ordo,' an attempt to divest thorough-bass and composition of their intricacies, 1819. He died about 1837. [W.H.H.]

RELLSTAB. Two remarkable people, father and son. The father, JOHANN KARL FRIEDRICH, was one of those active intellects who are so influential in their locality; he was born in Berlin Feb. 27, 1759. His father, a printer, wished him to succeed to the business, but from boyhood his whole thoughts were devoted to music. He was on the point of starting for Hamburg to complete his studies with Emmanuel Bach when the death of his father forced him to take up the business. He then added a music printing and publishing branch; was the first to establish a musical lending library (1783); founded a Concert-Society, on the model of Hiller's at Leipzig, and called it 'Concerts for connoisseurs and amateurs,' an unusually distinctive title for those days. The first concert took place April 16, 1787, at the Englische Haus, and in course of time the following works were performed:—Salieri's 'Armida,' Schulz's 'Athalia,' Naumann's 'Cora,' Hasse's 'Conversione di San Agostino,' Bach's 'Magnificat,' and Gluck's 'Alceste,' which was thus first introduced to Berlin. The Society at last merged in the Singakademie. He wrote musical critiques for the Berlin paper, signed with his initials; and had concerts every other Sunday during the winter at his own house, at which such works as Haydn's 'Seasons' were performed; but these meetings were stopped by the entry of the French in 1806, when he frequently had 20 men, and a dozen horses quartered on him; lost not only his music but all his capital, and had to close his printing-press. In time, he resumed his concerts; in 1809 gave lectures on harmony; in 1811 travelled to Italy, and his letters in Voss's newspaper first drew attention to Fräulein Milder, and thus brought about her invitation to Berlin. Not long after his return he was struck with apoplexy while walking at Charlottenburg, Aug. 19, 1813, and found dead on the road some hours afterwards. As a composer he left 3 cantatas, a 'Passion,' a Te Deum, and a Mass. Also an opera; songs too numerous to specify; vocal scores of Graun's 'Tod Jesu,' and Gluck's 'Iphigenie'; a German libretto of Gluck's 'Orphée' apparently from his own pen. Of instrumental music he published—marches for PF., symphonies and overtures; a series of pieces with characteristic titles, 'Obstinacy,' 'Sensibility,' etc.; 24 short pieces for PF., violin and bass, etc. Also A 'Treatise on Declamation'; 'A Traveller's observations on church-music, concerts, operas, and chamber-music at the Palace in Berlin' (1789); and 'A guide to Bach's system of fingering for the use of pianists' (1790). These works, for the most part bibliographical curiosities, are very instructive.

Rellstab had three daughters, of whom CAROLINE, born April 18, 1793 or 94, was a singer, distinguished for her extraordinary compass. His son,

HEINRICH FRIEDRICH LUDWIG, born April 13, 1799, in Berlin, though delicate in health, and destined for practical music, was compelled by the times to join the army, where he became ensign and lieutenant. In 1816, after the peace, he took lessons on the piano from Ludwig Berger, and in 1819 and 20 studied theory with Bernhard Klein. At the same time he taught mathematics and history in the Brigadeschule till 1821, when he retired from the army to devote himself to literature. He also composed much part-music for the 'jüngere Liedertafel' which he founded in conjunction with G. Reichardt in 1819, wrote a libretto, 'Dido,' for B. Klein, and contributed to Marx's 'Musikzeitung.' A pamphlet on Madame Sontag procured him 3 months' imprisonment in 1825, on account of its satirical allusions to a well-known diplomatist. In 1826 he joined the staff of Voss's newspaper, and in a short time completely led the public opinion on music in Berlin. His first article was a report on a performance of 'Euryanthe,' Oct. 31, 1826, followed on Nov. 13 by another on a soirée at the Jagor Hall, at which Mendelssohn played Beethoven's 9th Symphony on the piano, and thus introduced that gigantic work to Berlin. Twenty-two years later Rellstab wrote:—

> That evening made an indelible impression on my mind, and the recollection of it is as fresh as of an event of yesterday—nay of to-day. The most accomplished musicians of Berlin, including Berger and Klein, were present. The wonderful, almost awe-inspiring work, exacted the homage due to it, but the attention of all present was rivetted upon the young artist dealing with unmistakeable mastery with that mighty score, as I related at the time, though in far too measured terms, my pen being then unpractised. His eager glance took in the whole of each page, his ear 'penetrated like a gimlet' (to use an expression of Zelter's) into the very essence of the music, his fingers never erred.

Two years later he wrote a cantata for Humboldt's congress of physicists, which Mendelssohn set to music.

Rellstab was a warm supporter of classical music, and strongly condemned all undue attempts at effect. He quarrelled with Spontini over his 'Agnes von Hohenstauffen' (Berlin 'Musikalische Zeitung' for 1827, Nos. 23, 24, 26, and 29), and the controversy was maintained with much bitterness until Spontini left Berlin, when Rellstab, in his pamphlet 'Ueber mein Verhältniss als Kritiker zu Herrn Spontini,' acknowledged that he had gone too far.

Rellstab's novels and essays are to be found for the most part in his 'Gesammelte Schriften' 24 vols. (Leipzig, Brockhaus). A musical periodical, 'Iris im Reiche der Tonkunst,' founded by him in 1830, survived till 1842. His recollections of Berger, Schroeder-Devrient, Mendelssohn, Klein, Dehn, and Beethoven (whom he visited in March 1825) will be found in 'Aus meinem Leben' (2 vols. Berlin, 1861). He was thoroughly eclectic in his taste for music, and, though not an unconditional supporter, was no opponent of the modern school of Liszt and Wagner. He died during the night of Nov. 27, 1860. [F.G.]

REMÉNYI, Eduard, a famous violinist, was born in 1830 at Hewes (according to another account at Miskolc) in Hungary, and received his musical education at the Vienna Conservatoire during the years 1842–1845, where his master on the violin was Joseph Böhm, the same who instructed Joachim. In 1848 he took an active part in the insurrection, and became adjutant to the famous general Görgey, under whom he took part in the campaign against Austria. After the revolution had been crushed he had to fly his country, and went to America, where he resumed his career as a virtuoso. In 1853 he went to Liszt in Weimar, who at once recognised his genius and became his artistic guide and friend. In the following year he came to London and was appointed solo violinist to the Queen. In 1860 he obtained his amnesty and returned to Hungary, where some time afterwards he received from the Emperor of Austria a similar distinction to that granted him in England. After his return home he seems to have retired for a time from public life, living chiefly on an estate he owned in Hungary. In 1865 he appeared for the first time in Paris, where he created a perfect furore in the salons of the aristocracy. Repeated artistic tours in Germany, Holland, and Belgium further tended to spread his fame. In 1875 he settled temporarily in Paris, and in the summer of 1877 came to London, where also he produced a sensational effect in private circles. The season being far advanced he appeared in public only once, at Mr. Mapleson's benefit concert at the Crystal Palace, where he played a fantasia on themes from the 'Huguenots.' In the autumn of 1878 he again visited London, and played at the Promenade Concerts. He was on his way to America, where he has been giving concerts for the last three years and still resides (1881). As an artist M. Reményi combines perfect mastery over the technical difficulties of his instrument with a strongly pronounced poetic individuality. His soul is in his playing, and his impulse carries him away with it as he warms to his task, the impression produced on the audience being accordingly in an ascending scale. He never tires, and one never tires of him. The stormier pieces of Chopin transferred by him from the piano to the violin are given by Reményi with overpowering effect. But tenderer accents are not wanting; the nocturnes of Chopin and Field, arranged in the same way, he gives with the suavest dreaminess, interrupted at intervals only by accents of passion. Another important feature in Reményi's playing is the national element. He strongly maintains against Liszt the genuineness of Hungarian music, and has shown himself thoroughly imbued with that spirit by writing several 'Hungarian melodies,' which have been mistaken for popular tunes and adopted as such by other composers. The same half-Eastern spirit is observable in the strong rhythmical accentuation of Reményi's style, so rarely attained by artists of Teutonic origin. For this and other reasons the arrangements of Chopin's mazurkas and similar pieces are more congenial to him than the classical works of Beethoven, Schumann, Mendelssohn, which, as a matter of course, are in his répertoire. Altogether his genius will be most appreciated in a drawing-room, where his marked individuality is felt more immediately than in a large concert-hall. Reményi's fame is accordingly of a somewhat peculiar kind. It resembles that of our non-exhibiting painters. Most English amateurs have heard his name and know that he ranks amongst the leading artists of the day, but few can vouch for the general impression by their personal experience. Moreover, Reményi is of too migratory a nature to follow up his success in any given place. He is the wandering musician *par excellence*, and at intervals, when the whim takes him, will disappear from public view altogether. But although somewhat of the nature of a comet, he is undoubtedly a star of the first magnitude in his own sphere. Reményi's compositions are of no importance, being mostly confined to arrangements for his instrument and other pieces written for his own immediate use.

REMPLISSAGE, 'filling up.' A term sometimes met with in musical criticism, which means what is colloquially called 'padding,' or passages—generally of a florid and modulatory character—put by composers of inferior degree into their compositions, whether from barrenness of ideas, or from want of skill in using those they have, whereby the bulk of the work is increased, but not its interest or value. [J.A.F.M.]

RENDANO, Alfonso, born April 5, 1853, at Carolei, near Cosenza, studied first at the Conservatorio at Naples, then with Thalberg, and lastly at the Leipzig Conservatorium. He played at the Gewandhaus with marked success on Feb. 8, 1872. He then visited Paris and London, performed at the Musical Union (April 30, 1872), the Philharmonic (March 9, 73), the Crystal Palace, and other concerts, and much in society; and after a lengthened stay returned to Italy. He was a graceful and refined player, with a delicate touch, a great command over the mechanism of the piano, and a pleasing melancholy in his expression. His playing of Bach was especially good. He has published some piano pieces of no importance. [G.]

RE PASTORE, IL. A dramatic cantata to Metastasio's words (with compressions), composed by Mozart at Salzburg in 1775, in honour of the Archduke Maximilian. First performed

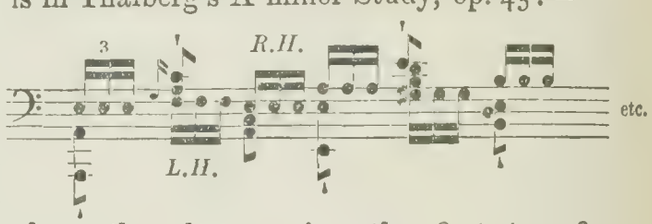
April 23, 1775. It contains an overture and 14 numbers. The autograph is in the Royal Library at Berlin, and the work is published in Breitkopf's complete edition as Series V. No. 10.

Aminta's air, 'L'amerò,' was at one time a favourite with Madame Lind-Goldschmidt. [G.]

REPEAT, REPETIZIONE, REPLICA (Ger. *Wiederholung*; Fr. *Répétition*, which also means 'rehearsal'). In the so-called sonata-form, there are certain sections which are repeated, and are either written out in full twice over, or are written only once, with the sign at the end, which shows that the music is to be repeated either from the beginning or from the previous occurrence of the sign. The sections which, according to the strict rule, are repeated, are—the first section of the first movement, both sections of the minuet or scherzo at their first appearance, and both sections of the trio, after which the minuet or scherzo is gone once straight through without repeats. The last half of the first movement, and the first, or even both, of the sections in the last movement, may be repeated; see for instance Beethoven's Sonatas Op. 2, No. 2; Op. 10, No. 2; Op. 78; Schubert's Symphony No. 9. Also, where there is an air and variations, both sections of the air and of all the variations, should, strictly speaking, be repeated. Although it is a regular custom not to play the minuet or scherzo, after the trio, with repeats, Beethoven thinks fit to draw attention to the fact that it is to be played straight through, by putting after the trio the words 'Da Capo senza repetizione,' or 'senza replica,' in one or two instances, as in Op. 10, No. 3, where moreover the trio is not divided into two sections, and is not repeated; in Op. 27, No. 2, where the Allegretto is marked 'La prima parte senza repetizione' (the first part without repeat). In his 4th and 7th Symphonies he has given the trio twice over each time with full repeats. [J.A.F.M.]

REPETITION (Pianoforte). The rapid reiteration of a note is called repetition; a special touch of the player facilitated by mechanical contrivances in the pianoforte action; the earliest and most important of these having been the invention of Sebastian Erard. [See the diagram and description of Erard's action under Pianoforte, vol. ii. p. 722.] By such a contrivance the hammer, after the delivery of a blow, remains poised, or slightly rises again, so as to allow the hopper to fall back and be ready to give a second impulse to the hammer before the key has nearly recovered its position of rest. The particular advantages of repetition to grand pianos have been widely acknowledged by pianoforte makers, and much ingenuity has been spent in inventing or perfecting repetition actions for them: in upright pianos however the principle has been rarely employed, although its influence has been felt and shown by care in the position of the 'check' in all check action instruments. The French have named the mechanical power to rapidly repeat a note, 'double échappement'; the drawbacks to double escapement—which the repetition really is—are found in increased complexity of mechanism and liability to derangement. These may be overrated, but there always remains the drawback of loss of tone in repeated notes; the repetition blow being given from a small depth of touch compared with the normal depth, is not so elastic and cannot be delivered with so full a *forte*, or with a *piano* or *pianissimo* of equally telling vibration. Hence, in spite of the great vogue given to repetition effects by Herz and Thalberg, other eminent players have disregarded them, or have even been opposed to repetition touches, as Chopin was and Dr. Hans von Bülow is—see p. 7, § 10 of his commentary on selected studies by Chopin (Aibl, Munich, 1880), where he designates double escapement as a 'deplorable innovation.'

A fine example of the best use of repetition is in Thalberg's A minor Study, op. 45:—



where the player, using the first two fingers and thumb in rapid succession on each note, produces by these triplets almost the effect of a sustained melody with a tremolo. It is this effect, produced by mechanical means only, that is heard in Signor Caldera's Melopiano as made by Herz in Paris, and Kirkman in London. Repetition is however an old device with stringed instruments, having been, according to Bunting, a practice with the Irish harpers, as we know it was with the common dulcimer, the Italian mandoline and the Spanish bandurria.

A remarkable instance may be quoted of the effective use of repetition in the Fugato (piano solo) from Liszt's 'Todtentanz' (Danse Macabre)

But there need be no difficulty in playing this on a well-regulated and checked single escapement. With a double escapement the nicety of checking is not so much required. [A.J.H.]

REPRISE, repetition; a term which is occasionally applied to any repetition in music, but is most conveniently confined to the recurrence of the first subject of a movement after the conclusion of the working out or *Durchführung*. In that sense it is used in this work. [G.]

REQUIEM (Lat. *Missa pro Defunctis*; Ital. *Messa per i Defonti*; Fr. *Messe des Morts*; Germ. *Todtenmesse*). A solemn Mass, sung, annually, in Commemoration of the Faithful Departed, on All Souls' Day (Nov. 2); and, with a less general intention, at Funeral Services, on the anniversaries of the decease of particular persons, and on such other occasions as may be dictated by feelings of public respect, or individual piety.

The Requiem takes its name[1] from the first word of the Introit—'Requiem æternam dona eis, Domine.' When set to Music, it naturally arranges itself in nine principal sections: (1) The Introit—'Requiem æternam'; (2) the 'Kyrie'; (3) the Gradual, and Tract—'Requiem æternam,' and 'Absolve, Domine'; (4) The Sequence or Prose—'Dies iræ'; (5) The Offertorium—'Domine Jesu Christi'; (6) the 'Sanctus'; (7) the 'Benedictus'; (8) the 'Agnus Dei'; and (9) the Communio—'Lux æterna.' To these are sometimes added (10) the Responsorium, 'Libera me,' which, though not an integral portion of the Mass, immediately follows it, on all solemn occasions; and (11) the Lectio—'Tædet animam meam,' of which we possess at least one example of great historical interest.

The Plain Chaunt Melodies adapted to the nine divisions of the Mass will be found in the Gradual; together with that proper for the Responsorium. The Lectio, which really belongs to a different Service, has no proper Melody, but is sung to the ordinary 'Tonus Lectionis.' [See ACCENTS.] The entire series of Melodies is of rare beauty; and produces so solemn an effect, when sung, in Unison, by a large body of Grave Equal Voices, that most of the great Polyphonic Composers have employed its phrases more freely than usual, in their Requiem Masses, either as Canti fermi, or, in the form of unisonous passages interposed between the harmonised portions of the work. Compositions of this kind are not very numerous; but most of the examples we possess must be classed among the most perfect productions of their respective authors.

Palestrina's 'Missa pro Defunctis,' for 5 Voices, first printed at Rome in 1591, in the form of a supplement to the Third Edition of his 'First Book of Masses,' was reproduced in 1841 by Alfieri, in the first volume of his 'Raccolta di Musica Sacra'; again, by Lafage, in a valuable 8vo. volume, entitled 'Cinq Messes de Palestrina';[2] and by the Prince de la Moskowa in the 9th volume of his collection [see p. 31 of the present vol.], and has since been advertised, by Messrs. Breitkopf & Härtel, of Leipzig, as part of the contents of their complete edition. This beautiful work is, unhappily, very incomplete, consisting only of the 'Kyrie,' the 'Offertorium,' the 'Sanctus,' the 'Benedictus,' and the 'Agnus Dei.' We must not, however, suppose that the Composer left his work unfinished. It was clearly his intention that the remaining Movements should be sung, in accordance with a custom still common at Roman Funerals, in unisonous Plain Chaunt: and, as a fitting conclusion to the whole, he has left us two settings of the 'Libera me,' in both of which the Gregorian Melody is treated with an indescribable intensity of pathos.[3] One of these is preserved, in MS., among the Archives of the Pontifical Chapel, and the other, among those of the Lateran Basilica. After a careful comparison of the two, Baini arrived at the conclusion that that belonging to the Sistine Chapel must have been composed very nearly at the same time as, and probably as an adjunct to, the five printed Movements, which are also founded, more or less closely, upon the original Canti fermi, and so constructed as to bring their characteristic beauties into the highest possible relief—in no case, perhaps, with more touching effect than in the opening 'Kyrie,' the first few bars of which will be found at page 78 of our second volume.

Next in importance to Palestrina's Requiem, is a very grand one, for 6 Voices, composed by Vittoria, for the Funeral of the Empress Maria, widow of Maximilian II. This fine work—undoubtedly the greatest triumph of Vittoria's genius—comprises all the chief divisions of the Mass, except the Sequence, together with the Responsorium, and Lectio; and brings the Plain Chaunt Subjects into prominent relief, throughout. It was first published, at Madrid, in 1605—the year of its production. In 1869 the Lectio was reprinted at Ratisbon, by Joseph Schrems, in continuation of Proske's 'Musica divina.' A later cahier of the same valuable collection contains the Mass and Responsorium; both edited by Haberl, with a conscientious care which would leave nothing to be desired, were it not for the altogether needless transposition with which the work is disfigured, from beginning to end. The original volume contains one more Movement—'Versa est in luctum'—which has never been reproduced in modern notation; but, as this has now no place in the Roman Funeral Service, its omission is not so much to be regretted.

Some other very fine Masses for the Dead, by Francesco Anerio, Orazio Vecchi, and Giov. Matt. Asola, are included in the same collection, together with a somewhat pretentious work, by Pitoni, which scarcely deserves the enthusiastic eulogium bestowed upon it by Dr. Proske. A far finer Composition, of nearly similar date, is Colonna's massive Requiem for 8 Voices, first printed at Bologna in 1684—a copy of which

[1] That is to say, its name as a special Mass. The Music of the ordinary Polyphonic Mass always bears the name of the Canto fermo on which it is founded.

[2] Paris, Launer et Cie.; London, Schott & Co.

[3] See Alfieri, 'Raccolta di Musica Sacra.' Tom. vii.

is preserved in the Library of the Sacred Harmonic Society.

Our *répertoire* of modern Requiem Masses, if not numerically rich, is sufficiently so, in quality, to satisfy the most exacting critic. Three only of its treasures have attained a deathless reputation; but, these are of such superlative excellence, that they may be fairly cited as examples of the nearest approach to sublimity of style that the 19th century has as yet produced.

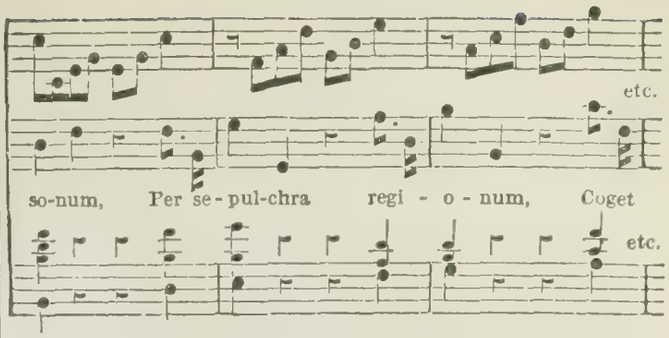
(1.) The history of Mozart's last work is surrounded by mysteries which render it scarcely less interesting to the general reader than the Music itself is to the student. Thanks to the attention drawn to it by recent writers, the narrative is now so well known, that it is needless to do more than allude to those portions of it which tend to assist the critic in his analysis of the Composition. Its outline is simple enough. In the month of July, 1791, Mozart was commissioned to write a Requiem, by a mysterious-looking individual, whom, in the weakness consequent upon his failing health and long-continued anxiety, he mistook for a visitant from the other world. It is, now, well known that the 'Stranger' was, really, a certain Herr Leutgeb, steward to Graf Franz von Walsegg, a nobleman residing at Stuppach, who, having lately lost his wife, proposed to honour her memory by foisting upon the world, as his own Composition, the finest Funeral Mass his money could procure. This, however, did not transpire until long after Mozart's death. Suspecting no dishonourable intention on the part of his visitor, he accepted the commission; and strove to execute it, with a zeal so far beyond his strength, that worn out with over-work and anxieties, and tormented by the idea that he was writing the Music for his own Funeral, he died while the MS. still remained unfinished. His widow, fearing that she might be compelled to refund the money already paid for the work in advance, determined to furnish the 'Stranger' with a perfect copy, at any risk; and, in the hope of accomplishing this desperate purpose, entrusted the MS., first, to the Hofkapellmeister, Jos. von Eybler, and afterwards to Franz Xavier Süssmayer, for completion. Von Eybler, after a few weak attempts, gave up the task in despair. Süssmayer was more fortunate. He had watched the progress of the Requiem through each successive stage of its development. Mozart had played its various Movements to him on the Pianoforte, had sung them with him over and over again, and had even imparted to him his latest ideas on the subject, a few hours, only, before his death. Süssmayer was an accomplished Musician, intimately acquainted with Mozart's method of working: and it would have been hard, if, after having been thus unreservedly admitted into the dying Composer's confidence, he had been unable to fill up his unfinished sketches with sufficient closeness of imitation to set the widow's fears of detection at rest. He did in fact, place in her hands a complete Requiem, which Count Walsegg accepted, in the full belief that it was in Mozart's handwriting throughout. The 'Requiem' and 'Kyrie' were really written by Mozart; but the remainder was skilfully copied from sketches—now generally known as the 'Urschriften'—which, everywhere more or less unfinished, were carefully filled in, as nearly as possible in accordance with the Composer's original intention. The widow kept a transcript of this MS., and afterwards sold it to Messrs. Breitkopf & Härtel, of Leipzig, who printed it, in full score, in 1800. But, notwithstanding the secrecy with which the affair had been conducted, rumours were already afloat, calculated to throw grave doubts upon the authenticity of the work. Süssmayer, in reply to a communication addressed to him by Messrs. Breitkopf & Härtel, laid claim to the completion of the 'Requiem,' 'Kyrie,' 'Dies iræ,' and 'Domine,' —of which he said that Mozart had 'fully completed the four Vocal Parts, and the Fundamental Bass, with the Figuring, but only here and there indicated the *motivi* for the Instrumentation,'— and asserted that the 'Sanctus,' 'Benedictus,' and 'Agnus Dei,' were entirely composed by himself (*ganz neu von mir verfertigt*). This bold statement, however, did not set the dispute at rest. It was many times revived, with more or less acerbity; until, in 1825, Gottfried Weber brought matters to a climax, by publishing a virulent attack upon the Requiem, which he denounced as altogether unworthy of Mozart, and attributed almost entirely to Süssmayer. To follow the ensuing controversy through its endless ramifications would far exceed our present limits. Suffice it to say, that we are now in possession of all the evidence, documentary or otherwise, which seems at all likely to be brought forward on either side. With the assistance of Mozart's widow (then Madame von Nissen), Joh. André, of Offenbach, published, in 1826, a new edition of the Score, based upon that previously printed by Messrs. Breitkopf & Härtel, but corrected, by careful comparison, in the presence of the Abbé Stadler, with that originally furnished to the Graf von Walsegg, and marked, on the Abbé's authority, with the letters, 'M.' and 'S.' to distinguish the parts composed by Mozart from those added by Süssmayer. In 1829, Herr André conferred another benefit upon the artistic world by publishing, with the widow's permission, Mozart's original sketches of the 'Dies iræ,' 'Tuba mirum,' and 'Hostias,' exactly as the Composer left them. All these publications are still in print, together with another Score, lately published by Messrs. Breitkopf & Härtel in their complete edition of Mozart, in which the distinction between Mozart's work and Süssmayer's is very clearly indicated, as in Andre's earlier edition, by the letters 'M.' and 'S.' Happily, the original MSS. are now in safe keeping, also. In 1834, the Abbé Stadler bequeathed the autograph sketch of the entire 'Dies iræ,' with the exception of the last Movement, to the Imperial Library at Vienna. Hofkapellmeister von Eybler soon afterwards presented the corresponding MSS. of the 'Lacrymosa,' the 'Domine Jesu,' and

the 'Hostias.' The collection of 'Urschriften,' therefore, needed only the original autographs of the 'Requiem' and 'Kyrie,' to render it complete. These MSS, alone, would have been a priceless acquisition; but, in 1838, the same Library was still farther enriched by the purchase, for 50 ducats, of the complete MS. originally sold to Count von Walsegg; and it is now conclusively proved that the 'Requiem' and 'Kyrie,' with which this MS. begins, are the original autographs needed to complete the collection of 'Urschriften'; and, that the remainder of the work is entirely in the hand-writing of Süssmayer. It is, therefore, quite certain, that, whatever else he may have effected, Süssmayer did not furnish the Instrumentation of the 'Requiem' and 'Kyrie,' as he claims to have done.[1]

In criticising the merits of the Requiem as a work of Art, it is necessary to weigh the import of these now well-ascertained facts, very carefully indeed, against the internal evidence afforded by the Score itself. The strength of this evidence has not, we think, received, as yet, full recognition. Gottfried Weber, dazzled, perhaps, by the hypothetic excellence of another Requiem of his own production, roundly abused the entire Composition, which he described as a disgrace to the name of Mozart. Few other Musicians would venture to adopt this view; though many have taken exception to certain features in the Instrumentation—more especially, some Trombone passages in the 'Tuba mirum' and 'Benedictus'—even, in one case, to the extent of doubting whether they may not have been purposely introduced, as a mask, 'to screen the fraud of an impostor.' Yet, strange to say, the first of these very passages stands, in the Vienna MS. in Mozart's own handwriting.[2]

[1] The full details of the remarkable history, which we have here given in the form of a very rapid sketch, will be found in a delightful little brochure, entitled 'The Story of Mozart's Requiem,' by William Pole. F.R.S., Mus. Doc., Oxon. (Novello & Co.)

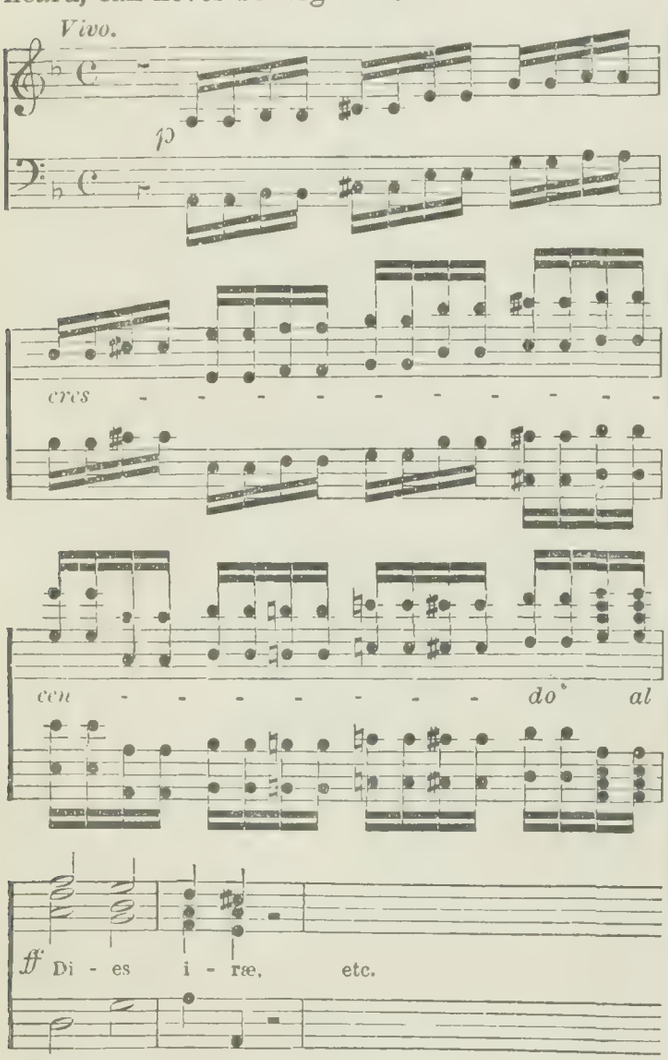
[2] We make this statement on the authority of Messrs. Breitkopf & Härtel's latest Score, having had no opportunity of verifying it, by comparison with the original MS., before going to press.



Such passages as these, though they may, perhaps, strengthen Süssmayer's claim to have filled in certain parts of the Instrumentation, stand on a very different ground to those which concern the Composition of whole Movements. The 'Lacrymosa' is, quite certainly, one of the most beautiful Movements in the whole Requiem—and Mozart is credited with having only finished the first 8 bars of it! Yet it is impossible to study this movement, carefully, without arriving at Professor Macfarren's conclusion, that 'the whole was the work of one mind, which mind was Mozart's.' Süssmayer may have written it out, perhaps; but it must have been from the recollection of what Mozart had played, or sung to him; for, we know that this very Movement occupied the dying Composer's attention, almost to the last moment of his life. In like manner, Mozart may have left no 'Urschriften' of the 'Sanctus,' 'Benedictus,' and 'Agnus Dei'—though the fact that they have never been discovered does not prove that they never existed—and yet he may have played and sung these Movements often enough to have given Süssmayer a very clear idea of what he intended to write. We must either believe that he did this, or that Süssmayer was as great a genius as he; for not one of Mozart's acknowledged Masses will bear comparison with the Requiem, either as a work of Art, or the expression of a devout religious feeling. In this respect, it stands almost alone among Instrumental Masses, which nearly always sacrifice religious feeling to technical display.

(2.) Next in importance to Mozart's immortal work are the two great Requiem Masses of Cherubini. The first of these, in C minor, was written for the Anniversary of the death of King Louis XVI. (Jan. 21, 1793), and first sung, on that occasion, at the Abbey Church of Saint-Denis, in 1817; after which it was not again heard until Feb. 14, 1820, when it was repeated, in the same Church, at the Funeral of the Duc de Berri. Berlioz regarded this as Cherubini's greatest work. It is undoubtedly full of beauties. Its general tone is one of extreme mournfulness, pervaded, throughout, by deep religious feeling. Except in the 'Dies iræ' and 'Sanctus' this style is never exchanged for a more excited one; and, even then, the treatment can scarcely be called dramatic. The deep pathos of the little Movement, interposed after the last 'Osanna,' to fulfil the usual office of the 'Benedictus'—which is here incorporated with the 'Sanctus'—exhibits the Composer's power of appealing to the feelings in its most affecting light.

The second Requiem, in D minor, for three Male Voices, is, in many respects, a greater work than the first; though the dramatic element pervades it so freely, that its character as a Religious Service is sometimes entirely lost. It was completed on Sept. 24, 1836, a few days after the Composer had entered his 77th year; and, with the exception of the Sixth Quartet, and the Quintet in E minor, was his last important work. The 'Dies iræ' was first sung at the Concert of the Conservatoire, March 19, 1837, and repeated on the 24th of the same month. On March 25, 1838, the work was sung throughout. In the January of that year, Mendelssohn had already recommended it to the notice of the Committee of the Lower Rhine Festival; and, in 1872 and 1873, it was sung, as a Funeral Service, in the Roman Catholic Chapel, in Farm Street, London. It is doubtful whether Cherubini's genius ever shone to greater advantage than in this gigantic work. Every Movement is replete with interest; and the 'whirlwind of sound' which ushers in the 'Dies iræ' produces an effect, which, once heard, can never be forgotten.



(3.) It remains only to notice a work, which, though a Requiem only in name, takes high rank among the greatest productions of the present day.

The 'German Requiem' of Johannes Brahms is, in reality, a Sacred Cantata, composed to words selected from Holy Scripture, in illustration of the joys of the Blessed, and the glories of the Life to Come. It prefers no claim to be considered as a Religious Service, in any sense of the word; and must, therefore, be criticised, like the great Mass of Sebastian Bach, as a shorter form of Oratorio. So considered, it is worthy of all praise; and exhibits, throughout, a striking originality, very far removed from the eccentricity which sometimes passes under that name, and too frequently consists in the presentation of forms rejected by older Composers by reason of their ugliness. The general style is neither dramatic, nor sensuously descriptive: but, in his desire to shadow forth the glories of a higher state of existence, the Composer has availed himself of all the latest resources of modern Music, including the most complicated Orchestral Effects, and Choral Passages of almost unconquerable difficulty. In the first Movement, an indescribable richness of tone is produced by the skilful management of the Stringed Band, from which the violins are altogether excluded. In the Funeral March, a strange departure from recognised custom is introduced, in the use of Triple Time, which the Composer has compelled to serve his purpose, so completely, that the measured tramp of a vast Procession is as clearly described, and as strongly forced upon the hearer's attention, as it could possibly have been by the ordinary means. The next division of the work introduces two Choral Fugues, founded upon Subjects which each embrace a compass of eleven notes, and differ, in many very important points, both of construction and treatment, from the Motivi employed by other adepts in this particular style of Composition. The *Crescendo* which separates these two Movements, is, at the same time, one of the most beautiful, and one of the most fearfully difficult passages in the entire work. No. 4 is an exquisitely melodious Slow Movement, in Triple Time; and No. 5, an equally attractive Soprano Solo and Chorus. No. 6 is a very important section of the work, comprising several distinct Movements, and describing, with thrilling power, the awful events connected with the Resurrection of the Dead. Here, too, the fugal treatment is very peculiar; the strongly characteristic Minor Second in the Subject, being most unexpectedly represented by a Major Second in the Answer. The Finale, No. 7, concludes with a lovely reminiscence of the First Movement, and brings the work to an end, with a calm pathos which is the more effective from its marked contrast with the stormy and excited Movements by which it is preceded.

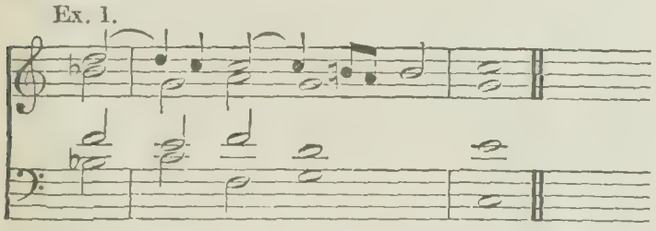
It is impossible to study this important Composition in a truly impartial spirit without arriving at the conclusion that its numerous unusual features are introduced, not for the sake of singularity, but, with an honest desire to produce certain effects, which undoubtedly are producible, when the Chorus and Orchestra are equal to the interpretation of the author's ideas. The possibility of bringing together a sufficiently capable Orchestra and Chorus has already been fully demonstrated, both in England and in Germany. The 'Deutsches Requiem,' first produced at Bremen, on Good Friday, 1868, was first heard,

in this country, at the house of Lady Thompson, London, July 7, 1871, Miss Regan and Stockhausen singing the solos, and Lady Thompson and Mr. Cipriani Potter playing the accompaniment *à quatre mains*. It was next performed at the Philharmonic Society's Concert, April 2, 1873, and has since been most effectively given by the Bach Choir, and the Cambridge University Musical Society. The excellence of these performances plainly shows that the difficulties of the work are not really insuperable. They may, probably, transcend the power of an average country Choral Society; but we have heard enough to convince us that they may be dealt with successfully by those who really care to overcome them, and we are thus led to hope that after a time the performance of the work may not be looked upon as an unusual occurrence. [W.S.R.]

RESOLUTION is the process of relieving dissonance by succeeding consonance. All dissonance is irritant and cannot be indefinitely dwelt upon by the mind, but while it is heard the return to consonance is awaited. To conduct this return to consonance in such a manner that the connection between the chords may be intelligible to the hearer is the problem of resolution.

The history of the development of harmonic music shows that the separate idea of resolution in the abstract need not have been present to the earliest composers who introduced discords into their works. They discovered circumstances in which the flow of the parts, moving in consonance with one another, might be diversified by retarding one part while the others moved on a step, and then waited for that which was left behind to catch them up. This process did not invariably produce dissonance, but it did conduce to variety in the independent motion of the parts. The result, in the end, was to establish the class of discords we call suspensions, and their resolutions were inevitably implied by the very principle on which the device is founded. Thus when Josquin diversified a simple succession of chords in what we call their first position, as follows—

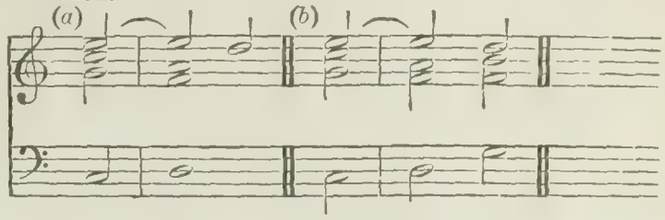
Ex. 1.



it seems sufficiently certain that no such idea as resolving a discord was present to his mind. The motion of D to C and of C to B was predetermined, and their being retarded was mainly a happy way of obtaining variety in the flow of the parts, though it must not be ignored that the early masters had a full appreciation of the actual function and effect of the few discords they did employ.

Some time later the device of overlapping the succeeding motions of the parts was discovered, by allowing some or all of those which had gone on in front to move again while the part which had been left behind passed to its destination; as by substituting (*b*) for (*a*) in Ex. 2.

Ex. 2.

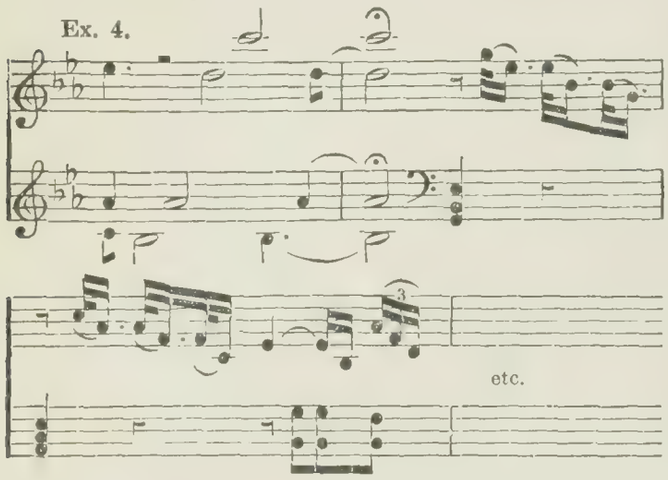


This complicated matters, and gave scope for fresh progressions and combinations, but it did not necessarily affect the question of resolution, pure and simple, because the destination of the part causing the dissonance was still predetermined. However, the gradually increasing frequency of the use of discords must have habituated hearers to their effect and to the consideration of the characteristics of different groups, and so by degrees to their classification. The first marked step in this direction was the use of the Dominant seventh without preparation, which showed at least a thorough appreciation of the fact that some discords might have a more independent individuality than others. This appears at first merely on this side, of occasionally discarding the formality of delaying the note out of a preceding chord in order to introduce the dissonance; but it led also towards the consideration of resolution in the abstract, and ultimately to greater latitude in the process of returning to consonance. Both their instinct and the particular manner in which the aspects of discords presented themselves at first led the earlier composers to pass from a discordant note to the nearest available note in the scale, wherever the nature of the retardation did not obviously imply the contrary; and this came by degrees to be accepted as a tolerably general rule. Thus the Dominant seventh is generally found to resolve on the semitone below; and this, combined with the fact that the leading note was already in the chord with the seventh, guided them to the relation of Dominant and Tonic chords; although they early realised the possibility of resolving on other harmony than that of the Tonic, on special occasions, without violating the supposed law of moving the seventh down a semitone or tone, according to the mode, and raising the leading note to what would have been the Tonic on ordinary occasions. However, the ordinary succession became by degrees so familiar that the Tonic chord grew to be regarded as a sort of resolution in a lump of the mass of any of the discords which were built on the top of a Dominant major concord, as the seventh and major or minor ninth, such as are now often called Fundamental discords. Thus we find the following passage in a Haydn Sonata in D—

Ex. 3.

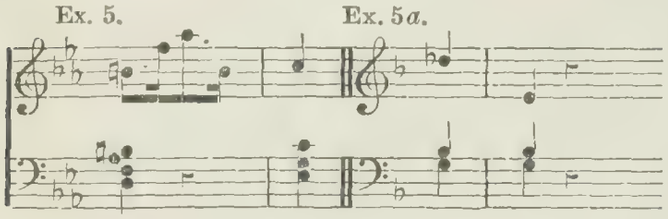
in which the Dominant seventh is not resolved by its passing to a near degree of the scale, but by the mass of the harmony of the Tonic following the mass of the harmony of the Dominant. Ex. 4 is an example of a similar use by him of a Dominant major ninth.

Ex. 4.



A more common way of dealing with the resolution of such chords was to make the part having the discordant note pass to another position in the same harmony before changing, and allowing another part to supply the contiguous note; as in Ex. 5, from one of Mozart's Fantasias in C minor.

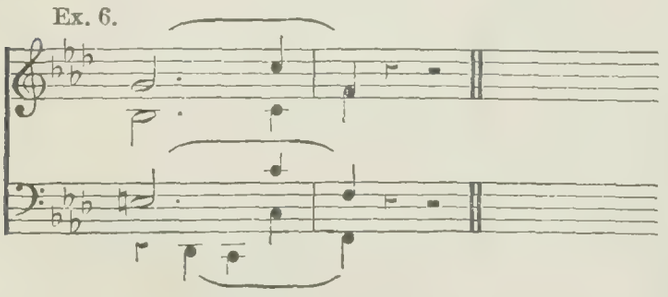
Ex. 5. Ex. 5*a*.



Some theorists hold that the passage of the ninth to the third—as D♭ to E in Ex. 5*a* (where the root C does not appear)—is sufficient to constitute resolution. That such a form of resolution is very common is obvious from theorists having noticed it, but it ought to be understood that the mere change of position of the notes of a discord is not sufficient to constitute resolution unless a real change of harmony is implied by the elimination of the discordant note; or unless the change of position leads to fresh harmony, and thereby satisfies the conditions of intelligible connection with the discord.

A much more unusual and remarkable resolution is such as appears at the end of the first movement of Beethoven's F minor Quartet as follows—

Ex. 6.



where the chord of the Dominant seventh contracts into the mere single note which it represents, and that proceeds to the note only of the Tonic; so that no actual harmony is heard in the movement after the seventh has been sounded. An example of treatment of an inversion of the major ninth of the Dominant, which is as unusual, is the following from Beethoven's last Quartet, in F, op. 135.

Ex. 7.

There remain to be noted a few typical devices by which resolutions are either varied or elaborated. One which was more common in early stages of harmonic music than at the present day was the use of representative progressions, which were in fact the outline of chords which would have supplied the complete succession of parts if they had been filled in. The following is a remarkable example from the Sarabande of J. S. Bach's Partita in B♭.

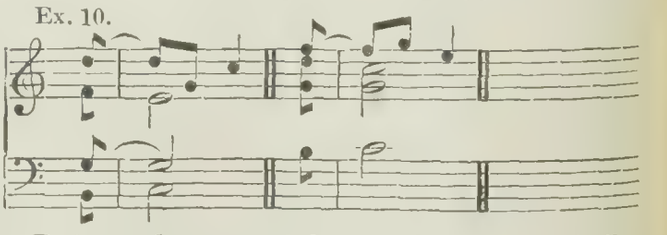
Ex. 8.

which might be interpreted as follows :—

Ex. 9.

Another device which came early into use, and was in great favour with Bach and his sons and their contemporaries, and is yet an ever fruitful source of variety, is that of interpolating notes in the part which has what is called the discordant note, between its sounding and its final resolution, and either passing direct to the note which relieves the dissonance from the digression, or touching the dissonant note slightly again at the end of it. The simplest form of this device was the leap from a suspended note to another note belonging to the same harmony, and then back to the note which supplies the resolution, as in Ex. 10; and this form was extremely common in quite the early times of polyphonic music.

Ex. 10.



But much more elaborate forms of a similar nature were made use of later. An example from J. S. Bach will be found at p. 678 of vol. i,

of this Dictionary; the following example, from a Fantasia by Emanuel Bach, illustrates the same point somewhat remarkably, and serves also as an instance of enharmonic resolution.

Ex. 11.

The minor seventh on C in this case is ultimately resolved as if it had been an augmented sixth composed of the same identical notes according to our system of temperament, but derived from a different source and having consequently a different context. This manner of using the same group of notes in different senses is one of the most familiar devices in modern music for varying the course of resolutions and obtaining fresh aspects of harmonic combinations. [For further examples see MODULATION, CHANGE, ENHARMONIC.]

An inference which follows from the use of some forms of Enharmonic resolution is that the discordant note need not inevitably move to resolution, but may be brought into consonant relations by the motion of other parts, which relieve it of its characteristic dissonant effect; this is illustrated most familiarly by the freedom which is recognised in the resolution of the chord of the sixth, fifth and third on the subdominant, called sometimes the added sixth, and sometimes an inversion of the supertonic seventh, and sometimes an inversion of the eleventh of the Dominant, or even a double-rooted chord derived from Tonic and Dominant together.

It is necessary to note shortly the use of vicarious resolutions—that is, of resolutions in which one part supplies the discordant note and another the note to which under ordinary circumstances it ought to pass. This has been alluded to above as common in respect of the so-called fundamental discords, but there are instances of its occurring with less independent combinations. The Gigue of Bach's Partita in E minor is full of remarkable experiments in resolution; the following is an example which illustrates especially the point under consideration.

Ex. 12.

The inference to be drawn from the above examples is that the possible resolutions of discords, especially of those which have an individual status, are varied, but that it takes time to discover them, as there can hardly be a severer test of a true musical instinct in relation to harmony than to make sure of such a matter. As a rule, the old easily recognisable resolutions, by motion of a single degree, or at least by interchange of parts of the chord in supplying the subsequent consonant harmony, must preponderate, and the more peculiar resolutions will be reserved for occasions when greater force and intensity are required. But as the paradoxes of one generation are often the truisms of the next, so treatment of discords such as is utterly incredible to people who do not believe in what they are not accustomed to, is felt to be obvious to all when it becomes familiar; and hence the peculiarities which are reserved for special occasions at first must often in their turn yield the palm of special interest to more complex instinctive generalisations. Such is the history of the development of musical resources in the past, and such it must be in the future. The laws of art require to be based upon the broadest and most universal generalisations; and in the detail under consideration it appears at present that the ultimate test is thorough intelligibility in the melodic progressions of the parts which constitute the chords, or in a few cases the response of the harmony representing one root to that representing another, between which, as in Examples 3 and 4, there is a recognised connection sufficient for the mind to follow without the express connection of the flow of the parts. Attempts to catalogue the various discords and their various resolutions must be futile as long as the injunction is added that such formulas only are admissible, for this is to insist upon the repetition of what has been said before; but they are of value when they are considered with sufficient generality to help us to arrive at the ultimate principles which underlie the largest circle of their multifarious varieties. The imagination can live and move freely within the bounds of comprehensive laws, but it is only choked by the accumulation of precedents. [C.H.H.P.]

RESPONSE, in English church music, is, in its widest sense, any musical sentence sung by the choir at the close of something read or chanted by the minister. The term thus includes the 'Amen' after prayers, the 'Kyrie' after each commandment in the Communion Service, the 'Doxology' to the Gospel, and every reply to a Versicle, or to a Petition, or Suffrage. In its more limited sense the first three of the above divisions would be excluded from the term, and

the last-named would fall naturally into the following important groups: (1) those which immediately precede the Psalms, called also the Preces; (2) those following the Apostles' Creed and the Lord's Prayer; (3) those following the Lord's Prayer in the Litany; (4) and the Responses of the first portion of the Litany, which however are of a special musical form which will be fully explained hereafter. Versicles and Responses are either an ancient formula of prayer or praise as, 'Lord, have mercy upon us,' etc., 'Glory be to the Father,' etc., or a quotation from Holy Scripture, as,

V. O Lord, open Thou our lips.
R. And our mouth shall shew forth Thy praise.

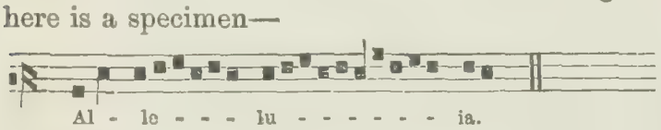
which is verse 15 of Psalm li; or a quotation from a church hymn, as,

V. O Lord, save Thy people.
R. And bless Thine inheritance.

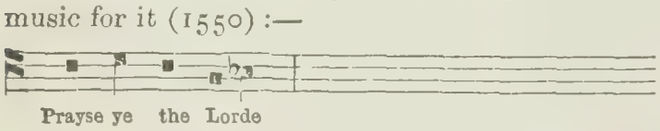
which is from the *Te Deum*; or an adaptation of a prayer to the special purpose, as,

V. Favourably with mercy hear our prayers.
R. O Son of David, have mercy upon us.

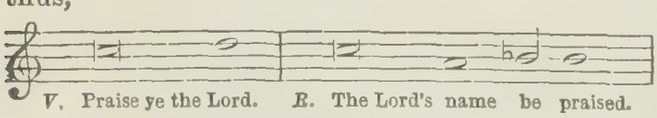
The musical treatment of such Versicles and Responses offers a wide and interesting field of study. There can be little doubt that all the inflections or cadences to which they are set have been the gradual development of an original monotonal treatment, which in time was found to be uninteresting and tedious (whence our term of contempt 'monotonous'), or was designedly varied for use on special occasions and during holy seasons. At the time of the Reformation the musical system of the Roman Church, with its distinct and elaborate inflections for Orations, Lections, Chapters, Gospels, Epistles, Antiphons, Introits, etc., etc. [see the article on PLAIN-SONG], was completely overthrown, and out of the wreck only a few of the most simple cadences were preserved. Even the response 'Alleluia' was sometimes extended to a considerable length: here is a specimen—



The word 'Alleluia' is found as a Response in the Prayer-book of 1549, for use between Easter and Trinity, immediately before the Psalms; during the remainder of the year the translation of the word was used. Here is Marbecke's music for it (1550):—

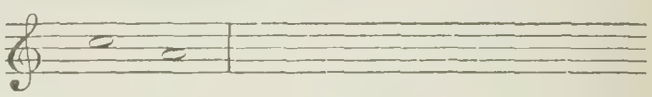


When this was in later editions converted into a Versicle and Response, as in our present Prayer-book, the music was, according to some uses, divided between the Versicle and Response, thus,



But as a matter of fact these 'Preces' in our Prayer-book which precede the daily Psalms have never been strictly bound by the laws of 'ecclesiastical chant,' hence, not only are great varieties of plain-song settings to be met with, gathered from Roman and other uses, but also actual settings in service-form (that is, like a motet), containing contrapuntal devices in four or more parts. Nearly all the best cathedral libraries contain old examples of this elaborate treatment of the Preces, and several have been printed by Dr. Jebb in his 'Choral Responses.'

As then the Preces are somewhat exceptional, we will pass to the more regular Versicles and Responses, such as those after the Apostles' Creed and the Lord's Prayer. And here we at once meet the final 'fall of a minor third,' which is an ancient form of inflection known as the *Accentus Medialis*:—



This is one of the most characteristic progressions in plain-song versicles, responses, confessions, etc., and was actually introduced by Marbecke into the closing sentences of the Lord's Prayer. It must have already struck the reader that this is nothing more or less than the 'note' of the cuckoo. This fact was probably in Shakespere's mind when he wrote,

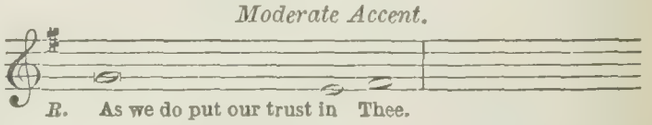
> The finch, the sparrow, and the lark,
> The *plain-song* cuckoo gray.

This medial accent is only used in Versicles and Responses when the last word is a polysyllable; thus—

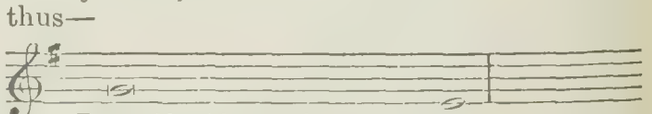
Medial Accent.

When the last word is a monosyllable, there is an additional note, thus—

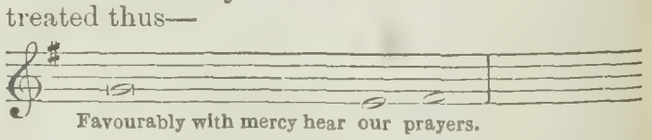
Moderate Accent.



This may be said to be the only law of the *Accentus Ecclesiasticus* which the tradition of our Reformed Church enforces. It is strictly observed in most of our cathedrals, and considering its remarkable simplicity, should never be broken. The word 'prayers' was formerly pronounced as a dissyllable; it therefore took the medial accent thus—



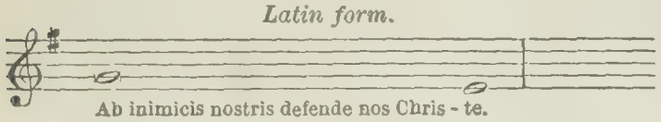
but as a monosyllable it should of course be treated thus—



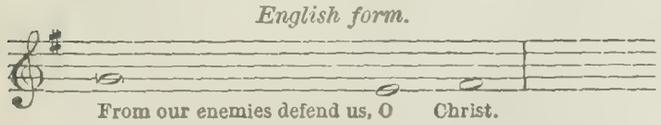
In comparing our Versicles and Responses with the Latin from which they were translated, it is important to bear this rule as to the 'final word' in mind. Because, the Latin and English of the

same Versicle or Response will frequently take different 'accents' in the two languages. For example, the following Versicle takes in the Latin the *medial accent*; but in the translation will require the *moderate accent.*

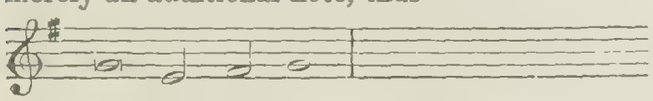
Latin form.



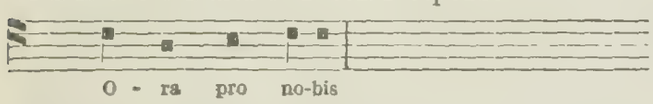
English form.



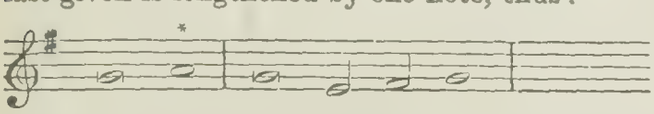
It has been just stated that the early part of the Litany does not come under the above laws of 'accent.' The principle melodic progression is however closely allied to the above, it having merely an additional note, thus—



This is the old and common Response



and to this are adapted the Responses, 'Spare us, good Lord'; 'Good Lord, deliver us'; 'We beseech Thee to hear us, good Lord'; 'Grant us Thy peace'; 'Have mercy upon us'; 'O Christ hear us' (the first note being omitted as redundant); and 'Lord have mercy upon us; Christ have mercy upon us.' At this point, the entry of the Lord's Prayer brings in the old law of medial and moderate accents; the above simple melody therefore is the true Response for the whole of the first (and principal) portion of the Litany. It is necessary however to return now to the preliminary sentences of the Litany, or the 'Invocations,' as they have been called. Here we find each divided by a colon, and, in consequence, the simple melody last given is lengthened by one note, thus:

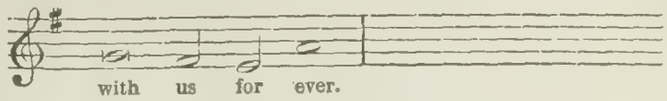


This is used without variation for all the Invocations. The asterisk shows the added note, which is set to the syllable immediately preceding the colon. It happens that each of the sentences of Invocation contains in our English version a monosyllable before the colon; but it is not the case in the Latin, therefore both Versicle and Response differ from our use, thus—

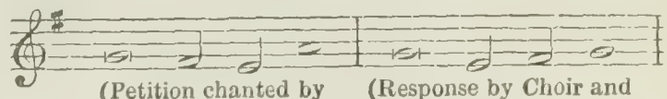
Latin.

In the petitions of the Litany, the note marked with an asterisk is approached by another addition, for instead of

we have—

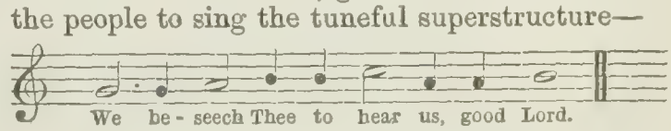


The whole sentence of music therefore stands thus—

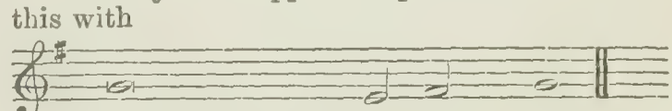


We have now shortly traced the gradual growth of the plain-song of the whole of our Litany, and it is impossible not to admire the simplicity and beauty of its construction.

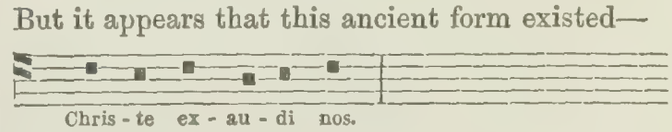
But the early English church-musicians frequently composed original musical settings of the whole Litany, a considerable number of which have been printed by Dr. Jebb; nearly all however are now obsolete except that by Thomas Wanless (organist of York Minster at the close of the 17th century), which is occasionally to be heard in our northern cathedrals. The plain-song was not always entirely ignored by church-musicians, but it was sometimes included in the tenor part in such a mutilated state as to be hardly recognisable. It is generally admitted that the form in which Tallis' responses have come down to us is very impure, if not incorrect. To such an extent is this the case that in an edition of the 'people's part' of Tallis, published not many years since, the editor (a cathedral organist) fairly gave up the task of finding the plain-song of the response, 'We beseech Thee to hear us, good Lord,' and ordered the people to sing the tuneful superstructure—



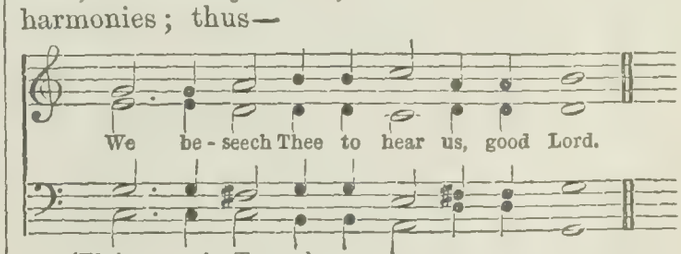
It certainly does appear impossible to combine this with



But it appears that this ancient form existed—

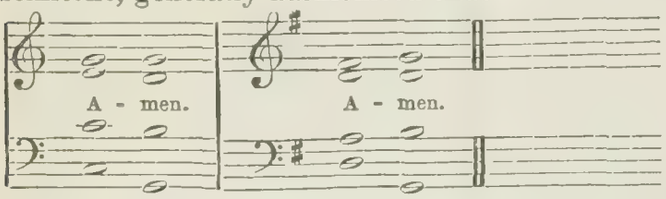


This, if used by Tallis, will combine with his harmonies; thus—



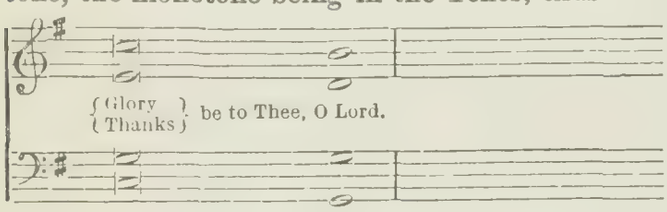
Having now described the Preces, Versicles and Responses, and Litany, it only remains to say a few words on (1) Amens, (2) Doxology to Gospel, (3) Responses to the Commandments,

all of which we have mentioned as being responses of a less important kind. (1) Since the Reformation but two forms of *Amen* have been used in our church, the monotone, and the approach by a semitone, generally harmonised thus—



The former of these 'Amens' in early times was used when the choir *responded* to the priest; the latter, when both priest and choir sang together (as after the Confession, Lord's Prayer, Creed, etc.). Tallis, however, *always* uses the monotonic form, varying the harmonies thrice. In more modern uses, however, the ancient system has been actually reversed, and (as at St. Paul's Cathedral) the former is only used when priest and choir join; the latter when the choir responds. In many cathedrals no guiding principle is adopted; this is undesirable.

(2) The Doxology to the Gospel is always monotone, the monotone being in the Tenor, thus—



There are, however, almost innumerable original settings of these words used throughout the country.

(3) The Responses to the Commandments are an expansion of the ancient—

Kyrie eleison,
Christe eleison,
Kyrie eleison,

made to serve as *ten* responses instead of being used as one responsive prayer. The ancient form actually appears in Marbecke (1550), and the so-called Marbecke's 'Kyrie' now used is an editorial manipulation. Being thrown on their own resources for the music to these ten responses, our composers of the reformed church always composed original settings, sometimes containing complete contrapuntal devices. At one period of vicious taste, *arrangements* of various sentences of music, sacred or secular, were pressed into the service. The 'Jomelli Kyrie' is a good—or rather, a bad—example. It is said to have been adapted by Attwood from a chaconne by Jomelli, which had already been much used on the stage as a soft and slow accompaniment of weird and ghostly scenes. The adaptation of 'Open the heavens' from 'Elijah' is still very popular, and may be considered a favourable specimen of an unfavourable class.

The re-introduction of choral celebrations of Holy Communion has necessitated the use of various inflections, versicles, and responses, of which the music or method of chanting has, almost without exception, been obtained from pre-Reformation sources. [J.S.]

RESPONSORIUM. A species of Antiphon, sung in many parts of the Roman Office, and particularly after each of the nine Lessons at Matins, in which Service it forms a very important feature, more especially during Holy Week, when the Lessons are taken from the Lamentations of Jeremiah, and the Responsoria are so arranged as to explain their connection with the sad History of the Passion. [See LAMENTATIONS.]

The number of Responsoria used throughout the Ecclesiastical Year is very great. The Plain Chaunt Melodies adapted to them will be found in the Antiphonarium, the Directorium Chori, the Officium Hebdomadæ Sanctæ, and other similar Office Books. They have also been frequently treated in the Polyphonic Style, with very great effect, not only by the Great Masters of the 16th century, but even as late as the time of Colonna, whose Responsoria of the Office for the Dead, for 8 Voices, are written with intense appreciation of the solemn import of the text.

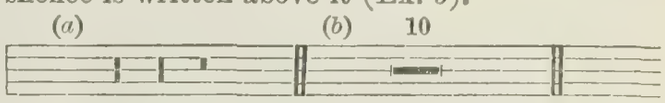
A large collection of very fine examples—including an exquisitely beautiful set for Holy Week, by Vittoria—will be found in vol. iv. of Proske's 'Musica Divina.' [W.S.R.]

REST (Fr. *Silence, Pause*; Ger. *Pause*; Ital. *Pausa*). The sign of silence in music, the duration of the silence depending upon the form of the character employed to denote it. The employment of the rest dates from the invention of 'measured music,' that is, music composed of notes of definite and proportionate values. [See MUSICA MENSURATA; NOTATION, p. 470.] In earlier times the *cantus* was sung without pauses, or with only such slight breaks as were necessary for the due separation of the sentences of the text, but so soon as the relative duration of the notes was established, the employment of rests of like proportionate values became a necessity. Franchinus Gafurius, in his 'Practica Musicæ' (1496), says that the Rest 'was invented to give a necessary relief to the voice, and a sweetness to the melody; for as a preacher of the divine word, or an orator in his discourse, finds it necessary oftentimes to relieve his auditors by the recital of some pleasantry, thereby to make them more favourable and attentive, so a singer, intermixing certain pauses with his notes, engages the attention of his hearers to the remaining parts of his song.' (Hawkins, 'Hist. of Music,' chap. 63.) Accordingly we find rests corresponding in value to each of the notes then in use, as shown in the following table.

Of these rests, two, the *semipausa* and *suspirium*, have remained in use until the present day, and appear, slightly increased in size but of unchanged value, as the semibreve and minim rests. Two of the longer rests are also occasionally used in modern music, the *pausa*, or breve rest, to express a silence of two bars' duration, and the *longa imperfecta* a silence of four. These rests are called in French *bâtons*, and are spoken of as 'bâton à deux mesures,' 'à quatre mesures.'

The rests employed in modern music, with their names and values in corresponding notes, are shown in the table below.[1]

By a license the semibreve rest is used to express a silence of a full bar in any rhythm (hence the German name *Taktpause*); its value is therefore not invariable, as is the case with all the other rests, for it may be shorter than its corresponding note, as when used to express a bar of 2-4 or 6-8 time, or longer, as when it occurs in 3-2 time. To express a rest of longer duration than one bar, either the *bâtons* of two or four bars are employed (Ex. *a*), or, more commonly, a thick horizontal line is drawn in the stave, and the number of bars which have to be counted in silence is written above it (Ex. *b*).



Like the notes, the value of a rest can be increased by the addition of a dot, and to the same extent, thus 𝄻· is equal to 𝄻𝄽, 𝄽· to 𝄽𝄾, and so on.

In the earlier forms of the ancient 'measured music' rests were used as a part of the time-signature, and placed immediately after the clef. In this position they did not denote silence, but merely indicated the description of Mode to be counted. [See NOTATION, MODE, TIME-SIGNATURE.]

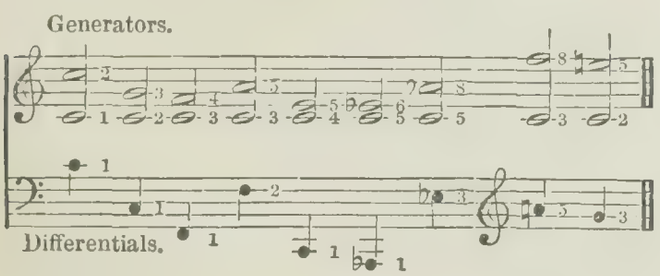
RESULTANT TONES (Fr. *Sons résultans*; Ger. *Combinationstöne*) are produced when any two loud and sustained musical sounds are heard at the same time. There are two kinds of resultant tones, the Differential and the Summational. The 'Differential tone' is so called because its number of vibrations is equal to the difference between those of the generating sounds. The 'Summational tone' is so called because its number of vibrations is equal to the sum of those of the generating sounds. The following diagram shows the pitches of the differential tones of the principal consonant intervals when in perfect tune.



If the interval be wider than an octave, as in the last two examples, the differential is intermediate between the sounds which produce it. These tones can be easily heard on the ordinary harmonium, and also on the organ. They are not so distinct on the piano, because the sounds of this instrument are not sustained. By practice, however, the resultant tones can be distinguished on the piano also.

Dissonant as well as consonant intervals produce resultant tones. Taking the minor Seventh in its three possible forms the differentials are as follows:—

The 1st form of minor Seventh is obtained by tuning two Fifths upwards (C–G–D) and then a major Third downwards (D–/B♭): its differential tone is /A♭, an exact major Third below C. The 2nd form is got by two exact Fourths upwards (C–F–B♭): the differential is then \A♭, which is flatter than the previous /A♭ by the interval 35:36. The 3rd form is the so-called Harmonic Seventh on C, whose differential is G, an exact Fourth below C. The marks \, /, here used to distinguish notes which are confused in the ordinary notation, will be found explained under TEMPERAMENT.

Hitherto we have spoken only of the differential tones which are produced by the fundamentals or prime partial tones of musical sounds. [See PARTIAL TONES.] But a differential may also arise from the combination of any upper partial of one sound with any partial of the other sound; or from the combination of a differential with a partial, or with another differential.

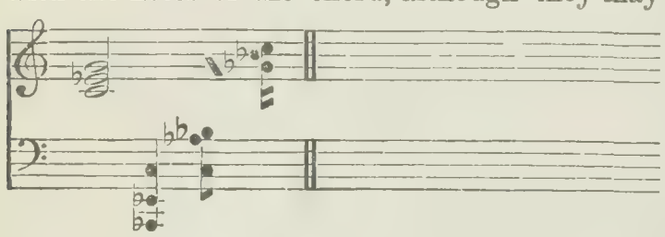
[1] The German form of the crotchet rest differs from the English, being usually written thus 𝄽. Rousseau also gives Italian forms of the semiquaver and demisemiquaver rests, thus 𝄿 and 𝅀; these are however not common.

Thus the major Third C–E may have the following differential tones:—

All these tones are heard simultaneously; but for convenience the differentials of the 1st, 2nd, 3rd, and 4th orders are written with notes of different length. We see, then, that the number of possible resultant tones is very great; but only those which arise from the primes of musical sounds are sufficiently strong to be of practical importance.

In enabling the ear to distinguish between consonant and dissonant intervals, the differential tones are only less important than the upper partials. Thus if the chord G–E–C be accurately tuned as 3 : 5 : 8, the differential of G–C coincides with E, and that of E–C with G. But if the intervals be tempered the differentials are thrown out of tune, and give rise to beats. These beats are very loud and harsh on the ordinary harmonium, tuned in equal temperament. Again, in the close triad C–E–G the differentials of C–E and of E–G coincide and give no beats if the intervals be in perfect tune. On a tempered instrument the result is very different. If we take C to have 264 vibrations, the tempered E has about $332\frac{1}{2}$, and the tempered G about $395\frac{1}{2}$ vibrations. The differential of C–E is then $68\frac{1}{2}$, and that of E–G 63. These two tones beat $5\frac{1}{2}$ times each second, and thus render the chord to some extent dissonant.

In the minor triad, even when in just intonation, several of the resultant tones do not fit in with the notes of the chord, although they may



be too far apart to beat. In the major triad, on the contrary, the resultant tones form octaves with the notes of the chord. To this difference Helmholtz attributes the less perfect consonance of the minor triad, and its obscured though not inharmonious effect.

The origin of the differential tones has been the subject of much discussion. Thomas Young held that when beats became too rapid to be distinguished by the ear, they passed into the resultant tone. This view prevailed until the publication in 1856 of Helmholtz's investigations, in which many objections to Young's theory were brought forward. To explain what these objections are, it would be necessary to treat at some length of the nature of beats, and the reader is therefore referred to the Appendix, Article Beats, for this side of the question. The new mathematical theory given by Helmholtz is too abstruse to admit of popular exposition.

It was also part of Young's theory that the differential tone was produced in the ear alone, and not in the external air. But Helmholtz found that stretched membranes and resonators responded very clearly to differentials produced by the siren or the harmonium. This he considers to prove the existence of vibrations in the external air corresponding to the differential tones. But when the two generating tones were produced by separate instruments, the differential, though powerfully audible, hardly set the resonator in vibration at all. Hence Helmholtz concludes that the differential tone is for the most part generated in the ear itself. He further points out that certain features in the construction of the ear easily permit the action of the law which he has stated. The unsymmetrical form of the drum-skin of the ear, and the loose attachment of the ossicles are, he thinks, peculiarly favourable to the production of resultant tones.

As a consequence of his theory, Helmholtz deduced a different series of resultant tones, which he calls *summational* tones, because their number of vibrations is the *sum* of those of the generators. The existence of the summational tones which Helmholtz believes he has verified experimentally, has recently been called in question by Dr. Preyer. He points out that in some intervals, as for instance, 1 : 2, 1 : 3, 1 : 5, there will be a partial tone present of the same pitch as the presumed summational tone, and these cases therefore prove nothing. Again, if we take 2 : 3, the note 5 is not necessarily a summational tone, but may be the differential of 4 and 9 which are the 2nd partial of 2 and the 3rd of 3 respectively. Dr. Preyer was unable to find any trace of the summational tones when care had been taken to exclude the upper partials. But to do this he could only use sounds of tuning-forks gently bowed, which were far too weak to produce any resultant tones in the air. The question, however, is one of theoretic interest merely.

Not only the origin, but also the discovery of differential tones has been disputed. The earliest publication of the discovery was made by a German organist named Sorge in 1745. Then came Romieu, a French savant, in 1751. Lastly, the great Italian violinist Tartini made the phenomenon the basis of his Treatise on Harmony in 1754. But Tartini explicitly claims priority in these words:—'In the year 1714, when about twenty-two years of age, he discovered this phenomenon by chance on the violin at Ancona, where many witnesses who remember the fact are still living. He communicated it at once, without reserve, to professors of the violin. He made it the fundamental rule of perfect tuning for the pupils in his school at Padua, which was commenced in 1728 and which still exists; and thus the phenomenon became known throughout Europe.'[1]

Tartini in some cases mistook the pitch of the differential tone; but there does not appear to

[1] De Principii dell' Armonia, Padova, 1767, p. 36.

be any reason for taking from him the credit of the discovery which has so long been associated with his name. [J. L.]

RETARDATION is a word used by some theorists to distinguish a small group of discords which are similar in nature to suspensions, but resolve upwards, as in Ex. 1.

Ex. 1. Ex. 2.

The ground for making this sub-class is that it appears inaccurate to describe as suspensions notes which are delayed or retarded in ascending. A comparison of Ex. 2, which would be distinguished as a suspension, with Ex. 1 will show the identity of principle which underlies the two discords; while the fact of their ascending or descending is clearly not an attribute but an accident. So in this case there is no other ostensible reason for breaking up a well-defined class but the fact that the common designation in use is supposed, perhaps erroneously, to be insufficient to denote all that ought to come under it. On the other hand it requires to be noted that as all discords of this class are discords of retardation, and as those which rise are very much less common than those which descend in resolution, the name which might describe the whole class is reserved for the smallest and least conspicuous group in that class. [C.H.H.P.]

REUTTER, Georg, born 1656 at Vienna, became in 1686 organist of St. Stephen's, and in 1700 Hof- and Kammer-organist. He also played the theorbo in the Hof-Kapelle from 1697 to 1703. In 1712 he succeeded Fux as Capellmeister to the *Gnadenbild* in St. Stephen's, and in 1715 became Capellmeister of the cathedral itself. He died Aug. 29, 1738. His church music was sound, without being remarkable. In Jan. 1695 he was knighted in Rome by Count Francesco Sforza, on whose family Pope Paul III. bestowed the privilege of conferring that honour in 1539. The name of Reutter is closely connected with that of Haydn, through his son,

Georg Karl (generally known by his first name only), who, according to the cathedral register, was born in Vienna April 6, 1708, became Court-composer in 1731, and succeeded his father in 1738 as Capellmeister of the cathedral. In 1746 he was appointed second Court-capellmeister, his duty being to conduct the music of the Emperor's church, chamber, and dinner-table. On Predieri's retirement in 1751 Reutter exercised the functions of chief Court-capellmeister, but did not receive the title till the death of the former in 1769. As an economical measure he was allowed the sum of 20,000 gulden (£2,000) to maintain the court-capelle (the whole body of musicians, vocal and instrumental), and he enjoys the melancholy distinction of having reduced the establishment to the lowest possible ebb. Reutter composed for the court numerous operas, cantatas *d'occasion*, and Italian oratorios for Lent; also a requiem, and smaller dramatic and sacred works. His grand masses are showy, with rapid and noisy instrumentation, so much so that 'rushing (rauschende) violins *à la Reutter*' became a proverb. Burney heard one of them during his visit to Vienna in 1772, and says 'it was dull, dry, stuff; great noise and little meaning characterised the whole performance.' (Present State of Music in Germany, i. 361.)[1] In 1731 Reutter married Theresia Holzhauser, a court singer of merit, who died in 1782. His own death took place March 12, 1772. He was much favoured at court owing to his great tact; and Maria Theresa ennobled him in 1740 as 'Edler von Reutter.' As stated above, his name is inseparably associated with that of Haydn, whom he heard sing as a boy in the little town of Hainburg, and engaged for the choir of St. Stephen's, where he sang from 1740 to 1748. His treatment of the poor chorister, and his heartless behaviour when the boy's fine voice had broken, are mentioned under Haydn, vol. i. 703. [C.F.P.]

REVEILLE. See Signals.

REVERSE. See Rovescio.

REVUE ET GAZETTE MUSICALE, the oldest and most complete of French musical periodicals. This branch of literature has taken root in France with great difficulty. So far back as Jan. 1770, M. de Breuilly and other amateurs founded the 'Journal de Musique' (monthly, 8vo), which after a troubled existence of three years was dropped till 1777, and then resumed for one year more. In 1810 Fayolle started 'Les Tablettes de Polymnie' (8vo), but it did not survive beyond 1811. Undeterred by these failures, Fétis brought out the first number of the 'Revue musicale' in January 1827. It appeared four times a month, each number containing 24 pages 8vo., till Feb. 5, 1831, when it was published weekly, in small 4to, double columns. 'La Gazette musicale de Paris,' started Jan. 5, 1834, was similar in size to Fétis's 'Revue,' and also weekly, but issued on Sunday instead of Saturday. The two were united on Nov. 1, 1835, since which date the 'Revue et Gazette musicale,' has twice enlarged its form, in 1841 and in 1845, at which date it became what it was till its last number, Dec. 31, 1880.

The property of the publishers Schlesinger and Brandus, this periodical has always been noted for the reputation and ability of its editors. Amongst its regular contributors have been: Anders, C. Bannelier, C. Beauquier, Berlioz, P. Bernard, H. Blanchard, A. Botte, M. Bourges, Chouquet, Comettant, Cristal, Danjou, Ernest David, F. J. Fétis, O. Fouque, Heller, Héquet, A. Jullien, Kastner, Lacome, A. de La Fage, Lavoix fils, Liszt, de Monter, d'Ortigues, Pougin, Monnais ('Paul Smith'), Richard Wagner, and Johannes Weber. A careful reader of the 47 volumes will easily recognise the sentiments

[1] It is Burney who is responsible for the absurd diæresis with which this name is usually spelt in England—Reütter.

of the various editors through whose hands it passed; among those deserving special mention are Fétis, Edouard Monnais, and M. Charles Bannelier, who conducted it from 1872 with equal learning and taste. The indexes given with each volume are a great boon, and constitute one of its advantages over other French periodicals of the same kind.

The cessation of this excellent periodical is an event which all lovers and students of music will deeply regret. We trust that the hope of a possible revival, held out by the publishers in their farewell address, may be speedily fulfilled. [G.C.]

REYER, Ernest, whose real name is Rey, was born at Marseilles, Dec. 1, 1823. As a child he learned solfeggio at the free school of music founded by Barsotti (born in Florence 1786, died at Marseilles 1868), and became a good reader, though he did not carry his musical education far. At 16 he went to Algiers as a government official, but continued his pianoforte practice, and began to compose without having properly learned harmony and counterpoint. He was soon able to write romances which became popular, and composed a mass which was solemnly performed before the Duke and Duchess d'Aumale. Had he remained in Algiers he would probably never have been anything beyond a mere amateur, but the Revolution of 1848 depriving him of the support of the Governor-General, he returned to Paris, and placed himself in the hands of his aunt Mme. Louise Farrenc, who completed his musical education, and before long he found an opportunity of coming before the public. From his friend Théophile Gautier he procured the libretto of 'Le Selam,' an oriental 'Symphony' in 4 parts, on the model of David's 'Le Désert.' It was produced with success April 5, 1850, and then Méry furnished him with 'Maître Wolfram,' a 1-act opera, which was also successful, at the Théâtre Lyrique, May 20, 1854. His next work was 'Sacountala' (July 20, 1858), one of the charming ballets of Théophile Gautier; but his full strength was first put forth in 'La Statue,' a 3-act opera produced at the Théâtre Lyrique, April 11, 1861, and containing music which is both melodious and full of colour. 'Erostrate' (2 acts) was performed at Baden in 1862, and reproduced at the Académie, Oct. 16, 1871, for two nights only. The revival of 'La Statue' at the Opéra in 1878 was also a failure, and M. Reyer may find it difficult to secure the performance of 'Sigurd,' of which the overture and some of the more important numbers have been heard. To complete the list of his compositions we may mention 'Victoire,' a cantata (the Opéra, June 27, 1859); a 'Recueil de 10 Mélodies' for voice and PF.; songs for a single voice; and some pieces of sacred music.

Besides being reckoned among the most poetical of French musicians, M. Reyer is an accomplished *feuilletoniste*. After writing successively for the 'Presse,' the 'Revue de Paris,' and the 'Courrier de Paris,' he became musical critic to the 'Journal des Débats' after the death of Berlioz. His articles are not only pleasant reading, but evince both intellect and culture. He is librarian to the Opéra, and succeeded his first model, David, at the Institut in 1876. [G.C.]

REYNOLDS, John, gentleman of the Chapel Royal from 1765 to 1770, was composer of the pleasing anthem, 'My God, my God, look upon me,' printed in Page's 'Harmonia Sacra,' Hullah's Part Music, vol. ii. and elsewhere. Nothing more of his is known. [W.H.H.]

RHEINBERGER, Joseph, born March 17, 1859, at Vaduz, the capital of the principality of Liechtenstein. He was so precocious that he began to learn the pianoforte at the age of five; at seven years old he was organist at the church of his native place, where, as his legs were too short to reach down to the pedals, a second set of pedals was fixed above the ordinary ones; and very shortly afterwards he composed a mass in three parts with organ accompaniment. His first teacher was Herr Pöhly, who still resides and teaches in the Tyrol. At the age of twelve Rheinberger was sent to the Munich Conservatorium, where he studied until he was nineteen, under Herzog, Leonhard, and J. J. Maier; he was then appointed pianoforte teacher in the same institution, and, about the same time, became organist in the Hofkirche of St. Michael, and subsequently Director of the Munich Oratorienverein. He is at present professor of counterpoint and of the higher school of organ-playing in the Royal School of Music, and conductor of the court band (not of the opera) at Munich. Up to the present time he has published 116 compositions, among which are—2 symphonies, 'Wallenstein' and 'Florentinische Sinfonie'; 2 operas, 'Die sieben Raben' and 'Thürmer's Töchterlein'; incidental music to a drama of Calderon's, and to one of Raimond's; several overtures, 'The Taming of the Shrew,' 'Demetrius,' etc.; many pianoforte works; a concerto for piano and orchestra; much chamber music and church music (among the latter a Grand Requiem for those who fell in the war of 1870–71), a Stabat Mater and a Mass in 8 parts (dedicated to Pope Leo XIII.); 5 organ sonatas, and various works for chorus and for male voices. Many of his pupils have attained eminence in their profession. His Quartet in Eb (op. 38) for PF. and strings is a favourite work at the Monday Popular Concerts, and has been performed there almost annually since 1874. A Sonata for PF. and violin in the same key (op. 77) has also been played there. [J.A.F.M.]

RHEINGOLD, DAS. The Vorspiel, or Prelude, of the Tetralogie of Wagner's 'Niebelungen Ring'—Rheingold, Walküre, Siegfried, and Götterdämmerung. It was first performed at Munich, Sept. 22, 1869, under the bâton of Herr Franz Wüllner. [G.]

RHINE FESTIVALS. See Niederrheinische Musikfeste, vol. ii. p. 455.

RHYTHM. This much-used and many-sided term may be defined as 'the systematic grouping of notes with regard to duration.' It is often inaccurately employed as a synonym for

its two sub-divisions, ACCENT and TIME, and in its proper signification bears the same relation to these that *metre* bears to *quantity* in poetry.

The confusion which has arisen in the employment of these terms is unfortunate, though so frequent that it would appear to be natural, and therefore almost inevitable. Take a number of notes of equal length, and give an emphasis to every second, third, or fourth, the music will be said to be in 'rhythm' of two, three, or four—meaning in *time*. Now take a number of these groups or bars and emphasize them in the same way as their sub-divisions: the same term will still be employed, and rightly so. Again, instead of notes of equal length, let each group consist of unequal notes, but similarly arranged, as in the following example from Schumann—

or in the Vivace of Beethoven's No. 7 Symphony: the form of these groups also is spoken of as the 'prevailing rhythm,' though here *accent* is the only correct expression.

Thus we see that the proper distinction of the three terms is as follows:—

Accent arranges a heterogeneous mass of notes into long and short;

Time divides them into groups of equal duration;

Rhythm does for these groups what Accent does for notes.

In short, Rhythm is the Metre of Music.

This parallel will help us to understand why the uneducated can only write and fully comprehend music in complete sections of four and eight bars.

Rhythm, considered as the orderly arrangement of groups of accents—whether bars or parts of bars—naturally came into existence only after the invention of time and the bar-line. Barbarous music, though more attentive to accent than melody, plain-chant and the polyphonic church music of the 16th century, fugues and most music in polyphonic and fugal style, all these present no trace of rhythm as above defined. In barbarous music and plain-chant this is because the notes exist only with reference to the words, which are chiefly metre-less: in polyphonic music it is because the termination of one musical phrase (foot, or group of accents) is always coincident with and hidden by the commencement of another. And this although the subject may consist of several phrases and be quite rhythmical in itself, as is the case in Bach's Organ Fugues in G minor and A minor. The *Rhythmus* of the ancients was simply the accent prescribed by the long and short syllables of the poetry, or words to which the music was set, and had no other variety than that afforded by their metrical laws. Modern music, on the other hand, would be meaningless and chaotic—a melody would cease to be a melody—could we not plainly perceive a proportion in the length of the phrases.

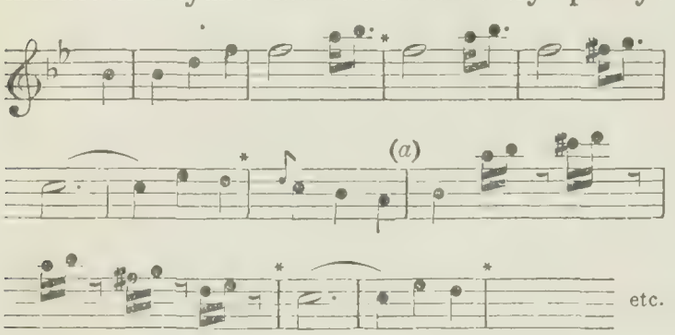
The bar-line is the most obvious, but by no means a perfect, means of distinguishing and determining the rhythm; but up to the time of Mozart and Haydn the system of barring was but imperfectly understood. Many even of Handel's slow movements have only half their proper number of bar-lines, and consequently terminate in the middle of a bar instead of at the commencement; as for instance, 'He shall feed His flock' (which is really in 6-8 time), and 'Surely He hath borne our griefs' (which should be 4-8 instead of C). Where the accent of a piece is strictly *binary* throughout, composers, even to this day, appear to be often in doubt about the rhythm, time, and barring of their music. The simple and unmistakable rule for the latter is this: the last strong accent will occur on the first of a bar, and you have only to reckon backwards. If the piece falls naturally into groups of four accents it is four in a bar, but if there is an odd two anywhere it should all be barred as two in a bar. Ignorance or inattention to this causes us now and then to come upon a sudden change from C to 2-4 in modern music.

With regard to the regular sequence of bars with reference to close and cadence—which is the true sense of rhythm—much depends upon the character of the music. The dance-music of modern society must necessarily be in regular periods of 4, 8, or 16 bars. Waltzes, though written in 3-4 time, are almost always really in 6-8, and a dance-music writer will sometimes, from ignorance, omit an unaccented bar (really a half-bar), to the destruction of the rhythm. The dancers, marking the time with their feet, and feeling the rhythm in the movement of their bodies, then complain, without understanding what is wrong, that such a waltz is 'not good to dance to.'

In pure music it is different. Great as are the varieties afforded by the diverse positions and combinations of strong and weak accents, the equal length of bars, and consequently of musical phrases, would cause monotony were it not that we are allowed to combine sets of two, three, and four bars. Not so freely as we may combine the different forms of accent, for the longer divisions are less clearly perceptible; indeed the modern complexity of rhythm, especially in German music, is one of the chief obstacles to its ready appreciation. Every one, as we have already said, can understand a song or piece where a half-close occurs at each fourth and a whole close at each eighth bar, where it is expected; but when an uneducated ear is continually being disappointed and surprised by unexpected prolongations and alterations of rhythm, it soon grows confused and unable to follow the sense of the music. Quick music naturally allows—indeed demands—more variety of rhythm than slow, and we can scarcely turn to any Scherzo or Finale of the great composers where such varieties are not made use of. Taking two-bar rhythm as the normal and simplest form—just as two notes form the simplest kind of accent—the first variety we have to notice is

where one odd bar is thrust in to break the continuity, as thus in the Andante of Beethoven's C minor Symphony:

this may also be effected by causing a fresh phrase to begin with a strong accent on the weak bar with which the previous subject ended, thus really eliding a bar, as for instance in the minuet in Haydn's 'Reine de France' Symphony:



Here the bar marked (*a*) is the overlapping of two rhythmic periods.

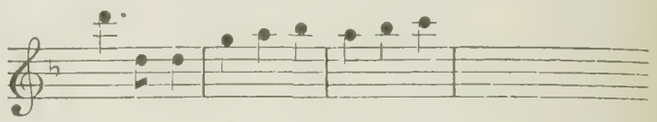
Combinations of two-bar rhythm are the rhythms of four and six bars. The first of these requires no comment, being the most common of existing forms. Beethoven has specially marked in two cases (Scherzo of 9th Symphony, and Scherzo of C♯ minor Quartet) 'Ritmo de 4 battute,' because, these compositions being in such short bars, the rhythm is not readily perceptible. The six-bar rhythm is a most useful combination, as it may consist of four bars followed by two, two by four, three and three, or two, two and two. The well-known minuet by Lulli (from 'Le Bourgeois Gentilhomme') is in the first of these combinations throughout.

And the opening of the Andante of Beethoven's 1st Symphony is another good example. Haydn is especially fond of this rhythm, especially in the two first-named forms. Of the rhythm of thrice two bars a good specimen is afforded by the Scherzo of Schubert's C major Symphony, where, after the two subjects (both in four-bar rhythm) have been announced, the strings in unison mount and descend the scale in accompaniment to a portion of the first theme, thus:

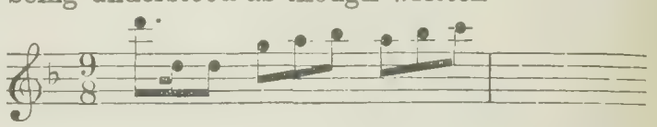
A still better example is the first section of 'God save the Queen.'

This brings us to triple rhythm, uncombined with double.

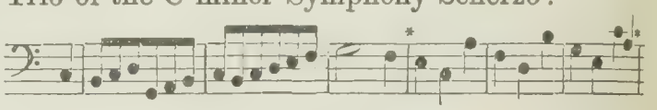
Three-bar rhythm, if in a slow time, conveys a very uncomfortable lop-sided sensation to the uncultivated ear. The writer remembers an instance when the band could hardly be brought to play a section of an Andante in 9-8 time and rhythm of three bars. The combination of $3 \times 3 \times 3$ was one which their sense of accent refused to acknowledge. Beethoven has taken the trouble in the Scherzo of his 9th Symphony to mark 'Ritmo di tre battute,' although in such quick time it is hardly necessary; the passage,



being understood as though written—



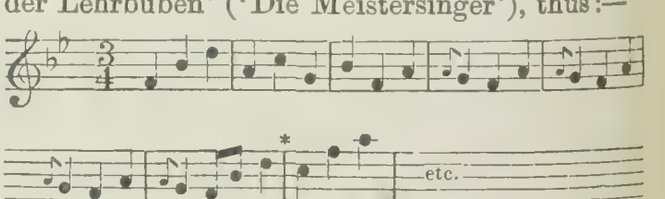
Numerous instances of triple rhythm occur, which he has not troubled to mark; as in the Trio of the C minor Symphony Scherzo:—



Rhythm of five bars is not, as a rule, productive of good effect, and cannot be used—any more than the other unusual rhythms—for long together. It is best when consisting of four bars followed by one, and is most often found in compound form—that is, as eight bars followed by two.

Minuet, Mozart's Symphony in C (No. 6).

A very quaint effect is produced by the unusual rhythm of seven. An impression is conveyed that the eighth bar—a weak one—has got left out through inaccurate sense of rhythm, as so often happens with street-singers and the like. Wagner has taken advantage of this in his 'Tanz der Lehrbuben' ('Die Meistersinger'), thus:—



It is obvious that all larger symmetrical groups than the above need be taken no heed of, as they are reducible to the smaller periods. One more point remains to be noticed, which, a beauty in older and simpler music, is becoming a source of weakness in modern times. This is the disguising or concealing of the rhythm by strong accents or change of harmony in weak bars. The last move-

ment of Beethoven's Pianoforte Sonata in D minor (op. 31) affords a striking instance of this. At the very outset

we are led to think that the change of bass at the fourth bar, and again at the eighth, indicates a new rhythmic period, whereas the whole movement is in four-bar rhythm as unchanging as the semiquaver figure which pervades it. The device has the effect of preventing monotony in a movement constructed almost entirely on one single figure. The same thing occurs in the middle of the first movement of the Sonatina (op. 79, Presto alla Tedesca). Now in both of these cases the accent of the bars is so simple that the ear can afford to hunt for the rhythm and is pleased by the not too subtle artifice; but in slower and less obviously accented music such a device would be out of place: there the rhythm requires to be impressed on the hearer rather than concealed from him.

On analysing any piece of music it will be found that whether the *ultimate* distribution of the accents be binary or ternary, the larger divisions nearly always run in twos, the rhythms of three, four, or seven being merely occasionally used to break the monotony. This is only natural, for, as before remarked, the comprehensibility of music is in direct proportion to the simplicity of its rhythm, irregularity in this point giving a disturbed and emotional character to the piece, until, when all attention to rhythm is ignored, the music becomes incoherent and incomprehensible, though not of necessity disagreeable. In 'Tristan and Isolde' Wagner has endeavoured, with varying success, to produce a composition of great extent, from which rhythm in its larger signification shall be wholly absent. One consequence of this is that he has written the most tumultuously emotional opera extant; but another is that the work is a mere chaos to the hearer until it is closely studied. Actual popularity and general appreciation for such music is out of all question for some generations to come. [F. C.]

RIBATTUTA (re-striking), an old contrivance in instrumental music, gradually accelerating the pace of a phrase of two notes, until a trill was arrived at. Beethoven has preserved it for ever in the Overture to Leonore 'No. 3' (bar 75 of *Allegro*).

See too another passage further on, before the Flute solo. [See TRILL.] [G.]

RIBS (Fr. *Éclisses*; Germ. *Zarge*). The sides of stringed instruments of the violin type, connecting the back and the belly. They consist of six (sometimes only five) pieces of maple, and should be of the same texture as the back, and if possible cut out of the same piece. After being carefully planed to the right thickness, they are bent to the required shape, and then glued together on the mould by means of the corner and top and bottom blocks, the angles being feather-edged. The back, the linings and the belly are then added, and the body of the violin is then complete. The ribs ought to be slightly increased in depth at the broader end of the instrument, but many makers have neglected this rule. The flatter the model, the deeper the ribs require to be; hence the viol tribe, having perfectly flat backs and bellies of slight elevation, are very deep in the ribs. The oldest violins were often very deep in the ribs, but many of them have been since cut down. Carlo Bergonzi and his contemporaries had a fashion of making shallow ribs, and often cut down the ribs of older instruments, thereby injuring their tone beyond remedy. Instruments made of ill-chosen and unseasoned wood will crack and decay in the ribs sooner than in any other part: but in the best instruments the ribs will generally outlast both belly and back. Some old makers were in the habit of glueing a strip of linen inside the ribs. [E.J.P.]

RICCI, LUIGI, born in Naples June 8, 1805, in 1814 entered the Royal Conservatorio, then under Zingarelli, of which he became in 1819 one of the sub-professors together with Bellini. His first work, 'L'Impresario in angustie,' was performed by the students of the Conservatorio in 1823, and enthusiastically applauded. In the following four years he wrote 'La Cena fra-stornata,' 'L'Abate Taccarella,' still very popular, 'Il Diavolo condannato a prender moglie,' and 'La Lucerna d'Epitteto,' all for the Teatro Nuovo. In 1828 his 'Ulisse,' at the San Carlo, was a failure. In 1829 'Il Colombo' in Parma and 'L'Orfanella di Ginevra' in Naples were both successful, the latter being still performed in many Italian theatres. The winter of 1829–30 was disastrous for Ricci, his four new operas ('Il Sonnambulo,' 'L'Eroina del Messico,' 'Annibale in Torino,' and 'La Neve') being all unsuccessful. In the autumn of 1831 he produced at La Scala of Milan 'Chiara di Rosemberg,' and this opera, performed by Grisi, Sacchi, Winter, Badioli, etc., was greatly applauded, and soon became successful in all the theatres of Italy. 'Il nuovo Figaro'

failed in Parma in 1832. In it sang Rozer, who afterwards married Balfe. The same fate attended 'I due Sergenti' at La Scala in 1833, where the following year he gave 'Un' Avventura di Scaramuccia,' which was a very great success, and was translated into French by Flotow. The same year 'Gli esposti,' better known as 'Eran due ed or son tre,' was applauded in Turin, whilst 'Chi dura vince,' like Rossini's immortal 'Barbiere,' was hissed at Rome. It was afterwards received enthusiastically at Milan and in many other opera-houses of Europe. It was dedicated to Louise Vernet, the wife of the great painter Paul Delaroche, the friend of Ricci. In 1835 'Chiara di Montalbano' failed at the Scala, while 'La serva e l'ussero' was applauded in Pavia. Ricci had thus composed twenty operas when only thirty years old; and although many of his works had met with a genuine and well-deserved success, he was still very poor and had to accept the post of Kapellmeister of the Trieste Cathedral and conductor of the Opera. In 1838 his 'Nozze di Figaro' was a fiasco in Milan, where Rossini told him that its fall was due to the music being *too serious*.

For the next six years Ricci composed nothing. In 1844 he married Lidia Stoltz, by whom he had two children, Adelaide, who in 1867 sang at the Théâtre des Italiens in Paris, but died soon after, and Luigi, who resides in London. 'La Solitaria delle Asturie' was given in Odessa in 1844; 'Il Birraio di Preston' in Florence in 1847; and in 1852 'La Festa di Piedigrotta' was very successful in Naples. His last opera 'Il Diavolo a quattro' was performed in Trieste in 1859.

Luigi Ricci composed in collaboration with his brother FEDERICO 'Il Colonnello,' given in Rome, and 'M. de Chalumeaux,' in Venice, in 1835; in 1836 'Il Disertore per amore' for the San Carlo in Naples, and 'L'Amante di richiamo' given in Turin in 1846. Of these four operas, 'Il Colonnello' alone had a well-deserved reception. But Ricci's masterpiece, the opera which has placed him in a very high rank among Italian composers, is 'Crispino e la Comare,' written in 1850 for Venice, and to which his brother Federico partly contributed. This opera, one of the best comic operas of Italy, is always and everywhere applauded, being a happy mixture of fairy tales, laughter, grace, and comicality.

Shortly after the production of 'Il Diavolo a quattro' in 1859, however, symptoms of insanity showed themselves, and the malady soon became violent. He was taken to an asylum at Prague, his wife's birthplace, and died there Dec. 31, 1859. He was much mourned at Trieste; a funeral ceremony was followed by a performance of selections from his principal works, his bust was placed in the lobby of the Opera-house, and a pension was granted to his widow. He published two volumes of vocal pieces entitled 'Mes Loisirs' and 'Les inspirations du Thé' (Ricordi), and he left in MS. a large number of compositions for the cathedral service. His brother,

FEDERICO, was born in Naples, Oct. 22, 1809, entered the Royal Conservatorio of that town, where his brother was then studying, and had the good-fortune to receive his musical education from Bellini and Zingarelli. In 1829 he went to live with his brother until the marriage of the latter in 1844. In 1837 he gave 'La Prigione d'Edimburgo' in Trieste. The barcarola of this opera, 'Sulla poppa del mio brick,' is one of the most popular melodies of Italy. In 1839 his 'Duello sotto Richelieu' was only moderately successful at La Scala, but in 1841 'Michelangelo e Rolla' was applauded in Florence. In it sang Signora Strepponi, who afterwards married Verdi. 'Corrado d'Altamura,' a lyric drama of some merit, was given at La Scala before delighted audiences. At the personal request of Charles Albert he composed in 1842 a cantata for the marriage of Victor Emmanuel, and another for a court festival. In 1843 his 'Vallombra' failed at La Scala. 'Isabella de' Medici' (1844) in Trieste, 'Estella' (1846) in Milan, 'Griselda' (1847) and 'I due ritratti' (1850) in Venice, were all failures. 'Il Marito e l'Amante' was greatly applauded in Vienna in 1852, but his last opera, 'Il paniere d'amore,' given there the following year, did not succeed. He was then named Musical Director of the Imperial Theatres of St. Petersburg, which post he occupied for many years. Of the operas written in collaboration with his brother we have already spoken.

He however did not give up composing, but brought out at the Fantaisies-Parisiennes, Paris, 'Une Folie à Rome' Jan. 30, 1869, with great success. Encouraged by this he produced an opéra-comique in 3 acts, 'Le Docteur rose' (Bouffes Parisiens, Feb. 10, 1872) and 'Une Fête à Venise,' a reproduction of his earlier work, 'Il Marito e l'Amante' (Athenée, Feb. 15, 1872), but both were entire failures. Shortly after this Federico left Paris and retired to Conegliano in Italy, where he died Dec. 10, 1877. He was concerned partially or entirely in 19 operas. Of his cantatas we have spoken. He also left 2 masses, 6 albums or collections of vocal pieces (Ricordi), and many detached songs. [L.R.]

RICERCARE or RICERCATA (from *ricercare*, 'to search out'), an Italian term of the 17th century, signifying a fugue of the closest and most learned description. Frescobaldi's Ricercari (1615), which are copied out in one of Dr. Burney's note-books (Brit. Mus. Add. MS. 11,588), are full of augmentations, diminutions, inversions, and other contrivances, in fact *recherchés* or full of *research*. J. S. Bach has affixed the name to the 6-part Fugue in his 'Musikalisches Opfer,' and the title of the whole contains the word in its initials—Regis Iussu Cantio Et Reliqua Canonica Arte Resoluta. But the term was also employed for a fantasia on some popular song, street-cry, or such similar theme. Mr. Cummings has a MS. book, dated 1580–1600, containing 22 ricercari by Cl. da Coreggio, Gianetto Palestina, A. Vuillaert, O. Lasso, Clemens non Papa, Cip. Rore, and others—fugues in 4 and 5 parts, on 'Ce moy de May,' 'Vestiva i colli,' 'La Rossignol,' 'Susan un jour,' and other apparently popular songs. This use of the word appears

to have been earlier than the other, as pieces of the kind by Adriano (1520–67) are quoted. [G.]

RICH, JOHN, son of Christopher Rich, patentee of Drury Lane Theatre, was born in 1692. His father, having been compelled to quit Drury Lane, had erected a new theatre in Lincoln's Inn Fields, but died in 1714 when it was upon the eve of being opened. John Rich then assumed the management and opened the house about six weeks after his father's death. Finding himself unable to contend against the superior company engaged at Drury Lane, he had recourse to the introduction of a new species of entertainment—pantomime—in which music, scenery, machinery[1], and appropriate costumes formed the prominent features. In these pieces he himself, under the assumed name of Lun, performed the part of Harlequin with such ability as to extort the admiration of even the most determined opponents of that class of entertainment. [See LINCOLN'S INN FIELDS THEATRE, ii. 140; PANTOMIME, ii. 645 *b*.] Encouraged by success he at length decided upon the erection of a larger theatre, the stage of which should afford greater facilities for scenic and mechanical display, and accordingly built the first Covent Garden Theatre, which he opened Dec. 7, 1732. Hogarth produced a caricature on the occasion of the removal to the new house, entitled 'Rich's Glory, or his Triumphal Entry into Covent Garden,' a copy of which will be found in Wilkinson's 'Londina Illustrata.' He conducted the new theatre with great success until his death, relying much upon the attraction of his pantomimes and musical pieces, but by no means neglecting the regular drama. In his early days he had attempted acting, but failed. He died Nov. 26, 1761, and was buried Dec. 4 in Hillingdon churchyard, Middlesex. [W.H.H.]

RICHARD CŒUR DE LION. An opéra-comique in 3 acts; words by Sedaine, music by Grétry. Produced at the Opéra Comique Oct. 21, 1784. The piece has a certain historical value. One of the airs, 'Une fièvre brûlante,' was for long a favourite subject for variations. Beethoven wrote a set of 8 upon it (in C major), published in Nov. 1798, having probably heard the air at a concert of Weigl's in the preceding March. Another set of 7 (also in C) were for long attributed to Mozart, but are now decided not to be by him. The air 'O Richard, o mon roi, l'univers t'abbandonne' was played on a memorable occasion in the early stage of the French Revolution—at the banquet at Versailles on Oct. 1, 1789. [G.]

RICHARDS, BRINLEY, son of Henry Richards, organist of St. Peter's, Carmarthen, was born in 1819, and intended for the medical profession, but preferred the study of music, and became a pupil of the Royal Academy of Music, where he obtained the King's scholarship in 1835, and again in 1837. He soon gained a high position in London as a pianist. As a composer he has been very successful, his song 'God bless the Prince of Wales' having reached a high pitch of popularity, even out of England, and his sacred songs, part songs, and pianoforte pieces having been most favourably received. He composed additional songs for the English version of Auber's 'Crown Diamonds,' when produced at Drury Lane in 1846. He has especially devoted himself to the study of Welsh music (upon which he has lectured), and many of his compositions have been inspired by his enthusiastic love for his native land. He exerted himself greatly in promoting the interests of the South Wales Choral Union on its visits to London in 1872 and 1873, when they successfully competed at the National Music Meetings at the Crystal Palace. As a teacher Mr. Richards is deservedly esteemed and has a very large *clientèle* in London. [W.H.H.]

RICHARDSON, JOSEPH. An eminent flute-player, born in 1814, and died March 22, 1862. He was engaged in most of the London orchestras, was solo player at Jullien's concerts for many years, and afterwards became principal flute in the Queen's private band. His neatness and rapidity of execution were extraordinary, and were the great features of his playing. He composed numerous fantasias for his instrument, usually of an extremely brilliant and difficult character. Some of his variations are still popular among flute-players, such as 'There's nae luck about the house'—to which no one but Richardson himself has ever done justice, Auber's 'Les Montagnards,' the Russian National Hymn, etc. [G.]

RICHARDSON, VAUGHAN, was in 1685 a chorister of the Chapel Royal, under Dr. Blow. He was possibly a nephew of Thomas Richardson (alto singer, gentleman of the Chapel Royal from 1664 to his death, July 23, 1712, and lay vicar of Westminster Abbey), and a brother of Thomas Richardson, who was his fellow chorister. About 1695 he was appointed organist of Winchester Cathedral. In 1701 he published 'A collection of Songs for one, two and three voices,' accompany'd with instruments.' He was author of some church music: a fine anthem, 'O Lord God of my salvation,' and an Evening Service in C (composed in 1713), are in the Tudway Collection (Harl. MSS. 7341 and 7342), and another anthem, 'O how amiable,' also in Tudway, and printed in Page's 'Harmonia Sacra'; others are in the books of different cathedrals. He was also composer of 'An Entertainment of new Musick, composed on the Peace' [of Ryswick], 1697; 'A Song in praise of St. Cecilia,' written for a celebration at Winchester about 1700, and a 'set of vocal and instrumental music,' written for a like occasion in 1703. He died in 1729, and not, as commonly stated, in 1715. [W.H.H.]

RICHAULT, CHARLES SIMON, head of a family of celebrated French music-publishers, born at Chartres, May 10, 1780, came early to Paris, and served his apprenticeship in the music-trade with J. J. Momigny. From him he acquired a taste for the literature of music and chamber compositions; and when he set up for himself at No. 7, Rue Grange Batelière in 1805,

[1] Most of Rich's machinery was invented by John Hoole, the translator of Tasso's 'Gerusalemme Liberata' and other works, and his father, Samuel Hoole, an eminent watchmaker.

the first works he published were classical. He soon perceived that there was an opening in Paris for editions of the best works of German musicians, and the early efforts of French composers of promise. His calculation proved correct, and his judgment was so sound that his business increased rapidly, and he was soon obliged to move into larger premises in the Boulevard Poissonnière, first at No. 16, and then at No. 26. Here he published Mozart's Concertos in 8vo score, and other works of the classical composers of Germany, and acquired the bulk of the stock of the firms of Frey, Naderman, Sieber, Pleyel, Petit, Erard, and Delahante. He moved in 1862 to No. 4 in the Boulevard des Italiens, at the precise spot where the Boulevard Haussmann would have come in if it had been finished. In this house he died, Feb. 20, 1866, well-known as a publisher of judgment and ability, a man of keen intellect, and a pleasant social companion. His son,

GUILLAUME SIMON, born in Paris Nov. 2, 1806, had long been his father's partner, and continued in the old line of serious music. At the same time he realised that in so important a business it was well that the Italian school should be represented, and accordingly bought the stock of the publisher Pacini. On the death of this good man, Feb. 7, 1877, his son,

LEON, born in Paris Aug. 6, 1839, resolved to give a fresh impetus to the firm, which already possessed 18,000 publications. Bearing in mind that his grandfather had been the first to publish Beethoven's Symphonies and Mozart's Concertos in score; to make known in France the oratorios of Bach and Handel, and the works of Schubert, Mendelssohn, and Schumann; to bring out the first operas of Ambroise Thomas and Victor Massé; to encourage Berlioz when his 'Damnation de Faust' was received with contempt, and to welcome the orchestral compositions of Reber and Gouvy; M. Léon Richault above all determined to maintain the editions of the German classical masters which had made the fortune of the firm. Retaining all the works—didactic, dramatic, sacred, vocal, and instrumental—which still do honour to his establishment, he has carefully eliminated all obsolete and forgotten music. He has moreover already begun to issue new editions of all compositions of value of which the plates are worn out. His intelligent administration of his old and honourable business procured him a silver medal at the International Exhibition of 1878, the highest recompense open to music-publishers, the jury having refused them the gold medal.

A new catalogue of Richault's publications is in preparation, the old ones having long become obsolete. It will form a large volume, and will not in all probability be ready till 1882. [G. C.]

RICHTER, ERNST FRIEDRICH EDUARD, son of a schoolmaster, born Oct. 24, 1808, at Grosschönau in Lusatia; from his eleventh year attended the Gymnasium at Zittau, managed the choir, and arranged independent performances. In 1831 he went to Leipzig to study with Weinlig, the then Cantor, and made such progress that soon after the foundation of the Conservatorium, in 1843, he became one of the professors of harmony and counterpoint. Up to 1847 he conducted the Sing. akademie; he was afterwards organist of the Nicolai and Peters Neukirchen. After Hauptmann's death, Jan. 3, 1868, he succeeded him as Cantor of the St. Thomas school. Of his books, the 'Lehrbuch der Harmonielehre' (12th ed. 1876) has been translated into Dutch, Swedish, Italian, Russian, Polish, and English. The 'Lehre von der Fuge' has passed through three editions, and 'Vom Contrapunct' through two. The English translations of all these are by Franklin Taylor, and were published by Cramer & Co. in 1864, 1878, and 1874 respectively. Richter also published a 'Catechism of Organ-building.' Of his many compositions *de circonstance* the best known is the Cantata for the Schiller Festival in 1859. Other works are—an oratorio, 'Christus der Erlöser' (March 8, 1849), masses, psalms, motets, organ-pieces, string-quartets, and sonatas for PF. He became one of the King's Professors in 1868, died at Leipzig, April 9, 1879, and was succeeded as Cantor by W. RUST. [F.G.]

RICHTER, HANS, celebrated conductor, born April 4, 1843, at Raab in Hungary, where his father was Capellmeister of the cathedral. His mother was also musical, and is still a teacher of singing at Pesth. The father died in 1853, and Hans was then placed at the Löwenburg Convict-School in Vienna. Thence he went into the choir of the Court chapel, and remained there for four years. In 1859 he entered the Conservatorium, and studied the horn under Kleinecke, and theory under Sechter. After a lengthened engagement as horn-player in the orchestra of the Kärnthnerthor opera he was recommended by Esser to Wagner, went to him at Lucerne, remained there from Oct. 1866 to Dec. 1867, and made the first fair copy of the score of the 'Meistersinger.' In 1868 he accepted the post of conductor at the Hof- und National Theatre, Munich, and remained there for some length of time. He next visited Paris, and after a short residence there, proceeded to Brussels for the production of 'Lohengrin' (March 22, 1870). He then returned to Wagner at Lucerne, assisted at the first performance of the 'Siegfried Idyll' (Dec. 1870), and made the fair copy of the score of the 'Niebelungen Ring' for the engraver. Early in 1871 he went to Pesth as chief conductor of the National Theatre, a post to which he owes much of his great practical knowledge of the stage and stage business. In Jan. 1875 he conducted a grand orchestral concert in Vienna, which had the effect of attracting much public attention to him, and accordingly, after the retirement of Herbeck (April 1875) from the direction of the Court Opera Theatre—where he was succeeded by Jauner—and of Dessoff from the same theatre, Richter was invited to take the post vacated by the latter, which he entered upon in the autumn of 1875, concurrently with the conductorship of the Philharmonic Concerts. He had already been conducting the rehearsals of the 'Niebelungen

[F.G.]

Ring' at Bayreuth, and in 1876 he directed the whole of the rehearsals and performances of the Festival there, and, at the close of the third set of performances, received the order of Maximilian from the King of Bavaria, and that of the Falcon from the Grand Duke of Weimar. In 1877 he produced the Walkyrie in Vienna, and followed it in 1878 by the other portions of the tetralogie. In 1878 he was made capellmeister, and received the order of Franz Josef. In 1879 (May 5–12), 80 (May 10–June 14), and 81 (May 9–June 23) he conducted important orchestral concerts in London, which excited much attention, chiefly for his knowledge of the scores of Beethoven's symphonies and other large works, which he conducted without book.

Herr Richter is certainly one of the very first of living conductors. He owes this position in great measure to the fact of his intimate practical acquaintance with the *technik* of the instruments in the orchestra, especially the wind, to a degree in which he stands alone. As a musician he is a self-made man, and enjoys the peculiar advantages which spring from that fact. His devotion to his orchestra is great, and the present high standard and position of the band of the Vienna opera house is due to him. He is a great master of *crescendo* and *decrescendo*. Perhaps he leans too much to the encouragement of 'virtuosity' in his orchestra. But as a whole, what he directs will always be finely played.

In correction of a previous statement we may say that his mother, Mme. Richter von Innffeld, formerly a distinguished soprano singer, now lives in Vienna as a teacher of singing. Her method of producing the voice—affecting especially the soft palate and other parts of the back of the mouth—has been very successful, and attracted the notice of Prof. Helmholtz, who in 1872 investigated it, and wrote her a letter of strong approval. [F.G.]

RICORDI, GIOVANNI, founder of the well-known music-publishing house in Milan, where he was born in 1785, and died March 15, 1853. He made his first hit with the score of Mosca's 'Pretendenti delusi.' Since that time Ricordi has published for all the great Italian *maestri*, down to Verdi and Boïto, and has far outstripped all rivals. His 'Gazetta musicale,' edited with great success by Mazzucati, has had much influence on his prosperity. The firm possesses the whole of the original scores of the operas they have published—a most interesting collection. Giovanni's son and successor TITO further enlarged the business, and at this moment the stock consists of over 40,000,000 pages, or nearly 50,000 items, of music. The catalogue issued in 1875 contains 738 pages large 8vo. For some years past Tito has been disabled by illness, and the present head of the firm is his son GIULIO DI TITO, born in 1835, who is a practised writer, a skilled draughtsman, a composer of drawing-room music, and in all respects a thoroughly cultivated man.

This notice must not end without a mention of Paloschi's 'Annuario musicale,' a useful and accurate calendar of musical dates, published by this excellent firm, the second edition of which was issued in 1878. [F.G.]

RIDOTTO, an Italian term for an assembly with music, and usually with masks.

> They went to the Ridotto—'tis a hall
> Where people dance and sup and dance again;
> The proper name, perhaps, were a mask'd ball,
> But that 's of no importance to my strain,

says Byron in 'Beppo,' writing from Venice in 1817. They were known in Italy much earlier than that, and had spread to both Germany and England. They are frequently mentioned by Horace Walpole under the name 'Ridotto,' and were one of the attractions at Vauxhall and Ranelagh in the middle of the last century. In Germany and France a French version of the name was adopted—REDOUTE. [See p. 89]. [G.]

RIEDEL, CARL, born Oct. 6, 1827, at Kronenberg in the Rhine provinces. Though always musically inclined he was educated for trade, and up to 1848 pursued the business of a silk dyer. Being in Lyons during the Revolution of that year the disturbance to his business and the excitement of the moment drove him to the resolution of forsaking trade and devoting himself to music as a profession. He returned home and at once began serious study under the direction of CARL WILHELM, then an obscure musician at Crefeld, but destined to be widely known as the author of the 'Wacht am Rhein.' Late in 1849 Riedel entered the Leipzig Conservatorium, where he made great progress under Moscheles, Hauptmann, Becker, and Plaidy. After leaving the Conservatorium the direction of his talent was for some time uncertain. He had however for long had a strong predilection for the vocal works of the older masters of Germany and Italy. Early in 1854 he practised and performed in a private society at Leipzig Astorga's 'Stabat,' Palestrina's 'Improperia,' and Leo's 'Miserere,' and this led him to found a singing society of his own, which began on May 17, 1854, with a simple quartet of male voices, and was the foundation of the famous Association which, under the name of the 'Riedelsche Verein,' was so celebrated in Leipzig. Their first public concert was held in November, 1855. The reality of the attempt was soon recognised; members flocked to the society; and its first great achievement was a performance of Bach's B minor Mass, April 10, 1859. At that time Riedel appears to have practised only ancient music, but this rule was by no means maintained; and in the list of the works performed by the Verein we find Beethoven's Mass in D, Kiel's 'Christus,' Berlioz's Requiem, and Liszt's 'Graner Mass' and 'St. Elizabeth.' Riedel's devotion to his choir was extraordinary: he was not only its Conductor, but Librarian, Secretary, Treasurer, all in one. His interest in societies outside his own, and in the welfare of music, was always ready and always effective, and many of the best Vocal Associations of North Germany owe their success to his advice and help. The programmes of the public performances of his society show the names of many

composers who were indebted to him for their first chance of being heard, and of much music which but for him would probably have slumbered on the shelf till now. He was one of the founders of the 'Beethovenstiftung,' and an earnest supporter of the Wagner performances at Bayreuth in 1876. His own compositions are chiefly part-songs for men's voices, but he has edited several important ancient works by Prætorius, Franck, Eccard, and other old German writers, especially a 'Passion' by Heinrich Schütz, for which he selected the best portions of 4 Passions by that master—a proceeding certainly deserving all that can be said against it. [G.]

RIEM, Wilhelm Friedrich, born at Cölleda in Thuringia, Feb. 17, 1779, was one of J. A. Hiller's pupils in the St. Thomas school at Leipzig. In 1807 he was made organist of the Reformed church there, and in 1814 of the St. Thomas school itself. In 1822 he was called to Bremen to take the cathedral organ and be Director of the Singakademie, where he remained till his death, April 20, 1837. He was an industrious writer. His cantata for the anniversary of the Augsburg Confession 1830 (for which Mendelssohn's Reformation Symphony was intended) is dead; so are his quintets, quartets, trios, and other large works, but some of his 8 sonatas and 12 sonatinas are still used for teaching purposes. He left 2 books of studies for the PF., which are out of print, and 16 progressive exercises. [G.]

RIENZI DER LETZTE DER TRIBUNEN (the last of the Tribunes). An opera in 5 acts; words (founded on Bulwer's novel) and music by Wagner. He adopted the idea in Dresden in 1837; two acts were finished early in 1839, and the opera was produced at Dresden Oct. 20, 1842. 'Rienzi' was brought out in French (Meitter and Guillaume) at the Théâtre Lyrique, April 6, 1869, and in English at Her Majesty's Theatre, London (Carl Rosa), Jan. 27, 1879. [G.]

RIES. A distinguished family of musicians.

1. Johann Ries, native of Benzheim on the Rhine, born 1723, was appointed Court trumpeter to the Elector of Cologne at Bonn, May 2, 1747, and violinist in the Capelle, Mar. 5, 1754. On April 27, 1764, his daughter Anna Maria was appointed singer. In 1774 she married Ferdinand Drewer, violinist in the band, and remained first soprano till the break-up in 1794. Her father died 1786 or 7. Her brother, Franz Anton, was born at Bonn, Nov. 10, 1755, and died there Nov. 1, 1846. He was an infant phenomenon on the violin; learned from J. P. Salomon, and was able to take his father's place in the orchestra at the age of 11. His salary began when he was 19, and in 1779 it was 160 thalers per annum. At that date he visited Vienna, and made a great success as a solo and quartet player. But he elected to remain, on poor pay, in Bonn, and was rewarded by having Beethoven as his pupil and friend. During the poverty of the Beethoven family, and through the misery caused by the death of Ludwig's mother in 1787, Franz Ries stood by them like a real friend. In 1794 the French arrived, and the Elector's establishment was broken up. Some of the members of the band dispersed, but Ries remained, and documents are [1] preserved which show that after the passing away of the invasion he was to have been Court-musician. Events however were otherwise ordered; he remained in Bonn, and at Godesberg, where he had a little house, till his death; held various small offices, culminating in the Bonn city government in 1800, taught the violin, and brought up his children well. He assisted Wegeler in his Notices of Beethoven, was present at the unveiling of Beethoven's statue in 1845, had a Doctor's degree and the order of the Red Eagle conferred on him, and died, as we have said, Nov. 1, 1846, aged 91 all but 9 days.

2. Franz's son Ferdinand, who with the Archduke Rudolph enjoys the distinction of being Beethoven's pupil, was born at Bonn Nov. 28, 1784. He was brought up from his cradle to music. His father taught him the pianoforte and violin, and B. Romberg the cello. In his childhood he lost an eye through the small-pox. After the break-up of the Elector's band he remained three years at home, working very hard at theoretical and practical music, scoring the quartets of Haydn and Mozart, and arranging the Creation, the Seasons, and the Requiem with such ability that they were all three published by Simrock.

In 1801 he went to Munich to study under Winter, in a larger field than he could command at home. Here he was so badly off as to be driven to copy music at 3*d.* a sheet. But poor as his income was he lived within it, and when after a few months Winter left Munich for Paris, Ries had saved 7 ducats. With this he went to Vienna in October 1801, taking a letter from his father to Beethoven. Beethoven received him well, and when he had read the letter said, 'I can't answer it now; but write and tell him that I have not forgotten the time when my mother died'; and knowing how miserably poor the lad was, he on several occasions gave him money unasked, for which he would accept no return. The next three years Ries spent in Vienna. Beethoven took a great deal of pains with his pianoforte-playing, but would teach him nothing else. He however prevailed on Albrechtsberger to take him as a pupil in composition. The lessons cost a ducat each; Ries had in some way saved up 28 ducats, and therefore had 28 lessons. Beethoven also got him an appointment as pianist to Count Browne the Russian chargé d'affaires, and at another time to Count Lichnowsky. The pay for these services was probably not over-abundant, but it kept him, and the position gave him access to the best musical society. Into Ries's relations with Beethoven we need not enter here. They are touched upon in the sketch of the great master in vol. i. of this work, and they are fully laid open in Ries's own

[1] See the curious and important lists and memorandums, published for the first time in Thayer's 'Beethoven,' i. 248.

invaluable notices. He had a great deal to bear, and considering the secrecy and imperiousness which Beethoven often threw into his intercourse with every one, there was probably much unpleasantness in the relationship. Meantime of course Ries must have become saturated with the music of his great master; a thing which could hardly tend to foster any little originality he may ever have possessed.

As a citizen of Bonn he was amenable to the French conscription, and in 1805 was summoned to appear there in person. He left in Sept. 1805, made the journey on foot *via* Prague, Dresden, and Leipzig, reached Coblentz within the prescribed limit of time, and was then dismissed on account of the loss of his eye. He then went on to Paris, and existed in misery for apparently at least two years, at the end of which time he was advised to try Russia. On Aug. 27, 1808, he was again in Vienna, and soon afterwards received from Reichardt an offer of the post of Kapellmeister to Jerome Bonaparte, King of Westphalia, at Cassel, which Reichardt alleged had been refused by Beethoven. Ries behaved with perfect loyalty and straightforwardness in the matter. Before replying, he endeavoured to find out from Beethoven himself the real state of the case; but Beethoven having adopted the idea that Ries was trying to get the post over his head, would not see him, and for three weeks behaved to him with an incredible degree of cruelty and insolence. When he could be made to listen to the facts he was sorry enough, but the opportunity was gone.

The occupation of Vienna (May 12, 1809) by the French was not favourable to artistic life. Ries however, as a French subject, was free to wander. He accordingly went to Cassel, possibly with some lingering hopes, played at Court, and remained till the end of February 1810, very much applauded and fêted, and making money—but had no offer of a post. From Cassel he went by Hamburg and Copenhagen to Stockholm, where we find him in Sept. 1810, making both money and reputation. He had still his eye on Russia, but between Stockholm and Petersburg the ship was taken by an English man-of-war, and all the passengers were turned out upon an island in the Baltic. In Petersburg he found Bernhard Romberg, and the two made a successful *tournée*, embracing places as wide apart as Kieff, Reval and Riga. The burning of Moscow (Sept. 1812) put a stop to his progress in that direction, and we next find him again at Stockholm in April 1813, *en route* to England. By the end of the month he was in London.

Here he found his countryman and his father's friend, Salomon, who received him cordially and introduced him to the Philharmonic Concerts. His first appearance there was March 14, 1814, in his own PF. Sestet. His symphonies, overtures, and chamber works frequently occur in the programmes, and he himself appears from time to time as a PF. player, but rarely if ever with works of Beethoven's. 'Mr. Ries,' says a writer in the 'Harmonicon' of March 1824, 'is justly celebrated as one of the finest pianoforte performers of the day; his hand is powerful and his execution certain, often surprising; but his playing is most distinguished from that of all others by its romantic wildness.' Shortly after his arrival he married an English lady of great attractions, and he remained in London till 1824, one of the most conspicuous figures of the musical world.

His sojourn here was a time of herculean labour. His compositions numbered at their close nearly 180, including 6 fine symphonies; 4 overtures; 6 string quintets, and 14 do. quartets; 9 concertos for PF. and orchestra; an octet, a septet, 2 sextuors, and a quintet, for various instruments; 3 PF. quartets, and 5 do. trios; 20 duets for PF. and violin; 10 sonatas for PF. solo; besides a vast number of rondos, variations, fantasias, etc., for the PF. solo and à 4 mains. Of these 38 are attributable to the time of his residence here, and they embrace 2 symphonies, 4 concertos, a sonata, and many smaller pieces. As a pianist and teacher he was very much in request. He was an active member of the Philharmonic Society. His correspondence with Beethoven during the whole period is highly creditable to him, proving his gratitude towards his master, and the energy with which he laboured to promote Beethoven's interests. That Beethoven profited so little therefrom was no fault of Ries's.

Having accumulated a fortune adequate to the demands of a life of comfort, he gave a farewell concert in London, April 8, 1824, and removed with his wife to Godesberg, near his native town, where he had purchased a property. Though a loser by the failure of a London Bank in 1825–6, he was able to live independently. About 1830 he removed to Frankfort. His residence on the Rhine brought him into close contact with the Lower Rhine Festivals, and he directed the performances of the years 1825, 29, 30, 32, 34, and 37, as well as those of 1826 and 28 in conjunction with Spohr and Klein respectively. [See the list, vol. ii. p. 457.] In 1834 he was appointed head of the town orchestra and Singakademie at Aix-la-Chapelle. But he was too independent to keep any post, and in 1836 he gave this up and returned to Frankfort. In 1837 he assumed the direction of the Cecilian Society there on the death of Schelble, but this lasted a few months only, for on Jan. 13, 1838, he died after a short illness.

The principal works which he composed after his return to Germany are 'Die Räuberbraut' (the Robber's bride), which was first performed in Frankfort probably in 1829, then in Leipzig, July 4, and London, July 15, of the same year, and often afterwards in Germany; another opera, known in Germany as 'Liska,' but produced at the Adelphi, London, in English, as 'The Sorcerer,' by Arnold's Company, Aug. 4, 1831; an oratorio, 'Der Sieg des Glaubens' (the Triumph of the Faith), Berlin, 1835; and a second oratorio, 'Die Könige Israels' (the Kings of Israel), Aix-la-Chapelle, 1837. All these works however are dead. Beethoven once said of his compositions, 'he imitates me too much.'

He caught the style and the phrases, but he could not catch the immortality of his master's work. Technically great as much that he composed was, that indescribable something, that touch of nature, which, in music as elsewhere, makes the whole world kin, was wanting. One work of his, however, will live—the admirable 'Biographical Notices of Ludwig van Beethoven,' which he published in conjunction with Dr. Wegeler (Coblentz, 1838). The two writers, though publishing together, have fortunately kept their contributions quite distinct; Ries's occupies from pp. 76 to 163 of a little duodecimo volume, and of these the last 35 pages are occupied by Beethoven's letters. His own portion, short as it is, is excellent, and it is hardly too much to say that within his small limits he is equal to Boswell. The work is translated into French by Le Gentil (Dentu, 1862), and partially into English by Moscheles, as an Appendix to his version of Schindler's Life of Beethoven. [A.W.T.]

3. HUBERT, brother of the preceding, was born at Bonn in 1802. He made his first studies as a violinist under his father, and afterwards under Spohr. Hauptmann was his teacher in composition. Since 1824 he has lived at Berlin. In that year he entered the band of the Königstädter Theatre, and in the following year became a member of the Royal band. In 1835 he was appointed Director of the Philharmonic Society at Berlin. In 1836 he was nominated Concertmeister, and in 1839 elected a member of the Royal Academy of Arts. A thorough musician and a solid violinist, he has ever since been held in great esteem as a leader, and more especially as a methodical and conscientious teacher. His Violin-School for beginners is a very meritorious work, eminently practical, and widely used. He has published two violin-concertos, studies and duets for violins, and some quartets. An English edition of the Violin-School appeared in 1873 (Hofmeister). Three of his sons have gained reputation as musicians :—

LOUIS, violinist, born at Berlin in 1830, pupil of his father and of Vieuxtemps, has, since 1852, been settled in London, where he enjoys great and deserved reputation as violinist and teacher. He was a member of the Quartet of the Musical Union from 1855 to 1870, and has held the second violin at the Monday Popular Concerts from their beginning in 1859, to the present time. He played a solo at the Crystal Palace Oct. 29, 1864.

ADOLPH, pianist, born at Berlin in 1837. He is a pupil of Kullak for the piano, and of Boehmer for composition, and lives in London as a pianoforte teacher. He has published a number of compositions for the piano, and some songs.

FRANZ, violinist and composer, was born at Berlin in 1846. He studied first under his father (violin), and under Boehmer and Kiel (composition). He afterwards entered the Conservatoire at Paris as a pupil of Massart, and gained the first prize for violin-playing in 1868. Some of his compositions, especially two suites for violin, have met with considerable success. He visited London in 1870 and played at the Crystal Palace. He has published an overture, two quartets, a quintet, and a large number of songs. Compelled by ill-health to give up violin-playing entirely, he established a music-publishing business at Dresden in 1874. [P.D.]

RIETER-BIEDERMANN. An eminent German firm of music-publishers. The founder was Jacob Melchior Rieter-Biedermann (born May 14, 1811; died Jan. 25, 1876), who in June 1849 opened a retail business and lending-library at Winterthur. The first work published by the house was Kirchner's 'Albumblätter,' op. 7, on April 29, 1856; since then the business has continually improved and increased. On March 1, 1862, a publishing branch was opened at Leipzig. The stock catalogue of the firm includes music by Berlioz, Brahms (PF. Concerto, PF. Quintet, Requiem, Magelone, Romanzen, May-songs etc.); A. Dietrich; J. O. Grimm; Gernsheim; Herzogenberg; F. Hiller; Holstein; Kirchner; Lachner; F. Marschner; Mendelssohn (*op.* 98, nos. 2, 3; *op.* 103, 105, 106, 108, 115, 116); Raff; Reinecke; Schumann (op. 130, 137, 138, 140, 142); Schultz-Beuthen, etc.—in all more than 1200 works. [G.]

RIETZ (originally RITZ [1]) EDUARD, the elder brother of Julius Rietz, an excellent violinist, was born at Berlin in 1801. He studied first under his father, a member of the royal band, and afterwards for some time under RODE. He died too young to acquire a more than local reputation, but his name will always be remembered in connection with Mendelssohn, who had the highest possible opinion of his powers as an executant,[2] and who counted him amongst his dearest and nearest friends. It was for Ritz that he wrote the Octet, which is dedicated to him, as well as the Sonata for PF. and Violin, op. 4. For some years Rietz was a member of the royal band, but as his health failed him in 1824 he had to quit his appointment and even to give up playing. He founded and conducted an orchestral society at Berlin, with considerable success—but continued to sink, and died of consumption Jan. 23, 1832. Mendelssohn's earlier letters teem with affectionate references to him, and the news of his death, which he received at Paris on his birthday, affected him deeply.[3] The Andante in Mendelssohn's String Quintet, op. 18, was composed at Paris 'in memory of E. Ritz,' and is dated on the autograph 'Jan. 23, 1832,' and entitled 'Nachruf.' [P.D.]

RIETZ, JULIUS, younger brother of the preceding, violoncellist, composer, and eminent conductor, was born at Berlin Dec. 28, 1812. Brought up under the influence of his father and brother, and the intimate friend of Mendelssohn, he received his first instruction on the violoncello from Schmidt, a member of the royal band, and afterwards from Bernhard Romberg and Moritz

[1] Uniformly so spelt by Mendelssohn.

[2] 'I long earnestly,' says he, in a letter from Rome, 'for his violin and his depth of feeling; they come vividly before my mind when I see his beloved neat handwriting.'

[3] Mendelssohn's Letters from Italy and Switzerland, English Translation, p. 327.

Ganz. Zelter was his teacher in composition. Having gained considerable proficiency on his instrument, he obtained, at the age of 16, an appointment in the band of the Königstädter Theatre, where he also achieved his first success as a composer by writing incidental music for Holtei's drama, 'Lorbeerbaum und Bettelstab.' In 1834 he went to Düsseldorf as second conductor of the opera. Mendelssohn, who up to his death showed a warm interest in Rietz, was at that time at the head of the opera, and on his resignation in the summer of 1835, Rietz became his successor. He did not however remain long in that position, for, as early as 1836, he accepted, under the title of 'Städtischer Musikdirector,' the post of conductor of the public subscription-concerts, the principal choral society, and the church-music at Düsseldorf. In this position he remained for twelve years, gaining the reputation of an excellent conductor, and also appearing as a solo violoncellist in most of the principal towns of the Rhine-province. During this period he wrote some of his most successful works—incidental music to dramas of Goethe, Calderon, Immermann and others; music for Goethe's Liederspiel 'Jery and Bätely'—a kind of drawing-room opera, and a very graceful work; his 1st Symphony in G minor; three overtures—'Hero and Leander,'[1] Concert overture in A major, Lustspiel-overture—the latter two perhaps the freshest and most popular of his compositions; the 'Altdeutscher Schlachtgesang' and 'Dithyrambe'—both for men's voices and orchestra, and still stock-pieces in the répertoires of all German male choral societies. He was six times chief conductor of the Lower Rhine Festivals—in 1845, 56, and 69 at Düsseldorf; in 1864, 67 and 73 at Aix. [See vol. ii. p. 547.]

In 1847, after Mendelssohn's death, he took leave of Düsseldorf, leaving Ferdinand Hiller as his successor, and went to Leipzig as conductor of the opera and the Singakademie. From 1848 we find him also at the head of the Gewandhaus orchestra, and teacher of composition at the Conservatorium. In this position he remained for thirteen years. Two operas, 'Der Corsar' and 'Georg Neumark,' were failures, but his Symphony in E♭ had a great and lasting success. At this period he began also to show his eminent critical powers by carefully revised editions of the scores of Mozart's symphonies and operas, of Beethoven's symphonies and overtures for Breitkopf & Härtel's complete edition, and by the work he did for the Bach and German Handel Societies. His editions of Handel's scores contrast very favourably with those of some other editors. An edition of Mendelssohn's complete works closed his labours in this respect.

In 1860 the King of Saxony appointed him Conductor of the Royal Opera and of the music at the Roman Catholic Court-church at Dresden. He also accepted the post of Artistic Director of the Dresden Conservatorium. In 1876 the title of General-Musikdirector was given to him. The University of Leipzig had already in 1859 conferred on him the honorary degree of Doctor of Philosophy.

Rietz was for some time one of the most influential musicians of Germany. He was a good violoncellist, but soon after leaving Düsseldorf he gave up playing entirely. As a composer he showed a rare command of all the resources of the orchestra and a complete mastery of all technicalities of composition. Mendelssohn, in his friendly but candid criticism in the published letter already referred to, says, 'There is something so genuinely artistic and so genuinely musical in your orchestral works'; and further on, 'You understand how to give a really musical interest to every second oboe or trumpet.' Indeed some of his music, especially the two overtures already mentioned, the Symphony in E♭, and some of his choral works, has won general and deserved success, mainly by the qualities Mendelssohn praises in them, and by a certain vigour and straightforwardness of style. Yet we gather clearly enough from Mendelssohn's friendly remarks the reason why so few of Rietz's works have shown any vitality. As a composer he can hardly be said to show distinct individuality; his ideas are wanting in spontaneity, his themes are generally somewhat dry, and their treatment often rather diffuse and laboured. In fact Rietz was an excellent musician, and a musical intellect of the first rank—but not much of a poet. His great reputation rested, first, on his talent for conducting, and secondly on his rare acquirements as a musical scholar. An unfailing ear, imperturbable presence of mind, and great personal authority, made him one of the best conductors of modern times. The combination of practical musicianship with a natural inclination for critical research and a pre-eminently intellectual tendency of mind, made him a first-rate judge on questions of musical scholarship. After Mendelssohn and Schumann, Rietz has probably done more than anybody else to purify the scores of the great masters from the numerous errors of text by which they were disfigured. He was an absolute and uncompromising adherent of the classical school, and had but little sympathy with modern music after Mendelssohn; and even in the works of Schubert, Schumann and Brahms was over-apt to see the weak points. As to the music of the newest German School, he held it in abhorrence, and would show his aversion on every occasion. He was, however, too much of an opera-conductor not to feel a certain interest in Wagner, and in preparing his operas would take a special pride and relish in overcoming the great and peculiar difficulties contained in Wagner's scores.

Rietz had many personal friends, but, as will appear natural with a man of so pronounced a character and opinions, also a number of bitter enemies. He died at Dresden Oct. 1, 1877, leaving a large and valuable musical library which was sold by auction in Dec. 1877. Besides the works already mentioned he published a considerable number of compositions for the chamber, songs, concertos for violin and for various wind-instruments. He also wrote a great Mass. [P.D.]

[1] See Mendelssohn's Letters, ii. p. 234 (Eng. ed.).

RIGADOON (French *Rigadon* or *Rigaudon*), a lively dance, which most probably came from Provence or Languedoc, although its popularity in England has caused some writers to suppose that it is of English origin. It was danced in France in the time of Louis XIII, but does not seem to have become popular in England until the end of the 17th century. According to Rousseau it derived its name from its inventor, one Rigaud, but others connect it with the English 'rig,' i.e. wanton, or lively.

The Rigadoon was remarkable for a peculiar jumping step (which is described at length in Compan's 'Dictionnaire de la Danse,' Paris, 1802); this step survived the dance for some time. The music of the Rigadoon is in 2–4 or C time, and consists of three or four parts, of which the third is quite short. The number of bars is unequal, and the music generally begins on the third or fourth beat of the bar. The following example is from the 3rd Part of Henry Playford's 'Apollo's Banquet' (6th edition, 1690). The same tune occurs in 'The Dancing Master,' but in that work the bars are incorrectly divided.

[W.B.S.]

RIGBY, George Vernon, born Jan. 21, 1840, when about 9 years old was a chorister of St. Chad's Cathedral, Birmingham, where he remained for about 7 years. In 1860, his voice having changed to a tenor, he decided upon becoming a singer, and tried his strength at some minor concerts in Birmingham and its neighbourhood, and succeeded so well that in 1861 he removed to London, and on March 4 appeared at the Alhambra, Leicester Square (then a concert room, managed by E. T. Smith), and in August following at Mellon's Promenade Concerts at Covent Garden. In 1865 he sang in the provinces as a member of H. Corri's Opera Company, until November, when he went to Italy and studied under San Giovanni at Milan, where in Nov. 1866 he appeared at the Carcano Theatre as the Fisherman in Rossini's 'Guglielmo Tell.' He next went to Berlin, and in Jan. 1867 appeared at the Victoria Theatre there, in the principal tenor parts in 'Don Pasquale,' 'La Sonnambula,' and 'L'Italiana in Algieri.' He then accepted a three months engagement in Denmark, and performed Il Conte Almaviva in the 'Barbiere,' Il Duca in 'Rigoletto,' and other parts, in Copenhagen and other towns. He returned to England in Sept. 1867, and sang at various places. In 1868 he was engaged at the Gloucester Festival with Sims Reeves, whose temporary indisposition afforded him the opportunity of singing the part of Samson in Handel's oratorio, in which he acquitted himself so ably that he was immediately engaged by the Sacred Harmonic Society, where he appeared, Nov. 27, 1868, with signal success, and immediately established himself as an oratorio singer. In 1869 he appeared on the stage of the Princess's Theatre as Acis in Handel's 'Acis and Galatea.' He has since maintained a prominent position at all the principal concerts and festivals in town and country. His voice is of fine quality, full compass, and considerable power, and he sings with earnestness and care. [W.H.H.]

RIGHINI, Vincenzo, a well-known conductor of the Italian opera in Berlin, born at Bologna Jan. 22, 1756. As a boy he had a fine voice, but owing to injury it developed into a tenor of so rough and muffled a tone, that he turned his attention to theory, which he studied with Padre Martini. In 1776 he sang for a short time in the Opera buffa at Prague, then under Bustelli's direction, but was not well received. He made a success there however with three operas of his composition, 'La Vedova scaltra,' 'La Bottega del Caffe,' and 'Don Giovanni,' also performed in Vienna (Aug. 1777), whither Righini went on leaving Prague. There he became singing-master to Princess Elisabeth of Würtemberg, and conductor of the Italian opera. He next entered the service of the Elector of Mayence, and composed for the Elector of Treves 'Alcide al Bivio' (Coblenz) and a mass. In April 1793 he was invited to succeed Alessandri at the Italian Opera of Berlin, with a salary of 3000 thalers (about £450). Here he produced 'Enea nel Lazio' and 'Il Trionfo d'Arianna (1793), 'Armida' (1799), 'Tigrane' (1800), 'Gerusalemme liberata,' and 'La Selva incantata' (1803). The last two were published after his death with German text (Leipzig, Herklotz).

In 1794 Righini married Henriette Kneisel (born at Stettin in 1767, died of consumption at Berlin Jan. 25, 1801), a charming blonde, and, according to Gerber, a singer of great expression. After the death of Friedrich Wilhelm II. (1797) his post became almost a sinecure, and in 1806 the opera was entirely discontinued. Righini was much beloved. Gerber speaks in high terms of his modesty and courtesy, and adds, 'It is a real enjoyment to hear him sing his own pieces in his soft veiled voice to his own accompaniment.' As a composer he was not of the first rank, and of course was eclipsed by Mozart. His best point was his feeling for *ensemble*, of which the quartet in 'Gerusalemme' is a good example. He was a successful teacher of singing, and counted distinguished artists among his pupils. After the loss of a promising son in 1810, his health gave way, and in 1812 he

was ordered to try the effects of his native air at Bologna. When bidding goodbye to his colleague, Anselm Weber, he said, 'It is my belief that I shall never return; if it should be so, sing a Requiem and a Miserere for me'—touching words too soon fulfilled by his death at Bologna, Aug. 19, 1812. His own Requiem (score in the Berlin Library), was performed by the Singakademie in his honour.

Besides 20 operas, of which a list is given by Fétis, Righini composed church music—a Te Deum and a Missa Solennis are published and still known in Germany—several cantatas, and innumerable Scenas, Lieder, and songs; also a short ballet, 'Minerva belebt die Statuen des Dädalus,' and some instrumental pieces, including a serenade for 2 clarinets, 2 horns, and 2 bassoons (1799, Breitkopf & Härtel). One of his operas, 'Il Convitato di pietra, osia il dissoluto,' will always be interesting as a forerunner of Mozart's 'Don Giovanni.' It was produced at Vienna, Aug. 21, 1777 (ten years before Mozart's), and is described by Jahn (Mozart, ii. 333). His best orchestral work is his overture to 'Tigranes,' which is still occasionally played in Germany and England. Breitkopf & Härtel's Catalogue shows a tolerably long list of his songs, and his exercises for the voice (1804) are amongst the best that exist. English amateurs will find a duet of his, 'Come opprima,' from 'Enea nel Lazio,' in the 'Musical Library,' vol. i. p. 8, and two airs in Lonsdale's 'Gemme d'Antichità.' He was one of the 63 composers who set the words 'In questa tomba oscura,' and his setting was published in 1878 by Ritter of Magdeburg. [F.G.]

RIGOLETTO. An opera in 3 acts; libretto by Piave (founded on V. Hugo's 'Le Roi s'amuse'), music by Verdi. Produced at the Teatro Fenice, Venice, March 11, 1851, and given in Italian at Covent Garden, May 14, 1853, and at the Italiens, Paris, Jan. 19, 1857. [G.]

RIMBAULT, Edward Francis, LL.D, son of Stephen Francis Rimbault, organist of St. Giles in the Fields, was born in Soho, June 13, 1816. He received his first instruction in music from his father, but afterwards became a pupil of Samuel Wesley. At 16 years old he was appointed organist of the Swiss Church, Soho. He early directed his attention to the study of musical history and literature, and in 1838 delivered a series of lectures on the history of music in England. In 1840 he took an active part in the formation of the Musical Antiquarian and Percy Societies, of both which he became secretary, and for both which he edited several works. In 1841 he was editor of the musical publications of the Motett Society. In the course of the next few years he edited a collection of Cathedral Chants; The Order of Daily Service according to the use of Westminster Abbey; a reprint of Low's Brief Direction for the performance of Cathedral Service; Tallis's Responses; Merbeck's Book of Common Prayer, noted; a volume of unpublished Cathedral Services; Arnold's Cathedral Music; and the oratorios of 'Messiah,' 'Samson,' and 'Saul,' for the Handel Society. In 1842 he was elected an F.S.A. and member of the Academy of Music in Stockholm, and obtained the degree of Doctor in Philosophy. He was offered, but declined, the appointment of Professor of Music in Harvard University, U. S. A. In 1848 he received the honorary degree of LL. D. He lectured on music at the Collegiate Institution, Liverpool; the Philosophic Institute, Edinburgh; the Royal Institution of Great Britain, and elsewhere. He published 'The History and Construction of the Organ' (in collaboration with Mr. E. J. Hopkins), 'Notices of the Early English Organ Builders'; 'History of the Pianoforte,' 'Bibliotheca Madrigaliana,' 'Musical Illustrations of Percy's Reliques,' 'The Ancient Vocal Music of England,' 'The Rounds, Catches and Canons of England' (in conjunction with Rev. J. P. Metcalfe), two collections of Christmas Carols, 'A Little Book of Songs and Ballads,' etc., etc. He edited North's 'Memoirs of Musick,' Sir Thomas Overbury's Works, the Old Cheque Book of the Chapel Royal, and two Sermons by Boy Bishops. He arranged many operas and other works, was author of many elementary books, and an extensive contributor to periodical literature. His compositions were but few, the principal being an operetta, 'The Fair Maid of Islington,' 1838, and a posthumous cantata, 'Country Life.' His pretty little song, 'Happy land,' had an extensive popularity. After his resignation of the organistship of the Swiss Church, he was successively organist of several churches and chapels. He died, after a lingering illness, Sept. 26, 1876, leaving a fine musical library, which was sold by auction. [W.H.H.]

RINALDO. Handel's first opera in England; composed in a fortnight, and produced at the King's Theatre in the Haymarket Feb. 24, 1711. The libretto was founded on the episode of Rinaldo and Armida in Tasso's 'Jerusalem Delivered' (the same on which Gluck based his 'Armida'). Rossi wrote it in Italian, and it was translated into English by Aaron Hill. The opera was mounted with extraordinary magnificence, and had an uninterrupted run of 15 nights—at that time unusually long. The march, and the air 'Il tricerbero,' were long popular as 'Let us take the road' (Beggar's Opera), and 'Let the waiter bring clean glasses.' 'Lascia ch'io pianga'—made out of a saraband in Handel's earlier opera 'Almira' (1704)—is still a favourite with singers and hearers. [G.]

RINFORZANDO, 'reinforcing' or increasing in power. This word, or its abbreviations, *rinf.* or *rfz.* is used to denote a sudden and short-lasting *crescendo.* It is applied generally to a whole phrase however short, and has the same meaning as *sforzando,* which is only applied to single notes. It is sometimes used in concerted music to give a momentary prominence to a subordinate part, as for instance in the Beethoven Quartet, op. 95, in the Allegretto, where the violoncello part is marked *rinforzando,* when it has the second

section of the principal subject of the movement. [J.A.F.M.]

RINK or RINCK, JOHANN CHRISTIAN HEINRICH, the celebrated organist and composer for his instrument, born at Elgersburg in Saxe-Gotha, Feb. 18, 1770, and died at Darmstadt, Aug. 7, 1846. His talent developed itself at an early period, and, like JOHANN SCHNEIDER [see that name], he had the advantage of a direct traditional reading of the works of Sebastian Bach, having studied at Erfurt under Kittel, one of the great composer's best pupils. Rink having sat at the feet of Forkel at the University of Göttingen, obtained in 1789 the organistship of Giessen, where he held several other musical appointments. In 1806 he became organist at Darmstadt, and 'professor' at its college; in 1813 was appointed Court organist, and in 1817 chamber musician to the Grand Duke (Ludwig I). Rink made several artistic tours in Germany, his playing always eliciting much admiration. At Trèves, in 1827, he was greeted with special honour. He received various decorations,—in 1831 membership of the Dutch Society for Encouragement of Music; in 1838 the cross of the first class from his Grand Duke; in 1840 'Doctor of Philosophy and Arts' from the University of Giessen. Out of his 125 works a few are for chamber, including sonatas for PF., violin, and violoncello, and PF. duets. But his reputation is based on his organ music, or rather on his 'Practical Organ School,' a standard work. Rink's compositions for his instrument show no trace of such sublime influence as might have been looked for from a pupil, in the second generation, of Bach; indeed throughout them fugue-writing is conspicuous by its absence. But without attaining the high standard which has been reached by living composers for the instrument in Germany, his organ-pieces contain much that is interesting to an organ student, and never degenerate into the debased and flippant style of the French or English organ-music so prevalent at present.

Rink's name will always live as that of an executant, and of a safe guide towards the formation of a sound and practical organ-player; and his works comprise many artistic studies. Amongst these the more important are the 'Practical Organ School,' in six divisions (op. 55), and 'Preludes for Chorales,' issued at various periods. He also composed for the church a 'Pater Noster' for four voices with organ (op. 59); motets, 'Praise the Lord' (op. 88) and 'God be merciful' (op. 109); 12 chorales for men's voices, etc. [H.S.O.]

RIOTTE, PHILIPP JACOB, born at St. Mendel, Trèves, Aug. 16, 1776. Andre of Offenbach was his teacher in music, and he made his first appearance at Frankfort in Feb. 1804. In 1806 he was music-director at Gotha. In 1808 he conducted the French operas before the assembled royalties at the Congress of Erfurt. In April 1809 his operetta 'Das Grenzstädtchen' was produced at the Kärnthnerthor Theatre, Vienna, and thenceforward Vienna was his residence. In 1818 he became conductor at the Theatre an-der-Wien, beyond which he does not seem to have advanced up to his death, Aug. 20. 1856. The list of his theatrical works is immense. His biography in Wurzbach's Lexicon enumerates, between 1809 and 1848, no less than 48 pieces, operas, operettas, ballets, pantomimes, music to plays, etc., written mostly by himself, and sometimes in conjunction with others. In 1852 he wound up his long labours by a cantata 'The Crusade,' which was performed in the great Redoutensaal, Vienna, with much applause. In other notices he is said to have produced an opera called 'Mozart's Zauberflöte' at Prague about 1820. He left also a symphony (op. 25), 9 solo-sonatas, 6 do. for PF. and violin, 3 concertos for clarinet and orchestra, but these are defunct. He became very popular by a piece called 'The Battle of Leipzig,' for PF. solo, which was republished over half Germany, and had a prodigious sale.

In a letter to the Archduke Rudolph (Thayer, iii. 195), Beethoven mentions that the fineness of the day and his going in the evening to 'Wanda' at the theatre had prevented his attending to some wish of the Archduke's. 'Wanda, Queen of the Samartians' was a tragedy of Z. Werner's, with music by Riotte, played from March 16 to April 20, 1812. [G.]

RIPIENO, 'supplementary.' The name given to the accompanying instruments in the orchestras, and especially in the orchestral concertos of the 17th and 18th centuries, which were only employed to fill in the harmonies and to support the solo or 'concertante' parts. [See CONCERTANTE, vol. i. p. 385*b*.] [J.A.F.M.]

RISELEY, GEORGE, born at Bristol, Aug. 28, 1845; elected chorister of Bristol Cathedral in 1852, and in Jan. 1862 articled to Mr. John Davis Corfe, the Cathedral organist, for instruction in the organ, pianoforte, harmony, and counterpoint. During the next ten years he was organist at various churches in Bristol and Clifton, at the same time acting as deputy at the Cathedral. In 1870 he was appointed organist to the Colston Hall, Bristol, where he started weekly recitals of classical and popular music, and in 1876 succeeded Mr. Corfe as organist to the Cathedral. During the last five years, Mr. Riseley has devoted his energies to the improvement of orchestral music in Bristol, where he has now collected an excellent orchestra of fifty players. In 1877 he started his orchestral concerts, which have won for him a well-deserved reputation. Notwithstanding considerable opposition, and no small pecuniary risk, he has continued, during each season, to give fortnightly concerts, at which the principal works of the classical masters have been well performed, and a large number of interesting novelties by modern writers, both English and foreign, produced. [W.B.S.]

RISPOSTA (Lat. *Comes*; Eng. Answer). The Answer to the Subject of a Fugue, or Point of Imitation. [See PROPOSTA.]

In Real Fugue, the Answer imitates the

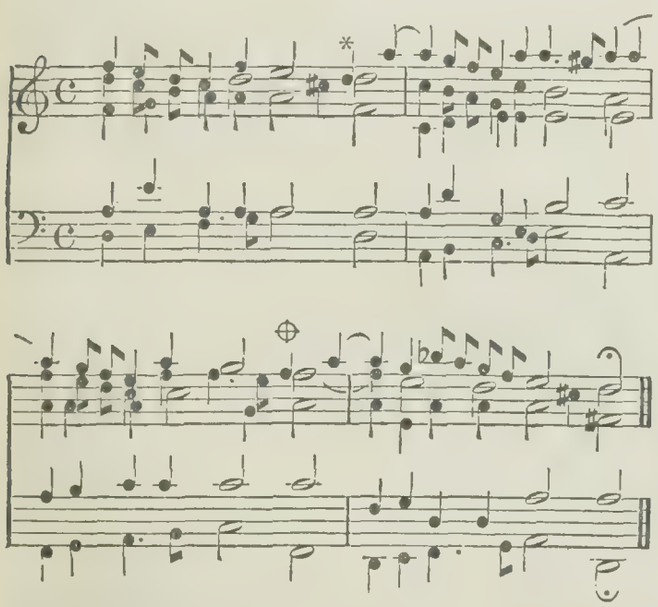
Subject, Interval for Interval. In Tonal Fugue, the Tonic is always answered by the Dominant, and *vice versa*. In both, the Imitation is usually conducted, either in the Fifth above the Proposta, or the Fourth below it, when the Subject begins upon the Tonic; and, in the Fourth above, or the Fifth below, when it begins upon the Dominant. [See FUGUE, REAL FUGUE, TONAL FUGUE, SUBJECT.] [W.S.R.]

RITARDANDO; RITENENTE; RITENUTO. [See RALLENTANDO.]

RITORNELLO (Abbrev. *Ritornel*, *Ritor.*; Fr. *Ritournelle*). I. An Italian word, literally signifying, a little return, or repetition; but more frequently applied, in a conventional sense, (1) to a short Instrumental Melody, played between the Scenes of an Opera, or even during their action, either for the purpose of enforcing some particular dramatic effect, or of amusing the audience during the time occupied in the preparation of some elaborate 'Set-Scene'; or, (2) to the symphonies introduced between the vocal phrases of a Song, or Anthem.

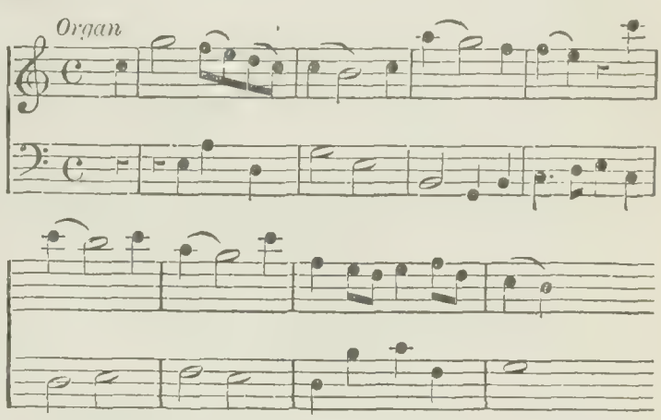
1. The earliest known use of the term, in its first sense, is to be found in Peri's 'Euridice,' in connexion with a melody for 3 flutes, which, though called a 'Zinfonia' on its first appearance, is afterwards repeated under the title of 'Ritornello.' 'Euridice' was first printed at Florence in 1600, and at Venice in 1608. [For the Zinfonia, see vol. ii. of this Dictionary, p. 499.]

A similar use of the term occurs soon afterwards in Monteverde's 'Orfeo,' printed at Venice in 1609, and republished in 1615. In this work, the Overture—there called Toccata—is followed by a 'Ritornello' in 5 parts, the rhythmic form of which is immeasurably in advance of the age in which it was produced.



* At this mark, the two upper Parts cross, and remain inverted, until the sign ⊕.

2. When Vocal Music with Instrumental Accompaniment became more extensively cultivated, the word was brought into common use, in its second sense, as applied to the Instrumental Symphonies of a Song, or other Composition for a Solo Voice. Ritornelli of this kind were freely used by Cavalli, Cesti, Carissimi, and many other Composers of the early Venetian Dramatic School, who imitated their manner. An example from Cavalli's 'Il Giasone,' will be found at page 503 of our second volume. Towards the close of the 17th century such instrumental interpolations became very common, in all styles and countries. For instance, in early editions of the Verse Anthems of Croft, Greene, and other English Composers, of the 17th and 18th centuries, we constantly find the words 'Ritornel.', 'Ritor.', or 'Rit.', printed over little Interludes, which, unknown in the more severe kind of Ecclesiastical Music, formed a marked feature in works of this particular School, frequently embodying some of its choicest scraps of Melody, as in Dr. Boyce's Anthem, 'The Heavens declare the glory of God':—



In later editions the term disappears, its place being supplied, in the same passages, by the words 'Organ,' or 'Sym.'; which last abbreviation is almost invariably found in old copies of Handel's Songs, and other similar Music, in which the Symphonies are interpolated, as often as opportunity permits, upon the line allotted to the Voice.

II. An antient form of Italian Verse, in which each Strophe consists of three lines, the first and third of which rhyme with each other, after the manner of the *Terza rima* of Dante. Little Folk-Songs of this character are still popular, under the name of 'Ritornelli' or 'Stornelli,' among the peasants of the Abruzzi and other mountain regions of Italy. [W.S.R.]

RITTER, FREDERIC LOUIS, born at Strasburg, 1834. His paternal ancestors were Spanish, and the family name was originally Caballero. His musical studies were begun at an early age under Hauser and Schletterer, and continued at Paris (whither he was sent when 16 years of age) under the supervision of his cousin, Georges Kastner. Possessed with the idea that beyond the Rhine he would find better opportunities for the study of composition, he ran away to Germany, where he remained for two years, assiduously pursuing his studies with eminent musicians, and attending concerts whenever good music could be heard. Returning to Lorraine, aged 18, he was nominated professor of music in the Protestant seminary of Fénéstrange, and invited to conduct a Société de

Concerts at Bordeaux. The representations made by some of his family who had settled in America induced him to visit the New World. He spent a few years in Cincinnati, where his enthusiasm worked wonders in the development of taste. The Cecilia (choral) and Philharmonic (orchestral) Societies were established by him, and a large number of important works presented at their concerts for the first time in the United States. In 1862 Ritter went to New York, becoming conductor of the Sacred Harmonic Society for seven years, and of the Arion Choral Society (male voices), and instituting (1867) the first musical festival held in that city. In 1867 he was appointed director of the musical department of Vassar College, Poughkeepsie, whither he removed in 1874 on resigning his conductorships. The University of the City of New York conferred on him the degree of Doctor of Music in 1878. He still retains (1881) the directorship of the musical studies at Vassar College. Ritter's literary labours have included articles on musical topics printed in French, German and American periodicals. His most important work is 'A History of Music, in the Form of Lectures'—vol. i. 1870; vol. ii. 1874, Boston; both republished by W. Reeves, London, 1876; vol. iii. is in preparation. As a composer, Ritter may be classed with the modern Franco-German school.

The following works have appeared in the catalogues of Hamburg, Leipzig, Mayence and New York publishers:—

Op. 1. 'Hafis,' cyclus of Persian songs.
2. Preambule Scherzo, PF.
3. 10 children's songs.
4. Fairy Love.
5. 8 PF. pieces.
6. 6 songs.
7. 5 choruses, male voices.
8. Psalm xxiii, female voices.
Op. 10. 5 songs. 10 Irish Melodies, with new PF. acct.
11. Organ fantasia and fugue.
12. Voices of the Night, PF.
'O Salutaris,' baritone, organ.
'Ave Maria,' mezzo-sopr., organ.
'Parting,' song, mezzo-soprano.
A Practical Method for the Instruction of Chorus-classes.

The following are his most important unpublished compositions:—

3 Symphonies—A, E minor, Eb.
'Stella,' Poème-symphonique, d'après V. Hugo.
Overture, 'Othello.'
Concerto, PF. and orch.
Fantasia, bass clarinet and orch.
1 string quartet; 3 do.
Psalm xlvi, solo, chor. and orch.

All of the above were produced at the concerts of the New York and Brooklyn Philharmonic Societies, 1867–1876.

Dr. Ritter's wife, *née* Raymond, is known under the name of FANNY RAYMOND RITTER as an author and translator of works on musical subjects. She has brought out translations of Ehlert's 'Letters on Music, to a Lady'; and of Schumann's Essays and Criticisms—'Music and Musicians'; and a pamphlet entitled 'Women as a Musician'—all published by Reeves, London. [F.H.J.]

ROBERT BRUCE. A pasticcio adapted by Niedermeyer from four of Rossini's operas—'Zelmira,' the 'Donna del Lago,' 'Torvaldo e Dorliska,' and 'Bianca e Faliero.' Produced without success at the Académie Royale, Dec. 30, 1846. It is published in Italian as 'Roberto Bruce' by Ricordi. [G.]

ROBERT LE DIABLE. Opera in 5 acts; words by Scribe, music by Meyerbeer. Produced at the Académie, Paris, Nov. 21, 1831. In London, and in English, imperfectly, as 'The Demon, or the Mystic Branch' at Drury Lane, Feb. 20, 1832, and as 'The Fiend Father, or Robert of Normandy' at Covent Garden the day following; as 'Robert the Devil' at Drury Lane (Bunn), March 1, 1845. In French, at Her Majesty's, June 11, 1832, with Nourrit, Levasseur, Damoreau. In Italian, at Her Majesty's, May 4, 1847 (first appearance of Jenny Lind and Staudigl—Mendelssohn was in the house). [G.]

ROBERTO DEVEREUX, CONTE D'ESSEX. An opera in 3 acts; libretto by Camerano from Thomas Corneille's 'Comte d'Essex,' music by Donizetti. Produced in Naples in 1836; at the Italiens, Paris, Dec. 27, 1838; at Her Majesty's Theatre, London, June 24, 1841. The overture contains the air of 'God save the King.' [G.]

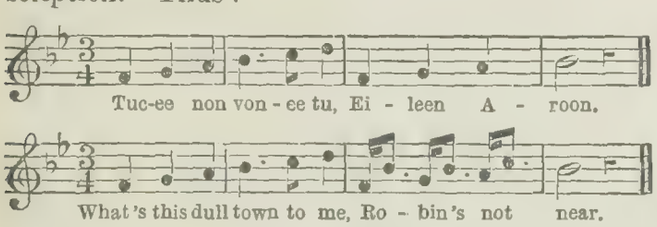
ROBERTS, J. VARLEY, Mus. Doc., native of Stanningley, near Leeds, born Sept. 25, 1841. He exhibited much early ability for music, and at twelve was appointed organist of S. John's, Farsley, near Leeds. In 1862 he became organist of S. Bartholomew's, Armley, and in 1868 received his present appointment of organist and choirmaster of the parish church, Halifax, after a competitive trial, Dr. E. G. Monk acting as umpire. In 1871 he graduated Mus. Bac., and in 1876 Mus. Doc., at Christ Church, Oxford. During his organistship at Halifax, upwards of £3000 have been raised to enlarge the organ, originally built by Snetzler—the instrument upon which Sir Wm. Herschel, the renowned astronomer, formerly played—and it is now one of the finest and largest in the North of England.

In 1876 Dr. Roberts became a Fellow in the College of Organists, London. He has published a sacred cantata, 'Jonah,' for voices and orchestra (Novello); an Appendix and a Supplement to Cheetham's Psalmody; a Morning Communion and Evening Service in D; an Evening Service in F; anthems, organ voluntaries, and songs. [G.]

ROBIN ADAIR or EILEEN AROON. This air first became popular in England in the second half of the last century, through the eminent Italian singer Tenducci. He was one of the original singers in Arne's opera of 'Artaxerxes,' produced in 1762, and was afterwards engaged by Dr. Arne to accompany him to Ireland, where he probably learnt this song. It is certain that he sang 'Eileen Aroon' in the Irish language, the words being written out phonetically for him. He sang also at Ranelagh Gardens, and an edition with the Irish words 'sung by Signor Tenducci,' was published in London with music on a half sheet. In Ireland he had drawn especial attention to the air, and among the English-speaking part of the population several songs of local interest were written to it, making Robin Adair the burthen. For these, which do not in any way concern the tune, the curious are referred to the indexes to the 3rd, 4th, and 5th

series of 'Notes and Queries.' It is here sufficient to show by the correspondence between the poet Burns and George Thomson, that the air was known as 'Robin Adair' before Braham reintroduced it here. In the published correspondence between Thomson the music publisher, for whom Haydn and Beethoven both harmonized Scotch airs, and Burns, Thomson, writing in August, 1793, says, 'I shall be glad to see you give Robin Adair a Scottish dress. Peter [Pindar] is furnishing him with an English suit for a change, and you are well matched together. Robin's air is excellent, though he certainly has an out-of-the-way measure as ever poor Parnassian wight was plagued with.' To this Burns answered in the same month: 'I have tried my hand on "Robin Adair," and, you will probably think with little success; but it is such a cursed, cramp, out-of-the-way measure, that I despair of doing anything better to it.' He then sends 'Phillis the fair,' and, a few days later, writes again, 'That crinkum-crankum tune, "Robin Adair," has been running in my head, and I succeeded so ill on my last attempt, that I have ventured, in this morning's walk, one essay more.' He then encloses 'Had I a cave.'

It is difficult to tell who wrote the words of the present song of Robin Adair. The name of the author is not upon the original title-page. Peter Pindar's songs (Dr. John Wolcott's) are not included in his collected works, being then the copyright of Messrs Goulding & D'Almaine, who bought all for an annuity of £250, and, as Peter was christened in 1738 and died in 1819, it was a dear bargain. The popularity of Robin Adair dates from Braham's benefit at the Lyceum Theatre on December 17, 1811. He then sang the air with great applause, but as the vowels are long in 'Eileen,' and short in 'Robin,' he introduced the acciaccatura, which Dr. Burney calls the 'Scotch snap.' The change will be more intelligible in notes than in description. Thus :—



We give the line in its accurate transliteration, as kindly supplied by Dr. P. W. Joyce, the eminent Irish collector :—

Tioch-faidh nó'n bhfan faidh tu, Eibhlín a rúin?

[W.C.]

ROBIN DES BOIS. The title of the French version of 'Der Freischütz' at its first appearance in Paris (Odéon, Dec. 7, 1824; Opéra Comique, Jan. 15, 1835; Lyrique, Jan. 24, 1855). The libretto was made by Sauvage; the names of the characters were changed, the action and the story were altered, portions of 'Preciosa' and 'Oberon' were introduced, and the piece was made to end happily. The alterations were due to Castil Blaze, who to save expense scored the music himself from a PF. copy. Nevertheless, with all these drawbacks, so great was the popularity of the music that Castil Blaze made a large sum of money by it. For the translation by Pacini and Berlioz see FREISCHÜTZ, vol. i. p. 562. [G.]

ROBIN HOOD. An opera in 3 acts; words by John Oxenford, music by G. A. Macfarren. Produced at Her Majesty's Theatre, London, Oct. 11, 1860, and had a very great run. [G.]

ROBINSON, ANASTASIA, was daughter of a portrait painter, who, becoming blind, was compelled to qualify his children to gain their own livelihood. Anastasia received instruction from Dr. Croft, Pier Giuseppe Sandoni, and the singer called The Baroness, successively. She appeared as Ariana in Handel's 'Amadigi,' May 25, 1715; and in 1720 at the King's Theatre as Echo in Domenico Scarlatti's opera, 'Narcisso.' She afterwards sang in the pasticcio of 'Muzio Scævola,' in Handel's 'Ottone,' 'Floridante,' 'Flavio,' and 'Giulio Cesare'; in Buononcini's 'Crispo' and 'Griselda,' and other operas. Her salary was £1000 for the season, besides a benefit-night. She possessed a fine voice of extensive compass, but her intonation was uncertain. She quitted the stage in 1723, on being privately married to the Earl of Peterborough, who did not avow the marriage until shortly before his death in 1735, although, according to one account, she resided with him as mistress of the house, and was received as such by the Earl's friends. According to another account, she resided with her mother in a house near Fulham, which the Earl took for them, and never lived under the same roof with him, until she attended him in a journey in search of health, a short time before his death. The Countess survived until 1750. There is a fine portrait of her by Faber after Vanderbank, 1727.

Her younger sister, MARGARET, intended for a miniature painter, preferred being a singer. She studied under Buononcini, and afterwards at Paris under Rameau; but though an excellent singer, was said to have been prevented by timidity from ever appearing in public.[1] A fortunate marriage, however, relieved her from the necessity of obtaining her own subsistence. [W. H. H.]

ROBINSON, JOHN, born 1682, was a chorister of the Chapel Royal under Dr. Blow. He subsequently became organist of St. Lawrence, Jewry, and St. Magnus, London Bridge. Hawkins, in his History, describes him as 'a very florid and elegant performer on the organ, inasmuch that crowds resorted to hear him'; and elsewhere says: 'In parish churches the voluntary between the Psalms and the First Lesson was anciently a slow, solemn movement, tending to compose the minds and excite sentiments of piety and devotion. Mr. Robinson introduced a different practice, calculated to display the agility of his fingers in *allegro* movements on the cornet, trumpet,

[1] A 'Miss Robinson, jun.,' appeared at Drury Lane, Jan. 2, 1729, as Ariel in 'The Tempest.' It is possible that this was Margaret Robinson.

sesquialtera, and other noisy stops, degrading the instrument, and instead of the full and noble harmony with which it was designed to gratify the ear, tickling it with mere airs in two parts, in fact solos for a flute and a bass.' On Sept. 30, 1727, Robinson was appointed to succeed Dr. Croft as organist of Westminster Abbey. He had an extensive practice as a teacher of the harpsichord, and will be long remembered in the English Church by his double chant in Eb. He died April 30, 1762, and was buried, May 13, in the north aisle of Westminster Abbey. He married, Sept. 6, 1716, Ann, youngest daughter of William Turner, Mus. Doc. She was a singer, and appeared at the King's Theatre in 1720 in Domenico Scarlatti's opera 'Narcissus,' being described as 'Mrs. Turner-Robinson' to distinguish her from Anastasia Robinson, who sang in the same opera. She died Jan. 5, and was buried Jan. 8, 1741, in the west cloister of Westminster Abbey. Robinson had a daughter, who was a contralto singer and the original representative of Daniel in Handel's oratorio 'Belshazzar,' 1745, and also sang in others of his oratorios. [W.H.H.]

ROBINSON, Joseph, was the youngest of four brothers, born and resident in Dublin. Their father Francis was an eminent professor of music, and in 1810 was mainly instrumental in founding 'the Sons of Handel,' probably the earliest society established there for the execution of large works. His son Francis, Mus. Doc., had a tenor voice of great beauty and sympathetic quality; was a vicar-choral of the two Dublin Cathedrals; and, at the Musical Festival in Westminster Abbey, in June 1834, sang a principal part. Another son, William, had a deep bass of exceptional volume; while John, the organist of both Cathedrals and of Trinity College, had a tenor ranging to the high D. The four brothers formed an admirable vocal quartet, and were the first to make known the German Part-songs then rarely heard either in England or Ireland.

Joseph Robinson—born in Aug. 1816—was a chorister of St. Patrick's at the early age of eight, and afterwards a member of all the choirs, where his fine delivery of recitative was always a striking feature. He also played in the orchestra of the Dublin Philharmonic. But it is as a conductor that his reputation is best established. In 1834 he founded the 'Antient Society,' of which he was conductor for 29 years, and which ceased to exist soon after his resignation. It commenced its meetings in a private house, then took a large room, now the Royal Irish Academy of Antiquities, and in 1843 had made such progress that it purchased and remodelled the building since known as the 'Antient Concert Rooms.' Many of the standard works of the old masters were produced, but those of modern genius were not excluded. Thus Mendelssohn's 'Elijah' was performed in 1847, the year after its first production at Birmingham. The 'Hymn of Praise,' 'The Sons of Art,' and 'St. Paul' were all given at early dates. The society was not large; rather a choir than a chorus; but it was the first to teach the Dublin public what beauty could be developed in the execution of a work, by attention to the conductor's bâton, with every gradation of effect. Amongst the last things written by Mendelssohn was the instrumentation of his 'Hear my Prayer' (originally composed for voices and organ only), expressly for Mr. Robinson to produce at the 'Antients.' It did not reach him till after the composer's death. [See Mendelssohn, vol. ii. 283b.] In 1837 he became conductor of the 'University Choral Society,' founded by the students. At one of its concerts the music of 'Antigone' was given for the first time out of Germany. He continued to conduct the Society for 10 years, and it still flourishes under Sir Robert Stewart.

In 1849 a young pianiste, Miss Fanny Arthur (born Sept. 1831), arrived in Dublin from Southampton, and made her first successful appearance there—Feb. 19, 1849. Mr. Robinson and she were married July 17 following, and she continued for 30 years to be an extraordinary favourite. Her first appearance in London was at the Musical Union, June 26, 1855, when she played Beethoven's Sonata in F (op. 24), with Ernst, and received the praises of Meyerbeer; also at the New Philharmonic, where she played Mendelssohn's Concerto in D. In 1852, at the opening of the Cork Exhibition, Mr. Robinson conducted the music, which was on a large scale, and included a new cantata by Sir Robert Stewart. In 1853, an International Exhibition was opened in Dublin; there he assembled 1000 performers, the largest band and chorus yet brought together in Ireland, and produced a fine effect.

In 1856 efforts were made to revive the 'Irish Academy of Music,' founded in 1848, but languishing for want of funds and pupils. Mr. and Mrs. Robinson joined as Professors, and created Vocal and Pianoforte Schools of great excellence. Nearly all the Irish artists, in both lines, who appeared during their time, owed both training and success to their teaching; and when, after 20 years, Mr. Robinson resigned, the Institution was one of importance and stability.

In 1859, for the Handel Centenary, he gave the 'Messiah,' with Jenny Lind and Belletti among the principals. The net receipts amounted to £900, an unprecedented sum in Dublin. In 1865 the large Exhibition Palace was opened by the Prince of Wales, and Mr. Robinson conducted the performance with a band and chorus of 700.

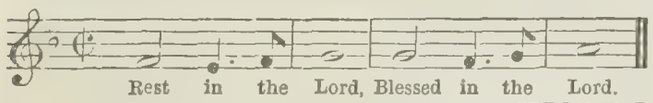
After the cessation of the 'Antients,' there was no society to attempt systematically the worthy production of great works. To remedy this a chorus was trained by Mr. Robinson, and established in 1876 as the 'Dublin Musical Society.' It gives three concerts each year, with 300 performers. It produces great choral works, new and old, is attracting a regular audience, and is steadily educating the public to a higher tone. Some time since, the members presented Mr. Robinson with an address and a purse of 100 sovereigns. The purse was returned by him with

warm expressions of gratitude, but with the characteristic words 'While I think a professional man should expect his fair remuneration, yet his chief object may be something higher and nobler —the advancement of art in his native city.'

He has written a variety of songs, concerted pieces and anthems, beside arranging a number of standard songs and Irish melodies.

Mrs. Robinson also passed a very active musical life, though often interrupted by nervous illness. In teaching she had a peculiar power of infusing her own ideas into others. She played from time to time at concerts of a high class, and herself gave a very successful concert in Paris, at the Salle Erard (Feb. 4, 1864). Her pianoforte compositions are numerous and graceful. Her sacred cantata, 'God is Love,' has been repeatedly performed throughout the kingdom, and has realised for charities about £1000.

On Oct. 31, 1879, she met a sudden and tragic end, which caused profound regret. On her tomb is inscribed the *motivo* of the Chorus of Angels from her own Cantata :—



[H.M.D.]

ROBINSON, Thomas, was author of a curious work published at London in folio in 1603, bearing the following title—'The Schoole of Musicke: wherein is taught the perfect method of the true fingering of the Lute, Pandora, Orpharion, and Viol de Gamba; with most infallible general rules both easie and delightfull. Also, a method, how you may be your own instructer for Pricksong by the help of your Lute without any other teacher; with lessons of all sorts for your further and better instruction.' Nothing is known of his biography. [W.H.H.]

ROCHE, Edward, born at Calais Feb. 20, 1828, died at Paris Dec. 16, 1861, began life as a violin player, first as Habeneck's pupil at the Conservatoire, but quickly relinquished music for literature. Roche translated the libretto of Tannhäuser under the eyes of Wagner himself, for its representation at the Opéra, March 13, 1861, and in a preface to his 'Poésies posthumes' (Paris, Lévy, 1863) M. Sardou has described the terrible persistence with which Wagner kept his translator to his task. (See the article in Pougin's supplement to Fétis.) The opera failed, and Roche's labour was in vain; he had not even the satisfaction of seeing his name in print, in connexion with the work, for even Lajarte (Bibl. Mus. de l'Opera, ii. 230) gives Nuitter as the author of the French words. Besides the poems contained in the volume cited, Roche contributed critical articles to several small periodicals. [G.]

ROCHLITZ, Friedrich Johann, critic, and founder of the 'Allgemeine musikalische Zeitung,' born of poor parents at Leipzig, Feb. 12, 1769. His fine voice procured his admission at 13 to the St. Thomas-school, under the Cantorship of Doles, where he spent six years and a half. He began to study theology in the University, but want of means compelled him to leave and take a tutorship, which he supplemented by writing. He also attempted composition, and produced a mass, a Te Deum, and a cantata, 'Die Vollendung des Erlösers.' In 1798 he founded the 'Allgemeine musikalische Zeitung' (Breitkopf & Härtel), and edited it till 1818, during which period his articles largely contributed to the improved general appreciation of the works of the three great Austrian composers, Haydn, Mozart, and Beethoven, in North Germany. The best of these were afterwards re-published by himself under the title of 'Für Freunde der Tonkunst'—for friends of music—in 4 vols. (1824 to 1832, reprinted later by Dörffel). It contains, amongst other matter, an interesting account of a visit to Beethoven at Vienna in 1822. Another important work was a collection in 3 vols. (Schott, 1838 to 1840) of vocal music, from Dufay to Haydn, in chronological order, of which the contents are given below. The first two volumes of the A. M. Z. contain a series of anecdotes on Mozart, whose acquaintance he made during Mozart's visit to Leipzig; but Jahn, in the preface to his 'Mozart,' has completely destroyed the value of these as truthful records.—Rochlitz was a good connoisseur of paintings and engravings. In 1830 he was one of the committee appointed by the Council of Leipzig to draw up a new hymn-book, and some of the hymns are from his own pen. He also wrote the librettos for Schicht's 'Ende des Gerechten,' Spohr's 'Last Judgment' and 'Calvary,' and for Bierey's opera 'Das Blumenmädchen.' He was a Hofrath of Saxony, and died Dec. 16, 1842. [F. G.]

The following are the contents of the collection mentioned above—'Sammlung vorzüglicher Gesangstücke vom Ursprung gesetzmässiger Harmonie bis auf die neue Zeit' (Important Pieces from the origin of regular Harmony to modern times).

FIRST PERIOD (1380-1550).

1. Dufay. Kyrie, à 4. Se la face ay pale.
2. Do. Kyrie, à 4. 'L'omme armé.'
3. Ockeghem. Kyrie and Christe, à 4.
4. Josquin de Près. Hymnus, à 4. Tu pauperum refugium.
5. Do. Zwischengesang einer der grössten Messen des Meisters, et Incarnatus, à 4.
6. Do. Motet. Misericordias Domini, à 4.
7. O. Lasso. Regina Cœli, à 4.
8. Do. Salve Regina, à 4.
9. O. Lasso. Angelus pastores, à 5.
10. Do. Miserere, Amplius, Cor mundum, Ne proficeas, Redde mihi, etc., à 5.
11. C. Goudimel. Domine quid multiplicati, à 4.
12. Ch. de Morales. Kyrie et Christe, à 4.
13. Do. Gloria.
14. T. Tallis. Verba mea, à 4.
15. L. Senfl. Motet on a Choral, 'Mag ich unglück,' à 4.
16. Do. Deus propitius esto, à 5.
17. Do. Nunc dimittis, à 4.

SECOND PERIOD (1550-1630).

1. Palestrina. Adoramus, à 4.
2. Do. Gloria, 2 choirs, à 4.
3. Do. Pleni sunt, à 3.
4. Do. O bone Jesu, à 4.
5. Do. Populo meus, 2 choirs, à 4.
6. Do. Madrigal, 'Cedro gentil,' à 5.
7. Do. Lauda anima mea, à 4.
8. G. M. Nanini. Stabat mater, à 4.
9. Do. Exaudi nos, à 4.
10. Do. Hæc dies, à 5.
11. Vittoria. Jesu dulcis, à 4.
12. Do. O quam gloriosum, à 4.
13. F. Anerio. Adoramus, à 4.
14. Do. Christus factus est, à 4.
15. Allegri. Miserere, 2 choirs, à 5.
16. Gabrieli. In excelsis. Soprano solo. Tenor solo and chorus, à 4, with 3 horns, 2 trombones and violins.
17. Do. Benedictus, 3 choirs, à 4.
18. Böhm. Brüder. 2 Lieder, à 4: Der Tag vertreibt; Die Nacht ist kommen.
19. Do. 2 Lieder, à 4: Verleih' uns Frieden; Nimm' von uns.
20. Walther. Æterno gratias, à 4.
21. Gesänge Martin Luthers, à 4: Mit Fried und Freud; Es woll' uns Gott; Nun komm der Heiden Heiland; Christ lag; Jesus Christus.

22. Gallus. Ecce quomodo moritur justus, à 4.
23. Do. Adoramus, à 6.
24. Do. Media vitæ, 2 choirs, à 4.
25. Vulpius. Exultate justi, à 4.
26. Do. Surrexit Christus, 2 choirs, à 4.
27. Walliser. Gaudent in cœlis, 2 choirs, à 4.
28. Prætorius. Ecce Dominus, à 8.

Appendix.

Palestrina. Et incarnatus, etc. (from mass 'Assumpta est'), à 6.
Prætorius. O vos omnes.

THIRD PERIOD (1600-1700).

1. Caccini. Solo and chorus, Funeste piaggie.
2. Do. Chorus, Biondo arcier.
3. Carissimi. Recitative and chorus, Turbabuntur (from Cantata 'Plaintes des reprouvés').
4. Do. Ardens est cor, 4 solos and chorus.
5. Do. O sacrum convivium, 3 solo voices.
6. Do. Cantemus omnes, chorus and scena (Jefta). Plorate, à 6.
7. Benevoli. Sanctus, 4 choirs, à 4.
8. Do. Christe, à 4.
9. Bernabei. Alleluja, à 4.
10. Do. Salve regina, à 4.
11. A. Scarlatti. Kyrie. à 4.
12. Do. Gloria, a 5.
13. Do. Vacuum est, Canto solo and chorus, with violins.
14. Do. Sanctus, à 4, and Agnus, à 7.
15. Caldara. Salve regina, à 3.
16. Do. Agnus, alto and tenor.
17. Do. Qui tollis, à 4.
18. Astorga. Stabat.
19. Do. Fac me.
20. Do. O quam.
21. Durante. Kyrie.
22. Do. Regina angelorum.
23. Do. Requiem æternam.
24. Do. Domine Jesu.
25. Lotti. Crucifixus, à 6.
26. Do. Qui tollis, à 4.
27. Do. Crucifixus, à 8.
28. Marcello. Udir' le orecchie, Ps. xliv, à 4.
29. Do. Et incarnatus, à 4.
30. Hasler. Pater noster, à 7.
31. H. Schütz. Selig sind die Todten, à 4.
32. Do. Chorus, Christus ist hier, à 4.
33. Do. Psalm, Was betrübst du?
34. Do. Vater unser.
35. V. Leisring. Trotz sey dem Teufel, 2 choirs, à 4.
36. Grimm. Gloria, à 5.
37. J. J. Fux. Domine Jesu, à 4.
38. Do. Tremò la terra, Coro from oratorio 'La Deposizione.'

FOURTH PERIOD (1700-1760).

1. Handel. Te Deum, in D, Gloriæ tuæ.
2. Do. He sent a thick darkness.
3. Do. He rebuked the Red Sea.
4. Do. And Israel saw.
5. Do. Behold the Lamb of God.
6. Do. He was despised.
7. Do. Thy rebuke.
8. Do. Lift up your heads.
9. Do. Hear Jacob's God.
10. Do. Zadok the Priest.
11. Christoph Bach. Ich lasse dich nicht.
12. J. S. Bach. Nimm' von uns Herr.
13. Do. Mache dich mein Geist.
14. Do. Wir setzen uns Thränen nieder.
15. Do. Wie sich ein Vater. Lobet den Herrn.
16. Zelenka. Credo.
17. Telemann. Amen. Lob und Ehre, à 8.
18. Stölzel. Gloria.
19. Homilius. Vater unser, à 4.
20. Pasterwitz. Requiem.
21. Hasse. Duet and Chorus, Le portea noi.
22. Do. Alto solo, Ad te clamamus.
23. Hasse. Miserere, and Benigni.
24. Do. Te Deum, à 4.
25. Graun. Machet die Thüre weit.
26. Do. Tu rex gloriæ, à 4.
27. Do. Freuet euch (Tod Jesu).
28. Do. Wir hier liegen. Do.
29. Rolle. Der Herr ist König.
30. Do. Welt-Richter (Tod Abel).
31. Wolf. Laus et perennis gloria, à 4.
32. Do. Des Lebens Fürsten.
33. C. P. E. Bach. Et misericordia, à 6, from Magnificat.
34. Do. Heilig, 2 choirs, à 4.
35. M. Haydn. Salvos fac nos.
36. Do. Tenebræ factæ.
37. Do. Miserere.
38. Leo. Coro, Di quanta pena. (S. Elena).
39. Do. Et incarnatus.
40. Do. Miserere; Ecce enim, à 8.
41. Jomelli. Confirma hoc Deus, 5 solos and chorus.
42. Do. Miserere.
43. Pergolesi. Eja ergo (Salve Regina).
44. Do. Qui tollis, à 6.
45. Do. Stabat Mater.

[G.]

ROCK, Michael, was appointed organist of St. Margaret's, Westminster, June 4, 1802, in succession to William Rock, junr., who had filled the office from May 24, 1774. He composed some popular glees—'Let the sparkling wine go round' (which gained a prize at the Catch Club in 1794), 'Beneath a churchyard yew,' etc. He died in March, 1809. [W.H.H.]

RODE, Pierre, a great violinist, was born at Bourdeaux, Feb. 26, 1774. When 8 years of age he came under the tuition of Fauvel aîné, a well-known violinist of his native town, and studied under him for six years. In 1788 he was sent to Paris. Here Punto (or Stich), the famous horn-player, heard him, and being struck with the boy's exceptional talent, gave him an introduction to Viotti, who at once accepted him as his pupil. With this great master he studied for two years, and in 1790 made his first public appearance, when he played Viotti's 13th Concerto at the Théâtre de Monsieur with complete success. Although then but 16 years of age, he was appointed leader of the second violins in the excellent band of the Théâtre Feydeau. In this position, appearing at the same time frequently as soloist, he remained till 1794, and then started for his first tour to Holland and the north of Germany. His success, especially at Berlin and Hamburg, was great. From the latter place he took passage to his native town. But the vessel was compelled by adverse winds to make for the English coast. So Rode came to London; but he only once appeared in public, at a concert for a charitable purpose, and left England again for Holland and Germany. Finally he returned to France and obtained a professorship of the violin at the newly established Conservatoire at Paris. In 1799 he went to Spain, and at Madrid met Boccherini, who is said to have written the orchestration for Rode's earlier concertos, especially for that in B minor. On his return to Paris in 1800 he was appointed solo-violinist to the First Consul, and it was at that period that he achieved his greatest success in the French capital. A special sensation was created by his joint performance with Kreutzer of a Duo concertante of the latter's composition. In 1803 he went with Boieldieu to Petersburg. Spohr heard him on his passage through Brunswick, and was so impressed that for a considerable time he made it his one aim to imitate his style and manner as closely as possible. Arrived at the Russian capital Rode met with a most enthusiastic reception, and was at once attached to the private music of the Emperor with a salary of 5000 roubles (about 750*l.*). But the fatigues of life in Russia were so excessive that from this period a decline of his powers appears to have set in. On his return to Paris in 1808 his reception was less enthusiastic than in former times, and even his warmest friends and admirers could not but feel that he had lost considerably in certainty of execution and vigour of style. From 1811 we find him again travelling in Germany. Spohr, who heard him in 1813 at Vienna, says in his autobiography (i. 178): 'I awaited with feverish excitement the performance of Rode, to whom ten years before I had looked up to as my highest ideal. But he had hardly finished his first solo before I thought that he had much fallen off. His playing appeared to me cold and manneristic. I missed his former boldness in the execution of technical difficulties, nor could I feel satisfied with his cantilène. The concerto also which he played appeared to me in no way equal to his 7th in A minor, and when he played his variations in E major—the same I had heard him play ten years ago—I felt sure that he had lost much of his execution; for he not only had simplified many of the difficult passages, but even in this modified form played them in a timid and uncertain manner. The audience also seemed hardly satisfied. By the incessant repetition of the same few pieces his

style had become to such a degree manneristic, as to present almost a caricature of what it used to be.'

In Vienna Rode came into contact with Beethoven, who finished the great Sonata in G, op. 96, expressly for him. It was played by Rode and the Archduke Rudolph, Beethoven's pupil, at a private concert, but as far as the violin part was concerned, not much to the composer's satisfaction. Soon afterwards, at any rate, Beethoven requested the Archduke to send the violin part to Rode that he might play it over before a second performance, and he adds: 'he will not take it amiss; certainly not! would to God there were reason to beg his pardon for doing so.'[1] Fétis's statement that Beethoven wrote a Romance for Rode, probably rests on a confusion of the G major Sonata with the Romanza in the same key.

In 1814 Rode went to Berlin, married, and remained for some time. He then retired to his native place. At a later date he made an ill-advised attempt to resume a public career. But his appearance at Paris proved a complete failure, and Mendelssohn, writing from thence in April 1825, says that he was fixed in his resolution never again to take a fiddle in hand.[2] This failure he took so much to heart, that his health began to give way, and he died at Bourdeaux, Nov. 25, 1830.

Rode was one of the greatest of all violinists. During the earlier part of his career, he displayed all the best qualities of a grand, noble, pure, and thoroughly musical style. His intonation was perfect; his tone large and pure; boldness and vigour, deep and tender feeling, characterised his performances. In fact he was no mere virtuoso, but a true artist. His truly musical nature shows itself equally in his compositions. Although his general musical education appears to have been, like that of most French violinists, deficient (we have already mentioned that Boccherini added the simple orchestration to his earlier concertos), yet his works, especially his concertos, have a noble dignified character and considerable charm of melody, while it need hardly be added, they are thoroughly suited to the nature of the violin. On the other hand, they hardly show high creative power; of thematic treatment there is very little, the form, though not unsymmetrical, is somewhat loose, and the instrumentation poor.

He published 10 concertos; 5 sets of quartets; 7 sets of variations; 3 books of duos for 2 violins, and the well-known 24 caprices.

Of his concertos, the 7th, in A minor, is still in the repertoire of some eminent violinists. The variations in G major—the same which the famous singer Catalani and other celebrated vocalists after her have made their *cheval de bataille*—still enjoy popularity. But above all, his '24 caprices or études' will always, along with Kreutzer's famous 40 caprices, hold their place as indispensable for a sound study of the violin.

[1] Thayer, Life of Beethoven, iii. p. 223.
[2] 'Die Familie Mendelssohn,' i. p. 149,

Although, owing to his life of travel, he had but few direct pupils, his influence through his example and compositions on the violinists of France, and more especially of Germany, was very great indeed. Böhm, the master of Joachim, and Eduard Rietz, the friend of Mendelssohn, both studied under him for some time. [P.D.]

RODWELL, George Herbert Bonaparte, born Nov. 15, 1800, son of Thos. Rodwell, part proprietor and manager of the Adelphi Theatre, London, and author of several dramatic pieces, was for many years music director of the Adelphi. On the death of his father, in March 1825, he succeeded to his share in the theatre. He was the composer of very many operettas and other dramatic pieces, of which the following are the principal; viz. 'The Bottle Imp' and 'The Mason of Buda' (partly adapted from Auber's 'Le Maçon'), 1828; 'The Spring Lock,' 'The Earthquake,' and 'The Devil's Elixir,' 1829; 'The Black Vulture,' 1830; 'My Own Lover,' and 'The Evil Eye,' 1832; 'The Lord of the Isles,' 1834; 'Paul Clifford' (with Blewitt), 1835; 'The Sexton of Cologne,' 1836; 'Jack Sheppard,' 1839; and 'The Seven Sisters of Munich,' 1847. In 1836 he was director of the music at Covent Garden. He was author of several farces and other dramatic pieces, amongst which were 'Teddy the Tiler' (written for Tyrone Power, and eminently successful), 'The Chimney-piece,' 'My Own Lover,' 'The Pride of Birth,' 'The Student of Lyons,' 'My Wife's out,' and 'The Seven Maids of Munich'; of three novels, 'Old London Bridge,' 'Memoirs of an Umbrella,' and 'Woman's Love'; and of 'The First Rudiments of Harmony,' 1830. He composed also two collections of songs: 'Songs of the Sabbath Eve,' and 'Songs of the Birds.' His compositions abound in pleasing melodies. He for many years persistently advocated the establishment of a National Opera. He married the daughter of Liston, the comedian; died in Upper Ebury Street, Pimlico, Jan. 22, 1852, and was buried at Brompton Cemetery. [W.H.H.]

ROECKEL, Professor Joseph Augustus, was born Aug. 28, 1783, at Neumburg vorm Wald, in the Upper Palatinate. He was originally intended for the church, but in 1803 entered the diplomatic service of the Elector of Bavaria as Private Secretary to the Bavarian Chargé d'Affaires at Salzburg. On the recall of the Salzburg Legation in 1804, he accepted an engagement to sing at the An-der-Wien Theatre at Vienna, where, March 29, 1806, he appeared as Florestan in the revival of Beethoven's 'Fidelio.'[3] In 1823 Roeckel was appointed Professor of Singing at the Imperial Opera; in 1828 he undertook the direction of the opera at Aix-la-Chapelle, and in the following year made the bold experiment of producing German operas in Paris with a complete German company. Encouraged by the success of this venture, Professor Roeckel remained in Paris until 1832, when he brought his company to

[3] For Roeckel's own account of his intercourse with Beethoven, see Thayer, vol. ii. p. 294, and vol. iii. 269.

London, and produced 'Fidelio,' 'Der Freischütz,' and other masterpieces of the German school, at the King's Theatre; the principal artists being Schröder-Devrient and Haitzinger, with Hummel (Roeckel's brother-in-law) as conductor. In 1835 he retired from operatic life, and in 1853 finally returned to Germany, where he died, at Anhalt-Cöthen, in September, 1870.

Augustus, the eldest son of the above, was born Dec. 1, 1814, at Gratz. He was joint Kapellmeister at the Dresden Opera with Richard Wagner, but being, like the latter, involved in the Revolution of 1848, he abandoned music and devoted himself entirely to politics. He died at Buda Pesth on June 18, 1876.

Edward, the second son of Professor Roeckel, was born at Trèves on Nov. 20, 1816, and received his musical education from his uncle J. N. Hummel. He came to London in 1835, and gave his first concert in 1836 at the King's Theatre. He subsequently went on a concert-tour in Germany, and performed with great success at the courts of Prussia, Saxony, Saxe-Weimar, Anhalt-Dessau, etc. In 1848 Mr. Roeckel settled in England, and resides at Bath, where he succeeded the late Henry Field. He is known as the composer of a considerable quantity of pianoforte music, and is otherwise much esteemed.

Joseph Leopold, the youngest son of Professor Roeckel, was born in London in the year 1838. He studied composition at Würzburg under Eisenhofer, and orchestration under Götze, at Weimar. Like his brother, Mr. J. L. Roeckel has settled in England, and lives at Clifton; he is well known as a teacher, and a voluminous composer of songs. His orchestral and instrumental compositions are less well known, but his cantatas 'Fair Rosamond,' 'Ruth,' 'The Sea Maidens,' 'Westward Ho,' and 'Mary Stuart,' have been received with much favour. The first of these was performed at the Crystal Palace in 1871. [W.B.S.]

RÖNTGEN, Engelbert, born Sept. 30, 1829, at Deventer in Holland, entered the Conservatorium at Leipzig in 1848; as a pupil of David's became a first-rate violinist, and in 1869 took David's place as Concertmeister in the Gewandhaus orchestra. He is now a teacher in the Conservatorium. He married a daughter of Moritz Klengel, himself Concertmeister at the Gewandhaus for many years. Their son,

Julius, was born at Leipzig May 9, 1855, and soon displayed a great gift for music. His parents were his first teachers, and he afterwards learned from Hauptmann, Richter, Plaidy and Reinecke. In 1872 he went to Munich, and remained there for some time studying counterpoint and composition under Franz Lachner. A tour with Stockhausen in 1873-4, during which he played chiefly his own compositions, launched him favourably before the world. He now lives in Amsterdam. His published works amount to 18, almost all of a serious character. They are, for the PF.—a duet for 4 hands, in 4 movements, (op. 16); two sonatas (op. 2, 10), a phantasie (op. 8); a suite (op. 7); a ballade (op. 5), a cyclus of pieces (op. 6), and a theme with variations (op. 17), etc. etc.; a sonata for PF. and violin (op. 1) and for PF. and cello (op. 3); a concerto for PF. and orchestra (op. 18); a serenade for 7 wind instruments (op. 14); 'Toskanische Rispetti,' a Liederspiel (op. 9); 9 songs (op. 15) etc. etc. The cello sonata was played at the Monday Popular Concert of Feb. 14, 1881, and was well received. [G.]

ROGEL, Jose, Spanish conductor and composer, born at Orihuela, Alicante, Dec. 24, 1829; began music under Cascales and Gil, organist and conductor of the cathedral, and made great progress, till sent to Valencia by his father to study law. The six years which he spent there were however devoted much more to music than to law, under the guidance of Pascual Perez, a musician of ability, from whom he learned composition and other branches of practical music. After completing his legal course and taking his degree at Madrid, Rogel was able to indulge his taste, plunged into music without restraint and became, or at any rate acted as, conductor and composer to several theatres. The notice of him in M. Pougin's supplement to Fétis, from which this notice is taken, enumerates no less than 61 *zarzuelas* or dramatic pieces of his composition, 14 of them in three acts, 8 in two acts, and the remainder in one act, besides a dozen not yet brought out. The titles of the pieces are of all characters, ranging from 'Revista de un muerto' and 'Un Viage de mil demonios' to 'El General Bumbum.' No criticism is given on the merits of the music, but it must at least be popular. [G.]

ROGER, Gustave Hippolite, eminent French singer, born Dec. 17, 1815, at La Chapelle-Saint-Denis, Paris. He was brought up by an uncle, and educated at the Lycée Charlemagne for the legal profession, but his studies were so neglected for an amateur theatre of which he was the leading tenor and self-constituted manager, that he was at length allowed to follow his real vocation. He entered the Conservatoire in 1836, and after studying for a year under Martin carried off the first prizes both for singing and opéra-comique. He obtained an immediate engagement, and made his début at the Opéra Comique, Feb. 16, 1838, as Georges in 'L'Eclair.' To a charming voice and distinguished appearance he added great intelligence and stage tact, qualities which soon made him the favourite tenor of the Parisian world, and one of the best comedians of the day. Ambroise Thomas composed for him 'Le Perruquier de la Régence' and 'Mina,' Halévy gave him capital parts in 'Les Mousquetaires de la Reine' and 'Le Guitarrero,' and Auber, always partial to gentlemanlike actors, secured him for 'Le Domino Noir,' 'La Part du Diable,' 'La Sirène,' and 'Haydée.' Clapisson too owed to him the success of his 'Gibby la cornemuse.' In 'Haydée' the tenor of the Théâtre Favart so distinguished himself as Lorédan that Meyerbeer declared him to be the only French artist capable of creating the part of John of Leyden. In consequence, after ten years of uninterrupted

success, Roger left the Opéra Comique for the Académie, where on April 16, 1849, he created an immense sensation with Mme. Viardot, in 'Le Prophète.' His acting was quite as good in tragedy as it had been in comedy, but his voice could not stand the wear and tear of the fatiguing *répertoire* he had now to undertake. During the next ten years however he was invaluable at the Opéra, creating new parts in the 'Enfant prodigue,' the 'Juif errant,' and many more. His best creation after John of Leyden, and his last part at the Opéra, was Hélios in David's 'Herculanum' (March 4, 1859). In the following autumn he lost his right arm while shooting, by the bursting of a gun; he reappeared with a false one, but with all his skill and bravery he could not conceal his misfortune, and found himself compelled to bid farewell to the Académie and to Paris.

He went once more to Germany, which he had been in the habit of visiting since 1850, and where he was invariably successful, partly owing to his unusual command of the language. After this he sang in the principal provincial theatres of France, and in 1861 reappeared at the Opéra Comique in his best parts, especially that of Georges Brown in 'La Dame Blanche,' but it was evident that the time for his retirement had arrived. He then took pupils for singing, and in 1868 accepted a professorship at the Conservatoire, which he held till his death, Sept. 12, 1879.

Roger was of an amiable and benevolent disposition. He talked well, wrote with ease, and was the author of the French translation to Haydn's 'Seasons,' and of the words of several romances and German Lieder. His book, 'Le Carnet d'un ténor' (Paris, Ollendorff, 1880), is a portion of his autobiography. It contains an account of his visits to England in 1847 (June), and 1848 (June—Nov.), when he sang at the Royal Italian Opera, and made an artistic tour in the provinces with Mlle. Jenny Lind, and other artists. [G.C.]

ROGERS, Benjamin, Mus. Doc., son of Peter Rogers, lay-clerk of St. George's Chapel, Windsor, was born at Windsor in 1614. He was a chorister of St. George's under Dr. Giles, and afterwards a lay-clerk there. He next became organist of Christ Church, Dublin, where he continued until the rebellion in 1641, when he returned to Windsor and obtained a lay-clerk's place there; but on the breaking up of the choir in 1644 he taught music in Windsor and its neighbourhood, and obtained some compensation for the loss of his appointment. In 1653 he composed some airs in 4 parts for violins and organ, which were presented to the Archduke Leopold, afterwards Emperor of Germany, and favourably received by him. In 1658 he was admitted Mus. Bac. at Cambridge. In 1660 he composed a 'Hymnus Eucharisticus' in 4 parts, to words by Dr. Nathaniel Ingelo, which was performed at Guildhall when Charles II. dined there on July 5.[1] About the same time he became organist of Eton College. On Oct. 21, 1662, he was reappointed a lay-clerk at St. George's, Windsor, his stipend being augmented by half the customary amount; and he also received out of the organist's salary £1 per month as deputy organist. On July 22, 1664, he was appointed Informator Choristarum and organist of Magdalen College, Oxford. On July 8, 1669, he proceeded Mus. Doc. at Oxford. In Jan. 1685 he was removed from his place at Magdalen College on account of irregularities, the College however assuring to him an annuity of £30 for life. He survived until June, 1698, on the 21st of which month he was buried at St. Peter-le-Bailey. His widow, whom the College had pensioned with two-thirds of his annuity, survived him only seven months, and was laid by his side Jan. 5, 1699.—Rogers composed much church music; four services are printed in the collections of Boyce, Rimbault, and Sir F. Ouseley; another, an Evening Verse Service in G, appears to be at Ely in MS. Some anthems were printed in 'Cantica Sacra,' 1674, and by Boyce and Page; and many others are in MS. in the books of various cathedrals and college chapels. Four glees are contained in Playford's 'Musical Companion,' 1673, and many instrumental compositions in 'Courtly Masquing Ayres,' 1662. His 'Hymnus Eucharisticus' (the first stanza of which, commencing 'Te Deum Patrem colimus,' is daily sung in Magdalen College Hall by way of grace after dinner, and is printed in the Appendix to Hawkins's History) is sung annually on the top of Magdalen tower at five in the morning of May 1. His service in D and some of his anthems, which are pleasing and melodious in character, are still sung in cathedrals. [W.H.H.]

ROGERS, John, a famous lutenist, born in London, was attached to the household of Charles II. He resided near Aldersgate, and died there about 1663. [W.H.H.]

ROGERS, Sir John Leman, Bart., born April 18, 1780, succeeded his father in the baronetcy in 1797. He became a member of the Madrigal Society in 1819, and in 1820 was elected its permanent President (being the first so appointed), and held the office until 1841, when he resigned on account of ill health. He composed a cathedral service, chants, anthems, madrigals, glees, and other vocal music. [See Hullah's Part Music, Class A, and Vocal Scores.] He was an ardent admirer of the compositions of Tallis, and by his exertions an annual service was held for several years in Westminster Abbey, the music being wholly that of Tallis. He died Dec. 10, 1847. [W.H.H.]

ROI DES VIOLONS—'King of the violins'—a title of great interest as illustrating the struggle between Art and Authority. On Sept. 14, 1321, the *ménestriers* or fiddlers of France formed themselves into a regular corporation, with a code of laws in 11 sections, which was presented to the Prevôt of Paris, and by him registered at the Châtelet. The Confraternity, founded by 37 *jongleurs* and *jongleresses*, whose names have been

[1] This hymn was different from that, bearing the same title, which Rogers afterwards set for Magdalen College, Oxford.

preserved, prospered so far as in 1330 to purchase a site and erect on it a hospital for poor musicians. The building was begun in 1331, finished in 1335, and dedicated to St. Julien and St. Genest. The superior of this 'Confrérie of St. Julien des ménétriers' was styled 'king,' and the following were 'Rois des ménétriers' in the 14th century:—Robert Caveron, 1338; Copin du Brequin, 1349; Jean Caumez, 1387; and Jehan Portevin, 1392.

In 1407 the musicians, vocal and instrumental, separated themselves from the mountebanks and tumblers who had been associated with them by the statutes of 1321. The new constitution received the sanction of Charles VI., April 24, 1407, and it was enacted that no musician might teach, or exercise his profession, without having passed an examination, and been declared *suffisant* by the 'Roi des ménestrels' or his deputies. These statutes continued in force down to the middle of the 17th century. History however tells but little about the new corporation. The only 'rois' whose names have been preserved in the charters are—Jehan Boissard, called Verdelet, 1420; Jehan Facien, the elder, and Claude de Bouchardon, oboes in the band of Henri III, 1575; Claude Nyon, 1590; Claude Nyon, called Lafont, 1600; François Rishomme, 1615; and Louis Constantin, 'roi' from 1624 to 1655. Constantin, who died in Paris 1657, was a distinguished artist, violinist to Louis XIII., and composer of pieces for strings in 5 and 6 parts, several of which are preserved in the valuable collection already named under PHILIDOR.

In 1514 the title was changed to 'roi des ménestrels du royaume.' All provincial musicians were compelled to acknowledge the authority of the corporation in Paris, and in the 16th century branches were established in the principal towns of France under the title of 'Confrérie de St. Julien des ménétriers.' In Oct. 1658, Louis XIV. confirmed Constantin's successor, Guillaume Dumanoir I., in the post of 'Roi des violons, maîtres à danser, et joueurs d'instruments tant haut que bas,' ordaining at the same time that the 'Roi des violons' should have the sole privilege of conferring the mastership of the art throughout the kingdom; that no one should be admitted thereto without serving an apprenticeship of 4 years, and paying 60 livres to the 'roi,' and 10 livres to the masters of the Confrérie; the masters themselves paying an annual sum of 30 sous to the corporation, with a further commission to the 'roi' for each pupil. The masters alone were privileged to play in taverns and other public places, and in case this rule were infringed, the 'roi' could send the offender to prison and destroy his instruments. This formidable monopoly extended even to the King's band, the famous '24 violons,' who were admitted to office by the 'roi' alone on payment of his fee. [See VINGT QUATRE VIOLONS.]

So jealously did Guillaume Dumanoir I. guard his rights, that in 1662 he commenced an action against 13 dancing-masters, who, with the view of throwing off the yoke of the corporation, had obtained from Louis XIV. permission to found an 'Académie de danse.' The struggle gave rise to various pamphlets,[1] and Dumanoir was beaten at all points. He bequeathed a difficult task to his son Michel Guillaume Dumanoir II., who succeeded him as 'roi' in 1668, and endeavoured to enforce his supremacy on the instrumentalists of the Académie de Musique, but, as might have been expected, was overmatched by Lully. After his difficulties with the director of the Opéra, Dumanoir II., like his father, came into collision with the dancing-masters. In 1691 a royal proclamation was issued by which the elective committee was abolished, and its place filled by hereditary officials, aided by four others appointed by purchase. Against this decree the corporation and the 13 members of the Académie de danse protested, but the Treasury was in want of funds, and declined to refund the purchase money. Finding himself unequal to such assaults Dumanoir resigned in 1693, and died in Paris in 1697. He delegated his powers to the privileged committee of 1691, and thus threw on them the onus of supporting the claims of the Confrérie over the clavecinists and organists of the kingdom; a parliamentary decree of 1695, however, set free the composers and professors of music from all dependence on the corporation of the *ménétriers*. This struggle was several times renewed. When Pierre Guignon (born 1702, died 1775), a good violinist, and a member of the King's chamber-music, and of the Chapel Royal, attempted to reconstitute the Confrérie on a better footing, it became evident that the musicians as a body were determined to throw off the yoke of the association. Guignon was appointed 'Roi des violons' by letters patent, June 15, 1741, was installed in 1742, and in 1747 endeavoured to enforce certain new enactments, but a parliamentary decree of May 30, 1750, put an end to his pretended authority over clavecinists, organists, and other serious musicians. The corporation was maintained, but its head was obliged to be content with the title of 'Roi et maître des ménétriers, joueurs d'instruments tant haut que bas, et hautbois, et communauté des maîtres à danser.' Roi Guignon still preserved the right of conferring on provincial musicians the title of 'lieutenants généraux et particuliers' to the 'roi des violons,' but even this was abrogated by a decree of the Conseil d'Etat, Feb. 13, 1773. The last 'roi des violons' at once resigned, and in the following month his office was abolished by an edict of the King dated from Versailles.

This hasty sketch of a difficult subject may be supplemented by consulting the following works: 'Abrégé historique de la Ménestrandie' (Versailles, 1774, 12mo); 'Statuts et réglements des maîtres de danse et joueurs d'instruments . . . registrés au Parlement le 22 Août 1659' (Paris,

[1] Of these the principal are 'Etablissement de l'Académie royale de dance [*sic*] en la ville de Paris, avec un discours Académique pour prouver que la dance, dans sa plus noble partie, n'a pas besoin des instruments de musique, et qu'elle est en tout absolument indépendante du violon' (Paris, 1663, 4to), and 'Le mariage de la musique et de la dance, contenant la réponce [*sic*] au livre des treize prétendus academiciens touchants ces deux arts' (Paris, 1664, 12mo).

1753); 'Recueil d'édits, arrêts du Conseil du roi, lettres patentes, . . . en faveur des musiciens du Royaume' (Ballard, 1774, 8vo); and 'Les Instruments à archet' by A. Vidal (i. and ii. Paris, 1876, 77; 4to), which last contains nearly all the necessary information. [G. C.]

ROKITANSKY, Victor, Freiherr von, of Hungarian origin, the son of a celebrated physician at Vienna, where he was born, July 9, 1836. He studied singing chiefly at Bologna and Milan. He first appeared in England at concerts in 1856. In 62 he made his début at Prague in 'La Juive,' and fulfilled a very successful engagement there of two years. In 63 he made a few appearances at Vienna, and in 64 obtained an engagement there, and has been a member of the opera company ever since. His voice is a basso-profondo of great compass and volume, very equal in all its range; he has a commanding presence, and is an excellent actor. His operas include La Juive, Robert le Diable, Les Huguenots, Don Juan, Zauberflöte, Guillaume Tell, Le Prophète, Aïda, Faust, Medea, and Wagner's operas.

On June 17, 65, he reappeared in London at Her Majesty's as Marcel with very great success, and then sang there for four consecutive seasons, and was greatly esteemed. He played with success as Rocco, Sarastro, Leporello, Il Commendatore, Oroveso, Falstaff, Osmin (June 30, 66, on production in Italian of Mozart's 'Entführung'), and Padre Guardiano in 'La Forza del Destino.' He returned for the seasons of '76 and '77 in some of his old parts, and played for the first time the King in 'Lohengrin,' and Giorgio in 'I Puritani.'

From 1871 to 1880 he filled the post of Professor of Singing at the Conservatorium of Vienna, but has now relinquished that position for private tuition, where he employs the Italian method which has formed the basis of his own great success. [A.C.]

ROLLA, Alessandro, violinist and composer, born at Pavia, April 6, 1757. He first studied the pianoforte, but soon exchanged it for the violin, which he learned under Renzi and Conti. He had also a great predilection for the viola, and wrote and performed in public concertos for that instrument. For some years he was leader of the band at Parma, and it was there that Paganini was for some months his pupil. [See Paganini.] In 1802 he went to Milan as leader and conductor of the opera at La Scala, in which position he gained a great reputation. He was also for many years a professor at the Conservatorio of Milan, and died in that town, September 15, 1841, aged 84. His compositions, now entirely forgotten, had considerable success in their time; they consist of a large number of violin duets, some trios, quartets and quintets for stringed instruments, and concertos for the violin and for the viola. His son and pupil, Antonio, violinist, was born at Parma, April 18, 1798; from 1823 till 1835 was leader of the Italian Opera band at Dresden, and died there, May 19, 1837. He published concertos and other solo pieces for the violin. [P.D.]

ROLL-CALL. [See Signals.]

ROLLE. A German musical family. The father was town musician of Quedlinburg and of Magdeburg in 1721, and died there in 1752. Of his three sons, Christian Carl, born at Quedlinburg in 1714, was Cantor of the Jerusalem Church, Berlin, but was apparently of no account. He had sons, of whom Friedrich Heinrich left a biography of his father; while Christian Carl (the younger) succeeded him as Cantor. 2. A second son is mentioned, but not named. 3. The third, Johann Heinrich, was born at Quedlinburg, December 23, 1718, and at an early age began to play and to write. He got a good general education at the High School in Leipzig, and migrated to Berlin in hopes of some legal post; but this failing he adopted music as his career, and entered the Court chapel of Frederick the Great as a chamber musician. There he remained till 1746, and then took the organist's place at St. John's, Magdeburg. On the death of his father he stepped into his post as town-musician, worked there with uncommon zeal and efficiency, and died at the age of 67, December 29, 1785.—His industry seems almost to have rivalled that of Bach himself. He left several complete annual series of church music for all the Sundays and Festivals; cantatas for Easter, Whitsuntide, and Christmas, of which many are in the Royal Library at Berlin; 5 Passions, and at least 60 other large church compositions. Besides these there exist 21 large works of his, of a nature between oratorio and drama, such as 'Saul, or the power of Music,' 'Samson,' 'David and Jonathan,' 'The Labours of Hercules,' 'Orestes and Pylades,' 'Abraham on Moriah,' 'The Death of Abel,' etc. The last two were for many years performed annually at Berlin, and were so popular that the editions had to be renewed repeatedly. In addition to these he left many songs and compositions for organ, orchestra, and separate instruments. All have now as good as perished; but those who wish to know what kind of music they were will find a specimen in Hullah's 'Vocal scores,' 'The Lord is King.' It has a good deal of vigour, but no originality or character. Others are given in the Collections of Sander and Rochlitz, and a set of twenty motets for 4 voices was published at Magdeburg by Rebling (1851–66.) [G.]

ROMANCE (Germ. *Romanze*). A term of very vague signification, answering in music to the same term in poetry, where the characteristics are rather those of personal sentiment and expression than of precise form. The Romanze in Mozart's D minor PF. Concerto differs (if it differs) from the slow movements of his other Concertos in the extremely tender and delicate character of its expression; in its form there is nothing at all unusual: and the same may be said of Beethoven's two Romances for the violin and orchestra in G and F (op. 40 and 50), and of Schumann's 'Drei Romanzen' (op. 28). Schumann has also affixed

the title to 3 movements for oboe and PF. (op. 94), and to a well-known piece in D minor (op. 32, no. 3), just as he, or some one of his followers, has used the similar title, 'in Legendenton.' The Romance which forms the second movement of his symphony in D minor, is a little poem full of sentimental expression.

In vocal music the term is obviously derived from the character or title of the words. In English poetry we have few 'romances,' though such of Moore's melodies as 'She is far from the land where her young hero sleeps' might well bear the title. But in France they abound, and some composers (such as Puget and Panseron) have derived nine-tenths of their reputation from them. 'Partant pour la Syrie' may be named as a good example, well known on this side the water. Mendelssohn's 'Songs without Words' are called in France 'Romances sans Paroles.' [G.]

ROMANI, Felice, a famous Italian littérateur, born at Genoa, January 31, 1788. He was educated for the law, but soon forsook it for more congenial pursuits, and was in early life appointed to the post of poet to the royal theatres, with a salary of 6000 lire. The fall of the French government in Italy drove him to his own resources. He began with a comedy, 'L'Amante e l'Impostore,' which was very successful, and the forerunner of many dramatic pieces. But his claim to notice in a dictionary of music rests on his opera-librettos, in which he was for long the favourite of the Italian composers. For Simone Mayer he wrote 'Medea' (1812), 'La Rosa bianca e la Rosa rossa,' and others; for Rossini, 'Aureliano in Palmira,' and 'Il Turco in Italia'; for Bellini, 'Bianca e Faliero,' 'La Straniera,' 'La Sonnambula,' 'Il Pirata,' 'Norma,' 'I Capuletti,' and 'Beatrice di Tenda'; for Donizetti, 'Lucrezia,' 'Anna Bolena,' 'L'Elisir d'amore,' and 'Parisina'; for Mercadante, 'Il Conte d'Essex'; for Ricci, 'Un Avventura di Scaramuccia'; and many others, in all fully a hundred. As editor for many years of the 'Gazzetta Piemontese,' he was a voluminous writer.

In the latter part of his life he became blind, and was pensioned by government, and spent his last years in his family circle at Moneglia, on the Riviera, where he died full of years and honours, January 28, 1865. [G.]

ROMANO, Alessandro—known under the name of Alessandro della Viola—a composer and performer on the viola, was born at Rome about the year 1530. He was an ecclesiastic, and a member of the order of Monte Oliveto. His published works (according to Fétis) are—two books of Canzoni Napolitane for 5 voices (Venice, 1572 and 1575); a set of motets in 5 parts (Venice, 1579). A 5-part madrigal by him, 'Non pur d'almi splendori,' is published in the 'Libro terzo delle Muse' (Venice, Gardano, 1561). [P.D.]

ROMANTIC is a term which, with its antithesis Classical, has been borrowed by music from literature. But so delicate and incorporeal are the qualities of composition which both words describe in their application to music, and so arbitrary has been their use by different writers, that neither word is susceptible of very precise definition. The best guide, however, to the meaning of 'romantic' is supplied by its etymology. The poetic tales of the middle ages, written in the old Romance dialects, were called Romances. In them mythological fables and Christian legends, stories of fairyland, and adventures of Crusaders and other heroes of chivalry, were indiscriminately blended, and the fantastic figures thus brought together moved in a dim atmosphere of mystic gloom and religious ecstasy. These mediæval productions had long been neglected and forgotten even by scholars, when, about the close of the last century, they were again brought into notice by a group of poets, of whom the most notable were the brothers August Wilhelm and Friedrich von Schlegel, Ludwig Tieck, and Friedrich Novalis. They set themselves to rescue the old romances from oblivion, and to revive the spirit of mediæval poetry in modern literature by the example of their own works. Hence they came to be called the Romantic School, and were thus distinguished from writers whose fidelity to rules and models of classic antiquity gave them a claim to the title of Classical.

It was not long before the term Romantic was introduced into musical literature; and it was understood to characterise both the subjects of certain musical works and the spirit in which they were treated. Its antithetical significance to the term Classical still clung to it; and regard to perfection of form being often subordinated by so-called romantic composers to the object of giving free play to the imaginative and emotional parts of our nature, there grew up around the epithet Romantic the notion of a tendency to depart more or less from the severity of purely classical compositions. But, in truth, no clear line divides the romantic from the classical. As we shall endeavour to show, the greatest names of the Classical school display the quality of romanticism in the spirit or expression of some of their works, while, on the other hand, the compositions of the Romantic school are frequently marked by scrupulous adherence to the forms of traditional excellence. Again, as the associations of the word Classical convey the highest meed of praise, works at first pronounced to be romantic establish, by general recognition of their merit, a claim to be considered classical. What is 'romantic' to-day may thus grow, although itself unchanged, to be 'classical' to-morrow. The reader will thus understand why, in Reichardt's opinion, Bach, Handel and Gluck were classical, but Haydn and Mozart romantic; why later critics, in presence of the fuller romanticism of Beethoven, placed Haydn and Mozart among the classical composers; and why Beethoven himself, in his turn, was declared to be classical.

The propriety of applying the term Romantic to operas whose subjects are taken from romantic

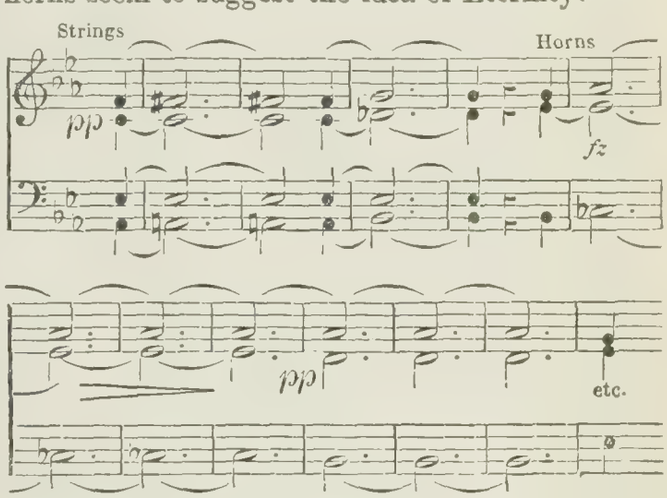
literature, or to songs where music is set to romantic words, will not be questioned. And from such works it is easy to select passages which present romantic pictures to the mind, as, for instance, the Trumpet passage on the long B♭ in the bass in the great Leonore overture, or the three Horn notes in the overture to 'Oberon,' or the three Drum notes in the overture to 'Der Freischütz.' But in pure instrumental music the marks of romanticism are so fine, and the recognition of them depends so much on sympathy and mental predisposition, that the question whether this or that work is romantic may be a subject of interminable dispute among critics. Sometimes the only mark of romanticism would seem to be a subtle effect of instrumentation, or a sudden change of key, as in the following passage from the Leonore Overture:—

Another example from Beethoven is supplied by the opening bars of the PF. Concerto in G major, where after the solo has ended on the dominant the orchestra enters *pp* with the chord of B major, thus—

The whole of the Slow Movement of this Concerto is thoroughly romantic, but perhaps that quality is most powerfully felt in the following passage:—

Yet so subtle is the spell of its presence here that it would be difficult to define where its intense romanticism lies, unless it be in the abrupt change both in key (A minor to F major), and in the character of the phrase, almost forcing a scene, or recollection, or image, upon the hearer. Indeed, to romantic music belongs in the highest degree the power of evoking in the mind some vivid thought or conception—as for instance, in this passage from the Adagio of the 9th Symphony:—

where the transition into D♭ seems to say, 'Vanitas vanitatum, omnia vanitas'; and again in the Eroica, where at the end of the Trio, the long holding notes and peculiar harmony in the horns seem to suggest the idea of Eternity:—



Many more illustrations might be taken from Beethoven's works, and never has the romantic spirit produced more splendid results than in his five last Sonatas and in his Symphony No. 7. But with regard to our choice of examples we must remind the reader that, where the standpoint of criticism is almost wholly subjective, great diversities of judgment are inevitable.

It was not until after the appearance of the works of Carl Maria von Weber, who lived in close relation with the romantic school of literature, and who drew his inspirations from their writings, that critics began to speak of a 'romantic school of music.' Beethoven had by this time been accepted as classical, but in addition to Weber himself, Schubert, and afterwards Mendelssohn, Schumann, and Chopin were all held to be representatives of the romantic school. Widely as the composers of this new school differed in other respects, they were alike in their susceptibility to the tone of thought and feeling which so deeply coloured the romantic literature of their time. None of them were strangers to that weariness, approaching to disgust, of the actual world around them, and those

yearnings to escape from it, which pursued so many of the finest minds of the generations to which they belonged. To men thus predisposed, it was a relief and delight to live in an ideal world as remote as possible from the real one. Some took refuge in mediæval legends, where no border divided the natural from the supernatural, where the transition from the one to the other was as delicate and yet as real as that in the passage quoted from Beethoven's Overture, and where nothing could be incongruous or improbable; some in the charms and solitudes of nature; and others in the contemplation of peace and beatitude beyond the grave. But in all there was the same impatience of the material and mundane conditions of their existence, the same longing to dwell in the midst of scenes and images which mortals could but dimly see through the glass of religious or poetic imagination. As might have been expected of works produced under such influences, indistinctness of outline was a common attribute of compositions of the romantic school. The hard, clear lines of reality were seldom met with in them, and the cold analysis of pure reason was perpetually eluded. It was equally natural that the creations of minds withdrawn from contact with the actual world and wrapt in the folds of their own fancies, should vividly reflect the moods and phases of feeling out of which they sprang—that they should be, in short, intensely subjective. Nor was it surprising that when impatience of reality, indistinctness of outline, and excessive subjectivity co-existed, the pleasures of imagination sometimes took a morbid hue. Such conditions of origin as we have been describing could not fail to affect the forms of composition. It was not that the romanticists deliberately rejected or even undervalued classic models, but that, borne onward by the impulse to give free expression to their own individuality, they did not suffer themselves to be bound by forms, however excellent, which they felt to be inadequate for their purpose. Had the leaders of the romantic school been men of less genius, this tendency might have degenerated into disregard of form; but happily in them liberty did not beget license, and the art of music was enriched by the addition of new forms. 'The extremes,' says Goethe, speaking of the romantic school of literature, 'will disappear, and at length the great advantage will remain that a wider and more varied subject-matter, together with a freer form, will be attained.' Goethe's anticipations were equally applicable to music.

Among masters of the romantic school, Weber stands second to none. In youth he surrendered himself to the fascination of literary romanticism, and this early bias of his mind was confirmed in later years by constant intercourse at Dresden with Holtei, Tieck, E. T. A. Hoffmann, and other men of the same cast of thought. How exclusively the subjects of Weber's operas were selected from romantic literature, and how the 'Romantic Opera,' of which Germany has so much reason to be proud, owed to him its origin and highest development, although the names of Spohr,[1] Marschner, Lindpaintner, and others are justly associated with it, are points on which we need not linger, as they are fully discussed in the article on OPERA. Neither is it necessary to repeat what has been said in the article on ORCHESTRATION of the romantic effects which Weber could produce in his instrumentation. Never, even in the least of his pianoforte works, did he cease to be romantic.

Though Weber holds the first place in the opera of the romantic school, he was excelled in other branches of composition by his contemporary, Franz Schubert. Pure and classic as was the form of Schubert's symphonies and sonatas, the very essence of romanticism is disclosed in them by sudden transitions from one key to another (as in the first movement of the A minor Sonata, op. 143), and by the unexpected modulations in his exquisite harmony. That wealth of melody, in which he is perhaps without a rival, was the gift of romanticism. It gave him also a certain indefiniteness and, as it were, indivisibility of ideas, which some critics have judged to be a failing, but which were in fact the secret of his strength, because they enabled him to repeat and develope, to change and then again resume his beautiful *motifs* in long and rich progression, without pause and without satiety. None have known, as he knew, how to elicit almost human sounds from a single instrument—as for instance, in the well-known passage for the horn in the second movement of the C major Symphony, of which Schumann said that 'it seems to have come to us from another world.' Many glorious passages might be pointed out in this Symphony, the romanticism of which it would be difficult to surpass; for instance, the second subject in the first movement, the beginning of the working out in the Finale, etc. etc. And the complete success with which he produced entirely novel effects from the whole orchestra is the more astonishing when we remember that few of his orchestral works were ever performed in his lifetime. In 'Song' Schubert stands alone, while Schumann and Robert Franz come nearest to him. Even from boyhood he had steeped his soul in romantic poetry; and so expressive was the music of his songs that they required no words to reveal their deeply romantic character. Few were the thoughts or feelings which Schubert's genius was unable to express in music. 'He was' (to quote Schumann again) 'the deadly enemy of all Philistinism, and after Beethoven the greatest master who made music his vocation in the noblest sense of the word.'

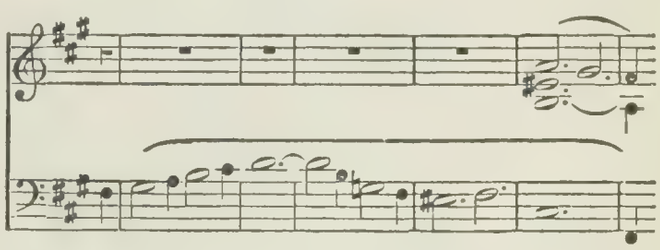
Schumann's own enmity to Philistinism was not less deadly than that of Schubert, and romanticism was its root in both men. So strongly did Schumann resent the popularity of Herz, Hünten, and other Philistines, whose works were in vogue about the year 1830, that he founded

[1] Spohr's claim to priority of invention of the Romantic opera is discussed in OPERA, vol. ii. p. 520 *b*.

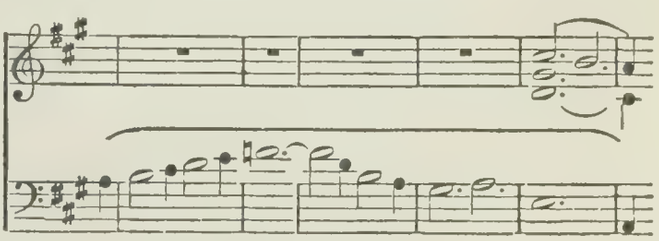
the 'Davidsbund' to expose the hollowness of their pretensions. And equally dissatisfied with the shallow and contracted views of the musical critics of that day, he started his 'Neue Zeitschrift für Musik' to vindicate the claims of music to freedom from every limitation, except the laws of reason and of beauty. Even in childhood Schumann was an eager reader of romantic literature, and the writings of Hoffmann and Jean Paul never lost their charm for him. He told a correspondent that if she would rightly understand his 'Papillons,' op. 2, she must read the last chapter of Jean Paul's 'Flegeljahre'; and from Hoffmann he borrowed the title of 'Kreisleriana.' It was not however the imaginary sufferings of Dr. Kreissler, but the real deep sorrows of Schumann's own soul which expressed themselves in these noble fantasias. Though perfect in form, they are thoroughly romantic in thought and spirit. Not less romantic were the names he gave to his pianoforte pieces. These names, he said, were scarcely necessary—'for is not music self-sufficing? does it not speak for itself?'—but he admitted that they were faithful indexes to the character of the pieces. The clearest tokens of the same source of inspiration may be found in his Fantasie, op. 17, which bears as its motto a verse from Schlegel. In the last part a deeply moving effect is produced by the abrupt change of key in the arpeggios from the chords of C to A and then to F. But changes of key were not his only resource for the production of romantic effects. Excepting Beethoven, none have illustrated the power of rhythm so well as Schumann. He often imparts a strange and entirely novel significance to commonplace or familiar phrases by syncopated notes, by putting the emphasis on the weak part of the bar, or by accents so marked as to give the impression of a simultaneous combination of triple and common time. These strong and eccentric rhythms appear in all his works; and the frequent directions *Marcato assai* or *Molto marcato* show what stress he laid upon emphasis. The influence of Jean Paul may be traced also in Schumann's sometimes grave and sometimes playful humour. Many of his pianoforte pieces are marked *mit Humor* or *mit vielem Humor*. And in this respect he is inferior only to Beethoven, of whose 'romantic humour' he so often speaks in his 'Gesammelte Schriften.' The romantic bias of Schumann's mind was not less evident in his treatment of Oriental subjects. The colouring of his 'Paradise and the Peri,' and of his 'Oriental Pictures' (Bilder aus Osten), is vividly local. And of his songs we may cite the 'Waldesgespräch' (Op. 39, No. 3) as an example of the purest essence of romance. Full as the poem is in itself of romantic feeling and expression, the music interprets the words, rather than the words interpret the music.

The romantic spirit found a less congenial abode in the happy, equable disposition, and carefully disciplined imagination of Mendelssohn; but his genius was too sensitive and delicate to remain unaffected by the main currents of his age.[1] Take, for example, the first four chords in the overture to 'A Midsummer Night's Dream.' And could it indeed be possible to illustrate Shakespeare's romantic play in music with fuller success than Mendelssohn has done? The overtures 'The Hebrides,' 'The Lovely Melusine,' and 'Calm Sea and Prosperous Voyage,' are likewise full of the brightest qualities of romanticism.

Not unlike Mendelssohn was William Sterndale Bennett; and the points of resemblance between them were strict regard to form, clearness of poetic thought, and cultivated refinement of taste. Romantic too Bennett certainly was; as may at once be seen in his overtures, 'The Naiads' and 'The Wood Nymphs.' So tranquil, clear and perfect in detail are most of Bennett's compositions, so delicate was the touch which fashioned them, that they have been likened to the landscapes of Claude Lorraine: and in illustration of what is meant, we may mention his 'Three Musical Sketches,' op. 10 ('The Lake, the Millstream and the Fountain'). Yet there were rare moments when Bennett's habitual reserve relaxed, and the veil was lifted from his inner nature. To the inspiration of such moments we may ascribe parts of his G minor Symphony, and above all his beautiful 'Paradise and the Peri' overture. His 'Parisina' overture betrays the latent fire which burned beneath a wontedly calm surface, and many romantic passages might be pointed out in it. One such is to be found at the beginning of the working out, where the theme, which before was in F♯ minor and the very soul of melancholy—



is now given in A major, the C♯ of the cadence seeming for the moment to brighten it as with the inspiration of hope—



Notice of the modern German composers on whom the stamp of Schumann is so unmistakeable, would lead us too far. Wagner we pass by, because he can hardly be counted among the followers of the romantic school, and we could not, within the limits of this article, show the points wherein he differs from former romanticists;

[1] In describing to Reichardt's daughter the success of her father's 'Morgengesang' at the Rhine Festival, Mendelssohn adds: 'at the words *Und schlich in dieser Nacht* the music becomes so romantic and poetical that every time I hear it, I am more touched and charmed.'

but mention is made under ORCHESTRATION of some of the beautiful and truly romantic effects which he knows how to produce in his instrumentation. [See also OPERA and WAGNER.] We may however designate one of the greatest living composers as one of the greatest living romanticists; and it is no disparagement to the individuality of Johannes Brahms to say that he is in many respects the disciple of Schubert and Schumann. The romanticism of such productions as the beautiful romances from Tieck's 'Magelone' (op. 33) or the cantata 'Rinaldo' (op. 50) is of course visible at a glance, but Brahms's romanticism generally lies too deep to be discovered without attentive and sympathetic study. As a rule, he is more concerned to satisfy the judgment than kindle the imagination, more anxious to move the heart than please the ear. Close observation will often find an adequate reason and justification for seeming harshnesses in Brahms's works, and reflective familiarity with them will, in the same way, surely discover the genuine romantic spirit in passages where its presence would wholly escape the unpractised eye and ear.

Chopin holds a solitary position in romantic art. No school can claim him wholly for its own, and the best poetic gifts of the French, German, and Sclavonic nationalities were united in him. Chopin, says Liszt, refused to be bound by deference to rules which fettered the play of his imagination, simply because they had been accepted as classical. But the classic training and solid studies of his youth, combined with his exquisite taste and innate refinement, preserved him from abuse of the liberty which he was determined to enjoy. The mental atmosphere of his life in Paris may be felt in his works. In hatred of whatever was commonplace and ordinary, he was one with the French romantic school; but unlike them he would allow nothing, whose only merit was originality, to stand in his compositions. Beauty there must always be to satisfy him; and he would have recoiled from the crudities and barbarisms which disfigure some works of the French romantic period. So uniformly romantic was Chopin in every stage of his career, that it would be impossible to illustrate this quality of his music by extracts.

The French romantic school of literature was of later date than the German, and was considerably affected by it. The general features of the two schools were very similar, but the French authors wrote even more than the German in the mediæval and mystic vein, and were more prone to unhealthy exaggeration. In France, moreover, the antagonism between the romantic and classical schools was carried to a pitch which had no parallel in Germany. The completeness and universality of the empire which classic example and tradition had gained over the educated public of France, intensified the revolt against them, when at last it arrived. The revolt was as widespread as it was uncompromising: there was not a field of art or literature in which the rebel flag of the new school was not unfurled, and a revolutionary temper, inflamed perhaps by the political storms of that time, was manifest in all that they did. In the false simplicity and sickly sentimentality, in the stilted diction and threadbare forms of expression affected by the reigning school, the insurgent authors had indeed much to provoke them. But in the vehemence of their reaction against such faults they were apt to fall into an opposite extreme; and thus, finish of form, clearness of outline, and coherent sequence of thought are too often absent from their works.

With respect to music, Berlioz is the typical name of the renaissance of 1830; but Liszt, on whom the French school exercised so strong an influence, may be associated with him. So far were these composers and their countless followers borne by the revolutionary impulse, that they did not shrink at times from a total rejection of the old traditional forms in their instrumental music; but it cannot be said that very valuable results were obtained by their hardihood. They chose indeed romantic subjects for musical representation, as Weber and Schumann had done, but there the resemblance ceased. They aimed not, as the earlier masters did, to reproduce the feelings stirred in them by external objects, but rather to present the objects themselves to the minds of an audience; and an undoubted loss of romantic effect was the consequence of their innovation. But while we cannot acquit the younger romanticists of the charge of an excessive realism, which too readily sacrificed artistic beauty to originality and vivid representation, nor deny the frequent obscurity and incoherence of their compositions, we are unable to acquiesce in the imputation so often fastened upon them that their romanticism was merely the veil of ignorance, and that they violated rules because they knew no better. As a matter of fact, even those among them who pushed extravagance to the farthest point were thorough masters of the strictest rules and severest forms of musical composition.

To sum up, in conclusion, our obligations to the romantic school, we must acknowledge that they saved music from the danger with which it was at one time threatened of being treated as an exact but dry and cold science; that they gave it a freer and more elastic form; that they developed the capabilities and technique of various instruments; that being themselves always filled with a deep reverence for their own art they rescued from unmerited neglect some of the finest works of earlier composers; and that by their own genius and labour they have added many a noble masterpiece to the treasures of music.[1] [A.H.W.]

M. v. Weber'; Hoffmann, 'Kreisleriana'; Gautier, 'Histoire du Romantisme'; N. Zeitschrift f. Musik, 1834-1839; Riehl, 'Charakterköpfe'; Brockhaus, 'Conversationslexicon'; Eckermann, 'Gespräche mit Goethe'; Mendel, 'Lexicon'; Brendel, 'Geschichte der Musik'; Marx, 'Musik des Neunzehnten Jahrhunderts'; Köstlin, 'Geschichte der Musik'; Weitzmann, 'Geschichte des Clavierspiels'; Reissmann, 'Von Bach bis Wagner'; Letters from Dr. Zopff and Dr. Ludwig.

ROMBERG. One of those musical families of whom, from the Bachs downwards, so many are encountered in Germany. The founders were ANTON and HEINRICH, a pair of inseparable brothers, who dressed alike, and lived together in Bonn. They were still alive in 1792. Another ANTON, a bassoon-player, born in Westphalia in 1745, lived at Dinklage (Duchy of Oldenburg), gave concerts at Hamburg, and died in 1812, living long enough to play a concerto for two bassoons with his youngest son ANTON, born 1777. His eldest son, BERNHARD, born Nov. 11, 1767, at Dinklage, is justly regarded as head of the school of German violoncellists. When only fourteen he attracted considerable attention in Paris during a visit there with his father; from 1790 to 1793 he was in the band of the Elector of Cologne at Bonn, at the same time with Ferdinand Ries, Reicha and the two Beethovens. During the French invasion he occupied himself in a professional tour in Italy, Spain, and Portugal, and was well received, especially in Madrid, where Ferdinand VII. accompanied him on the violin. His cousin Andreas went with him, and on their return through Vienna late in 1796, they gave a concert at which Beethoven played (Thayer, ii. 16). After his return Bernhard married Catherine Ramcke at Hamburg. From 1801 to 1803 he was a professor in the Paris Conservatoire, and we next find him in the King's band at Berlin. Spohr (Autob. i. 78) met him there at the end of 1804, and played quartets with him. Perhaps the most remarkable fact he mentions is that after one of Beethoven's early quartets (op. 18) Romberg asked how Spohr could play 'such absurd stuff' (*barockes Zeug*). It is of a piece with the well-known anecdote of his tearing the copy of the first Rasoumowsky quartet from the stand and trampling on it.

The approach of the French forces in 1806 again drove Romberg on the world, and in 1807 he was travelling in South Russia, but returned to Berlin, and was Court-Capellmeister till 1817, when he retired into private life at Hamburg. In 1822 he went to Vienna, in 1825 to St. Petersburg and Moscow, and in 1839 to [1] London, and Paris, where his Method for the cello (Berlin, Trautwein, 1840) was adopted by the Conservatoire. He died at Hamburg, August 13, 1841.

The great importance of B. Romberg both as composer and executant arises from the fact that he materially extended the capabilities of the violoncello. His celebrated concertos may be said to contain implicitly a complete theory of cello playing, and there are few passages known to modern players the type of which may not be found there. Probably no better knowledge of the fingerboard could be gained than by studying these concertos. Although they are now seldom played in public, being somewhat too old-fashioned to hit the taste of modern artists and audiences, they are yet of considerable merit as compositions, and contain passages of distinct grace and charm. There is probably no means now of learning at first hand what Romberg's own playing was like. But it may be gathered from the character of his compositions, that his tone was not so full and powerful as that of artists who confined themselves more to the lower register of the instrument, and to passages of less complication. As an indication that this view agrees with that which prevailed during his lifetime, we find him for instance spoken of as follows by a correspondent of the Allgemeine Musikalische Zeitung for 1817, who had heard him play at Amsterdam:—'The visit of B. Romberg had long been eagerly looked for. The immense reputation which preceded him, caused his first concert to be crowded to excess. He played a concerto (die Reise auf den Bernhardsberg) and a capriccio on Swedish national airs. In regard to the perfection and taste of his performance, to the complete ease and lightness of his playing, our great expectations were far exceeded—but not so in respect of tone—this, especially in difficult passages, we found much weaker than the powerful tone of our own Rauppe, and indeed scarcely to compare with it.' At a second concert Romberg played his well-known Military Concerto, and the same view was reiterated.

Bernhard Romberg composed cello solos of various kinds; string quartets; PF. quartets; a funeral symphony for Queen Louise of Prussia; a concerto for 2 cellos (Breitkopf & Härtel), his last work; and operas—'Die wiedergefundene Statue,' words by Gozzi von Schwick (1790), and 'Der Schiffbruch' (1791, Bonn), 'Don Mendoce,' with his cousin Andreas (Paris), 'Alma,' 'Ulysses und Circe' (July 27, 1807), and 'Rittertreue,' 3 acts (Jan. 31, 1817, Berlin). His son KARL, also a cellist, born at St. Petersburg Jan. 17, 1811, played in the court-band there from 1832 to 1842, and afterwards lived at Vienna.

Anton Romberg the younger had a brother GERHARD HEINRICH, born 1748, a clarinet-player, and Musikdirector at Münster, who lived with him for some time at Bonn, and had several children, of whom the most celebrated was ANDREAS, a violinist, born April 27, 1767, at Vechte, near Münster. When only seven he played in public with his cousin Bernhard, with whom he remained throughout life on terms of the closest friendship. At seventeen he excited great enthusiasm in Paris, and was engaged for the Concerts Spirituels (1784). In 1790 he joined his cousin at Bonn, played the violin in the Elector's band, and accompanied him to Italy in 1793. In Rome they gave a concert at the Capitol (Feb. 17, 1796) under the patronage of Cardinal Rezzonico. Andreas then made some stay in Vienna, where Haydn showed great interest in his first quartet. In 1797 he went to Hamburg, and in 1798 made a tour alone. In 1800 he followed Bernhard to Paris, and composed with him 'Don Mendoce, ou le Tuteur portugais.' The opera failed, and the success of their concerts was but partial, so Andreas left for Hamburg, where he married, and remained for fifteen years. He next became Court-Capell-

[1] He does not seem to have played in London; but a slight trace of his presence is perhaps discoverable in an overture of his nephew's, which closes the Philharmonic programme of June 17, 1839.

meister at Gotha, where he died, in very great destitution, Nov. 10, 1821. Concerts were given in various towns for the benefit of his widow and children. The university of Kiel gave him a degree of Doctor of Music. He composed six symphonies, quartets, quintets, church music; a Te Deum, Psalms, a Dixit, Magnificat, and Hallelujah, in 4, 5, 8 and 16 parts; several operas—'Das graue Ungeheuer' (1790, Bonn), 'Die Macht der Musik' (1791), 'Der Rabe,' operetta (1792), 'Die Grossmuth des Scipio,' and 'Die Ruinen zu Paluzzi,'—the two last not performed. His best-known work is the music for Schiller's 'Song of the Bell,' which still keeps its place in concert programmes. His music is solid, but not original, being too closely modelled on Mozart. His larger works are well-known in England. The Lay of the Bell was, in the early days of the Choral Harmonists' Society, to be often found in its programmes, and is still occasionally heard. That, with 'The Transient and the Eternal,' 'The Harmony of the Spheres,' 'The Power of Song,' and a Te Deum (in D), are all published with English words by Novellos. His Toy-symphony is now and then played as an alternative to Haydn's, and was chosen for performance by an extraordinary company, embracing most of the great artists of London, May 14, 1880. Two sons, CIPRIANO and HEINRICH are mentioned in the Allg. musikalische Zeitung. Andreas's brother BALTHASAR, born 1775, and educated for a cellist, died aged seventeen. His sister THERESE, born 1781, had a considerable reputation as a pianist. [F.G.]

ROMEO AND JULIET. A subject often set by opera composers; *e.g.*—

1. Roméo et Juliette; 3 acts; words by de Ségur, music by Steibelt. Feydeau, Paris, Sept. 10, 1793.

2. 'Giulietta e Romeo.' Opera seria in 3 acts, by Zingarelli. Produced at the Scala, Milan, Carnival, 1796. It was one of Napoleon's favourite operas, when Crescentini sang in it.

3. 'Giulietta e Romeo,' by Vaccaj. Produced at the Scala, Milan, spring of 1826; King's Theatre, London, April 10, 1832.

4. 'I Capuletti ed i Montecchi,' in 3 acts; libretto by Romani, music by Bellini. Produced at Venice, March 12, 1830. It was written for the two Grisis and Rubini. King's Theatre, London, July 20, 1833.

5. 'Romeo et Juliette,' in 5 acts; words by Barbier and Carré, music by Gounod. Produced at the Théâtre Lyrique, April 27, 1867. In London, at Covent Garden, in Italian, July 11, 1867.

6. In addition to these it has been made the subject of a work by Berlioz, his 5th Symphony—'Roméo et Juliette. Symphonie dramatique, avec chœurs, solos de chant, et prologue en récitatif choral, op. 17.' Dedicated to Paganini. The words are Berlioz's own, versified by Emil Deschamps. It was composed in 1839, and performed three times consecutively at the Conservatoire. In England the First Part (4 numbers) was executed under M. Berlioz's direction at the New Philharmonic Concerts of March 24, and April 28, 1852, and the entire work by the Philharmonic Society (Cusins) March 10, 1881. [G.]

ROMER, EMMA, soprano singer, pupil of Sir George Smart, born in 1814, made her first appearance at Covent Garden Oct. 16, 1830, as Clara in 'The Duenna.' She met with a favourable reception, and for several years filled the position of prima donna at Covent Garden, the English Opera House, and Drury Lane, with great credit. In 1852 she took the management of the Surrey Theatre, with a company containing Miss Poole and other good singers, and brought out a series of operas in English. Miss Romer was rarely heard in the concert-room, but appeared at the Westminster Abbey Festival in 1834. She was the original singer of the title-parts in Barnett's 'Mountain Sylph' and 'Fair Rosamond.' Her performance of Amina in the English version of Bellini's 'Sonnambula' was much admired. She married a Mr. Almond, and died at Margate, April 11, 1868. [W.H.H.]

RONCONI, a family of distinguished singers.

DOMENICO, a tenor, was born July 11, 1772, at Lendinara-di-Polesine in Venetia. He first appeared on the stage in 1797 at La Fenice, Venice, and obtained great renown both as a singer and actor, there and in other Italian cities. He sang in Italian opera at St. Petersburg and Munich, and afterwards became a professor of singing at the Conservatoires in those cities, and at Milan, where he died, April 13, 1839. Of his three sons,

FELICE, born in 1811, at Venice, under the direction of his father devoted himself to instruction in singing, and became a professor in 1837 at Würzburg, at Frankfort, and, in 1844-8, at Milan. He was similarly engaged for some years in London, and finally at St. Petersburg, where he died Sept. 10, 1875. He was the author of a Method of teaching singing, and of several songs. His second brother,

GIORGIO, the celebrated baritone, was born at Milan, Aug. 6, 1810. He received instruction in singing from his father, and began his dramatic career in 1831, at Pavia, as Arturo in 'La Straniera.' He played in some of the small Italian cities, then at Rome, where Donizetti wrote for him 'Il Furioso,' 'Torquato Tasso,' and 'Maria di Rohan,' in which last, as Duc de Chevreuse, he obtained one of his greatest triumphs—also at Turin, Florence, Naples, etc. In the last city Ronconi was married, Oct. 18, 1837, to Signorina Giovannina Giannoni, a singer who had played in London the previous year, in opera-buffa at the St. James's Theatre. He began his career in England at Her Majesty's, April 9, 1842, as 'Enrico' in Lucia, and was well received during the season in that character and in those of Filippo (Beatrice di Tenda), Belcore (L'Elisir), Basilio, Riccardo (Puritani), Tasso, etc. In the last opera his wife played with him, but neither then, nor five years later as Maria di Rohan, did she make the least impression on the English public. He then made a provincial tour with her, Thalberg, and John Parry. In the winter he played at the 'Italiens,'

Paris, with such success that he was engaged there for several subsequent seasons, and at one time was manager of the theatre, and was also engaged at Vienna, Pesth, Madrid (where he was manager), Barcelona and Naples. He reappeared in England April 13, 1847, at Covent Garden, as Enrico, and also played Figaro (Barbiere), May 8, De Chevreuse on the production in England of 'Maria di Rohan,' and the Doge on the production of Verdi's 'I due Foscari,' June 19, in which 'by his dignity and force he saved the opera . . . from utter condemnation' (Chorley). 'There are few instances of a voice so limited in compass (hardly exceeding an octave), so inferior in quality, so weak, so habitually out of tune . . . . . The low stature, the features, unmarked and commonplace when silent, promising nothing to an audience, yet which could express a dignity of bearing, a tragic passion not to be exceeded, or an exuberance of the wildest, quaintest, most whimsical, most spontaneous comedy . . . . . These things we have seen, and have forgotten personal insignificance, vocal power beyond mediocrity, every disqualification, in the spell of strong, real sensibility' (Ib.). There have been few such examples of terrible courtly tragedy as 'Signor Ronconi's Chevreuse—the polished demeanour of his earlier scenes giving a fearful force of contrast to the latter ones . . . .' (Ib.) He sang at the Italian Opera every season until 1866 inclusive excepting 1855 and 62, in all the great comic operas, as Don Juan, Leporello, Masetto, Nabucco, Faust (Spohr), Rigoletto, Lord Allcash (Fra Diavolo), Dandolo (Zampa), Barberino (Stradella), and Crispino (Crispino e la Comare), etc. In the last six parts he was the original interpreter at the Italian Opera, and in many of these, such as Rigoletto, the Lord, Figaro, and the Podestà (La Gazza) of Rossini, and those of Donizetti he remained a favourite. Of his classical parts, his Don Juan alone was a disappointment. He afterwards went to America, and remained there some time, well received. He returned to Europe in 1874, and was appointed a teacher of singing at the Conservatorio at Madrid, which post he still holds. Some years previously he founded a school of singing at Granada.[1]

SEBASTIANO, the other son, also a baritone, born May 1814, at Venice, received instruction from his father and the elder Romani, and made his first appearance in 1836, at Teatro Pantera, Lucca, as Torquato Tasso, in which part throughout his career he made one of his greatest successes. He enjoyed considerable popularity in his own country, at Vienna, and in Spain, Portugal, and America, as an able artist in the same line of parts as his brother—unlike him in personal appearance, being a tall thin man, but like him in the capability of his face for great variety of expression. He appeared in England in 1860 at Her Majesty's, and was fairly well received as Rigoletto (in which he made his début, May 12th), Masetto, and Griletto (Prova d'un Opera Seria). He retired from public life after a career of 35 years, and is at the present time a teacher of singing at Milan.[2] [A.C.]

[1] Not Cordova, as according to Fétis.

RONDEAU. The French name for a short poem of six or eight lines, containing but two rhymes, and so contrived that the opening and closing lines were identical, thus forming as it were a circle or *round*. The name has come to be used in music for a movement constructed on a somewhat corresponding plan. [See RONDO.] [G.]

RONDO (Fr. *Rondeau*). A piece of music having one principal subject, to which a return is always made after the introduction of other matter, so as to give a symmetrical or *rounded* form to the whole.

From the simplicity and obviousness of this idea it will be readily understood that the Rondo-form was the earliest and most frequent definite mould for musical construction. For a full tracing of this point see FORM [i. 541, 552]. In fact the First Movement and the Rondo are the two principal types of Form, modifications of the Rondo serving as the skeleton for nearly every piece or song now written. Dr. Marx ('Allgemeine Musiklehre') distinguishes five forms of Rondo, but his description is involved, and, in the absence of any acknowledged authority for these distinctions, scarcely justifiable.

Starting with a principal subject of definite form and length, the first idea naturally was to preserve this unchanged in key or form through the piece. Hence a decided melody of eight or sixteen bars was chosen, ending with a full close in the tonic. After a rambling excursion through several keys and with no particular object, the principal subject was regained and an agreeable sense of contrast attained. Later on there grew out of the free section a second subject in a related key, and still later a third, which allowed the second to be repeated in the tonic. This variety closely resembles the first-movement form, the third subject taking the place of the development of subjects, which is rare in a Rondo. The chief difference lies in the return to the first subject immediately after the second, which is the invariable characteristic of the Rondo. The first of these classes is the Rondo from Couperin to Haydn, the second and third that of Mozart and Beethoven. The fully developed Rondo-form of Beethoven and the modern composers may be thus tabulated:—

1st sub. | 2nd sub. (dominant). | 1st sub. | 3rd sub. | 1st sub. | 2nd sub. (tonic). | Coda.

In the case of a Rondo in a minor key, the second subject would naturally be in the relative major instead of in the dominant.

One example—perhaps the clearest as well as the best known in all music—will suffice to make this plan understood by the untechnical reader. Taking the Rondo of Beethoven's

[2] We are indebted to him and Mr. J. C. Griffith for much of the above information with regard to his family.

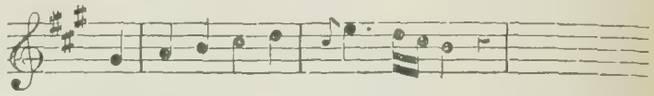
'Sonata Pathetique' (op. 13) we find the first subject in C minor :—

this is of $17\frac{1}{2}$ bars in length and ends with a full close in the key. Six bars follow, modulating into E♭, where we find the second subject, which is of unusual proportions compared with the first, consisting as it does of three separate themes :—

After this we return to the 1st subject, which ends just as before. A new start is then made with a third subject (or pair of subjects?) in A♭ :—

this material is worked out for 24 bars and leads to a prolonged passage on a chord of the dominant seventh on G, which heightens the expectation of the return of the 1st subject by delaying it. On its third appearance it is not played quite to the end, but we are skilfully led away, the bass taking the theme, till, in the short space of four bars, we find the whole of the 2nd subject reappearing in C major. Then, as this is somewhat long, the 1st subject comes in again for the *fourth* time and a *Coda* formed from the 2nd section of the 2nd subject concludes the Rondo with still another 'positively last appearance' of No. 1.

Beethoven's Rondos will all be found to present but slight modifications of the above form. Sometimes a 'working-out' or development of the 2nd subject will take the place of the 3rd subject, as in the Sonata in E (op. 90), but in every case the principal subject will be presented in its entirety at least three times. But as this was apt to lead to monotony—especially in the case of a long subject like that in the Sonata just quoted—Beethoven introduced the plan of varying the theme slightly on each repetition, or of breaking off in the middle. It is in such delicate and artistic modifications and improvements as these that the true genius shows itself, and not in the complete abandonment of old rules. In the earliest example we can take—the Rondo of the Sonata in A (op. 2, No. 2), the form of the opening *arpeggio* is altered on every recurrence, while the simple phrase of the third and fourth bars



is thus varied :—

In the Rondo of the Sonata in E♭ (op. 7) again, we find the main subject cut short on its second appearance, while on its final repetition all sorts of liberties are taken with it; it is played an octave higher than its normal place, a free variation is made on it, and at last we are startled by its being thrust into a distant key—E♮. This last effect has been boldly pilfered by many a composer since—Chopin in the Rondo of his E minor Pianoforte Concerto, for instance. It is needless to multiply examples : Beethoven shows in each successive work how this apparently stiff and rigid form can be invested with infinite variety and interest; he always contradicted the idea (in which too few have followed him) that a Rondo was bound in duty to be an 8-bar subject in 2–4 time, of one unvarying, jaunty, and exasperatingly jocose character. The Rondo of the E♭ Sonata is most touchingly melancholy, so is that to the Sonata in E (op. 90), not to mention many others. There will always remain a certain stiffness in this form, owing to the usual separation of the subject from its surroundings by a full close. When this is dispensed with, the piece is said to be in Rondo-form, but is not called a Rondo (*e.g.* the last movement of Beethoven's Sonata op. 2, No. 3).

Modern composers, like Chopin, with whom construction was not a strong point, often omit the central section, or third subject, together with the repetition of the first subject which accompanies it, and thus what they call a Rondo is merely a piece on the plan of a French overture; that is to say, having produced all his material in the first half of the piece, the composer repeats the whole unchanged, save that such portions as were in the Dominant are, in the repetition, given in the Tonic. Chopin's 'Rondeau brillante' in E♭, the 'Adieu à Varsovie'—indeed all his Rondos—show this construction, or rather, want of construction. [F.C.]

RONZI. [See Begnis, de.]

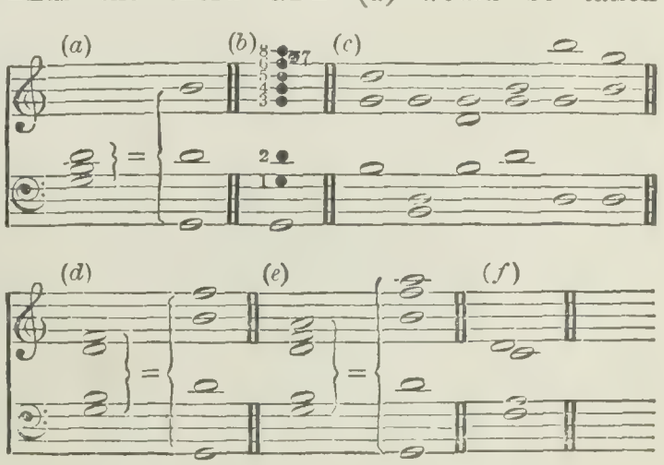
ROOKE, William Michael, son of John Rourke, a Dublin tradesman, was born in South Great George's Street, Dublin, Sept. 29, 1794. His bent for music, which displayed itself at an early age, was sternly discouraged by his father, who wished him to follow his own avocation, but before he was sixteen, he was, by his father's death, left free to follow his own inclination. He studied, almost unaided, so assiduously, that in 1813 he took to music as a profession, learned counterpoint under Dr. Cogan, a Dublin professor, and became a teacher of the violin and pianoforte. Among his pupils on the former instrument was Balfe, then a boy. In 1817 he was appointed chorus-master and deputy leader at the theatre in Crow Street, Dublin, and soon afterwards composed a polacca, 'Oh Glory, in thy brightest hour,' which was sung by Braham, and met with great approbation. A few years later he removed to England. In 1826 he was leading oratorios at Birmingham, and in the same year came to London, and sought the appointment of chorus-master at Drury Lane, and established himself as a teacher of singing. About this period he composed his opera, 'Amilie, or The Love Test,' which, after he had waited many years for an opportunity of producing it, was brought out at Covent Garden, Dec. 2, 1837, with decided success, and at once established his reputation as a composer of marked ability. He immediately commenced the composition of a second opera, and on May 2, 1839 produced at Covent Garden 'Henrique, or, The Love Pilgrim,' which although most favourably received, was withdrawn after five performances on account of a misunderstanding with the manager. He composed a third opera entitled 'Cagliostro,' which has never been performed. He died Oct. 14, 1847, and was buried in Brompton Cemetery. [W.H.H.]

ROOT. The classification of the chords which form the structural material of modern harmonic music is attained by referring them to what are called their roots; and it is mainly by their use that these harmonic elements are brought within the domain of intelligible order.

As long as the purely polyphonic system was in full force, the chordal combinations were merely classified according to recognized degrees of consonance and dissonance, without any clear idea of relationship: but as that system merged by degrees into the harmonic system, it was found that fresh principles of classification were indispensable; and that many combinations which at first might appear to have quite a distinct character must somehow be recognised as having a common centre. This centre was found in an ultimate bass note, namely, the bass note of the complete chord in what would be considered its natural or first position; and this was called the Root, and served as the common indicator of all the various portions of the complete chord which could be detached, and their test of closest possible relationship. Further, these roots were themselves classified according to their status in any given key; and by this means a group of chords which were related to one another most closely by having the same root, might be shown to be related severally and collectively to the group which belonged to another root; and the degree of relationship could be easily and clearly ascertained according to the known nearness or remoteness of the roots in question. By this means the whole harmonic basis of a piece of music can be tested; and it must be further noted that it is only by such means that the structural principles of that kind of music which has been called 'absolute' because of its dissociation from words, is rendered abstractedly intelligible.

The principle upon which modern Instrumental Music has been developed is that a succession of distinct tunes or recognizable sections of melody or figures can be associated by the orderly distribution of harmonies and keys in such a manner that the mind can realise the concatenation as a complete and distinct work of art. It is obvious that fine melodic material is a vital point; but it is not so obvious that where the dimensions of the work are such that a continuous flow of melody of a uniform character is impossible, the orderly arrangement of the materials in successions of keys and harmonies is no less vital. The harmonic structure requires to be clearly ascertainable in works of art which are felt to be masterpieces of form, and to be perfectly understood and felt by those who attempt to follow such models: hence, in discussing the structure of works of this kind, the frequent use of such terms as Tonic, or Dominant or Subdominant harmony, which is only a short way of describing harmony of which these respective notes are the roots.

The simplest and most stable of complete combinations in music are the chords consisting of a bass note with its third and perfect fifth; and of these the bass note is considered the root. In most cases such a root is held to be the fundamental sound of the series of harmonics which an essential chord may be taken to represent. For instance, the chord of the major third and perfect fifth on any note is supposed to represent the ground tone or generator with two of its most distinct and characteristic lower harmonics; and whatever be the positions of the individual notes in respect of one another, they are still referred to this ground-tone as a root. Thus the chord GBD (*a*) would be taken



to be the representative of the ground-tone G with its second and fourth harmonics (*b*); and every transposition or 'inversion' of the same notes, such as BDG, or DGB in close or open order (as in *c*), or even lesser portions to which the implication of a context would afford a clue, would be referred alike to this same root. If F be added (*d*) to the above chord it may be taken to represent the sixth harmonic (*b*), and similar 'inversions' of the component portions of the chord will similarly be referred to the note G. If A be added further above the F of the preceding chord, producing G B D F A (as in *e*), that is commonly taken as a yet more complete representation of the group of harmonics generated by the sounding of G, of which it is the eighth; and, as before, all the different portions which could be intelligibly isolated, and all the transpositions of its component notes, would be still referable to the one root G. If A♭ had been taken instead of A♮, the same general explanation would hold good, though the special question might remain open whether it was a representative of the 16th harmonic, which is four octaves from the fundamental sound, or an artificial softening of the clear and strong major ninth, A♮. Some theorists carry the same principles yet further, and include the C above A, and even the E and E♭ above that in the group which represents the harmonic series of G, calling them respectively the eleventh and major and minor thirteenths of that note.

The discords contained in the above series are frequently styled fundamental, from this supposed representation of the group of harmonics generated by their fundamental or root note; they are characterised among discords by the peculiar freedom of the notes of which they are composed, on both sides. It will be observed that they are all members of the Diatonic series of the key of C, major or minor; and as G, their root note, is the Dominant of that key, they represent the scope of what is called the Dominant harmony of C, which of course has its counterpart in every other key. No other note than the Dominant serves to this extent as the root of chords of this class which are Diatonic. The Tonic, for instance, can only supply the third and fifth, and even the minor seventh is a chromatic note. Nevertheless this chromatic chord and the ninths which are built upon it are commonly used as if they belonged to the key of C; and the same remark applies to the similar discords founded on the Supertonic root (as D in the key of C); and these are most readily intelligible through their close connection as Dominant harmony to the Dominant of C.

The roots of the various combinations which are arrived at by modifying the intervals of such distinct and essential harmonies as the above, are of course the same as those of the unmodified harmonies. Thus the roots of suspensions are the same as those of the harmonies upon which they are said to resolve, because they are modifications of that which follows in its complete state, and not of that which precedes; and the same applies to the combinations produced by adventitious notes, such as appoggiaturas and the like.

The combinations which arise from the simultaneous occurrence of ordinary passing notes must find their root in the chord which precedes, as that has possession of the field till new harmony presents itself.

From these considerations it will be obvious that a very considerable variety of apparently different combinations are referable to a single root. In fact a great portion of music is built upon very few roots; many examples of good popular music especially do not exceed the limits of Tonic and Dominant harmony with an occasional move as far as the Sub-dominant, and next to no modulation. Even in works which belong to the domain sometimes distinguished as high art a great deal is often done within very narrow limits. For instance, the whole of the first section of a violin and pianoforte sonata of Mozart's in A is based on six successive alternations of Tonic and Dominant harmony, and modulation to the new key for the second section is effected merely by the Dominant and Tonic harmony of that key.

Notwithstanding the importance which attaches to a clear understanding of the classification of chords according to their roots, there are some combinations upon whose derivation doctors disagree; and it must be confessed that the theory of music is yet far from that complete and settled stage which would admit any hope of a decisive verdict in the matter at present. In such circumstances variety of opinion is not only inevitable but desirable; and though the multitude of counsellors is a little bewildering there are consolations; for it happens fortunately that these differences of opinion are not vital. Such chords, for instance, as augmented sixths have so marked and immediate a connection with the most prominent harmonies in the key, that the ascertainment of their roots becomes of secondary importance; and even with the chord which stands as $\left.\begin{matrix}\mathrm{D}\\\mathrm{C}\\\mathrm{A}\\\mathrm{F}\end{matrix}\right\}$ in the key of C for instance (*f*), it is not so indispensable to decide whether G or F or D is the root, or whether indeed it is even a double-rooted chord, because, among other reasons, the very attention which has been called to it and the very characteristics which have made it difficult to classify have given it a prominence and a unique individuality which relieves it of the need of being assigned to any category; and even when it is an important factor in the harmonic structure, the process of analysis need not be rendered doubtful because its actual position in the key is so thoroughly realised. Other disputed points there are having reference to roots, which are even of less importance. For instance, whether what is called an augmented fifth is really an augmented fifth or a minor thirteenth; or whether the augmented octave which Mozart

uses with such marked emphasis in the 3rd bar of the Allegro in the overture to Don Giovanni is properly a minor ninth, as some maintain—since happily the roots would be the same in both cases. [C.H.H.P.]

RORE, CIPRIANO DI, composer of the Venetian school, born at Mechlin in 1516. He studied under Willaert,[1] chapel-master of St. Mark's, Venice, and was probably in early life a singer in that cathedral. In 1542 he brought out his first book of madrigals (à 4), a work long held in favour,[2] and for the next 7 or 8 years published continually.[3] About 1550[4] he appears to have left Venice for the court of Hercules II. Duke of Ferrara, and for some years we hear nothing of him.[5] In 1559 he returned to Venice to assist Willaert in his duties at St. Mark's, and on the death of that master, was appointed his successor, Oct. 18, 1563. He resigned this position almost immediately, and went to the court of Parma, where in a few months he died, at the age of 49. He was buried in the cathedral of that city, and the following epitaph gives an authentic sketch of his life.

Cypriano Roro, Flandro
Artis Musicæ
Viro omnium peritissimo,
Cujus nomen famaque
Nec vetustate obrui
Nec oblivione deleri poterit,
Hercules Ferrariens. Ducis II.
Deinde Venetorum,
Postremo
Octavi Farnesi Parmæ et Placentiæ
Ducis II Chori Præfecto.
Ludovicus frater, fil. et hæredes
Moestissimi posuerunt.
Obiit anno MDLXV. ætatis XLIX.

The position to which Rore attained at St. Mark's, and the rank as a musician which contemporary writers assigned him, point to his having been something besides a madrigal composer. Yet of his church compositions either in print or in MS. few have survived.[6] We only know that they were held in high esteem in the court chapel at Munich, and were constantly performed there under Lassus' direction.[7] Duke Albert of Bavaria caused a superb copy of Rore's motets to be made for his library, where it remains to this day, with a portrait of the composer on the last page, by the court painter Mielich. [J.R.S.-B.]

ROSA (ROSE), CARL AUGUST NICOLAS, was born at Hamburg, March 22, 1843, was educated as a violin player and made such progress as to be sent to the Leipzig Conservatorium, which he entered in 1859. In 1866 he came to England and appeared as a solo player at the Crystal Palace on March 10. After a short stay in London he joined Mr. Bateman in a concert-tour in the United States, and there met Madame Parepa, whom he married at New York, in Feb. 1867. His wife's success on the stage led to the formation of a company under the management and conductorship of Mr. Rose, which during its early campaigns could boast such names as Parepa, Wachtel, Santley, Ronconi and Formes among its artists.

Early in 1871 Mr. Rose—who by this time had changed his name to Rosa to avoid mistakes in pronunciation—returned to England with his wife, and then made a lengthened visit to Egypt for health. After this they again returned to London, but only for the lamented death of Madame Parepa-Rosa, which took place Jan. 21, 1874. Mr. Rosa however was resolved, notwithstanding this serious blow, to test the fortunes of English opera in London, and on Sept. 11, 1875, he opened the Princess's Theatre with a company including Miss Rose Hersee as prima donna, Mr. Santley, and other good singers. He closed on Oct. 30, having produced Figaro, Faust, *The Porter of Havre (Cagnoni), Fra Diavolo, Bohemian Girl, Trovatore, *The Water Carrier (Cherubini), and Siege of Rochelle.

The season of 1876 was undertaken at the Lyceum (Sept. 11–Dec. 2). It included The Water Carrier; The Lily of Killarney (with additions); Sonnambula; Faust; *Giralda (Adam); Bohemian Girl; *Flying Dutchman; Zampa; Trovatore; Montana; *Joconde (Nicolò); Fidelio; Fra Diavolo; *Pauline (Cowen); Porter of Havre. The next season was at the Adelphi Theatre (Feb. 11–April 6, 1878). It included *The Golden Cross, by Brüll; The Merry Wives; The Flying Dutchman; The Lily of Killarney, and others of those already named. For the fourth season Mr. Rosa took Her Majesty's Theatre (Jan. 27–March 22, 1879), brought out *Rienzi, *Piccolino (by Guiraud) and *Carmen, and played The Golden Cross, Huguenots, Lily of Killarney, etc., etc. His fifth season was at the same theatre (Jan. 10–March 6, 1880); *Mignon (Thomas), *Lohengrin and *Aida were all produced for the first time in English; and The Taming of the Shrew

[1] See title-page 'Fantesie e Recerchari etc. composti da lo Eccell. A. Vuigliart *e Cipriano suo Discepolo* etc. Venetiis 1549' (Brit. Mus. A. 287).

[2] The Fétis library at Brussels contains imperfect copies of three editions 1552, 69 and 82. The edition in the British Museum is 1575.

[3] The following list of books of motets and madrigals is taken from Fétis' Biographie, Eitner's Bibliographie, and the catalogues of the British Museum and Fétis libraries. Some contain work by other composers, but in all cases they bear Cipriano's name, and he is the chief contributor. The date given is that of the supposed 1st edition.

Motets. Bk. I, à 5, Venice 1544 (Brit. Mus.); Bk. II, à 4 and 5, Venice 1547 (Fétis Biogr.); Bk. III, à 5, Venice 1559 (Eitner).

Madrigals. Bk. I, à 4, Venice 1542 (Fétis Biogr.); Bk. II, à 5, Venice 1544 (Brit. Mus. The words on title-page, 'novamente posti in luce,' point to this being the 1st edition, though Fétis gives the date 1543. Eitner knows of no edition earlier than 1551); Bk. III, à 5. Venice 1544 (Fétis Bibl. The 1562 edition in Brit. Mus.); Bks. IV and V (Venice 1568, according to Eitner and Fétis, but title-pages prove these not to be 1st editions. The fifth book contains an ode to the Duke of Parma, and from the events of the composer's life, we may assume this volume to be one of his latest publications).

Chromatic madrigals. Bk. I, à 5, 1544 (Brit. Mus. The word 'ristampato' on title-page shows that even this is not 1st edition, though Fétis knows of none earlier than 1560. He quotes 5 books of these madrigals, Venice 1560—68). The first book was reprinted as late as 1592 (Fétis library). Burney has inserted one number in his History.

[4] In this year a reprint of his 1st book of madrigals was brought out at Ferrara.

[5] Except the publication of 2 Passions (Paris 1557) with the following curious titles: 'Passio D. N. J. Christi in qua solus Johannes canens introducitur cum quatuor vocibus' and 'Passio . . . . . in qua introducuntur Jesus et Judæi canentes, cum duabus et sex vocibus.'

[6] Fétis mentions a book of Cipriano's masses, à 4, 5, 6 (Venice 1566) on the authority of Draudius' 'Bibliotheca Classica.' This is probably 'Liber Missarum' à 4, 5, 6 (Venice 1566) to which Cipriano only contributes the 1st mass 'Doulce memoyre.'

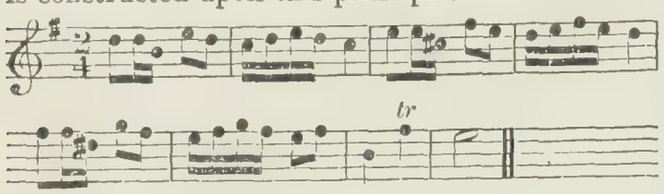
[7] Discorsi delli triomphi etc. nelle nozze dell' illustr. duca Gugl. etc. da Massimo Trojano (Monaco, Berg, 1568).

* Denotes that the works had not been before produced in England, at least in English.

(Goetz), Carmen, Rienzi, etc. were performed. The artists engaged at the season of 1880 included Miss Minnie Hauk, Miss Julia Gaylord, Mad. Dolaro, Herr A. Schott, Mr. Maas, etc., etc. The careful way in which the pieces are put on the stage, the number of rehearsals, the eminence of the performers and the excellence of the performances have begun to bear their legitimate fruit, and the 'Carl Rosa Opera Company' bids fair to become a permanent English institution. [G.]

ROSALIA (Germ. *Vetter Michel, Schusterfleck*). A form of Melody, Vocal or Instrumental, in which a Figure is repeated several times in succession, transposed a note higher at each reiteration.

The name is derived from an old Italian Canto popolare, 'Rosalia, mia cara,' the Melody of which is constructed upon this principle.



The well-known German Volkslied, 'Gestern Abend war Vetter Michel da,' begins with a similar repetition, and hence the figure is frequently called in Germany, 'Vetter Michel.' These titles, as well as that of 'Schusterfleck'—a cobble—are of course given to it in derision—for writers on Composition regard its frequent introduction as indicative of poverty of inventive power. Nevertheless, it is frequently employed, by the Great Masters, with charming effect, as may be seen in the following example from the Minuet in Handel's 'Ariadne':—

It will be observed that the Figure is here suffered to appear three[1] times only in succession. Almost all great writers have imposed this limit upon its employment, experience having proved that a four-fold repetition generally tends to render the passage wearisome. Strikingly effective instances of three-fold repetition will be found, in Mozart's Requiem, at the words 'Ingemisco tamquam reus'; in Spohr's 'Last Judgment,' at 'The grave gives up its dead'; and in a remarkably forcible passage in the 'Rigaudon' from Rameau's 'Dardanus.' Still, this restriction is frequently disregarded. Vallerano has left a Canon,[2] which ascends a Tone higher at each repetition, *ad infinitum*; and the resulting effect is far from inharmonious, though the work must be regarded rather as a musical curiosity than a serious Composition.

Closely allied to this Figure is another, in which the leading phrase is transposed one or more notes lower at each repetition; as in 'Habbiam vinto' from Handel's 'Scipio,' in which the transposition proceeds by Thirds.

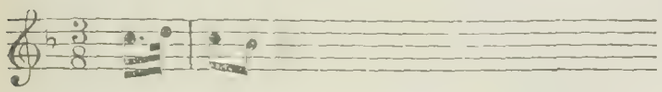
Here, again, the Figure breaks off after a three-fold reiteration; and, in two cases in which Mozart has employed the same device, in his Requiem—at the words 'Qui Mariam absolvisti,' and 'Oro supplex et acclinis'—it is relinquished after the second enunciation. This kind of Imitation is, indeed, subject to exactly the same form of treatment as the true Rosalia; though it would be inexact to call it by that name, and equally so to apply the term to the regular ascents or descents of a Sequence—as constantly exhibited in the Fugues of Seb. Bach; or to those of vocal Divisions—as in 'Every valley,' or Rossini's 'Quis est homo'; or to the anomalous Scene, in 'Tannhäuser'—happily, the only instance of such treatment known—in which the first Verse of 'Dir töne Lob' is sung in D♭, the second, in D♮, the third, in E♭, and a still later one in E♮.

Schumann has been recently accused of writing Rosalie, *usque ad nauseam*. He does employ them very frequently: but, how often—as in the opening of his 'Arabeske' (op. 18)—with an effect which true genius alone could have dictated. This is not the place for a detailed criticism of Schumann's principles of composition: but when, as in a bitter article, by Joseph Rubinstein, which lately appeared in Wagner's 'Bayreuther Blätter,' his masterly use of this particular device is made to serve as an excuse for its unqualified condemnation, as a 'vicious monotony-producing repetition of Musical Phrases on related degrees, which the Student of Composition loves to introduce in his first exercises,' we naturally revolt from a conclusion so illogical. That a form which neither Handel, nor Mozart, nor Beethoven, nor any other great writer has disdained to employ, can possibly be, in its own nature, 'vicious,' we

1 Sometimes called 'Les trois Révérences.'

2 Reprinted in vol. i. of Clementi's 'Practical Harmony.'

cannot believe. With equal reason might we condemn the 'monotony-producing' effect of a regular Figure. It is, indeed, quite possible to make such a Figure monotonous to the last degree; yet nearly the whole of Beethoven's 'Andante in F' (op. 34), is founded on the rhythmic form of the first four notes of the opening Subject—



The truth is, that, in the hands of a Great Master, all such devices are made productive of pure and beautiful effects; while all are 'vicious,' when viciously misused. [W.S.R.]

ROSAMUNDE FÜRSTIN VON CYPERN (Rosamond, Princess of Cyprus). A romantic play in 4 acts; written by Wilhelmine Christine Chezy, the overture and incidental music by Franz Schubert (op. 26). Produced at the Theatre an-der-Wien, Vienna, Dec. 20, 1823, and only performed twice. The music as then played is as follows:—

* 1. Overture (D minor).
† 2. Entracte between Acts 1 and 2 (B minor).
† 3. Ballo (B minor), and Andante un poco assai (G).
4. Entracte between Acts 2 and 3 (D).
* 5. Romance for soprano 'Der Vollmond strahlt' (F minor).
* 6. Chorus of Spirits.
* 7. Entracte between Acts 3 and 4 (B♭).
8. Shepherds' Melody.
* 9. Shepherds' Chorus.
*10. Huntsmen's Chorus.
†11. Air de Ballet (G).

The overture played at the performances was published in 1827, for PF. 4 hands, by Schubert himself, as op. 52, under the title of 'Alphonso und Estrella' (now op. 69). The overture (in C), known as the 'Overture to Rosamunde' (op. 26) was composed for the melodrama of the 'Zauberharfe,' or Magic Harp (produced Aug. 19, 1820), and was published by Schubert with its present name and opus-number for PF. 4 hands, in 1828. The pieces marked have been published—those marked with * by Schubert himself, as op. 26; those marked with † more recently. For particulars see Nottebohm's Thematic Catalogue, p. 46, 84. The Entracte in B minor is one of the finest of all Schubert's works; the Romance, the Entracte no. 7, the Shepherds' Melody, and the Air de Ballet in G, are all admirable, the Shepherds' Melody for 2 clarinets especially characteristic. The 2nd Trio to the Entracte no. 7 was previously composed, in May 1816, as a song, 'Der Leidende.' [G.]

ROSE or KNOT (Fr. *Rosace*; Fr. and Germ. *Rosette*; Ital. *Rosa*). The ornamental device or scutcheon inserted in the soundhole of the belly of stringed instruments, such as the lute, guitar, mandoline, dulcimer, or harpsichord, serving not only a decorative purpose, but—in the Netherlands especially—as the maker's 'trade mark.' In the harpsichord and spinet there was usually but one soundhole with its rose; but owing to the origin of these keyboard instruments from the psaltery, their analogy with the lute, and the fact of the Roman lutes having three, several soundholes were sometimes perforated. In fact, a clavicembalo dated 1531 was lately seen in Italy by the eminent art critic, Mr. T. J. Gullick, which possessed no less than five, each with a rose inserted. From the analogy above referred to, the old Italian harpsichord makers named the bottom of the instrument 'cassa armonica' (soundchest); as if its office were like that of the back of the lute or viol, while the belly was the 'piano armonico' (soundflat).[1] The Flemings, retaining the soundhole, doubtless adhered more or less to this erroneous notion of a soundchest. The Hitchcocks in England (1620 and later) appear to have been the first to abandon it; no roses are seen in their instruments. Kirkman in the next century still adhered to the rose and trade scutcheon, but Shudi did not. In the 'Giornale de' Litterati d'Italia' (Venice, 1711, tom. v.), Scipione Maffei, referring to Cristofori, who had recently invented the pianoforte, approves of his retention of the principle of the rose in his ordinary harpsichords, although contemporary makers for the most part had abandoned it. But Cristofori, instead of a large rose, to further, as he thought, the resonance, used two small apertures in the front. Under the head RUCKERS will be found illustrations of the rose or *rosace*, as used by those great makers. [A.J.H.]

ROSE OF CASTILE. An opera in 3 acts; compiled by Messrs. Harris and Falconer (from Le Muletier de Tolède), music by M. W. Balfe. Produced at the Lyceum Theatre (Pyne and Harrison), London, Oct. 29, 1857. [G.]

ROSEINGRAVE, or ROSINGRAVE, DANIEL, was educated in the Chapel Royal under Pelham Humfrey. In 1693 he became organist of Salisbury Cathedral, which appointment he quitted in 1698 and was chosen organist and vicar-choral of St. Patrick's Cathedral, Dublin. He held these posts for 20 years, when he resigned them in favour of his son RALPH, who held them from April 1719 until his death in Oct. 1747.

THOMAS, another son, received his early musical education from his father, and manifesting great aptitude, was allowed a pension by the Dean and Chapter of St. Patrick's to enable him to travel for improvement. He went to Italy in 1710, and at Rome was on friendly terms with the Scarlattis. In 1712 he composed, at Venice, an anthem, 'Arise, shine,' preserved in the Tudway collection (Harl. MS. 7342). In 1720 we find him in London, bringing out at the King's Theatre an adaptation of D. Scarlatti's opera 'Narcissus,' with additional songs composed by himself. In 1725 he was selected, from seven competitors, as the first organist of St. George's, Hanover Square, at a salary of £45 per annum; the judges were Drs. Croft and Pepusch, with Buononcini and Geminiani, each of whom gave a subject upon which the candidates were to make an extempore fugue. Some years afterwards, a disappointment in love so seriously affected Roseingrave's reason that he was compelled to desist from his duty, and from 1737 it was performed by Keeble, who received half the salary. Rosein-

[1] In modern Italian we more frequently meet with 'tompagno,' 'tavola armonica,' and 'fondo,' meaning 'belly' or 'soundboard.'

grave died about 1750. He published 'Voluntaries and Fugues for the Organ or Harpsichord'; 'Italian Cantatas,' 2 books of 6 each; and 12 solos for the German flute; also a collection of '42 Suits of Lessons for the harpsichord composed by Sign. Domenico Scarlatti,' with an introduction by himself. He was an enthusiastic admirer of Palestrina, and hung his bedroom with pieces of paper containing extracts from his works. [W.H.H.]

ROSELLEN, Henri, son of a PF. maker, born in Paris, Oct. 13, 1811; took 2nd PF. prize at the Conservatoire 1827, and 1st harmony do. 1828. Was a pupil and imitator of Herz. He published nearly 200 works for PF. including a 'Méthode de Piano' (Heugel), a collection of progressive exercises entitled 'Manuel des Pianistes' (ibid.), and many separate pieces of drawing-room character, one of which, a Rêverie (op. 31, no. 1), enjoyed an extraordinary popularity for many years over the whole of Europe. He died March 20, 1876. [G.]

ROSENHAIN, Jacob, eldest son of a banker, was born at Mannheim, December 2, 1813. His teachers were Jacob Schmitt, Kalliwoda, and Schnyder von Wartensee. His first appearance as a pianoforte-player was at Stuttgart in 1825, after that at Frankfort, where his success induced him to take up his residence. A one-act piece of his, 'Der Besuch im Irrenhause,' was produced at Frankfort, December 29, 1834, with great success; his second, 'Liswenna,' 3 acts, was not so fortunate. In 1837 he came to London, played at the Philharmonic, April 17th, and was much heard in the concerts of the day. After this he took up his abode in Paris, where he became very prominent, giving chamber concerts in combination with Alard, Ernst, and other eminent players, and carrying on a school of pianoforte-playing in conjunction with J. B. Cramer. His early opera, 'Liswenna,' was provided with a new libretto (by Bayard and Arago), and brought out at the Grand Opera as 'Le Démon de la Nuit,' March 17, 1851. It had however but a moderate success, and was withdrawn after four representations, though afterwards occasionally played in Germany. Another one-act piece, 'Volage et Jaloux,' produced at Baden-Baden, August 3, 1863, completes the list of his works for the stage. In instrumental music he was much more prolific. He has composed 3 symphonies—in G minor (op. 42), played at the Gewandhaus, Leipzig, under Mendelssohn's direction, January 31, 1846; in F minor (op. 43), played at Brussels, and at the Philharmonic, London, April 24, 1854; 'Im Frühling,' in F minor (op. 61), rehearsed at Conservatoire, but not played. 4 trios for PF. and strings; 1 PF. concerto; 3 string quartets; 2 cello sonatas; 12 characteristic studies (op. 17) and 24 Etudes mélodiques (op. 20), both for PF. solo. Also various pieces for ditto, entitled, 'Poémes,' 'Réveries,' etc.; a biblical cantata, and various songs, etc. M. Fétis credits him with a broad and pure style of playing, and with knowledge and ambition in composition. Schumann has criticised several of his pieces with kindness and liberality. [G.]

ROSES, Jose, priest and musician, born at Barcelona Feb. 9, 1791, learned music from Sampere, chapelmaster at Barcelona; was first organist of the monastery of San Pablo and then succeeded his master at Santa Maria del Pino, a post which he held for thirty years. During this time he composed a large quantity of music—masses, requiems, motets, graduals, etc., which are preserved in MS. in the church. Among his pupils may be mentioned Calvo, Puig, Rius, Casanovas, etc. He died at his native city Jan. 2, 1856. [G.]

ROSIN (Fr. *Colophane*), a preparation applied to the hair of the violin bow to give it the necessary 'bite' upon the strings. Without some such agent, the horsehair would slip noiselessly over the catgut. Rosin is the residuary gum of turpentine after distillation. The ordinary rosin of commerce is a coarse, hard substance, quite useless to the fiddler, for whom the rough material undergoes a process of refinement. The ancient English recipe was to boil rough rosin down in vinegar, a process no longer in vogue, as excellent French rosin is now to be had at a very trifling cost. It is prepared by dissolving the rough article in a glazed earthen vessel over a slow charcoal fire. As it melts, it is strained through coarse canvas into a second vessel also kept at a moderate heat, from which it is poured into pasteboard or metal moulds. The process requires some delicacy of eye and hand, and the greatest care in handling so inflammable a material, and is usually entrusted to women. Some players affect to prefer the rosin of Gand, others that of Vuillaume, but both are made of the same material and at the same factory. Rosin should be transparent, of a darkish yellow colour in the mass, and quite white when pulverised: it ought to fall from the bow, when first applied to the strings, in a very fine white dust: when crushed between the fingers it ought not to feel sticky. The best rosin is made from Venetian turpentine. The same sort of rosin serves for the violin, viola, and violoncello. The double-bass bow requires a stiffer preparation than pure rosin, and accordingly double-bass rosin is made of ordinary rosin and white pitch in equal proportions. Emery powder and other matters are sometimes added in the composition of rosin, but are quite unnecessary, and even injurious to the tone. A liquid rosin, applied to the bow with a camel's-hair brush, has recently been invented, and has its advocates. [E.J.P.]

ROSS, John, born at Newcastle-upon-Tyne in 1764, was placed in his eleventh year under Hawdon, organist of St. Nicholas Church, a disciple of Charles Avison, with whom he studied for seven years. In 1783 he was appointed organist of St. Paul's Chapel, Aberdeen, where he remained for half a century. He composed 'An Ode to Charity,' pianoforte concertos and sonatas, songs, canzonets, hymns, waltzes, etc. [W.H.H.]

ROSSETOR, Philip, a lutenist, who in 1601 issued 'A Booke of Ayres, set foorth to be song to the Lute, Orpherian, and Base Violl,' containing 42 songs, the poetry and music of the first 21 by Campion, and the rest by Rossetor himself.

In 1609 he published 'Lessons for Consort: Made by sundry excellent Authors, and set to sixe severall instruments; Namely, the Treble Lute, Treble Violl, Base Violl, Bandora, Citterne, and the Flute.' On Jan. 4, 1610, a patent was granted to him and others appointing them Masters of the Children of the Queen's Revels, under which they carried on dramatic performances at the theatre in Whitefriars. In March, 1612, Rossetor's company was joined by 'The Lady Elizabeth's Servants,' but the union lasted for a year only. In 1616 a privy seal for a patent for the erection of a theatre in Blackfriars was granted to Rossetor, Philip Kingman, Robert Jones and Ralph Reeve, but the Lord Mayor and Aldermen compelled them to surrender it. [See JONES, ROBERT, vol. ii. p. 39 *b*.] [W.H.H.]

ROSSI, FRANCESCO, born at Bari about 1645, canon there 1680; author of 4 operas—'Il Sejano moderno' (Venice, 1680); 'La Pena degli Occhi' (Ib., 1688); 'La Carilda' (Ib., 1688); 'Mitrane' (Ib., 1689). Also of Psalms and a Requiem, à 5, printed 1688; and an oratorio 'La Caduta dei Gigante.' (MS.) The fine and well-known scena 'Ah! rendimi' is from Mitrane, and gives a high idea of Rossi's power. [G.]

ROSSI, LAURO, an Italian composer, who, like Raimondi, although the author of numerous operas, and famous from end to end of Italy, is hardly so much as known by name on this side the Alps. He was born[1] at Macerata, near Ancona, February 20, 1812, and was taught music at the Conservatorio of Naples under Crescentini, Furno, and Zingarelli. He began to write at once, and at 18 had his first two operas—'Le Contesse Villane' and 'La Villana Contessa'—performed at the Fenice and Nuovo Theatres of Naples respectively. Other pieces followed; one of them, 'Costanza ed Oringaldo,' being written expressly for the San Carlo at the request of Barbaja. On the recommendation of Donizetti, Rossi was engaged for the Teatro Valle at Rome, and there he remained for 1832 and 1833, and composed 4 operas and an oratorio. In 1834 he moved to Milan, and brought out 'La Casa disabitata' (or 'I falsi Monetari'), which, though but moderately successful at the Scala, was afterwards considered his *chef d'œuvre*, and spoken of as 'Rossi's Barbiere di Siviglia.' It pleased Malibran so much that she induced Barbaja to bespeak another opera from Rossi for the San Carlo, in which she should appear. The opera was composed, and was named 'Amelia'; but owing to her caprice was a failure. She insisted on having a *pas de deux* inserted for her and Mathis. The theatre was crowded to the ceiling to see the great singer dance; but her dancing did not please the public, and the piece was damned. This disappointment, though somewhat alleviated by the success of his 'Leocadia' (1834) seems to have disgusted Rossi with Italy, he accepted an engagement from Mexico, left Europe Oct. 15, 1835, and arrived at Vera Cruz the 6th of the following January. From Mexico he went to the Havannah, New Orleans, and Madras; married in 1841, and returned to Europe, landing at Cadiz, Feb. 3, 1843. He began again at once to compose—'Cellini a Parigi' (Turin 1845), etc., but with very varying success. In 1846 he reappeared at the Scala at Milan with 'Azema di Granata,' 'Il Borgomastro di Schiedam,' and three or four other operas in following years. His great success however appears to have been made with 'Il Domino nero,' at one of the Milanese Theatres. In 1850 he was called to be Director of the Conservatorio at Milan. For this institution he published a 'Guida di armonia pratica orale' (Ricordi 1858), and between 1850 and 1859 composed a great many operas, and detached pieces for voices and for instruments. After the death of Mercadante in 1870, Rossi succeeded him as head of the Conservatorio at Naples. This office he is said to have resigned in 1878. Lists of his works are given by Florimo (Cenni Storici, p. 948–962) and Pougin. They comprise 29 operas, a grand mass, and a dozen miscellaneous compositions, including six fugues for strings, 2 sets of vocal exercises, and the Guide to Harmony already mentioned. His best works are 'Cellini a Parigi,' 'I falsi Monetari,' and 'Il Domino nero.' One of his operas, 'La Figlia di Figaro,' is said to have been produced at the Kärnthnerthor Theatre, Vienna, April 17, 1846; and another, 'Biorn,' was announced for performance at the Queen's Theatre, London, Jan. 17, 1877—English version by Frank Marshall; but no notice of either performance can be found. [G.]

ROSSI, LUIGI, was a contemporary of Carissimi's, born at Naples towards the end of the 16th century, and found at Rome about 1620. His works known at present are chiefly cantatas, for one or more voices with clavier accompaniments, often of great length and in many movements. Thirty-five of these are to be found in the British Museum (Harl. MSS. 1265, 1273, 1501, 1863), and not less than 112 in the Library of Christ Church, Oxford. They are said to be beautiful music, quite equal to that of Scarlatti. The Magliabecchi Library at Florence contains a scene extracted from a 'spiritual opera' of his, 'Giuseppe figlio di Giacobbe'; and the library of the Sacred Harmonic Society of London contains 'Il Palazzo incantato, overo, La Guerriere amante' (MS.), an opera by Giulio Ruspigliosi, music by Rossi, performed at Rome 1642. Gevaert, in 'Les Gloires d'Italie,' gives two cantatas for a single voice. [G.]

ROSSI-SCOTTI, GIOVANNI BATTISTA, Conte di, was born Dec. 27, 1836, at Perugia, where he still resides. He is an amateur of taste and knowledge, who will be long remembered for the biography of his fellow-townsman, Morlacchi—'Della vita e delle opere del Cav. Francesco Morlacchi . . . . Memorie istoriche precedute dalla biografia e bibliografia musicale Perugina' (Perugia; Bartelli, 1861)—a copy of which is

[1] His parents' names were Vincenzo and Santa Monticelli, so that 'Rossi' would seem to be a sobriquet.

in the South Kensington Library. He has also published pamphlets on Morlacchi (1878), and Bontempi (1879). [G.]

ROSSINI, Gioachino Antonio, one of the brightest musical luminaries of the 19th century, was born Wednesday, February 29, 1792, at Pesaro, a small town on the Adriatic, N.W. of Ancona, and was the only child of Giuseppe Rossini of Lugo, and Anna Guidarini of Pesaro. The position of his parents was of the humblest; his father was town-trumpeter (*trombadore*) and inspector of slaughter-houses, and his mother a baker's daughter, but their life was a happy one, and so irrepressible were the good humour and fun of the town-trumpeter that he was known among his friends as 'the jolly fellow.' The political struggles of 1796, however, invaded even this lowly household; the elder Rossini declared himself for the French, and for republican government, and during the reaction of the Austrian party in the States of the Church was naturally sent to gaol. His wife, thus deprived of her means of subsistence, was driven to turn her voice to account. She went with her little Gioachino to Bologna, and there made her début as 'prima donna buffa' with such success as to procure her engagements in various theatres of the Romagna during the Carnival. Meantime the *trombadore* had regained his liberty and was engaged as horn-player in the bands of the theatres in which his wife sang; the child remaining at Bologna, in the charge of an honest pork butcher, while his parents were occupied in campaigns not unlike those of the 'Roman comique' of Scarron. Such surroundings were hardly favourable to education, and it is not wonderful that Gioachino's learning was confined to reading, writing, and arithmetic. Music he acquired from a certain Prinetti of Novara, who gave him harpsichord lessons for three years; but the lessons must have been peculiar, for Prinetti was accustomed to play the scale with two fingers only, combined his music-teaching with the sale of liquors, and had the convenient habit of sleeping as he stood. Such a character was a ready butt for the son of a joker like Giuseppe Rossini; and so incorrigible was Gioachino's love of mimicking his master that at length he was taken from Prinetti, and apprenticed to a smith.

Such was his shame at this result and his sorrow at the distress of his mother, that he resolved from that time forward to amend and apply. In Angelo Tesei he fortunately found a clever master, able to make singing and practical harmony interesting to his pupil: in a few months he learned to read at sight, to accompany fairly on the piano, and to sing well enough to take solos in church at the modest price of three pauls per service. He was thus able, at the age of ten, to assist his parents, who, owing to a sudden change in his mother's voice, were again in misfortune. In his desire to help them he seized every opportunity of singing in public, and eagerly accepted an offer to appear at the theatre of the Commune as Adolfo in Paer's 'Camilla.' This was his first and only step in the career of a dramatic singer, but it must have been often difficult to resist taking it up again, when he saw singers receiving a thousand ducats for appearing in operas which he both composed and conducted for fifty.

Thus at the age of thirteen Rossini was a sufficiently good singer to be well received at the theatre; he also played the horn by his father's side, and had a fair reputation as accompanyist. At this time he acquired a valuable friend in the Chevalier Giusti, commanding engineer at Bologna, who took a great affection for the lad, read and explained the Italian poets to him, and opened his fresh and intelligent mind to the comprehension of the ideal; and it was to the efforts of this distinguished man that he owed the start of his genius, and such general knowledge as he afterwards possessed. After three years with Tesei he put himself under a veteran tenor named Babbini to improve his singing. Shortly after this his voice broke, at the end of the autumn of 1806, during a tournée in which he accompanied his father as chorus-master and *maestro al cembalo*, an engagement in which the daily income of the two amounted to 11 pauls, about equal to 4 shillings. The loss of his voice cost him his engagements in church; but it gave him the opportunity of entering the Conservatorio, or Liceo communale, of Bologna. On March 20, 1807, he was admitted to the counterpoint class of Padre Mattei, and soon after to that of Cavedagni for the cello. He little anticipated when he took his first lesson that his name would one day be inscribed over the entrance to the Liceo, and give its title to the adjacent square.[1]

His progress on the cello was rapid, and he was soon able to take his part in Haydn's quartets; but his counterpoint lessons were a trouble and a worry to him from the first. Before he entered Mattei's class he had composed a variety of things —little pieces for two horns, songs for Zambini, and even an opera, called 'Demetrio,' for his friends the Mombellis. A youth at once so gifted and so practised deserved a master who was not merely a learned musician, but whose pleasure it should be to introduce his pupil into the mysteries of the art with as little trouble as possible. Unfortunately Mattei was a pedant, who could see no reason for modifying his usual slow mechanical system to suit the convenience of a scholar however able or advanced. His one answer to his pupil's enquiry as to the reason of a change or a progression was, 'It is the rule.' The result was that after a few months of discouraging labour Gioachino began to look to instinct and practice for the philosophy, or at least the rhetoric, of his art. The actual parting is the subject of an anecdote which is not improbably true. Mattei was explaining that the amount of counterpoint which his pupil had already acquired was sufficient for a composer in the 'free style'; but that for church-music much severer studies were required. 'What,' cried the boy, 'do you mean that I

[1] By order of Count Pepoli, Aug. 21, 1864.

know enough to write operas?' 'Certainly,' was the reply. 'Then I want nothing more, for operas are all that I desire to write.' There was in this something of the practical wisdom which distinguished the Rossini of later life. Meantime it was necessary that he and his parents should live, and he therefore dropped counterpoint and returned to his old trade of accompanyist, gave lessons, and conducted performances of chamber music. He was even bold enough to lead an orchestra, and took the direction of the 'Accademia dei Concordi'—in other words, of the Philharmonic Society of Bologna. There is no reason to doubt that it was more by scoring the quartets and symphonies of Haydn and Mozart than by any lessons of Padre Mattei's that Rossini learned the secrets and the magic of the orchestra. His fame at the *Liceo* increased day by day, and at the end of his first year his cantata 'Il Pianto d'armonia per la morte d'Orfeo'—the lament of Harmony over the death of Orpheus—was not only rewarded with the prize, but was performed in public, Aug. 8, 1808. He was then in his seventeenth year. The cantata was followed—not by a symphony, as is sometimes said, but—by an overture in the fugued style, in imitation of that to Mozart's 'Magic Flute,' but so weak, that after hearing it played he lost no time in destroying it. The same fate probably attended some pieces for double bass and strings, and a mass, both written at the instance of Signor Triossi of Ravenna, a distinguished amateur of the double bass. Rossini had hitherto been known at Bologna as 'il Tedeschino'—'the little German'—for his devotion to Mozart; but such serious efforts as composing a mass, and conducting a work like Haydn's Seasons at the Philharmonic Society, were probably intended as hints that he wished to be looked upon no longer as a scholar, but as a master waiting his opportunity for the stage.

It may be easier to enter on a career in Italy than elsewhere, but even there it is not without its difficulties. Rossini by his wit and gaiety had, in one of his tournées, made a friend of the Marquis Cavalli, who had promised him his interest whenever it should be wanted. The time was now come to claim the fulfilment of the promise, and Rossini's delight may be imagined when he received an invitation to compose an opera, from the manager of the San Mosè Theatre, at Venice. He hastened to prepare the piece, and 'La Cambiale di Matrimonio' or the 'Matrimonial Market' was produced there in the autumn of 1810. The piece was an opera buffa in one act; it was supported by Morandi, Ricci, De Grecis, and Raffanelli, and had a most encouraging reception. After this feat he returned to Bologna, and there composed for Esther Mombelli's benefit a cantata called 'Didone abbandonata.' In 1811 he wrote for the Teatro del Corso of Bologna an opera buffa in two acts, 'L'Equivoco stravagante,' which closed the season with success, and in which both he and Marcolini the contralto were highly applauded.

1812 was Rossini's twentieth year, and with it begins what may be called his Epoch of Improvisation. Early in that year he produced, at the San Mosè Theatre, Venice, two buffa operas—'L'Inganno felice,' and 'L'occasione fa il Ladro, ossia il Cambio della valigia.' The first of these, a *Farsa*, a trifle in one act, was well sung and much applauded, especially an air of Galli's, 'Una voce,' a duet for the two basses, and a trio full of force and original melody. After the Carnival he went to Ferrara, and there composed an Oratorio, 'Ciro in Babilonia,' which was brought out during Lent, and proved a fiasco. So did 'La Scala di Seta,' an opera buffa in one act, produced at Venice in the course of the spring; but on the other hand, 'Demetrio e Polibio,' brought out at the Teatro Valle, Rome, by his old friends the Mombellis, was well received. The piece was not improbably the same that we have mentioned his writing at the age of fifteen to words by Mme. Mombelli, retouched according to his new lights. At any rate a quartet among its contents was at once pronounced a masterpiece, and a duet, 'Questo cor,' which followed it, produced an excellent effect. Rossini however did not waste time in listening to applause. While the Mombellis were engaged on this serious opera, he flew off to Milan to fulfil an engagement which Marcolini had procured for him, by writing, for her, Galli, Bonoldi, and Parlamagni, a comic piece in two acts called 'La Pietra del Paragone,' which was produced at the Scala during the autumn of 1812, with immense success. It was his first appearance at this renowned house, and the piece is underlined in the list as 'musica nuova di Gioachino Rossini, *di Pesaro*.' The numbers most applauded were a cavatina, 'Ecco pietosa,' a quartet in the second act, the duel-trio, and a finale in which the word 'Sigillara' recurs continually with very comic effect. This finale is memorable as the first occasion of his employing the *crescendo*, which he was ultimately to use and abuse so copiously. Mosca has accused Rossini of having borrowed this famous effect from his 'Pretendenti delusi,' produced at the Scala the preceding autumn, forgetting that Mosca himself had learned it from Generali and other composers. Such accusations, however, were of little or no importance to Rossini, who had already made up his mind to adopt whatever pleased him, wheresoever he might find it. In the meantime he took advantage of his success to pass a few days at Bologna with his parents, *en route* for Venice; and thus ended the year 1812, in which he had produced no less than six pieces for the theatre.

Nor was 1813 less prolific. It began with a terrible mystification. He had accepted a commission of 500 francs for a serious opera for the Grand Theatre at Venice, but the manager of San Mosè, furious at his desertion, in pursuance of some former agreement, forced on him a libretto for that theatre, 'I due Bruschini, o il figlio per azzardo,' which, if treated as intended, would inevitably have been the death of the music. From this dilemma Rossini ingeniously

extricated himself by reversing the situations, and introducing all kinds of tricks. The second violins mark each bar in the overture by a stroke of the bow on the lamp shade; the bass sings at the top of his register and the soprano at the bottom of hers; a funeral march intrudes itself into one of the most comical scenes; and in the finale the words 'son pentito' are so arranged that nothing is heard but 'tito, tito, tito.' Those of the audience who had been taken into the secret were in roars of laughter, but the strangers who had paid for their places in good faith, were naturally annoyed and hissed loudly. But no complaints were of any avail with Rossini, he only laughed at the success of his joke. 'I due Bruschini' disappeared after the first night, and the remembrance of it was very shortly wiped out by the appearance of 'Tancredi' at the Fenice during the Carnival. The characters were taken by Manfredini, Malanotte, Todran, and Bianchi. A work so important and so full of spirit, effect, and melody, was naturally received with enthusiasm, and nobody had time to notice that the long crescendo of the finale strongly resembled that of Paisiello's 'Rè Teodoro,' that a phrase in the first duo, to the words 'Palesa almen,' is borrowed from Paer's 'Agnese,' and that the allegro in E flat of the grand duet, 'Si tu sol crudel,' is also borrowed from the 'Sofonisba' of the same composer. Such criticisms as these were lost in the general admiration at the new and spirited character of the music. It was in fact the first step in the revolution which Rossini was destined to effect in Italian opera. All Venice, and very soon all Italy, was singing or humming 'Mi rivedrai, ti rivedrò.' Hardly any one now remembers that it is only to the happy accident that Malanotte was dissatisfied with her air, and insisted on its being rewritten, that we owe the 'Di tanti palpiti,' which was nicknamed the 'aria de' rizzi,' because it was said to have been dashed off while waiting for a dish of rice. One must read the accounts of the day to understand the madness—for it was nothing else—which 'Tancredi' excited among the Venetians. 'I fancied,' said Rossini, with his usual gaiety, 'that after hearing my opera they would put me into a madhouse—on the contrary, they were madder than I.'

Henceforward he was as much fêted for his social qualities as for his music. But he did not give way to such dissipations for long. His next work was 'L'Italiana in Algeri,' an opera buffa produced at the San Benedetto theatre, Venice, in the summer of 1813. Its greatest novelty was the famous trio 'Papataci,' a charming union of melody and genuine comedy; while the patriotic air, 'Pensà alla Patria,' which closes the work, spoke not less powerfully to the hearts of his countrymen.

'Aureliano in Palmira' and 'Il Turco in Italia' both belong to 1814, and were brought out at the Scala, Milan, the first in the Carnival, the second in the autumn season, before an audience somewhat more critical than that at Venice. 'Aureliano,' though it contains some fine things, which were afterwards utilised in 'Elisabetta' and the 'Barbiere,' was a fiasco. The 'Turco' too was not received with the applause which it afterwards commanded. Rossini, however, was greatly fêted during his stay in Milan, and among his 'amiable protectresses'—to use the expression of Stendhal—was the Princess Belgiojoso, for whom he composed a cantata entitled 'Egle ed Irene.' His next opera, 'Sigismondo,' written for the Fenice at Venice, in the Carnival of 1815, was unsuccessful, and the failure so far affected him as to make him give up work for a time, and retire to his home at Bologna. There he encountered Barbaja, who from being a waiter at a coffee-house had become the farmer of the public gaming-tables and impresario of the Naples theatre. Barbaja though rich was still bent on making money; he had heard of the success of the young composer, and of his brilliant talents, and was resolved to get hold of him; and Rossini, with the support of his parents on his hands, was ready enough to listen to any good proposal. He accordingly engaged with Barbaja to take the musical direction of the San Carlo and Del Fondo theatres at Naples, and to compose annually an opera for each. For this he was to receive 200 ducats (about £35) per month, with a small share in the gaming-tables, amounting in addition to some 1000 ducats per annum, for which however he obtained no compensation after the tables were abolished in 1820.

During Murat's visit to Bologna in April 1815 Rossini composed a cantata in favour of Italian independence; but politics were not his line, and he arrived in Naples fully conscious of this, and resolved that nothing should induce him to repeat the experiment. The arrival of a young composer with so great a reputation for originality was not altogether pleasing to Zingarelli, the chief of the Conservatoire, or to the aged Paisiello. But no intrigues could prevent the brilliant success of 'Elisabetta, regina d'Inghilterra,' which was produced before the Court for the opening of the autumn season, 1815, and in which Mlle. Colbran, Dardanelli, Manuel Garcia, and Nozzari took the principal parts. The libretto of this opera was by a certain Schmidt, and it is a curious fact that some of its incidents anticipate those of 'Kenilworth,' which was not published till several[1] years later; a coincidence still more remarkable when the difference between the two authors is taken into account—Walter Scott gay, romantic, and famous, Schmidt unknown and obscure, and, though not wanting in imagination, so gloomy as to have damped the spirits of Rossini by his mere appearance and conversation. Two historical facts should be noted in regard to 'Elisabetta.' It is the first opera in which Rossini so far distrusted his singers as to write in the ornaments of the airs; and it is also the first in which he replaced the *recitativo secco* by a recitative accompanied by the stringed quartet. The overture and the finale to the first act of 'Elisabetta' are taken from 'Aureliano.'

[1] January, 1821.

Shortly before Christmas Rossini left Naples for Rome to write and bring out two works for which he was under engagement. The first of these, 'Torvaldo e Dorliska,' produced at the Teatro Valle, Dec. 26, 1815, was coldly received, but the second, 'Almaviva, ossia l'inutile precauzione,' founded on Beaumarchais' 'Barber of Seville,' by Sterbini, which made its first appearance at the Argentina Feb. 5, 1816, was unmistakeably damned. The cause of this was the predilection of the Romans for Paisiello, and their determination to make an example of an innovator who had dared to reset a libretto already treated by their old favourite. Rossini, with excellent taste and feeling, had inquired of Paisiello, before adopting the subject, whether his doing so would annoy the veteran, whose 'Barbiere' had been for a quarter of a century the favourite of Europe, and not unnaturally believed that after this step he was secure from the ill-will of Paisiello's friends and admirers.[1] But the verdict of a theatre crammed with partisans is seldom just. It is also as changeable as the winds, or as Fortune herself. Though hissed on the first night, 'Almaviva' was listened to with patience on the second, advanced in favour night by night, and ended by becoming, under the title of 'The Barber of Seville,' one of the most popular comic operas ever composed, and actually eclipsing in spirit and wit the comedy on which it is founded. It was acted by Giorgi-Righetti (Rosina), Rossi (Berta), Zamboni (Figaro), Garcia (Almaviva), Botticelli (Bartolo) and Vitarelli (Basilio). The original overture was lost, and the present one belongs to 'Elisabetta'; the opening of the cavatina 'Ecco ridente' is borrowed from the opening of the first chorus in 'Aureliano.' It is in the delicious andante of this cavatina that Rossini first employs the modulation to the minor third below, which afterwards became so common in Italian music. The air of Berta, 'Il vechiotto cerca moglie,' was suggested by a Russian tune, and the eight opening bars of the trio 'Zitti, zitti' are notoriously taken note for note from Simon's air in Haydn's 'Seasons.' Indeed it is astonishing that, with his extraordinary memory, his carelessness, and his habitual hurry, Rossini should not have borrowed oftener than he did. He received 400 scudi (£80) for 'The Barber,' and it was composed and mounted in a month. When some one told Donizetti that it had been written in thirteen days, 'Very possible,' was his answer, '*he is so lazy.*'

Lazy as he was, Rossini was destined to write twenty operas in eight years, 1815–1823. On his return to Naples after the Carnival of 1816, and the gradual success of 'The Barber,' he found the San Carlo theatre in ashes, to the great distress of the King of Naples, who justly considered it one of the ornaments of his capital. Barbaja, however, undertook to rebuild it more magnificently than before in nine months. He kept his word, and thus acquired not only the protection but the favour of the king. Rossini obtained the same boon by composing a grand cantata entitled 'Teti e Peleo' for the marriage of the Duchess de Berry. No sooner had he completed this than he dashed off a 2-act comic opera entitled 'La Gazzetta' to a libretto by Tottola, which was produced at the Teatro dei Fiorentini, Naples, and which, although in the hands of a clever and charming actress like Chambrand, and of two such public favourites as Pellegrini and Casaccia, was but moderately successful. The work however contained some admirable passages, which were afterwards utilised by the composer. Rossini completed his reform of serious opera by his 'Otello,' which was brought out at the Teatro del Fondo, Naples, in the autumn of 1816, with Isabella Colbran, Nozzari, Davide, Cicimarra, and Benedetti as its interpreters. In this opera, of which the third act is the finest, the recitatives are fewer and shorter than before, and, in accompanying them, the wind instruments are occasionally added to the strings. Some of the most remarkable features of this grand work, such as the finale of the first act, the duet 'Non m'inganno,' and the passionate trio of defiance, were not at first appreciated: the touching air of Desdemona, 'Se il padre,' doubly effective after the paternal curse which precedes it, and the romance of the Willow, with the harp accompaniment—then quite a novelty—were better received; but the tragic termination of the whole was very distasteful to the public, and when the opera was taken to Rome, it was found necessary to invent a happy conclusion. This curious fact deserves mention for the light which it throws on the low condition of dramatic taste in Italy at that period.

The machinery, and power of rapidly changing the scenes, were at that time so very imperfect in smaller Italian theatres, that Rossini would only accept the subject of Cinderella when proposed to him by the manager of the Teatro Valle at Rome, on condition that the supernatural element was entirely omitted. A new comic piece was therefore written by Ferretti under the title of 'Cenerentola, ossia la bontà in trionfo'; Rossini undertook it, and it was produced at the beginning of 1817. Its success was unmistakeable, though the cast was by no means extraordinary—Giorgi, Catarina Rossi, Guglielmi, De Begnis, Verni, and Vitarelli.

In the profusion and charm of its ideas this delicious work is probably equal to the 'Barbière,' but it appears to us to be inferior in unity of style. No doubt this is partly owing to the fact that many of the pieces were originally composed to other words than those to which they are now sung. The duet 'Un soave non sò chè,' the drinking-chorus, and the mock proclamation of the Baron, are all borrowed from 'La Pietra del Paragone'; the air 'Miei rampolli' is from 'La Gazzetta,' where it was inspired by the words 'Una prima ballerina'; the air of Ramiro recalls that to 'Ah! vieni' in

[1] We have Rossini's own authority for this, and for the opera having been written in 13 days, in his letter to M. Scitivaux. See 'Musical World,' Nov. 6, 1875, p. 751.

the trio in 'Otello'; the delightful stretto of the finale, the duet 'Zitto, zitto,' the sestet 'Quest' è un nodo avvilupato'—a truly admirable *morceau*—and various other incidental passages, originally belonged to the 'Turco in Italia'; and the humorous duet 'Un segreto' is evidently modelled on that in Cimarosa's 'Matrimonio.' Such repetitions answered their purpose at the moment, but while thus extemporising his operas Rossini forgot that a day would arrive when they would all be published, and when such discoveries as those we have mentioned, and as the existence of the principal motif of the duet of the letter in 'Otello' in the *Agitato* of an air from 'Torvaldo e Dorliska,' would inevitably be made. As he himself confessed in a letter about this time, he thought he had a perfect right to rescue any of his earlier airs from operas which had either failed at the time or become forgotten since. Whatever force there may be in this defence, the fact remains that 'Cenerentola' and the 'Barber' share between them the glory of being Rossini's *chefs d'œuvre* in comic opera.

From Rome he went to Milan, to enjoy the triumph of the 'Gazza ladra,'—libretto by Gherardini—which was brought out in the spring of 1817 at the Scala. The dignified martial character of the overture, and the prodigious rolls of the drum, produced an immense effect; and the same may be said of all the numbers which are concerned with strong emotion:—give the public a strong impression, and it will not stop to discriminate. Nor did the Milanese, at these early representations, find any difference between the really fine parts of the opera and those which are mere *remplissage*—of which the 'Gazza ladra' has several. Nor would any one have noticed, even had they had the necessary knowledge, that in the first duet and the finale—as was the case also in the finale to the 'Cenerentola'—Rossini had borrowed an effect from the *Poco adagio* of Mozart's Symphony in C (Köchel, 425) by maintaining a sustained accompaniment in the wind while the strings and the voices carry on the ideas and the ornaments.

From Milan he returned to Naples, and produced 'Armida' during the autumn season, a grand opera in 3 acts, with ballet, which was mounted with great splendour, and enjoyed the advantage of very good singers. The duet 'Amor, possente Nume!'—which was soon to be sung though the length and breadth of Italy, the air 'Non soffiro l'offensa,' the incantation scene, the chorus of demons, and the airs de ballet, would alone have been sufficient to excite the Neapolitans; but these were not the only pieces applauded, and the remarkable trio 'In quale aspetto imbelle,' written for three tenors with extraordinary ease, a pretty chorus of women 'Qui tutto è calma,' and a scena with chorus, 'Germano a te richiede'—afterwards employed in the French version of 'Moïse'—all deserve mention.

This fine work had hardly made its appearance before Rossini had to dash off two more—'Adelaide di Borgogna,' sometimes known[1] as 'Ottone Rè d' Italia,' and an oratorio—'Mosè in Egitto.' 'Adelaide' was produced at the Argentina at Rome, in the Carnival of 1818, was well sung and warmly received. 'Mosè' was written for the San Carlo at Naples, and brought out there in Lent with an excellent cast—Isabella Colbran, Benedetti, Porto, and Nozzari. Here for the first time Rossini was so much pressed as to be compelled to call in assistance, and employed his old and tried friend Carafa in the recitatives and in Pharaoh's[2] air 'Aspettar mi.' The scene of the darkness was another step onwards, and the whole work was much applauded, with the exception of the passage of the Red Sea, the representation of which was always laughed at, owing to the imperfection of the theatrical appliances already spoken of. At the resumption of the piece, therefore, in the following Lent, Rossini added a chorus to divert attention from the wretched attempt to represent the dividing waves, and it is to the sins of the Neapolitan stage machinists that we owe the universally popular prayer 'Dal tuo stellato soglio,' which is not only in itself a most important piece of music, but shows the value which Rossini attached to the rest of the work, which is indeed one of his very finest.

As some relaxation after this serious effort he undertook, in the summer of 1818, a one-act piece, 'Adina, o il Califfo di Bagdad,' for the San Carlos Theatre, Lisbon; and immediately after, 'Ricciardo e Zoraide' for San Carlo, Naples, which was sung to perfection at the autumn season there by Isabella Colbran, Pisaroni (whose excessive plainness was no bar to her splendid singing), Nozzari, Davide, and Cicimarra. Davide's air, the trio, the duet for the two women, and that of the two tenors, were all applauded to the echo.

'Ricciardo' was extraordinarily full of ornament, but 'Ermione,' which was produced at San Carlo in the Lent of 1819, went quite in the opposite direction, and affected an unusual plainness and severity. The result showed that this was a mistake. Though splendidly sung, 'Ermione' was not so fortunate as to please, and the single number applauded was the one air in which there was any ornamentation. So much for the taste of Naples in 1819! An equally poor reception was given to a cantata written for the re-establishment of the health of the King of Naples, and sung at the San Carlo Feb. 20, 1819. It consisted of a cavatina for Isabella Colbran, and an air with variations, which was afterwards utilised in the ballet of the 'Viaggio a Reims.' The piece was hastily thrown off, and was probably of no more value in the eyes of its author than was an opera called 'Eduardo e Cristina' which was brought out at the San Benedetto, Venice, this same spring, and was in reality a mere pasticcio of pieces from 'Ermione,'

[1] Zanolini is wrong in placing 'Ottone' in his Catalogue as a distinct work.

[2] Omitted in the Italian score published in Paris.

'Ricciardo,' and other operas, hitherto unheard in Venice, attached to a libretto imitated from Scribe. Fortunately the opera pleased the audience, and sent Rossini back to Naples in good spirits, ready to compose a new cantata for the visit of the Emperor of Austria. The new work was performed on May 9, 1819, at the San Carlo, and was sung by Colbran, Davide, and Rubini, to the accompaniment of a military band. This Rossini probably accepted as a useful experience for his next new opera, the 'Donna del Lago,' in the march of which we hear the results of his experiments in writing for a wind band. The title of the new work seems to show that Scott's works were becoming popular even in Italy.[1] Rossini at any rate was not insensible to their beauties; and in his allusions to the landscape of the lake, and the cavatina 'O mattutini albori' seems to invite attention to his use of local colour. Even at the present day the first act of the opera is well worthy of admiration, and yet the evening of Monday, Oct. 4, 1819, when it was first given, with the magnificent cast of Colbran, Pisaroni, Nozzari, Davide, and Benedetti, was simply one long torture of disappointment to the composer, who was possibly not aware that the storm of disapprobation was directed not against him so much as against Barbaja the manager, and Colbran his favourite. *Felix qui potuit rerum cognoscere causas.*

On the following evening the hisses became *bravos*, but of this Rossini knew nothing, as by that time he was on his road to Milan. The Scala opened on Dec. 26, 1819, for the Carnival season with 'Bianca e Faliero,' libretto by Romani, which was admirably sung by Camporesi and others. No trace of it, however, now remains except the fine duet and equally good quartet, which were afterwards introduced in the 'Donna del Lago,' and became very popular at concerts.

His engagement at Milan over, he hurried back to Naples, to produce the opera of 'Maometto secondo,' before the close of the Carnival. It had been composed in great haste, but was admirably interpreted by Colbran, Chaumel (afterwards Madame Rubini), Nozzari, Cicimarra, Benedetti, and F. Galli, whose Maometto was a splendid success. It was the last opera but one that Rossini was destined to give at Naples before the burst of the storm[2] of the 20th July, 1820, which obliged the King to abandon his capital, ruined Barbaja by depriving him at once of a powerful patron and of the monopoly of the gambling-houses, and drove Rossini to make important changes in his life. But to return. Having for the moment no engagement for the Scala, he undertook to write 'Mathilde di Shabran'[3] for Rome. Torlonia the banker had bought the Teatro Tordinone, and was converting it into the Apollo; and it was for the inauguration of this splendid new house that Rossini's opera was intended. The opening took place on the first night of the Carnival of 1821. The company, though large, contained no first-rate artists, and Rossini was therefore especially careful of the *ensemble* pieces. The first night was stormy, but Rossini's friends were in the ascendancy, Paganini conducted in splendid style, and the result was a distinct success.

On his return to Naples, Rossini learned from Barbaja his intention of visiting Austria, and taking his company of singers to Vienna. Rossini's next opera, 'Zelmira,' was therefore to be submitted to a more critical audience than those of Italy, and with this in view he applied himself to make the recitatives interesting, the harmonies full and varied, and the accompaniments expressive and full of colour, and to throw as much variety as possible into the form of the movements. He produced the opera at the San Carlo before leaving, in the middle of December 1821. It was sung by Colbran, Cecconi, Davide, Nozzari, Ambrosi and Benedetti, and was enthusiastically received. On the 27th of the same month, he took his benefit, for which he had composed a special cantata entitled 'La Riconoscenza'; and the day after left for the North. He was accompanied by Isabella Colbran, with whom he had been in love for years, whose influence over him had been so great as to make him forsake comedy for tragedy, and to whom he was married on his arrival at Bologna. The wedding took place in the chapel of the Archbishop's palace, and was celebrated by Cardinal Opizzoni. Rossini has been accused of marrying for money, and it is certain that Colbran had a villa and £500 a year of her own, that she was seven years older than her husband, and that her reputation as a singer was on the decline.

However this may be, the two Rossinis, after a month's holiday, started for Vienna, where they arrived about the end of February, 1822. He seems to have made his début before the Vienna public on the 30th of March, as the conductor of his 'Cenerentola,' in the German version, as 'Aschenbrödel,' and his *tempi* were found somewhat too fast for the 'heavy German language.' 'Zelmira' was given at the Kärnthnerthor opera-house on April 13, with a success equal to that which it obtained at Naples. The company was the same, excepting Cecconi and Benedetti, who were replaced by Mlle. Ekerlin and Botticelli. An air was added for the former to words furnished by Carpani, who was thus secured as an enthusiastic partisan of the Italian composer. Rossini was not without violent opponents in Vienna, but they gave him no anxiety, friends and enemies alike were received with a smile, and his only retort was a good-humoured joke. He is said to have visited Beethoven, and to have been much distressed by the condition in which he found the great master. The impression which he made on the Viennese may be gathered from a paragraph in the Leipzig 'Allgemeine musik. Zeitung'[4] of the day, in which he is described as 'highly accomplished, of agreeable manners and pleasant appearance, full of wit and fun, cheerful, obliging, courteous, and most accessible. He is

[4] May 8, 1822, reporting the early part of March.

much in society, and charms every one by his simple unassuming style.' After the close of the Vienna season, the Rossinis returned to Bologna, where his parents had resided since 1798. There, at the end of September, he received a flattering letter from Prince Metternich, entreating him to come to Verona, and 'assist in the general re-establishment of harmony.' Such invitations, so couched, are not to be refused, and accordingly the chief composer of Italy yielded to the request of the chief diplomatist of Austria, and arrived at the Congress in time for its opening, Oct. 20, 1822. Rossini's contribution to the Congress was a series of cantatas, which he poured forth without stint or difficulty. The best-known of these is 'Il vero Omaggio'; others are 'L'Augurio felice,' 'La sacra Alleanza,' and 'Il Bardo.' One was performed in the Amphitheatre, which will accommodate 50,000 spectators, and was conducted by Rossini himself. Work, however, never seems to have prevented his going into society, and we find that during this occasion he acquired the friendship not only of Metternich, but of Chateaubriand and Madame de Liéven.

The Congress at an end he began to work at 'Semiramide,' which was brought out at the Fenice, Venice, Feb. 3, 1823, with Madame Rossini, the two Marianis, Galli, and Sinclair the English tenor, for whom there were two airs. The opera was probably written with more care than any of those which had preceded it; and possibly for this very reason was somewhat coldly received. The subject no doubt would seem sombre to the gay Venetians, and they even omitted to applaud the fine quartet (which Verdi must surely have had in his mind when writing the Miserere in the 'Trovatore'), the finale, and the appearance of Ninus, the final trio, at once so short and so dramatic, the cavatina with chorus, and all the other new, bold, bright passages of that remarkable work. Rossini was not unnaturally much disappointed at the result of his labour and genius, and resolved to write no more for the theatres of his native country. The resolution was hardly formed when he received a visit from the manager of the King's Theatre, London (Sigr. Benelli), and a proposal to write an opera for that house, to be called 'La Figlia dell' aria,' for the sum of £240—£40 more than he had received for 'Semiramide,' a sum at the time considered enormous. The offer was promptly accepted, and the Rossinis started for England without delay, naturally taking Paris in their road, and reaching it Nov. 9, 1823. Paris, like Vienna, was then divided into two hostile camps on the subject of the great composer. Berton always spoke of him as 'M. Crescendo,' and he was caricatured on the stage as 'M. Vacarmini'; but the immortal author of the 'Barbière' could afford to laugh at such satire, and his respectful behaviour to Cherubini, Lesueur, and Reicha, as the heads of the Conservatoire, his graceful reception of the leaders of the French School, his imperturbable good temper, and good spirits, soon conciliated every one. A serenade, a public banquet, triumphant receptions at the opera house, a special vaudeville ('Rossini à Paris, ou le Grand Dîner')—everything in short that could soothe the pride of a stranger, was lavished upon him from the first. He in his turn was always kind and amiable, consenting for instance at the request of Panseron—an old colleague at Rome—to act as accompanyist at a concert with the object of saving Panseron's brother from the conscription. Under the hands of Rossini the piano became as effective as an orchestra; and it is on record that the first time that Auber heard him accompany himself in a song he walked up to the instrument and bent down over the keys to see if they were not smoking. Paris however was not at present his ultimate goal, and on Dec. 7, 1823, Rossini and his wife arrived in London. They were visited immediately by the Russian ambassador, M. de Liéven, who gave the composer barely time to recover from the fatigues of the journey before he carried him off to Brighton and presented him to the King. George IV. believed himself to be fond of music, and received the author of 'The Barber of Seville' in the most flattering manner. The royal favour naturally brought with it that of the aristocracy, and a solid result in the shape of two grand concerts at Almack's, at two guineas admission. The singers on these occasions were Mme. Rossini, Mme. Catalani, Mme. Pasta, and other first-rate artists, but the novelty, *the* attraction, was to hear Rossini himself sing the solos[1] in a cantata which he had composed for the occasion, under the title of 'Homage to Lord Byron.' He also took part with Catalani in a duet from Cimarosa's 'Matrimonio' which was so successful as to be encored three times. While the court and the town were thus disputing for the possession of Rossini, 'Zelmira' was brought out at the Opera (Jan. 24, 1824); but the manager was unable to finish the season, and became bankrupt before discharging his engagements with Rossini. Nor was this all. Not only did he not produce the 'Figlia dell' aria,' but the music of the first act unaccountably vanished, and has never since been found. It was in vain for Rossini to sue the manager; he failed to obtain either his MS. or a single penny of the advantages guaranteed to him by the contract. True, he enjoyed a considerable set-off to the loss just mentioned in the profits of the countless soirées at which he acted as accompanyist at a fee of £50. At the end of five months he found himself in possession of £7000; and just before his departure was honoured by receiving the marked compliments of the king at a concert at the Duke of Wellington's, for which His Majesty had expressly come up from Brighton.

In leaving England after so hearty and profitable a reception, Rossini was not taking a leap in the dark; for through the Prince de Polignac, French ambassador in England, he had already concluded an agreement for the

[1] This recalls the visit of a great composer in 1746, when Gluck gave a concert at the King's Theatre, at which the great attraction was his solo on the musical glasses! [See vol. i. p. 601 a.]

musical direction of the Théâtre Italien, Paris, for eighteen months at a salary of £800 per annum. In order to be near his work he took a lodging at No. 28 Rue Taitbout, and at once set about making a radical reform in the ages of the singers in his company. Knowing that Paer was his enemy, and would take any opportunity of injuring him, he was careful to retain him in his old post of *maestro al Cembalo*; but at the same time he engaged Hérold (then a young man of 25) as chorus-master, and as a check on the pretensions of Madame Pasta he brought to Paris Esther Mombelli, Schiassetti, Donzelli, and Rubini, successively. To those who sneered at his music he replied by playing it as it was written, and by bringing out some of his operas which had not yet made their appearance in Paris, such as 'La Donna del Lago' (Sept. 7, 1824), 'Semiramide' (Dec. 8, 1825), and 'Zelmira' (Mar. 14, 1826). And he gave much éclat to his direction by introducing Meyerbeer's 'Crociato'—the first work of Meyerbeer's heard in Paris—and by composing a new opera, 'Il Viaggio a Reims, ossia l'Albergo del giglio d'oro,' which he produced on June 19, 1825, during the fêtes at the coronation of Charles X. The new work is in one act, and three parts; it is written for 14 voices, which are treated with marvellous art. It was sung by Mmes. Pasta, Schiassetti, Mombelli, Cinti, Amigo, Dotti, and Rossi; and by MM. Levasseur, Zucchelli, Pellegrini, Graziani, Auletta, Donzelli, Bordogni, and Scudo—a truly magnificent assemblage. In the ballet he introduced an air with variations for two clarinets, borrowed from his Naples cantata of 1819, and played by Gambaro (a passionate admirer of his) and by F. Berr. In the hunting scene he brought in a delicious fanfare of horns, and the piece winds up with 'God save the King,' 'Vive Henri quatre,' and other national airs, all newly harmonised and accompanied.

The King's taste was more in the direction of hunting than of music, and the result was that the 'Viaggio' was only given two or three times; but it had been a work of love with Rossini, and we shall presently see how much he valued it. Meantime we may mention that after the Revolution of 1848 the words were suitably modified by H. Dupin, and the piece appeared in two acts at the Théâtre Italien as 'Andremo noi a Parigi,' on Oct. 26 of that year.[1]

After the expiration of Rossini's agreement as director of the Théâtre Italien, it was a happy idea of the Intendant of the Civil List to confer upon him the sinecure posts of 'Premier Compositeur du Roi' and 'Inspecteur Général du Chant en France,' with an annual income of 20,000 francs, possibly in the hope that he might settle permanently at Paris, and in time write operas expressly for the French stage. This was also an act of justice, since in the then absence of any law of international[2] copyright his pieces were public property, and at the disposal not only of a translator like Castil-Blaze, but of any manager or publisher in the length and breadth of France who chose to avail himself of them. Fortunately the step was justified by the event. The opera of 'Maometto'—originally written by the Duke of Ventagnano, and produced at Naples in 1820—had never been heard in France. Rossini employed MM. Soumet and Balocchi to give the libretto a French dress; he revised the music, and considerably extended it; and on Oct. 9, 1826, the opera was produced at the Académie as 'Le Siége de Corinthe,' with a cast which included Nourrit and Mlle. Cinti, and with great success. The new opera (for which Rossini received 6,000 francs from Troupenas) was written at No. 10, Boulevard Montmartre, a five-storied house which contained the residences of Boieldieu and Carafa, and was the birthplace of 'La Dame Blanche,' 'Masaniello,' and 'Guillaume Tell.' It has since been destroyed in constructing the Passage Jouffroy.

After this feat Rossini turned to another of his earlier works, as not only sure of success but eminently suited to the vast space and splendid *mise en scêne* of the Grand Opèra. This was 'Mosè.' He put the revision of the libretto into the hands of Etienne Jouy and Balocchi, and settled the cast as follows:—Anaï, Mlle. Cinti—with a new air (4th act); Sinaïde, Mme. Dabadie; Marie, Mlle. Mori; Aménophis, A. Nourrit; Moïse, Levasseur; Pharaon, Dal**a**lie; Eliezer, Alexis. 'Moïse' was produced March 27, 1827, and created a profound impression. True, it had been heard in its original form at the Italiens five years before, but the recollection of this only served to bring out more strongly the many improvements and additions in the new version—such as the Introduction to the 1st act; the quartet and chorus; the chorus 'La douce Aurore'; the march and chorus, etc. The fine finale to the 3rd act, an English critic has pronounced to have no rival but the finale to Beethoven's C minor Symphony. The airs de ballet were largely borrowed from 'Armida' (1817) and 'Ciro in Babilonia' (1812). This magnificent work gave Rossini a sort of imperial position in Paris. But it was necessary to justify this, and he therefore resolved to try a work of a different character, and according to the axiom of Boileau, to pass

> From grave to gay, from lively to severe—

not in the direction of comic but of lyric opera. With this view he employed Scribe and Poirson to develope a vaudeville which they had written in 1816 to the old legend of 'Le Comte Ory,' adapting to that lively piece some of his favourite music in the 'Viaggio a Reims,'—the introduction and finale of the 1st act, the duet of the Count and Countess, and the famous narrative of Raimbaut when he brings up the

[1] The score of 'Andremo noi a Parigi' is in the Library of the Conservatoire, but the finale of the 'Viaggio,' which we have mentioned as containing national airs, is not there, and this curious feat has probably vanished for ever.

[2] The custom in Italy in those days was to sell an opera to a manager for two years, with exclusive right of representation; after that it became public property. The only person who derived no profit from this arrangement was the unfortunate composer. *Sic vos non vobis.*

wine from the cellar, which it is difficult to believe was in its first form applied to the taking of the Trocadéro! Adolphe Nourrit, who was not only a great artist, but a poet of very considerable dramatic power, was privately of much assistance to Rossini in the adaptation of his old music to the new words, and in the actual mounting of the piece in which he was to take so important a share. 'Le Comte Ory' was produced at the Académie, Aug. 20, 1828, and the principal characters were taken by Mme. Damoreau-Cinti, Mlles. Jawurek and Mori, Adolphe Nourrit, Levasseur, and Dabadie. The Introduction—in place of an Overture proper—is based on the old song which gives its name to the piece. In the second act, the grace and charm of the melodies more than atone for the very doubtful incidents of the libretto; and this was the most successful portion of the work. 'Charming!' 'Divine!' are the usual comments on its performance; but no one seems yet to have noticed that the most delicious passage of the drinking chorus ('C'est charmant! c'est divin!') is borrowed from the *Allegretto scherzando* of Beethoven's 8th Symphony. Rossini was at that time actually engaged with Habeneck, the founder of the Concerts of the Conservatoire, and his intimate friend, in studying the Symphonies of Beethoven; and it is easy to understand how impossible it must have been to forget the fresh and graceful movement referred to, in the termination of which many have indeed recognised a distinct allusion to Rossini himself.

The study of Beethoven was at any rate not a bad preparation for the very serious piece of work which was next to engage him, and for a great portion of which he retired to the château of his friend Aguado the banker at Petit-Bourg. Schiller had recently been brought into notice in France by the translation of M. de Barante; and Rossini, partly attracted by the grandeur of the subject, partly inspired by the liberal ideas at that moment floating through Europe, especially from the direction of [1] Greece, was induced to choose the Liberator of the Swiss Cantons as his next subject. He accepted a libretto offered him by Etienne Jouy, Spontini's old librettist, who in this case was associated with Hippolyte Bis. Their words, however, were so unmusical and unrhythmical, that Rossini had recourse to Armand Marrast, at that time Aguado's secretary, and the whole scene of the meeting of the conspirators—one of the best in operatic literature, and the only thoroughly satisfactory part of 'Guillaume Tell'—was rewritten by him, a fact which we are glad to make public in these pages.

This grand opera, undoubtedly Rossini's masterpiece, was produced at the Académie on Aug. 3, 1829, with the following cast:—Arnold, Nourrit; Walter Fürst, Levasseur; Tell, Dabadie; Ruodi, A. Dupont; Rodolphe, Massol; Gessler, Prévost; Leutold, Prévôt; Mathilde, Damoreau-Cinti; Jemmy, Dabadie; Hedwige, Mori.

'Tell' has now become a study for the musician, from the first bar of the overture to the storm scene and the final hymn of freedom. The overture is no longer, like Rossini's former ones, a piece of work on a familiar, well-worn pattern, but a true instrumental prelude, which would be simply perfect if the opening and the fiery peroration were only as appropriate to the subject as they are tempting to the executant. We find no absurdities like those in 'Moïse'—no song of thanksgiving accompanied by a brilliant polonaise, no more cabalettas, no more commonplace phrases or worn-out modulations,—in short, no more padding of any kind. True, it would not be difficult to criticise the length of the duet in the 2nd act, which recalls the duet in 'Semiramide,' and breathes rather the concert-room than the stage—or the style of the finale of the 3rd act, which is not appropriate to the situation. But in place of thus searching for spots on the sun we prefer to bask in his radiance and enjoy his beneficent warmth.

The spectacle of a great master at the zenith of his glory and in the very prime of life thus breaking with all the traditions of his genius and appearing as in a second avatar is indeed a rare and noble one. The sacrifice of all the means of effect by which his early popularity had been obtained is one which Rossini shares with Gluck and Weber, but which our former experience of his character would hardly have prepared us for. He seems at length to have discovered how antagonistic such effects were to the simplicity which was really at the base of the great musical revolution effected by him; but to discover, and to act on a discovery, are two different things, and he ought to have full credit for the courage and sincerity with which, at his age, he forsook the flowery plains in which his genius had formerly revelled, for loftier and less accessible heights.

But though deserting, as he does in 'Tell,' the realm of pure sensation, and discarding the voluptuous music of his early operas, Rossini remains still the fresh and copious melodist that he always was. In fact, he is more. The strains in which he has depicted the Alps and their pastoral inhabitants are fresher, more graceful, more happy than ever; the notes which convey the distress of the agonised father; the enthusiastic expression of the heroes of Switzerland; the harrowing phrases which convey the anguish of a son renouncing all that he holds most dear; the astonishing variety of the colours in which the conspiracy is painted; the lofty strains of the purest patriotism; the grandeur of the outlines; the severity of the style; the coexistence of so much variety with such admirable unity; the truly Olympian dignity which reigns throughout—all surpass in their different qualities anything that he ever accomplished before. But what might not be expected from a composer who at thirty-seven had thus voluntarily submitted himself to the severity of

[1] Evidence of the extent to which liberal ideas had seized society at this date is to be found in the fact that Carafa's 'Masaniello' and Auber's 'Muette de Portici'—both bearing directly on popular insurrection, were produced in Paris on Dec. 27, 1827, and Feb. 29, 1828, respectively.

French taste, and was bent on repaying our hospitality with so magnificent a masterpiece?

But the career thus splendidly inaugurated was not destined to be pursued; circumstances, political and domestic, stopped him on the threshold. He was anxious to visit once more the city in which his beloved mother died in 1827, and where his father, who had soon tired of Paris, was awaiting him. With this view he resigned his office as inspector of singing in France, and made an arrangement with the Government of Charles X., dating from the beginning of 1829, by which he bound himself for ten years to compose for no other stage but that of France, and to write and bring out an opera every two years, receiving for each such opera the sum of 15,000 francs. In the event of the Government failing to carry out the arrangement he was to receive a retiring pension of 6000 francs. 'Guillaume Tell' was thus to be the first of a series of five operas.

After a serenade from the opera orchestra, Rossini, therefore, left Paris for Bologna. Here he was engaged in considering the subject of 'Faust,' with a view to his next work, when he received the sudden news of the abdication of Charles X., and the revolution of July 1830. The blow shattered his plans and dissipated his fondest hopes. He flattered himself that he had regenerated the art of singing in France. What would become of it again under a king who could tolerate no operas but those of Grétry? Anxious to know if his friend Lubbert was still at the head of the Académie de Musique, and if the new Intendant of the Civil List would acknowledge the engagements of his predecessor, he returned to Paris in Nov. 1830; and intending only to make a short stay, took up his quarters in the upper storey of the Théâtre des Italiens, of which his friend Severini was then director. Here however he was destined to remain till Nov. 1836. The new government repudiated the agreement of its predecessor, and Rossini had to carry his claim into the law-courts. Had his law-suit alone occupied him, it would not have been necessary to stay quite so long, for it was decided in his favour in Dec. 1835. But there was another reason for his remaining in Paris, and that was his desire to hear 'The Huguenots' and ascertain how far Meyerbeer's star was likely to eclipse his own. It is impossible to believe that a mere money question could have detained him so long at a time when almost every day must have brought fresh annoyances. After reducing 'Guillaume Tell' from five acts to three, they carried their love of compression so far as to give only one act at a time, as a *lever de rideau*, or accompaniment to the ballet. This was indeed adding insult to injury. 'I hope you won't be annoyed,' said the Director of the Opera to him one day on the boulevard, 'but to-night we play the second act of Tell.' 'The whole of it?' was the reply. How much bitter disappointment must have been hidden under that reply! During the whole of this unhappy interval he only once resumed his pen, namely in 1832 for the 'Stabat Mater,' at the request of his friend Aguado, who was anxious to serve the Spanish minister Señor Valera. He composed at that time only the first six numbers, and the other four were supplied by Tadolini. The work was dedicated to Valera, with an express stipulation that it should never leave his hands. In 1834 he allowed Troupenas to publish the 'Soirées musicales,' 12 lovely vocal pieces of very original form and harmony, several of which have still retained their charm.

The rehearsals of the Huguenots lingered on, and it was not till Feb. 29, 1836, that Rossini could hear the work of his new rival. He returned to Bologna shortly after, taking Frankfort in his way, and meeting Mendelssohn.[1] He had not been long in Bologna before he heard of the prodigious success of Duprez in the revival of 'Guillaume Tell' (April 17). Such a triumph might well have nerved him to fresh exertions. But it came a year too late; he had already taken an unfortunate and irrevocable resolution never again to break silence. It would be very wrong to conclude from this that he had lost his interest in music. The care which he bestowed on the Liceo of Bologna, of which he was honorary director, show that the art still exercised all its claims on him. He was especially anxious to improve the singing of the pupils, and among those who are indebted to his care, Marietta Alboni holds the first rank.

Rossini's father died April 29, 1839, and he soon afterwards learned to his disgust that the MS. of the Stabat had been sold by the heirs of Señor Valera, and acquired by a Paris publisher for 2000 francs. He at once gave Troupenas full power to stop both publication and performance, and at the same time completed the work by composing the last four movements, which, as we have already said, were originally added by Tadolini. The first six movements were produced at the Salle Herz, Paris, Oct. 31, 1841, amidst very great applause. Troupenas[1] bought the entire score for 6000 francs.[2] He sold the right of performance in Paris during three months to the Escudiers for 8000, which they again disposed of to the director of the Théâtre Italien for 20,000. Thus three persons were enriched by this single work. It was performed complete for the first time at the Salle Ventadour, Jan. 7, 1842, by Grisi, Albertazzi, Mario and Tamburini.

Notwithstanding its brilliant success, some critics were found to accuse the composer of importing the strains of the theatre into the church; but it must not be forgotten that religion in the South is a very different thing from what it is in the North. Mysticism could have no place in the mind of the man who had revived and immortalised the legend of Comte Ory. Such a man will naturally utter his prayers aloud, in the sunshine of noon, rather than breathe them to himself in the gloom and mystery of night. The

[1] See Hiller's 'Mendelssohn,' and M.'s own letter, July 14, 1836.

[2] We have mentioned that he paid 6,000 francs for the Siege of Corinth.' For 'Moise' he gave only 2,400; but, on the other hand, the 'Comte Ory' cost him 12,000, and 'Guillaume Tell' 24,000.

prayer and the scene of the darkness in 'Moïse,' as well as the first movement and the unaccompanied quartet in the Stabat, will always hold their place as religious music; and are of themselves sufficient to show that Rossini, sceptic as he was, was not without religious feeling.

But no triumphs from without or gratifications from within can shield us from physical ills. At the very moment that the Stabat was making its triumphant progress round the world, Rossini began to suffer tortures from the stone, which increased to such an extent as to force him in May 1843, to Paris, where he underwent an operation which proved perfectly satisfactory. We next find him writing a chorus to words by Marchetti for the anniversary festival of Tasso at Turin, on March 13, 1844. On the 2nd of the following September 'Othello' was produced in French at the Académie with Duprez, Barroilhet, Levasseur, and Mme. Stoltz. Rossini however had nothing to do with this adaptation, and the divertissement was arranged entirely by Benoist from airs in 'Mathilde de Sabran' and 'Armida.' Two interpolations in the body of the piece—the cavatina from 'L'Italiana in Algeri' in the part of Desdemona, and an air from the 'Donna del Lago' in that of Iago—were neither appropriate nor satisfactory. While 'Othello' was thus on the boards of the opera, Troupenas brought out 'La Foi, l'Espérance et la Charité' (Faith, Hope, and Charity), three choruses for women's voices, the two first composed many years previously for an opera on the subject of *Œdipus*. These choruses are hardly worthy of Rossini. They justify Berlioz's sarcasm—'his Hope has deceived ours; his Faith will never remove mountains; his Charity will never ruin him.' Troupenas also brought out a few songs hitherto unpublished, and these reattracted the attention of the public in some degree to the great composer. His statue was executed in marble[1] by Etex, and was inaugurated at the Académie de Musique, June 9, 1846. A few months later (Dec. 30), by his permission, a pasticcio adapted by Niedermeyer to portions of the 'Donna del Lago,' 'Zelmira,' and 'Armida,' and entitled 'Robert Bruce,' was put on the stage of the Opera, but it was not successful, and Mme. Stoltz was even hissed. From his seclusion at Bologna Rossini kept a watchful eye upon the movements of the musical world. It would be interesting to know if he regretted having authorised the manufacture of this pasticcio. If we may judge from the very great difficulty with which some time later Méry obtained his permission to translate 'Semiramide' and produce it on the French stage (July 9, 1860), he did. It is certain that during his long residence at Bologna he only broke his vow of silence for the 'Inno popolare a Pio IX.' The commencement of this was adapted to an air from 'La Donna del Lago,' and its peroration was borrowed from 'Robert Bruce,' which gives ground for supposing that he himself was concerned in the arrangement of that opera, and explains his annoyance at its failure.

The political disturbances which agitated the Romagna at the end of 1847 compelled Rossini to leave Bologna. He quitted the town in much irritation. His turn for speculation, and his farming the fisheries, in order, as he said, that he might always have fresh fish, had given much offence. After the death of his wife (Oct. 7, 1845), he married (in 1847) Olympe Pelissier, with whom he had become connected in Paris at a time when she was greatly in public favour, and when she sat to Vernet for his picture of Judith and Holofernes. In fact at this time the great musician had to a great extent disappeared in the voluptuary. From Bologna he removed to Florence, and there it was that this writer visited him in 1852. He lived in the Via Larga, in a house which bore upon its front the words *Ad votum*. In the course of a long conversation he spoke of his works with no pretended indifference, but as being well aware of their worth, and knowing the force and scope of his genius better than any one else. He made no secret of his dislike to the violent antivocal element in modern music, or of the pleasure he would feel when 'the Jews had finished their Sabbath.' It was also evident that he had no affection for the capital of Tuscany, the climate of which did not suit him.

At length, in 1855, he crossed the Alps and returned to Paris, never again to leave it. His reception there went far to calm the nervous irritability that had tormented him at Florence, and with the homage which he received from Auber and the rest of the French artists his health returned. His house, No. 2 in the Rue Chaussée d'Antin, and at a later date his villa at Passy, were crowded by the most illustrious representatives of literature and art, to such an extent that even during his lifetime he seemed to assist at his own *apotheosis*. Was it then mere idleness which made him thus bury himself in the Capua of his past successes? No one who, like the present writer, observed him coolly, could be taken in by the comedy of indifference and modesty that it pleased him to keep up. We have already said that, after Meyerbeer's great success, Rossini had taken the resolution of writing no more for the Académie de Musique and keeping silence.

The latter part of this resolution he did not however fully maintain. Thus he authorised the production of 'Bruschino' at the Bouffes Parisiens on Dec. 28, 1857, though he would not be present at the first representation. 'I have given my permission,' said he, 'but do not ask me to be an accomplice.' The discovery of the piece—which is nothing else but his early farce of 'Il figlio per azzardo' (Venice, 1813)—was due to Prince Poniatowski, and some clever librettist was found to adapt it to the French taste. A year or two later Méry with difficulty obtained his permission to transform 'Semiramide' into 'Sémiramis,' and the opera in its new garb was produced at the Académie July 9, 1860, with Carlotta Marchisio as Semiramis,

[1] It represented him seated in an easy attitude. It was destroyed when the opera-house was burnt down in 1873.

her sister Barbara as Arsace, and Obin as Assur. In this transformation Rossini took no ostensible part. Carafa at his request arranged the recitatives, and wrote the ballet music. These were mere revivals. Not so the sacred work which he brought out at the house of M. Pillet-Will the banker on March 14, 1864, and at the rehearsals of which he presided in person. We allude to the 'Petite messe solennelle,' which though so called with a touch of Rossinian pleasantry is a mass of full dimensions, lasting nearly two hours in performance. Rossini had always been on good terms with the bankers of Paris, and after Rothschild and Aguado he became very intimate with the Count Pillet-Will (1781–1860), a rich amateur, passionately fond of music, who had learned the violin from Baillot, and amused himself with composing little pieces for that instrument. His son, more retiring but not less enthusiastic than his father, had always been one of Rossini's most devoted admirers, and on the occasion of the inauguration of his magnificent house in the Rue Moncey, it was a happy thought of the composer to allow his 'Petite messe solennelle' to be heard there for the first time. This important composition, comprising solos and choruses, was written with the accompaniment of a harmonium and two pianos. On this occasion it was sung by the two Marchisios, Gardoni, and Agnesi, and was much applauded; the Sanctus and Agnus were redemanded, the chorus portions of the Credo were much admired, and the fluent style of the fugued passages in the Gloria—perhaps the best portion of the work—was a theme of general remark. Rossini afterwards scored it with slight alterations for the full orchestra—perhaps a little heavily—and in this shape it was performed for the first time in public at the Théâtre Italien, on the evening of Sunday Feb. 28, 1869, on the 78th birthday of the composer, as nearly as that could be, seeing that he was born in a leap year, on Feb. 29.

In the last years of his life Rossini affected the piano, spoke of himself as a fourth-rate pianist, and composed little else but pianoforte pieces. Most of these were in some sense or other *jeux d'esprit*; some were inscribed to his parrot, or had the most fanciful titles—'Valse anti-dansante,' 'Fausse couche de Polka-mazurka,' 'Etude asthmatique,' 'Echantillon de blague,' etc. The whole were arranged in cases with such quaint names as 'Album olla podrida,' 'Les quatre[1] mendiants,' 'Quatre hors-d'œuvre,' 'Album de Château,' 'Album de Chaumière,' etc. For the Exposition universelle of 1867, however, he wrote a Cantata, which was performed for the first time at the ceremony of awarding the prizes on July 1, and was also executed at the opera at the free performances on August 15, 1867 and 68. It opens with a hymn in a broad style, in which the author of 'Sémiramis' and 'Moïse' is quite recognisable, but winds up with a vulgar quick-step on a *motif* not unlike the country dance known as 'L'Ostendaise.' The title, which we give from the autograph, seems to show that the son of the jolly 'trombadore' of Pesaro was quite aware of the character of the finale of his last work.

À Napoléon III
et
à son vaillant Peuple.

Hymne
avec accompagnement d'orchestre et musique militaire
pour baryton (solo), un Pontife,
chœur de Grands Prêtres
chœur de Vivandières, de Soldats, et de Peuple.
A la fin
Danse, Cloches, Tambours et Canons.
Excusez du peu!!

The final touch is quite enough to show that Rossini to the last had more gaiety than propriety, more wit than dignity, more love of independence than good taste. He preferred the society of artists to any other, and was never so happy as when giving free scope to his caustic wit or his Rabelaisian humour. His *bons mots* were abundant, and it is surprising that no one has yet attempted to collect them. It is a task which we commend to M. Joseph Vivier, the eminent horn-player, himself a master of the art, and formerly one of the liveliest and most intimate of the circle at Passy. One or two may find place here. When that charming actress Mme. Arnould Plessy met Rossini for the first time she was a little embarrassed at not knowing exactly how to address him. 'To call you Monsieur would be absurd, and unfortunately I have no right to call you my master.' 'Call me,' said he, 'mon petit lapin.' One day, in a fit of the spleen, he cried out, 'I am miserable; my nerves are wrong, and every one offers me string instead.' D'Ortigue, the author of the Dictionary of Church Music, had been very severe on him in an article in the 'Correspondant' entitled 'Musical royalties,' and an enthusiastic admirer of the Italian School having replied somewhat angrily, Rossini wrote to him, 'I am much obliged to you for your vigorous treatment (*lavement*) of the tonsure of my friend the Curé d'Ortigue.' A number of friends were disputing as to which was his best opera, and appealed to him:—'You want to know which of my works I like best? Don Giovanni!' He took extreme delight in his summer villa at Passy, which stood in the avenue Ingres, and had a fine garden of about three acres attached to it. Here he was abundantly accessible to every one who had any claims on his notice, and the younger and gayer his visitors the more he seemed to enjoy them. More than one young English musician has cause to remember the charming familiarity of the great composer with his '*jeune confrère*.' In that house he died on Friday Nov. 13, 1868, at 9 p.m. after a long day of agony. His funeral was magnificent. As Foreign Associate of the Institute (1833); Grand Officer of the Legion of Honour (1864), and the orders of St. Maurice and St. Lazare; commander of many foreign

[1] Dried fruits for dessert.

orders, and honorary member of a great number of Academies and musical institutions—Rossini had a right to every posthumous honour possible. The funeral took place at the church of the Trinity on Saturday Nov. 21, 1868; it was gorgeous, and was attended by several deputations from Italy. Tamburini, Duprez, Gardoni, Bonnehée, Faure, Capoul, Belval, Obin, Delle Sedie, Jules Lefort, Agnesi, Alboni, Adelina Patti, Nilsson, Krauss, Carvalho, Bloch, and Grossi, with the pupils of the Conservatoire, sang the Prayer from 'Moïse.' Nilsson gave a fine movement from the 'Stabat' of Pergolesi, but the most impressive part of the ceremony was the singing of the 'Quis est homo' from Rossini's own 'Stabat mater' by Patti and Alboni. To hear that beautiful music rendered by two such voices, and in the presence of such artists, over the grave of the composer, was to feel in the truest sense the genius of Rossini, and the part which he has played in the music of the 19th century.

At the opening of his career Rossini had two courses before him, either, like Simone Mayer and Paer, to follow the footsteps of the old Neapolitan masters, or to endeavour to revolutionise the Italian opera, as Gluck and Mozart had revolutionised those of France and Germany. He chose the latter. We have described the eagerness with which he threw himself into the path of innovation and the audacity with which while borrowing a trait of harmony or of piquant modulation from Majo (1745–74) or the skeleton of an effect from Generali (1783–1832) he extinguished those from whom he stole, according to the well-known maxim of Voltaire. His great object at first was to carry his hearers away, and this he did by the *crescendo* and the *cabaletta*, two ready and successful methods. We have already mentioned his innovations in the accompaniment of the recitatives, first, in 'Elisabetta,' the full quartet of strings, and next in 'Otello' the occasional addition of the wind instruments. This was a great relief to the monotony of the old *secco* recitative. But his innovations did not stop there: he introduced into the orchestra generally a great deal more movement, variety, colour, combination, and (it must be allowed) noise, than any of his predecessors had done, though never so as to drown the voices. In Germany the orchestra was well understood before the end of the 18th century; and we must not forget that—not to speak of Mozart's operas, of Fidelio, or of Cherubini's masterpieces—before the production of the Barbiere (1816), eight of Beethoven's Symphonies were before the world. But in Italy instrumentation was half a century behind, and certainly none of Rossini's predecessors in that country ever attempted what he did in his best operas, as for instance in the *finale* to Semiramide (1823), where the employment of the four horns and the clarinets, and the astonishingly clever way in which the orchestra is handled generally, are quite strokes of genius. The horns are always favourites of his, and are most happily used throughout 'Guillaume Tell,' where we may point to the mixture of pizzicato and bowed notes in the Chorus of the 1st act, the harp and bell in the Chorus of the 2nd act, and other traits in the Conspiracy scene as marks of real genius, for the happy and picturesque effects produced by very simple means. Rossini had further, like all the great masters, a strong feeling for rhythm, as the most powerful of all aids to interest and success, and was fond of quick movements and of triple time.[1] But an excessive love of jewels is apt to lead to the use of sham diamonds, and his incessant pursuit of effect led him to excessive ornamentation, to noise, and to a passion for attractive forms rather than for the feeling which should lie at the root of them. Much of this, however, was atoned for in his early operas by his masterly way of writing for the voices, by the strength of his melody, the copious flow of his ideas, and the irresistible contagion of his good spirits, especially in comic opera. Having thus secured his position in public favour, his next step—a very legitimate one—was to satisfy the demands of his own taste and conscience. During this second period the subjects of his operas increase in interest. In 'Mosè' he deals with the religious sentiment. In the 'Donna del Lago' he rivals Walter Scott on his own field; and in 'Semiramide' he has recourse to oriental history in his endeavour to give an independent value to his drama. During this period his melodies drop some of their former voluptuous character, but in return are more pathetic and more full of colour, though still wanting in tenderness and depth.

Lastly, in his Paris operas, and especially in 'Guillaume Tell,' the influence of French taste makes itself strongly felt, and we find a clearness, a charm, a delicacy in the small details, a sense of proportion and of unity, a breadth of style, an attention to the necessities of the stage, and a dignity—which raise this epoch of his career far higher than either of the others.

Rossini's music, as we have already said, has been very differently estimated. Ingres, in whose view honesty in art held almost as high a place as genius or originality, has called it 'the music of a dishonest (*malhonnête*) man.' Berlioz would gladly have burnt it all, and Rossini's followers with it.[2] On the other hand, Schubert, though fully alive to his weaknesses, as his caricatures of Rossini's overtures show, and with every reason to dislike him from the fact that the Rossini *furore* kept Schubert's own works off the stage—contrasts his operas most favourably with the 'rubbish' which filled the Vienna theatres at that time, and calls him emphatically 'a rare genius.' 'His instrumentation,' he continues, 'is often extremely original, and so is the voice writing,

[1] The English reader will find these points happily touched on in Mr. Sutherland Edwards's 'History of the Opera,' chap. xvi. Rossini's use of the solo bass voice, in which, consciously or not, he followed the lead of Mozart, has been already mentioned in this Dictionary, vol. i. p. 149.

[2] Berlioz, 'Memoires,' chap. xiv. The abuse of the 'brutale grosse caisse de Rossini' sounds oddly from Berlioz's pen.

nor can I find any fault with the music (of Otello) if I except the usual Italian gallopades and a few reminiscences of Tancredi.'[1] Mendelssohn too, as is well known, would allow no one to depreciate Rossini. Even Schumann, so intolerant of the Italian School, is enthusiastic over one of his operas, and calls it 'real, exhilarating, clever music.' Such exaggerations as those of Ingres and Berlioz are as bad as intentional injustice; it is better to recollect the very difficult circumstances which surrounded an Italian composer eighty years ago, and to endeavour to discover why music which was once so widely worshipped has now gone out of fashion. Is it the fault of his librettos? No doubt he would have been wiser to stick to comic subjects, like that of 'The Barber of Seville,' and to have confined himself for his librettos to the poets of his own family. Is it the elaborate ornamentation of much of his music? No doubt ornamented music decays sooner than that of a plainer style, and it is always dangerous, though tempting, to adopt the fashionable forms. But one main reason is to be found in the deterioration of the art of singing; the Paris opera can now boast neither 'ténor de force' nor 'ténor de grace'; and the recent revival of the 'Comte Ory' (Oct. 29, 1880) showed conclusively the mediocrity of the present singers at the Académie. In fact Rossini is now expiating his fault in having demanded too much from his singers.[2] Some feeling of remorse on this head seems to have prompted his efforts to improve the art of singing both in Paris and Bologna. Indeed so keenly alive was he to the tendencies which have degraded the stage since 1830, and so anxious to further the love of fresh melody and the prosecution of sound musical study, that he bequeathed to the Institute an annual sum of 6000 francs (£240) for a competition both in dramatic poetry and composition, specifying particularly that the object of the prize should be to encourage composers with a turn for melody. The prize was given on the first occasion to M. Paul Collin, author of the libretto of the 'Daughter of Jairus,' and to the Countess de Grandval, a distinguished musician, but hardly a remarkable melodist. The greater part of his property Rossini devoted to the foundation and endowment of a Conservatoire of Music at his native town, Pesaro, of which A. Bazzini has just (June 1881) been appointed Director.

In order to complete this sketch it is necessary to give as complete a list as possible of his works. N.B. In the column after the names, (1) signifies that the score has been engraved; (2) that it is published for voices and piano; (3) that it is still in manuscript.

[1] Letter in Kreissle's Biography of Schubert, chap. vii.

[2] It is amusing to find Rossini accused in his own time, as both Beethoven and Wagner have been, of being a destroyer of the voice. The correspondent of the Allg. Musik. Zeitung, writing from Venice in April 1819, mentions a certain Countess Dieterichstein at Rome, who pronounced that his passages were so straining and ruinous for both throat and chest that if he wrote operas for ten years longer there would be no more singers left in Italy. Giorgi, continues the correspondent, for whom he wrote the Cenerentola, is already completely ruined.

[1] This is the correct date, not Dec. 26, 1816. [See vol. i. 138 *b*.]

III. SACRED MUSIC.

Stabat Mater, 1832-41. 1, 2, 3.

La Foi, L'Espérance, et la Charité, 1844. 2, 3. Instrumented by Balbi.

Petite Messe Solennelle, 1864. 2, 3.

Tantum ergo, for 2 tenors and bass, with orchestra. 1, 2, 3. Composed at Bologna, and performed Nov. 28, 1847, for the re-establishment of the service in the church of S. Francesco dei Minori conventuali.

Quoniam, bass solo and orchestra. 1, 2, 3.

O Salutaris, 4 solo voices. Published at Paris in 'La Maitrise,' and reproduced in facsimile by Azevedo in his 'Rossini.'

IV. MISCELLANEOUS VOCAL MUSIC.

Gorgheggi e Solfeggi. A collection of exercises for the voice.

Il pianto delle Muse, for solo and chorus. Composed on the occasion of Byron's death.

Non posso o Dio, resistere. Cantata.

Oh quanto son grate. Duettino.

Irene ed Egle. Cantata for soprano and mezzo soprano.

Ridiamo, cantiamo, à 4.

Alle voci della gloria. Scena ed Aria.

Les Soirées musicales. 8 ariettas and 4 duets.

Inno populare, on the accession of Pius IX. Chorus.

Dall' Oriente l'astro del giorno, à 4.

Cara Patria. Cantata.

Chant des Titans. Chorus.

Se il vuol la Molinara.—Rossini's first composition.

La Separazione. Dramatic song.

Various other airs and pieces, thirty or forty in number, will be found in the catalogues of Ricordi, Lucca, Brandus (Troupenas), and Escudier, which it is hardly necessary to enumerate here.—Probably no composer ever wrote so much in albums as did Rossini. The number of these pieces which he threw off while in London alone is prodigious. They are usually composed to some lines of Metastasio's, beginning 'Mi lagnerà tacendo della sorte amara,' which he is said to have set more than a hundred times.

We have stated that during the latter years of his life Rossini composed a great quantity of music for the PF. solo, both serious and comic. These pieces were sold by his widow *en masse* to Baron Grant for the sum of £4000. After a time the whole was put up to auction in London and purchased by Ricordi of Milan, M. Paul Dalloz, proprietor of a periodical entitled 'La Musique,' at Paris, and other persons.

V. INSTRUMENTAL MUSIC.

Le rendezvous de chasse. A fanfare for 4 trumpets, composed at Compiègne in 1828 for M. Schikler, and dedicated to him.

3 Marches for the marriage of H.R.H. the Duke of Orleans. Arranged for PF. à 4 mains.

March (Pas redoublé) composed for H.I.M. the Sultan Abdul Medjid. Arranged for PF. solo (Benedict), and à 4 mains.

5 String Quartets, arranged as Sonatines for the PF. by Mockwitz (Breitkopf & Härtel).

To enumerate and elucidate all the biographical and critical notices of Rossini would require a volume, we shall therefore confine ourselves to mentioning these of importance either from their authority, their ability, or the special nature of their contents; and for greater convenience of reference we have arranged them according to country and date.

I. Italian.

G. Carpani. Lettera all' anonimo autore dell' articolo sul 'Tancredi' di Rossini. Milan, 1818, 8vo.

G. Carpani. Le Rossiniane, ossia Lettere musico-teatrali. Padua, 1824, 130 pages, 8vo. Portrait.

Nic. Bettoni. Rossini e la sua musica. Milan, 1824, 8vo.

P. Brighenti. Della musica rossiniana e del suo autore. Bologna, 1830, 8vo.

Lib. Musumeci. Parallelo tra i maestri Rossini e Bellini. Palermo, 1832, 8vo.

Anon. Osservazioni sul merito musicale dei maestri Bellini e Rossini, in riposta ad un Parallelo tra i medesimi. Bologna, 1834, 8vo. This pamphlet was translated into French by M. de Ferrer, and published as 'Rossini et Bellini.' Paris, 1835. 8vo.

Anon. Rossini e la sua musica; una Passeggiata con Rossini. Florence, 1841, 16mo.

Anon. Dello Stabat Mater di Gioachino Rossini, Lettere Storico-critiche di un Lombardo. Bologna, 1842, 8vo.

Giov. Raffaelli. Rossini, canto. Modena, 1844, 8vo.

Fr. Regli. Elogio di Gioacchino Rossini. We have not been able to discover how far Regli (1804-66) has used this work in his Dizionario biografico' (1860).

E. Montazio. Gioacchino Rossini. Turin, 1862, 18mo. Portrait.

Giul. Vanzolini. Della vera Patria di G. Rossini Pesaro, 1873, 8vo.

Ferrucci. Giudizio perentorio sulla verità della Patria di G. Rossini impugnata dal Prof. Giul. Vanzolini. Florence, 1874; an 8vo pamphlet of 20 pages.

Sett. Silvestri. Della vita e delle opere di G. Rossini. Milan, 1874, 8vo.; with portrait and fac-similes.

Ant. Zanolini. Biografia di Gioachino Rossini. Bologna, 1875, 8vo; with portrait and fac-similes.

II. French.

Papillon. Lettre critique sur Rossini. Paris, 1823, 8vo.

Stendhal. Vie de Rossini. Paris, 1823, 8vo. Stendhal, whose real name was Henri Beyle, compiled this work from Carpani. In many passages in fact it is nothing but a translation, and Beyle's own anecdotes are not always trustworthy. It was translated into English (London. 12mo, 1826) and German (Leipzig, 1824), in the latter case by Wendt, who has added notes and corrections.

Berton. De la musique mécanique et de la musique philosophique. Paris, 1824, 8vo; 24 pages.

Ditto, followed by an Epitre à un celèbre compositeur français (Boieldieu). Paris, 1826, 8vo; 48 pages.

Imbert de Laphaléque. De la Musique en France: Rossini, Guillaume Tell. ('Revue de Paris,' 1829.)

J. d'Ortigue. De la guerre des dilettanti, ou de la révolution opérée par M. Rossini dans l'opéra français. Paris, 1829, 8vo.

N. Bettoni. Rossini et sa musique. Paris, Bettoni, 1836, 8vo.

Anon. Vie de Rossini, etc. Anvers, 1839, 12mo; 215 pages. By M. Van Damme, who in his turn has borrowed much from Stendhal.

L. de Loménie. M. Rossini, par un homme de rien. Paris, 1842, 8vo.

Aulagnier. Quelques observations sur la publication du 'Stabat mater' de Rossini. Paris, 1842, 4to.

Anon. Observations d'un amateur non dilettante au sujet du 'Stabat' de M. Rossini. Paris, 1842, 8vo.

E. Troupenas. Résumé des opinions de la Presse sur le 'Stabat' de Rossini. Paris, 1842, 8vo; 75 pages.

Escudier frères. Rossini, sa vie et ses œuvres. Paris, 1854, 12mo; 338 pages.

Eug. de Mirecourt. Rossini. Paris, 1855, 32mo.

A. Azevedo. G. Rossini, sa vie et ses œuvres. Paris, 1865, large 8vo; 310 pages, with portraits and facsimiles. This is the most complete and eulogistic work on Rossini. It appeared originally in the Ménestrel,' but was discontinued there, the editor not approving of a violent attack on Meyerbeer, which Azevedo (1873-1875) included in it.

Virmaître et Elie Frébault. Les maisons comiques de Paris, 1868, 12mo. One chapter is devoted to the house of Rossini.

N. Roqueplan. Rossini. Paris, 1869, 12mo.; 16 pages.

E. Beulé. Eloge de Rossini. Paris, 1869.

A. Pougin. Rossini, Notes, impressions, souvenirs, commentaires. Paris, 1870, 8vo; 91 pages. The detailed and annotated chronological list mentioned on p. 8 has not yet been published.

O. Moutoz. Rossini et son 'Guillaume Tell.' Bourg, 1872, 8vo.

Vander Straeten. La mélodie populaire dans l'opéra 'Guillaume Tell' de Rossini. Paris, 1879, 8vo.

III. German.

Oettinger. Rossini, Komischer Roman. Leipzig, 1847. A satirical work translated into Danish by Marlow (Copenhagen, 1849, 2 vols. 8vo); into Swedish by Landberg (Stockholm, 1850, 2 vols. 8vo); and into French by Royer, 'Rossini, l'homme et l'artiste' (Brussels, 1858, 3 vols. 16mo).

Otto Gumprecht. Musikalische Charakterbilder. Leipzig, 1860, 8vo.

Fd. Hiller. Plaudereien mit Rossini. Inserted (with date 1856) in Hiller's 'Aus dem Tonleben unserer Zeit' (Leipzig, 1868); translated into French by Ch. Schwartz in 'La France musicale,' 1855; and into English by Miss M. E. von Glehn in 'Once a Week,' 1870.

A. Struth. Rossini, sein Leben, seine Werke und Charakterzüge. Leipzig.

La Mara. Musikalische Studienköpfe. Leipzig, 1874-76, 2 vols. 12mo. See vol. ii.

IV. English.

Hogarth. Memoirs of the Musical Drama. London, 1838, 2 vols. 8vo.

H. S. Edwards. Rossini's Life. London, 1869, 8vo; portrait.—History of the Opera, Ib. 1862, 2 vols. 8vo. —Rossini and his School, 1881.

Portraits of Rossini are frequent at all periods of his life. Marochetti's statue, in which he is represented sitting, was erected in his native town in 1864. There is a good bust by Bartolini of Florence. In the 'foyer' of the Opera in the Rue Le Peletier, Paris (now destroyed), there was a medallion of Rossini by Chevalier; a duplicate of this is in the possession of the editor of the 'Ménestrel.' The front of the new opera house has a bronze-gilt bust by M. Evrard. A good early engraving of him is that from an oil-painting by Mayer of Vienna (1820). Of later ones may be mentioned that by Thévenin after Ary Scheffer (1843): still later, a full length drawn and engraved by Masson, and a photograph by Erwig, engraved as frontispiece to the PF. score of Sémiramis (Heugel). Among the lithographs the best is that of Grévedon; and of caricatures the only one deserving mention is that by Dantan. [G.C.]

ROTA, or ROTTA (Fr. *Rote*; Germ. *Rotte*). Not, as might be supposed from its name, a species of vielle or hurdy-gurdy, but a species of psaltery or dulcimer, or primitive zither, employed in the middle ages in church music. It was played with the hand, guitar-fashion, and had seven strings mounted in a solid wooden frame. [E.J.P.]

ROUGET DE LISLE, Claude Joseph, author of the Marseillaise, born at Montaigu, Lons-le-Saulnier, May 10, 1760. He entered the School of Royal Engineers ('Ecole royale du génie') at Mezières in 1782, and left it two years later with the rank of 'aspirant-lieutenant.' Early in 1789 he was made second lieutenant, and quartered at Joux, near Besançon. At Besançon, a few days after the taking of the Bastille (July 14, 1789), he wrote his first patriotic song to the tune of a favourite air. In 1790 he rose to be first lieutenant, and was moved to Strassburg, where he soon became very popular in the triple capacity of poet, violin-player, and singer. His hymn, 'à la Liberté,' composed by Ignace Pleyel, was sung at Strassburg at the fête of Sept. 25, 1791. While there he wrote three pieces for the theatre, one of which, 'Bayard en Bresse,' was produced at Paris Feb. 21, 1791, but without success. In April 1792 he wrote the Marseillaise, of which an account has been given elsewhere. [See vol. ii. p. 219.] As the son of royalist parents, and himself belonging to the constitutional party, Rouget de Lisle refused to take the oath to the constitution abolishing the crown; he was therefore stripped of his military rank, denounced, and imprisoned, only to escape after the fall of Robespierre. After this he re-entered the army, and made the campaign of La Vendée under General Hoche; was wounded, and at length, under the Consulate, returned to private life at Montaigu, where he remained in the depth of solitude and of poverty till the second Restoration. His brother then sold the little family property, and Rouget was driven to Paris; and there would have starved but for a small pension granted by Louis XVIII. and continued by Louis Philippe, and for the care of his friends Béranger, David d'Angers, and especially M. and Mad. Voïart, in whose house at Choisy-le-Roi he died, June 27, 1836.

Besides the works already mentioned, he published in 1797 a volume of 'Essais en vers et en prose' (Paris, F. Didot, an V de la République) dedicated to Méhul, and now extremely rare; so also is his 'Cinquante chants Français' (1825, 4to.), with PF. accompaniment. One of these songs, 'Roland à Roncevaux,' was written in 1792, and its refrain—

Mourir pour la patrie,
C'est le sort le plus beau, le plus digne d'envie—

was borrowed by the authors of the 'Chant des Girondins,' which was set to music by Varney, and played a distinguished part in the Revolution of 1848. [See Varney.] The 'Cinquante chants' is his most important work, but we must not omit to mention two others, 'Macbeth,' a lyrical tragedy (1827, 8vo), and 'Relation du désastre de Quiberon,' in vol. ii. of the 'Mémoires de tous.'

There exists a fine medallion of Rouget by David d'Angers, which is engraved in a pamphlet by his nephew, entitled 'La vérité sur la paternité de la Marseillaise' (Paris, 1865). Statues will probably be erected to him at Lons-le-Saulnier, and at Choisy le Roi. See the volume of M. Le Roy de Ste. Croix (Strassburg, 1880). [G.C.]

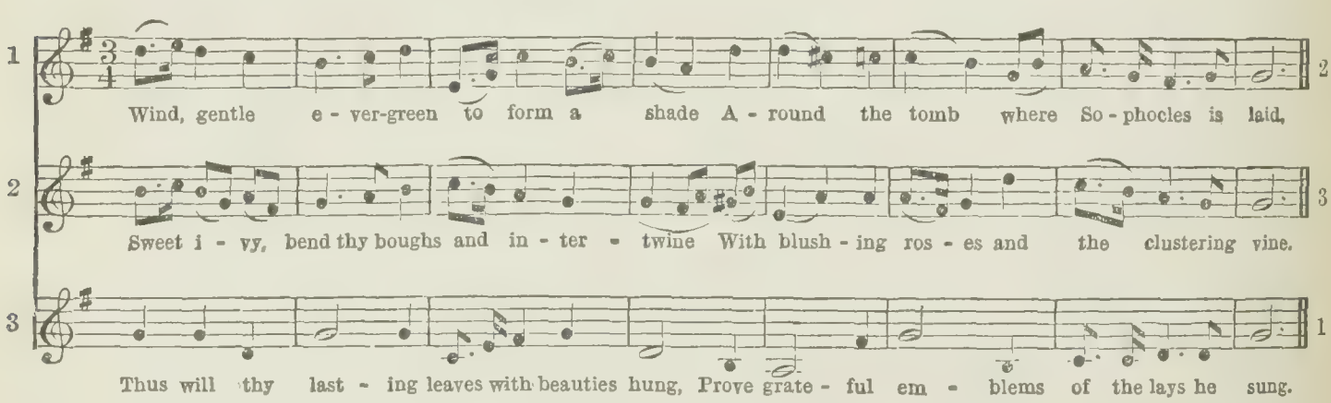
ROUND. I. 'A species of canon in the unison, so-called because the performers begin the melody at regular rhythmical periods, and return from its conclusion to its commencement, so that it continually passes round and round from one to another of [1]them.' Rounds and Catches, the most characteristic forms of English music, differ from canons in only being sung at the unison or octave, and also in being rhythmical in form. Originating at a period of which we have but few musical records, these compositions have been written and sung in England with unvarying popularity until the present day. The earliest extant example of a round is the well-known 'Sumer is i-cumen in,' as to the date of which there has been much discussion, although it is certainly not later than the middle

[1] 'The Rounds, Catches, and Canons of England; a Collection of Specimens of the sixteenth, seventeenth, and eighteenth centuries adapted to Modern Use. The Words revised, adapted, or re-written by the Rev. J. Powell Metcalfe. The Music selected and revised, and An Introductory Essay on the Rise and Progress of the Round Catch and Canon; also Biographical Notices of the Composers, written by Edward F. Rimbault, LL.D.,' from which work much of the information contained in the above article has been derived.

of the 13th century. This ingenious and interesting composition (which is printed in facsimile in Chappell's 'Popular Music' and in score in Hawkins) is preserved in the Harleian MSS. (978) in the British Museum. It is (as the late Dr. Rimbault has pointed out) founded on the old ecclesiastical litany chant 'Pater de cœlis Deus,' and is written for six voices, four of which sing the round proper or 'rota' (as it is termed in the Latin directions for singing it), whilst the other two sing an accompanying ground or 'pes.' Amongst early writers on music, the terms 'round' and 'catch' were synonymous, but at the present day the latter is generally understood to be what Hawkins (vol. ii) defines as that species of round 'wherein, to humour some conceit in the words, the melody is broken, and the sense interrupted in one part, and caught again or supplied by another,' a form of humour which easily adapted itself to the coarse tastes of the Restoration, at which period rounds and catches reached their highest popularity. That catches were immensely popular with the lower classes is proved by the numerous allusions to 'alehouse catches' and the like in the dramas of the 16th and 17th centuries. According to Drayton ('Legend of Thomas Cromwell,' Stanza 29) they were introduced into Italy by the Earl of Essex in 1510.

The first printed collection of rounds was that edited by Thomas Ravenscroft, and published in 1609 under the title of 'Pammelia. Musicks Miscellanie: or Mixed Varietie of pleasant Roundelayes and delightfull Catches, of 3. 4. 5. 6. 7. 8. 9. 10. Parts in one.' This interesting collection contains many English, French, and Latin rounds, etc., some of which are still popular. Amongst them there is also a curious 'Round of three Country Dances in one' for four voices, which is in reality a Quodlibet on the country-dance tunes 'Robin Hood,' 'Now foot it,' and 'The Crampe is in my purse.' 'Pammelia' was followed by two other collections brought out by Ravenscroft, 'Deuteromelia' in 1609, and 'Melismata' in 1611, and the numerous publications of the Playfords, the most celebrated of which is 'Catch that catch can, or the Musical Companion' (1667), which passed through many editions. The most complete collection of rounds and catches is that published by Warren in 32 monthly and yearly numbers, from 1763 to 1794, which contains over 800 compositions, including many admirable specimens by Purcell, Blow, and other masters of the English school. It is to be regretted that they are too often disfigured by an obscenity of so gross a nature as to make them now utterly unfit for performance. The Round has never been much cultivated by foreign composers. One or two examples are however well known, amongst them may be mentioned Cherubini's 'Perfida Clori.'

The quartet in Fidelio, 'Mir ist so wunderbar,' as well as Curschmann's trios, 'Ti prego' and 'L'Addio,' though having many of the characteristics of rounds, are not in true round-form, inasmuch as they are not infinite, but end in codas. They are canons, not rounds. A good specimen of the round proper is Dr. William Hayes's 'Wind, gentle evergreen.'



II. Any dance in which the dancers stood in a circle was formerly called a round or roundel.[1] The first edition of the 'Dancing Master' (1651) has thirteen rounds, for six, eight, or 'as many as will.' Subsequent editions of the same book have also a dance called 'Cheshire Rounds,' and Part II. of Walsh's 'Compleat Country Dancing Master' (1719) has Irish and Shropshire rounds. These latter dances are however not danced in a ring, but 'longways,' i. e. like 'Sir Roger de Coverley.' In Jeremiah Clarke's 'Choice Lessons for the Harpsichord or Spinett' (1711), and similar contemporary publications, the word rondo is curiously corrupted into 'Round O.' [W.B.S.]

1 'Come now a roundel and a fairy song.'
Midsummer Night's Dream, act. ii. sc. 2.

ROUND, CATCH, AND CANON CLUB. A society founded in 1843, by the late Enoch Hawkins, for the purpose of singing the new compositions of the professional members and others written in the form of Round, Catch, and Canon; hence the title of the Club. Among the original members were Messrs. Enoch Hawkins, Hobbs, Bradbury, Handel Gear, Henry Phillips, Addison, D'Almaine, and F. W. Collard. The meetings were originally held at the Crown and Anchor Tavern, whence the Club removed to Freemasons' Tavern, thence to the Thatched House, again to Freemasons' Tavern, and lastly to St. James's Hall, where it still assembles every fortnight from the first Saturday in November until the end of March, ten meetings being held in each season. In the earlier years of

its existence the number both of professional and non-professional members at each dinner rarely exceeded eighteen, but now from sixty to seventy dine together. The management of the Club devolves upon the professional members, each of whom in turn takes the chair, and is alone responsible for the entertainment. The musical programmes now consist mainly of glees, although an occasional catch is introduced.

The professional members at the present time are Messrs. Winn, Baxter, Fred. Walker, Coates, and Hilton. The officers are—Mr. Winn, 'Clerk of the Records'; Mr. Baxter, 'Librarian'; and Mr. Coates, 'Chancellor of the Exchequer.' Mr. William Winn, vicar-choral of St. Paul's Cathedral, in 1876 succeeded to the post of 'Clerk' on the resignation of Mr. Francis after twenty-eight years of valuable service to the Club. The chairman of the evening is addressed as 'Mr. Speaker.' The Club has from time to time offered prizes for the composition of glees: in 1869 the first prize was won by Mr. Winn, and the second by Mr. Coates; in 1870 the competition had the same result; and in 1880 the first prize was awarded to Mr. Coates, and the second to Mr. Winn. For the non-professional members, who must be nominated and seconded by two members, there is an entrance fee of three guineas, and an annual subscription, for the ten meetings and dinners, of five guineas. [C.M.]

ROUSSEAU, Jean Jacques, born at Geneva, June 28, 1712, died at Ermenonville, near Paris, July 3, 1778, five weeks after Voltaire. The details of his life are given in his 'Confessions'; we shall here confine ourselves to his compositions, and his writings on music. Although, like all who learn music late in life and in a desultory manner without a master, Rousseau remained to the end a poor reader and an indifferent harmonist, he exercised a great influence on French music. Immediately after his arrival in Paris he read a paper before the Académie des Sciences (Aug. 22, 1742) on a new system of musical notation, which he afterwards extended and published under the title of 'Dissertation sur la musique moderne' (Paris, 1743, 8vo.). His method of representing the notes of the scale by figures—1, 2, 3, 4, 5, 6, 7—had been already proposed by Souhaitty, but Rousseau's combinations, and especially his signs of duration, are so totally different as entirely to redeem them from the charge of plagiarism. A detailed analysis and refutation of the system may be found in Raymond's 'Des principaux systèmes de notation musicale' (Turin, 1824, 8vo), to which the reader is referred; but it is evident that however convenient notation by means of figures may be for writing a simple melody, it becomes as complicated as the old system when modulation or polyphony are attempted. Its very uniformity also deprives the reader of all assistance from the eye; the sounds must be spelt out one by one, and the difficulty of decyphering orchestral combinations or complicated harmonies becomes almost insuperable.

Copying music had been Rousseau's means of livelihood, and this led him to believe that the best way to learn an art is to practise it; at any rate he composed an opera 'Les Muses galantes,' which was produced at the house of La Popelinière, when Rameau, who was present, declared that some pieces showed the hand of a master, and others the ignorance of a schoolboy. Not being able to obtain access to any of the theatres, Rousseau undertook to write the articles on music for the 'Encyclopédie,' a task which he accomplished in three months, and afterwards acknowledged to have been done hastily and unsatisfactorily. We have mentioned under the head of Rameau [vol. iii. p. 72 *a*] the exposé by that great musician of the errors in the musical articles of the 'Encyclopédie'; Rousseau's reply was not published till after his death, but it is included in his complete works.

Three months after the arrival in Paris of the Italian company who popularised the 'Serva padrona'[1] in France, Rousseau produced 'Le Devin du village' before the King at Fontainebleau, on Oct. 18 and 24, 1752. The piece, of which both words and music were his own, pleased the court, and was quickly reproduced in Paris. The first representation at the Académie took place March 1, 1753, and the last in 1828, when some wag[2] threw an immense powdered perruque on the stage and gave it its deathblow. [Devin du Village, vol. i. 441 *b*.] It is curious that the representations of this simple pastoral should have coincided so exactly with the vehement discussions to which the performances of Italian opera gave rise. We cannot enter here upon the literary quarrel known as the 'Guerre des Boufons,' or enumerate the host of pamphlets to which it gave rise,[3] but it is a strange fact, only to be accounted for on the principle that man is a mass of contradictions, that Rousseau, the author of the 'Devin du Village,' pronounced at once in favour of Italian music.

His 'Lettre sur la musique Française' (1753) raised a storm of indignation, and not unnaturally, since it pronounces French music to have neither rhythm nor melody, the language not being susceptible of either; French singing to be but a prolonged barking, absolutely insupportable to an unprejudiced ear; French harmony to be crude, devoid of expression, and full of mere padding; French airs not airs, and French recitative not recitative. 'From which I conclude,' he continues, 'that the French have no music, and never will have any; or that if they ever should, it will be so much the worse for them.' To this pamphlet the actors and musicians of the Opéra replied by hanging and burning its author in effigy. His revenge for this absurdity, and for many other attacks, was the witty 'Lettre d'un symphoniste de l'Académie royale de musique à ses camarades de

[1] It has been generally supposed that the 'Serva padrona' was not heard in Paris before 1752: this however is a mistake; it had been played so far back as Oct. 4, 1746, but the Italian company who performed it was not satisfactory, and it passed almost unnoticed.

[2] Supposed to have been Berlioz, but he exculpates himself in his 'Mémoires,' chap. xv.

[3] See Chouquet's 'Histoire de la musique dramatique,' 134 and 434.

l'orchestre' (1753), which may still be read with pleasure. The æsthetic part of the 'Dictionnaire de musique,' which he finished in 1764 at Motiers-Travers, is admirable both for matter and style. He obtained the privilege of printing it in Paris, April 15, 1765, but did not make use of the privilege till 1768; the Geneva edition, also in one vol. 4to, came out in 1767. In spite of mistakes in the didactic, and serious omissions in the technical portions, the work became very popular, and was translated into several languages; the English edition (London, 1770, 8vo.) being by Waring.

Rousseau's other writings on music are: 'Lettre à M. Grimm, au sujet des remarques ajoutées à sa Lettre sur Omphale,' belonging to the early stage of the 'Guerre des Bouffons'; 'Essai sur l'origine des langues,' etc. (1753), containing chapters on harmony, on the supposed analogy between sound and colour, and on the music of the Greeks; 'Lettre à M. l'Abbé Raynal au sujet d'un nouveau mode de musique inventé par M. Blainville,' dated May 30, 1754, and first printed in the 'Mercure de France'; 'Lettre à M. Burney sur la Musique, avec des fragments d'Observations sur l'Alceste italien de M. le chevalier Gluck,' an analysis of 'Alceste' written at the request of Gluck himself; and 'Extrait d'une réponse du Petit Faiseur à son Prête-Nom, sur un morceau de l'Orphée de M. le chevalier Gluck,' dealing principally with a particular modulation in 'Orphée.' From the two last it is clear that Rousseau heartily admired Gluck, and that he had by this time abandoned the exaggerated opinions advanced in the 'Lettre sur la musique Française.' The first of the above was issued in 1752, the rest not till after his death; they are now only to be found in his 'Complete Works.'

On Oct. 30, 1775, Rousseau produced his 'Pygmalion' at the Comédie Française; it is a lyric piece in one act, and caused some sensation owing to its novelty. Singing there was none, and the only music were orchestral pieces in the intervals of the declamation. He also left fragments of an opera 'Daphnis et Chloé' (published in score, Paris, 1780, folio), and a collection of about a hundred romances and detached pieces, to which he gave the title 'Consolations des Misères de ma vie' (Paris, 1781, 8vo), all now forgotten. Rousseau was accused of having stolen the 'Devin du Village' from a musician of Lyons named Granet, and the greater part of 'Pygmalion' from another Lyonnais named Coigniet. Among his most persistent detractors is Castil-Blaze (see 'Molière musicien,' ii. 409), but he says not a word of the 'Consolations.' Now any one honestly comparing these romances with the 'Devin du Village,' will inevitably arrive at the conviction that airs at once so simple, natural, and full of expression, and so incorrect as regards harmony, not only may, but must have proceeded from the same author. There is no doubt, however, that the instrumentation of the 'Devin' was touched up, or perhaps wholly re-written, by Francœur, on whose advice, as well as on that of Jelyotte the tenor singer, Rousseau was much in the habit of relying.—'Rousseau's Dream' was at one time a popular tune in this country. An air ('de trois notes') and a duettino, melodious and pretty but of the simplest style, are given in the 'Musical Library,' vol. iii. [G.C.]

ROUSSEAU'S DREAM. A very favourite air in England in the early part of this century. Its first appearance under that name is presumably as 'an Air with Variations for the Pianoforte, composed and dedicated to the Rt. Hon. the Countess of Delaware, by J. B. Cramer. London, Chappell' [1812].

But it is found (with very slight changes) a quarter of a century earlier, under the title of 'Melissa. The words by Charles James, Esq., adapted to the Pianoforte, Harp, or Guitar. London, J. Dale, 1788.' Whether the air is Rousseau's or not the writer has not ascertained. It is not in his 'Les Consolations,' etc. (Paris, 1781). [G.]

ROUSSELOT, Scipion, was born about the commencement of this century, entered the Conservatoire at Paris as a pupil of Baudiot on the cello, and took the first prize in 1823. He then studied composition under Reicha, and on Feb. 9, 1834, produced a symphony of his composition at the concert of the Conservatoire; he also attempted opera, but was not happy in that department, though he is said to have rendered important assistance to Bellini in the instrumentation and harmonious arrangement of 'I Puritani.' His quartets, quintets, variations for the cello, and other chamber music, were much esteemed and played in Paris. In 1844 or 45, Rousselot came to England; he took the cello at the Musical Union concerts of the latter year. He was one of the party with Vieuxtemps, Sivori, Sainton, and Hill, who performed the whole of Beethoven's quartets at the house of Mr. Alsager, in a series of meetings beginning April 28, 1845, and a prime mover in that memorable undertaking, which introduced Beethoven's later quartets to England. After Mr. Alsager's death early in 1847, Rousselot carried on the performances at his own risk, under the name of the 'Beethoven Quartet Society'; and on May 4, 1847, gave a concert to Mendelssohn of his own works—the Quartet in D op. 44, no. 1; the Trio in C minor, op. 66; and the Ottet, op. 20; Mendelssohn himself playing Beethoven's 32[1] variations, besides joining in the Trio, etc. Rousselot was deservedly popular in London, not only with the public but with his fellow artists; but the increasing admiration for Piatti's superior playing withdrew attention from him,

[1] Mendelssohn played without book, and left out Var. 30, in 3-4, as he admitted afterwards to Mr. J. W. Davison.

and in 1848 or 1849 he returned to Paris, where he has since led a very retired life. While in London he started a musical publishing business in Regent Street, but it did not succeed. —His brother, JOSEPH FRANÇOIS, a horn-player of great note, was born Feb. 6, 1803. He also was a pupil of the Conservatoire, specially under Daupret, and obtained the first prize in 1823. He has belonged to all the principal orchestras of Paris, lived for many years at Argenteuil, and died there in Sept. 1880. [G.]

ROVEDINO, CARLO, an excellent bass-singer, born in 1751, appears on the Italian Opera stage in London as early as 1778, and remained there, distinguished in serious and comic opera alike, for many years. He was also greatly in request for concerts, and his name is frequent in the best bills of the last decade of the century, both in town and country. He sang at Haydn's last benefit concert, May 4, 1795. He is said to have sung in Paris in 1790, and he probably divided his time between the two capitals. England, however, was his home; he died in London, Oct. 6, 1822, and was buried in the churchyard of Chelsea New Church.

One of his daughters married C. Weichsel, brother of Mrs. Billington, and leader of the orchestras at the Italian Opera and Philharmonic. [G.]

ROVELLI. A family of eminent Italian musicians. GIOVANNI BATTISTA was first violin in the orchestra of the church of S. Maria Maggiore of Bergamo, at the beginning of this century. GIUSEPPE, his son, was a cellist, born at Bergamo in 1753, and died at Parma, Nov. 12, 1806. Of ALESSANDRO we only know that he was at one time director of the orchestra at Weimar, and that he was the father of PIETRO, who was born at Bergamo, Feb. 6, 1793, and received his first lessons, both in violin-playing and the general science of music, from his grandfather. By an influential patron he was sent to Paris to study under R. Kreutzer, and his playing attracted much attention there. On his father's appointment to Weimar he joined him for a time. At the end of 1814 we find him at Munich, playing with great applause. He remained there for some years, and was made 'Royal Bavarian chamber-musician,' and 'first concerto-player.' In Feb. 1817 he was playing at Vienna; there he married Micheline, daughter of E. A. Förster, and a fine PF.-player, and in 1819 went on to Bergamo, took the place once occupied by his grandfather, and seems to have remained there, suffering much from bad health, till his death, Sept. 8, 1838. The writer in the Allg. mus. Zeitung for Dec. 26, 1838, from whom the above facts have been mainly taken, characterises his play as 'simple, expressive, graceful, noble; in a word, classical—a style which takes instant possession of the heart of the hearer.' In other notices in the same periodical, he is said to have inherited the pure, singing, expressive style of Viotti, and practised it to perfection. Molique was his pupil at Munich. [G.]

ROVESCIO, AL. A term used, in instrumental music, to express two different things. (1) An imitation by contrary motion, in which every descending interval in the leading part is imitated by an ascending one, and *vice versa*; see Moscheles's Étude 'La Forza,' op. 51. (2) A phrase or piece which may be played backwards throughout. It is then synonymous with CANCRIZANS. An interesting example occurs in the minuet of a Sonata for PF. and violin by Haydn, in which, on the repetition after the Trio, the minuet is played backwards, so as to end on the first note, Haydn's indication being *Menuetto D.C. wird zurückgespielt.* [See RECTE ET RETRO.]

Menuetto al Rovescio.

[The repeat, as played after the Trio.]

[F.T.]

ROWLAND, ALEXANDER CAMPBELL, born at Trinidad, W. I., Jan. 1, 1826. His father served as bandmaster through the Peninsular campaign, was a fine clarinet player, and good practical musician. The lad was brought to London at a very early age, in 1831 began to learn the violin and side-drum, and in 1833 entered the orchestra of the Queen's Theatre, as player on both instruments, and soon became known for his solos at the Lent Oratorios, the Promenade and other Concerts, and other occasions. In 1839 he had the honour of some special hints from Spohr as to the drum part in his Concertino 'Sonst und Jetzt,' at the Norwich Festival. (See Spohr's Autobiography, part i. p. 220.) From 1842 to 1846 he was a member of Jullien's band,

playing cornet, timpani, and viola, all which, as well as the pianoforte and organ, he had added to the répertoire of his instruments. At this time, with characteristic energy, he learned scoring for a military band from Waetzig of the Life Guards, and also mastered the trombone, and one or two other instruments. In 1846 he began the double bass, under Casolani, and by that instrument he is most generally known. In 1847 he became a member of the orchestras of the Royal Italian Opera, Philharmonic, Sacred Harmonic Society, etc.; in 1850 was PF. accompanyist, and solo double-bass player at the National Concerts, and became double-bass at H.M. Theatre in March 1851. In 1852 he performed a solo before the Queen and Prince Albert at Windsor. In 1854, finding the strain of the constant practice on the thick three-stringed English bass too severe, Mr. Rowland retired to Southampton, and devoted himself to teaching the piano, violin, harmony, and singing, in which he has been very successful up to the present time. But he did not at once give up his connexion with London. On April 29, 1861, he appeared at the Philharmonic Concert, and performed Mayseder's Violin Concerto (op. 40) on the double-bass. His position as principal double-bass to the Society he retained till the resignation of Sir W. S. Bennett, in 1866, when he also resigned, and has since confined himself to his country practice at Southampton.

Mr. Rowland has published the 70th Psalm for voices and orchestra (Ashdown & Parry); the first part of a Double-bass Tutor (L. Cock & Co.), the second part of which is now in the press; also a set of waltzes composed for and played by Jullien's band in 1841. He has also composed an overture, and various vocal pieces which have been performed at Southampton, but are not published. He is the leading professor there, and much esteemed by the musicians and amateurs of the place. [G.]

ROW OF KEYS. A single clavier or manual. An instrument having two or more rows of keys is one having two or more manuals. The term 'row of keys' is, when speaking of an organ, not applied to a *pedal-clavier* from the simple fact that one 'row of keys' is all that is required by the feet; two rows of pedal-keys have, it is true, been sometimes constructed, but they have always been found unnecessary, and generally unmanageable. Harpsichords had often two rows of keys, one sounding less noisy wires than the other; some mechanical change of that sort being the only means of obtaining a softer or louder tone in that instrument. [J.S.]

ROYAL ACADEMY OF MUSIC, 1720–1728. From 1717 to 1720 there was no Italian Opera in London, but in the latter year a sum of £50,000 was raised by subscription, and an establishment was founded for the performance of Italian operas. This was the first Royal Academy of Music. It consisted of a Governor, a Deputy-Governor, and 20 Directors. The first governor was the Duke of Newcastle, the deputy-governor was Lord Bingley, and the directors included the leaders of society at the Court of George I. Buononcini was invited to England from Rome, Ariosti from Berlin, and Handel left Cannons and went to Dresden to engage singers. Under these brilliant auspices the Academy opened at the King's Theatre in the Haymarket, on April 2, 1720, with Giovanni Porta's 'Numitor,' and the following strong cast:—Senesino, Durastanti, Boschi, and Berenstadt. The season ended on June 25. It was remarkable for the production of Handel's 'Radamisto' and D. Scarlatti's 'Narcisso,' the latter conducted by Roseingrave, and including Mrs. Anastasia Robinson in the cast. The second season lasted from Nov. 19, 1720, to July 5, 1721. The new works performed were 'Astarto' (Buononcini), 'Arsace' (a pasticcio), 'Muzio Scævola' (Ariosti, Buononcini, and Handel), and 'Ciro' (Ariosti). During the first year of the undertaking £15,000 of the subscription had been spent. The third season began Nov. 1, 1721, and ended June 16, 1722. The new operas were Handel's 'Floridante,' Buononcini's 'Crispo' and 'Griselda.' The fourth season lasted from Nov. 7, 1722, to June 15, 1723, and was remarkable for the first appearance in England of Cuzzoni, who sang in Handel's 'Ottone' on Jan. 12. The other new works (besides 'Ottone') were Ariosti's 'Coriolano,' Buononcini's 'Erminia,' and Handel's 'Flavio.' In the fifth season (Nov. 27, 1723, to June 13, 1724) Buononcini's 'Farnace,' Ariosti's 'Vespasiano,' and a pasticcio called 'Aquilio,' were produced. At the end of the season Mrs. Robinson retired from the stage. The sixth season (Oct. 31, 1724, to May 19, 1725) opened with Handel's 'Tamerlano.' Ariosti's 'Artaserse' and 'Dario' (partly by Vivaldi), Handel's 'Rodelinda,' Buononcini's 'Calfurnia,' and Vinci's 'Elpidia' were the other new works produced. The seventh season (November 1725 to June 1726) ended abruptly, owing to the illness of Senesino, but it was remarkable for the first appearance of the celebrated Faustina Hasse, who sang in Handel's 'Alessandro' on May 5. Handel's 'Scipione' was also produced in March. Owing to Senesino's absence, the operas were suspended till Christmas, and the next season ended on June 6, 1727. Ariosti's 'Lucio Vero,' Handel's 'Admeto,' and Buononcini's 'Astyanax' (the last of his operas performed at the Academy) were the chief works; but the season, although short, was enlivened by the continual disturbances caused by the rivalry between Cuzzoni and Faustina. The ninth season lasted from Oct. 3, 1727, to June 1, 1728. The operas were entirely under Handel's direction: his 'Siroe,' 'Tolomeo,' and 'Ricardo I' were produced, but the success of the 'Beggar's Opera' at Lincoln's Inn Fields Theatre, as well as the continual disputes and dissensions amongst the singers, caused the season to be more than usually disastrous. At the end of it, the whole sum subscribed, as well as the receipts, was found to have been entirely spent. The company was dispersed, and although a few meetings of the court were held during the year, the establishment was

allowed to die gradually, and was never revived.[1] [W.B.S.]

ROYAL ACADEMY OF MUSIC. The original plan for this institution was proposed by Lord Westmorland (then Lord Burghersh) at a meeting of noblemen and gentlemen held at the Thatched House Tavern, London, on July 5, 1822. The proposal meeting with approval, at a second meeting, July 12, rules and regulations were drawn up and a committee was appointed to carry out the undertaking. According to the rules adopted, the constitution of the new Academy was to be modelled upon the British Institution. The king was announced as the principal Patron, the government was to consist of a committee of twenty-five Directors and a sub-committee of nine subscribers, and the school was to be supported by subscriptions and donations. There was also to be a Board, consisting of the Principal and four professors, and the number of pupils was not to exceed forty boys and forty girls, to be admitted between the ages of 10 and 15, and all to be boarded in the establishment. A sub-committee, the members of which were Lord Burghersh, Sir Gore Ouseley, Count St. Antonio, Sir Andrew Barnard, Sir John Murray, and the Hon. A. Macdonald, was empowered to form the Institution. Dr. Crotch was appointed the first Principal, and by September 1, the sum of £4312 10*s.* had been collected, with an annual subscription of £510, including 100 guineas from George IV., which has been continued by his successors, William IV. and Queen Victoria. In November the house, No. 4, Tenterden Street, Hanover Square, was taken for the new school, but the opening was deferred until March 1823, on the 24th of which month the first lesson was given by Mr. Cipriani Potter to Mr. Kellow Pye.

The Academy began its labours with the following staff:—Head Master—Rev. John Miles. Governess—Mrs. Wade. Principal—Dr. Crotch. Board of Professors—Messrs. Attwood, Greatorex, Shield, and Sir George Smart. Supplementary members of the Board—Messrs. Horsley and J. B. Cramer. Professors—Messrs. Anfossi, Andrew, Bishop, Bochsa, Crivelli, F. Cramer, Clementi, Coccia, Cerruti, Dragonetti, Dizi, Griesbach, Hawes, Ireland, C. Kramer, Liverati, Lindley, Loder, Mori, Macintosh, Nicholson, Cipriani Potter, Puzzi, Ries, H. Smart, Spagnoletti, Watts, Willmann, and Caravita.[2]

The Foundation students who were first elected were the following. Girls—M. E. Lawson, C. Smith, M. Chancellor, S. Collier, E. Jenkyns, M. A. Jay, C. Bromley, H. Little, J. Palmer, C. Porter. Boys—W. H. Holmes, H. A. M. Cooke,[3] A. Greatorex, T. M. Mudie, H. G. Blagrove, Kellow J. Pye, W. H. Phipps, A. Devaux, C. Seymour, E. J. Neilson, and C. S. Packer. The pupils were divided into two classes, those on the foundation paying 10 guineas per annum, while extra students paid 20 guineas, or if they lodged and boarded in the establishment, 38 guineas. Although the first Report of the Committee (June 2, 1823) was satisfactory, yet financial difficulties soon made themselves felt. In March, 1824, the Committee reported a deficiency for the current year of £1600, if the institution were conducted on the same plan as before. To meet this, the difference between the students' payments was abolished, and the fees were fixed for all at £40, the professors at the same time giving their instruction gratis for three months. Lord Burghersh also applied to the government for a grant, but without effect. In 1825 further alterations were made as to the admission of students, by which the numbers amounted in four months' time to a hundred, and Lord Burghersh made another appeal for a government grant. In spite of this, the year's accounts still showed an unsatisfactory financial condition. During the latter part of the year Moscheles was included among the staff of professors. Early in 1826 the increased number of students compelled the Academy to enlarge its premises, the lease[4] of No. 5 Tenterden Street was bought, and the two houses were thrown into one. In February the government were petitioned for a charter. In reply it was stated that though unwilling to give a grant, they were ready to defray the cost of a charter. In 1827 the financial condition of the Academy was so disastrous that it was proposed to close the institution; but a final appeal to the public procured a loan of £1469, beside further donations, enabling the Directors to carry on the undertaking on a reduced scale and with increased fees. Henceforward the state of things began to mend. The charter was granted on June 23, 1830. By this document the members of the Academy and their successors were incorporated and declared to be, and for ever hereafter to continue to be by the name of the 'Royal Academy of Music,' under the government of a Board of Directors, consisting of thirty members, with power to make rules and regulations; a Committee of Management, with full power over the funds and both students and professors; and a Treasurer.

In 1832 Dr. Crotch resigned his post of Principal, and was succeeded by Cipriani Potter, who retained office until his resignation in 1859. The financial position of the Academy, although not prosperous, remained on a tolerably secure footing. In 1834, William IV. directed that a quarter of the proceeds of the Musical Festival held in Westminster Abbey should be handed over to the institution. This sum, amounting to £2250, was devoted by the Committee to the foundation of four King's Scholarships, to be competed for by two male and two female students. Instead, however, of being invested separately,

[1] Further information as to the Royal Academy of Music will be found in Burney's History of Music, vol iv, from which the above is compiled.

[2] Although the above was published in the 'Morning Post' as the list of professors, instruction seems only to have been given by the following:—Dr. Crotch, Messrs. Lord, Potter, Haydon, Crivelli, F. Cramer, Spagnoletti, Lindley, Bochsa, Cooke, Caravita, Cicchetti, Goodwin, J. B. Cramer, Beale, and Finart; and by Mmes. Biagioli, Reguandin, and Miss Adams. (See First Report of the Committee, June 2, 1823.)

[3] Known as 'Grattan Cooke.'

[4] Relinquished in or before 1853.

the fund was merged in the general property of the Academy, a mistake which eventually led to the discontinuance of the scholarships. For the next ten years the financial condition of the Academy continued to fluctuate. In July 1853 the Committee of Management (which was totally unprofessional in its constitution) summoned the professors, revealed to them the decline of the funded property, and asked their counsel as to the remedies to be adopted. The professors advised that the management should be made entirely professional. This course was so far adopted that a Board of Professors was appointed to advise the Committee.

The first act of this Board (Sept. 1853) was to recommend the discontinuance of the practice of students lodging and boarding on the premises. This recommendation was adopted, and since that time the Academy only receives day students. The Board formed in 1853 was disbanded by Lord Westmorland in 1856, but after his death in 1859, a new Board was formed; this, however, found itself obliged to resign in 1864. Before its resignation it drew up a memorial to government, praying for an annual grant. After a conference with a deputation of Professors, Mr. Gladstone, then Chancellor of the Exchequer, inserted in the estimates for the year a sum of £500 'to defray the charge which will come in course of payment during the year ending March 31, 1865, for enabling the Directors of the Royal Academy of Music to provide accomodation for the Institution.' In 1866, upon the change of Administration, suggestions were made to the Committee on the part of the government, and were renewed personally in 1867 by the then Chancellor of the Exchequer, in consequence of which the Committee was induced to expend the whole of its funds, in order to accommodate the institution to the designs in which it was invited to participate. In 1867, Lord Beaconsfield (then Mr. Disraeli), in reply to a question as to the grant, announced in the House of Commons that 'the Government were of opinion that they would not be authorised in recommending any enlargement of the grant, the results of the institution not being in fact of a satisfactory character.' This was followed by the total withdrawal of the grant, in order (to quote from an official letter addressed to Sir Sterndale Bennett) 'simply to give effect to the opinion that it was not so expedient to subsidise a central and quasi-independent association, as to establish a system of musical instruction under the direct control of some Department of Government.' In this emergency the Committee decided to close the establishment. The funds (including the sum devoted to the King's Scholarships) were totally exhausted. The Professors met in 1868 to consider what could be done, and generously offered to accept a payment *pro ratâ*. It was then however announced that the Committee had resigned the Charter into the hands of the Queen. Upon this the Professors obtained a legal opinion, to the effect that the Charter could not be resigned without the consent of every member of the Academy. As many of the members protested at the time against the resignation of the Charter, it was returned, and by great exertions on the part of the Professors, a new Board of Directors was formed under the Presidency of the Earl of Dudley, who appointed a new Committee of Management, in which the professional element formed an important ingredient. From the time of this change the institution has continued to prosper. In 1868, on the return to office of the Liberal Ministry, Mr. Gladstone restored the annual grant of £500. In 1876 the number of pupils had so increased, that the lease of the house adjoining the premises in Tenterden Street had to be repurchased out of the savings of the institution. This house was joined on to the original premises, and a concert-room was formed out of part of the two houses, which though small has proved a great boon not only to the students for their regular concerts, but to many concert-givers for whose purposes the more extensive rooms of St. James's Hall, Exeter Hall, etc., are too large. In July 1880 Mr. William Shakespeare was appointed conductor of the Students' Concerts, *vice* Mr. Walter Macfarren.

The following have been the Principals of the Academy from its foundation to the present time:—Dr. Crotch (1823–1832), Cipriani Potter (1832–1859), Charles Lucas (1859–1866), William Sterndale Bennett (1866–1875), George Alexander Macfarren (1875).

The Academy is supported by the Government grant, subscriptions, donations, and fees from students. It is under the direction of a President (Earl Dudley), three Vice-Presidents (Sir Thos. Gladstone, Sir T. T. Bernard, and the Rev. Sir F. A. G. Ouseley, Bt.), and twenty-four Directors, amongst whom are Sir Julius Benedict, Sir G. J. Elvey, Professor Macfarren, and Messrs. Cusins, Garcia, Halle, W. H. Holmes, W. Macfarren, Osborne, Randegger, and Brinley Richards. The Committee of Management consists of the Principal, Sir Julius Benedict, and Messrs. Cox, Dorrell, Garcia, Leslie, Low, Lunn, W. Macfarren, Randegger, Brinley Richards, Sainton, Sparrow, Wood, and Dr. Steggall. There are seventy-eight Professors (including assistant and sub-professors), and the course of instruction comprises harmony and composition, singing, pianoforte, organ, harp, violin, viola, violoncello, double bass, flute, oboe, clarinet, bassoon, horn, trumpet and cornet, trombone, military music, elocution, acoustics, and the English, French, German, and Italian languages. There are also classes for sight-singing, string quartets, and opera. The annual fee for the entire course of study is thirty guineas, with an entrance fee of five guineas, the only extras being two guineas a term for the operatic class, and one guinea for the classes for the study of English, French, German, Italian, and acoustics. The library of the institution has been noticed in the article on MUSICAL LIBRARIES (vol. ii. p. 420).

The following are the principal Scholarships

and Exhibitions offered for competition:—the Westmorland Scholarship of £10, for female vocalists between the ages of 18 and 24; the Potter Exhibition of £12, for male and female candidates in alternate years; the Sterndale Bennett Scholarship, of two years' free education in the Academy, for male candidates between the ages of 14 and 21; the Parepa-Rosa Scholarship, of two years' free education in the Academy, for British-born females between the ages of 18 and 22; the Sir John Goss Scholarship of 15 guineas, awarded triennially to male organists under 18; the Thalberg Scholarship of £20, for male and female pianists at alternate elections, between the ages of 14 and 21; the Novello Scholarship, of three years' free education at the Academy, for male candidates between the ages of 14 and 18; the Lady Goldsmid Scholarship, of one year's free education in the Academy, for female pianists; the Balfe Scholarship for composition, of one year's free education at the Academy, for British-born males between the ages of 14 and 21; and the Hine Gift of £12, given annually for the best English ballad composed by pupils under 17. In addition to these, several prizes are offered for competition, and certificates of merit, silver and bronze medals, are awarded annually.

Public performances have been given by the pupils of the Royal Academy at various intervals from the date of its foundation. Their locality was sometimes in the Hanover Square Rooms and sometimes at Tenterden Street. The present custom is to have two concerts of chamber and choral music at the Academy, and one orchestral concert at St. James's Hall every term. From 1828 to 1831 operatic performances were given in public by the students, but since then they have been discontinued, the performances of the operatic class being held privately once or twice in each term. There is orchestral and choral practice twice a week throughout the year, at which pupils have the opportunity of hearing their own instrumental or vocal compositions and of performing concertos and songs with orchestral accompaniments. The number of pupils has increased from 300 in 1876, to 400 in 1881. [W.B.S.]

ROYAL SOCIETY OF MUSICIANS OF GREAT BRITAIN, THE, was founded by the exertions of Festing the violinist, and Weidemann the flutist, who were struck by the appearance of two little boys driving milch asses, who proved to be orphans of a deceased oboe-player named Kytch. [See FESTING, vol. i. p. 515*b*.] They immediately raised subscriptions to relieve the family, and feeling that some permanent establishment was required to meet similar cases, induced the most eminent music-professors of the day to associate themselves together as a Society for that purpose. This excellent work was formally accomplished on April 19, 1738, and amongst its first members were Handel, Boyce, Arne, Christopher Smith, Carey, Cooke, Edward Purcell, Leveridge, Greene, Reading, Hayes, Pepusch, and Travers. In 1739 the members of the Society executed a 'deed of trust,' which was duly enrolled in the Court of Chancery; the signatures of the members, 226 in number, include the most eminent professors of music of the time. The deed recites the rules and regulations for membership and for the distribution of the funds, and provides for regular monthly meetings at the sign of Saint Martin, in St. Martin's Lane. Handel took an especial and active interest in the welfare of the Society, composing concertos and giving concerts for the benefit of its funds, and at his death bequeathing to it a legacy of £1,000. The Handel Commemoration held in Westminster Abbey in 1784 brought a further addition of £6,000. In 1789 George III. granted the Society a charter, by virtue of which its management is vested in the hands of the 'Governors' and 'Court of Assistants.' In 1804 the funds of the Society not being in a flourishing condition, the king gave a donation of 500 guineas. Considerable sums have been given or bequeathed to the Society by members of the music-profession, especially Signora Storace £1,000, Crosdill £1,000, Begrez £1,000, Schulz £1,000; the latest and largest amount, 1,000 guineas, being that of Mr. Thomas Molineux (Feb. 10, 1881), now resident in London, but for many years an eminent performer on the bassoon and double-bass at Manchester.

The Society pays away annually to relieve distress over £3,000, which amount is provided by donations from the public, subscriptions and donations of members of the Society, and interest (about £2,500 per annum) on the Society's funded property.

Members of the Society must be professional musicians, and are of both sexes, the Royal Society of Female Musicians having been affiliated to the elder institution in 1866. [See ROYAL SOCIETY OF FEMALE MUSICIANS.] There is, says Dr. Burney, 'no lucrative employment belonging to this Society, excepting small salaries to the secretary and collector, so that the whole produce of benefits and subscriptions is nett, and clear of all deductions or drawbacks.' The large staff of physicians, surgeons, counsel, solicitors, give their gratuitous services to the Society. The present secretary is Mr. Stanley Lucas, and the honorary treasurer Mr. W. H. Cummings. The Society's rooms are at No. 12 Lisle Street, Leicester Square, and contain some interesting memorials of music, as well as a collection of portraits, including Handel, by Hudson; Haydn; Corelli, by Howard; Geminiani, by Hudson; Purcell, by Closterman; C. E. Horn, by Pocock; John Parry, the elder; Sir W. Parsons; J. Sinclair, by Harlowe; Gaetano Crivelli, by Partridge; Domenico Francesco Maria Crivelli; J. S. Bach, by Clark of Eton; Beethoven, with autograph presenting it to C. Neate; W. Dance by his brother; and a life-size painting of George III. by Gainsborough. [W.H.C.]

ROYAL SOCIETY OF FEMALE MUSICIANS, THE, was established in 1839 by several ladies of distinction in the musical profession, amongst others Mrs. Anderson, Miss

Birch, Miss Dolby, and Miss Mounsey (now Mrs. Bartholomew), in consequence of the Royal Society of Musicians having made no provision in their laws for the admission of female members. Practically it soon became evident that the co-existence of two separate societies with the same aim was resulting in considerable loss of sympathy and support; and that one expenditure would suffice for the management of both institutions, if they could be amalgamated. With the consent of the trustees and members this happy union was effected in 1866, and the two societies have now become one. [W.H.C.]

ROZE, Marie, *née* Ponsin, born March 2, 1846, at Paris; received instruction in singing from Molker at the Conservatoire, and in 1865 gained 1st prizes in singing and comic opera. She made her *début* Aug. 16 of that year at the Opera Comique as Marie, in Hérold's opera of that name, and at once concluded an engagement for the next four years there, during which she appeared in 'L'Ambassadrice,' 'Joseph,' 'La Dame Blanche,' 'Le Domino Noir,' 'Fra Diavolo,' etc. She created the part of Djalma in 'Le Premier jour de Bonheur' of Auber, at his request, on Feb. 15, 1868; also that of Jeanne in Flotow's 'L'Ombre,' July 7, 1870. She was greatly admired at the Opéra Comique for her sympathetic voice and natural charm of person and manner. Her next engagement was at the Grand Opera, where she played Marguerite in 'Faust.' At the outbreak of the war she left the opera for the army, and served with zeal in the ambulance. After the war she sang for a season at the Theatre de la Monnaie, Brussels, and on April 30, 1872, first appeared in England at the Italian Opera, Drury Lane, as Marguerite, and as Marcelline in 'Les Deux Journées,' on its short-lived production, June 20, 1872. The ensuing seasons, until 1877, she passed at Drury Lane, where she made a distinct success, June 11, 1874, as Berengaria in Balfe's 'Il Talismano,' at Her Majesty's, and in the provinces, singing both in Italian and English in opera or the concert-room. In the winter of 1877 she made a highly successful visit to America, returning in 1879 to Her Majesty's Theatre, where she is now (1881) engaged. Her parts include Donna Anna, Donna Elvira, Pamina, Susanna, Alice, Leonora (Verdi), Agatha, Mignon, Carmen, Aïda, Ortrud, etc., Madame Roze has been married, 1st to Mr. Julius Perkins, an American bass singer of great promise, who died in 1875; and 2ndly to Mr. Henry Mapleson. On April 17, 1880, at Mr. Ganz's orchestral concert, she revived with great success the 'Divinités du Styx' from Gluck's 'Alceste' (last sung here in 1871 by Viardot Garcia), and an air from Mozart's 'Il Re Pastore,' which was formerly a favourite with Madame Lind-Goldschmidt. [A.C.]

RUBATO, lit. 'robbed' or 'stolen,' referring to the values of the notes, which are diminished in one place and increased in another. The word is used, chiefly in instrumental music, to indicate a particular kind of licence allowed in order to emphasise the expression. This consists of a slight *ad libitum* slackening or quickening of the time in any passage, in accordance with the unchangeable rule that in all such passages any bar in which this licence is taken must be of exactly the same length as the other bars in the movement, so that if the first part of the bar be played slowly, the other part must be taken quicker than the ordinary time of the movement to make up for it; and *vice versa*, if the bar be hurried at the beginning, there must be a *rallentando* at the end. In a general way this most important and effective means of expression is left entirely to the discretion of the performer, who, it need scarcely be said, should take great care to keep it within due limits, or else the whole feeling of time will be destroyed, and the emphasis so desirable in one or two places will fail of its effect if scattered over the whole composition. Sometimes, however, it is indicated by the composer, as in the 1st Mazurka in Chopin's op. 6 (bar 9), etc. This licence is allowable in the works of all the modern 'romantic' masters, from Weber downwards, with the single exception of Mendelssohn, who had the greatest dislike to any modification of the time that he had not specially marked. In the case of the older masters, it is entirely and unconditionally inadmissible, and it may be doubted whether it should be introduced in Beethoven, although many great interpreters of his music do not hesitate to use it. [See Tempo.] [J.A.F.M.]

RUBINELLI, Giovanni Battista, celebrated singer, born at Brescia in 1753, made his first appearance on the stage at the age of 18, at Stuttgart, in Sacchini's 'Calliroe.' For some years he was attached to the Duke of Würtemberg's chapel, but in 1774 he sang at Modena in Paisiello's 'Alessandro nelle Indie' and Anfossi's 'Demofoonte.' His success was very great; and during the next few years he performed at all the principal theatres in Italy. In 1786 he came to London, after a journey from Rome by no means propitious. The weather was unusually severe, and, in going through France, his travelling chaise was overturned at Macon; besides which, when approaching Dover, the boat that landed him was upset, and the unlucky singer remained for a time up to his chin in the water. In spite of these perils he made a successful *début* in a pasticcio called 'Virginia,' his own part in which was chiefly composed by Tarchi. He next sang with Mara, in 'Armida,' and in Handel's 'Giulio Cesare,' revived for him, with several interpolations from Handel's other works. These are said to have been most admirably sung by Rubinelli. 'He possessed a contralto voice of fine quality, but limited compass. It was full, round, firm, and steady in slow movements, but had little agility, nor did he attempt to do more than he could execute perfectly. His style was the true cantabile, in which few could excel him; his taste was admirable, and his science great; his figure tall and commanding, his manner and action solemn and dignified. In short he must be reckoned, if not the first, yet of

the first class of fine singers.' (Lord Mount-Edgecumbe.) Burney says that his voice was better in a church or a theatre, where it could expand, than in a room; and continues, 'There was dignity in his appearance on the stage, and the instant the tone of his voice was heard no doubt remained with the audience that he was the first singer. His style was grand, and truly dramatic, his execution neat and distinct, his taste and embellishments new, select, and masterly, and his articulation so pure and well accented that, in his recitatives, no one conversant in the Italian language ever had occasion to look at the book of the words while he was singing. Rubinelli, from the fulness of his voice and greater simplicity of style, pleased a more considerable number of hearers than Pacchierotti, though none, perhaps, so exquisitely as that singer used to delight his real admirers. Rubinelli, finding himself censured on his first arrival in England, for changing and embellishing his airs, sang "Return, O God of Hosts" in Westminster Abbey, in so plain and unadorned a manner, that even those who venerate Handel the most thought him insipid.'

After his season in London he returned to Italy, where he had enormous success at Vicenza and Verona, in 1791 and 1792, in 'La Morte de Cleopatra' of Nasolini, and 'Agesilao' of Andreozzi. In 1800 he left the stage, and settled at Brescia, where he died in 1829.

The following lines, some of which are well known (suggested by the occasion of Carbonelli the violinist having relinquished the musical profession to become a wine merchant), bear witness to the powers and the popularity of Rubinelli. They are by the Rev. Dr. Wake, whose quaint spelling has been followed.

Let Rubinelli charm the ear,
And sing as erst with voice divine,
To Carbonelli I adhear,
Instead of musick, give me wine.

And yet perhaps with wine combined,
Sweet musick would our joys improve,
Let both together then be joined,
And feast we as the gods above.

Anacreon-like I'll sit and quaff,
Old age and wrinkles I'll despise,
Devout the present hours to laugh,
And learn to-morrow to be wise.

[F.A.M.]

RUBINI, Giovanni Battista, the most celebrated of modern tenor singers, was born at Romano, near Bergamo, on April 7, 1795. The son of a professor of music, he learned the rudiments of his art from his father, and at eight years old could sing in church choirs and play the violin in an orchestra. He was then placed as a pupil with one Don Santo, a priest, organist at Adro, who however soon sent him home again, saying that he had no talent for singing. In spite of this, the father persisted in teaching his unpromising son, and allowed him, at the age of twelve, to appear in public at the Romano theatre in a woman's part. The boy was next engaged at Bergamo as chorus-singer, and to play violin solos in the entr'actes. It happened while he was here that in a new drama that was brought out, an air by Lamberti, of considerable difficulty, had to be introduced, for which it was not easy to find a singer. The song was finally entrusted to young Rubini, who acquitted himself with much applause, and was rewarded by the manager with a present of five francs. In after life he was fond of singing this song, in memory of his first triumph. His elation at the time must have been sadly damped just afterwards by the refusal of a Milan manager to engage him as chorus-singer, because of his insufficient voice.

After belonging for a time to a strolling company, and making an unsuccessful attempt at a concert tour with a violinist called Madi, he got a small engagement at Pavia, then another at Brescia for the Carnival; he next appeared at the San Mosè theatre at Venice, and lastly at Naples, where the director, Barbaja (according to Escudier), engaged him to sing with Pellegrini and Nozzari, in two operas written for him by Fioravanti. (The name of one of these operas, 'Adelson e Salvina,' is identical with that of an early work of Bellini's produced about this time.) With the public Rubini was successful, but so little does Barbaja appear to have foreseen his future greatness that he wished to part with him at the end of the first year's engagement, and only consented to retain his services at a reduced salary. Rubini preferred making some sacrifice to leaving Naples, where he was taking lessons of Nozzari, and he acceded to Barbaja's conditions, which very soon, however, had to be rescinded, owing to Rubini's brilliant successes at Rome (in 'La Gazza ladra') and at Palermo. Some time in 1819 he married Mdlle. Chomel, known at Naples as La Comelli, a singer of some contemporary celebrity, a Frenchwoman by birth, and pupil of the Paris Conservatoire.

His first appearance at Paris was on October 6, 1825, in the 'Cenerentola,' and was followed by others in 'Otello' and 'La Donna del Lago.' He was hailed unanimously as 'King of Tenors,' and began here the series of triumphs which lasted as long as his stage career. He was still bound by his engagement with Barbaja, who by this time had become aware of his worth, and only yielded him for six months to the Théâtre Italien, claiming him back at the end of that time to sing at Naples, then at Milan, and at Vienna.

Up to this time his laurels had been won in Rossini's music, on which his style was first formed, and it was not till now that he found his real element, the vehicle most congenial to his special individuality, and thanks to which he was to reach the summit of his fame. Rubini was the foundation and *raison d'être* of the whole phase of Italian opera that succeeded the Rossinian period. He and Bellini were said to have been born for one another, and in all probability Rubini was not more captivated by the tender, pathetic strains of Bellini, than the sensitive Bellini was influenced by Rubini's wonderful powers of expression. Such a singer is an actual source of inspiration to a composer, who hears his

own ideas not only realised, but, it may be, glorified. During the whole composition of 'Il Pirata,' Rubini stayed with Bellini, singing each song as it was finished. To this fortunate companionship it cannot be doubted that we owe 'La Sonnambula' and 'I Puritani.' Donizetti, again, achieved no great success until the production of 'Anna Bolena,' his *thirty-second* opera, in which the tenor part was written expressly for Rubini, who achieved in it some of his greatest triumphs. It was followed by 'Lucia,' 'Lucrezia,' 'Marino Faliero,' and others, in which a like inspiration was followed by the same result.

Rubini first came to England in 1831, when freed from his engagement with Barbaja, and from that time till 1843 he divided each year between Paris and this country, singing much at concerts and provincial festivals, as well as at the Opera, and creating a *furore* wherever he went.

His voice—more sweet than 'robust,' save on the rare occasions when he put forth his full power—extended from E of the bass clef to B of the treble, in chest notes, besides commanding a falsetto register as far as F or even G above that. A master of every kind of florid execution, and delighting at times in its display no one seems ever to have equalled him when he turned these powers into the channel of emotional vocal expression, nor to have produced so magical an effect by the singing of a simple, pathetic melody, without ornament of any kind soever. He indulged too much in the use of head-voice, but 'so perfect is his art,' says Escudier, writing at the time, 'that the transition from one register to the other is imperceptible to the hearer. . . . Gifted with immense lungs, he can so control his breath as never to expend more of it than is absolutely necessary for producing the exact degree of sound he wishes. So adroitly does he conceal the artifice of respiration that it is impossible to discover *when* his breath renews itself, inspiration and expiration being apparently simultaneous, as if one were to fill a cup with one hand while emptying it with the other. In this manner he can deliver the longest and most drawn-out phrases without any solution of continuity.' His stage appearance was not imposing, for his figure was short and awkward, his features plain and marked with small-pox. He was no actor, and seems rarely to have even tried to act. His declamation of recitative left something to be desired. 'In concerted pieces he does not give himself the trouble of singing at all, and if he goes as far as to open his mouth, it is only to preserve the most absolute silence.' (Escudier.) 'He would walk through a good third of an opera languidly, giving the notes correctly and little more,—in a duet blending his voice intimately with that of his partner (in this he was unsurpassed); but when his own moment arrived there was no longer coldness or hesitation, but a passion, a fervour, a putting forth to the utmost of every resource of consummate vocal art and emotion, which converted the most incredulous, and satisfied those till then inclined to treat him as one whose reputation had been overrated.' (Chorley.) Some of his greatest effects were produced by an excessive use of strong contrasts between *piano* and *forte*, 'which in the last years of his reign degenerated into the alternation of a scarcely-audible whisper and a shout.' He was the earliest to use that thrill of the voice known as the *vibrato* (with the subsequent abuse of which we are all of us too familiar), at first as a means of emotional effect, afterwards to conceal the deterioration of the organ. To him too was originally due that species of musical *sob* produced by the repercussion of a prolonged note before the final cadence, which, electrifying at first as a new effect, has become one of the commonest of vocal vulgarisms. But such was his perfection of finish, such the beauty of his expression, such his thorough identification of himself, not with his dramatic impersonations but with his *songs*, that his hold on the public remained unweakened to the last, even when his voice was a wreck and his peculiarities had become mannerisms. He has had one great successor, very different from himself, in some of his principal parts, and numberless imitators, but no rival in the art of gathering up and expressing in one song the varied emotions of a whole opera, and to this may be due the fact that he was as much worshipped, and is as affectionately remembered by numbers who never set foot in a theatre as by the most constant of opera-goers.

In 1843 he started with Liszt on a tour through Holland and Germany, but the two separated at Berlin, and Rubini went on alone to St. Petersburg, where he created an enthusiasm verging on frenzy. By his first concert alone he realised 54,000 francs. The Emperor Nicholas made him 'Director of Singing' in the Russian dominions, and a colonel into the bargain.

In the summer of this year Rubini went to Italy, giving some representations at Vienna by the way. He returned to Russia in the winter of 1844, but finding his voice permanently affected by the climate resolved to retire from public life. He bought a property near Romano, where he passed his last years, and died, on March 3, 1854, leaving behind him one of the largest fortunes ever amassed on the operatic stage, which, unlike too many of his brother artists, he had not squandered. He seems to have been a simple, kindly-natured man, and letters of his, still extant, show that he was ready and willing to assist needy compatriots.

His imitators have brought discredit on their great original, among those who never heard him, by aping and exaggerating his mannerisms without recalling his genius, so that his name is associated with an impure and corrupt style of vocalisation. This has helped, among other influences, in bringing about the twofold reaction, in composers as well as singers, in favour of *dramatic* opera, and of vocal declamation rather than *singing*, in the sense in which that word would have been understood by Rubini. [F.A.M.]

RUBINSTEIN, Anton Gregor, an eminent composer and one of the greatest pianists the world has ever seen, was born Nov. 30, 1829, of Jewish parents, at Wechwotynetz, near Jassy. He received his first musical instruction from his mother, and afterwards from a pianoforte-teacher in Moscow named Villoing. So early as 1839 he made his first concert-tour with his teacher, journeying to Paris, where he made the acquaintance of Liszt, who was then teaching in that city, and under whose advice he there pursued his studies. A year later he made a more extended tour, going to England (1842), and thence to Holland, Germany, and Sweden. In 1845 he went to study composition with Professor Dehn in Berlin. From 1846-8 he passed in Vienna and Pressburg, teaching on his own account. In 1848 he returned to Russia, where the Grand Duchess Helen nominated him Kammer-Virtuos. After studying diligently in St. Petersburg for eight years he appeared as a fully-fledged artist with piles of original compositions, first in Hamburg and then all over Germany, where he found enthusiastic audiences and willing publishers. From this time his fame as a pianist and composer spread rapidly over Europe and America. He again visited England in 1857, and made his first appearance at the Philharmonic on May 18. In 1858 he returned home again, gave brilliant concerts in St. Petersburg, Moscow, etc., and settled in the former city. At this period he was appointed Imperial Concert-director, with a life-pension. Thenceforward he worked in conjunction with his late friend Carl Schuberth, for the advancement of music in Russia, and had the merit of being the founder of the St. Petersburg Conservatoire in 1862, remaining its Principal until 1867. The Russian Musical Society, founded in 1861, was also his. On leaving Russia he made another triumphant tour through the greater part of Europe, which lasted till the spring of 1870. When in his native country, in 1869, the Emperor decorated him with the Vladimir Order, which raised him to noble rank. In 1870 he rested awhile, and expressed the intention of retiring from public life; but it was not likely that this desire could be fulfilled. He held the Directorship of the Philharmonic Concerts and Choral Society in Vienna for the next year or two, and this was followed by fresh concert tours. Every year the same threat of retirement is made, but the entreaties of the public, and, probably, the desire of providing for his wife and family, brings the gifted genius before us again and again. He has recently extended his tours as far as the south of Spain, from whence he hastened back for the funeral of his brother Nicolas. Of late years he has been threatened with the loss of his eyesight, a misfortune caused in some measure by his excessive application to composition; such a deprivation, however, would not prove an overwhelming catastrophe, as his memory is phenomenal.

Rubinstein's playing is not only remarkable for the absolute perfection of *technique*, in which he is the only rival Liszt ever had, but there is the fire and soul which only a true and genial composer can possess. He can play a simple piece of Haydn or Mozart so as to positively bring tears into the eyes of his hearers, but on the other hand, he will sometimes fall a prey to a strange excitement which causes him to play in the wildest fashion. An example (though hardly a commendable one) of his perfect mastery over tone is to be found in his performance of the Funeral March of Chopin's Sonata in B♭ minor. This well-known piece, regardless of the composer's intentions, he begins *ppp*, proceeding *crescendo*, with perfect gradation, up to the Trio, after which he recommences *ff* and with an equally long and subtle *diminuendo* ends as softly as he began. As an effect—the idea of a band passing—this is stale and unworthy of an artist, but as a *tour de force* it can only be justly appreciated by those who have heard it done and then sought to imitate it. It is an *impossible* feat.

The compositions of Rubinstein are not yet sufficiently mellowed by time for us to judge them fairly. Their style may be considered as the legitimate outcome of Mendelssohn; there is a fine broad vein of melody which is supported by true and natural harmony, and a thorough technical skill. But there is also the fatal gift of fluency, and the consequent lack of that self-criticism and self-restraint which alone make a composer great. Rubinstein has written in every department of music, but as yet his songs and chamber-music are all that can be called really popular, excepting always his 'Ocean Symphony,' which is known all over the world.[1] This is undoubtedly one of his very best works, the ideas throughout being vivid and interesting, while the workmanship shows unusual care. From the composer's having added an extra Adagio and Scherzo after the first appearance of this Symphony we may presume he has a particular regard for it, though to risk wearying an audience by inordinate length is scarcely the way to recommend a work to their favour. The 'Dramatic' Symphony (op. 95) has been admired, but is not frequently performed, while of the other three symphonies the 1st and 5th have each only been performed once in England. His Pianoforte Concertos are very brilliant and effective, especially that in G (op. 45); they will perhaps in time take a permanent position. His Violin Concerto (op. 46) is a very fine work, though but little known. The Persian Songs (op. 34) are perhaps the most popular of his vocal works, but there are many very striking and successful specimens among his other songs—'Es blinkt der Thau' and 'Die Waldhexe' for instance—and the duets are full of beauty and passion. The numerous drawing-room pieces which he has written for the piano are far superior to most of their class, his writing for the instrument being invariably most brilliant, as is

[1] First performed in London by Musical Art Union (Klindworth) May 31, 1861; with extra movements, Crystal Palace, April 12, 1877; Philharmonic, June 11, 1879.

but natural in so great a pianist. His chamber-music is not yet much known in England, and he is apt to give the piano an undue prominence in it; the Quintet in F (op. 55) is almost a Pianoforte Concerto in disguise. His operas and oratorios have as yet met with but qualified success, seeming to lack dramatic force. This is in some measure due to his antagonism to the theories and practice of Wagner and the modern German school. He has a preference for sacred subjects, which are but ill fitted for the stage, but as these works are all amongst his most recent productions it is manifestly impossible to give any decided opinion as to their eventual success. The operas not included in the list of his works with opus-numbers are 'The Demon' (in rehearsal at Covent Garden, June 1881), 'Feramors' (Lalla Rookh), 'The Children of the Heath,' 'The Maccabees,' 'Dimitri Donskoi,' and 'Nero.' There are also about a dozen songs, and as many fugitive pieces for piano without opus-number, besides some small works published during the composer's youthful days and reckoned separately as ops. 1–10.

The complete list of Rubinstein's numbered works is as follows :—

Op. 1. 6 little Songs in Low German dialect. Voice and PF. Schreiber.
2. 2 Fantasias on Russian themes. PF. solo. Schreiber.
3. 2 Melodies for PF. solo (F, B). Schreiber.
4. Mazourka-Fantaisie. PF. solo (G). Schreiber.
5. Polonaise, Cracovienne and Mazurka. PF. solo. Schreiber.
6. Tarentelle. PF. solo (B). Schreiber.
7. Impromptu-Caprice, 'Hommage à Jenny Lind.' PF. solo (A minor). Schreiber.
8. 6 Songs (words from the Russian). Voice and PF. Senff.
9. Octet in D for PF., V., Viola, Cello, Bass, Fl., Clar., and Horn. Peters.
10. Kamennoi-Ostrow. 24 Portraits for PF. Schott.
11. 3 Pieces for PF. and V.; 3 do. for PF. and Cello; 3 do. for PF. and Viola. Schuberth.
12. 1st Sonata for PF. solo (E). Peters.
13. 1st Sonata for PF. and V (G). Peters.
14. 'The Ball' Fantasia in 10 Nos. for PF. solo. B. B.[1]
15. 2 Trios. PF., V., and Cello (F, G min.). Hofmeister.
16. Impromptu, Berceuse and Serenade. PF. solo. Hofmeister.
17. 3 String Quartets (G, C min., F). B. & H.[2]
18. 1st Sonata for PF. and Cello (D). B. & H.
19. 2nd Sonata for PF. and V. (A min.). B. & H.
20. 2nd Sonata for PF. solo (C min.). B. & H.
21. 3 Caprices for PF. solo (F♯, D, E♭). B. & H.
22. 3 Serenades for PF. solo (F, G min., E♭). B. & H.
23. 6 Etudes for PF. solo. Peters.
24. 6 Preludes for PF. solo. Peters.
25. 1st PF. Concerto (E). Peters.
26. Romance and Impromptu. PF. solo (F, A minor). Schreiber.
27. 9 Songs (words from Russian). Voice and PF. Schreiber.
28. Nocturne (G♭) and Caprice (E♭) for PF. solo. Kistner.
29. 2 Funeral Marches. PF. solo.—1. For an Artist (F min.); 2. For a Hero (C min.). Kistner.
30. Barcarolle (F min.); Allo Appass. (D min.) for PF. solo. Kistner.
31. 6 4-part Songs for Male Voices. Kistner.
32. 6 Songs from Heine. Voice and PF. Kistner.
33. 6 Songs. Voice and PF. Kistner.
34. 12 Persian Songs. V. and PF. Kistner.
35. 2nd PF. Concerto (F). Schreiber.
36. 12 Songs from the Russian. Voice and PF. Schreiber.
37. Akrostichon (Laura) for PF. solo. Schreiber.
38. Suite (10 Nos.) for PF. solo. Schott.
39. 2nd Sonata for PF. and Cello (G). B. & H.
40. 1st Symphony for Orchestra (F). Kahnt.
41. 3rd Sonata for PF. solo (F). B. & H.
42. 2nd Symphony, 'Ocean' (C). Senff.
43. Triumphal Overture for Orchestra ( ). Schott.
44. 'Soirées à St. Petersbourg,' for PF. solo (6 pieces) Kahnt.
45. 3rd PF. Concerto (G). B. B.
46. Concerto, Violin and Orch. (G). Peters.
47. 3 String Quartets (Nos. 4, 5, 6, E min., B♭, D min.). B. & H.
48. 12 Two-part Songs (from the Russian) with PF. Senff.
49. Sonata for PF. and Viola (F min.) B. & H.
50. 6 'Charakter-Bilder.' PF. duet. Kahnt.
51. 6 Morceaux for PF. Senff.
52. 3rd Trio. PF. and Strings (B♭). Senff.
53. 6 Preludes and Fugues in free style. PF. solo. Peters.
54. 'Paradise Lost.' Sacred Opera after Milton, in 3 parts. Senff.
55. Quintet for PF. and Wind (F). Schuberth.
56. 3rd Symphony (A). Schuberth.
57. 6 Songs. Voice and PF. Senff.
58. Scena ed Aria, 'E dunque vero?' Sop. and Orch. Schott.
59. String Quintet (F). Senff.
60. Concert Overture in B♭. Senff.
61. 3 Part-songs for Male Voices. Schreiber.
62. 6 Part-songs for Mixed Voices. Schreiber.
63. 'Die Nixe.' Alto Solo, Female Chorus, and Orch. Senff.
64. 5 Fables by Kriloff. Voice and PF. Senff.
65. 1st Concerto for Cello and Orch. (A min.). Senff.
66. Quartet. PF. and Strings (C). Senff.
67. 6 Two-part Songs with PF. Senff.
68. 'Faust.' Musical portrait, for Orch. Siegel.
69. 5 Morceaux for PF. solo. Siegel.
70. 4th PF. Concerto (D min.). Senff.
71. 3 Morceaux. PF. solo. Siegel.
72. 6 Songs for a Low Voice and PF. Senff.
73. Fantaisie for 2 Pianos (F). Senff.
74. 'Der Morgen.' Cantata for Male Voices and Orch. (from the Russian). Senff.
75. 'Album de Peterhof.' 12 pieces. PF. solo. Senff.
76. 6 Songs for Voice and PF. Senff.
77. Fantaisie for PF. (E min.) Senff.
78. 12 Songs from the Russian. Voice and PF. Senff.
79. 'Ivan the Terrible.' Musical portrait for Orch. B. B.
80. 'The Tower of Babel.' Sacred opera in one act. Senff. Chappell.
81. 6 Etudes for PF. solo. B. B.
82. Album of National Dances (6) for PF. solo. B. B.
83. 10 Songs. Voice and PF. B. B.
84. Fantasia for PF. and Orch. (C). Senff.
85. 4th Trio. PF. and Strings (A). Lewy.
86. Romance and Caprice for Violin and Orch. Senff.
87. 'Don Quixote.' Musical portrait, Humoreske for Orch. Senff.
88. Theme and Variations for PF. solo (G). Senff.
89. Sonata for PF. duet (D). Senff.
90. 2 String Quartets (Nos. 7, 8, G min., E min.). Senff.
91. Songs and Requiem for Mignon (from Goethe's 'Wilhelm Meister') for Solos, Chorus, and PF. Senff.
92. 2 Scenas for Contralto and Orchestra. No. 1. 'Hecuba'; No. 2. 'Hagar in the desert.' Senff.
93. 9 Books of Miscellaneous Pieces (12) for PF. solo. Senff.
94. 5th PF. Concerto (E♭). Senff.
95. 4th Symphony, 'Dramatic' (D min.). Senff.
96. 2nd Concerto. Cello and Orch. Senff.
97. Sextuor for Strings (D). Senff.
98. 3rd Sonata. PF. and V. (B min.). Senff.
99. Quintet. PF. and Strings G min.). Senff.
100. 4th Sonata for PF. solo (A min.). Senff.
101. 12 Songs. Voice and PF. Senff.
102. Caprice Russe. PF. and Orch. Senff.
103. Bal costumé Set of characteristic pieces (20) for PF. 4 hands. B. B.
104. Elegie; Variations; Etude. PF. solo. B. B.
105. A series of Russian songs. Voice and PF. B. B.
106. 2 String Quartets (Nos. 9, 10, A♭, F min.)
107. 5th Symphony (G min.) In memory of the Grand-duchess Hélène Paulowna. Senff.

[1] B. B. = Bote & Bock. [2] B. & H. = Breitkopf & Härtel.

Rubinstein's appearance is remarkable. His head is of a very Russian type, massive and noble, without beard or moustache, but with a thick shock of dark brown hair which as yet shows no gray. In general look his face resembles the ideal Beethoven of the sculptors. He is well read, and his very wide travels have given him much knowledge of men and things. His manner is simple and genial, and he has the true modesty of genius.

We have said that Rubinstein's first visit to London was in 1842. He was then only just 12. Mendelssohn and Thalberg were both here, and the Philharmonic was thus naturally already occupied. No doubt he played in public; but the periodicals are silent about him, and the only printed mention of him to be found is in Moscheles's diary for 1842 ('Leben,' ii. 90), where he is spoken of by that genial master as 'a rival to Thalberg . . . a Russian boy whose fingers are as light as feathers, and yet as strong as a man's.' He did not return to this country till 1857, when

he appeared at the Philharmonic on May 18, playing his own Concerto in G. He came back in the following year, played again at the Philharmonic on June 7, and at the Musical Union May 11. In 1869 he came a fourth time, and played at the Musical Union only (May 18, June 1). In 1876 he made his fifth visit, played at the Philharmonic May 1, and gave four Recitals in St. James's Hall. In 1877 he had again recitals, and also conducted his 'Ocean' Symphony (6 movements), and played Beethoven's Concerto in G, at the Crystal Palace on June 4. In 1881 he has given another series of Recitals at St. James's Hall, his opera 'The Demon' was brought out in Italian at Covent Garden on June 21, and his 'Tower of Babel,' with other music, at the Crystal Palace on June 11.

Of his Symphonies four have been heard here, the last (op. 107) at the Crystal Palace, May 1881. The third Symphony, in A, has not yet been played in England. Of his PF. Concertos four out of five have been heard, that in G three times; the first alone has not yet been played. Of his Overtures that in B♭ (op. 60), that in C (op. 43), and that to 'Dimitri Donskoi' have all been played at the Crystal Palace, as well as the Ballet music of 'Feramors' and 'The Demon,' and 'Don Quixote.' Of his chamber-music the favourite pieces at the Monday Popular Concerts are, Cello Sonata in D (6 times), three pieces for PF. and cello (op. 11, 4 times), B♭ Trio (4 times), and PF. Quintet (op. 99, twice).

NICHOLAS, his younger brother, who settled in Moscow, was also a fine pianist and no mean composer, though overshadowed by the fame of his great brother. He studied under Kullak and Dehn in Berlin during 1845 and 6. In 1859 he founded at Moscow the Russian Musical Society, which gives twenty concerts each year; and in 1864 the Conservatoire, and was head of both till his death. In 1861 he visited England, and played twice at the Musical Union (June 4, 18). In 1878 he gave four orchestral concerts of Russian music in the Trocadéro at Paris with great success. He died of consumption in Paris, Mar. 23, 1881, on his way to Nice for his health, widely and deeply lamented. His latest published work is op. 17—'Scène du Bal, Polonaise.'

RUBINSTEIN, JOSEPH—no relation to the foregoing—has acquired some fame as a pianist and composer of drawing-room music. He has also obtained an unenviable notoriety through certain newspaper articles in the 'Bayreuther Blätter' signed with his name (though believed by some to have emanated from a more famous pen), and attacking Schumann and Brahms in a most offensive and vindictive manner. [F.C.]

RUCKERS, clavecin makers of Antwerp, who were working as masters between 1579 and 1667 or later, the first of whom, Hans Ruckers, is always credited with great improvements in keyboard instruments. It is certain that the tone of the Ruckers clavecins has never been surpassed for purity and beauty of tone-colour (timbre); and from this quality they remained in use in England, as well as in France and the Netherlands, until harpsichords and spinets were superseded, at the end of last century, by the pianoforte. The art of harpsichord making, as exemplified in London by Kirkman and Shudi, was directly derived from Antwerp and the Ruckers. Time seemed to have no effect with the Ruckers instruments. They were decorated with costly paintings in this country and France, when a hundred years old and more. New keys and new jacks replaced the old ones; so long as the soundboard stood lasted the 'silvery sweet' tone. It has done so in some instances until now, but modern conditions of life seem to be inimical to the old wood; it will be difficult, if not impossible, to preserve any of these old instruments much longer. As a work of piety we have catalogued all that we have seen or can hear of, appending the list to this notice.

In John Broadwood's books, 1772–3, are several entries concerning the hiring of Ruker, Rooker, and Rouker harpsichords to his customers; to the Duchess of Richmond, Lady Pembroke, Lady Catherine Murray, etc., etc. In 1790 Lord Camden bought a 'double Ruker': in 1792 Mr. Williams bought another, the price charged for each being 25 guineas. These entries corroborate the statement of James Broadwood ('Some Notes,' 1838, printed privately 1862) that many Ruckers harpsichords were extant and in excellent condition fifty years before he wrote. He specially refers to one that was twenty years before in possession of Mr. Preston, the publisher, reputed to have been Queen Elizabeth's, and sold when Nonsuch Palace was demolished. To have been hers Hans Ruckers the elder must be credited with having made it.

If the tone caused, as we have said, the long preservation of the Ruckers clavecins, on the other hand the paintings which adorned them not unfrequently caused their destruction. A case in point is the instrument of the Parisian organist, Balbastre, whom Burney visited when on his famous tour. Burney says it was painted inside and out with as much delicacy as the finest coach or snuffbox he had ever seen. Inside the cover was the story of Rameau's 'Castor and Pollux,' the composer, whom Burney had seen some years before, being depicted lyre in hand and very like. He describes the tone as delicate rather than powerful (he would be accustomed in London to the sonorous pompous Kirkmans, which he so much admired), and the touch, in accordance with the French practice of quilling, as very light. This instrument was then more than a hundred years old, perhaps more than a hundred and fifty. We learn the fate of it from Rimbault ('The Pianoforte,' 1860, p. 76), who tells us that it became the property of Mr. Goding of London, who sacrificed Ruckers' work, to display the paintings by Boucher and Le Prince that had adorned it, on a new grand piano made for the purpose by Zeitter. This maker showed respect for his predecessor by preserving the soundboard, which he converted into a music box, the inscription 'Joannes Ruckers me fecit Antverpiæ' being transferred to the

back. This box ultimately became Rimbault's; the piano was sold at Goding's sale by Christie & Manson in 1857.

It was this intimate combination of the decorative arts with music that led to the clavecin and clavichord makers of Antwerp becoming members of the artists' guild of St. Luke in that city. They were enrolled in the first instance as painters or sculptors. We must however go farther back than Hans Ruckers and his sons to truly estimate their position and services as clavecin makers. For this retrospect the pamphlet of the Chevalier Léon de Burbure—'Recherches sur les Facteurs de Clavecins et les Luthiers d'Anvers' (Brussels, 1863), supplies valuable information. We learn that at the end of the 15th and beginning of the 16th centuries, precisely as in England and Scotland at the same period, the clavichord was in greater vogue than the clavecin; possibly because clavecins were then always long, and the oblong clavichord recommended itself as more convenient and cheap for ordinary use; just as is now the case with grand and upright pianos. But about the year 1500 the clavecin had been made in the clavichord shape in Venice, and called Spinet. [See SPINET.] This new form must have soon travelled to the Low Countries, and have superseded the Clavichord, as it did in England and France about the same epoch.

A clavecin maker named Josse Carest was admitted in 1523 to the St. Luke's guild as a sculptor and painter of clavichords (literally 'Joos Kerrest, clavecordmaker, snyt en scildert').[1] Another Carest had been accepted in 1519 as an apprentice painter of clavecins ('Goosen Kareest, schilder en Klavecimbelmaker, gheleert by Peeter Mathys'). This is an earlier instance of the name Clavecin than that quoted by M. de Burbure as the oldest he had found in Belgium, viz. a house in the parish of Notre Dame, Antwerp, which, in 1532, bore the sign of 'de Clavizimbele.' No doubt at that time both clavecins and clavichords were in use in Antwerp, but in a few years we hear of the latter no more; and the clavecin soon became so important that, in 1557, Josse Carest headed a petition of the clavecin-makers to be admitted to the privileges of the guild as such, and not, in a side way, merely as painters and sculptors of their instruments. Their prayer was granted, and the ten petitioners were exempted from the production of 'masterworks,' but their pupils and all who were to come after them[2] were bound to exhibit masterworks, being clavecins, oblong or with bent sides ('viercante oft gehoecte clavisimbale,' square or grand as we should say), of five feet long or more; made in the workshops of master experts, of whom two were annually elected; and to have the mark, design, or scutcheon, proper to each maker (syn eygen marck, teecken, oft wapene), that is, a recognised trade-mark on each instrument. We will give these trade marks of the members of the Ruckers family from sketches kindly supplied by M. Abel Régibo, of Renaix in Belgium; three, belonging to Hans and his two sons, having been already published by M. Edmond Vander Straeten in his monumental work 'La Musique aux Pays Bas,' vol. iii. (Brussels, 1875).[3] It is at once evident that such regulations tended to sound work. The trade-marks we have more particularly described under ROSE. They were usually made of lead, gilt, and were conspicuous in the soundholes of the instruments.

Some of the cotemporary Italian keyboard-instruments might be taken to give a general idea of what the Antwerp ones were like prior to the improvements of Hans Ruckers the elder. In the preparation of the soundboards the notion of the soundchest of LUTE and PSALTERY prevailed. Ruckers adhered to this principle, but being a tuner and perhaps a builder of organs, he turned to the organ as a type for an improved clavecin, and while holding fast to *timbre* as the chief excellence and end of musical instrument making, introduced different tone-colours, and combined them after organ analogies and by organ contrivances of added keyboards and registers. The octave stop had been already copied in the little octave spinets which Prætorius tells us were commonly used to reinforce the tone of larger instruments, but the merit of Hans Ruckers, traditionally attributed to him, and never gainsaid, was his placing the octave as a fixture in the long clavecin, boldly attaching the strings to hitchpins on the soundboard (strengthened beneath for the purpose), and by the addition of another keyboard, also a fixture, thus establishing a model which remained dominant for large instruments until the end of the clavecin manufacture.[4]

An interesting chapter is devoted to the Ruckers family by M. Edmond Vander Straeten in the work already referred to (vol. iii. p. 325 etc.) He has gathered up the few documentary notices of the members of it discovered by MM. Rombouts and Van Lerius, by M. Génard and by M. Léon de Burbure, with some other facts that complete all that is known about them.

The name Ruckers, variously spelt Rukers, Rueckers, Ruyckers, Ruekaers, Rieckers, and Rikaert, is really a contraction or corruption of the Flemish Ruckaerts or Ryckaertszoon, equivalent to the English Richardson. Hans the elder was certainly of Flemish origin, being the son of Francis Ruckers of Mechlin. He can hardly have been born later than 1555. Married at Notre Dame (the cathedral), Antwerp, June 25, 1575, as Hans Ruckaerts, to Naenken Cnaeps, he was admitted as Hans Ruyckers, 'clavisinbalmakerre,' to the Lucas guild in 1579. It appears strange that he was not enrolled a citizen

1 See 'De Liggeren en andere Historische Archieven der Antwerpsche Sint Lucasgilde.' Rombouts en Van Lerius. 2 vols. Baggerman, Antwerp; Nijhoff, The Hague.

2 Later on, tuners also became members of the guild. For instance, Michel Colyns, *Claversingelstelder*, in 1631-2; who was however the son of a member.

3 Burney refers to these marks when writing about the Ruckers.

4 The end of the manufacture for Antwerp is chronicled by M. de Burbure in one seen by him—he does not say whether single or double—made by a blind man, and inscribed 'Joannes Heineman me fecit A° 1795, Antwerpiæ.'

until 1594, but this may have been, as M. de Burbure suggests, a re-admission, to repair the loss of a record burnt when the Spaniards sacked the Hôtel de Ville in 1576. In those troubled times there could have been but little to do in clavecin-making. May we see in this a reason for his acquiring that knowledge of the organ which was to lead ultimately to his remodelling the long clavecin?

He had four sons, Francis, Hans, Andries, and Anthony. It is only with Hans (baptized Jan. 13, 1578) and Andries (baptized Aug. 30, 1579) that we are concerned, since they became clavecin makers of equal reputation with their father. We learn that in 1591 Hans Ruckers the elder became tuner of the organ in the Virgin's chapel of the Cathedral, and that in 1593 he added 14 or 15 stops to the large organ in the same church. In 1598 and 1599 either he or his son Hans (the records do not specify which) had charge of the organs of St. Bavon, and from 1617 to 1623 of St. Jacques. The like doubt exists as to the Hans who died in 1642. We believe that this date refers to the son, as the latest clavecin we have met with of his make is Mr. Leyland's beautiful instrument dated that year; the latest date of the father's clavecins at present found being either 1632 (doubtful, see No. 8) or 1614. The earliest is 1590, with which date three existing instruments are marked. The trade-mark of Hans the elder, is here represented.

(1.)

JAHSc

Of the instruments catalogued below it will be observed that eleven are probably by Hans the elder. The long ones are provided with the octave stop and, perhaps without exception (one being without details), have the two keyboards identified with him as the inventor. But it is interesting to observe the expedients agreeing with the statement of Prætorius, that octave instruments[1] were employed with and in the oblong clavecins. These expedients doubtless originated before Hans Ruckers; indeed in the Museum at Nuremberg, there is an oblong clavecin of Antwerp make, signed 'Martinus Vander Biest,' and dated 1580, that has an octave spinet in it.[2] 'Merten' Vander Biest entered the Guild in Antwerp, as one of the ten clavecin makers, in 1558. Now Messrs. Chappell of London own such an instrument, No. 9 in appended catalogue, made by Hans Ruckers, certainly the elder. No keys remain, but the scale of both the fixed and movable keyboards is the same, four octaves marked near the wrestpins *si–si* (B–B). In this clavecin it is the left hand keyboard which is removable and is tuned an octave higher. In the Museum of the Conservatoire, Brussels, there is an oblong clavecin by Hans the elder (No. 4) wherein the octave spinet is above and not by the side of the fixed one—according to M. Victor Mahillon a later addition, though the work of the maker himself. This curious instrument formerly belonged to Fétis, and is dated 1610. While on the subject of these removable octave spinets we will refer to one with keyboards side by side made by Hans the younger (No. 13), and dated 1619, the property of M. Régibo, and another, a long clavecin, also by Hans the younger (No. 26), not dated, belonging to M. Snoeck of Renaix, that has the octave spinet fixed in the angle side, precisely as in a more modern one, made by Coenen of Ruremonde, which may be seen in the Plantin museum, Antwerp.

Hans Ruckers the younger—known to the Belgian musicologists as Jean, because he used the initials J. R. in his rose, while the father, as far as we know, used H. R.—was, as we have said, the second son. M. Régibo has supplied us with three of his roses.

(2.)

(3.)

(4.)

We have given the date of his baptism in the cathedral in 1578, but have no further details to record beyond the ascertained facts that he was married to Marie Waelrant, of the family of the musician Hubert Waelrant,[3] in the cathedral, Nov. 14, 1604; that either he or his brother

[1] We hesitate to accept Prætorius' statement literally as to such spinets being tuned a fifth as well as an octave higher. This more likely originates in the fact that the F and C instruments had before his time been made at one and the same pitch, starting from the lowest key, although the disposition of the keyboards and names of the notes were different; as in organs, where pipes of the same measurement had been actually used for the note F or the note C. See Arnold Schlick's 'Spiegel der Orgelmacher,' 1511.

[2] A woodcut of this rare instrument is given in Part ix. of Dr. A. Reissmann's 'Illustrirte Geschichte der deutschen Musik,' Leipzig, 1881. Both keyboards, side by side, are apparently original, with white naturals and compass of 4 octaves C-C. It is the right-hand keyboard that is tuned the octave higher and is removable like a drawer. A full description of this double instrument is reproduced in Reissmann's work, copied from the 'Anzeiger für Kunde der deutschen Vorzeit' (Nuremberg, 1879, No. 9).

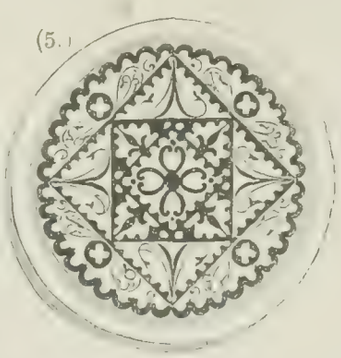
[3] Dr. John Bull succeeded Rumold Waelrent as organist of the cathedral in 1617, and retained the post until his death in 1628. He must have known Hans Ruckers and his two sons well, and been well acquainted with their instruments.

Andries was admitted as a master in the Guild in 1611; and that he was employed to tune the organ of St. Jacques from 1631 until 1642. There is also evidence as to his having died in that year, and not the father, who would seem to have died before.

Mr. Vander Straeten has however brought us nearer Hans the younger, by reference to Sainsbury's collection of 'Original unpublished papers illustrative of the life of Sir Peter Paul Rubens' (London, 1859, p. 208 etc.), wherein are several letters which passed in 1638 between the painter Balthazar Gerbier, at that time at Brussels, and the private secretary of Charles I., Sir F. Windebank. They relate to the purchase of a good virginal from Antwerp for the King of England. Be it remembered that up to this time, and even as late as the Restoration, all clavecins in England, long or square, were called Virginals. [See VIRGINAL.] Gerbier saw one that had been made by Hans Ruckers the younger ('Johannes Rickarts'), for the Infanta. He describes it as having a double keyboard placed at one end, and four stops; exactly what we should now call a double harpsichord. There were two paintings inside the cover, the one nearest the player by Rubens; the subject Cupid and Psyche. The dealer asked £30 for it, such instruments without paintings being priced at £15. After some correspondence it was bought and sent over. Arrived in London it was found to be wanting 6 or 7 keys, and to be insufficient for the music,[1] and Gerbier was requested to get it exchanged for one with larger compass. Referring to the maker, Gerbier was informed that he had not another on sale and that the instrument could not be altered. So after this straightforward but rather gruff answer Gerbier was written to not to trouble himself further about it. Mr. Vander Straeten enquires what has become of this jewel? We agree with him that the preservation of the pictures has probably long since caused the destruction of the instrument. With such decoration it would hardly remain in a lumber room. Mr. Vander Straeten himself possesses a Jean Ruckers single harpsichord, restored by M. Ch. Meerens, of which he has given a heliotype illustration in his work. It is a splendid specimen of Hans the younger.

Andries Ruckers (the elder, to distinguish him from his son Andries), the third son of Hans, was, as we have said, baptized in 1579, and perhaps became a master in 1611. It is certain that in 1619 a clavecin was ordered from him, for the reunions and dramatic representations of the guild and purchased by subscription. As a member of the confraternity of the Holy Virgin in the cathedral he was tuning the chapel organ gratuitously in 1644. His work, spite of Burney's impression about the relative excellence of his larger instruments, was held in as great esteem as that of his father and brother, as the above-mentioned commission shows. In 1671, Jean Cox, choirmaster of the cathedral, left by will, as a precious object, an André Ruckers clavecin. Handel, many years after, did the same. Within the writer's recollection there have been three honoured witnesses in London to this maker's fame, viz. Handel's (No. 47), dated 1651, given by Messrs. Broadwood to South Kensington Museum; Col. Hopkinson's (No. 31) dated 1614; and Miss Twining's, a single keyboard one (No. 45), dated 1640, still at Twickenham.[2] A tradition exists that Handel had also played upon both the last-named instruments. We do not know when Andries Ruckers the elder died. He was certainly living in 1651, since that date is on his harpsichord (Handel's) at South Kensington. His roses are here given.

(5.)



(6.)

Of Andries Ruckers the younger, the information is most meagre. Born in 1607, we think he became a master in 1636. The christian name is wanting to the entry in the ledger, but as the son of a master, the son of Andries the elder is apparently indicated. The researches of M. Génard have proved the birth of a daughter to Hans the younger, but not that of a son. It might be Christopher, could we attribute to him a master for a father. Regarding him, however, as living earlier, we are content to believe that Andries the younger then became free of the Guild; but as his known instruments are of late date it is possible that he worked much with his father. We know from a baptism in 1665 that the younger Andries had married Catherina de Vriese, perhaps of the family of Dirck or Thierri de Vries, a clavecin-maker whose death is recorded in 1628. Fétis (Biographie universelle, 2nd edit. vii., 346*b*) says he had seen a fine clavecin made by Andries the younger, dated 1667. M. Régibo possesses undoubted instruments by him, and has supplied a copy of his rose (7). He has done the same for Christopher Ruckers (8), of whose make he owns a specimen. M. Vander

(7.)

[1] The Hitchcocks were at this time making spinets in London with five octaves, G—G.

[2] This instrument formerly belonged to the Rev. Thomas Twining, Rector of St. Mary, Colchester, who died in 1804. A learned scholar (he translated Aristotle's 'Poetics') and clever musician, he enjoyed the friendship of Burney and valued highly his favourite harpsichord, on which the great Handel had played. Mr. Charles Salaman used both this instrument and Messrs. Broadwood's in his admirable lectures given in 1855-6 in London and the provinces.

Straeten refers to another in the Museum at Namur. We cannot determine Christopher's relationship to the other Ruckers, but he might have been the her Christofel Ruckers, organist and clockmaker of Termonde, where he set up a carillon in 1549—possibly a priest, at least the title 'her' would indicate a person regarded with veneration. The same writer, in the 5th vol. p. 393 of 'La Musique aux Pays-Bas,' continues, 'who knows if this Christopher did not own a workshop for clavecin making. The priest was everything at that epoch, and a scholar an organ or spinet builder seems to us quite natural and normal.'

We will now give the list of the existing Ruckers instruments, as complete as we have been able to make it. The kind and never tiring help of MM. Mahillon, Meerens, and Vander Straeten of Brussels, and of MM. Snoeck and Régibo of Renaix, as well as of other friends, in compiling it, is gratefully acknowledged.

Catalogue of Ruckers Clavecins, still existing (1881), *as far as possible according to date. Extreme measurements of length and width.*

In all the soundboards are painted with devices, generally of fruit, birds, and flowers.

I. Hans Ruckers de Oude (the Elder).

No.	Form.	Date.	Dimensions. ft. in. by ft. in.	General Description.	Present Owner.	Source of information.
1	Bent side.	1590	7 4 by 2 9	2 keyboards, not original; black naturals; 4¾ octaves, G—E; finely painted. Rose No. 1.	Collection of M. Régibo, Renaix.	A. Régibo.
2	Bent side.	1590	7 9 by 2 10½	2 keyboards, not original; black naturals; 5 oct.; extended by Blanchet.[1] Inscribed Hans Ruckers me fecit Antverpiae; Rose No. 1.	Musée du Conservatoire, Paris.	G. Chouquet.
3	Bent side.	1590	. . . . .	2 keyboards; case 'en laque de Chine'; 5 stops 'a genouillere.'	Château de Pau, France.	Spire Blondel, 'La Revue Britannique,' Oct. 1880.[2]
4	Oblong.	1610	5 7 by 1 7	2 keyboards one above the other; white naturals; 4½ oct., C—F each. The upper and octave instrument a later addition by the maker. Inscribed Hans Ruckers me fecit Antverpiae, 1610.	Musée du Conservatoire, Brussels.	V. Mahillon.
5	Oblong.	1611	5 6 by 1 7½	1 keyboard; 3¾ oct., E—C; case patterned paper. Inscribed Joannes Ruckers fecit Antverpiae, 1611; H. R. rose.	Musée du Steen, Antwerp.	E. Vander Straeten and V. Mahillon.
6	Oblong.	1614	5 5½ by 1 7½	1 keyboard; 3¾ oct., E—C; white naturals.	M. Snoeck, Renaix.	C. Meerens.
7	Bent side.	1614	7 4½ by 3 3	2 keyboards; not original; 5 oct., etc., F—G; white naturals; curved bent side and round narrow end; 2 genouillères and a sourdine of the last century. Rose No. 1.	M. Snoeck, Renaix.	C. Meerens.
8	. . . .	1632	. . . . .	Top painted. (The date inclines us to attribute this one to Hans the Younger); the rose is not described.	M. De Breyne, Ypres.	E. Vander Straeten.
9	Oblong.	Undated	5 7 by 1 5½	2 keyboards side by side, the left-hand one removable, having its own belly and rose, but to be tuned an 8ve. higher than the fixed instrument; no keys left; 4 oct., B—B. Both stretchers inscribed Joannes Ruckers me fecit. 2 roses No. 1. (See No. 13.) Good paintings. Stand, an arcade with 6 balusters.	Messrs. Chappell & Co., London.	A. J. Hipkins.
10	Bent side.	. . .	7 4 by 2 7	2 original keyboards; 4½ oct., C—F (5 keys added); white naturals; 3 stops.	M. Régibo, Renaix.	A. Régibo.

II. Hans Ruckers de Jonge (the Younger).

11	Bent side.	1617	6 8 by 3 7	2 keyboards; white naturals. Paintings in Vernis Martin, lately removed.	M. Pilette, Brussels, 1878, since sold, Hotel Drouot.	Victor Mahillon.
12	Oblong.	1618	2 8½ by 1 3	1 original keyboard; 3¾ oct., E—C; white naturals. Inscribed Joannes Ruckers fecit. Rose No. 2.	Musée du Conservatoire, Paris.	G. Chouquet.
13	Oblong.	1619	7 4 by 2 7	2 original keyboards side by side, 4 stops to the fixed one, the other tuned 8ve. higher; 4½ oct., C—F; white naturals. Roses No. 4. (See No. 9.)	M. Régibo, Renaix.	A. Régibo.
14	Oblong.	1619	3 5 by 1 8½	1 original keyboard; 3¾ oct., E—C; white naturals. Rose No. 2.	M. Régibo, Renaix.	A. Régibo.
15	Oblong.	1622	5 7 by 1 7½	1 keyboard; 4½ oct., C—F; white naturals. Inscribed Joannes Ruckers fecit Antverpiae, 1622, and Omnis Spiritus Laudet Dominum.	M. Victor Mahillon, Brussels.	V. Mahillon.

[1] It is believed by MM. Snoeck, Vander Straeten, Régibo, and V. Mahillon, that few of the Ruckers clavecins are of the original compass of keys. The statements of compass in this list and also in Keyboard should be qualified by this remark. The increase was, however, made long ago, and in some instances possibly by the maker himself. M. Vander Straeten, p. 348, has a quoted passage from Van Blankenburg: 'This was at the time when clavecins had still a narrow keyboard. In the present day (1739?) it would be difficult to meet with one of this kind; all the keyboards having been lengthened.' Again, white naturals are believed to be original in these instruments. Upon very old alterations it is not easy to decide. We are of opinion that black naturals and ivory sharps were occasionally substituted when the paintings were done. In dealing with these questions, however, it is best to refrain from generalising; many errors having arisen from too hasty conclusions.

[2] M. Spire Blondel (Histoire Anecdotique du Piano) mentions a Ruckers clavecin, painted by Gravelot, as finding a buyer at the sale of Blondel d'Azincourt. M. du Sommerard in a private letter refers to one found in a village, probably a Hans Ruckers. There are more in France, as M. Chouquet has heard of three, but has no particulars of them to communicate. Enquiry has failed to discover one in Holland or the Rhenish provinces.

No.	Form.	Date.	Dimensions.	General Descriptions.	Present Owner.	Source of information.
			ft. in. ft. in.			
16	Bent side.	1627	6 0 by 2 7½	1 original keyboard; 4⅓ oct., C—E; white naturals; 2 stops; Rose No. 4; painting inside top, drawn in 'La Musique aux Pays-Bas,' tome 3. Inscribed as No. 15, and MUSICA DONUM DEI.	M. Vander Straeten Brussels.	E. Vander Straeten.
17	Oblong.	1628	5 9 by 1 7½	1 keyboard; 4½ oct., C—F, without lowest C♯; appears to have been extended by the maker from 3¾ oct., E—C. A sourdine 'à genouillère.'	M. Léon Jouret, Brussels.	V. Mahillon.
18	Bent side.	1630	4 10½ by 2 10	2 keyboards; 4¾ oct., G—E; black naturals; painting inside top said to be by Lancret. Inscribed JOANNES RUCKERS ME FECIT ANTVERPIAE. Case and top black and gold lacquer, *Chinese*. Drawn in '*L'Illustration*' 13 March, 1858, and as frontispiece to Chevalier de Burbure's pamphlet.	Baroness James de Rothschild, Paris.	Georges Pfeiffer.
19	Bent side.	1632	8 2 by 3 3	2 keyboards; 5 oct. and 1 note, F—G; white naturals; 4 stops 'à genouillère.' Rose No. 3.	M. Snoeck, Renaix.	C. Meerens.
20	Bent side.	1637	6 1 by 2 9½	1 keyboard; 4 oct., A—F; white naturals. Inscribed as No. 18, with date.	John Callcott Horsley, Esq., R.A., London.	J. C. Horsley.
21	Oblong.	1638	5 9 by 1 7	1 keyboard; 4 oct., etc., C—D; white naturals. Inscribed as No. 15, with date, and MUSICA MAGNORUM EST SOLAMEN DULCE LABORUM. Rose No. 2.	M. Snoeck, Renaix.	C. Meerens.
22	Bent side.	1639	5 9 by 2 7½	1 keyboard; no keys; 4 stops; Rose No. 4; black and gold case.	South Kensington Museum (gift of Messrs. Kirkman).	A. J. Hipkins.
23	Bent side.	1642	7 4½ by 2 8	2 keyboards; 4⅓ oct., B—D; 4 stops at the side as originally placed; Rose No. 4; paintings.	F. R. Leyland, Esq., London.	A. J. Hipkins.
24	Bent side.	Undated	7 11 by 3 0	2 keyboards; 5 oct., F—F; painted outside by Teniers or Brouwer, inside by Breughel and Paul Bril. Rose No. 3.	Musée du Conservatoire, Paris (Clapisson Collection).	G. Chouquet.
25	Bent side.		7 1 by 2 7	1 keyboard; 4½ oct., G—D; black naturals; Rose No. 4; blackwood case with incrusted ivory; according to M. du Sommerard, Italian work.	Musée de l'Hotel de Cluny, Paris. Cat. 1875, *No.* 2825.	A. J. Hipkins.
26	Bent side, with oblong clavecin attached.	. . .	5 11 by 2 5½	2 keyboards; each 3¾ oct., E—C; black naturals; 2 stops to the bent side instrument and Rose No. 4; to the oblong one, Rose No. 2; superbly painted. The two instruments together form an oblong square.	M. Snoeck, Renaix.	C. Meerens.
27	Bent side.	. . .	5 11 by 2 7½	4⅓ oct., C—E; white naturals; superb paintings.	M. Snoeck, Renaix.	C. Meerens.
28	Bent side.	. . .	6 0 by 2 7	1 original keyboard, 4½ oct., C—F; 5 keys added in treble; white naturals; 3 stops; Rose No. 2; painting of Orpheus playing a bass viol.	M. Régibo, Renaix.	A. Régibo
29	Bent side.	. . .	. . . . .	1 original keyboard; 4½ oct., C—F; 4 keys added in treble; Rose No. 3, cut in hard wood.	M. Régibo, Renaix.	A. Régibo.

III. ANDRIES RUCKERS DE OUDE (the Elder).

30	Oblong.	1613	3 8½ by 1 4½	1 keyboard; 4 oct., C—C; white naturals. Inscribed ANDREAS RUCKERS ME FECIT ANTVERPIAE, 1613. *Belonged to the clavecinist and carilloneur, Matthias Vanden Gheyn, who put his mark upon it in 1740.*	Musée du Conservatoire, Brussels.	V. Mahillon.
31	Bent side.	1614	7 6 by 2 8	2 keyboards, not original; 4½ oct., A—E; white naturals; buff leather, lute and octave stops; pedal, not original; case veneered last century. Inscribed as No. 30. Rose No. 6. Painting inside top attributed to Van der Meulen.	Colonel Hopkinson, London.	A. J. Hipkins.
32	Bent side.	1615	4 0 by	Inscribed CONCORDIA RES . PARVAE . CRESCUNT . DISCORDIA . MAXIMAE . DILABUNTUR; was in the Collegiate Church of St. Jacques, Antwerp.	. . . . .	Léon de Burbure, p. 26.
33	Bent side.	1618	7 4 by 2 10	4½ oct., C—F; white naturals. Inscribed SOLI DEO GLORIA.	M. Snoeck, Renaix.	C. Meerens.
34	Bent side.	1619	8 10½ by 2 10	2 keyboards; 5 oct., C—C; the lowest note 8ve. below cello C; belly gilt and diapered in Moorish style; painting of Orpheus outside. Inscribed as No. 30, with date. Rose No. 5.	M. Régibo, Renaix.	A. Régibo.
35	Bent side.	1620	5 10 by 2 8	4½ oct., C—F; white naturals; 4 stops.	M. Snoeck, Renaix.	C. Meerens.
36	Oblong.	1620	4 1 by 1 3½	1 keyboard; 3¾ oct., E—C; white naturals. Inscribed as No. 30, and inside the top SIC TRANSIT GLORIA MUNDI.	M. Alfred Campo, Brussels.	V. Mahillon.
37	Oblong.	1623	5 7½ by 1 7½	1 keyboard; 4 oct., C—C; white naturals. Inscribed as No. 30, with date.	MM. Victor and Joseph Mahillon, Brussels.	V. Mahillon.
38	Bent side.	1623	7 9 by 3 1	2 keyboards; 5 oct., F—F; white naturals; 3 stops; pedal not original; case veneered last century. Rose No. 6.	Dr. Hullah, London.	H. Holiday.
39	Bent side.	1624	8 0 by 2 10	5 oct., F—F; 3 stops. Inscribed MUSICA LAETITIAE COMES, MEDICINA DOLORUM.	Musée Archéologique, Bruges.	V. Mahillon.
40	Oblong.	1626	4 0 by 3 1½	1 keyboard; 3½ oct. and 2 notes; at least an 8ve. added in the last century. Inscribed as No. 30, and inside top as No. 36. The stand a row of five balusters.	. . . . .	E. Vander Straeten.
41	Oblong.	1632	5 8 by 1 7½	1 original keyboard to right hand of front; 4½ oct., C—F; white naturals. Inscribed inside top MUSICA . MAGNORUM . SOLAMEN . DULCE . LABORUM. Rose No. 6.	M. Régibo, Renaix.	A. Régibo.
42	Oblong.	1633	2 1½ by 1 6	1 original keyboard to left hand of front; 4½ oct., C—F; white naturals. Inscribed ANDREAS RUCKERS FECIT ANTVERPIAE. Hardwood jacks of double thickness; painting inside top. Rose No. 6.	M. Régibo, Renaix.	A. Régibo.
43	. . . .	1634	. . . . .	Inscribed ANDREAS RUCKERS ANTVERPIAE.	In a village in Flanders.	E. Vander Straeten.

No.	Form.	Date.	Dimensions.	General Description.	Present Owner.	Source of information.
			ft. in. ft. in.			
44	Bent side.	1636	. . . . .	2 keyboards not original ; 5 oct. ; black naturals ; stops and legs like Taskin's ; beautifully painted. Inscribed as No. 30, with date.	. . . Dijon, France.	E. Vander Straeten.
45	Bent side.	1640	6 0 by 2 5	1 original keyboard ; 4 oct., etc., C—D ; white naturals. Inscribed ANDREAS RUKERS, 1640 ; and inside top MUSICA LAETITIAE COMES MEDICINA DOLORUM ; inside flap CONCORDIA MUSIS AMICA. 2 stops ; Rose No. 6 ; case patt. paper.	Miss Twining, Dial House, Twickenham.	A. J. Hipkins.
46	Oblong.	1644	5 8 by 1 8	1 keyboard ; 4 oct., C—C. Inscribed ANDREAS RUCKERS, ANNO 1644.	M. Victor Mahillon, Brussels.	V. Mahillon.
47	Bent side.	1651	6 8 by 3 0	2 keyboards not original ; nearly 5 oct., G—F, lowest G♯ wanting ; white naturals. Inscribed as No. 30, with date, and SIC TRANSIT GLORIA MUNDI, MUSICA DONUM DEI, and formerly ACTA VIRUM PROBANT. Concert of monkeys on the belly, one conducting. Rose No. 6.	South Kensington Museum (gift, as having been Handel's, of Messrs. Broadwood).	A. J. Hipkins.
48	Oblong.	Undated	2 7 by 1 3½	1 original keyboard placed in the middle ; 4 oct., C—C ; white naturals. Rose No. 6.	M. Régibo, Renaix.	A. Régibo.
49	Bent side.	. . .	7 6 by 2 7	2 keyboards ; the lower 4 oct., etc., B—C, the upper 3¼ oct., E—C ; only one key, a white natural, left ; 3 stops ; no name or rose, but style of work of A. R. Inscribed OMNIS SPIRITUS LAUDET DOMINUM CONCORDIA RES PARVAE CRESCUNT DISCORDIA MAXIMAE DILABUNTUR.	Musée du Steen, Antwerp.	V. Mahillon.
50	Bent side.	. . .	7 3 by 2 11	2 keyboards, not original ; 5 oct., F—F ; black naturals ; inscribed as No. 30 ; date of renovation, 1758, marked on a jack ; fine paintings.	Le Baron de Göer, Château de Velu, Pas de Calais, France.	V. Mahillon.
51	Oblong.	. . .	3 8 by 1 5	1 keyboard ; 4½ oct., C—F ; white naturals ; inscribed as No. 30.	. . . . .	V. Mahillon.
52	Bent side.	. . .	6 6 by 2 8	2 keyboards ; 4½ oct., B—F ; white naturals ; name and rose wanting ; attributed to A. R. by the work.	M. Snoeck, Renaix.	C. Meerens.
53	Oblong.	. . .	3 8 by 1 4	1 keyboard 3¾ oct., E—C. Rose No. 6.	M. Snoeck, Renaix.	C. Snoeck.
				IV. ANDRIES RUCKERS DE JONGE (the Younger).		
54	Bent side.	1655	. . . . .	Case painted in blue camaieu in rococo style ; attribution to the younger A. R. from the late date.	M. Lavignée (from the Château de Perceau, près Cosne).	S. Blondel.
55	Bent side.	1656	5 4½ by 2 2½	1 original keyboard ; 4 oct., C—C ; white naturals ; painting inside top. Rose No. 7.	M. Régibo, Renaix.	A. Régibo.
56	Bent side.	1659	5 10 by 2 4	1 original keyboard ; 4 oct., C—C ; white naturals. Rose No. 7.	M. Régibo, Renaix.	A. Régibo.
57	Oblong.	. . .	4 9 by 1 5½	1 original keyboard to the left ; 4 oct., etc., D—E ; white naturals. Rose No. 7.	M. Régibo, Renaix.	A. Régibo.
				V. CHRISTOFEL RUCKERS.		
58	Oblong.	Undated	3 7 by 1 5½	1 original keyboard to the right ; 4 oct., E—E, without the highest D♯ ; white naturals ; Rose No. 8 ; soundboard and top renewed.	M. Régibo, Renaix.	A. Régibo.

[A. J. H.]

RUDERSDORFF, HERMINE, born Dec. 12, 1822, at Ivanowsky in the Ukraine, where her father, Joseph Rudersdorff, a distinguished violinist (afterwards of Hamburg), was then engaged. She learned singing at Paris from Bordogni, and at Milan from de Micherout, also master of Clara Novello, Catherine Hayes, etc. She first appeared in Germany in concerts, and sang the principal soprano music, on production of Mendelssohn's 'Lobgesang' at Leipzig, June 5, 1840. The next year she appeared on the stage at Carlsruhe with great success, and then at Frankfort—where in 1844 she married Dr. Küchenmeister, a professor of mathematics,—and at Breslau. Her parts consisted of Agatha, Reiza, Valentine, Isabella, Elvira (Puritani), etc. From 1852 to 54 she sang at the Friedrich-Wilhelmstadt Theatre, Berlin, with great success, in light French operas of Adam, Auber, Boieldieu, Hérold, and Thomas, as Juliet (Bellini), and in new German operas, such as Bertalda in Lortzing's 'Undine,' etc., besides playing at Aix-la-Chapelle, Cologne and Dantzic. On May 23, 54, she first appeared in England in German opera at Drury Lane, as Donna Anna, and was fairly well received in that and her subsequent parts of Constance in Mozart's 'Entführung,' Agatha, Fidelio, and Margaret of Valois, and in English as Elvira in 'Masaniello.' She took up her residence in England for several years, only occasionally visiting Germany for concerts and festivals. She sang at the Royal Italian Opera in 1855, also from 1861 to 65, as Donnas Anna and Elvira, Jemmy, Bertha, Natalia (L'Étoile du Nord), etc. ; and in English at St. James's Theatre for a few nights in Loder's opera, 'Raymond and Agnes.' But it was as a concert singer that she was best appreciated, her very powerful voice (not always pleasing), combined with admirable powers of declamation and certainty of execution, and thorough musicianship having enabled her to take high rank as a singer of oratorio. Conspicuous may be mentioned, her rendering of the opening soprano recitatives in the 'Messiah' and of the air following, 'Rejoice greatly,' and of the final air and chorus in the 'Israel,' especially at the Handel Festivals, when her voice would tell out with wonderful effect against the powerful band and choir. In concerts, whatever she undertook she always showed herself a thorough artist, being devoted to her art, in which she worked with untiring industry. This she proved by her revival of Mozart's fine scenas 'Ahi lo previdi' and 'Misera dove son,' and of

Handel's air from 'Semele,' 'O Sleep,' or by the introduction in their own tongue of Danish melodies and the Spanish songs of Yradier. She was engaged at the Boston festivals of 1871 and 72, and after the latter took up her permanent abode in the States, where she now resides. At the Birmingham Festival of 73 she wrote the libretto of Signor Randegger's cantata 'Fridolin,' founded on Schiller's 'Gang nach dem Eisenhammer.' She had previously introduced, in 1869, at the Gewandhaus concerts, Leipzig, the same composer's scena 'Medea,' which she sang also at the Crystal Palace and in 72 at Boston. She has now retired from public life, and devotes herself to teaching singing. Among her pupils are Mesdames Anna Drasdil, Emma Thursby, and Isabel Fassett. [A.C.]

RUDHALL. A family of bell founders of this name carried on business in Bell Lane, Gloucester, from 1648 until late in the 18th century. Its successive members were Abraham, sen., Abraham, jun., Abel, Thomas, and John. From catalogues published by them it appears that from 1648 to Lady day, 1751, they had cast 2972 bells 'for sixteen cities' and other places 'in forty-four several counties,' and at Lady day 1774 the number had increased to 3594. The principal metropolitan peals cast by them were those of St. Bride, St. Dunstan in the East, and St. Martin in the Fields. The most eminent member of the family was Abraham junior, who brought the art of bell-casting to great perfection. He was born 1657, and died Jan. 25, 1736, 'famed for his great skill, beloved and esteemed for his singular good nature and integrity,' and was buried in Gloucester Cathedral. His daughter, Alicia, married William Hine, the cathedral organist. [See HINE, WILLIAM.] The bells of the Rudhalls were distinguished for their musical tone. [W.H.H.]

RUDOLPH JOHANN JOSEPH RAINER, ARCHDUKE of Austria, born at Florence, Jan. 8, 1788, died suddenly at Baden, Vienna, July 24, 1831, was the youngest child of Leopold of Tuscany and Maria Louisa of Spain. On the death of the Emperor Joseph II., Feb. 20, 1790, Leopold succeeded his brother as Emperor Leopold II., and thus Rudolph received an exclusively German education. Music was hereditary in his family. His great-grandfather, Carl VI., so accompanied an opera by Fux, that the composer exclaimed: 'Bravo! your Majesty might serve anywhere as chief Kapellmeister!' 'Not so fast, my dear chief Kapellmeister,' replied the Emperor; 'we are better off as we are!' His grandmother, the great Maria Theresa, was a well-educated *dilettante*, and a fine singer; her children, from very early age, sang and performed cantatas and little dramas, to words by Metastasio, on birthdays and fêtes. His uncle, Max Franz, was Elector of Cologne, viola-player, and organiser of that splendid orchestra at Bonn, to which the Rombergs, Rieses, Reichas and Beethovens belonged. It was his father, Leopold, who, after the first performance of Cimarosa's 'Matrimonio segreto,' gave all those who took part in the production a supper, and then ordered the performance to be repeated; and it was his aunt, Marie Antoinette, who supported Gluck against Piccinni at Paris.

Like the other children of the Imperial family, Rudolph was instructed in music by Anton Teyber, and tradition says that, as early as twelve or fourteen he played in the *salons* of his friends with credit to himself. In later years he gave ample proof of more than ordinary musical talent and taste; but none greater than this—that as soon as he had liberty of choice he exchanged Teyber for Beethoven. The precise date and circumstances attending this change have eluded investigation; but in his 17th year he received a separate establishment from his elder brother, then Emperor Francis I. of Austria (succeeded March 1, 1792), as 'Coadjutor' of the Prince Archbishop Colloredo of Olmütz. From the notices of Ries and other sources, it seems probable that the connection between Rudolph, a youth of sixteen, and Beethoven, a man of thirty-four, began in the winter of 1803–4.

Ries relates that Beethoven's breaches of court etiquette were a constant source of trouble to his pupil's chamberlains, who strove in vain to enforce its rules on him. He at last lost all patience, pushed his way into the young Archduke's presence, and, excessively angry, assured him that he had all due respect for his person, but that the punctilious observance of all the rules in which he was daily tutored, was not his business. Rudolph laughed good-humouredly and gave orders that for the future he should be allowed to go his own way.

Beethoven in 1817 told Fräulein Giannatasio, that he had struck his pupil's fingers, and, upon Rudolph's resenting the affront, had defended himself by pointing to a passage in one of the poets (Goethe?) which sustained him.

Beethoven's triple concerto, op. 56 (1804), though dedicated to Prince Lobkowitz, was written, says Schindler, for the Archduke, Seidler, and Kraft. The work does not require great execution in the piano part, but a youth of sixteen able to play it must be a very respectable performer.

The weakness of the Archduke's constitution is said to have been the cause of his entering the Church. The coadjutorship of Olmütz secured to him the succession; and the income of the position was probably not a bad one; for, though his allowance as Archduke in a family so very numerous was of necessity comparatively small, yet, in the spring of 1809, just after completing his 21st year, he subscribed 1500 florins to Beethoven's annuity. [See vol. ii. p. 59.] In 1818 Beethoven determined to compose a solemn Mass for the installation service of his pupil, a year or two later. On Sept. 28, 1819, the Cardinal's insignia arrived from the Pope, and the installation was at length fixed for March 9,[1] 1820. But the Mass had assumed such gigantic proportions that the ceremony

[1] This date is from the report of the event in the 'Wiener musikalische Zeitung' of March 25, 1820.

had passed nearly two years before it was completed.[1] [See SOLENNIS.] Instead of it, the music performed was a Mass in B♭, by Hummel; a 'Te Deum' in C, by Preindl; 'Ecce Sacerdos magnus,' by a 'Herr P. v. R.'; and Haydn's Offertorium in D minor. The orchestra was increased for the occasion to 84 players. What an opportunity was here lost by Beethoven!

Besides the annuity, Rudolph's purse was probably often opened to his master; but the strongest proofs of his respect and affection are to be found in his careful preservation of Beethoven's most insignificant letters; in the zeal with which he collected for his library everything published by him; in his purchase of the calligraphic copy of his works[2] made by Haslinger; and in his patience with him, under circumstances that must often have sadly tried his forbearance. For Beethoven, notwithstanding all his obligations to his patron, chafed under the interference with his perfect liberty, which duty to the Archduke-Cardinal occasionally imposed. There are passages in his letters to Ries and others (suppressed in publication), as well as in the conversation-books, which show how galling even this light yoke was to Beethoven; and one feels in perusing those addressed to the Archduke how frivolous are some of the excuses for not attending him at the proper hour, and how hollow and insincere are the occasional compliments, as Rudolph must have felt. That Beethoven was pleased to find the Forty Variations dedicated to him by 'his pupil, R. E. H.' (Rudolph Erz-Herzog), was probably the fact; but it is doubtful whether his satisfaction warranted the superlatives in which his letter of thanks is couched. Other letters again breathe throughout nothing but a true and warm affection for his pupil. Köchel sensibly remarks that the trouble lay in Beethoven's 'aversion to the enforced performance of regular duties, especially to giving lessons, and teaching the theory of music, in which it is well known his strength did not lie, and for which he had to prepare himself.' When the untamed nature of Beethoven, and his deafness, are considered, together with his lack of worldly wisdom and his absolute need of a Mæcenas, one feels deeply how fortunate he was to have attracted and retained the sympathy and affection of a man of such sweet and tender qualities as Archduke Rudolph.

We can hardly expect an Archduke-Cardinal to be a voluminous composer, but the Forty Variations already mentioned, and a sonata for PF. and clarinet, composed for Count Ferdinand Troyer, both published by Haslinger, are good specimens of his musical talents and acquirements. He was for many years the 'protector' of the great 'Society of the Friends of Music' at Vienna, and bequeathed to it his very valuable musical library. He was also extremely fond of engraving, and several copper plates designed and engraved by him have been preserved to testify to very considerable taste and skill in that art.

A son of his, for thirty years past a well-known contributor to the German musical periodical press, still living (1881), possesses an oil portrait of his father. It shows a rather intellectual face, of the Hapsburg type, but its peculiarities so softened as to be more than ordinarily pleasing, and even handsome.[3]

The Archduke's published works are the two alluded to above:—Theme by L. van Beethoven, with 40 variations—for PF. solo (Haslinger); Sonata for PF. and clarinet, op. 2, in A (Haslinger).

Those dedicated to him by Beethoven are as follows—a noble assemblage—

Concerto for PF. and Orchestra, No. 4, in G (op. 58).
Do., do., No. 5, in E♭ (op. 73).
Sonata for PF. solo, 'Les Adieux, L'Absence, et le Retour,' in E♭ (op. 81 *a*).
PF. arrangement of Fidelio (op. 72 *b*).
Sonata for PF. and Cello, in G (op. 96).
Trio for PF., V., and Cello, in B♭ (op. 97).
Grand Sonata for the Hammerklavier, in B♭ (op. 106).
Canon, 'Alles Gute.'
Missa Solennis, in D (op. 123).
Grand Fugue for Quartet (op. 133), and 4-hand arrangement of same.
Song, 'Gedenke mein.'

[A.W.T.]

RUDORFF, ERNST, was born in Berlin Jan. 18, 1840; his family was of Hanoverian extraction. At the age of five he received his first musical instruction from the daughter of Professor Lichtenstein and god-daughter of C. M. von Weber, an excellent pianist and of a thoroughly poetical nature. From his twelfth to his seventeenth year he was a pupil of Bargiel in PF. playing and composition. A song and a PF. piece composed at this period he afterwards thought worthy of publication (Op. 2, No. 1; Op. 10, No. 4). For a short time in 1858 he had the advantage of PF. lessons from Mme. Schumann, and from his twelfth to his fourteenth year learned the violin under Louis Ries. At Easter, 1857, he entered the first class of the Friedrichs Gymnasium, whence at Easter, 1859, he passed to the Berlin university. During the whole of this time his thoughts were bent on the musical profession. When Joachim visited Berlin in 1852 Rudorff had played before him, and had made such a favourable impression that Joachim advised his being allowed to follow the musical profession. His father was at first opposed to this, but at length consented that he should go at Michaelmas, 1859, and attend the Conservatorium and the University at Leipzig. After two terms of theology and history he devoted himself exclusively to music, and on leaving the Conservatorium at Easter, 1861, continued his musical studies for a year under Hauptmann and Reinecke. The summer of 1862 he passed at Bonn, and returned to Berlin without any fixed employment beyond that of cultivating his musical ability. Stockhausen was then conductor of a choral society at Hamburg. Rudorff went to him early in 1864, conducted those of the Society's concerts in which Stockhausen himself sang, and finally made concert tours with him. In 1865 he became professor at

[1] Beethoven announces its completion in a letter to the Archduke Feb. 27, 1822.

[2] These, a splendid series of red folio volumes, beautifully copied, are conspicuous in the Library of the Gesellschaft der Musikfreunde at Vienna.

[3] For a more detailed notice see the 'Musical World' April 2, 1881.

the Cologne Conservatorium, and there in 1867 he founded the Bach Society, whose performance at their first concert in 1869 caused a great sensation, and gave such satisfaction to Rudorff himself that he at first refused an appointment as professor in the new Hoch Schule at Berlin under Joachim's direction. He afterwards changed his mind, and since Oct. 1869 has been first professor of PF.-playing and director of the piano classes in that institution, besides conducting part of the orchestral practices, and in Joachim's absence directing the public performances. In the summer of 1880, on Max Bruch's appointment as director of the Liverpool Philharmonic Society, Rudorff succeeded him as conductor of the Stern Singing-Society in Berlin, but without resigning his post at the High School.

The surroundings among which Rudorff grew up were in many respects most favourable. His father, a pupil of Savigny and a distinguished professor at the Berlin University, was not only deeply learned but was endowed with a poetical mind and a natural gift for music. His mother, a granddaughter of J. F. Reichardt, and a friend of the Mendelssohns, was devoted to music. Among the relations of the family were Tieck, H. Steffens, and K. von Raumer; while Achim von Arnim, Schleiermacher and the brothers Grimm were intimate friends of his father's and constantly in the house. The influence of such characters as these on a boy of intellect and susceptibility is obvious, and they may be said to have formed him both morally and intellectually. He himself has made some not unsuccessful attempts at literature, of which his essay 'On the Relation of Modern Life to Nature' (Preuss. Jahrbücher, 1880, p. 261) is a good example.

As a musician he certainly ranks among the most distinguished of living Germans. He has much talent for PF.-playing, though an unfortunate nervousness prevents him from exercising it much in public. His tone is beautiful, and his conception poetical, and he possesses considerable power of execution, never degenerating into display. He is a very good teacher, and numbers Miss Janotha among his pupils. But his greatest gifts are shown in composition. His musical style is founded throughout upon the romantic school of Chopin, Mendelssohn and Schumann, and especially of Weber. There prevails to a considerable extent in Germany a foolish inclination to undervalue that great genius on account of some weak points in his music; indeed, among the younger generation of German composers, Rudorff is the only one in whom we can trace his direct influence, and we owe to him the first edition of the score of 'Euryanthe' (Berlin, Schlesinger, 1866). In addition to these the genius of Bach has influenced him powerfully. Rudorff however is no antiquated Romanticist. There is in Germany at present a widespread effort to throw off the romantic style which characterised the first half of the century. The leader of this movement is Brahms, who has lately almost openly abandoned the romantic style. This is not the case with Rudorff; his sentiment is that of the Romanticists. But he agrees with Brahms in endeavouring to combine the sentiment of the romantic school with classical form. In this he has succeeded better in instrumental than in vocal music. Rudorff's sentiment is much too complicated to admit of his producing any really satisfactory compositions of a kind for which he nevertheless has a predilection, viz. unaccompanied part-songs. His part-songs interest by their elegance and thoughtfulness, but few, if any, leave a pleasant impression on the mind. This is true also of his solo songs. He has an almost feminine horror of anything rough or common, and often carries this to such a pitch as seriously to interfere with simplicity and naturalness. He has deeply imbibed the romantic charm of Weber's music, but the bold easy mirth which at times does not shrink from trivialities is unfortunately utterly strange to him. His melodies are intricate, and so artificially treated as to avoid natural development. Or they are so ingeniously harmonised as to give to what is really simple an appearance of singularity; and thus, owing to his vivid and passionate sentiment, his compositions often seem overstrained or extravagant. To this criticism, however, his earliest songs (op. 2 and 3) are not open. True, they follow closely in Schumann's steps, but they are among the most beautiful that have been written in his style.

But it is through his instrumental music that Rudorff will be longest known. He has produced a number of remarkable and distinguished works; PF. pieces, a sextet for strings, a romance for violoncello, etc., two overtures, a serenade, and variations on an original theme, all for orchestra; a ballad for orchestra and a piano fantasia composed about the same time are less happy. His first overture—in many respects the most charming thing he has written—fails here and there in respect to structure, but in his later orchestral works he shows a complete mastery over forms, from the simplest to the most complicated. That the sense of form should be so strong in a nature of so rich and wide a subjectivity is characteristic of this composer. In general his talent leads him to create that which is elegant, dreamy and tender, rather than that which is manly, powerful, and impetuous. The choral work with orchestral accompaniment, 'Der Aufzug der Romanze,' fails at the beginning and end in those broad decided forms which are necessary to the style of the composition; but the middle part, which treats of spring and love, is of singular beauty. Through the 'Gesang an die Sterne' there breathes that solemn devotion to nature which was first illustrated in music by Beethoven.

Rudorff's works are for the most part of great technical difficulty. This is principally because the composer, we will not say over-loads them with detail, but over-elaborates them. This has kept his works from being as well known as they deserve. But he is sure to make a name in the future, even though he should never compose again.

Rudorff is however in the prime of life, and there is happily no prospect of his laying down his pen. The following is a list of his published works:—

Op. 1, variations for 2 PFs.; op. 2, six songs; op. 3, six do. from Eichendorff; op. 4, six duets for PF.; op. 5, sextet for strings; op. 6, four part-songs for mixed voices; op. 7, romance for cello and orchestra; op. 8, overture to 'Der blonde Ekbert' for orchestra; op. 9, six part-songs for female voices; op. 10, eight Fantasiestücke for PF.; op. 11, four part-songs for mixed voices; op. 12, overture to 'Otto der Schütz' for orchestra; op. 13, four part-songs for mixed voices; op. 14, fantasie for PF.; op. 15, ballade for full orchestra; op. 16, four songs; op. 17, four do.; op. 18, 'Der Aufzug der Romanze,' from Tieck, for solos, chorus and orchestra; op. 20, serenade for orchestra; op. 22, six 3-part songs for female voices; op. 24, variations on an original theme for orchestra; op. 25, four 6-part songs; op. 26, 'Gesang an die Sterne,' by Rückert, for 6-part chorus and orchestra; op. 27, six 4-part songs; op. 27, No. 1 étude for PF.; No. 2 concert étude for do. He has also arranged Schubert's 4-hand fantasia in F minor (op. 103) for orchestra. [P.S.]

RÜBEZAHL. An opera in 2 acts; words by J. G. Rhode, music composed by C. M. von Weber, at Breslau, between October 1804 and May 1806. Weber's autograph list shows that the first act contained 15 scenes, the second 12. Of these pieces of music, however, only 3 have survived (in MS.)—a Chorus of Spirits, a Recitative and Arietta, and a Quintet. Of the overture (in D minor) only the last 11 bars of the first violin part exist: it was recast into the overture called 'The Ruler of the Spirits.' (See Jähns's List, nos. 44, 45, 46, 122; Anhang 2, no. 27.) [G.]

RUFFO, Vincenzo, an Italian composer of the 16th century, included by Baini among the 'good musicians' of his 4th Epoch. He is stated by Fétis to have been born at Verona, and to have become maestro di capella, first of the cathedral at Milan, and then of that of his native place. Eitner gives the date of the latter as 1554. Another notice makes him also Maestro di Capella at Pistoja. Nine separate original publications of his works are mentioned by Fétis and Pougin, embracing a mass; 2 books of motets; 1 do. of Magnificats; 1 do. of psalms; 4 do. of madrigals; and ranging in date from 1550 to 1583. The Catalogue of the Fétis Library, however, contains (No. 2213) a book of madrigals, dated Venice, 1545. The psalms and the mass are stated in the prefaces (1568, 74) to have been written for his patron Card. Borromeo, in accordance with the decrees of the Council of Trent (1563). An 'Adoramus' has been reprinted by Lück, and a madrigal, 'See from his ocean bed,' for 4 voices, was edited by Oliphant, and is given in Hullah's 'Part Music, Class A.' The Library of Ch. Ch., Oxford, has a MS. motet à 3 of his, and the Sacred Harmonic Society (No. 1940) two madrigals. [G.]

RUGGIERI, the name of a celebrated family of violin-makers, who flourished at Cremona and Brescia. The eldest was Francesco, commonly known as 'Ruggieri il Per' (the father), whose instruments date from 1668 to 1720 or thereabouts. John Baptist (1700–1725) and Peter (1700–1720), who form the second generation of the family, were probably his sons; and John Baptist (called 'il buono'), who was indisputably the best maker in the family, claims to have been a pupil of Nicholas Amati. Besides these, we hear of Guido and Vincenzo Ruggieri, both of Cremona, early in the eighteenth century. The instruments of the Ruggieri, though differing widely among themselves, bear a general resemblance to those of the Amati family. They rank high among the works of the second-rate makers, and are often passed off as Amatis. [E.J.P.]

RUINS OF ATHENS, THE. A dramatic piece (Nachspiel) written by Kotzebue, and composed by Beethoven (op. 113), for the opening of a new theatre at Pesth, February 9, 1812, when it was preceded in the ceremony by 'King Stephen' (op. 117). It contains an overture and 8 numbers, and was probably composed late in 1811. The 'Marcia alla turca,' No. 4, is founded on the theme of the Variations in D, op. 76, which was composed two years earlier. The March and Chorus, no. 6, were used in 1822, with the Overture, op. 124, for the opening of the Josephstadt Theatre, Vienna. The Overture to 'The Ruins of Athens' and the Turkish March were published in 1823, but the rest of the music remained in MS. till 1846. [G.]

RULE, BRITANNIA! The music of this noble 'ode in honour of Great Britain,' which, according to Southey, 'will be the political hymn of this country as long as she maintains her political power,' was composed by Arne for his masque of 'Alfred' (the words by Thomson and Mallet), and first performed at Cliefden House, Maidenhead, Aug. 1, 1740. Cliefden was then the residence of Frederick, Prince of Wales, and the occasion was to commemorate the accession of George I, and the birthday of Princess Augusta. The masque was repeated on the following night, and published by Millar, Aug. 19, 1740.

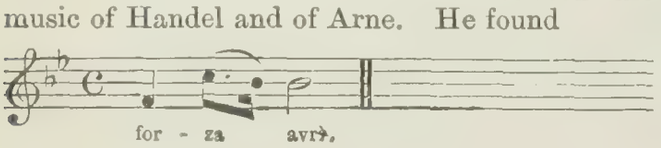
Dr. Arne afterwards altered the masque into an opera, and it was so performed at Drury Lane Theatre on March 20, 1745, for the benefit of Mrs. Arne. In the advertisements of that performance, and of another in April, Dr. Arne entitles 'Rule, Britannia!' 'a celebrated ode,' from which it may be inferred that it had been especially successful at Cliefden, and had made its way, though the masque itself had not been performed in public. Some detached pieces had been sung in Dublin, but no record of a public performance in England has been discovered.

The year 1745, in which the opera was produced, is memorable for the Jacobite rebellion in the North, and in 1746 Handel produced his 'Occasional Oratorio,' in which he refers to its suppression, 'War shall cease, welcome Peace,' adapting those words to the opening bars of

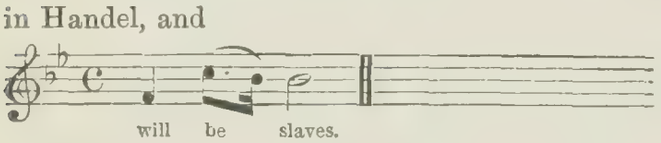
'Rule, Britannia!'—in itself a great proof of the popularity of the air.

By a singular anachronism, Mr. Schœlcher, in his 'Life of Handel' (p. 299), accuses Arne of copying these and other bars in the song from Handel, instead of Handel's quoting them from Arne. He says also: 'Dr. Arne's *Alfred*, which was an utter failure, appears to have belonged to 1751.' It was not Arne's 'Alfred' that failed in 1751, but Mallet's alteration of the original poem, which he made shortly after the death of Thomson. Mallet endeavoured to appropriate the credit of the masque, as he had before appropriated the ballad of 'William and Margaret,' and thereby brought himself into notice.[1] Mallet's version of 'Alfred' was produced in 1751, and, in spite of Garrick's acting, failed, as it deserved to fail.[2]

Mr. Schœlcher's primary mistake led him to search further for resemblances between the music of Handel and of Arne. He found



in Handel, and



in Arne. Not knowing that this cadence was the common property of the whole world, he imagined that Arne must have copied it from Handel. His objections have been answered by Mr. Husk, Mr. Roffe, and others in vols. iv. and v. of 'Notes and Queries,' 2nd Series, to which the curious may be referred. Even the late M. Fétis, who had Anglophobia from his youth, and who repaid the taunts of Dr. Burney upon French music with sneers upon English composers, admits that 'Arne eut du moins le mérite d'y mettre un cachet particulier, et de ne point se borner, comme tous les compositeurs Anglais de cette époque, à imiter Purcell ou Hændel.' M. Fétis's sneer at the other English composers of 'cette époque' as copyists of Handel is quite without foundation. Handel's music, even with other words, was published under his name as its recommendation; English church musicians would have thought it heresy to follow any other models than those of their own school, and English melodists could not find what they required in Handel. Ballad operas, Arne's Shakespearian songs, Vauxhall songs, ballads, and Anglo-Scottish songs, were the order of the day 'à cette époque,' and Handel's purse suffered severely from their opposition.

The score of 'Rule, Britannia!' was printed by Arne at the end of 'The Judgment of Paris,' which had also been produced at Cliefden in 1740. The air was adopted by Jacobites as well as Hanoverians, but the former parodied, or changed, the words. Among the Jacobite parodies, Ritson mentions one with the chorus—

> Rise, Britannia! Britannia, rise and fight!
> Restore your injured monarch's right.

A second is included in 'The True Loyalist or Chevalier's favourite,' surreptitiously printed without a publisher's name. It begins :—

> Britannia, rouse at Heav'ns command!
> And crown thy native Prince again;
> Then Peace shall bless thy happy land,
> And plenty pour in from the main;
> Then shalt thou be—Britannia, thou shalt be—
> From home and foreign tyrants free! etc.

Another is included in the same collection.

A doubt was raised as to the authorship of the words of 'Rule, Britannia!' by Dr. Dinsdale, editor of the re-edition of Mallet's Poems in 1851. Dinsdale claims for Mallet the ballad of 'William and Margaret,' and 'Rule, Britannia!' As to the first claim, the most convincing evidence against Mallet—unknown when Dinsdale wrote—is now to be found in the Library of the British Museum. In 1878 I first saw a copy of the original ballad in an auction room, and, guided by it, I traced a second copy in the British Museum, where it is open to all enquirers. It reproduces the tune, which had been utterly lost in England, as in Scotland, because it was not fitted for dancing, but only for recitation. Until Dinsdale put in a claim for Mallet, 'Rule, Britannia!' had been universally ascribed to Thomson, from the advertisements of the time down to the 'Scotch Songs' of Ritson—a most careful and reliable authority for facts. Mallet left the question in doubt. Thomson was but recently dead, and consequently many of his surviving friends knew the facts. 'According to the present arrangement of the fable,' says Mallet, 'I was obliged to reject a great deal of what I had written in the other; neither could I retain of my friend's part more than three or four single speeches, and a part of one song.' He does not say that it was the one song of the whole that had stood out of the piece, and had become naturalised, lest his 'friend' should have too much credit, but 'Rule, Britannia!' comes under this description, because he allowed Lord Bolingbroke to mutilate the poem, by substituting three stanzas of his own for the 4th, 5th and 6th of the original. Would Mallet have allowed this mutilation of the poem had it been his own? Internal evidence is strongly in favour of Thomson. See his poems of 'Britannia,' and 'Liberty.' As an antidote to Dinsdale's character of David Mallet, the reader should compare that in Chalmers's 'General Biographical Dictionary.'

Beethoven composed 5 Variations (in D) upon the air of 'Rule, Britannia!' and many minor stars have done the like. [W.C.]

1 For 'William and Margaret,' with and without Mallet's alterations, see Appendix to vol. iii. of 'Roxburghe Ballads,' reprinted for the Ballad Society; also an article in No. 1 of the periodical entitled 'The Antiquary.'

2 See Chappell's 'Popular Music of the Olden Time.'

RUMMEL. A German musical family. (1) CHRISTIAN FRANZ LUDWIG FRIEDRICH ALEXANDER was born at Brichsenstadt, Bavaria, Nov. 27, 1787. He was educated at Mannheim, and seems to have had instruction from the Abbé Vogler. In 1806 he took the post of bandmaster to the 2nd Nassau infantry, made the Peninsular Campaign, married in Spain, was taken prisoner, released, and served with his regiment at Waterloo. He was then employed by the Duke of Nassau to form and lead his court orchestra, which he did with great credit to himself till 1841, when it was dissolved. Christian Rummel died at Wiesbaden Feb. 13, 1849. He was not only an able conductor and a composer of much ability and industry, but a fine clarinetist and a good pianoforte-player. His works are numerous, and embrace pieces for military band, concertos, quintets and other pieces for clarinet, many pianoforte compositions, especially a sonata for 4 hands (op. 20) waltzes, variations, etc. and a Method for the PF. (2) His daughter JOSEPHINE was born at Manzanares in Spain during the Peninsular War, May 12, 1812. She was pianist at the Court at Wiesbaden, and died Dec. 19, 1877. (3) His son JOSEPH, born Oct. 6, 1818, was educated by his father in music generally, and in the clarinet and PF. in particular, on both of which he was a good player. He was for many years Kapellmeister to the Prince of Oldenburg, then residing at Wiesbaden—a post in which he was succeeded by Adolphe Henselt. Up to 1842 he lived in Paris, and then removed to London for five years. In 1847 he returned to Paris, and remained there till driven back to London by the war in 1870; and in London he resided till his death, March 25, 1880. Joseph Rummel wrote no original music, but he was one of the most prolific arrangers of operas and operatic selections for the PF. that ever existed. For nearly 40 years he worked incessantly for the houses of Schott and Escudier, publishing about 400 pieces with each house under his own name, besides a much larger number under *noms de plume*. His arrangements and transcriptions amount in all to fully 2000. He wrote also a series of exercises for Augener & Co., and for Escudier. (4) Joseph's sister FRANZISKA, born at Wiesbaden, Feb. 4, 1821, was educated by her father until she went to Paris to study singing under Bordogni, and afterwards to Lamperti at Milan. She became principal singer at the Court of Wiesbaden, and at length married Peter Schott, the well-known music publisher at Brussels, who died in 1873. (5) Another son, AUGUST, became a merchant in London, where he still lives, and where (6) his son FRANZ was born, Jan. 11, 1853.

FRANZ RUMMEL at the age of 14 went to Brussels to study the PF. under Brassin, first as a private pupil and afterwards in the Conservatoire. He took the first prize for PF.-playing there in 1872, and afterwards became one of the staff of teachers. He made his first public appearance at Antwerp Dec. 22, 1872, in Henselt's PF. Concerto; in July 1873 played the Schumann Concerto at the Albert Hall Concerts, London; and again at Brussels, before the King and Queen of the Belgians, with great distinction. He remained at the Conservatoire as professor till 1876, when on the advice of Rubinstein he threw up his post and began to travel, playing in the Rhine Provinces, Holland, and France. Early in 1877 he came to London, and played at the Crystal Palace on April 7. Next year he went to America, where he met with great success, though interrupted by a serious accident. He returned in 1881, and played again at the Crystal Palace on April 30. His répertoire is large, embracing the works of Tschaïkowsky, Raff, Rubinstein, Liszt, as well as those of the more established classical masters. [G.]

RUNGENHAGEN, CARL FRIEDRICH. See SINGAKADEMIE.

RUSSELL, WILLIAM, Mus. Bac., son of an organ builder and organist, was born in London in 1777. He was sucessively a pupil of Cope, organist of St. Saviour's Southwark, Shrubsole, organist of Spa Fields Chapel, and Groombridge, organist of Hackney and St. Stephen's, Coleman Street. In 1789 he was appointed deputy to his father as organist of St. Mary, Aldermanbury, and continued so until 1793, when he obtained the post of organist at the chapel in Great Queen Street, Lincoln's Inn Fields, which he held until 1798, when the chapel was disposed of to the Wesleyan body. In 1797 he became a pupil of Dr. Arnold, with whom he studied for about three years. In 1798 he was chosen organist of St. Ann's, Limehouse. In 1800 he was engaged as pianist and composer at Sadler's Wells, where he continued about four years. In 1801 he was engaged as pianist at Covent Garden and appointed organist of the Foundling Hospital Chapel. He took his Mus. Bac. degree at Oxford in 1808. He composed two oratorios, 'The Redemption of Israel' and 'Job'; an 'Ode to Music,' an 'Ode to the Genius of Handel,' Christopher Smart's 'Ode on St. Cecilia's day,' and an 'Ode to Harmony,' several glees, songs, and organ voluntaries, and about 20 dramatic pieces, chiefly spectacles and pantomimes. He edited in 1809 'Psalms, Hymns and Anthems for the Foundling Chapel.' He was much esteemed both as pianist and organist. He died Nov. 21, 1813. [W.H.H.]

RUSLAN I LYUDMILA. A Russian romantic opera, in 5 acts, based on a poem by Pushkin, the music by Glinka. Produced at St. Petersburg, Nov. 27, 1842. The scene is laid in the Caucasus, in fabulous times, and the music is said to partake strongly of the Asiatic, oriental, character. The overture was played at the Crystal Palace, Sydenham, London, July 4, 1874. [G.]

RUST. A distinguished German musical family. FRIEDRICH WILHELM was born at Wörlitz, Dessau, July 6, 1739; his father was a person of eminence, and he received a first-rate education. He was taught music by his elder brother, who, as an amateur, had played the violin in J. S. Bach's orchestra at Leipzig; and

at 13 he played the whole of the Well-tempered clavier without book. Composition, organ, and clavier he learned from Friedemann and Emmanuel Bach, and the violin from Höckh and F. Benda; and in 1765, during a journey to Italy, from G. Benda, Tartini, and Pugnani. In 1766 he returned to Dessau, and became the life and soul of the music there. On Sept. 24, 1774, a new theatre was opened through his exertions, to which he was soon after appointed music-director. He married his pupil, Henriette Niedhart, a fine singer, and thenceforward, with a few visits to Berlin, Dresden, etc., his life was confined to Dessau, where he died, Feb. 28, 1796. His compositions include a Psalm for solo, chorus, and orchestra; several large Church Cantatas; Duodramas and Monodramas; Operas; music to Plays; Prologues and Occasional pieces, etc.; Odes and Songs (2 collections); Sonatas and Variations for the PF. solo—'4 dozen' of the former and many of the latter—Concertos, Fugues, etc., etc.; and three Sonatas for the violin solo, which have been republished by his grandson (Peters), and are now the only music by which Rust is known; that in D minor has been often played at the Monday Popular Concerts. His last composition was a violin sonata for the E string, thus anticipating Paganini. A list of his works, with every detail of his life, extending to 6½ large pages, is given in Mendel. His eldest son was drowned; the youngest, Wilhelm Karl, born at Dessau, April 29, 1787, began music very early; and besides the teaching he naturally got at home, learned thorough-bass with Türk while at Halle University. In Dec. 1807 he went to Vienna, and in time became intimate with Beethoven, who praised his playing of Bach, and recommended him strongly as a teacher. Amongst other pupils he had Baroness Ertmann and Maximilian Brentano. His letters to his sister on Beethoven are very interesting, and are given by Thayer, iii. 35–6. He remained in Vienna till 1827, when he returned to his native place, and lived there, teaching and making music, much beloved and sought after till his death, April 18, 1855. His memory appears to have been extraordinarily retentive and accurate, and an anecdote is given by his nephew in Mendel of his recollecting a composition of Palestrina's after 48 years. He published little or nothing.

Wilhelm Rust is the son of Karl Ludwig, brother of the foregoing, himself an advocate, and fine amateur-player on both violin and PF. Wilhelm was born Aug. 15, 1822, at Dessau; he learned music from his uncle, Wilhelm Karl, and F. Schneider. After a few years wandering he settled in Berlin, where he soon joined the Singakademie. He played at the Philharmonic Society of Berlin, Dec. 5, 1849, and was soon much in request as a teacher. In Jan. 1861 he became organist of the St. Luke's church, and twelvemonths afterwards director of Vierling's Bach Society, which he conducted till 1874, performing a large number of fine works by Bach and other great composers, many of them for the first time. The list of occasional concerts conducted by him is also very large. With 1870 he undertook the department of counterpoint and composition in the Stern Conservatorium at Berlin, and in 1879 succeeded E. F. E. Richter as Cantor of the St. Thomas school, Leipzig, where he now resides. He has been long connected with the Leipzig Bach-gesellschaft, and has edited vols. v, vii, ix—xxiii, and xxv. His original works have reached op. 33, of which eight are for the PF. and the rest for voices. [G.]

RUY BLAS. A play by Victor Hugo, to which Mendelssohn composed an Overture, and a Chorus for soprano voices and orchestra. The Overture (op. 95), is in C minor, and the Chorus (op. 77, no. 3) in A. Both pieces were conceived, written, copied, rehearsed, and executed, in less than a week (see Letter, March 18, 1839). The first performance was Monday, March 11, 1839. Mendelssohn brought it to London in MS. in 1844, and it was tried at a Philharmonic Rehearsal, but for some reason was not performed till a concert of Mrs. Anderson's, May 25, 1849, and is now in the library at Buckingham Palace. The MS. differs in a few passages from the published score, which was not printed till after Mendelssohn's death (No. 5 of the posth. works). [G.]

RUZICKA,[1] Wenzel, deserves a corner for his connexion with Schubert. He was born at Jarmeritz in Moravia, where his father was schoolmaster, Sept. 8, 1758, and died at Vienna, July 21, 1823. At 14 he was sent to Vienna to support himself by music, which he did, contriving at the same time to make himself a thorough proficient in the rules of composition. In 1783 he was playing the violin, and in 1797 the viola, at the Hofburg theatre. He then appears to have gone to Veszprim in Hungary, and become chorus-master and military bandmaster, and to have put, or assisted to put, the famous Rakoczy march into its present shape. And there he composed his one large work, an opera, 'Bela futás,' which was first performed at Pesth, Feb. 22, 1862, and holds a high place in Hungary. On Dec. 1, 1792, he was made Adjunct, and on April 1, 1793, First organist to the Court at Vienna, a post which he held till his death. He had a great reputation as a teacher of composition, and when Salieri discovered Schubert's easy aptitude for music he handed him to Ruzicka for instruction. Ruzicka, however, did not keep the lad long, but returned him, saying much as Holzer had done before him. 'He knows everything already, God Almighty has taught him.'—A sonata of Ruzicka's for PF. and violin is published by Mechetti. [G.]

RYAN, Michael Desmond, dramatic and musical critic, was born at Kilkenny, March 3, 1816, one of the numerous offspring of Dr. Michael Ryan, a physician of some position in the county. On the completion of his academical education at an early age, he entered the University of Edinburgh, early in the year 1832, for the purpose

[1] Spelt also Rucsicska, Rutschitschka, etc.

of studying medicine. He remained in Edinburgh steadily pursuing his studies for some three years, and had made satisfactory progress until it came to the dissecting room, at which his sensitive nature revolted. Being fairly well read, a dabbler in literature, an enthusiastic admirer of art, a good amateur musician, and a keen follower of the stage, Mr. Ryan determined to quit Edinburgh and try his fortune in London. Here he arrived in 1836, by chance met with Mr. J. W. Davison, and commenced an intimate friendship which lasted until dissolved by death. Mr. Ryan now entered upon his literary career in earnest, writing articles and poems for Harrison's Miscellany, etc., and producing verses for songs, original and translated, in teeming abundance. His 'Christopher among the Mountains,' in which he satirised Professor Wilson's criticism upon the last canto of 'Childe Harold,' and his parody of the 'Noctes Ambrosianæ,' were among his first ambitious efforts. A set of twelve sacred songs, versified from the Old Testament and set to music by Edward Loder (D'Almaine), may also be mentioned. The 'Songs of Ireland' (D'Almaine), in which, in conjunction with F. N. Crouch, new verses were fitted to old melodies, is another example of effective workmanship. In 1844 Mr. Ryan became a contributor to 'The Musical World,' and two years later sub-editor, a post which he filled as long as he lived. For years he was a contributor to the 'Morning Post,' 'Court Journal,' 'Morning Chronicle,' and other periodicals, writing criticisms on the drama and music, which had the merit of being trenchant, sound, and erudite. In 1849 he wrote the libretto of 'Charles II.' for Mr. G. A. Macfarren. The subject was taken from a well-known comedy by Howard Payne, rendered popular at Covent Garden by Charles Kemble's acting some quarter of a century before. A short time afterwards Mr. Ryan was commissioned by M. Jullien to provide the libretto of a grand spectacular opera, on the subject of 'Peter the Great'—brought out at the Royal Italian Opera on August 17, 1852, under the title of 'Pietro il Grande.' The fact of the book having been written in English, and translated into Italian (by Signor Maggioni) for the performance at Covent Garden, is a circumstance rare in itself if not absolutely unique. With the late Mr. Frank Mori, Mr. Ryan collaborated in an opera called 'Lambert Simnel,' originally intended for Mr. Sims Reeves, but destined never to see the light. Of the various other works, completed or mapped out, which he produced, nothing need be said; the name of Desmond Ryan will be best remembered as that of an intelligent critic, whose judgment was matured by experience and dictated by a seldom failing instinct. In 1857 he formed his first association with the 'Morning Herald,' and its satellite, the 'Standard,' and became permanently connected with those journals in 1862, as musical and dramatic critic. Few temperaments, however, can sustain the excitement and toil demanded in these days of newspaper activity, and after a painful and prolonged illness, Mr. Ryan quitted this life on Dec. 8, 1868, followed to the grave by the regretful memories of those who had known and esteemed his character. Desmond Ryan was twice married, and left to mourn him a widow and eight children. [D. L. R.]

S.

SACCHINI, Antonio Maria Gaspare, born at Pozzuoli, near Naples, on July 23, 1734. This 'graceful, elegant, and judicious composer' as Burney calls him, who enjoyed great contemporary fame, and was very popular in this country, was the son of poor fisherpeople who had no idea of bringing him up to any life but their own. It chanced however that Durante heard the boy sing some popular airs, and was so much struck with his voice and talent that he got him admitted into the Conservatorio of San Onofrio, at Naples. Here he learned the violin from Niccolo Forenza, and acquired a considerable mastery over the instrument, which he subsequently turned to good account in his orchestral writing. He studied singing with Gennaro Manna; harmony and counterpoint with Durante himself, who esteemed him highly, holding him up to his other pupils, among whom were Jommelli, Piccinni and Guglielmi, as their most formidable rival. Durante died in 1755, and in the following year Sacchini left the Conservatorio, but not until he had produced an Intermezzo, in two parts, 'Fra Donato,' very successfully performed by the pupils of the institution. For some years he supported himself by teaching singing, and writing little pieces for minor theatres, till, in 1762, he wrote a serious opera for the Argentina theatre at Rome. This was so well received that he remained for seven years attached to the theatre as composer, writing operas not only for Rome but many other towns. Among these, 'Alessandro nelle Indie,' played at Venice in 1768, was especially successful, and obtained for its composer, in 1769, the directorship of the 'Ospedaletto' school of music there. He seems to have held this office for two years only, but during that time formed some excellent pupils, among whom may be mentioned Gabrieli, Canti, and Pasquali.

In 1771 he left Venice, and proceeded by way of Munich, Stuttgart, and other German towns, to England, arriving in London in April 1772. His continental fame had preceded him to this country, and a beautiful air of his, 'Care luci,' introduced by Guarducci into the pasticcio of 'Tigrane,' as early as 1767, had, by its popularity, paved the way for his music. True, a strong *clique* existed against the new composer, but he soon got the better of it. 'He not only

supported the high reputation he had acquired on the Continent, but vanquished the enemies of his talents in England. His operas of the "Cid" and "Tamerlano," were equal, if not superior, to most of the musical dramas performed in any part of Europe; indeed each of these dramas was so entire, so masterly, and yet so new and natural, that there was nothing left for criticism to censure, though innumerable beauties to point out and admire.' (Burney.)

In addition to the operas named above, he produced here 'Lucio Vero' and 'Nitetti e Perseo.' His perfect comprehension of the art of writing for the voice, and the skill with which he adapted his songs to their respective exponents, contributed an important element to the success of his music, even indifferent singers being made to appear to advantage. His popularity, however, was undermined after a time, from a variety of causes. Jealousy led to cabals against him. 'Upon a difference with Rauzzini, this singer, from a friend, became a foe, declaring himself to be the author of the principal songs in all the late operas to which Sacchini had set his name, and threatening to make an affidavit of it before a magistrate. The utmost of this accusation that can be looked upon as true may have been that during Sacchini's severe fits of the gout, when he was called upon for his operas before they were ready, he employed Rauzzini, as he and others had done Anfossi in Italy, to fill up the parts, set some of the recitatives, and perhaps compose a few of the airs for the under singers.' (Burney.) He would probably have lived down this calumny, prompted as it was by personal spite, but his idle and dissolute habits estranged his friends, impaired his health, and got him deeply into debt, the consequence of which was that he left this country and settled in Paris—Burney says in 1784; Fétis in 1782. It seems probable that this last date is correct, as several of his operas were produced in the French capital during 1783–4. He had been there on a visit in 1781, when his 'Isola d'Amore,' translated by Framéry and adapted to the French stage, was played there successfully, under the name of 'La Colonie.' His 'Olimpiade' is said to have been deprived of a hearing through the jealousy of Gluck. Burney says, that in Paris Sacchini was almost adored. His works were often performed and widely popular there after his death, but during his life his luck seems to have been almost invariably bad. He started with an apparent advantage in the patronage of Joseph II. of Austria, who was in Paris at the time, and recommended the composer to the protection of his sister, Marie Antoinette. Thanks to this, he obtained a hearing for his 'Rinaldo' (rearranged and partly rewritten for the French stage as 'Renaud'), and for 'Il gran Cid,' which, under the name of 'Chimène,' was performed before the Court at Fontainebleau. Both of these works contained great beauties, but neither had more than a limited success. 'Dardanus,' a French opera, was not more fortunate, in 1784. 'Œdipe à Colone' was finished early in 1785. This, his masterpiece, brought him his bitterest disappointment. The Queen had promised that 'Œdipe' should be the first opera at the royal theatre during the Court's next residence at Fontainebleau. The time was approaching, but nothing was said about it, and Sacchini remarked with anxiety that the Queen avoided him and seemed uneasy in his presence. Suspense became intolerable, and he sought an audience, when the Queen unwillingly and hesitatingly confessed the truth. 'My dear Sacchini, I am accused of showing too much favour to foreigners. I have been so much pressed to command a performance of M. Lemoine's "Phèdre" instead of your "Œdipe" that I cannot refuse. You see the situation; forgive me.' Poor Sacchini controlled himself at the moment, but on arriving at home gave way to despair. The Queen's favour lost, he believed his only chance gone. He took to his bed then and there, and died three months afterwards, on October 7, 1786.

It is very difficult to form a just estimate of this composer, whose merits were great, yet whose importance to the history of Art seems now so small. The dramatic music of the end of the last century is summed up to us in the operas of Gluck and Mozart, exclusive of many others, akin to these in style and tendency, deficient only in the vital element which makes one work live while others die out. At the time of their production the line may have seemed more difficult to draw. One drop of essence may be distilled from a large quantity of material, yet without the proportion of material, that drop would not be obtained. Among the second-rate writers of this transition period, Sacchini must rank first. A little more force, perhaps a little less facility, and he might have been a great, instead of a clever, or a 'graceful, elegant and judicious' composer. He, better than most Italians, seems to have understood the dawning idea of the 'poetical basis of music'; unfortunately the musical ideas, of which the superstructure must (after all) consist, while good and appropriate as far as they went, were limited. His dramatic sense was keen and just, but was not backed by sufficient creative power to make a lasting mark. Fear, remorse, love, hatred, revenge,—these things repeat themselves in the world's drama from Time's beginning to its end, but their expressions are infinite in variety. They repeat themselves, too, in Sacchini's operas, but always in very much the same way. In his later works, the influence of Gluck's spirit is unmistakeable. There is a wide gulf between such early Italian operas as 'L'Isola d'Amore,' consisting of the usual detached series of songs, duets, and concerted pieces, and the 'Œdipe à Colone,' where each number leads into the next, and where vigorous accompanied recitative and well-contrasted, dialogued choruses carry on and illustrate the action of the drama, while keeping alive the interest of the hearer. Burney remarks that Sacchini, 'observing how fond the English were of Handel's oratorio choruses, introduced

solemn and elaborate choruses into some of his operas; but, though excellent in their kind, they never had a good effect; the mixture of English singers with the Italian, as well as the awkward figure they cut as actors, joined to the difficulty of getting their parts by heart, rendered those compositions ridiculous which in still life would have been admirable.' In Paris they managed these things better, for in all the operas of Sacchini's which were composed or arranged for the French stage, choruses are used largely and with admirable effect, while in 'Œdipe' they are the principal feature. A somewhat similar transition to this is apparent in comparing Piccinni's earlier and later works; but his French operas are only Italian ones modified and enlarged. Sacchini had far more dramatic spirit, and took more kindly to the change. He bears the kind of relation to Gluck that Piccinni does to Mozart, but he approached his model more nearly, for he handled Gluck's *theory* almost as well as Gluck himself: had he possessed the one thing lacking—force of originality, there might have been more in his works for 'criticism to censure,' but they might not now have been forgotten. As it was, they made a hard struggle for life. The 'Œdipe' was continuously on the boards of the Académie for 43 years (from 1787 to 1830), which can be said of no other opera. During this time it had 583 representations. It was revived in July 1843, and was performed six times in that year and once in May, 1844.

Sacchini understood orchestral as well as choral effect. His scores are small, oboes, horns, and sometimes trumpets and bassoons, being the only additions to the string quartet, but the treatment is as effective as it is simple. His part-writing is pure and good, while the care and finish evident in his scores is hard to reconcile with the accounts of his idle and irregular ways. The same technical qualities are shown in his compositions for the church, which in other ways are less distinguished than his operas from contemporary works of a similar kind.

Much of Sacchini's music is lost. Fétis gives a list of 21 sacred compositions, and the names of 41 operas, the chief of which have been mentioned here, but Burney puts the number of these much higher. The last of them, 'Arvire et Evelina,' was left unfinished. It was completed by J. B. Rey, and performed with success after the composer's death (April 29, 1788). He also left six trios for two violins and bass; six quartets for two violins, tenor and bass; and two sets, each of six harpsichord sonatas, with violin, as well as twelve sonatas (ops. 3 and 4) for clavier solo. These were all published in London. One of the sonatas, in F, is included in Pauer's 'Alte Meister.' [See the list, vol. ii. 247 *b*.] A couple of cavatinas are given by Gevaert in his 'Gloires d'Italie,' and an antiphon for two voices by Choron in his 'Journal de Chant.' [F.A.M.]

SACKBUT (Fr. *Saquebute, Sambuque*; Span. *Sacabuche*; Ital. *Trombone*; Ger. *Posaune*). An old name for the Trombone or Bass-trumpet. There is good evidence that, besides the Tuba and Lituus, the Romans had instruments of the trumpet family, provided with a slide for altering their pitch. Indeed a fine specimen, discovered in the ruins of Herculaneum, and presented to George III. is now in possession of Her Majesty the Queen. Some such instrument was known to Shakespeare, who has the passage:

> The trumpets, sackbuts, psalteries, and fifes
> Make the sun dance.—*Coriolanus.*

It is also named by Burton in his 'Anatomy of Melancholy': 'As he that plaies upon a Sagbut by pulling it up and down alters his tones and tunes.' The word translated Sackbut in the English Bible is *sabeca*, which was probably a stringed instrument, and which some identify with the *σαμβύκη* of the Greeks.

It is a singular fact that the sackbut or trombone, though known in Germany, a century ago had in this country fallen into disuse. This is clearly proved by the following extract from Dr. Burney's 'Account of the musical performances in Westminster Abbey and the Pantheon on May 26, 27, 29, and June 3 and 5, 1784':

> In order to render the band as powerful and complete as possible it was determined to employ every species of instrument that was capable of producing grand effects in a great orchestra and spacious building. Among these the SACBUT or DOUBLE TRUMPET was sought; but so many years had elapsed since it had been used in this kingdom, that neither the instrument nor a performer upon it could easily be found. It was however discovered . . that in his Majesty's private military band there were six musicians who played the three several species of sacbut, tenor, bass, and double bass.[1]

On referring to the band-list the following entry is found:

TROMBONI OR SACBUTS.

Mr. Karst.	Mr. Moeller.	Mr. Pick.
„ Kneller.	„ Neibour.	„ Zink.

These performers played on other instruments when the Sacbuts were not wanted.

For musical details, see TROMBONE. [W.H.S.]

SACRED HARMONIC SOCIETY. This Society was originated by Thomas Brewer, Joseph Hart, W. Jeffreys, Joseph Surman, and — Cockerell, who first met, with a view to its establishment, on Aug. 21, 1832. Its practical operations did not however commence until Nov. 20 following. Its first meetings were held in the chapel in Gate Street, Lincoln's Inn Fields, many years since converted into a music hall. Its first concert was given in the chapel on Tuesday evening, Jan. 15, 1833. The programme comprised selections from Handel's 'Messiah' and 'Funeral Anthem,' and from Perry's 'Fall of Jerusalem' and 'Death of Abel,' with Attwood's Coronation Anthem, 'O Lord, grant the king a long life,' and the hymn

1 'The most common Sacbut, which the Italians call *Trombone*, and the Germans *Posaune*, is an octave below the common trumpet; its length eight feet when folded, and sixteen straight. There is a manual by which a note can be acquired a fourth lower than the usual lowest sound on the trumpet, and all the tones and semitones of the common scale.' (*Footnote in the original.*)

'Adeste fideles.' The names of the principal singers were not published; Thomas Harper was engaged as solo trumpeter. The then officers of the Society were John Newman Harrison, president; Thomas Brewer, secretary; J. G. Moginie, treasurer; Joseph Surman, conductor; George Perry, leader of the band; and F. C. Walker, organist. In Nov. 1833, the permission to meet in the chapel being suddenly withdrawn, the Society removed to a chapel in Henrietta Street, Brunswick Square, and shortly afterwards to a room belonging to the Scottish Hospital in Fleur de Lys Court, Fleet Street; but at Midsummer, 1834, it migrated to Exeter Hall, which was its home until Michaelmas, 1880. The concerts were for the first two years given in the Minor Hall, and consisted principally of selections, in which a few short complete works were occasionally introduced, such as Handel's 'Dettingen Te Deum,' Haydn's 'Mass,' No. 1, Bishop's 'Seventh Day,' and Romberg's 'The Transient and the Eternal.' The Society having on June 28, 1836, given a concert in the Large Hall in aid of a charity with very great success, was shortly afterwards induced to give its own concerts there. At the same time an important change in its policy was effected, viz. the abandonment of miscellaneous selections for complete oratorios, a change which was received by the public with great favour. Up to that period, even at the provincial festivals, it was very rarely that any complete oratorio, except Handel's 'Messiah' was performed, whilst the programmes of the so-called 'Oratorios' at the two patent theatres on the Wednesdays and Fridays in Lent were a mongrel mixture of oratorio songs and choruses, secular songs of all kinds, and instrumental solos. The first concert given in the Large Hall on the Society's own account was Handel's 'Messiah,' on Dec. 20, 1836, the orchestra consisting of about 300 performers. In 1837 the works performed included Mendelssohn's 'St. Paul' (March 7), for the first time in London and second in England, Handel's 'Messiah,' 'Israel in Egypt,' and 'Dettingen Te Deum,' Haydn's 'Creation,' and the Mass known as Mozart's 12th. On Sept. 12 another performance of 'St. Paul' was given, in the composer's presence [see MENDELSSOHN], of which he wrote to the Committee of the Society—'I can hardly express the gratification I felt in hearing my work performed in so beautiful a manner,—indeed, I shall never wish to hear some parts of it better executed than they were on that night. The power of the choruses,—that large body of good and musical voices,—and the style in which they sang the whole of my music, gave me the highest and most heartfelt treat; while I reflected on the immense improvement which such a number of *real amateurs* must necessarily produce in the country which may boast of it.' During the year the number of performers was increased to 500. In the same year the formation of a musical library was commenced, and Robert Kanzow Bowley appointed honorary librarian. In 1838 Handel's 'Judas Maccabeus,' 'Samson,' and 'Solomon' were revived, and Beethoven's 'Mass in C,' Spohr's 'Last Judgment,' and Perry's 'Fall of Jerusalem' introduced. 1839 witnessed the revival and repetition of Handel's 'Joshua.' A new organ was built for the Society by Walker, and opened Jan. 23, 1840, with a performance by Thomas Adams. Handel's 'Saul' was revived, and Elvey's 'Resurrection and Ascension,' and Perry's 'Thanksgiving Anthem on the birth of the Princess Royal' introduced. 1841 was distinguished by a revival of Handel's 'Jephthah,' and by two performances of a selection of anthems. The latter was received with great interest, public attention having been then lately drawn to our cathedral music. The programme was chronologically arranged and exhibited the various changes in the style of English church music from Tallis to Samuel Wesley, a period of two centuries and a half. It is true that a performance of a so-called 'Selection of Anthems' had been given in the preceding year, but the programme being injudiciously arranged—a few anthems being interspersed with songs and other pieces in no wise connected with church-music,—had produced but little effect: the distinguishing feature of it was two admirable performances upon the organ by Mendelssohn. Perry's 'Death of Abel,' was also brought forward in 1841. In 1842 Handel's 'Jubilate Deo,' and Beethoven's 'Mount of Olives' (the 'Engedi' version), were introduced. In 1843 Spohr's 'Fall of Babylon' was produced, conducted by the composer, who was then on a visit to England; Dr. Crotch's anthem, 'The Lord is king,' was performed for the first time; Mendelssohn's 'Hymn of Praise' was introduced, and also Handel's 'Deborah.' The new introductions in 1844 were a Coronation Anthem and an organ concerto by Handel, Mendelssohn's 42nd Psalm, and Haydn's Mass, No. 16; but the season was chiefly distinguished by two performances of Mendelssohn's 'St. Paul,' conducted by the composer. Handel's 'Athaliah,' Purcell's 'Jubilate in D,' and cantata 'Saul and the Witch of Endor,' Neukomm's 'David,' and a new selection of anthems, were brought forward for the first time in 1845. In 1846 the new introductions comprised Perry's 'Belshazzar's Feast,' Mendelssohn's 114th Psalm, Haydn's Mass, No. 2, and some minor pieces. 1847 was an important epoch in the Society's annals; Handel's 'Belshazzar' was revived, and a new selection of anthems given, but the greatest event was the production for the first time in its improved form of Mendelssohn's 'Elijah,' under his own personal direction. Four performances of it were given, and it at once took that firm position which it has ever since maintained. Subsequently Spohr visited this country at the invitation of the Society and conducted two performances of his 'Fall of Babylon' and one of his 'Christian's Prayer' and 'Last Judgment' (the last for the only time in England), and produced his '84th Psalm, Milton's version,' composed expressly for the occasion. An occurrence also took place during this year which eventually

led to changes which had an important influence on the fortunes of the Society. A committee, appointed to investigate the conduct of Joseph Surman, both in respect of his dealings with the Society and his execution of the office of conductor, having unanimously reported adversely to him, he was removed from his office Feb. 15, 1848. [SURMAN.] Pending a regular appointment the remaining concerts of the season were conducted by the leader of the band, George Perry. Mr. (now Sir Michael) Costa was elected conductor, Sept. 22, 1848. Very beneficial results followed this appointment: both band and chorus were strengthened and improved, and the number of performers was augmented to nearly 700. The performances of the season consisted principally of more effective renderings of the stock pieces, but Mendelssohn's music for 'Athalie' was introduced with great success. In 1850 nothing new was given but Mendelssohn's 'Lauda Sion' in an English dress. 1851 was chiefly remarkable for the number of concerts given—31; 'Messiah,' 'Elijah,' and the 'Creation' having been performed alternately, one in each week, from May to September for the gratification of visitors to the Great Exhibition in Hyde Park. Later in the year Haydn's 'Seasons' was introduced for the first time. In 1852 Spohr's 'Calvary' and the fragments of Mendelssohn's 'Christus' were introduced. In 1853 some changes took place in the officers of the Society, R. K. Bowley becoming treasurer, and W. H. Husk succeeding him as librarian: Mozart's 'Requiem' was first brought forward this year. 1854 was distintinguished by two performances of Beethoven's Mass in D. Griesbach's 'Daniel' was also brought forward, and the Society undertook the performance of the music at the opening of the Crystal Palace on May 10. In 1856 Costa's 'Eli' was performed for the first time in London with marked success. In 1857 Rossini's 'Stabat Mater' was introduced, and the Society undertook the musical arrangements for the first Handel Festival at the Crystal Palace. [See HANDEL FESTIVAL.] In 1862 Beethoven's 'Mount of Olives' was given with its proper libretto. Costa's 'Naaman' was introduced to a London audience in 1865. In 1867 Benedict's 'Legend of St. Cecilia' was given for the first time in London. In 1870 Beethoven's Mass in D was again performed. The Society sustained the loss, by death, of three of its principal officers, J. N. Harrison, president, R. K. Bowley, treasurer, and T. Brewer, secretary and, for a few weeks, president. They were replaced by D. Hill, president, W. H. Withall, treasurer, and J. F. Puttick, secretary. In 1873 the last-named died, and E. H. Mannering was appointed in his stead. Bach's St. Matthew 'Passion' was given for the first time. In 1874 Dr. Crotch's 'Palestine' was introduced, and Macfarren's 'St. John the Baptist' given for the first time in London. Mozart's Litany in B♭, in an English dress, was introduced in 1877. In 1878 Rossini's 'Moses in Egypt' was restored to its original position as an oratorio. Nothing new was brought forward in the season of 1879-80, which ended on April 30, 1880, with 'Israel in Egypt.' Owing to a change in the proprietorship of Exeter Hall the Society had to quit that building, and the concerts of the season 1880-81 were given in St. James's Hall, the number of performers being reduced, on account of the limited space of the orchestra, to about 300. The first concert was on Dec. 3. Sullivan's 'Martyr of Antioch' (first time in London) and Cherubini's Requiem in C minor were brought out during the season.

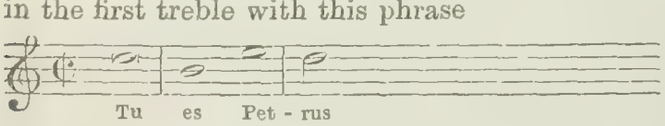
The Society's library, in the 44 years which have elapsed since its formation, has become the largest collection of music and musical literature ever gathered together by a musical body in England. Space does not allow here of even a brief list of its principal contents, and the reader is therefore referred to the last edition of its printed catalogue, issued in 1872. [See also MUSICAL LIBRARIES, vol. ii. p. 420 *a*.] The Society also possesses some interesting original portraits, statuary, and autograph letters. It is in constitution an essentially amateur body, none but amateurs being eligible for membership, and the governing committee being chosen by and from the members. Every member is required to take some part in the orchestra, and a strict examination as to his qualification for so doing is made prior to his admission. The most eminent professors are engaged as principal vocalists and instrumentalists, the rest of the band and the whole of the chorus being amateurs. The members are comparatively few in number, the majority of the amateurs being assistants, who give their gratuitous services, but pay no subscription. The subscription of members, originally £1, is now £2 2*s*. 0*d*. per annum. Subscribers to the concerts pay £3 3*s*. 0*d*., £2 12*s*. 6*d*., or £2 2*s*. 0*d*. per annum, according to the position of their seats. [W.H.H.]

SACRED HARMONIC SOCIETY, THE BENEVOLENT FUND OF THE, was instituted March 14, 1855, for the aid of necessitous persons who had at any time been connected with the Sacred Harmonic Society. It differs from a benefit society in the fact that relief is not restricted to subscribers to the Fund, and that none are entitled to the receipt of stated sums upon the happening of stated events. Each applicant's case is considered on its merits, and either a temporary grant or a small continuous pension awarded as circumstances may require. The management of the Fund is entrusted to an independent committee, chosen by the Governors of the Fund from the members of the Sacred Harmonic Society. An annual subscription of 10*s*. 6*d*. constitutes a Governor, and a donation of £5 5*s*. at one time a Life Governor. The claims upon the Fund have been so numerous and urgent that it has been impossible to increase its capital to the desired extent. [W.H.H.]

SAGGIO DI CONTRAPPUNTO (Pattern of Counterpoint). A very important work, published, at Bologna, in 1774-5, by the Padre Giambattista Martini, in two large 4to volumes, dedicated to Cardinal Vincenzo Malvezzi, and

now becoming very scarce. The full title, 'Esemplare, o sia saggio fondamentale pratico di contrappunto sopra il canto fermo,' etc., sufficiently explains the design of the work, in which the author endeavours to teach the Art of Counterpoint, rather by reference to the most perfect obtainable models, than by any code of written laws. The method adopted for this purpose is above all praise. The bulk of the volume consists of a series of examples, in the form of Motets, Madrigals, Movements from Masses, and other similar Compositions, selected from the works of the greatest Masters of the 16th and 17th centuries, beautifully printed, from moveable types, in lozenge-headed notes, resembling those found in Italian Part-Books of the best period, but, without the Ligatures which render those books so puzzling to the modern Musician. The Masters selected are, Agostini, Animuccia, Barbieri, Baroni, Benevoli, Bernabei, Caresana, Cifra, Clari, Corvo, Falconio, Foggia, Gabussi, Gesualdo, Lotti, Marcello, Marenzio, Minarti, Monteverde, Morales, Navarro di Siviglia, Nitrami, Olstani, Ortiz, Pacchioni, Palestrina, P. Pontio Parmigiano, Pasquale, Perti, Piocchi, Porta, Predieri, Riccieri, Rota, A. Scarlatti, Stradella, Turini, Vittoria, Willaert, Zarlino, and several Anonymi. The works are arranged in accordance with the characteristics of their respective Schools; and each Movement is illustrated by a copious series of annotations, explaining its general design, pointing out the various devices employed in its construction, and calling particular attention to its merits, and the lessons to be learned from it. The amount of sound scholarship, and able criticism, displayed in these annotations, renders the work extremely valuable for purposes of study; while the rarity of the original edition suggests the desirableness of a careful reprint. [W. S. R.]

SAINT ANNE'S TUNE. This well-known tune, in accordance with a practice of which there are several examples,[1] was constructed by the addition of a new continuation to a fragment of an older melody. A seven-part motet of Palestrina's, published in May 1569, leads off in the first treble with this phrase

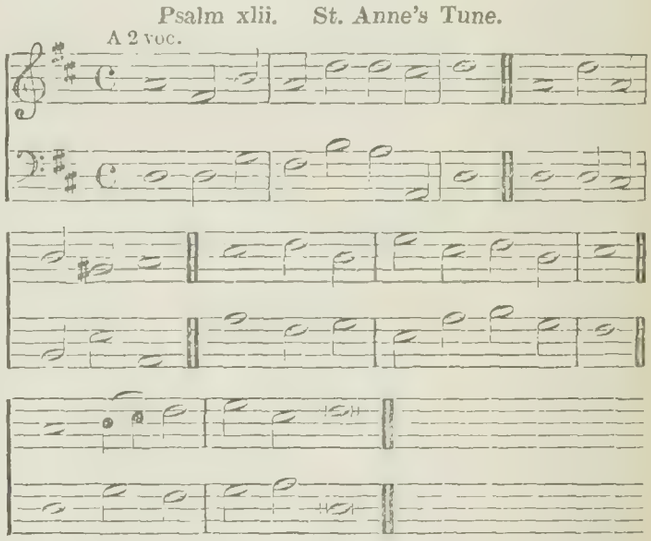


identical with the first phrase of St. Anne's; after which the resemblance ceases. The entire first strain of the tune is said to be traceable to a French chanson of the 16th century. It was adopted by J. S. Bach as the subject of an organ fugue, known in England as 'St. Anne's fugue'—a misleading title, as, except in the identity of its subject with the first strain of St. Anne's, the fugue has no connection with the hymn-tune. As early as 1638 the same strain was employed by Henry Lawes as the commencement of the tunes set by him to the 9th and 136th Psalms in Sandys's 'Paraphrase upon the Psalmes of David.'

[1] The 'Old Hundredth' psalm tune is another instance. Its first strain is the commencement of several distinct tunes.

St. Anne's tune, under that name, is first found in 'A Supplement to the New Version of the Psalms,' sixth edition, much enlarged, 1708. Dr. Croft's name is not mentioned in the work, but he is believed to have been the musical editor of this edition of the Supplement; the name of the tune is probably derived from that of the parish, St. Anne's, Westminster, of which he was then organist, and the tune itself is directly ascribed to him by his contemporaries, viz. Philip Hart in 'Melodies proper to be sung to any of ye Versions of ye Psalms of David,' cir. 1716, and John Church in his 'Introduction to Psalmody,' 1723. The tune appears in the 'Supplement' in the following form:—

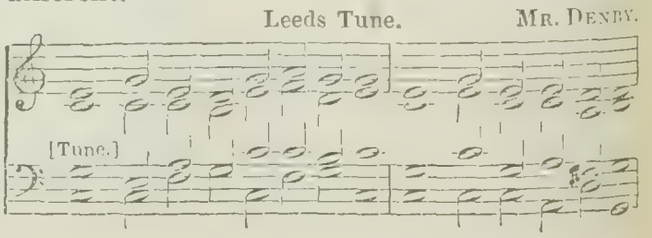
Psalm xlii. St. Anne's Tune.

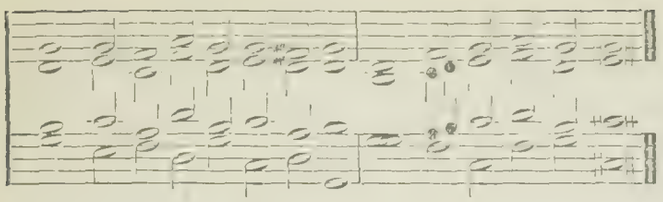


That this arrangement is by Croft cannot be doubted.

Of late years some doubt has been thrown on the authorship of the tune from its having been found in Abraham Barber's 'Book of Psalm Tunes,' a Yorkshire collection, of which the license bears date Feb. 14, 1687, when Croft was but ten years of age. Here the tune appears under the name of 'Leeds' and is ascribed to 'Mr. Denby,' whose name some editors of hymnals have too hastily substituted for that of Croft. The edition, however, of Barber's Psalms which contains the tune is the seventh, dated 1715, or seven years after the publication of the 'Supplement' already mentioned. This edition contains, besides tunes for Canticles, Psalms, etc., 28 hymn-tunes arranged in four parts, with the melody in the tenor. Of these tunes three only have a composer's name prefixed, and these three, which bear the names of northern towns ('Leverpool,' 'Hallifax,' and 'Leeds'), are all ascribed to 'Mr. Denby.' It may be observed that while the melody of 'Leeds' is identical with that of St. Anne's in the 'Supplement,' the modulation at the end of the 3rd strain is different.

Leeds Tune. Mr. Denby.





The supposition, however, that 'Leeds' was originally in Barber's Psalm-book has been disproved by the recent discovery of a copy of an early edition of the collection, which from the evidence of the preface appears to be either the third or fourth, and to have been published about 1696.[1] The title-page is unfortunately missing. This volume, a smaller book than the edition of 1715, contains but twelve hymn-tunes arranged in *two* parts, and neither the tune in question nor Denby's name occurs in it. Until therefore an edition of Barber's Psalms is found, containing 'Leeds,' and of earlier date than 1708, Denby must be regarded as merely the author of a rearrangement of Croft's tune.

That some confusion existed respecting the authorship may perhaps be inferred from the fact that Dr. Miller, a Yorkshire organist, in his 'Psalms of David,' 1790, gives 'St. Ann's, Dr. Croft' on one page, and opposite to it 'Leeds, Denby,' in triple time and as a different tune. On the other hand it may be noticed that in another Yorkshire collection, John and James Green's 'Collection of choice Psalm Tunes' (Sheffield, 3rd ed. 1715), St. Anne's tune is quoted under that name. Dr. Sullivan has employed St. Anne's with excellent effect in his Te Deum performed at St. Paul's in the Thanksgiving Service, Feb. 27, 1872, on occasion of the recovery of the Prince of Wales; and in another piece ('The Son of God') has harmonised the tune with varying effects in successive verses in an admirable manner. [G.A.C.]

SAINT-AUBIN, JEANNE CHARLOTTE SCHRŒDER, a very remarkable opera-singer, born in Paris, Dec. 9, 1764. She was daughter of a theatrical manager, began to act as a mere child, and when only 9, charmed Louis XV. by her precocious talent. In 1782 she married Saint-Aubin, an actor in Mdlle. Montansier's company, and in 1786 made her first appearance at the Académie, in 'Colinette à la Cour,' but perceiving that she was not qualified for so large a stage, had the good sense to cancel her engagement with the Opéra, and transfer herself to the Comédie Italienne. There her pleasing and expressive face, refined and graceful acting, and singing, always intelligent and in tune, could be properly appreciated, and she speedily became a favourite both with the public and the dramatists. No actress ever created a greater number of *rôles*; sentimental, pathetic, ingénues, soubrettes, grandes coquettes, or burlesque characters—all came alike to her. Her singing was not so remarkable as her acting, but she sang romances with great charm of expression, and by taste and skill supplied the lack of power in her voice, became the acknowledged star of the company and its most profitable member. She was, however, badly treated by the management, for though admitted as *sociétaire* to the fourth of a share in 1788, she was not advanced to a full share till 1798, after her success in 'Le Prisonnier.'

In 1800 she lost all her savings by the bankruptcy of the Théâtre Favart, but on the union of the two comedy-companies she retained her position as *sociétaire*, and was appointed one of the five members of the management, a post which she resigned on Mme. Dugazon's retirement, not wishing to be the only woman on the board. At her farewell benefit (April 2, 1808) she took the part of Mme. Belmont in 'Le Prisonnier,' leaving Rosine, her own creation, to her second daughter, Alexandrine. Her elder daughter also appeared in the 'Concert interrompu.' Her modest pension of 1900 francs was increased by Louis XVIII. to 3000. She took her final farewell, assisted by her eldest daughter, Mme. Duret, on Nov. 7, 1818, in 'Une heure de mariage,' and was as much applauded as ever. Mme. Saint-Aubin lived to a great age, and died in Paris, Sept. 11, 1850. Three of her children distinguished themselves; the son, JEAN DENIS, born at Lyons in 1783, a violinist and composer of great promise, died at Paris in 1810.

The elder daughter, CÉCILE, born at Lyons in 1785, a pupil of Garat, made her début in 1805 at the Opéra Comique in 'Le Concert interrompu,' but went back to the Conservatoire to study, and did not reappear till 1808. In the interval she gained both style and taste in singing, but remained an indifferent actress. Under the name of Mme. Duret she rose for a short time to distinction as the favourite singer of Nicolo Isouard, who composed several important and difficult parts for her. Her best creations were in 'Le Billet de Loterie,' and 'Jeannot et Colin.' Her voice was of considerable compass, even and sonorous, though rather heavy; she vocalized with skill, and articulated distinctly, but her breath was short and drawn with effort. She retired in 1820. Her sister ALEXANDRINE, born at Paris 1793, made a brilliant début at the Théâtre Feydeau in 1809, and in the following year excited great enthusiasm in Isouard's 'Cendrillon.' This was however the only original part in which she distinguished herself, and on her marriage with an actor at the Vaudeville in 1812, she retired from the stage. [G.C.]

SAINT-GEORGES, JULES HENRI VERNOY, MARQUIS DE,—not to be confounded with the notorious Chevalier de Saint-Georges (1745–1799 or 1801)—born in Paris 1801, died there 1875, writer of novels, and author of numerous librettos for operas and operas-comiques, was the favourite collaborateur of Halévy. Among his 120 librettos we need only specify those for Donizetti's 'Fille du Régiment'; Adolphe Adam's 'La Marquise,' 'Cagliostro,' 'Le Bijou perdu,' operas; and 'Giselle,' 'La jolie Fille de Gand,' and 'Le Corsaire,' ballets; Auber's 'L'Ambassadrice,'

[1] The preface speaks of 'former editions,' and adds—'since the Psalmes in metre are this last year much refin'd as to the English by some good grave Divine Persons who hath only left out all the old words and made the meter good English.' The preface to the seventh edition is a different one.

'Zanetta,' and 'Les Diamants de la Couronne,' with Scribe; Grisar's 'Lady Melvil,' 'Le Carillonneur de Bruges,' and 'Les Amours du Diable'; Clapisson's 'La Fanchonnette'; and Halévy's 'L'Eclair,' 'Les Mousquetaires de la Reine,' 'Le Val d'Andorre,' 'La Fée aux Roses,' 'Le Juif errant,' 'Le Nabab,' and 'Jaguarita l'Indienne.'

From this list it will appear that Saint-Georges was the most prolific, as he was the ablest, of all French contemporary librettists after Scribe. No one has yet appeared competent to supply the place of either of these clever writers. [G.C.]

SAINT [1]HUBERTY, ANTOINETTE CÉCILE, an eminent French operatic actress, whose real surname was Clavel, was born at Toul, about 1756. Her father, who had previously served in the army, became stage manager to a French opera company at Mannheim, and afterwards at Warsaw, where she studied for four years with Lemoyne, conductor of the orchestra. Her first public appearance was in an opera of his 'Le Bouquet de Colette.' She then went to Berlin, and is said to have been married there to a certain Chevalier de Croisy, of whom, however, nothing is heard in her subsequent history. For three years she sang at Strassburg, as Mlle. Clavel, and thence went to Paris, and made her *début* at the Académie as 'un démon, un plaisir' in the first performance of Gluck's 'Armide' (Sept. 23, 1777). For a considerable time she only played in subordinate parts. Her appearance was not striking; she was fair, thin, and below middle height, with a face expressive, but not beautiful. Her voice was produced badly and with effort, her stage action was spasmodic and exaggerated, and she had a strong German accent. But Gluck found in this ill-trained actress some qualities he may have vainly sought for in more finished singers. She appeared one morning at rehearsal in an old black gown in the last stage of patched decrepitude. 'Here comes Madame la Ressource,' remarked some gay rival (alluding to the character of that name in 'Le Joueur'). 'Well said,' answered Gluck; 'that woman will some day be the *resource* of the opera.' Perhaps she heard the words—we may be sure she heard of them. She laboured to improve herself, and on the retirement of two leading singers succeeded to their parts. Her first great success was as Angélique in Piccinni's 'Roland,' and was followed by others in Floquet's 'Le Seigneur Bienfaisant,' Gossec's 'Thésée' (March 1, 1782), and Edelmann's 'Ariane' (Sept. 24, 1782), all tragic *rôles*; while as Rosette in Grétry's 'L'Embarras des Richesses' (Nov. 26, 1782), she showed all the versatility and vivacity necessary for comedy. As Armide (in Sacchini's 'Renaud'), in 'Didon,' 'Chimène,' 'Les Danaïdes,' 'Alceste,' and 'Phèdre,' she had a succession of triumphs. 'Didon,' Piccinni's masterpiece, made no impression till she undertook the title *rôle*, and the composer declared that, without her, his opera was 'without Dido.' On her first appearance in that part (Jan. 16, 1784) she was crowned upon the stage. She was never a perfect vocalist; 'less violent and extravagant in her singing than the generality of French singers, but still with too much of the national style,' says Lord Mount-Edgecumbe, who admits however that she was an excellent musician. But her power lay in her extreme sensibility. In truth and force of expression she was unequalled; her declamation was impassioned, her by-play 'terrible,' her silence 'eloquent.'

In 1785 she made a journey to Marseilles, which resembled a royal progress. The excitement she created amounted to frenzy, and when she left Provence she carried away more than a hundred crowns, many of them of great value.

But on her return to Paris she found new rivals to dispute her sway. She failed, too, as Clytemnestra, a part altogether unsuited to her. It ended four years later by her marrying the Comte d'Entraigues, of strong royalist sympathies, in which she participated warmly. In 1790 he had emigrated to Lausanne, and there their marriage took place, at the end of that year. It was only acknowledged, however, in 1797, after the Count, imprisoned at Milan by Bonaparte, had been released by his wife, who found means of enabling him to escape, and of preserving his portfolio, full of political papers. For this service she was rewarded by Louis XVIII. with the Order of St. Michel and, it seems, by her husband with the recognition of their marriage.

The Count afterwards entered the Russian diplomatic service, and was employed on secret missions. The peace of Tilsit changed his tactics. He possessed himself in some manner of a copy of the secret articles of the Treaty, and hastened with them to England to communicate them to the government. For this he is said to have received a pension. He established himself, with his wife, at Barnes, near Richmond, where, July 22, 1812, they were assassinated by their servant, who stabbed them as they were getting into their carriage, and blew out his own brains afterwards. This man had been bribed by emissaries of Fouché's, sent to watch the proceedings of the Count d'Entraigues, and had allowed them to take copies of correspondence with the Foreign Office, entrusted to his care by his master. He had reason to think that his treachery was being discovered, and fear of the consequences probably prompted him to the dreadful deed. [F.A.M.]

SAINT JAMES'S HALL CONCERT ROOMS were erected, at the cost of a company with limited liability, from designs by Owen Jones. Messrs. Lucas were the builders.

The project was taken up by two of the music-publishing firms, Messrs. Beale & Chappell of Regent Street, and Chappell & Co. of New Bond Street; and the company was formed mainly by them, and among their friends. Messrs. T. F. Beale and W. Chappell became the tenants of the Crown for the land, holding it in trust for the Company. The capital was fixed at £40,000, because the original estimate for the new building was £23,000, and the remainder was supposed to be an ample sum for

[1] How she obtained this name is not known.

compensations, working expenses, etc. It was then unknown that between Regent Street and Piccadilly was the ancient boundary of Thorney Island with its quicksand, but this was encountered in the course of the building, and had to be saturated with concrete at great cost, in order to make a sure foundation. Other demands raised the cost of the building to beyond £70,000. The Great Hall was opened to the public on March 25, 1858, with a concert for the benefit of Middlesex Hospital, given in presence of the Prince Consort.

The principal entrance to the Great Hall is from Regent Street, and that to the Minor Hall from Piccadilly—the former street being higher than the latter. The dimensions of the Great Hall are 139 feet in length, 60 in height, and 60 in breadth. It will seat on the Ground Floor 1100; in the Balcony 517; in the Gallery 210; in the Orchestra 300; total 2127. The above is as the numbered benches and seats are usually arranged, but, by placing the seats closer together, many more persons can be seated. Under the further part of the Great Hall is the Minor Hall, 60 feet by 57, having also a Gallery, an Orchestra, and a small room. Under the Regent Street end of the Great Hall is one of the dining rooms, 60 feet by 60, and on the Regent Street level is another dining room 40 feet by 40, with a large banquetting-room on the floor above, etc.

In 1860 alterations and additions were made to the Restaurant attached to the Concert Rooms, at a further outlay of £5000. The Company was eventually enabled to pay these charges, through the uncovenanted liberality of some of the directors, in accepting personal responsibility to mortgagees and bankers, while they diminished the debt annually through the receipts of the Hall. Many concerts were given for the express purpose of engaging the Hall on off-nights, especially the Monday Popular Concerts, which have now become an institution, but were originally started by Chappell & Co. to bring together a new public to fill the Hall on Monday nights. In 1874 three more houses in Piccadilly were purchased to add to the Restaurant. The rebuilding of these entailed a further expenditure of £45,000, so that the total cost has exceeded £120,000. Mr. George Leslie has been Secretary to the Company from its first institution, and so continues. [W.C.]

SAINT-SAËNS, Charles Camille, born Oct. 9, 1835, in the Rue du Jardinet (now No. 3) Paris. Having lost his father, he was brought up by his mother and a great-aunt, whom he called 'bonne maman.' She taught him the elements of music, and to this day the composer keeps the little old-fashioned instrument on which this dearly-loved relative gave him his first lessons. At seven he began to study the piano with Stamaty, and afterwards had lessons in harmony from Maleden. Gifted with an excellent ear and a prodigious memory, he showed from childhood a marvellous aptitude for music, and an unusual thirst for knowledge. In 1847 he entered Benoist's class at the Conservatoire (the only one he attended) and obtained the second organ-prize in 1849, and the first in 1851. He left in the following year, but competed for the Prix de Rome, which was however won by Léonce Cohen, his senior by six years. He was not more fortunate at a second trial in 1864, although by that time he had made a name in more than one branch of composition. These academic failures are therefore of no real importance, and we merely mention them because it is remarkable that the most learned of French contemporary musicians should have gained every possible distinction except the Grand Prix de Rome.

Saint-Saëns was only sixteen when he composed his first symphony, which was performed with success by the Société de Sainte Cécile. In 1853 he became organist of the church of St. Merri, and shortly after accepted the post of pianoforte professor at Niedermeyer's Ecole religieuse. Though overwhelmed with work he found time for composing symphonies, chamber-music, and vocal and instrumental pieces—and for playing at concerts, where he became known as an interpreter of classical music. In 1858 he became organist of the Madeleine, and distinguished himself as much by his talent for improvisation as by his execution. He only resigned this coveted post in 1877, when he was much gratified by the appointment of Theodore Dubois, a solid musician, worthy in every respect to be his successor.

The stage in Paris being the sole road to fame and fortune, all French musicians naturally aim at dramatic composition. Saint-Saëns was no exception to this rule. He was in the first rank of pianists and organists, and his cantata 'Les Noces de Prométhée' had been awarded the prize by the International Exhibition of 1867, and performed with great éclat, but these successes could not content him, and he produced 'La Princesse jaune,' 1 act, at the Opéra Comique, June 12, 1872, and 'Le Timbre d'argent,' a fantastic opera in 4 acts, at the Théâtre Lyrique Feb. 23, 1877. Both operas were comparative failures; and, doubtless discouraged by so harsh a judgment from the Parisian public, he produced his next work, 'Samson et Dalila,' a sacred drama (Dec. 1877), at Weimar, and 'Etienne Marcel,' opera in 4 acts (Feb. 8, 1879), at Lyons.

Whether as a performer or a conductor, M. Saint-Saëns likes a large audience, and this desire has led him to become an extensive traveller. He has been in Russia, Spain, and Portugal, besides paying repeated visits to Germany, Austria, and England, so that he may be truly said to have acquired a European reputation. His fame mainly rests on his instrumental music, and on his masterly and effective manner of dealing with the orchestra. He is an excellent contrapuntist, shines in the construction of his orchestral pieces, has a quick ear for picturesqueness of detail, and has written enough fine music to procure him an honourable position among French composers. He has very great power of combination, and of seizing instanta-

neously all the latent capacities of a given theme, both in the way of melody and harmony.[1]

In addition to his other claims to distinction, Saint-Saëns is a first-rate musical critic, and has contributed articles to 'La Renaissance,' 'L'Estafette,' and 'Le Voltaire,' the best of which he intends to publish separately. He was elected member of the Institute, *vice* Henri Reber, Feb. 19, 1881.

The printed catalogue of his works includes 64 opus numbers, besides many unnumbered pieces. From it the following list has been compiled and classified.

Dramatic and lyric:—The 4 operas already mentioned, and 'Les Noces de Prométhée' (Cirque des Champs Élysées, Sept. 1, 1867); 'Le Déluge' (1876); 'La Lyre et la Harpe,' cantata composed for the Birmingham Festival (Aug. 28, 1879). Another, written for the Centenary of General Hoche (Versailles, June 24, 1868), has not been published.

Orchestral:—2 Symphonies, in Eb and A minor; 'Occident et Orient,' march for military band and orchestra (performed at the giving away of the prizes at the Paris Exhibition of 1878); 'Marche héroïque'; 'Suite pour orchestre' (Prelude, Sarabande, Gavotte, Romance, and Finale); 4 poèmes symphoniques, 'Le Rouet d'Omphale,' 'Phaéton,' 'Danse Macabre,' and 'La Jeunesse d'Hercule'; a very important 'Suite Algérienne' (Prélude, Rhapsodie Mauresque, Réverie du Soir, and Marche militaire française); 'Une Nuit à Lisbonne,' barcarolle; 'La Jota Aragonesa,' transcription. Also a prize symphony in F (1856) for the Société Sainte Cécile at Bordeaux, a MS. overture 'Spartacus,' awarded the prize by the same society, and several minor pieces.

Sacred music:—'Messe à 4 voix' for solos, chorus, orchestra, full organ, and 'orgue d'accompagnement'; 'Messe de Requiem,' for solos, chorus, and orchestra; 'Oratorio de Noël' for ditto; 'Tantum ergo' in Bb, for chorus and organ; Psalm xix, 'Cœli enarrant,' for solos, chorus, and orchestra. Also 13 motets, and several pieces for full organ, including 'Bénédiction nuptiale' (op. 9) and 'Elévation' (op. 13).

Concerted music with orchestra:—4 PF. concertos (in D, G minor, Eb, and C minor); 3 violin concertos (in A, C, and B minor); 'Introduction et Rondo' (op. 28), 'Morceau de concert' (op. 62), and 'Romance' (op. 48), all for violin; Cello-Concerto (A minor); 'Romance' for horn or cello (op. 36, in F); 'Romance' for flute or violin (op. 37 in Db); and 'Tarentelle' for flute and clarinette (op. 6).

Chamber music:—Quintet for PF., 2 violins, viola, and cello (op. 14); Serenade for PF., organ, violin, and viola, or cello (op. 15); Trio in F for PF. and strings; Quartet in Bb for PF. and ditto (op. 41); Suite for PF. and cello (op. 16); Romance for PF., organ, and violin (op. 27); Sonata in C minor for PF. and cello (op. 32); Berceuse in Bb for PF. and violin (op. 38); 'Allegro appassionato' for PF. and cello (op. 43); Romance in D for ditto (op. 51); Septet for PF., 5 strings, and trumpet obligato (the minuet very original).

Pianoforte:—Op. 3; 11 (Duettino in G, 4 hands); 21 (1st Mazurka); 23 (Gavotte); 24 (2nd Mazurka); 35 (Variations sur un thème de Beethoven for 2 PFs—a Scherzo); 52 (Études); 56 (Menuet et Valse); and 59 (Ballade, 4 hands); besides several transcriptions of classical or popular airs, and 12 transcriptions from Bach's cantatas and sonatas.

Vocal:—Scena from 'Horace' (op. 10); 'Mélodies Persanes' (op. 26); 'Les Soldats de Gédéon' (op. 46, double chorus for men's voices, without acct.); 'Chanson de Grand Père,' chorus for women's voices; 'Chanson d'Ancêtre,' chorus for men's voices, and baritone solo (op. 53, with acct. for orchestra or PF.); more than 40 songs to French, Italian, and English words, and several duettinos and trios.

M. Saint-Saëns is a dark, nervous-looking man, with delicate, almost sharp features, and bright intelligent eyes. In England he is no stranger. He first appeared here at the Musical Union, in 1871. In 1874 he played Beethoven's Concerto in G at the Philharmonic, and again, on July 2, 1879, his own PF. Concerto in G minor, and Bach's Prelude and Fugue in A minor on the organ. Later in the same year, Dec. 6, he played the same work, and conducted his 'Rouet d'Omphale' at the Crystal Palace. The Concerto was first introduced there by Miss Helen Hopekirk, a very rising pianist, Mar. 15, 1879; the Cello Concerto in A was played by Herr Hollman, Nov. 27, 1880, and the Overture to the 'Princesse jaune' on the 6th of the same month. At the Popular Concerts three of his works are known, the Cello Sonata (op. 32); a trio for PF. and strings in F (op. 18), and a string quartet in Bb (op. 41). [G.C.]

SAINTON, Prosper Philippe Catherine, an eminent violin-player, born June 5, 1813, at Toulouse, where his father was a merchant. He received his education at the College of Toulouse, and was destined to the law, but his great talent for music, combined with other reasons, fortunately altered this, and in 1832 he entered the Conservatoire at Paris, and studied the violin under Habeneck, taking the first prize in 1834. For two years after this he was a member of the orchestra of the Société des Concerts, and the Grand Opéra; and then made an extended tour through Italy, Germany, Russia, Finland, Sweden, Denmark, and Spain, with great success. In 1840 he was appointed Professor of the violin in the Conservatoire of his native city. In 1844 he made his first visit to England and played at the Philharmonic on June 10 and July 8 of that memorable season, under the bâton of Mendelssohn. The following year he returned, was appointed Professor at the Royal Academy of Music, and séttled in London, where, with occasional visits to the continent, he has resided ever since. He took the 1st and 2nd violin alternately with Sivori, Ernst, Molique, and Vieuxtemps, at the performances of Beethoven's quartets, at the house of Mr. Alsager in 1845 and 46, which resulted in the 'Beethoven Quartet Society.' He was also a constant leader at the performances of the Musical Union, the Quartet Association, the Monday Popular Concerts, etc., etc. On the establishment of the Royal Italian Opera at Covent Garden, April 6, 1847, Mr. Sainton became leader of the orchestra, a post which he held until 1871, when he accompanied Sir Michael Costa to the rival house, and remained there till 1880. He was leader of the Philharmonic band from 1846 to 1854 inclusive, and of the Sacred Harmonic Society since 1848, conducting the performances of the latter Society in the absence of his chief, as he did those of the Opera. He has been also for many years leader of the Birmingham Festivals, and other provincial musical performances. From 1848 to 55 he was conductor of the State Band and Violin Solo to the Queen, resigning the post of his own accord. At the opening of the International Exhibition of 1862 Mr. Sainton conducted the performance of Sterndale Bennett's Ode (to Tennyson's words) and was presented by the composer with the autograph of the work as a token of his gratitude and consideration. Among the many pupils whom he has formed

[1] The writer retains a delightful recollection of his improvisations at the Madeleine, and will never forget a *tour de force* he himself witnessed in 1867. At a party where several eminent musicians were assembled, some one begged Schulhoff to play anything that came into his head. After a little pressing the fascinating pianist sat down to the instrument, and began to prelude in the bass, when Saint-Saëns drew near, and still standing, accompanied in the treble the melodies which Schulhoff was playing; then sitting down in his turn he improvised on the improvisation of his partner in a manner to captivate the most hypercritical ear. There was indeed occasionally a slight clashing of keys, but even these double modulations with contrary resolutions added to the interest, with an audience composed entirely of practised musicians. It was the most extraordinary exhibition of this kind of power which ever came within the writer's observation.

during his long career as Professor of the Violin at the Royal Academy may be mentioned H. Weist Hill [see WEIST HILL], F. Amor, A. C. Mackenzie, A. Burnett, Miss Gabrielle Vaillant, W. Sutton, and many more good players. His works comprise 2 Concertos for the violin with orchestra; a Solo de Concert; a Rondo mazurka; 3 Romances; several airs with variations; and numerous Fantasias on operas. In 1860 Mr. Sainton married Miss Dolby the well-known English contralto singer. [G.]

SAINTON-DOLBY, CHARLOTTE HELEN, was born in London in 1821, and gave signs of possessing decided musical talent when still young. Her earliest instructress was a Mrs. Montague, from whom she received pianoforte lessons. On the death of her father Miss Dolby determined to adopt the musical profession, and in 1832 entered the Royal Academy of Music, where she first studied under Mr. J. Bennett and Mr. Elliott, and then under Signor Crivelli. In 1837 so great was her promise that she was elected a King's Scholar, although her voice was still weak and not fully developed. She remained at the Academy for five years, and after leaving was elected an honorary member of the institution. Almost from the date of her first appearance in public, until her retirement in 1870, Miss Dolby remained unrivalled as a singer of oratorio and English ballads. The admirable skill with which she controlled a powerful contralto voice, the exquisite intonation, perfect enunciation, and noble declamation which distinguished her singing, caused her to take a very high place, not only among English, but among European artists of the present century. She made her first appearance at the Philharmonic in a quartet, June 14, 1841, and in a solo, April 14, 1842. In the winter of 1846–7, Mendelssohn, who had been delighted by her singing in 'St. Paul,' obtained for her an engagement at the Gewandhaus Concerts at Leipzig, where she appeared with as great success as she had done in England. About this time Mendelssohn dedicated to her his Six[1] Songs (op. 57), besides writing the contralto music in 'Elijah' with the special view to her singing it. Her success in Leipzig was followed by several concert tours in France and Holland, in both of which countries Miss Dolby established her reputation as a singer of the first rank. In 1860 she married M. Prosper Sainton, the eminent violinist, and ten years later she retired from public life. In 1872 Mme. Sainton opened her Vocal Academy, at which she has successfully trained many excellent artists in the admirable school of pure vocalisation, of which she is herself so distinguished an example. Besides her labours in connection with this Academy, Mme. Sainton has of late years appeared before the world as a composer. Her cantatas 'The Legend of St. Dorothea,' and 'The Story of the Faithful Soul,' produced respectively at St. James's Hall on June 14, 1876, and Steinway Hall on June 19, 1879, have been performed in the provinces and the colonies with unvaried success. Mme. Sainton has also written many ballads and songs, and is (1881) engaged upon a work of more importance than she has yet attempted. [W.B.S.]

[1] Also dedicated to Mme. Livia Frege.

SALA, NICOLA, born at a little village near Benevento, Naples, in 1701, and brought up in the Conservatorio della Pietà de' Turchini under Fago, Abos, and Leo. He died in 1800, and devoted the whole of a long life to his Conservatorio, in which he succeeded Fago as second master, and Cafaro, in 1787, as first master. The great work to which all his energies were devoted was his 'Regole del contrappunto prattico,' in 3 large volumes, containing methodical instruction in the composition of fugues, canons, etc., which was published in 1794. During the disturbances in Italy the engraved plates vanished for a time and were supposed to be lost. Choron then reprinted the work (Paris 1808), but the plates were afterwards discovered. Both editions are in the Library of the Sacred Harmonic Society. Sala wrote little besides this work. Three operas, 'Vologero,' 1737; 'Zenobia,' 1761; and 'Merope,' 1769; an oratorio, 'Giuditta,' 1780; 3 'Prologues' on the births of kings of Naples; a Mass, a Litany, and a few smaller pieces, are mentioned by Florimo (Cenno storico, 562). [G.]

SALAMAN, CHARLES KENSINGTON, born in London, March 3, 1814; began music early—violin, PF., and composition. In 1824 was elected student of the Royal Academy of Music, but soon left it and became pupil of Mr. Neate, the friend of Beethoven. He made his first public appearance at Blackheath, in 1828, as a PF. player; then went to Paris and took lessons of Herz, and in the following summer returned to London and began teaching, playing, and writing.

In 1830 he composed an ode for the Shakespeare commemoration, which was performed at Stratford-on-Avon April 23, and was repeated in London. From 1833 to 1837 he gave annual orchestral concerts in London, at one of which he played Mendelssohn's G minor Concerto for the third time in England—the former two performances having been by the composer himself. In 1846, 7, and 8 he resided at Rome, and while conducting Beethoven's Symphony No. 2 (for the first time in Rome), the concert was interrupted by the news of Louis Philippe's flight from Paris. On March 18, 1850, he played at the Philharmonic. In 1855 he began a series of lectures on the History of the Pianoforte, and other musical subjects, which he continued both in London and the country for several years. In 1858 he was one of the founders of the MUSICAL SOCIETY OF LONDON, and acted as secretary to it until the year 1865. He is now one of the Committee of the MUSICAL ASSOCIATION. Mr. Salaman has been for many years a well-known professor and teacher of music in London. He has composed many songs, some to words by Horace, Catullus, and Anacreon; Psalms (the 84th, 29th); and

various PF. pieces. He contributed to 'Concordia,' during its existence, and still occasionally writes in the 'Musical Times.' [G.]

SALCIONAL or SALICET, a soft-toned organ-stop of a reedy quality. The pipes are of a very small scale, the tenor C being of about the same diameter as the middle C of an ordinary open diapason. The mouth is also much more 'cut up' than that of a diapason pipe. The origin of the word Salicet is plain; to this day country boys make toy wind-instruments out of 'withy'; but withy is also called 'sally,' and 'sally' is *salix* a willow. In some counties a willow is called (by combining both names) a 'sally-withy.' A Salicet is therefore a stop made to imitate a rustic 'willow-pipe.' The introduction of the Salcional or Salicet was later than that of the Dulciana (said to have been invented by Snetzler), and it must be considered merely as a variety of that stop. It is of 8 ft. or unison pitch. [J.S.]

SALE, JOHN, born at Gainsborough, March 19, 1734, was admitted in 1766 a lay clerk of St. George's Chapel, Windsor, and held that post until his death, Oct. 2, 1802.

His son, JOHN, born in London in 1758, was in 1767 admitted a chorister of St. George's Chapel, Windsor, and Eton College under William Webb, and so continued until 1775. In 1777 he obtained a lay clerk's place in both choirs. On July 12, 1783, he was admitted a gentleman of the Chapel Royal in the room of Nicholas Lade or Ladd; in 1794 he succeeded John Soaper as vicar choral of St. Paul's; and in 1796 John Hindle as lay vicar of Westminster Abbey. At Christmas 1796 he resigned his appointments at Windsor and Eton. In 1800 he succeeded Richard Bellamy as almoner and master of the choristers of St. Paul's. On Jan. 14, 1812, he was appointed successor to Samuel Webbe as secretary to the Catch Club, and soon afterwards resigned his places of almoner and master of the choristers of St. Paul's. He was also conductor of the Glee Club. He possessed a rich, full, and mellow-toned bass voice, and sang with distinct articulation and energetic expression. He was for thirty years a principal singer at the Concert of Ancient Music and other leading concerts in London, and at various provincial festivals. He composed several glees, which were included, with glees by Lord Mornington and other composers, in collections published by him. He died Nov. 11, 1827. He left two sons, viz.—

JOHN BERNARD, born at Windsor, 1779, and admitted a chorister of St. George's Chapel, Windsor, and Eton College in 1785. In 1800 he succeeded Richard Bellamy as lay vicar of Westminster Abbey; on Jan. 19, 1803 was admitted a gentleman of the Chapel Royal, in the place of Samuel Champness, and in 1806, on the death of Richard Guise, obtained a second lay vicar's place at Westminster Abbey.[1] On March 30, 1809, he succeeded Michael Rock as organist of St Margaret's, Westminster. About 1826 he was appointed musical instructor to the Princess (now Queen) Victoria. In 1838 he was admitted organist of the Chapel Royal on the death of Attwood. His voice was a powerful bass, and his style of singing chaste and refined; he excelled in anthems, glees and other part singing. He was for many years principal second bass at the Concert of Ancient Music. He long enjoyed a high reputation as a teacher of singing and the pianoforte. His compositions were few, consisting only of some chants, psalm-tunes, Kyries, glees songs and duets. One of his duets, 'The Butterfly,' was long in favour. In 1837 he published a collection of psalm and hymn tunes, chants, etc. with a concise system of chanting. He died Sept. 16, 1856. Of his three daughters, two, MARY ANNE and SOPHIA, were organists and teachers of music; Sophia died May 3, 1869. The youngest, LAURA, was the wife of William John Thoms, the antiquary, and originator of 'Notes and Queries.'

The other son, GEORGE CHARLES, born at Windsor in 1796, was admitted a chorister of St. Paul's under his father in 1803. He afterwards became a skilful organist, in 1817 succeeded Dr. Busby as organist of St. Mary, Newington, and in 1826 was appointed organist of St. George's, Hanover Square. He died Jan. 23, 1869. [W.H.H.]

SALIERI, ANTONIO, Court-capellmeister at Vienna, son of a wealthy merchant, born Aug. 19, 1750, at Legnano in the Venetian territory, learnt music early from his brother Franz, a pupil of Tartini. After the death of his parents a friend of the family named Mocenigo took him to Venice, where he continued his studies, and made the acquaintance of Gassmann, composer and late Capellmeister to the Emperor, who became much interested in him, and took him to Vienna in June 1766. Here Gassmann continued his fatherly care, provided his protégé with teachers and himself instructed him in composition, made him acquainted with Metastasio, and introduced him to the Emperor Joseph, whose chamber-concerts he henceforth attended, and often took an active part in. While Gassmann was in Rome, composing an opera for the Carnival of 1770, Salieri conducted the rehearsals for him, and composed his own first comic opera, 'Le Donne letterate,' which received the approval of Gluck and Calsabigi, and was performed with success at the Burg-theater. On Gassmann's death in 1774 Salieri returned his paternal kindness by doing all in his power for the family, and educating the two daughters as opera singers. In the same year the Emperor appointed him court composer, and on Bonno's death in 1788 he became Court-capellmeister. He was also a director of the Opera for 24 years, till 1790, when he resigned, and out of compliment to him the post was given to his pupil Weigl. In 1778 Salieri was in Italy, and composed five operas for Venice, Milan, and Rome. For the Emperor's newly-founded National-Singspiel he wrote 'Der Rauch-

[1] In order to understand how one person could perform the duties of two in the same choir it is necessary to explain that by long-standing custom each lay vicar attends during six months of the year only, i. e. in each alternate month.

fangkehrer' (1781), and for a fête at Schönbrunn 'Prima la musica, poi le parole' (1786).[1] When the Académie de Musique in Paris requested Gluck to suggest a composer who could supply them with a French opera in which his own principles should be carried out, he proposed Salieri, who accordingly received the libretto of 'Les Danaïdes' from Moline, worked at it under Gluck's supervision, and personally superintended its production in Paris (April 26, 1784).[2] He was entrusted with librettos for two more operas, and returned with a great increase of fame to Vienna, where he composed an opera buffa, 'La Grotto di Trofonio' (Oct. 12, 1785), the best of its kind and one of his finest works, which had an extraordinary success, and was engraved by Artaria. In 1787 he again visited Paris, where the first of his operas, 'Les Horaces,' had failed (Dec. 7, 1786), owing to a variety of untoward circumstances, a failure amply retrieved however by the brilliant success of 'Axur, Re d'Ormus' (June 8, 1787) or 'Tarare,' as it was first called. This, which has remained his most important work, was first performed in Vienna, Jan. 8, 1788. Another work composed in Vienna for Paris was a cantata, 'Le Dernier Jugement'[3] (libretto by Chevalier Roger), ordered by the Société d'Apollon, and performed there and at the Concerts Spirituels with great applause from the connoisseurs. In 1801 Salieri went to Trieste to conduct an opera composed for the opening of a new opera-house. This was his last Italian opera, and 'Die Neger' (Vienna, 1804) his last German one, for owing to his dislike to the change of taste in dramatic music, he devoted himself chiefly to church music, composing also a few instrumental pieces, choruses, and canons in various parts, published as 'Scherzi armonici.' On June 16, 1816, he celebrated the fiftieth anniversary of the commencement of his career in Vienna, when he was decorated with the gold 'Civil-Ehrenmedaille' and chain, and honoured by a fête, at which were performed special compositions by each of his pupils, including Schubert.[4] Salieri was also vice-president of the Tonkünstler Societät, and till 1818 conducted nearly all the concerts. For the twenty-fifth anniversary of its foundation (1796) he composed a cantata 'La Riconoscenza,' and for the fiftieth (1821) a part-song, 'Zu Ehren Joseph Haydn,' to whom the society was largely indebted. Salieri was also a generous contributor to the funds. He took great interest in the foundation of the Conservatorium (1817) and wrote a singing-method for the pupils. He lost his only son in 1805, and his wife in 1807, and never recovered his spirits after it. During his latter years he suffered much, but never failed to derive comfort from the beauties of nature, for which he had always a great taste. On June 14, 1824, after fifty years of service at court, he was allowed to retire on his full salary, and not long afterwards died, May 7, 1825.

His biographer, Edler von Mosel ('Ueber das Leben und die Werke des Anton Salieri,' Vienna, 1827), describes him as a methodical, active, religious-minded, benevolent, and peculiarly grateful man, easily irritated, but as quickly pacified. He was very fond of sweets, especially pastry and sugar-plums, and drank nothing but water. We have seen how he discharged his obligations to Gassmann. He gave gratuitous instruction and substantial aid of various kinds to many poor musicians, and to the library of the Tonkünstler Societät he bequeathed 41 scores in his own handwriting (34 operas, and 7 cantatas) now in the Hofbibliothek. In accordance with his own wish his Requiem was performed after his death at the Italian church. He remained throughout on cordial terms with Haydn, whose two great oratorios he often conducted, and Beethoven dedicated to him in 1799 three sonatas for PF. and violin, op. 12 (Artaria). In the first vol. of his 'Beethoven's Studien' (Rieter-Biedermann, 1873), Mr. Nottebohm has printed ten Italian vocal pieces, submitted by Beethoven to Salieri, with the corrections of the latter. These chiefly concern the arrangement of the notes to the words, so as to conform to the rules of Italian prosody, and produce the best effect. The pieces are undated, but internal evidence fixes them to the period between 1793 and 1802. It appears that as late as 1809 the great composer consulted his old adviser as to the arrangement of his Italian, probably in the 'Four Ariettas and Duet' of op. 82; and that even then, when Beethoven was so fiercely independent of all other musicians, their relations were such that he voluntarily styled himself 'Salieri's pupil.'[5] As regards Mozart, Salieri cannot escape censure, for though the accusation of having been the cause of his death has been long ago disproved, it is more than possible that he was not displeased at the removal of so formidable a rival. At any rate though he had it in his power to influence the Emperor in Mozart's favour, he not only neglected to do so, but even intrigued against him, as Mozart himself relates in a letter to his friend Puchberg.[6] After his death however, Salieri befriended his son, and gave him a testimonial, which secured him his first appointment.[7]

[1] Mozart's 'Schauspieldirector' was given the same evening.

[2] The play-bill of the first 12 performances described it as an opera by Gluck and Salieri, in accordance with a stipulation of the publisher Deslauriers, but before the 13th representation Gluck publicly stated in the 'Journal de Paris' that Salieri was the sole author.

[3] The following anecdote is connected with this cantata. Salieri was talking over the difficulties of the work with Gluck, especially as to the voice to be assigned to the part of Christ, for which he finally proposed a high tenor. Gluck assented, adding, half in joke, half in earnest, 'Before long I will send you word from the other world in what key our Saviour speaks.' Four days later, Nov. 15, 1787, he was dead.

[4] The autograph of Schubert's Cantata—both words and music by him—was sold by auction in Paris, May 14, 1881.

[7] 'Io qui sottoscritto faccio fede che il giovine Signor Wolfgango Amadeo Mozart, già bravo suonator di Pianoforte, ha un talento raro per la musica; che perfezionarsi in quest' arte, di çui egli fa professione, dopo aver studiato le regole del contrappunto sotto la scuola del Signor Albrechtsberger Maestro di Capella di S. Stefano, ora pratico sotto di me, e che ne prognostico una riuscita non inferiore a quella del suo celebre Padre. ANTONIO SALIERI, primo Maestro di Cappella della corte imperiale di Vienna. *Vienna*, 30 Marzo, 1807.'—'I the undersigned certify that the young Signor W. A. Mozart, already a good player on the PF., has a rare talent for music, to perfect himself in which, having studied the rules of counterpoint in the school of Sig. Albrechtsberger, Maestro di Capella

His works were too much in accordance with the taste, albeit the best taste, of the day to survive. He drew up a catalogue of them in 1818. They comprise 5 Masses, a Requiem, 3 Te Deums, and several smaller church works; 4 oratorios (including 'La Passione di Gesù Christo,' performed by the Tonkünstler Societät in 1777); 1 French, 3 Italian, and 2 German cantatas, and 5 patriotic part-songs; several instrumental pieces; 3 operas to French, and 33 to Italian words; 1 German Singspiel, 1 German opera ('Die Neger'), and numerous vocal pieces for one or more voices, choruses, canons, fragments of operas, etc. [C.F.P.]

SALMON, Eliza, whose maiden name was Munday, was born at Oxford in 1787. Her mother's family had produced several good musicians; her uncle, William Mahon (born 1753, died at Salisbury, May 2, 1816), was the best clarinetist of his day; her aunts, Mrs. Warton, Mrs. Ambrose, and Mrs. Second, were excellent singers of the second rank. She was a pupil of John Ashley, and made her first appearance at Covent Garden in the Lenten concerts given by him under the name of 'oratorios,' March 4, 1803. About 1805 she married James Salmon, and went to reside at Liverpool, where she became distinguished as a concert singer, occasionally appearing in London, and rapidly attaining the highest popularity. In 1812 she sang at Gloucester Festival, and in 1815 at the Concert of Ancient Music. From that time to the close of her career her services were in constant request at nearly all the concerts, oratorios, and festivals in town and country. Her voice was a pure soprano of the most beautiful quality, of extensive compass, very brilliant tone, and extraordinary flexibility. She excelled in songs of agility, and was unsurpassed for the rapidity, neatness, and certainty of her execution, and the purity of her taste in the choice of ornament. In the higher and more intellectual qualities of singing, expression and feeling, she was wanting. But she extorted admiration, even from those most sensible of her deficiencies, by the exquisite loveliness of her voice and the ease with which she executed the most difficult passages. She unfortunately acquired the habit of intemperance, which eventually occasioned derangement of the nervous system, and in 1825 she suddenly lost her voice. She visited the continent, hoping by change and rest to recover it, but in vain; the jewel was gone never to be regained. She endeavoured to gain a livelihood by teaching singing, but, although she was well qualified for it, the ignorant public concluded that, as she herself had lost the power of singing, she was incapable of instructing others. She re-married a Rev. Mr. Hinde, who died leaving her totally destitute. A concert was given for her relief, June 24, 1840, which proved a complete failure. She gradually sank into a state of the greatest poverty, and was dependent upon the bounty of those who had known her in prosperity for subsistence. In 1845 an effort was made to raise a fund to purchase an annuity for her, but it was only partially successful. She died at No. 33 King's Road East, Chelsea, June 5, 1849. Her death was registered in the names of Eliza Salmon Hinde.

Her husband, James Salmon, son of James Salmon (gentleman of the Chapel Royal, Nov. 30, 1789, vicar choral of St. Paul's, and lay clerk of St. George's Chapel, Windsor, died 1827), received his early musical education as a chorister of St. George's, Windsor. In 1805 he was appointed organist of St. Peter's, Liverpool, and was in much esteem as a performer. In 1813, having fallen into embarrassed circumstances (by some attributed to his wife's extravagance, and by others to his own irregularities), he enlisted as a soldier and went with his regiment to the West Indies, where he died.

William, another son of James Salmon, sen., born 1789, was also a chorister of St. George's. He was admitted a gentleman of the Chapel Royal, May 28, 1817, and was also lay vicar of Westminster Abbey and lay clerk of St. George's, Windsor. With an ungrateful voice he sang with much taste and expression, and was an excellent singing master. He died at Windsor, Jan. 26, 1858. [W.H.H.]

SALO, Gasparo di, a celebrated violin-maker of Brescia, probably born at Salo, a small town on the lake of Garda. The date of his birth is unknown, but he is supposed to have worked during the latter years of the 16th and earlier years of the 17th century. Gasparo di Salo was one of the earliest makers of stringed instruments who employed the pattern of the violin as distinguished from that of the viol. His works are of a primitive pattern, more advanced than that of Zanetto and other old Brescian makers, but totally different from that of the contemporary Amati family. The model varies, being sometimes high, sometimes flat: the middle curves are shallow, and the sound-holes straight and angular. The wood is generally well chosen, and the thicknesses are correct; and the tone of the instrument, when of the flat model and in good preservation, peculiarly deep and penetrating. The pattern of Gasparo di Salo was partially revived in the last century, owing no doubt to its great tone-producing capacity, by the celebrated Joseph Guarnerius (see that article), and to a less extent by some of the French makers. As a maker of tenors and double-basses Gasparo di Salo has never had an equal, and his instruments of these classes are eagerly sought after. The objection to his tenors is their great size, but their effect in a quartet is unrivalled. The two finest specimens known, formerly in the possession of Dr. Steward of Wolverhampton, are now in the collection of Mr. John Adam of Blackheath. Gasparo's violins, which are mostly of small size, are not in request for practical purposes. [E.J.P.]

SALOMON, Johann Peter, a name inseparably connected with that of Haydn, born

at S. Stephen's, he is now practising under me, to that degree that I predict a result not inferior to that of his celebrated father. Antonio Salieri, principal Maestro di Capella of the Imperial Court of Vienna. *Vienna*, March 30, 1807.'

at Bonn,[1] Feb. 1745 (christened Feb. 2), early became an expert violinist, and in 1758 was admitted into the orchestra of the Elector Clement August. In 1765 he made a concert-tour to Frankfort and Berlin; and Prince Henry of Prussia, who had an orchestra and a small French opera-company at Rheinsberg, made him his Concertmeister, and composer of operettas. He had already showed his appreciation for Haydn by introducing his symphonies whenever he could. On the prince's sudden dismissal of his band, Salomon went to Paris, where he was well received, but being so near London he determined to go on there, and on March 23, 1781, made his first appearance at Covent-Garden Theatre. The pieces on this occasion were Mason's 'Elfrida,' set to music by Dr. Arne, and Collins's 'Ode on the Passions,' with solos and choruses by Dr. Arnold, both of which he led, besides playing a solo in the middle. The 'Morning Herald,' says of him 'He does not play in the most graceful style, it must be confessed, but his tone and execution are such as cannot fail to secure him a number of admirers in the musical world.' From this time he frequently appeared at concerts as soloist, quartet-player (violin and viola) and conductor. He quarrelled with the directors of the Professional Concerts, soon after their foundation, and thenceforward took an independent line. During Mara's first season in London, in 1784, he conducted and played solos at all her concerts. The 'Morning Chronicle' says, in 1785, 'Salomon's solo, though perhaps not excelling in tone, was in the greatest point, in pathetic impression, excelled by none! Whose violin-playing approaches nearer the human voice? On the whole Salomon is a mannerist, but he has much originality—he is very susceptible —he is a genius.' In 1786 he gave a series of subscription concerts at the Hanover Square Rooms, and produced symphonies by Haydn and Mozart. From that time he contented himself with an annual benefit concert, but acted as leader at others, both in London, as at the Academy of Ancient Music in 1789; and elsewhere, as at the Oxford Commemoration, Winchester and Dublin. A grand chorus composed by him in honour of the King's recovery, performed by the New Musical Fund in 1789, and repeated at his own concert, was his one successful vocal piece. He removed in 1790 to No. 18 Great Pulteney Street (opposite Broadwood's), in which house Haydn stayed with him in the following year. The two had long been in correspondence, Salomon endeavouring in vain to secure the great composer for a series of concerts; but as he was at Cologne on his way from Italy, where he had been to engage singers for the Italian Opera, he saw in the papers the death of Prince Esterhazy, hurried to Vienna, and carried Haydn back in triumph with him to London. This period of Haydn's stay in England was the most brilliant part of Salomon's career as an artist, and after the return of the former to Vienna the two continued the best of friends. In 1796 Salomon resumed his concerts, at which he was assisted by Mara, the young tenor Braham, and his own promising pupil Pinto. On April 21, 1800, he produced Haydn's 'Creation' at the King's Theatre, though not for the first time in England, as he had been forestalled by John Ashley (Covent Garden, March 28). Salomon's active career closes with the foundation of the Philharmonic Society, in which he took a great interest, playing in a quintet of Boccherini's, and leading the orchestra, at the first concert in the Argyll Rooms, March 8, 1813. Up to the last he was busy planning an Academy of Music with his friend Ayrton. A fall from his horse caused a long illness, from which he died Nov. 28, 1815, at his house No. 70 Newman Street. He was buried Dec. 2 in the south cloister of Westminster Abbey. He bequeathed his house to the Munchs of Bonn, his next of kin; £200 to F. Ries, for the benefit of his brother Hubert; and his Stradivarius violin (said to have belonged to Corelli, and to have his name upon it) to Sir Patrick Blake, Bart., of Bury S. Edmunds.[2]

Salomon was, on the whole, a first-rate solo-player, but his special field was the quartet, in which he showed himself a solid and intelligent musician. Haydn's last quartets were composed especially to suit his style of playing.

He was a man of much cultivation, and moved in distinguished society. Bland published an engraving of him by Facius from Hardy's picture. Another portrait by Lansdale was sent by Salomon himself to the Museum at Bonn. His best epitaph is contained in a letter from Beethoven to his pupil Ries in London (Feb. 28, 1816): 'Salomon's death grieves me much, for he was a noble man, and I remember him ever since I was a child.'[3] [C.F.P.]

SALTARELLO or SALTARELLA (Latin *saltare*, to jump).

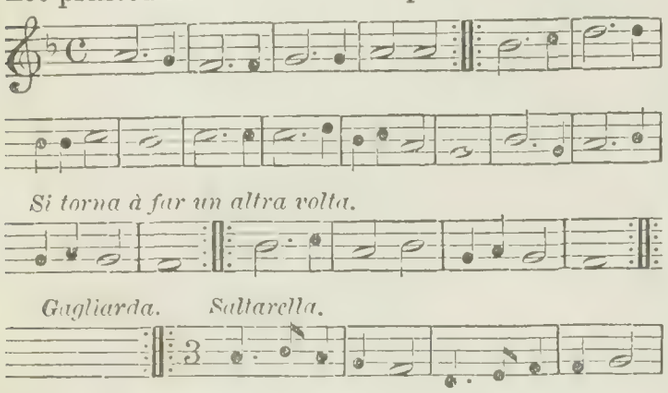
I. In 16th-century collections of dance tunes the melodies usually consist of two distinct divisions, the first of which is written in common time, the second in 3 time. The former was probably danced like our English country-dances (i.e. the dancers standing in two lines facing each other) and bore the distinguishing name of the dance, while the latter was like the modern round dance and was variously entitled Nachtanz, Proportio, Hoppeltanz, or Saltarello, the first three being the German and the last the Italian names for the same movement. Thus in Bernhard Schmidt's Tabulaturbuch (Strasburg, 1577) are found the following dances: 'Possomezzo Comun' with 'Il suo Saltarello'; 'Ein guter Hofdantz' with 'Nachdantz'; 'Alemando novello. Ein guter neuer Dantz' with 'Proportz darauf'; and 'Ein guter neuer Dantz' with 'Hoppeldantz darauf.' Similarly in Queen Eliza-

[1] The Salomons' house was 515 Bonngasse, the same in which Beethoven was born.

[2] See the 'Westminster Abbey Registers,' by J. L. Chester, D.C.L. Sir P. Blake's property was sold after his death, and nothing is now known by the family about the violin.

[3] Pohl's 'Haydn in London,' 73 to 85.

beth's Virginal Book (preserved at Cambridge in the Fitzwilliam Museum) there is an elaborate 'Galiarda Passamezzo' by Peter Philips (dated 1592) which consists of ten 8-bar 'divisions,' the 9th of which is entitled 'Saltarella.' The Saltarello, or Proportio, was always founded on the air of the first part of the dance, played in 3 time with a strong accent on the first beat of the bar. The manner in which this was done will be seen by examining the following example, from the 2nd book of Caroso da Sermoneta's 'Nobilta di Dame' (Venice, 1600). It is part of a Balletto 'Laura Soave,' the second part of which (a Gagliarda) and the last 40 bars of the Saltarello are not printed here for want of space.



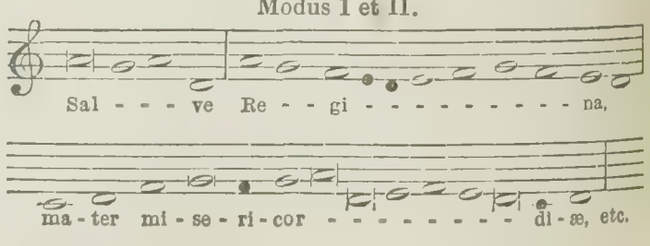
II. A popular Roman dance, in 3-4 or 6-8 time, danced by one or two persons, generally a man and a woman, the latter of whom holds up her apron throughout the dance. The step is quick and hopping, and the dance gradually increases in rapidity as the dancers move round in a semicircle, incessantly changing their position, and moving their arms as violently as their legs. The music is generally in the minor, and is played on a guitar or mandoline, with tambourine accompaniment. The finale to Mendelssohn's Italian Symphony contains two Saltarellos—

in each of which the jumping or hopping step is very apparent. In contrast to these is a Tarantella, used as a third subject, a continuous flow of even triplets. [W.B.S.]

SALVAYRE, Gervais Bernard, born June 24, 1847, at Toulouse, and educated at the Maitrise and the Conservatoire, where he studied the piano and harmony, and took a first prize for cello. He then went to Paris, entered the Conservatoire, and studied composition under Ambroise Thomas, and the organ under Benoist. He made his way upwards slowly, taking the first organ-prize in 1868, and the Grand Prix not till 1872, though he had been a competitor since 1867. At that time Bazin was professor of composition, Thomas having become director of the Conservatoire. During his two years in Rome Salvayre learned the mandoline, and made himself thoroughly acquainted with the *bella lingua Romana*; and his first publications (Milan, Ricordi) were some Italian songs—'Sospiri miei,' 'Inamoramento,' 'Dolore del tradimento,' 'Serenata romana,' and 'Serenata di Francesca da Rimini.' Industrious to a degree, he brought back (besides the regulation compositions as government student, which he had punctually forwarded) a number of compositions in various styles, and was thus ready for any opportunity which might bring him into notice. Among these Roman works were a 'Stabat Mater'; an orchestral piece, 'Les Bacchantes'; the 113th Psalm for orchestra, solos and chorus; and an oratorio, 'Le Jugement dernier,' which he subsequently remodelled, and produced at the Châtelet concerts as 'La Résurrection' (1876). Other compositions were an 'Ouverture Symphonique' (Concerts populaires), and a brilliant divertissement for the ballet inserted in Grisar's 'Amours du Diable' on its revival (Châtelet, Nov. 1874). Having at length found his way to the boards, Salvayre produced at the Gaieté (then recently transformed into an opera under Albert Vizentini) 'Le Bravo' (April 18, 1877), libretto by Blavet, from Cooper's novel. The piece was transformed from an opera comique into a spectacular drama, and had an immense success, partly owing to the singing of Bouhy the baritone, and Heilbron the prima donna. It has since been performed at several theatres of importance both in France and elsewhere. 'Le Fandango,' a one-act ballet (Opéra, Nov. 26, 1877), was less fortunate. So far M. Salvayre's gift seems rather for stage and dramatic music than for light comedy, or more poetical conceptions. [G.C.]

SALVE REGINA. One of the 'Antiphons of the Blessed Virgin Mary,' appointed, in the Roman Breviary, to be sung, from the Feast of the Holy Trinity to the Saturday before the First Sunday in Advent, either at the end of Compline, or, when Compline is not sung, at the end of Vespers.

The Plain Chaunt Melody of 'Salve Regina'—a noble example of the use of the Mixed Dorian Mode—rarely fails, by its melodious Intervals, and rich Ligatures, to attract the attention of English visitors to foreign Cathedrals.



Since the 15th century, it has been frequently treated, in the Motet style, with excellent effect. Palestrina has left us five superb settings, four of which are included in Messrs. Breitkopf & Härtel's new edition of his works; and most of the other great Masters of the Polyphonic Schools have left at least an equal number. It has also been a favourite subject with modern Composers, many of whom have treated it, more or less happily, with Accompaniments for the Orchestra, or Organ. Pergolesi's last composition was a 'Salve Regina,' which is generally regarded as his greatest triumph in the direction of Church Music.

What has been said of the 'Salve Regina' applies, with equal force, to the Antiphons for the Seasons of Advent, Lent, and Easter—'Alma Redemptoris Mater,' 'Ave Regina,' and 'Regina cœli'; the last of which, especially, has been a great favourite, both with Polyphonic and Modern Composers. [W.S.R.]

SAMSON. Oratorio by Handel, words compiled by Newburgh Hamilton from Milton's Samson Agonistes, Hymn on the Nativity, and Lines on a Solemn Musick. The autograph of the work is in the Buckingham Palace Library, and contains the following dates:—end of 1st part, 'Sept. 29, 1741' (N.B. Messiah was finished 14th of same month); end of 2nd part '☉ (*i.e.* Sunday) Oct. 11, 1741'; end of chorus 'Glorious hero,' 'Fine dell' Oratorio, S. D. G., London, G. F. Handel, ♃ (*i.e.* Thursday) Oct. 29, 1741'; then the words 'Fine dell' Oratorio' have been struck out, and 'Come, come,' 'Let the bright,' and 'Let their celestial' added, with a note at end, 'S. D. G.—G. F. Handel, Oct. 12, 1742.' It was produced at Covent Garden, Lent 1743—the first after Handel's return from Ireland.

Handel esteemed it as much as the Messiah, and after his blindness wept when he heard the air 'Total eclipse.' It was revived by the Sacred Harmonic Society, Nov. 14, 1838, and has often been performed since. The score was published by Wright; by Arnold in his edition; by the Handel Society (edited by Rimbault, 1852); and by Breitkopf & Härtel (Chrysander, 1861). [G.]

SAN CARLO, the largest and most beautiful theatre of Naples, has almost the same proportions as La Scala of Milan, with which it contends for the theatrical primacy in Italy. It was built in 1737 by the architect Carasale, on plans by Medrano, a General of the R. E., and was completed with extraordinary celerity in only nine months. Some alterations and improvements were made in it by Fuga and Niccolini towards the end of the last century. It was completely burnt down in 1816, and rebuilt even more elegantly and quickly than before, in six months, by the said Antonio Niccolini. In 1844 San Carlo underwent a thorough restoration and considerable improvement. It has now 6 tiers of boxes, each tier numbering 32, without reckoning the large and handsome royal box in their centre. The theatre has also attached to it a large ridotto or hall, notorious in former times for the reckless gambling which took place there.

The best days of San Carlo were those in which it was under the management of the great impresario Domenico Barbaja from 1810 to 1839. During that period the greatest singers appeared on its stage, amongst whom we need only name Colbran, Sontag, Grisi, Tamburini, Rubini and Lablache. Of many operas written expressly for San Carlo and first produced there, we may mention, besides those named under Rossini, Bellini's first opera, 'Bianca and Fernando,' in 1826; Donizetti's 'Lucia di Lammermoor' in 1835, and his last opera, 'Caterina Cornaro,' in 1844; Mercadante's 'L'Apoteosi d'Ercole' in 1819; and Ricci's 'L'Orfanella di Ginevra' in 1829, and 'La Festa di Piedigrotta' in 1852.

The true cause of the decadence of this great theatre is to be found in the inability of the Neapolitan public to pay sufficiently high prices for the services of the great artists of our days. The writer of this notice still remembers with what uproar and protest the rise in the prices of the stalls to 4*s.* was received by the public of Naples in 1860. Previously to that date the ticket for a stall cost only the ridiculous sum of 2*s.* Thus, notwithstanding the annual subvention granted by the municipality of Naples to the lessee of San Carlo, he is unable to engage a great star, the theatre not paying sufficiently for him to incur such great expense.

Another of the opera-houses of Naples is the theatre of Il Fondo, built at the royal expense in 1778 by the architect Securo, and restored in 1849. The form is quite round, with 5 tiers of boxes. Il Fondo is sometimes used for opera, and sometimes for drama. Here Mercadante's first work, a cantata, was produced in 1818. Il Teatro Nuovo, built in 1724 by Carasale, the architect of San Carlo, is wholly consecrated to the representation of opera buffa. Destroyed by fire in 1861, it has been lately rebuilt. Another opera house, San Ferdinando, is a standing example of the mistake of building theatres in unsuitable localities, this theatre bringing to ruin every lessee who has taken it, and being left empty, however good the artists performing on its stage. It was built in 1791, and is shut the greater part of the year. Numerous other small houses there are in Naples, where a kind of musical medley is often performed, mostly in the Neapolitan dialect, and where the lower classes nightly crowd. The music of such operettas is generally lively and tuneful, but hardly deserves any other remark. [L. R.]

SANCTUS. I. The name given to that portion of the Mass which immediately follows the Preface, and precedes the Consecration of the Host. [See Mass.] The music of the Sanctus derives, from the solemnity of the text, and the importance of its position in the Service, a peculiar significance, which has been rarely overlooked, by Composers of any country, or period. In Plain Chaunt Masses, the Melody to which it is adapted is marked by a grave simplicity which renders it capable of being sung, with good effect, at a pace considerably slower than that of the 'Kyrie' or 'Christe.'

The Great Masters of the Polyphonic Schools

have almost always treated it in Real Fugue, of a peculiarly reverent character, not unlike that of the 'Kyrie,' but developed at greater length, with frequent repetitions of the text, and three distinct Subjects, adapted to the words, 'Sanctus,' 'Dominus Deus Sabaoth,' and 'Pleni sunt cœli et terra.' Sometimes—as in Palestrina's Masses, 'Veni, sponsa Christi,' and 'Dum complerentur'—the 'Pleni sunt cœli' forms a separate Movement, assigned to three or four Solo Voices; sometimes the nature of the Subject indicates an accelerated Tempo, without an actual solution of continuity, as in the same Composer's 'Æterna Christi munera.' The 'Osanna,' with which the whole concludes, is either treated as a supplementary Movement, quite distinct from the 'Sanctus' itself; or, less frequently, aids in the development of the Fugue, by the addition of a fourth Subject, without disturbing the homogeneity of the whole. In the former case, the same 'Osanna' usually serves both for the 'Sanctus' and the 'Benedictus,'[1] as in the 'Missa Papæ Marcelli,' and Vittoria's 'Simile est regnum cœlorum': in the latter, the treatment is usually of a very subdued character, as in Palestrina's 'Tu es Petrus,' 'Assumpta est Maria,' 'Æterna Christi munera,' and 'Missa brevis.' These instances are particularly fine ones; and, indeed, it may be doubted whether even Palestrina's genius ever rose to greater sublimity of conception than in this part of the 'Missa brevis,' which, when interpreted by a large body of Voices, singing in the most delicate attainable *pianissimo*, presents us with the highest ideal of the Song of the Heavenly Host that has yet been reached.

The treatment of the 'Sanctus,' by modern Composers, exhibits an infinite variety of styles; yet the Movement is, nearly always, the most solemn one in the Mass. In Bach's great work in B minor, an indescribably massive effect is produced by the passages of sustained Chords, beginning at the seventeenth and thirty-fifth Bars. Very different is the idea developed in the corresponding division of Beethoven's Mass in D. The awe-struck character of the opening 'Adagio. Mit Andacht,' however closely it may border upon the dramatic, can scarcely impress the hearer with any other feeling than that of the most profound reverence; while the 'Allegro pesante' of the 'Pleni sunt cœli' is conceived in strict accordance with the literal meaning of the words, though nothing could possibly be more unsuited to their position in the Service. This deplorable incongruity is, however, more or less observable in all Masses with Instrumental Accompaniment. The same objection may be urged with equal propriety, against the combined 'Sanctus' and 'Benedictus,' in Cherubini's Requiem in C minor; a comparatively unpretending Movement, the persistent *fortissimo* of which can scarcely fail to distract the mind far more seriously than even the sensuous beauty of a Movement like that in Rossini's 'Messe Solennelle.'[2]

To particularise the varied readings of the 'Sanctus,' to be found in the Masses of even the greatest Composers of modern times, would be impossible. The examples to which we have called attention will serve as types of many others; and will, moreover, be valuable, as illustrations of the one practical point of divergence which, more than any other, distinguishes the reading prevalent in the 16th century from that most common in the 19th—the devotional *piano*, from the pompous *forte*. So long as Drums and Trumpets are permitted to take part in the Accompaniments of the 'Sanctus,' so long will it fail to attain that æsthetic consistency which alone can ensure its ultimate perfection as a work of Art.

II. In Anglican 'Services,' the Sanctus is usually a very unpretending Movement, written, for the most part, in simple Harmony, without any attempt at Fugal treatment, or even Imitation; though, in the works of such Masters as Tallis, Byrd, Farrant, Gibbons, and their contemporaries, it is always noted for a quiet dignity well worthy of the solemnity of the text. In practice, it is too often removed from the place assigned to it in the Prayer-Book, and sung between the Litany and the Office for the Celebration of the Holy Communion—an abuse which has, of late years, excited much reprehension. [W.S.R.]

SANDERSON, James, born in 1769 at Workington, Durham, had from early childhood a passion for music, and, without the assistance of masters, so qualified himself that in 1783 he was engaged as violinist at the Sunderland Theatre. In 1784 he went to Shields as a teacher of the violin and pianoforte, and met with much success. In 1787 he was engaged as leader at the Newcastle-upon-Tyne Theatre, and in 1788 at Astley's Amphitheatre. In 1789 he made his first attempt at dramatic composition by writing instrumental interludes to illustrate the several parts of Collins's 'Ode on the Passions,' which the eminent tragedian, George Frederick Cooke, was to recite on his benefit night at Chester. His next work was 'Harlequin in Ireland' at Astley's in 1792. In 1793 he was engaged at the Royal Circus, afterwards the Surrey Theatre, as composer and music director, a post which he retained for many years. His principal productions during that period were 'Blackbeard,' 1798; 'Cora,' 1799; 'Sir Francis Drake,' 1800 (in which was the song, 'Bound 'prentice to a waterman,' which became so great a favourite with stage representatives of British sailors that it was constantly introduced into pieces in which a seaman formed one of the characters for fully half a century), and 'Hallowe'en.' His 'Angling Duet,' originally composed for 'The Magic Pipe,' a pantomime produced at the Adelphi, also enjoyed a long popularity. He composed many pieces for the violin. He died in or about 1841. [W.H.H.]

1 In order to explain the intimate connection between these Movements, it is necessary to remind the reader that the first 'Osanna' is immediately followed by the Consecration of the Host, which takes place in silence. This completed, the 'Benedictus,' and second 'Osanna,' are sung, in continuation of the same train of ideas, and not with the intention of introducing a new subject of contemplation.

2 We say nothing, here, of the strikingly beautiful Movements in Mendelssohn's 'Elijah,' and Spohr's 'Last Judgment,' because, notwithstanding their opening words, the term 'Sanctus' cannot be fairly applied to them, in its technical sense.

SANDYS, William, F.S.A., born 1792, educated at Westminster School, and afterwards called to the bar, is entitled to mention here as editor of 'Christmas Carols, Ancient and Modern, including the most popular in the West of England, with the Tunes to which they are sung. Also specimens of French Provincial Carols,' 1833; author of 'Christmastide, its history, festivities, and carols,' with 12 carol tunes, 1852; and joint author with Simon Andrew Forster of 'The History of the Violin and other instruments played on with the bow. . . . Also an account of the principal makers, English and foreign,' 1864. He died Feb. 18, 1874. [W.H.H.]

SANG SCHOOLS, an old Scottish institution, dating from the 13th century. A 'scule' for teaching singing existed in almost every one of the cathedral cities in Scotland, and in many of the smaller towns, such as Ayr, Dumbarton, Lanark, Cupar and Irvine. Even in the far north in 1544 Bishop Reid founded and endowed a 'Sang School' in Orkney. Prior to the Reformation the teaching in these schools was principally confined to 'musick, meaners, and vertu,' but at a later date it extended to the proverbial 'three R's.' Music, however, seems to have been the chief course of instruction, and the original idea of confining its study to the cathedral singers was so far enlarged, that laymen were admitted to the schools, in which the Gregorian chant had naturally an early and important place. The master of the school was held in high esteem, and was occasionally selected from the clergy, the appointment at times leading to important preferment—thus William Hay, master of the Old Aberdeen School in 1658, was made Bishop of Moray; and John Leslie, Bishop of Ross, was once a teacher in the Aberdeen School.

Great attention seems to have been paid by the parliament of the day to the study of music, for a statute was passed in 1574 'instructing the provest, baillies, and counsale, to sett up ane sang scuill, for instruction of the youth in the art of musick and singing, quhilk is almaist decayit and sall schortly decay without tymous remeid be providit.' Comparatively little interest seems to have attended either the Edinburgh or Glasgow schools, and from a minute of the Town Council of the latter we gather that the institution collapsed in 1588, 'the scuile sumtyme callit the sang scuile' being sold to efray the expenses incidental to the heavy visitation of a plague. The Aberdeen school appears to have been the one of chief celebrity, attracting teachers of even continental fame, and the Burgh records contain references of a curious and amusing description. The school existed so early as the year 1370, its class of pupils being the same as those attending the grammar school. Both vocal and instrumental music were taught, as we learn from the title of Forbes's scarce work, 'Cantus, Songs and Fancies both apt for Voices and Viols as is taught in the Music School of Aberdeen' (1662). About this period, Mace, in his 'Musick's Monument,' directed the attention of his countrymen to the sang school of Scotland as an institution well worthy of imitation south of the Tweed. A few excerpts from the Burgh records of Aberdeen and other places may not be uninteresting, and we give the following as a fair example of the attention paid by the civic authorities of the day to the subject of music. On Oct. 7, 1496, a contract was entered into between the Town Council of Aberdeen and Robert Huchosone, sangster, 'who obliges himself by the faith of his body all the days of his life to remain with the community of the burgh, upholding matins, psalms, hymns,' etc. etc., the council also giving him the appointment of master of the Sang School. The four following extracts are also from the Aberdeen Burgh records, as faithfully transcribed by the editors of the Spalding Club publications.

4th October, 1577.

The said day the consell grantit the soume of four poundis to the support of James Symsonne, doctour of thair Sang Scuill, to help to buy him cloythis.

23 Novr., 1597.

The maister of the sang schoole sall serve bayth the Kirkis in uptacking of the psalmes theirin.

1594.

Item to the Maister of the sang schoile xiiij.

1600.

'The bairnis and scoleris of the sang schoollis' are ordered to find caution for their good behaviour.

From Dundee Records, 1602.

Item to the master of the sang scule lxxx lbs.

From Air Records, 1627.

Item to the Mr of musick scule for teaching of the musick scule and tacking up the psalmes in the kirk x bolls victuall and xiiij of silver.

From Irving Records, 1633.

Our doctour and musicianer jcii.

The stipend of the master of the Edinburgh sang school appears to have been the modest allowance of ten pounds in sterling money. It may be worth mentioning that the building in Aberdeen so long identified with the musical interests of the day was sold only in 1758, and those acquainted with the Granite-city may also be interested in knowing the site of the sang school—a feu near the churchyard wall in the Back Wynd. An attempt was recently made to form a connecting link with the past in the shape of a proposed revival of the sang school. The promoter of the movement purchased a hall, which received the name of 'Song School,' but he has not been encouraged to carry his spirited scheme to a successful issue. [J.T.F.]

SANTA CHIARA. Opera in 3 acts; words by Mad. Birch Pfeiffer, music by H.R.H. Ernest, Duke of Saxe-Coburg-Gotha. Produced at Coburg, Oct. 15, 1854; at the Opéra, Paris (French translation by Oppelt), Sept. 27, 1855, and, in Italian, at Covent Garden, June 30, 1877. [G.]

SANTINI, Fortunato, the Abbé, a learned musician, born in Rome, July 5, 1778, early lost his parents, and was brought up in an orphanage, but showed such talent for music that he was put to study with Jannaconi, and received into the Collegio Salviati. During his stay there (until 1798) he occupied himself in copying and scoring the church-music of the great masters, and after his ordination in 1801 devoted his

whole life to music, copying, collating, and compiling with unwearied industry. As an ecclesiastic he had the *entrée* to many libraries and collections generally inaccessible, and set himself to the task of scoring all important works then existing only in parts. In 1820 he issued a catalogue (46 pp., 1000 Nos.) of his music, the MS. of which, containing more than the printed one, is in the collection of the writer.[1] A MS. copy of a 'Catalogo della musica antica, sacra, e madrigalesca, che si trova in Roma via dell' anima no. 50 presso Fortunato Santini,' is in the Fétis collection, No. 5166. His learning, and practical knowledge of church-music, made his assistance invaluable to all engaged in musical research. He did much to make German music known in Italy, translating Rammler's 'Tod Jesu' into Italian, and helping the introduction of Graun's music. Mendelssohn writes ('Letters,' Rome, Nov. 2, 1830); 'The Abbé has long been on the look-out for me, hoping I should bring the score of Bach's 'Passion.' And again (Nov. 8), 'Santini is a delightful acquaintance; his library of old Italian music is most complete, and he gives or lends me anything and everything.' Then he tells how Santini is trying to get Bach's compositions performed at Naples, and goes on (Nov. 16), 'Old Santini continues to be courtesy personified; if some evening in company I praise anything, or say I do not know such and such a piece, the very next morning he comes knocking gently at my door with the identical piece folded up in his blue handkerchief. Then I go to him in the evenings, and we are really fond of each other.' In the well-known letter to Zelter, Mendelssohn says, 'He is anxious to make other German music known here, and is at this moment translating your motet, 'Der Mensch lebet,' and Bach's 'Singet dem Herrn,' into Latin, and 'Judas Maccabeus' into Italian. He is kindness itself, and a very charming old gentleman. . . . Just now his whole mind is absorbed in plans for making German music known in Italy.' Santini even composed pieces in five, six, and eight real parts, much praised by Fétis. The Singakademie of Berlin elected him an honorary member. On the death of his sister he sold his valuable collection, stipulating however for the use of it for life. He is no longer living, but the date of his death is not known. His library is in the episcopal palace at Münster in Westphalia. A pamphlet, 'L'Abbé Santini et sa collection musicale à Rome' (*Florence, 1854*), giving a useful résumé of its contents, was published by a Russian amateur named Wladimir Stassoff. [F.G.]

SANTLEY, CHARLES, born at Liverpool, Feb. 28, 1834, is the possessor of a baritone voice of fine quality, extensive compass, and great power. He quitted England for Italy, Oct. 1855, and studied at Milan under Gaetano Nava; returned Oct. 1857, and took lessons from Manuel Garcia. He appeared at St. Martin's Hall as Adam in Haydn's 'Creation,' Nov. 16, 1857, and on Jan. 8, 1858, sang the two parts of Raphael and Adam in the same work at the Sacred Harmonic Society. He first appeared on the English stage at Covent Garden, in the Pyne and Harrison company, as Hoel in 'Dinorah,' in Sept. 1859; and sang in 'Zampa,' 'The Waterman,' and 'Peter the Shipwright,' at the Gaiety in 1870. His first essay in Italian opera was at Covent Garden in 1862, but later in the same season he transferred his services to Her Majesty's Theatre. He first sang at the Meetings of the Three Choirs at Worcester in 1863, at Birmingham Festival in 1864, and at the Handel Festival at the Crystal Palace in 1862, and has since maintained his position as the first English singer of his class, and during a tour in the United States in 1871 reaped substantial honours there also. Mr. Santley's accomplishments are not confined to music. He has adapted 'Joconde' to the English stage, and is an enthusiastic amateur painter. On April 9, 1859, he married Miss Gertrude KEMBLE, daughter of John Mitchell Kemble, the eminent Anglo-Saxon scholar, and granddaughter of Charles Kemble. She appeared as a soprano singer at St. Martin's Hall in the 'Messiah,' in Dec. 1857, but on her marriage retired from public life. [W.H.H.]

SAPHO. Opera in 3 acts; words by Emile Augier, music by Gounod. Produced at the Opéra, April 16, 1851. It was reduced to 2 acts and reproduced July 26, 1858. In Italian, as 'Saffo,' at Covent Garden, Aug. 9, 1851. [G.]

SARABAND, a stately dance once very popular in Spain, France and England. Its origin and derivation have given rise to many surmises. Fuertes ('Historia de la Musica Española,' Madrid, 1859) says that the dance was invented in the middle of the 16th century by a dancer called Zarabanda, who, according to other authorities was a native of either Seville or Guayaquil, and after whom it was named. Others connect it with the Spanish Sarao (an entertainment of dancing), and Sir William Ouseley (Oriental Collections, 1728, vol. ii. p. 197, misquoted by Mendel, under 'Saraband'), in a note to a Turkish air called 'Ser-i-Kháneh,' or 'the top of the house,' has the following:— 'Some tunes are divided into three parts and are marked *Kháne-i śáni* "the second part" and *Kháne-i śáliś* "the third part"; near the conclusion of several we also find the Persian words *ser-band*, from which, without doubt, our *saraband* has been derived.'[2]

Whatever its origin may have been, it is found in Europe at the beginning of the 16th century, performed in such a manner as to render its oriental source highly probable. This may be gathered from the following extract from Chapter xii. 'Del baile y cantar llamado Zarabanda,' of the 'Tratado contra los Juegos Publicos' ('Treatise against Public Amusements') of Mariana (1536–1623): 'Entre las otras invenciones ha salido estos años un baile y cantar tan lacivo en las palabras, tan feo en las meneos,

[1] His address is there given Roma, Via Vittoria, No. 49, while in the Fétis collection it is Via dell' anima, No. 50.

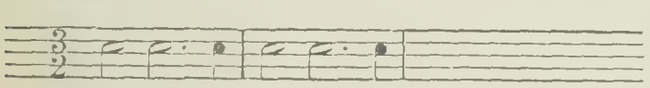
[2] In a MS. collection of dances in the Music School at Oxford is a Saraband by Coleman, entitled 'Seribran.'

que basta para pegar fuego aun á las personas muy honestas' ('amongst other inventions there has appeared during late years a dance and song, so lascivious in its words, so ugly in its movements, that it is enough to inflame even very modest people'). This reputation was not confined to Spain, for Marini in his poem 'L'Adone' (1623) says:

> Chiama questo suo gioco empio e profano
> Saravanda, e Ciaccona, il nuova Ispano.[1]

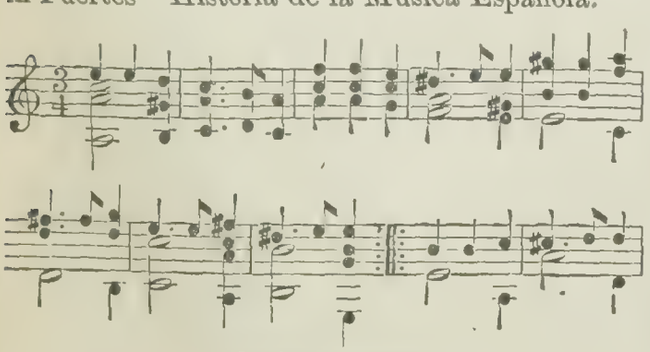
Padre Mariana, who believed in its Spanish origin, says that its invention was one of the disgraces of the nation, and other authors attribute its invention directly to the devil. The dance was attacked by Cervantes and Guevara, and defended by Lope de Vega, but it seems to have been so bad that at the end of the reign of Philip II. it was for a time suppressed. It was soon however revived in a purer form, and was introduced at the French court in 1588, where Richelieu, wearing green velvet knee-breeches, with bells on his feet, and castanets in his hands, danced it in a ballet before Anne of Austria.

In England the Saraband was soon transformed into an ordinary country-dance. The first edition of Playford's 'Dancing Master' (1651) has two examples, one, to be danced 'longwayes for as many as will' (*i.e.* as 'Sir Roger de Coverley' is now danced), and the other, 'Adson's Saraband,' to be danced 'longwayes for six.' It was at about this time that the Saraband, together with other dances, found its way into the Suite, of which it formed the slow movement, placed before the concluding Gigue. In this form it is remarkable for its strongly accentuated and majestic rhythm, generally as follows:—



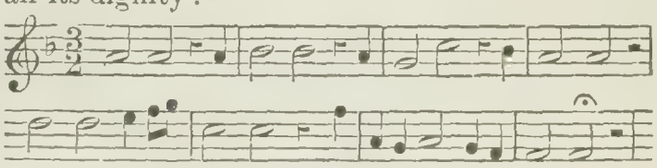
It is written either in the major or the minor key, in 3–2 or 3–4 time, although Walther (Lexicon, 1732) says that it may be also written in 2–4 time. It usually consists of two 8- or 12-bar divisions, begins on the down-beat, and ends on the second or third beat. Bach, in the 'Clavierübung' Pt. I. (Bachges. iii. 76) has a Saraband beginning on the up-beat, and Handel (Suite XI) has one with variations. Those by Corelli do not conform to the established rules, but are little more than Sicilianas played slowly.

The following Saraband for the guitar is printed in Fuertes' 'Historia de la Musica Española.'



[1] 'New Spain' is Castile.

Handel's noble air 'Lascia ch'io pianga,' in 'Rinaldo,' is taken with no material alteration from a Saraband in his earlier opera of 'Almira,' in which the majestic rhythm mentioned reigns in all its dignity:—



See Chrysander's Handel i. 121. [W.B.S.]

SARASATE, Martin Meliton, born at Pampeluna, March 10, 1844, came to France as a child, and entered the Paris Conservatoire, Jan. 1, 1856. The following year he became the favourite pupil of Alard, and gained the first prizes for solfeggio and violin. He then entered Reber's harmony class, and secured a *premier accessit* in 1859, but shortly after relinquished the study of composition for the more tempting career of a concert player. His beautiful tone, retentive memory, immense execution, and certainty of finger, added to the singularity of his manners and appearance, ensured his success in Paris, the French provinces, and the Peninsula. The Spaniards naturally honoured an artist whom they looked upon as their own countryman, but Sarasate aspired to make his name known wherever music was appreciated, as well as in the two countries especially his own by birth and adoption. No violinist has travelled more than he; besides making his way through Europe, from the remotest corner of Portugal to Norway, and from London to Moscow, he has visited America, North and South. In all his wanderings he has contrived to carry on his cultivation, and develope his great natural gifts. To London his first visit was in 1874, when he played at the Philharmonic Concert, May 18, and at the Musical Union, June 9, etc. He returned in 1877 (Crystal Palace, Oct. 13), and 78 (Philharmonic, Mar. 28), since when he has not crossed the channel.

Sarasate's distinguishing characteristics are not so much fire, force, and passion, though of these he has an ample store, as purity of style, charm, flexibility, and extraordinary facility. He *sings* on his instrument with taste and expression, and without that exaggeration or affectation of sentiment which disfigures the playing of many violinists. He is not, however, quite free from a

tendency to trick, such as *tremolo*, which is very regrettable in an artist of genius and sensibility, —and from over-rapidity in quick movements. His répertoire is varied, comprising the concertos of the classical masters—Viotti, Beethoven, Spohr, and Mendelssohn—and the works of the modern French and Belgian schools. Among the latter his favourites are Max Bruch's concertos, those of Saint-Saëns and Lalo, and the Symphonie Espagnole of the last-named composer. Sarasate has composed for his instrument romances, fantaisies, and especially transcriptions of Spanish airs and dances (Simrock, Bonn), all calculated to display his skill as a virtuoso. [G.C.]

SARTI, Giuseppe, born at Faenza, Dec. 1, 1729, a date differing from that given by most of his biographers, but furnished by Sarti's own grandson to the writer, who has taken great pains to verify it. The son of a jeweller who played the violin in the cathedral, he early learned music, and had lessons in composition —from Vallotti according to his own family, from Padre Martini according to his biographers. Whether at Padua or at Bologna (the respective homes of the two masters), he completed his studies at an early age, for we learn from the chapter archives, still preserved in the library of Faenza, that he was organist of the cathedral from 1748 to April 1750. In 1751 he composed his first opera, 'Pompeo in Armenia,' which was enthusiastically received by his fellow townsmen, and followed by several more serious works, and 'Il Rè pastore' (Venice, 1753) which had an immense success. So quickly did his fame spread that when he was only 24 the King of Denmark (Frederic V.) invited him to Copenhagen as Capellmeister to the Prince Royal, and director of the Italian opera; and, on the closing of the latter in two years, made him Court-capellmeister. In the summer of 1765 the king determined to reopen the opera, and Sarti went back to Italy after an absence of twelve years to engage singers; but his plans were upset by the deaths first of the king in 1766, and then of his own mother in 1767, so that it was not till 1768 that he returned to Copenhagen. These three years of trouble were not unfruitful, as he composed five operas, of which two, 'I Contratempi' and 'Didone abbandonata,' were given in Venice, where he seems chiefly to have resided.

Overskou's carefully compiled 'History of the Danish [1]stage' informs us that Sarti directed the Danish court-theatre from 1770 to May 20, 1775, when he was summarily dismissed. A favourite with Christian VII., and the protégé of Struensee and Queen Caroline Matilda, he was too artless and straightforward to curry favour with the queen dowager and the ambitious Ove Gulberg; so after the catastrophe of 1772 he found his position gradually becoming worse and worse, and when the oligarchical party had secured the upper hand, imprisoning the queen, and reducing the king to a mere cipher, he had, with other court favourites, to endure much ill treatment, and was finally banished. During this second stay at Copenhagen he married Camilla Pasi, by whom he had two daughters.

Returning to Italy in the summer of 1775 he went first to Venice, became at once director of the Ospedaletto Conservatorio, and administered it with great success for four years. In 1779 the post of maestro di capella of the cathedral of Milan fell vacant through the death of Fioroni, and Sarti was pronounced successful at a competition held before the Conservatorio of Naples. This victory over Paisiello and other eminent musicians, greatly increased his reputation, and procured him many distinguished pupils, Cherubini among the number, who indeed was not only his pupil, but for some years his assistant.[2] In 1784 he received an invitation from Russia too advantageous to be refused, but the nine years spent in Milan were the most brilliant of his whole career, and the most prolific, including as they do his most successful operas, 'Le Gelosie [3]villane' and 'Farnace' (Venice, 1776); 'Achille in Sciro' (Florence, Oct. 1779); 'Giulio Sabino' (Venice 1781), and 'Le Nozze di Dorina' (ib. 1782). To complete the list, at least ten more operas and several cantatas on a large scale should be added, works for the cathedral choir, including several masses, a Miserere à 4, and some important motets.

On his way to St. Petersburg, Sarti made some stay at Vienna, where Joseph II. received him graciously, and granted him the proceeds of a performance of 'I Litiganti,' which had long maintained its place at the Burgtheater, and had helped to fill its coffers, as the monarch politely told the composer. He there made the acquaintance of Mozart, then in the very prime of life, who speaks of him as an 'honest, good man,' and who not only played to him a good deal, but adopted an air from his 'Due litiganti' as the theme of a set of Variations (Köchel, 460), and as a subject in the Second Finale of 'Don Juan.' His pleasure in Mozart's playing did not, however, place him on Mozart's level; and when the famous six quartets were published, Sarti was one of the loudest to complain of their 'barbarisms.' His examination remains mostly in MS., but some extracts are given in the A. M. Z. for 1832 (p. 373), including 19 mortal errors in 36 bars, and showing how difficult it is even for a very clever composer to apprehend the ideas of one greater than himself.

Catherine II. received him with even greater marks of favour than Joseph, which he repaid by composing several important works for her own choir, and by bringing the Italian opera into a state of efficiency it had never attained before. Among his sacred compositions of this period may be mentioned an oratorio for two choirs, full orchestra, and band of Russian horns; a Te Deum for the taking of Otchakow by Potemkin; and a Requiem in honour of Louis

1 Thomas Overskou, 'Den danske Skueplads in dens Historie,' 8vo. Copenhagen, 1854—.

2 See Cherubini's preface to the Catalogue of his works.

3 Mozart, in 1791, wrote a final chorus for this, of which, however, nothing has survived but the 5 bars in his autograph catalogue. (See Köchel, 615.)

XVI. It was in the Te Deum that Sarti employed fireworks and the discharge of cannon to heighten the martial effect of the music. Among his operas produced at St. Petersburg were 'Armida' (1786), which had an immense success, and was sung to perfection by the celebrated Todi—and 'Olega,' the libretto of which was by the Empress herself. In this opera Sarti endeavoured to imitate the music of the ancient Greeks, and made use of some of their modes. A skilled mathematician and physicist, he was fond of explaining to the Empress his theories of acoustics, which he illustrated by many ingenious experiments. He invented a machine for counting the vibrations of sounds, and fixed 436 vibrations[1] for the A, as the normal pitch for his orchestra. For this invention he was elected an honorary member of the Academy of Science in St. Petersburg. Many other honours were conferred upon him, including those of councillor of the University, chief maître de chapelle to the court, and nobility of the 1st class. Todi's intrigues caused him temporary inconvenience, but he consoled himself for a short period of disgrace by going to a village in the Ukraine, given him by Prince Potemkin, and founding there a school of singing which turned out some remarkable singers. In 1793 the Empress restored him completely to favour, and placed him at the head of a Conservatoire planned after the model of those in Italy. After her death and that of her son Paul I., Sarti determined to revisit his native land, and in the spring of 1802 left Russia, where he had lived for 18 years without a break. At Berlin he formed an intimacy with the Court-capellmeister, Noël Mussini (born at Bergamo, 1765, died at Florence, 1837), who fell in love with his daughter Giuliana, and became his son-in-law.[2] Immediately after the marriage the kind and gentle Sarti, who was as absent as La Fontaine, fell seriously ill of gout, and died July 28, 1802, aged 73. He was buried in the Catholic church of St. Edwige, where his ashes still remain.

From some unexplained cause very few of Sarti's compositions have been engraved. His Te Deum was printed with Russian words at St. Petersburg, and Breitkopf & Härtel have published two of his sacred pieces, one in 8, the other in 6 real parts. A French translation of the 'Nozze di Dorina'—apparently the only opera of his that has been engraved—appeared in Paris, but Ricordi of Milan has copies of 'Armida e Rinaldo'; 'I finti Eredi'; 'Le Gelosie villane'; 'Nitteti,' and 'Vologeso.' These scores, as well as those of 'Adriano in Sciro,' 'Alessandro,' 'Gli Amanti consolati,' 'Castore e Polluce,' 'I Contratempi,' 'Didone abbandonata,' 'Erifile,' 'Fra due Litiganti,' 'Giulio Sabino,' 'Idalide,' 'Ifigenia,' 'Il Medonte,' 'Il Militare bizzarro,' 'Mitridate,' 'Le Nozze di Dorina,' and 'Scipione,' and also of nearly all his sacred works, are in the library of the Paris Conservatoire, from which circumstance the writer is able to pronounce upon his style. The part-writing is eminently vocal, and the most difficult combinations are mastered with ease, but the scientific element is never unduly forced into notice, owing to Sarti's gift of fresh and spontaneous melody. Most of his operas contain numbers well constructed with a view to stage effect, and full of expression and charm; indeed so much of his music might still be heard with pleasure that it seems strange that no great artist has attempted to revive it.

His masses alone retain their hold on public favour, and one was performed on Easter Day 1880 in Milan Cathedral, which still has all the MSS.

Sarti left six sonatas for the Clavier solo (London, 1762). An Allegro from these is included in Pauer's 'Alte Meister.' Cherubini quotes a 'Cum Sancto' à 8 of his in his 'Theory of Counterpoint'; and Fétis a Kyrie from the same mass in his treatise. Breitkopf has published a Fugue for 8 voices, a Hymn and a Miserere, and the overture to 'Ciro riconosciuto.' A Rondo for mezzo soprano will be found in Gevaert's 'Gloires d' Italie,' and a Cavatina from 'Giulio Sabino' in the 'Gemme d'Antichità.'

The Mussini family possess a fine oil painting of the composer, taken in 1786 by Tonci, an Italian painter settled in St. Petersburg. 'Le Chevalier Sarti,' a novel by P. Scudo, appeared first in the 'Revue des Deux Mondes,' and has since been published separately (Paris, Hachette, 1857). [G.C.]

SARTORETTI, a Mantuan lady who deserves to be rescued from oblivion for her conduct to Mozart when he visited Mantua in January 1770 as a boy of not quite 14. She invited him to dinner, sent him a dish containing a garland of choice flowers tied with red ribands, and in the midst of the ribands a medal worth four ducats, and a copy of verses by herself headed Al Signor Amadeo Wolfgango Mozart, Anacreontica. His hands were at the time severely chapped with the cold, and she gave him some pomade which quickly restored them. The verses are printed by Jahn in his Mozart, App. III. A, 6. [G.]

SARTORIS, Mrs., actress, singer, and friend of Mendelssohn's. She died Aug. 6, 1879. [See Kemble, Adelaide.] [W.H.H.]

SATANELLA, OR THE POWER OF LOVE. A 'New Original Romantic Opera,' in 4 acts; words by Harris and Falconer, music by Balfe. Produced at the National English Opera, Covent Garden (Pyne and Harrison), Dec. 20, 1858. The story is a version of the Diable boiteux. [G.]

SATURDAY CONCERTS, CRYSTAL PALACE. For these see vol. i. p. 422 *a*. They continue on the same footing as there described; and since that date (Oct. 1878) Brahms's Second Symphony, Academic and Tragic Overtures, and Violin Concerto; Raff's 'Im Walde,' 'Frühlingsklänge,' and 'Im Sommer,' Symphonies; Liszt's 'Ideale'; Rubinstein's 'Tower of Babel,'

[1] The 'diapason normale' of France at this moment fixes 435 vibrations for the same note.

[2] The articles on Sarti and Mussini in Fétis are full of errors and omissions. We have corrected the most glaring mistakes from family papers kindly furnished by the distinguished painter L. Mussini, director of the Museo at Siena, and grandson of the composer.

'Dramatic' Symphony, and PF. Concerto in G; Goetz's Symphony, PF. Concerto, Overtures; Bandini's 'Eleonore'; Smetana's 'Vltava'; Bizet's 'Roma'; Sullivan's 'Martyr of Antioch'; Cowen's Scandinavian Symphony; Schubert's 8 Symphonies in chronological order, and many other new works have been brought forward. [G.]

SATURDAY POPULAR CONCERTS, THE, the enterprise of the Messrs. Chappell, and held in St. James's Hall, London, at 3 on Saturday afternoons in winter and spring, are an offshoot of the MONDAY POPULAR CONCERTS. They began in 1865, when three performances were given, on March 11, 18, 25. This practice continued, with a gradual increase in the number, and an occasional extra concert before Christmas, till 1876-7, when the number was raised to seventeen, given between Nov. 11 and March 24 inclusive, in fact alternating with the Monday Popular Concerts through the season. In programmes and performances the two sets of concerts are alike. [G.]

SAUER & LEIDESDORF, a formerly-existing firm of music-publishers in Vienna. Schubert published the following works with them, beginning in 1823:—op. 20–30 (including the 'Schöne Müllerin' in 5 parts); 35, 40, 59, 69 (the overture only, for PF. 4 hands, as op. 52). Sauer then retired, and Leidesdorf continued the business alone, publishing for Schubert op. 92, 94, 108; and after his death 119 (Oct. 1829). Leidesdorf was a prolific writer of PF. pieces, much esteemed by amateurs. After the last-mentioned date he went to Florence, and died there Sept. 26, 1840.[1] His relations to Beethoven are mentioned under LEIDESDORF. [C.F.P.]

SAUL. An oratorio; words attributed both to Jennens and Morell, music by Handel. The composition was begun July 23, 1738. The 2nd act was completed Aug. 28, and the whole on Sept. 27, of the same year. First performance at the King's Theatre, Tuesday, Jan. 16, 1739; at Dublin, May 25, 1742. Revived by the Sacred Harmonic Society, March 20, 1840. The autograph is in the library at Buckingham Palace. The overture ('Sinfonia') is Handel's longest; it is in 4 movements, and the organ is largely employed in it as a solo instrument. There seems to have been some secret connexion between the organ and the oratorio, as it is more than once announced 'with several concertos on the organ.' The 'Dead March in Saul' (in C major) has been perhaps more widely played, and is more universally known than any other piece of music. [G.]

SAURET, EMILE, violinist, born at Dun le Roi, Cher, France, May 22, 1852, soon attracted the notice of De Bériot, and became his pupil, the last he ever had. He began to travel at an early age, playing in the chief towns of France and Italy, in Vienna and in London, where he made his first appearance at Alfred Mellon's Concerts, Covent Garden, in Aug. 1866. In 1872 he made his first visit with Strakosch to the United States, and his second in 1874, remaining there till Jan. 1876. In New York he made the acquaintance of von Bülow and Rubinstein, and on his return to Leipzig was welcomed by the latter, then engaged in the rehearsals of his 'Paradise Lost.' Sauret made his *début* in the Gewandhaus in May 1876 in Mendelssohn's Concerto, and was most warmly received. He however returned immediately to America, and it was not till he came back again in 1877, and went through Germany and Austria in two long and most successful tournées, that his reputation was established in his native country. He has played at the Gewandhaus every year since 1876, and is a great and desired favourite with that very critical audience. In Holland also he is well known. In England he reappeared in 1880, and played at the Crystal Palace, April 24, and Philharmonic (Bruch's Concerto No. 1) on the 28th.

Liszt has shown him much kindness, and they have often made music together. In 1879 Sauret married Miss Emma Hotter of Dusseldorf, and since that date has taken up his abode in Berlin, where he is teacher of the violin in Kullak's Academy.

His published works embrace a Concerto in G minor; a Ballade, a Legende; and a Serenade in G—all for solo violin and orchestra; Caprice de Concert in D; Scherzo fantastique; Valse-caprice; Barcarolle-mazurka, and many other drawing-room pieces, as well as transcriptions from Mendelssohn, Rubinstein, Wagner, etc. [G.]

SAUZAY, CHARLES EUGENE, an eminent French violinist, was born at Paris, July 14, 1809. In 1823 he entered the Conservatoire, and in his second year became the pupil of Baillot and of Reicha. He obtained the 2nd violin prize in 1825, the 1st do., and the second for fugue, in 1827. A few years later he joined Baillot's quartet, first as second violin and then as tenor, *vice* Urhan, married Mlle. Baillot, and continued one of her father's party till its dissolution in 1840. He soon rose rapidly both in society and as a professor. In 1840 he was made first violin to Louis Philippe, and afterwards leader of the second violins to the Emperor Napoleon III. In 1860 he succeeded Girard as professor at the Conservatoire. His own quartet party started after the termination of Baillot's, embracing his wife and Boely as pianists, Norblin and Franchomme; gave its concerts, sometimes with and sometimes without orchestra, in the Salle Pleyel. Sauzay is mentioned by Hiller as one of Mendelssohn's acquaintances during his stay in Paris in 1830. He was greatly sought after both as a player and a teacher. His publications are not important, and consist of incidental music to 'Georges Dandin' and 'Le Sicilien,' cleverly written in the style of Lully to suit the date of the pieces; fantasias and romances; a PF. trio; songs; 'Haydn, Mozart, Beethoven; Etude sur le quatuor' (Paris 1861), a disappointing work from the pen of a musician of so much eminence and experience; 'L'école de l'accompagnement' (Paris 1869), a sequel to the foregoing. He

[1] Not 1839, as stated in vol. ii. p. 114 a.

has now in the press a series of 'Etudes harmoniques' for the violin. [G.]

SAVART, Felix, a French philosopher, who distinguished himself by researches in acoustics. He was born at Mézières June 30, 1791, and was the son of a mathematical instrument maker of some repute. He at first practised medicine, but subsequently devoted himself in preference to general philosophical pursuits, obtained the post of professor at the College of France, and was admitted a member of the French Academy of Sciences in November 1827.

Following in the steps of Chladni, whose labours had particularly attracted his attention, he made many investigations in acoustics, which are recorded in the several publications bearing his name. He appears particularly to have thrown light on the nature of that complicated relation between a vibrating body which is the source of sound, and other bodies brought into connexion with it, by virtue of which the original sound is magnified in intensity and modified in quality; well-known examples of such an arrangement being furnished by the *soundboards* of the violin tribe and the pianoforte.

Savart's name is also connected with an ingenious little device for measuring, in a manner easily appreciable by a lecture-audience, the number of vibrations corresponding to a given musical note. A wheel, caused to rotate quickly by ordinary mechanical contrivances, is furnished on its circumference with teeth or ratchets, against which a tongue of pasteboard or some other elastic substance is brought into contact. The passage of each tooth gives a vibration to the tongue, and if the wheel revolve fast enough, the repetition of these vibrations will produce a musical sound. Hence, as the number of rotations of the wheel in a given time can be easily counted, the number of vibrations corresponding to the note produced can be experimentally ascertained, with tolerable precision. This mode of determining vibration-numbers has been since superseded by the more elegant instrument, the Syren, and by other modes known to modern acoustic physicists, but from the simplicity of its demonstrations it is still often used.

Savart also investigated with some attention and success the acoustical laws bearing on wind instruments, and on the production of the voice. He died in March 1841. [W.P.]

SAVILE, Jeremy, a composer of the middle of the 17th century, some of whose songs are included in 'Select Musicall Ayres and Dialogues,' 1653, is now only known by his 4-part song, 'The Waits,' printed in Playford's 'Musical Companion,' which, by long-standing custom is the last piece sung at the meetings of the Madrigal Society and similar bodies. [W.H.H.]

SAVOY. [See Old Hundredth, The.]

SAVOY CHAPEL ROYAL. At the present day commonly accepted as one of Her Majesty's Chapels Royal, the Savoy has a constitution differing widely from the chapels of St. James and Whitehall. While these are maintained out of the Civil List, the Savoy Chapel derives its sustenance from Her Majesty's Privy Purse, and thus in one respect has even greater claim to the appellation of Royal. The salient points in the history of the Savoy may be given in few words, which may tend to remove much prevailing misconception on the subject. In 1246 Henry III. made a grant of land on the banks of the Thames to his wife's uncle, Count Peter of Savoy, and a palatial residence was erected on the site. After Peter's death the estate came into the possession of Queen Eleanor, who bestowed it upon her son Edmund of Lancaster, and it remained in the possession of the Lancastrian branch of the royal family until 1381, when, owing to the unpopularity of John of Gaunt, the palace was wrecked by the insurgents under Wat Tyler. Under the provisions of the will of Henry VII., a hospital was founded there, but though richly endowed, it did not flourish, and the foulest abuses prevailed until 1702, when the institution was dissolved. The Chapel had been used from 1564 until 1717 by the parishioners of St. Mary's, but in 1773 George III. issued a patent constituting it a Chapel Royal, and its title is therefore beyond dispute. From time to time the reigning sovereigns contributed towards its maintenance, but the place attracted little general notice until 1864, when it was partially destroyed by fire. Restored from designs by Sir Sidney Smirke, at a cost to Her Majesty of about £7000, the Chapel was reopened for Divine Service on December 3, 1865. The peculiarity of the Services, as at present conducted, calls for some mention in this place. In the absence of any provision for the full choral rendering of the ritual, congregational singing is promoted to the fullest extent. The choir consists of boys only, and the psalms, canticles, hymns, etc., are sung strictly in unison. The chants and tunes are selected from every available source, the most worthy examples of the older school being utilised equally with modern compositions of sufficient melodic beauty to appeal to the vocal capabilities of a mixed congregation. The various Church Offices of Baptism, Confirmation, Matrimony, Burial of the Dead, etc., are never rendered at the Savoy without the musical additions suggested by the rubrics, and strangers to the Chapel who seek its ministrations are frequently surprised at the aid thus spontaneously given. The organ, at present incomplete, is by Willis. [H.F.F.]

SAX, Charles Joseph, a Belgian musical-instrument maker of the first rank, born at Dinant in Belgium, Feb. 1, 1791, died in Paris, April 26, 1865. He was first a cabinet-maker, then a mechanic in a spinning-machine factory, and then set up in Brussels as a maker of wind-instruments. He had served no apprenticeship to the trade, and his only qualification was that he could play the serpent; he was therefore obliged to investigate for himself the laws concerning the bore of instruments; but as he had great manual dexterity, and a turn for invention, he was soon able to produce serpents and flutes of fair quality. He

quickly attracted notice by his clarinets and bassoons, which gained him a medal at the Industrial Exhibition of 1820, and the title of musical-instrument maker to the court of the Netherlands, who also encouraged him by advancing him capital. In 1822 he began to make all kinds of wind-instruments, brass and wood, and in 1824 invented an 'omnitonic horn' which he continued to perfect till 1846. This instrument can be adjusted to any key by means of a piston sliding backwards or forwards on a graduated scale of about half an inch long, which sets the body of the instrument in communication with tubes of different lengths corresponding to all the major keys. On a separate elbow is a moveable register which the player fixes opposite the number of the key he wishes to use, and the tube of that key being at once brought into position, the instrument is played exactly like an ordinary horn. Sax also invented brass instruments producing every note in the scale, without crooks, pistons, or cylinders. He took out patents for a keyed harp, and a piano and a guitar on a new system, but his efforts were mainly directed to perfecting the clarinet, especially the bass clarinet, and discovering new methods of boring brass and wood wind-instruments with a view to make them more exactly in tune. His exertions were crowned with success, and he obtained gratifying distinctions at the Brussels Industrial Exhibition of 1835.

Charles Sax was the father of 11 children, of whom two sons were distinguished in the same line. The eldest of these,

Antoine Joseph, known as Adolphe Sax, born at Dinant Nov. 6, 1814, was brought up in his father's workshop, and as a child was remarkable for manual skill, and love of music. He entered the Brussels Conservatoire and studied the flute and clarinet,—the latter with Bender, who considered him one of his best pupils. Like his father his efforts were directed mainly to the improvement of that instrument, especially the bass clarinet, and he even designed a double-bass clarinet in B♭. In the course of his endeavours to improve the tune of his favourite instrument he invented an entire family of brass instruments with a new quality of tone, which he called Saxophones. The hope of making both fame and money led him to Paris; he arrived in 1842, and established himself in the Rue St. Georges, in small premises which he was afterwards forced to enlarge. He had no capital beyond his brains and fingers, which he used both as a manufacturer and an artist; but he had the active support of Berlioz, Halévy, and G. Kastner, and this soon procured him money, tools and workmen. He exhibited in the French Exhibition of 1844, and obtained a silver medal for his brass and wood wind-instruments, a great stimulus to a man who looked down upon all his rivals, and aimed not only at eclipsing them, but at securing the monopoly of furnishing musical instruments to the French army. In 1845 he took out a patent for the Saxhorn, a new kind of bugle, and for a family of cylinder instruments called Saxotrombas, intermediate between the Saxhorn and the cylinder trumpet. On June 22, 1846, he registered the Saxophone, which has remained his most important discovery. A man of such inventive power naturally excited much jealousy and ill-feeling among those whose business suffered from his discoveries, but his tact and wisdom made numerous and powerful friends, among others Général de Rumigny, Aide-de-camp to Louis Philippe, and a host of newspaper writers who were perpetually trumpeting his praises. He lost no opportunity of vaunting the superiority of his instruments over those in use in the French military bands, at a special competition held between the two; and the superiority, whether deserved or not, soon resulted in a monopoly, the first effect of which was to banish from the military bands all horns, oboes, and bassoons. Hence, outside the Conservatoire, there is no longer a supply of skilled performers on those classical and indispensable instruments, on which the various French orchestras may draw.

The Paris Industrial Exhibition of 1849, at which Sax obtained a gold medal, brought his three families of instruments still more into notice; and he received the Council Medal at the Great Exhibition of 1851. In spite of these merited honours, he became bankrupt in 1852. He soon, however, made an arrangement with his creditors, and on re-commmencing business entered for the Paris Exhibition of 1855, and gained another gold medal. When the pitch was reformed in 1859 every orchestra and military band in France had to procure new wind-instruments — an enormous advantage, by which any one else in Sax's place would have made a fortune; but with all his ability and shrewdness he was not a man of business, and his affairs became more and more hopelessly involved. There was full scope for his inventive faculties under the Second Empire, and he introduced various improvements into the different piston instruments, only one of which need be specified, viz. the substitution of a single ascending piston for the group of descending ones. This principle he adapted to both conical and cylindrical instruments. He also invented instruments with seven bells and six separate pistons; instruments with rotatory bells for altering the direction of the sound, and a host of smaller improvements and experiments, all detailed in Fétis's 'Rapports de l'Exposition' and 'Biographie Universelle.'

At the London International Exhibition of 1862, Sax exhibited cornets, saxhorns, and saxotrombas, with 3 pistons, and with 2, 3, 4, and 5 keys; and at Paris in 1867 he took the Grand Prix for specimens of all the instruments invented or improved by him. Since then his projects have been repeatedly before the public, but he has lost his powerful patrons and declined in prosperity year after year. He has been obliged to give up his vast establishment in the Rue St. Georges (No. 50) and to sell (Dec. 1877) his collection of musical instruments. The printed catalogue contains 467 items, and though not absolutely correct is interesting, especially for the view it

gives of the numerous infringements of his patents. The typical instruments of the collection were bought by the Museum of the Paris Conservatoire, the Musée Instrumental of Brussels, and M. Cesar Snoeck of Renaix, a wealthy Belgian collector.

Among the numerous works written to advertise the merits of Adolphe Sax's instruments we need only mention two—Comettant's 'Histoire d'un inventeur au XIXme Siècle' (Paris 1860, 552 pp. 8vo. with a fair likeness of Sax); and Pontécoulant's 'Organographie' (Paris 1861, 2 vols. 8vo).

Alphonse Sax, jun., worked with his brother for some years, and seems to have devoted his attention especially to ascending pistons. He set up for himself in the Rue d'Abbeville (No. 5 *bis*), but did not succeed. He published a pamphlet 'Gymnastique des poumons; la Musique instrumentale au point de vue de l'hygiène et la création des orchestres féminins' (Paris 1865), which is merely a disguised puff. [G.C.]

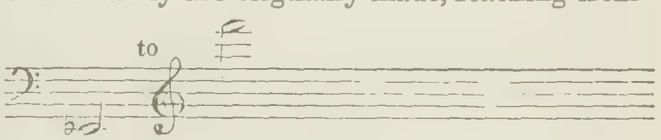
SAXHORN (*Saxtuba*, *Saxotromba*). The name given to a family of brass instruments with valves, invented by the late M. Sax.

'No one can be ignorant,' say the editors of the Method for Saxhorn and Saxo-tromba, 'of the deplorable state in which brass instruments were when M. Sax's method made its appearance. No coherence, no unity between the individual members of the group; in one case keys, in another valves; a small compass, an imperfect scale, lack of accurate intonation throughout, bad quality of tone, variations of fingering requiring fresh study in passing from one instrument to another. The keyed bugle, built on false proportions, offered no prospect of improvement; the mechanism of the valves themselves, by their abrupt angles, deteriorated the quality of tone; and the absence of intermediate instruments caused gaps in the general scale, and at times false combinations.'

Sax's first advice to players exhibits the power of his new instruments—that namely of playing in every key without using 'crooks,' as in the French-horn and Trumpet. [See Horn.] He also attacked the problem of true intonation in valve instruments, by means of what he terms a compensator. Besides these improvements he planned all the tubes and mechanism on a far sounder acoustical basis than had been attempted in the fortuitous and disconnected contrivances of former periods. The valve or piston was indeed known, but was open to the objection stated above, and was at best but a clumsy machine. He unquestionably simplified it by causing fewer turns and corners to interfere with the free course of the vibrating column of air. It is to be noted, however, that all the instruments of the Sax family, like the ordinary cornet-à-pistons, utilise the harmonic octave below that in which the trumpet and French horn speak, and thus obtain power and facility somewhat at the expense of quality.

Six or even more instruments of different size compose the Sax family, the chief of these being the soprano in F, E♭, or D, the contralto in C and B♭, the tenor in F and E♭, the barytone in C and B♭, the bass in F and E♭, and the contrabass, or circular bass, in B♭. Several of these are known under special names; the tenor for instance as the Althorn; the smaller bored Barytone under that appellation; the larger bored of similar pitch as the Euphonium; the bass or double bass as the Bombardon or Contra Bombardon.

There can be no doubt that the inventor of the Saxhorn added greatly to the compass, richness, and flexibility of the military brass and reed bands. But it is a question whether the tone of these powerful auxiliaries blends so well with the stringed instruments as that of the trumpet, French horn, and trombone—and hence their comparative neglect. The compass of all the Saxhorns is very large, but especially that of the Euphonium, amounting, according to Sax's own statement, to more than five octaves. This is increased by the numerous keys in which the various members of the family are originally made, reaching from



These instruments are furnished with 3, 4, or even 5 valves, as already described. [See Euphonium; Piston.]

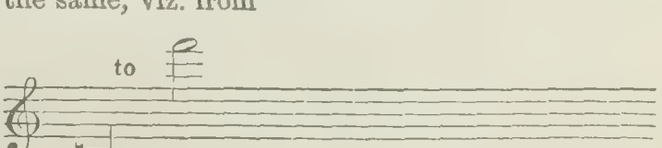
It has been already said that their chief use is in military music. For the reasons given they are easy to play on the march, or even on horse-back, where an oboe or a contrafagotto would be impossible. But, in the orchestra, only the euphonium and the bombardon in E♭, much patronised by Wagner in his pompous marches, and other parade music, have held their ground. [W.H.S.]

SAXOPHONE. Another instrument invented by Sax. It consists essentially of a conical brass tube furnished with twenty lateral orifices covered by keys, and with six studs or finger-plates for the first three fingers of either hand, and is played by means of a mouthpiece and single reed of the clarinet kind.

Like the Saxhorns, it is made in a number of sizes, representing in all seven different keys; namely, the sopranino in C and B♭; the soprano in F and E♭; the mezzo soprano in C and B♭; the contralto in F and E♭; the barytone in C and E♭; the bass in F and E♭, and the double bass or bourdon in C and B♭. The last of these can be played with a double-bassoon reed.

Those most used are the contralto and barytone varieties. In French military bands, however, five or more are in use; having to a great degree superseded the more difficult but more flexible clarinet, and having quite replaced the bassoon.

The compass of the five highest Saxophones is the same, viz. from



with all the chromatic intervals. The bass and double bass ones descend to the C below the bass

stave, and reach upwards to the same F as the rest of the family. In the former case the scale is of 19 notes, in the latter of 18, or of 31 or 30 semitones in all. The fingering adopted is the same for all, being that somewhat erroneously named after Boehm. [See FLUTE; CLARINET.]

The Saxophone, though inferior in compass, quality, and power of articulation to the clarinet, and bassethorn, and especially to the bassoon, has great value in military combinations. It reproduces on a magnified scale something of the violoncello quality, and gives great sustaining power to the full chorus of brass instruments, by introducing a mass of harmonic overtones very wanting in Sax's other contrivance. In the orchestra, except to replace the bass clarinet, it is all but unknown. [W.H.S.]

SAYNÈTE. A Spanish term for a little comic intermezzo for the theatre. Littré connects the word with *sain* or *sain-doux*, fat; in which case it answers to the vulgar English expression 'a bit of fat,' meaning something extra enjoyable. [G.]

SCALA, LA. The proprietors of the Ducal Theatre of Milan, which was burnt in 1776, obtained, by a decree of July 15, 1776, from the Empress Maria Theresa of Austria, leave to build a new opera-house on the site of the church of S. Maria della Scala. The celebrated architect, Piermarini of Foligno, made the designs, and it was inaugurated Aug. 3, 1778. The building was not only the grandest theatre then existing in Europe, but the most artistically beautiful and complete. Levati and Reina painted the ceiling, the boxes, and the great hall, or ridotto; and the curtain, representing Parnassus, was the work of Riccardi. The cost of the whole amounted to one million lire (£40,000), an enormous sum for that time. Until 1857 the principal entrance of La Scala was from a bye-street, but since that date it opens on to a large and beautiful piazza, or square.

The interior of the house is in the horseshoe form, with five tiers of boxes and a gallery above them, all in white, relieved by gilded ornaments. The lowest three tiers have each 36 boxes, and a royal box above the entrance to the stalls. The fourth and fifth tiers have each 39 boxes, and there are four on each side of the proscenium, making a total of 194 boxes, besides the large royal box and the gallery, each box having a private room at its back for the convenience of its occupants.

The length of the whole building is 330 ft., and its width 122 ft. The height from the floor to the ceiling is 65 ft. The stage, with the proscenium, is 145 ft. long and 54 wide between the columns of the proscenium, but is 98 ft. wide further behind. The ridotto, a large hall for promenading between the acts, is 82 ft. long and 30 ft. wide. The house holds 620 stalls, and in place of a pit there is standing-room for 600 persons. The boxes can accommodate 1900 spectators, and the gallery 500 more; so that the total capacity of the house for operatic representations is 3,600. But the same theatre, when changed into a ball-room, can contain more than 7000 persons. This immense institution permanently employs 922 persons on its staff, distributed in the following way:—Artist-singers, 20; orchestra, 100; band, 28; choristers, 110; 'comparse,' 120; ballet, 140; dressmakers and tailors, 150; doctors, 6; servants, 36, etc.

The gentlemen who provided the funds for the building of La Scala enjoy the use of its boxes at a nominal rental whenever the theatre is open, each box having its owner. In all other respects the theatre has been the property of the town of Milan since 1872. The municipality grants to its lessee an annual sum of £9,800, and the owners of the boxes pay £2,920; and thus La Scala enjoys an endowment of £12,720 a year. The theatre is controlled by a Commission elected by the Common Council of Milan and the owners of its boxes.

Annexed to the theatre is a celebrated dancing school, with 60 pupils, where the most famous ballet-dancers have been trained, and a singing school for about 50 choristers. Two charitable institutions—*I Filarmonici*, founded by Marchesi in 1783, and the *Teatrale*, by Modrone in 1829—are also dependent for their income upon the greatest theatre of Italy.

The theatre has undergone no fundamental change since its erection, except occasional necessary restorations, the latest of which took place in 1878, when it was regilt throughout, statutes erected to Rossini and Donizetti, etc.

If La Scala boasts of being the largest and most beautiful theatre of Italy, it has also the honour of having produced on its stage the largest number of new and successful operas and of great singers. We shall only mention here the most successful operas and ballets which, being written expressly for that stage, were first performed there; remembering that as the theatre has been open every year for 103 years, many other operas were given with varying success.

Year.	*Title of Work.*	*Composer.*
1778	Europa riconosciuta	Salieri.
1787	Il Vecchio geloso	Alessandri.
1784	I due supposti Conti	Cimarosa.
1787	Ifigenia in Aulide	Zingarelli.
1791	Le Morte di Cesare	Do.
1792	Pirro, Re di Epiro	Do.
,,	Il Mercato di Monfregoso	Do.
1793	La Secchia rapita	Do.
1794	Artaserse	Do.
1796	Giulietta e Romeo	Do.
1801	Baccanali di Roma	Nicolini.
1807	Adelasia ed Abramo	Mayr.
1808	Il rivale di se stesso	Weigl.
1812	La vedova *stravagante*	Generali.
,,	La Pietra del Paragone	Rossini.
1814	Aureliano in Palmira	Do.
,,	Il Turco in Italia	Do.
1817	La Gazza ladra	Do.
1820	Margherita d'Anjou	Meyerbeer.
1821	Elisa e Claudio	Mercadante.

1880	Il Figliuol prodigo.	Do.

La Scala has always been renowned for its splendid and gorgeous ballets, amongst which were most successful—

1778	I Prigionieri di Cipro	Salieri.
1787	I due Avari	Ricci.
1797	Il General Colli in Roma	Lefèvre.
1807	Enea e Turno	Gallet.
1809	Cesare in Egitto	Gioia.
1812	Gli Strelitzi	Vigano.
1820	La Conquista di Malacca	S. Taglioni.
1833	Guglielmo Tell	Henry.
1845	Esmeralda	Pugni.
1854	Un fallo	Giorza.
1856	Shakespeare	Do.
1865	Flik e Flok	Hertel.
1864	Velleda	Dall 'Argine.
1867	Sardanapalo	Hertel.
1881	Excelsior.	Marenco.

We should unduly prolong this article were we to mention the names of all the great artists who have gained their merited applause on the boards of La Scala. It is sufficient to state that few great artists can be found within the last hundred years who have not deemed it an honour and a duty to appear on that celebrated stage, and win the approval of the Milanese public. Further information may be obtained from the 'Teatro alla Scala 1778–1862,' by Luigi Romani (Milan, 1862); and the 'Reali Teatri di Milano' by Cambiasi (Ricordi, Milan, 1881).

Besides La Scala, Milan boasts of several other theatres, where operas are performed either exclusively, or at certain seasons of the year, instead of dramas. These theatres are, La Canobbiana, Il Carcano, Dal Verme, Santa Redegonda, Re Nuovo, and Fossati. At the Filodrammatici and San Simone are given amateur performances of operatic and orchestral music, to which admission is obtained only by invitation. The Milanese Società del Quartetto has obtained great reputation for its masterly performances of classical music, especially in recent years. [L.R.]

SCALCHI, Sofia, was born Nov. 29, 1850, at Turin; received instruction in singing from Augusta Boccabadati, and made her début at Mantua in 1866 as Ulrica in 'Un Ballo in Maschera.' She afterwards sang at Verona, Bologna, Faenza, Nice, etc., and in England for the first time Sept. 16, 1868, at the Promenade Concerts, Agricultural Hall, with very great success. At the Royal Italian Opera, Covent Garden, she first appeared Nov. 5 of the same year, as Azucena, and after that as Pierrotto (Linda), Urbano, Un Caprajo (Dinorah), etc. She is a great favourite at that theatre, and has remained there until the present time. Her voice is of fine quality and of the compass of two octaves and a half from low F to B in alt, enabling her to take both the mezzo-soprano and contralto parts. She is also a fair actress. In Sept. 1875 she married Signor Lolli, a gentleman of Ferrara. Among her répertoire may be named Leonora (Favorita), which she played July 19, 1871, at Mario's farewell appearance; Estelle in Campana's Esmeralda, June 14, 1870; Leonora in Cimarosa's 'Le Astuzie feminili,' July 15, 1871, Meala in Massé's 'Paul et Virginie,' June 1, 1878; Mrs. Page, July 14, 77; and Fides, June 24, 78, on the respective revivals of Nicolai's Lustige Weiber, and of Le Prophète; also Arsace, Amneris, Maffeo Orsini, Siebel, etc. She has had frequent engagements in Italy, St. Petersburg, Moscow, Vienna, etc. [A.C.]

SCALE (from the Latin *Scala*, a staircase or ladder; Fr. *Gamme*; Ger. *Tonleiter*, i.e. sound-ladder; Ital. *Scala*). A term denoting the series of sounds used in musical compositions.

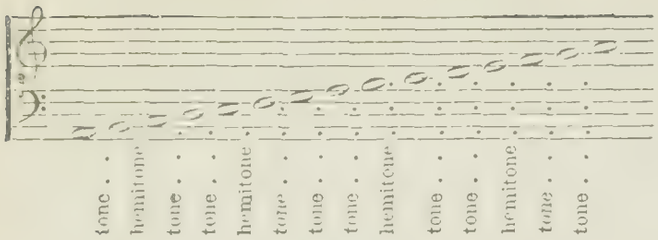
The number of musical sounds producible, all differing in pitch, is theoretically infinite, and is practically very large; so that in a single octave a sensitive ear may distinguish 50 to 100 different notes. But if we were to take a number of these at random, or if we were to slide by a continuous transition from one sound to another considerably distant from it, we should not make what we call music. In order to do this we must use only a certain small number of sounds, forming a determinate series, and differing from each other by well-defined steps or degrees. Such a series or succession of sounds is called a *scale*, from its analogy with the steps of a ladder.

It is unnecessary here to enter into the æsthetical reason for this;[1] it must suffice to state that all nations, at all times, who have made music, have agreed in adopting such a selection, although they have not always selected the same series of sounds. As a first step towards the selection all musical peoples appear to have appreciated the intimate natural relation between sounds which lie at that distance apart called an *octave*; and hence replicates of notes in octaves are found to form parts of all musical scales. The differences lie in the intermediate steps, or the various ways in which the main interval of the octave has been substituted.

For modern European music, in ascending from any note to its octave above, we employ, normally, a series of seven steps of unequal height, called the *diatonic* scale, with the power of interposing, accidentally, certain intermediate *chromatic* steps in addition. The diatonic scale is of Greek origin, having been introduced about the middle of the sixth century B.C. The main divisions of the octave were at the intervals called the fifth and the fourth, and the subdivisions were formed by means of two smaller divisions called a *tone* and a *hemitone* respectively. The tone was equal to the distance between the fourth and the fifth, and the hemitone was equal to a fourth *minus* two tones. The octave was made up of five tones and two hemitones, and the entire Greek diatonic scale of two octaves, as settled by Pythagoras, may be accurately represented in modern notation as follows:—

[1] More complete information on the subject generally may be found in Helmholtz's 'Tonempfindungen,' or in 'The Philosophy of Music,' by W. Pole (London, 1879).

The Greek Diatonic Scale.



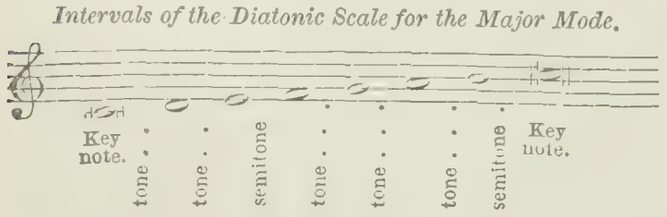
Thus the essence of the diatonic scale was that it consisted of *tones,* in groups of two and three alternately, each group being separated by a *hemitone* from the adjoining one ; and, combining consecutive intervals, any two tones with a hemitone would form a *fourth,* any three tones with a hemitone would form a *fifth,* and any complete cycle of five tones with two hemitones, would form a perfect *octave.*

Now it is obvious that in this series of notes, proved to be in use above two thousand years ago, we have essentially our diatonic scale ; the series corresponding in fact with the natural or white keys of our modern organ or pianoforte. And as this series formed the basis of the melodies of the Greeks, so it forms the basis of the tunes of the present day.

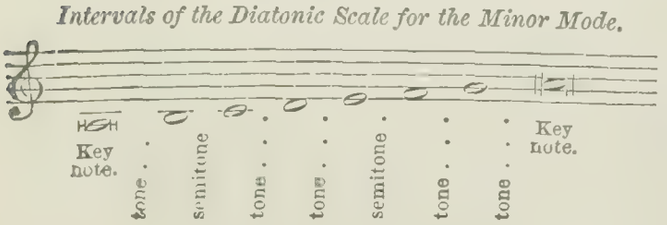
Although, however, the general aspect of the diatonic series of musical sounds remains unaltered, it has been considerably affected in its mode of application by two modern elements—namely, *Tonality* and *Harmony.*

First, a glance at the Greek scale will show that there are seven different diatonic ways in which an octave may be divided; thus, from A to the A above will exhibit one way, from B to B another, from C to C a third, and so on—keeping to the white keys alone in each case; and all these various 'forms of the octave' as they were called, were understood and used in the Greek music, and formed different 'modes.' In modern times we adopt only two — one corresponding with C to C, which we call the *Major* mode, the other corresponding with A to A, which we call the *Minor* mode. And in each case we attach great importance to the notes forming the extremities of the octave series, either of which we call the *Tonic* or *Keynote.* We have, therefore, in modern music, the two following 'forms of the octave' in common use. And we may substitute for the Greek word 'hemitone' the modern term 'semitone,' which means the same thing.

Intervals of the Diatonic Scale for the Major Mode.



Intervals of the Diatonic Scale for the Minor Mode.

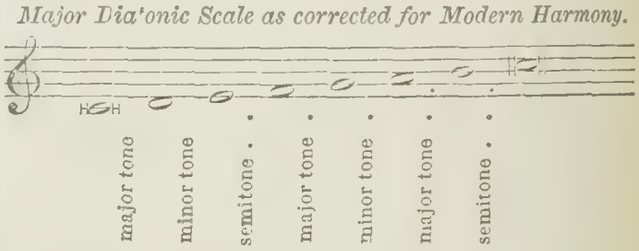


Although these differ materially from each other, it will be seen that the original Greek diatonic form of the series is in each perfectly preserved. It must be explained that the minor scale is given, under particular circumstances, certain accidental variations [see ASCENDING SCALE], but these are of a chromatic nature; the normal minor diatonic form is as here shown. The choice of particular forms of the octave, and the more prominent character given to their limiting notes, constitute the important feature of modern music called Tonality.

Secondly, a certain influence has been exercised on the diatonic scale by modern Harmony. When it became the practice to sound several notes of the scale simultaneously, it was found that some of the intervals of the Greek series did not adapt themselves well to the combination. This was particularly the case with the interval of the major third, C to E: according to the Greek system this consisted of two tones, but the perfect harmonious relation required to be a little flatter. The correction was effected in a very simple manner by making a slight variation in the value of one of the tones, which necessitated also a slight alteration in the value of the semitone. Other small errors have been corrected in a similar way, so as to make the whole conform to the principle, *that every note of the scale must have,* as far as possible, *concordant harmonious relations to other notes;* and in determining these, the relations to the tonic or keynote are the more important.

The diatonic series, as thus corrected, is as follows:—

Major Dia'onic Scale as corrected for Modern Harmony.



The several intervals, reckoned upwards from the lower keynote, are—

C to D, Major tone,
„ E, Major third,
„ F, Perfect Fourth,
„ G, Perfect Fifth,
„ A, Major sixth,
„ B, Major seventh,
„ C, Octave.

It has been stated, however, that for modern European music, we have the power of adding, to the seven sounds of the diatonic scale, certain other intermediate *chromatic* notes. Thus between C and D we may add two notes called C♯ and D♭. Between G and A we may add G♯ and A♭, and so on. In order to determine what the exact pitch of these notes should be, it is necessary to consider that they may be used for two quite distinct purposes, *i.e.* either to embellish melody without change of key, or to introduce new diatonic scales by modulation. In the former case the pitch of the chromatic notes is

indeterminate, and depends on the taste of the performer; but for the second use it is obvious that the new note must be given its correct harmonic position according to the scale it belongs to: in fact it loses its chromatic character, and becomes strictly diatonic. For example, if an F♯ be introduced, determining the new diatonic scale of G, it must be a true major third above D, in the same way that in the scale of C, B is a major third above G. In this manner any other chromatic notes may be located, always adhering to the same general principle that they must bear concordant harmonic relations to other notes in the diatonic scale they form part of.

Proceeding in this way we should obtain a number of chromatic notes forming a considerable addition to the diatonic scale. For example, in order to provide for eleven keys, all in common use, we should get ten chromatic notes in addition to the seven diatonic ones, making seventeen in all, within the compass of a single octave. This multiplication of notes would produce such a troublesome complication in practical music, that in order to get rid of it there has been adopted an ingenious process of *compromising*, which simplifies enormously the construction of the scale, particularly in its chromatic parts. In the first place it is found that the distance between the diatonic notes E and F, and between B and C is *nearly* half that between C and D, or G and A; and secondly, it is known that the adjacent chromatic notes C♯ and D♭, G♯ and A♭, etc., are not very different from each other. Putting all these things together, it follows that if the octave be divided into *twelve equal parts*, a set of notes will be produced not much differing in pitch from the true ones, and with the property of being *applicable to all keys alike*. Hence has arisen the modern chromatic scale, according to what is called *equal temperament*, and as represented on the keyboard of the ordinary pianoforte. According to this, the musical scale consists of twelve *semitones*, each equal to a twelfth part of an octave; two of these are taken for the *tone* of the diatonic scale, being a very little less in value than the original major tone of the Greek divisions.

This duodecimal division of the octave was known to the Greeks, but its modern revival, which dates about the sixteenth century, has been one of the happiest and most ingenious simplifications ever known in the history of music, and has had the effect of advancing the art to an incalculable extent. Its defect is that certain harmonic combinations produced by its notes are slightly imperfect and lose the satisfactory effect produced by harmonies perfectly in tune. The nature and extent of this defect, and the means adopted to remedy it will be more properly explained under the article TEMPERAMENT, which see. [W.P.]

SCARAMUCCIA, UN' AVVENTURA DI. A comic opera in 3 acts; libretto by F. Romani, music by L. Ricci. Produced at the Scala, Milan, Sept. 6, 1834, with great success. In French (by Forges), 'Une aventure de Scaramouche,' Versailles, June 1842; and in Italian, Théâtre des Italiens, Feb. 26, 1846. [G.]

SCARIA, EMIL, born in 1838 at Gratz, Styria, studied at the Conservatorium, Vienna, under Gentiluomo, made his début at Pesth as St. Bris in 'The Huguenots,' and afterwards sang at Brunn and Frankfort. In 1860 he came to London for the purpose of further study under Garcia, where he was heard by Abt, who procured him an engagement in 1862 at Dessau. He next played at Leipzig, and from 1865 to 72 at Dresden. Among his best parts were Hercules (Alceste), Sarastro, Leporello, Caspar, Rocco, Landgrave (Tannhäuser), Pogner (Meistersinger) Burgomaster (Czaar und Zimmermann), Dulcamara, Geronimo (Il Matrimonio segreto), and Falstaff, in which last a critic remarks that he made one of his greatest successes . . . . when he was at Dresden, and made it in great measure by his really excellent acting of the character. From 1872 till now (1881) he has been engaged at Vienna, where he has established his reputation as a versatile singer and actor in both baritone and bass parts, but best in the latter, as his 'carefully deadened high notes form so great a contrast to the vigorous notes of his lower and middle register' (Hanslick). Among his more recent parts are Hans Sachs (Meistersinger) Wotan (Nibelungen)—for which character he was originally selected by Wagner for Bayreuth—Micheli (Wasserträger) Escamillo, Marcel, Bertram, and (1879) Seneschal (Jean de Paris). He has played in the principal German and Austrian cities, also in Italian opera at St. Petersburg. [A.C.]

SCARLATTI, ALESSANDRO, a musician of great importance, and the creator of modern opera. Of his early life nothing is known beyond what may be gathered from his tombstone[1] in the St. Cæcilia chapel of the Church of Monte Santo in Naples:

HEIC SITVS EST
EQVES ALEXANDER SCARLACTVS
VIR MODERATIONE BENEFICENTIA
PIETATE INSIGNIS
MVSICES INSTAVRATOR MAXIMVS
QVI SOLIDIS VETERVM NVMERIS
NOVA AC MIRA SVAVITATE
MOLLITIS
ANTIQVITATI GLORIAM POSTERITATI
IMITANDI SPEM ADEMIT
OPTIMATIBVS REGIBVSQ
APPRIME CARVS
TANDEM ANNOS NATVM LXVI EXTINXIT
SVMMO CVM ITALIAE DOLORE
IX KAL^{AS} NOVEMB^{EIS} CIↃIↃCCXXV
MORS MODIS FLECTI NESCIA

[1] For a facsimile of this inscription, now first correctly published, and differing much from the transcriptions of Fétis, Villarosa, and Florimo, we are indebted to Dr. Dohrn, chief of the Royal Aquarium, Naples. We have also to thank Sig. Minervini, Mad. Zampini-Salazaro, and Mr. Wreford for kind services in reference to it. [G.]

From a Maltese cross engraved at the foot of the inscription it may be supposed that he was a Knight of the order of Malta.

Since 'ix. Kal. Novembris CIↃIↃCCXXV' means Oct. 24, 1725, it follows that Scarlatti was born in 1659, and we learn from the score of 'Pompeo' (in the possession of Gaspare Selvaggio, and also verified by Florimo) that his birthplace was Trapani in Sicily. As to his musical education, some maintain, though without citing any authority, that he studied in Parma, while others declare that he was a pupil of Carissimi (born 1604) in Rome. The eminent antiquarian Villarosa ('Memorie dei compositori . . . del regno di Napoli') states (without quoting his authority) that when Scarlatti moved with his family to Naples he was a celebrated singer and player on the harp and harpsichord. The first ascertained fact in his life is that he was commissioned to compose for Christina, Queen of Sweden, an opera 'L' Onestà nell' amore' performed in 1680 at her palace in Rome, and it is a probable inference that he was even at that time a composer of some mark. Cramer's 'Musikalisches Magazin' (2nd year, 668) states that he composed an opera for Munich in the same year, an assertion which, like many others concerning Scarlatti, has been copied without verification from one book to another. Fétis doubted the fact, and it has been completely disproved by Rudhart ('Geschichte der Oper am Hofe zu München'). The court of Bavaria had at that time as representative in Rome an Abbé Scarlatti, whose name occurs frequently in the accounts as receiving large sums of money. At a brilliant *fête* given by this Abbé Scarlatti (Pére Ménétrier's 'Representations en musique,' 252) on Aug. 22, 1680, at the Vigna della Pariola near Rome, 'La Baviera trionfante, componimento per musica' was performed, a fact which has given rise to a series of misstatements, originating with Lipowsky, who in his 'National Garde Jahrbuch' (1814) cites the Abbé as Alessandro Scarlatti, and changes the locality to Munich, though he states in his 'Bayrisches Musiklexicon' that no opera of Scarlatti's was produced in Munich before 1721. 'Pompeo' was performed at the royal palace at Naples, Jan. 30, 1684 (Fétis's copy is dated 1683), and on the libretto Scarlatti is styled Maestro di capella to the Queen of Sweden. In 1693 he composed an oratorio 'I dolori di Maria sempre Vergine' for the Congregazione dei sette Dolori di San Luigi di Palazzo in Rome, and an opera, 'Teodora,'[1] in which may be found many airs having the first part Da capo after the second, a practice logically and musically correct, and, according to Kiesewetter first brought into general use by Scarlatti, though instances of it do occur before his time. In 'Teodora' we find also the first orchestral ritornel, and the germ of the 'recitativo obligato,' with the entire orchestra employed to accompany the recitative. Violins, violas, and basses formed the groundwork of his orchestra, with oboes and flutes (seldom found together, though an instance occurs in 'Tigrane'), horns, bassoons, trumpets, and drums. Queen Christina died in 1688, and in 1694 Scarlatti was maestro di capella to the Viceroy of Naples, as we learn from the libretto of Legrenzi's opera 'Odoacre' to which Scarlatti added some songs for a performance at San Bartolomeo (Jan. 5, 1694) stating in the preface with commendable modesty that the airs thus added are distinguished by an asterisk, 'for fear of damaging Legrenzi's reputation, which was to him an object of boundless respect.' Other operas were 'Pirrho e Demetrio' (1697), 'Il Prigionero fortunato' (1698), and 'Laodicea e Berenice' (1701), which added enormously to his fame, and in which there was a tenor solo with an obligato violin accompaniment, played by Corelli, but with so little success that Scarlatti afterwards substituted another air for it. On Dec. 31, 1703, he became assistant maestro di capella to Antonio Foggia at Santa Maria Maggiore in Rome, and succeeded to the chief post May 1707. Cardinal Ottoboni also took him up, and made him his private maestro di capella, as we learn from the libretto of his 'Trionfo della Libertà' (Venice 1707). Soon after this he received the order of the Golden Spur.[2] He resigned Santa Maria Maggiore in 1709, returned to Naples, and died Oct. 24, 1725.

Scarlatti's fertility was enormous. 'Tigrane' (1715) is called on the libretto his 106th opera, and there were in all 115, of which only 41 are extant, including, besides those already mentioned :—

Il Prigionero superbo (Naples); Equivoche nel sembiante; Eraclea (with all the instruments mentioned, except drums, 1700; score in the Fétis Collection, Brussels); Nozze col nemico; Mitridate; Il Figlio delle selve (1702); La Caduta dei Decemviri (1706); Il Medo (1708, much praised by Fétis); Martirio di Santa Cecilia (Rome) and Teodosio (Naples 1709); *Ciro riconosciuto* (Rome 1712); Porsenna, with Lotti (San Bartolomeo, Naples, 1713); Scipione nelle Spagne, Amor generoso, and Arminio (Naples 1714); Carlo Re d'Allemania, and Virtu trionfante dell' odio e dell' amore (1716); Trionfo dell' Onore Fiorentini, and Telemacco (Naples and Rome 1718) interesting for its comic intermezzo in the Neapolitan dialect; Tersites; Attilio Regolo, and Cambisio (1719), also with comic intermezzo; Tito Sempronio Gracco, with ballets, and Turno Aricinio (1720); Principessa fedele, and Griselda (Rome 1721); Didone abbandonata (1721).

Undated:—Amor volubile e tiranno (in the Paris Conservatoire); Olitorio; Massimo Puppieno; Non tutto male vien per nuocere, and Amazone guerriera (Monte Cassino); Diana ed Endimione; La Merope (Real Collegio, Naples).

No less prolific as a composer of church-music, he left over 200 masses, of which few have survived. Jommelli pronounced his masses and motets the best he knew in the concertante style, and Hauptmann[3] in regard to them happily compares him and Palestrina as Virgil and Homer. His secular cantatas were equally numerous. Burney saw the original MSS. of 35, each composed in a single day during a visit at Tivoli in the autumn of 1704 to Andrea Adami (da Bolsena), then a well-known singer in the Pope's choir; and a Neapolitan amateur told Quantz in 1725 that he possessed 400. His other works were :—

1 Abramo Basevi, of Florence, has a contemporaneous copy.

2 Also bestowed on Gluck and Mozart.

3 Letters to Hauser, i. 137.

Oratorios.—Dolori di Maria; Sacrifizio d'Abramo (Burney gives a Cavatina therefrom, History, iv. 121); Martirio di Santa Teodosia (Paris, Bibliothèque Nationale); Concezzioni della beata Vergine; Sposa dei sagri cantici; San Filippo di Neri (Rome 1718); Vergine addolorata (Naples 1722); Stabat Mater, à 4 (Rome 1723); ditto à 2; Passio sec. Johannem.

Church Music.—Several Masses in the archives of the Real Collegio, Naples, including one à 10 voci, for 2 choirs, violin, and organ. Also Concerti Sacri, for 1, 2, 3, and 4 voices (Roger, Amsterdam), now in the Fétis Collection; Psalms—'Ave Regina,' and 'Laudate,' once in Abbate Santini's possession; and a Miserere, composed for the Pope's Choir in 1680.

Secular Music.—Madrigals for various voices (Padre Martini gives one for 2 soprani and 2 contralti in his 'Esemplare di Contrapunto fugato'); Serenate à 4 for the baptism of the Prince of Sicily (1723, Monte Cassino); Duette (14 Nos.), and Cantatas (8 vols.) are in the Bibliothèque Nationale Paris.

Scarlatti became in process of time teacher at three of the Naples Conservatorios—San Onofrio, I Poveri, and Loreto. Among his numerous pupils were—Logroscino, Hasse, Leo, Durante, Carapello, Greco, Gizzi, Abos, Feo, Porpora, Sarri, and Contumacci.[1] An idea of his skill in teaching may be gathered from a pamphlet, unfortunately circulated in MS. only, 'Discorso di musica sopra un caso particolare in arte del Sig. Cav. Alessandro Scarlatti, maestro della real capella di Napoli' (1717, 28 pp. folio with 17 of music), in which he gave judgment on a dispute referred to his arbitration, between two Spanish musicians about a striking dissonance employed by one of them.

Maier published (Schlesinger, Berlin) a comic duet from 'Laodicea e Berenice,' and, besides those already given there are at Monte Cassino 'Serenata à 3, Venere, Adoni, Amore'; Serenata à 3, with instruments, for the opening of a theatre at Posilippo (1696); 'Genio di Partenone' (Matteo Sassoni); 'Gloria di Sebeto' (Vittoria Bombare); 'Piacere di Mergellina' (Domenico l'Aquilano); 'Massimo Puppieno,' opera, 3 acts; 'Scipione nelle Spagne,' 1st act; and 'Porsenna' 2nd act, recitatives by Antonio Lotti. '36 Ariettas for a single voice, with a Thorough Bass for the Harpsichord,' were published in London about 1750.

Large portions of a mass by Scarlatti are given by Rochlitz in his 2nd vol. Another was printed entire by Proske (Ratisbon, 1841); a 'Lætatus' and an 'Exultate' are given in Proske's 'Musica Divina'; and a 'Tu es Petrus' for 8 voices (characterised by Hauptmann as 'very grand, as if hewn in stone') in Commer's 'Musica Sacra,' iii. 96. His instrumental music remains almost entirely unpublished. A Fugue in F minor is given by Pauer in his 'Alte Klaviermusik.'

His portrait, after Solimena, may be found in the 'Biographia degli Uomini illustri del Regno di Napoli' (1810). [F.G.]

SCARLATTI, Domenico, or, according to[2] Quadrio, Girolamo, son of Alessandro, born apparently in Naples, 1683, first learned from his father, and later from Gasparini. He has been called a pupil of Bernardo Pasquini, but that seems most improbable, seeing that Pasquini was of the school of Palestrina, and wrote entirely in the contrapuntal style, whereas Domenico Scarlatti's chief interest is that he was the first composer who studied the peculiar characteristics of the free style of the harpsichord. His bold style was by no means appreciated in Italy, for Burney remarks ('State of Music in France and Italy') that the harpsichord was so little played that it had not affected the organ, which was still played in the grand old traditional style. The first work on which Domenico is known to have been engaged was that of remodelling for Naples, in 1704, Polaroli's opera 'Irene' (Venice 1695). In 1710 he composed for the private theatre of Maria Casimira, Queen Dowager of Poland, a *dramma pastorale* 'Sylvia' (libretto in the Paris Bibliothèque Nationale), which was followed by 'Orlando' (1711), 'Fatide in Sciro' (1712), 'Ifigenia in Aulide' and 'in Tauride' (1713), 'Amor d'un ombra,' and 'Narciso' (1714), and 'Amleto' (1715, Teatro Capranico), interesting as the first musical setting of that subject. In 1708 he was in Venice with Handel, then on his way from Florence, which he left in January, to Rome, where he arrived in March, his 'Agrippina' being performed 27 times in Venice. Domenico seems to have accompanied him to Rome, for Cardinal Ottoboni held a kind of competition between the two, at which the victory was undecided on the harpsichord, but when it came to the organ, Scarlatti was the first to acknowledge his rival's superiority, declaring that he had no idea such playing as Handel's existed. The two became fast friends from that day, they remained together till Handel left Italy, and met again in London in 1720. Even in extreme old age Handel spoke with pleasure of D. Scarlatti, and Mainwaring ('Memoirs,' 61) relates that when Scarlatti was in Spain, if his own playing was admired, he would turn the conversation on Handel's, crossing himself at the same time as a sign of his extreme reverence. In January 1715 he succeeded Baj as maestro di capella of St. Peter's in Rome, where he composed Masses, Salve Reginas, etc. In 1719 he went to London, where his 'Narciso' was performed (May 30, 1720), and in 1721 to Lisbon, where he became a court favourite. The longing for home and kindred however drove him back to Naples, where Hasse heard him play the harpsichord in 1725. In 1729 he was invited to the Spanish court, and appointed music-master to the Princess of the Asturias, whom he had formerly taught in Lisbon. According to the 'Gazetta musicale' of Naples (Sept. 15, 1838) he returned to Naples in 1754, and died there in 1757. Being an inveterate gambler he left his family in great destitution, but Farinelli came to their assistance. (Sacchi's 'Vita di Don Carlo Broschi.')

As we have said, Scarlatti was in some sense the founder of modern execution, and his influence may be traced in Mendelssohn, Liszt, and many other masters of the modern school. He made great use of the crossing of the hands, and produced entirely new effects by this means. His pieces, unlike the suites of Handel and his predecessors, were all short. Santini possessed 349 of them. Of these Scarlatti himself only

[1] Fétis calls Leo a pupil of Pitoni, an error corrected by Florimo.
[2] Storia . . . d'ogni poesia, vii. 249.

published one book of 30 pieces, entitled 'Esercizii per gravicembalo,' etc., printed according to Burney in Venice, but at any rate before Aug. 1746, when the Prince of the Asturias, whose name is on the title-page, ascended the throne. In the Fétis collection is a Paris edition, 'Pièces pour le claveçin,' 2 vols., published by Mme. Boivin (who died Sept. 1733) and Le Clerc.[1] '42 Suits[2] of Lessons' were printed by B. Cooke, London, under the supervision of Scarlatti's friend Roseingrave (between 1730 and 1737, when Roseingrave went out of his mind). Czerny's edition (Haslinger, Vienna, 1839), containing 200 pieces, was re-edited (Paris, Sauer, Girod) and revised by Mme. Farrenc from Roseingrave's edition, and MSS. then in possession of Rimbault. There are also 130 pieces in Farrenc's 'Trésor des Pianistes' (1864); 60 Sonatas are published by Breitkopf; and 18 pieces, grouped as Suites by von Bülow, by Peters.

Though the technique of pianoforte-playing owes so much to Domenico Scarlatti, he did nothing towards the development of the sonata.

There seem to have been other musicians of this name, as Mr. Haberl of Ratisbon saw in Rome a melodrama 'Agnus occisus ab origine Mundi,' signed Francesco Scarlatti, and there is at Monte Cassino a score by Pietro Scarlatti, 'Clitarro,' with intermezzi by Hasse. [F.G.]

SCARLATTI, Giuseppe, grandson of Alessandro, born at Naples 1712. Of his artistic life but little is known. He settled in Vienna in 1757, up to which date he had produced the following operas:—'Pompeo in Armenio' (Rome, 1747); 'Adriano in Siria' (Naples, 1752); 'Ezio' (Ib. 1754); 'Gli effetti della gran Madre Natura' (Venice, 1754); 'Merope' (Naples, 1755); 'Chi tutto abbraccia nulla stringe' (Venice, 1756). In Vienna he brought out eight more at the court theatre:—'Il mercato di malmantile,' and 'L'isola disabitata' (1757); 'La serva scaltra' (1759); 'Issipile' and 'La Clemenza di Tito' (1760); 'Artaserse' (1763); 'Gli stravaganti' (1765); 'La moglie padrona' (1768). He died at Vienna Aug. 17, 1777. [C.F.P.]

SCENA (Gr. Σκηνη; Lat. *Scena*; Ital. *Scena, Teatro, Palco*; Ger. *Bühne, Auftritt*; Fr. *Scène, Théâtre*; Eng. Scene, Stage). A term, which, in its oldest and fullest significance, applies equally to the Stage, to the Scenery it represents, and to the Dramatic Action which takes place upon it. Hence, the long array of synonyms placed at the beginning of this article.

I. Classical authors most frequently use the word in its first sense, as applying to that part of a Greek or Roman Theatre which most nearly answers to what we should now call the Stage; and the classical tendencies of the Renaissance movement led to its similar use in the 16th century. Thus, in Peri's 'Euridice,' printed in 1600, we find the following direction: 'Tirsi viene in Scena, sonando la presente Zinfonia con un Triflauto'—'Thyrsis comes upon the Stage, playing the present Symphony upon a Triple Flute. [See Opera.]

II. In its second sense, the word is commonly applied, in England, to those divisions of a Drama which are marked by an actual change of Scenery; a method of arrangement which is even extended to English translations of foreign works.

III. In the Italian, German, and French Theatres, the word is more frequently used, in its third sense, to designate those subordinate divisions of an Act[3] which are marked by the entrance, or exit, of one or more members of the 'Dramatis personæ'; a new Scene being always added to the list, when a new Character appears upon, or quits the Stage, though it be only a Messenger, with half-a-dozen words to say, or sing. The ostensible number of Scenes, therefore, in an Italian, or German Opera, is always far greater than that indicated in an English version of the same work. For instance, in the original Libretto of 'Der Freischütz' 7 Scenes are enumerated in the First Act, 6 in the Second, and 17 in the Third; whereas the popular English translation only recognises 1 in Act I, 2 in Act II, and 3 in Act III. An attempt to introduce the Continental practice to the English Theatre was made, some years ago, in the collection of Operas called 'The Standard Lyric Drama' (Boosey & Co.); and, as it has been revived in the excellent 8vo editions now publishing by Messrs. Novello, it is to be hoped that uniformity of custom may be eventually established, at least in all translated works.

IV. In a more limited sense, the term Scena is applied, by Operatic Composers, to an Accompanied Recitative, either interspersed with passages of Rhythmic Melody, or followed by a regular Aria. In the former case, the word is generally used alone—and always in its Italian form: in the latter the Composition is sometimes called 'Scena ed Aria.' Less frequently, the place of pure Recitative is supplied by the introduction of short strains of Melody, with strongly-marked variations of Tempo. But, in all cases, it is *de rigueur* that the character of the Composition should be essentially and unmistakably dramatic throughout. The Scena, thus defined, is as old as the Opera itself; for the name might very well be given to the Scene from 'Euridice,' already alluded to; or to the 'Lamento' in Monteverde's 'Ariana.' A very fine example, much in advance of its age, will be found in 'Ah rendimi quel core,' from Francesco Rossi's 'Mitrane' (1688). Handel used the Scena, with telling effect, both in Opera and Oratorio; as in 'Solitudini amate,' in 'Alessandro'; 'Il poter quelche brami,' in 'Scipio,' and 'Deeper and deeper still' and 'Farewell ye limpid streams,' in 'Jephtha.' Mozart's peculiar aptitude for this kind of Composition is well exemplified in his wonderful Scena for two Voices, 'Die Weisheitlehre dieser Knaben,' in 'Die Zauberflöte'; in innumerable delightful instances in his other Operas; and in a large collection of detached

1 No. 10 in vol. ii. is an organ fugue by Alessandro Scarlatti.
2 Which are not 'Suites,' but single movements.

3 Ital. *Atto*; Fr. *Acte*; Ger. *Aufzug*—in allusion to the raising of the curtain.

pieces, such as 'Ch'io mi scordi,' 'Bella mia fiamma,' 'Ahi, lo previdi,' 'Misera, dove son?' and others, too numerous to mention, most of them written for the Stage, though some are clearly intended for the Concert-room, notwithstanding their powerful dramatic expression. To this latter class of Scenas must be referred Beethoven's magnificent 'Ah, perfido!' which ranks, with the Scenas for Leonore, and Florestan, in 'Fidelio,' among his most passionate Compositions for Voice and Orchestra. The Scena was, unquestionably, Weber's strongest point—witness his three magnificent examples, 'Durch die Wälder,' 'Wie nahte mir die Schlummer,' and 'Ocean, du Ungeheuer,' and his six 'Concert Arien'—of which, however, five only have as yet been published. The grand Scena, in B♭, for Kunegunde in 'Faust,' is one of Spohr's most notable masterpieces: and the same Composer's impassioned Instrumental Scena, for Violin and Orchestra, stands quite alone, as an inspiration of the highest order. He also wrote a very fine Scena for the Concert-room—'Tu m'abbandoni' (op. 71): and Mendelssohn has left us a priceless treasure of this class, in his 'Infelice,' which embodies an amount of scenic power no less remarkable than that thrown into the numerous similar movements in his Oratorios. The secret of success, in all these cases, lies in the intensity of dramatic expression embodied in the work. When this is present, no really great Composer ever fails to hit his mark. In its absence, the outward form of the Scena becomes a meaningless absurdity—a truth which has not been sufficiently considered by some writers of later date. [W.S.R.]

SCENARIO. An Italian term, meaning a sketch of the scenes and main points of an opera libretto, drawn up and settled preliminary to filling in the detail. [G.]

SCHABLONE. The German term for a stencil or pattern, and thence in musical criticism often applied to music written with too much adherence to mechanical form or manner, whether the composer's own, or some one else's—made on a cut and dried pattern. The term *capellmeister-musik* is used by the German critics for a similar thing. With a slightly different metaphor we should say, 'cast in the same mould.' [G.]

SCHACHTNER, Johann Andreas, from 1754 trumpeter to the Archbishop of Salzburg, and previously, according to a letter of Mozart's (Oct. 17, 1777) in the church-choir at Ingolstadt, where he was brought up in the Jesuit school. He died in 1795. He was a thorough musician (much greater knowledge was required to play the trumpet then than now) and had literary tastes besides. Being intimate with the Mozart family he watched with great interest the extraordinary early development of Wolfgang's genius, and 20 years later wrote, at the request of Mozart's sister, a letter[1] to which we owe a host of characteristic and touching details. His affection was fully returned, for 'Wolfgangerl' would ask him a dozen times a day if he was really fond of him, and when Schachtner would sometimes in fun say 'No,' the tears would start into his eyes 'so loving and so tender was his little heart.' When the two were carrying his toys from one room to the other Wolfgang would insist on their either singing or fiddling a march. To Schachtner too the father showed the blotted MS. of the first PF. concerto, and related the little fellow's answer to his objection that it was too difficult—'That is just why it is called a concerto; people must practise till they can play it,' upon which he set to work to try and play it himself. At this time he was 4, and two years later, after his return from Vienna, when some trios by a friend were being tried, he begged to be allowed to play the second violin, and cried at his father's refusal (he had had absolutely no instruction in the violin), till at Schachtner's intercession Leopold Mozart gave way, saying, 'You may play with Herr Schachtner; but you must do it softly so that nobody may hear you.' Schachtner soon found himself superfluous, and was not surprised to see tears of joy in the father's eyes. Among other traits, Schachtner relates as a proof of the extreme delicacy of the boy's ear his pointing out that Schachtner's violin was a half-a-quarter of a tone lower than his own, and on another occasion his fainting at the sound of the trumpet, of which up to ten, he had a positive dread. Schachtner wrote the libretto of an opera[2] which Mozart intended for Vienna, and had made great progress with, and translated the libretto of 'Idomeneo' into German, thus enabling Leopold Mozart to say (letter to Breitkopf, Aug. 10, 1781) that it was entirely the work of persons living in Salzburg, 'the poetry by Court-chaplain Varesco, the music by my son, and the German translation by Herr Schachtner.' (Jahn's 'Mozart,' i. 564.) [C.F.P.]

SCHACK, Benedict, the first Tamino, and one of the party[3] who stood round Mozart's bed the night before his death, and at his request sang the completed portions of the 'Requiem' as far as the first bars of the 'Lacrimosa,' when he broke into violent weeping at the thought that he should never finish it. Schack, who was born in 1758, was a man of general cultivation, a thorough musician, and a good flute-player. He composed several operas for Schikaneder's theatre. Mozart was on intimate terms with him, and would often come and fetch him for a walk, and while waiting for Schack to dress, would sit down at his desk and touch up his scores. Schack's voice was a fine tenor, flexible and sonorous, and his execution thoroughly artistic, but he was a poor actor.[4] In 1787 he was taking second parts only; in 1792 he sang Tamino, Count Almaviva, and Don Ottavio (Don Gonsalvo in the German translation) after which we hear no more of him as a singer. His

[1] Dated April 24, 1792. Given in full by Jahn, i. 19.

[2] Completed by André as 'Zaïde.' Jahn thinks it was most likely adapted from the French.

[3] The others were Mozart's brother-in-law, Hofer, the violinist, and Franz Xaver Gerl, a bass-singer, and the first Sarastro. Mozart himself sang the alto.

[4] Jahn's 'Mozart,' ii. 510.

Operas or Singspiele came between 1789 and 93; some were written with Gerl.[1] [C.F.P.]

SCHARWENKA, PHILIPP, born Feb. 25, 1847, at Samter, Posen, East Prussia. His taste for music showed itself early, but he was unable to cultivate it seriously till the removal of his family to Berlin in 1865, when he entered Kullak's 'New Academy.' On completing his course he remained on the staff of the Academy, and is now teacher of the rudiments and of composition. His works are chiefly for PF.—dances and other drawing-room pieces; the latest being an 'Album polonais,' op. 33. But he has also published songs; 3 concert pieces for violin and PF. (op. 17); a serenade (op. 19); studies for violin, and for cello, and has written two symphonies. Herr Scharwenka is also an accomplished caricaturist, and has illustrated 'Anton Notenquetscher,' a satirical poem by Alex. Moskowski (Berlin, 1881), with some very comic woodcuts. [G.]

SCHARWENKA, XAVER, was also born at Samter, Jan. 6, 1840; and like his brother was at Kullak's Academy at Berlin, where he was known, while still a pupil, for his PF. playing and his compositions. He made his first appearance in public at Berlin, in 1869, and remained for some time in the Academy as a teacher, until compelled to leave it for his military duties in 1873. After this he began to travel, and was soon renowned as a fine and brilliant player, and a 'young composer of remarkable endowments.' In 1877 he produced his first Concerto for the PF. (in B♭ minor, op. 32), playing it to the meeting of German musicians at Hanover in May; it was played in England for the first time by Mr. Dannreuther at the Crystal Palace (both place and player well-known in this country for their chivalrous welcome of new works) Oct. 27, 1877. In 1878, Feb. 14, Scharwenka himself played it at the Gewandhaus, Leipzig. In 1879 he made his first appearance in England, played the same work at the Crystal Palace, March 1, and played at the Musical Union, April 29. In 1880 he returned and played at the Philharmonic Feb. 19, and elsewhere. In 1881 he made a third visit and played his second Concerto (in C minor, op. 56, which he had produced at the Gesellschafts concert at Vienna Dec. 12, 1880)—at the Philharmonic, Feb. 24. His stay was shortened by his recall to Germany for his military duties (a cruel anomaly for an artist!), but he found time to appear several times, and deepened the favourable impression which he had previously made.

Scharwenka's published works number 52. Opus 1 is a Trio in F♯ minor for PF., violin and cello, and op. 2 a Sonata for PF. and violin, in D minor. He has published a second PF. trio (in A minor, op. 45), a quartet for PF. and strings (in F, op. 37), a sonata for PF. and cello (E minor, op. 46); 7 original PF. duets; 2 sonatas (in C♯ minor and E♭, op. 6 and 36), 2 scherzos, and a large mass of studies, dances, romances, and other pieces all for PF. solo. The first PF. concerto is op. 32; the second is not yet printed. [G.]

SCHAUROTH, DELPHINE (Adolphine) VON, a Bavarian lady of noble family, a great pianoforte player, with whom Mendelssohn flirted (seriously, even for him) and played duets, during his visit to Munich in June 1830.[2] She and Josephine Lang are the two most prominent figures in his letters of that date. He reached Venice on Oct. 10, and on the 16th wrote the well-known 'Venetianisches Gondellied' (Songs without Words, bk. i. no. 6), which on the MS., though not in print, bears the words 'für Delphine Schauroth.' Their acquaintance was renewed on his return in the following[3] October, and the G minor Concerto, written at Munich, is dedicated to her. She was born at Magdeburg in 1814, and was a pupil of Kalkbrenner. Before 1835 she married Mr. Hill Handley, an Englishman, but the union does not appear to have been happy, and was soon dissolved. Schumann, in noticing her Sonate brillante in C minor (Diabelli) and her Caprice (Ibid.), in his 'Neue Zeitschrift für Musik' (ii. 125; v. 132), while kindly quizzing her consecutive fifths, false relations, and other marks of inexperience in composing, pardons them all for the thoroughly musical nature—'Musik in ihrem Wesen,' 'der eigentliche musikalische Nerv'—which her pieces display. Indeed he goes so far as to class her with Clara Wieck as 'two Amazons in a brilliant procession.' In 1839 she played the E♭ Concerto at a concert given in Munich for the Beethoven monument, with great brilliancy and success (A. M. Z. xli. 488). In 1870 she gave a recital at Leipzig on Mendelssohn's birthday, in reference to which the Signale speaks of her own pieces and two of Chopin's as having special charm. She is now (1881) living at Charlottenburg. It is matter of great regret that a life which began so brilliantly should, to all appearance, be so much overclouded at its close. [G.]

SCHAUSPIELDIRECTOR, DER, 'Comödie mit Musik in 1 Act' (The Manager, a Comedy with Music in one Act); containing an overture and 4 numbers; words by Stephanie, jun., music by Mozart. Produced at a Court festival at Schönbrunn, Feb. 7, 1786. Over the terzet (No. 3) is the date, Jan. 18, 1786. It was adapted to a French libretto under the name of 'L'Impresario,' and produced in Paris in 1856. [See vol. i. p. 768.] A careful version of the entire piece from the German original, by W. Grist, was brought out at the Crystal Palace, London, on Sept. 14, 1877, as 'The Manager,' and repeated several times there and elsewhere.

An interesting little work, full of details on this opera and Mozart in general, is 'Mozart's Schauspieldirector, von Dr. R. Hirsch' (Leipzig, 1859). [G.]

SCHEBEK, EDMUND, a distinguished and influential Austrian amateur, Doctor of Law,

[1] Gerl sang Osmin in 1787 at the same theatre in the Freihaus, where was produced in 1797 his comic opera in 3 acts 'Die Maskerade,' by 'a former member of this theatre.'

[2] 'Familie Mendelssohn,' Letters, June 11, 26, 1830.

[3] Letter of Oct. 6, 1831.

Imperial councillor, and secretary to the Chamber of Commerce at Prague, was born Oct. 22, 1819, at Petersdorf in Moravia. He began his musical career as head of a Society at Olmütz, and continued it at Prague, where in conjunction with Weiss, the superior of the Capuchins, and Krejci, he has revived much of the best old Italian church music. He has devoted his attention specially to the construction of the violin, in relation to which he has published very interesting treatises—On the Orchestral Instruments in the Paris[1] Exhibition of 1855; On the Cremonese instruments, à propos to the Vienna Exhibition of 1873, and 'the Italian Violin manufacture and its German origin.'[2] He has also published a valuable little pamphlet on Froberger. Dr. Schebek possesses a fine collection of ancient stringed instruments, Beethoven autographs, etc. [G.]

SCHEBEST, Agnes, born at Vienna, Feb. 15, 1813, became attached at a very early age to the Court Theatre at Dresden, first in the chorus, and then as singer of small solo parts. Here she had the inestimable advantage of frequently hearing and seeing the great Schroeder-Devrient. In 1833 she left Dresden for Pesth, and from 1836 to 41 starred throughout Germany with very great applause. Her voice was a fine mezzo-soprano, her style and method were good, her best parts heroic, with much energy and passion. In 1841 she married the great theologian Dr. David Strauss (himself a keen amateur, and author of an interesting paper on the Ninth Symphony), and died Dec. 22, 1869, at Stuttgart. She left an account of her career—'Aus dem Leben einer Künstlerin' (1857). [G.]

SCHECHNER-WAAGEN, Nanette, dramatic singer, born at Munich in 1806. She was employed in the chorus-scenes of the opera, and, on the occasion of Madame Grassini's visit, was chosen to second her in some selections from Cimarosa's 'Gli Orazzi e Curiazi.' Schechner's beautiful voice made a great impression, and won for her a patroness in the Queen of Bavaria. After some study in singing and in Italian, she appeared in Italian opera in Munich, until 1827, after which she devoted herself to German opera. In 1826 she was in Vienna, if a curious story, related by Schindler, of a scene in the theatre there, à propos to an air written for her by Schubert, may be believed. [See Schubert.] It is related by Fétis that, when she first appeared in Berlin in Weigl's 'Schweizerfamilie,' the first act was played to an almost empty house; but such enthusiasm did her Emmeline arouse in the few listeners, that the report of it spread to the neighbouring cafés during the entr'acte, a large audience was drawn to the theatre for the rest of the performance, and the singer's success was complete. Her Donna Anna, Euryanthe, Fidelio, Reiza, Vestalin and Iphigenie in Tauris excited great admiration in Berlin and Munich. In 1832 she married Waagen, a lithographer and painter.

Madame Schechner's voice was powerful, even massive in its tones, her acting was earnest and natural. She took a place in the first rank of German singers, but her brilliant career lasted no longer than ten years. A severe illness injured her voice; she retired from the stage in 1835, and died in 1860.

Mendelssohn heard her at Munich in 1830, and while he found her voice much gone off and her intonation false, says that her expression was still so touching as to make him weep.[3] [L.M.M.]

SCHEIBLER, Johann Heinrich, born at Montjoie or Montschau, near Aix-la-Chapelle, Nov. 11, 1777, died Nov. 20, 1837, silk manufacturer, after many travels settled down at Crefeld, where he was first-assistant-Bürgermeister. In 1812–13, after some interesting experiments with Jews-harps, he turned his attention to the imperfections of existing means of tuning. He first tried a monochord, but finding that he could not always get the same note from the same division of his monochord, he endeavoured to help himself by beats, and discovered that each beat corresponded to a difference of two simple vibrations or one double vibration in a second. His plan was to fix the monochord by finding the stopped length which would give a note beating four times in a second with his own fork. Then, after endless trials and calculations, he found similar places for all the divisions of the scale, and finally from the monochord made forks for each note of the perfectly equally tempered scale. By repeated comparisons with his forks he found that it was impossible to make a mathematically accurate monochord, or to protect it from the effects of temperature. He then hit upon the plan of inserting forks between the forks of his scale, from the lowest A of the violin to the open A, and counting the beats between them. It was this counting that was the trouble, but by highly ingenious mechanical contrivances he was enabled to complete the count of his fifty-two forks within from ·0067 to ·00083 beats or double vibrations in a second, and hence to tune a set of twelve forks so as to form a perfectly equal scale for any given pitch of A. The particulars of his forks, and the mode of counting them are contained in his little pamphlet 'Der physikalische und musikalische Tonmesser' (Essen, Bädeker, 1834, p. 80, with lithographic plates),[4] from which the preceding history has been gathered. During his lifetime he issued four smaller tracts, showing how to tune organs by beats, which were collected after his death as 'H. Scheibler's Schriften, etc.' (Crefeld, Schmüller, 1838). This is quite out of print, but copies of the former book are still to be bought. His wonderful tonometer of fifty-two forks has completely disappeared. But another one, of fifty-six instead of fifty-two forks, which

[3] Letter, June 6, 1836.

[4] 'The physical and musical Tonometer, which proves visibly by means of the pendulum, the absolute numbers of vibrations of musical tones, the principal kinds of combinational tones, and the most rigid exactness of equally tempered and mathematical just chords.'

belonged to Scheibler still exists, and was inherited by his daughter and grandson, who lent it to Herr Amels, formerly of Crefeld, who again lent it to Mr. Alexander J. Ellis, who counted it, and having checked his results by means of M^{c}Leod's and Mayer's machines for measuring pitch, gave the value of each fork in the Journal of the Society of Arts for March 5, 1880, p. 300, correct to less than one-tenth of a double vibration. The two extreme forks of this 56-fork tonometer agree in pitch precisely with those of the 52-fork tonometer, but no other forks are alike, nor could the forks of the 52-fork tonometer have been easily converted into those of the other one. In 1834, at a congress of physicists at Stuttgart, Scheibler proposed with approval the pitch A 440 at 69° F. (=A 440·2 at 59° F.) for general purposes, and this has been consequently called the Stuttgart pitch.[1] [A.J.H.]

SCHELBLE, Johann Nepomuk, a thoroughly excellent and representative German musician, born May 16, 1789, at Höffingen in the Black Forest, where his father was superintendent of the House of Correction. His strict musical education was begun in the Monastery of Marchthal 1800–03; and continued at Donaueschingen, under Weisse. He then spent some time, first with Vogler at Darmstadt, and then with Krebs, a distinguished singer at Stuttgart, and there, in 1812, he filled the post of elementary teacher in the Royal Musical Institution, a very famous and complete school of those times.[2] In 1813 he went to Vienna, lived in intimate acquaintance with Beethoven, Moscheles, Weigl, Spohr, etc., composed an opera and many smaller works, and went on the stage, where however his singing, though remarkable, was neutralised by his want of power to act. From Austria in 1816 he went to Frankfort, which became his home. Here the beauty of his voice, the excellence of his method, and the justness of his expression, were at once recognised. He became the favourite teacher, and in 1817 was made director of the Musical Academy. This however proved too desultory for his views, and on July 24, 1818, he formed a Society of his own, which developed into the famous 'Cæcilian Society' of Frankfort, and at the head of which he remained till his death. The first work chosen by the infant institution was the 'Zauberflöte'; then Mozart's Requiem; then one of his Masses; and then works by Handel, Cherubini, Bach, etc. In 1821 the Society assumed the name of the 'Cäcilienverein'; the répertoire was increased by works of Palestrina, Scarlatti, and other Italian masters, and at length, on March 10, 1828, Mozart's 'Davidde penitente' and the Credo of Bach's Mass in B minor were given; then, May 2, 1829 (stimulated by the example of Mendelssohn in Berlin), the Matthew Passion; and after that we hear of 'Samson' and other oratorios of Handel, Bach's motets, and choruses of Mendelssohn, whose genius Schelble was one of the first to recognise, and whose 'St. Paul' was suggested to him by the Cæcilian Association, doubtless on the motion of its conductor. Whether the Society ever attempted Beethoven's mass does not appear, but Schelble was one of the two private individuals who answered Beethoven's invitation to subscribe for its publication.' [See vol. i. p. 197 note; vol. ii. 271 *b*.]

His health gradually declined, and at length, in the winter of 1835, it was found necessary to make some new arrangement for the direction of the Society. Mendelssohn was asked (Letters, Feb. 18, 1836), and undertook it for six weeks during the summer of 1836. Mendelssohn's fondness and esteem for the man whose place he was thus temporarily filling is evident in every sentence referring to him in his letters of this date. Schelble died Aug. 7, 1837. His great qualities as a practical musician, a conductor, and a man, are well summed up by Hiller[3] in his book on Mendelssohn, to which we refer the reader. His compositions have not survived him. His biography was published shortly after his death—'J. N. Schelble, von Weissmann' (Frankfort, 1838). [G.]

SCHELLER, Jakob, born at Schettat, Rakonitz, Bohemia, May 12, 1759, a very clever violinist. He was thrown on his own resources from a very early age, and we hear of him at Prague, Vienna, and Mannheim, where he remained for two years playing in the court band, and learning composition from Vogler. After more wandering he made a stay of three years in Paris, studying the school of Viotti. He then, in 1785, took a position as *Concert-meister*, or leading violin, in the Duke of Würtemberg's band at Stuttgart, which he retained until the establishment was broken up by the arrival of the French in 1792. This forced him to resume his wandering life, and that again drove him to intemperance, till after seven or eight years more he ended[4] miserably, being even obliged to borrow a fiddle at each town he came to. He was more celebrated for his tricks and *tours de force* than for his legitimate playing. Spohr (Autob. i. 280) speaks of his flageolet-tones, of variations on one string, of pizzicato with the nails of the left hand, of imitations of a bassoon, an old woman, etc.; and Fétis mentions a trick in which by loosening the bow he played on all four strings at once. By these, and probably also by really fine playing, he excited so much enthusiasm, that it used to be said of him 'one God; one Scheller.' The same things have been done since by really great artists, such as Ole Bull, and even Paganini, and with similar effect on their audiences. [G.]

SCHENCK, Johann, interesting from his connection with Beethoven, was born of poor parents, Nov. 30, 1753, at Wiener Neustadt in Lower Austria, and at an early age was admitted into the Archbishop's choir at Vienna. In 1778 he produced his first mass, which he

[1] He selected it as the mean of the variation of pitch in pianos as then tuned at Vienna, and not from the fact that it enables the scale of C major, in just intonation, to be expressed in whole numbers, as has been sometimes stated.

followed by other sacred pieces and by many Singspiele and Operas (ending with 'Der Fassbinder' 1802), which gained him a considerable name, and rank with those of Dittersdorf and Wenzel Müller. The 'Dorfbarbier' (Kärnthnerthor, Nov. 6, 1796) was always popular, and is still in use. In addition he wrote symphonies, concertos, quartets, lieder, etc. The autographs of many of these are in the Gesellschaft der Musikfreunde at Vienna, with that of a theoretical work, 'Grundsätze des Generalbasses.' The anecdote of his kissing Mozart's hand during the overture on the first night of the 'Zauberflöte' has been already related. [See MOZART, ii. 394, note.] His first meeting with Beethoven is told in Bauernfeld's biographical sketch of Schenck in the 'Wiener Zeitschrift für Kunst' for 1837 (Nos. 5, 6, and 7). Gelinek mentioned to Schenck that he had found a young man whose playing excelled anything ever heard before excepting Mozart's, and who had been studying counterpoint for six months with Haydn, but to so little purpose that it would be a great kindness if Schenck would give him some help. A meeting was arranged at Gelinek's house, when Beethoven improvised for over half an hour in so remarkable and unusual a manner that forty years afterwards Schenck could not speak of it without emotion. Schenck next went to see the young artist. Himself a model of neatness he was rather taken aback by the disorderliness of the room, but Beethoven's reception was cordial and animated. On the desk lay some short exercises in counterpoint, in which on the first glance Schenck detected a few errors. Beethoven's troubles soon came out. He had come to Vienna aware of his own ability, but anxious to learn; had at once put himself in the hands of the first master to be got, and yet was making no progress. Schenck at once agreed to help him, and took him through Fux's 'Gradus ad Parnassum,' with which indeed Haydn was familiar enough. As it was essential that Haydn should not be entirely thrown over, Beethoven copied exercises partly corrected by [1] Schenck, and Haydn was then able to congratulate himself on the progress of his hot-headed pupil. The affair was of course kept strictly secret, but Beethoven having fallen out with Gelinek the latter gossipped, and Schenck was deeply annoyed. Beethoven, however, when on the point of following Haydn to Eisenstadt wrote [2] very gratefully to Schenck, and the two remained on pleasant terms. It is interesting to know that besides Mozart and Beethoven, Schenck was acquainted with Schubert. Bauenfeld introduced them, and so congenial were they that after an hour's talk they parted like old friends.

Very unassuming in his ways, Schenck was respected as a thorough though somewhat pedantic teacher of the piano and composition. His portrait in the Museum of the Gesellschaft der Musikfreunde, in Vienna, shows a pleasing countenance. When over 80 he still took pleasure in work, and set about remodelling his 'Jagd,' for which he got Bauernfeld to write him a new libretto. He had finished the first act when he died, Dec. 29, 1836. [C.F.P.]

[1] This surely says a great deal for Beethoven's patience, and for his desire not to offend Haydn.

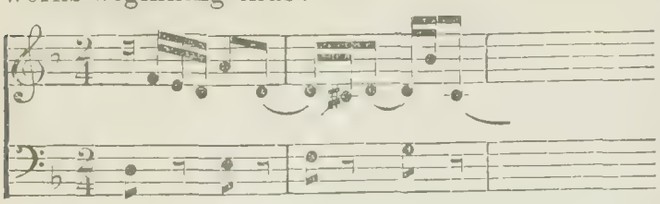
[2] 'I wish I were not starting to-day for Eisenstadt. I should like to have had more talk with you. In the meantime you may count upon my gratitude for the kindness you have shown me. I shall do all in my power to return it. I hope to see you and enjoy your society again soon. Farewell, and do not forget your BEETHOVEN.'

SCHERZANDO, SCHERZOSO, playful, lively; a direction of frequent occurrence, indicating a passage of a light and cheerful character. It is occasionally used, in combination with some other direction, to indicate the style of a whole movement, as *Allegro scherzando*, *Allegretto scherzando* (Beethoven, Symphony No. 8), etc., but its more usual and characteristic application is to a phrase which is to be played in a lively manner, in contrast to the rest of the movement or to some other phrase. In such passages, as a rule, the time is intended to be taken more freely than usual, while any marks of phrasing which occur should be strictly adhered to. In fact the phrasing of a *scherzando* passage is of paramount importance, for by it alone can the proper character be given.—The word is found, where one would little expect it, in the 'Et vitam venturi' of Beethoven's Mass in D, near the beginning, in the old editions; but on reference to Breitkopf & Härtel's complete edition it turns out to have been read in error for *sforzando*! [J.A.F.M.]

SCHERZO. An Italian word signifying 'jest' or 'joke.' Its application in music is extensive, and—as is the case with many other musical titles—often incorrect. Most of the movements, from the time of Mendelssohn onwards, would be better designated as 'Caprices' or 'Capriccios.' Obviously the word signifies that the piece to which it applies is not merely of a light and gay character, but is of the nature of a joke, in that it possesses that rare quality in music, humour. But, exclusive of Haydn and Beethoven, what musician shows humour, real unaffected drollery, in his music?

The term seems to have been first employed (Scherzando) merely as a direction for performance, but there are early instances of its use as a distinctive title. The light Italian canzonets popular in Germany in the 17th century were called *Scherzi musicali*. In 1688 Johann Schenk published some 'Scherzi musicali per la viola di gamba.' Later, when each movement of an instrumental composition had to receive a distinctive character, the directions *Allegretto scherzando* and *Presto scherzando* became common, several examples occurring in the Sonatas of Ph. Em. Bach. But even in the 'Partitas' of his great father, we find a Scherzo preceded by a Burlesca and a Fantaisie, though few modern ears can discover anything of humour or fancy in either of these. The Scherzo commences

and might as well have been termed a Gavotte. There is another Scherzo among the doubtful works beginning thus:



Many of the Gigues are far more frolicsome than these would-be jests. In Peters's edition of Scarlatti's Clavecin pieces, will be found a piece with the following theme for principal subject, which the editor, von Bülow, has entitled a Scherzo:—

The initial figure of this theme, treated in free imitation, runs through the movement. As a similar phrase forms so distinctive a feature of the Scherzo to Beethoven's 7th Symphony it is not unfair to compare the two, and remark the difference between a merely bright little piece with no particular qualities, and a true Scherzo which fills the heart with lively and delightful thoughts. In the same volume will be found a Capriccio (No. 4) which is a real Scherzo in all but name.

Coming now to the period of the Symphony it may be as well to remind the reader of a fact which will be more enlarged upon under that heading, namely, that the presence of the Minuet or Scherzo in works of the symphonic class, is a matter of natural selection, or survival of the fittest. In the old Suites the Minuet, being of rather shorter rhythm than the other dances, was seized upon, perhaps unconsciously, by the great masters who tied themselves down to the old form, and was exaggerated out of all recognition for the sake of contrast. The actual Minuet, as danced from the 16th century up to the present day (if any one still learns it), is in the time of that famous specimen in Mozart's Don Juan, or say M. M. ♩=80. Yet even in the Suites of Bach one finds quick and slow Minuets, neither having any regard to the requirements of the dance. When we come to Haydn the term Minuet ceases to have any meaning; the stateliness and character of the dance are quite gone, and what we should call a Waltz appears. But with the true instinct of an artist, Haydn felt that in a work containing such heavy subtleties (for even Haydn was deemed heavy and subtle once) as the ordinary first movement and slow movement, a piece of far lighter character was imperatively demanded. So lighter and quicker and more sportive grew the Minuets, till Beethoven crowned the incongruous fashion with the 'Minuet' of his 1st Symphony. It should be mentioned, however, that Mozart never departed nearly so far from the true Minuet as Haydn, whose gaiety of musical thought drove him into really inventing the Scherzo, though he did not use the name. The Minuets of many of the String Quartets of Haydn exhibit indeed those quaint and fanciful devices of unexpected reiteration, surprises of rhythm, and abrupt terminations, which are the leading characteristics of the Scherzo, and are completely opposed to the spirit of the true Minuet. One which begins and ends each part with these bars

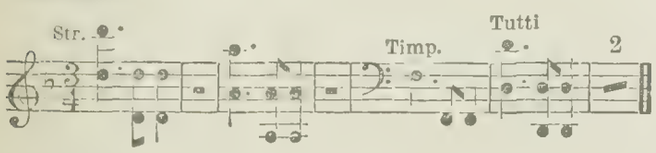
is a strong instance in point.

Beethoven quickly gave the Scherzo the permanent position in the Symphony which it now occupies. He also settled its form and character. As to form, why, the old Minuet and Trio was as good a skeleton as any other; for what matters the shape of the bones when we are dazzled by the form which covers them? It is a good answer to those who consider the classical forms worn out and irksome to the flow of inspiration to point out that in the Scherzo, where full rein is given to the individual caprice of the musician, there is as much attention given to construction as anywhere. In fact, either the bold and masculine First-movement form, or its sister, the weaker and more feminine Rondo form *must* be the backbone of every piece of music with any pretensions to the name. But, lest the light and airy character of the Scherzo should be spoilt by the obtrusion of the machinery, the greater composers have sought to obscure the form artistically by several devices, the most frequent and obvious being the humorous persistent dwelling on some one phrase—generally the leading feature of the first subject—and introducing it in and out of season, mixed up with any or all of the other subjects. Witness the Scherzo of Beethoven's 9th Symphony, quoted below, where the opening phrase is used as an accompaniment to the 2nd subject—indeed as a persistent 'motto' throughout. Apart from this there is not the slightest departure from rigid First-movement form in this great movement.

The Trio, which is a relic of the Minuet and takes the position of third subject or middle section in a Rondo, survives because of the naturally felt want of a contrast to the rapid rhythm of the Scherzo. Many modern composers affect to dispense with it, but there is usually a central section answering to it, even though it be not divided off from the rest by a double bar. Mendelssohn has been the most successful in writing Scherzos without Trios. The main idea was to have a movement in extremely short and marked rhythm, for which purpose triple time is of course the best. In the Pianoforte Sonatas the Scherzo to that in E♭ (Op. 31, No. 3) is the only instance where Beethoven has employed 2–4. The Trios to the Scherzos of the Pastoral and Choral Symphonies are 2–4 and C for special reasons of effect and contrast. It may be worth noticing that Beethoven invariably writes 3–4 even where 6–8 or 3–8 could equally well have been employed. This is no doubt in order that the written notes should appeal to the

eye as much as the sounded notes to the ear. In fact three crotchets, with their separate stems, impress far more vividly on the mind of the player the composer's idea of tripping lightness and quick rhythm than three quavers with united tails. Having once ousted the Minuet, Beethoven seldom re-introduced it, the instances in which he has done so being all very striking, and showing that a particularly fine idea drove him to use a worn-out means of expression. In several cases (PF. Sonatas in Eb, op. 7; in F, op. 10, etc.) where there is no element of humour he has abstained from the idle mockery of calling the movement a Minuet, because it is not a Scherzo, as others have done; yet, on the other hand, the third movements of both the 1st, 4th, and 8th Symphonies are called Minuets while having little or nothing in common with even the Symphony Minuets of Haydn and Mozart. Amongst Beethoven's endless devices for novelty should be noticed the famous treatment of the Scherzo in the C minor Symphony; its conversion into a weird and mysterious terror, and its sudden reappearance, all alive and well again, in the midst of the tremendous jubilation of the Finale. Symphony No. 8, too, presents some singular features. The second movement is positively a cross between a slow movement and a Scherzo, partaking equally of the sentimental and the humorous. But the Finale is nothing else than a rollicking Scherzo, teeming with eccentricities and practical jokes from beginning to end, the opening jest (and *secret* of the movement) being the sudden unexpected entry of the basses with a tremendous C sharp, afterwards turned into D flat, and the final one, the repetition of the chord of F at great length as if for a conclusion, and then, when the hearer naturally thinks that the end is reached, a start off in another direction with a new coda and wind-up.

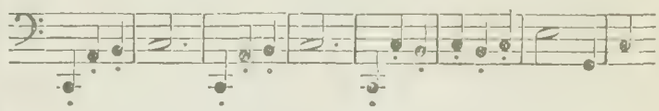
As a specimen of true Scherzo—that is, a movement in strict form and with quaint and whimsical humorous devices springing up unexpectedly, but naturally, throughout,—the Scherzo of the 9th Symphony must ever stand without a rival. The tiny phrase which is the nucleus of the whole is thus eccentrically introduced:—



preparing us at the outset for all manner of starts and surprises. The idea of using the drums for this phrase seems to have tickled Beethoven's fancy, as he repeats it again and again.

Humour is more unexpected in Schubert than in Beethoven, and perhaps because of its unexpectedness we appreciate it the more. The Scherzo of the C major Symphony is full of happy thoughts and surprises, as fine as any of Beethoven's, and yet distinct from them. The varied changes of rhythm in 2, 3 and 4 bars, the piquant use of the wood wind, and above all the sudden and lovely gleam of sunshine—

combine to place this movement among the things imperishable. The Scherzos of the Octet, the Quintet in C, and above all, the PF. Duet in C, which Joachim has restored to its rightful dignity of Symphony, are all worthy of honour. The last-named, with its imitations by inversion of the leading phrase, and its grotesque bass



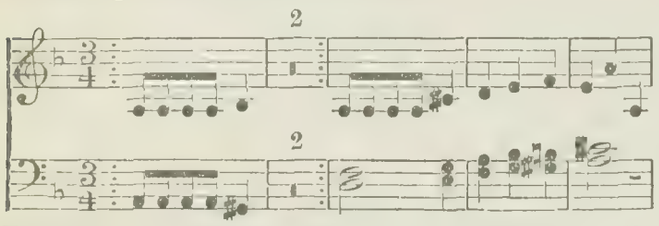
is truly comical.

It is much to be regretted that the more modern composers have lost sight of the true bearing of the Scherzo so completely. Mendelssohn indeed has given it an elfish fairy character, but though this is admirable in the 'Midsummer Night's Dream,' it is perhaps a little out of place elsewhere. Lightness and airy grace his Scherzos possess to admiration, in common with his Capriccios, which they closely resemble; but the musical humour which vents itself in unexpected rhythms and impudent upstartings of themes in strange places, neither he nor any later composer seems to have had an idea of. Mendelssohn has not used the title 'Scherzo' to either of his five symphonies, though the 'Vivace non troppo' of the *Scotch*, the 'Allegretto' of the *Lobgesang*, and the 'Allegro Vivace' of the *Reformation* are usually called Scherzos. It is sufficient to name the String Octet, the two PF. Trios and the two Quintets for Strings, as a few of his works which contain the most striking specimens in this line. As before mentioned, his Capriccios for Piano are pieces of the same order, and No. 4 of the 'Sieben Charakter-stücke' (op. 7) may be classed with them.

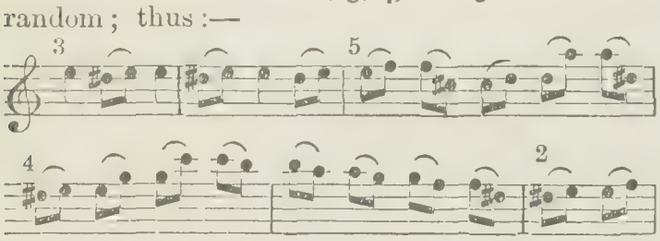
With Schumann we find ourselves again in a new field. Humour, his music seldom, if ever, presents, and he is really often far less gay in his Scherzos than elsewhere. He introduced the innovation of two Trios in his Bb and C Symphonies, PF. Quintet, and other works, but although this practice allows more scope to the fancy of the composer in setting forth strongly contrasted movements in related rhythm, it is to be deprecated as tending to give undue length and consequent heaviness to what should be the lightest and most epigrammatic of music. Beethoven has repeated the Trios of his 4th and 7th Symphonies, but that is quite another thing. Still, though Schumann's Scherzos are wanting in lightness, their originality is more than compensation. The Scherzos of his orchestral works suffer also from heavy and sometimes unskilful instrument-

ation, but in idea and treatment are full of charm. Several of his Kreisleriana and other small PF. pieces, are to all intents and purposes Scherzos.

Though the modern composers have not produced many remarkable Scherzos, it is not for want of trying. Rubinstein has a very pretty idea in 6–4 time in his Pianoforte Octet, and a very odd one in his A major Trio. The 'Ocean' Symphony has two Scherzos, in excellent contrast, the first being in 2–4 time, and slightly Schumannish, and the second in 3–4 time, with quite a Beethoven flavour. The first of these is not, however, entitled Scherzo by the composer any more than is the second movement of his 'Dramatic' Symphony, which begins with the following really humorous idea :—



Raff has—as frequently in other cases—spoilt many fine ideas by extravagances of harmony and lack of refinement. The two PF. Quartets (op. 202) show him at his very best in Scherzo, while his wonderful and undeservedly neglected Violin Sonatas have two eccentric specimens. The 1st Sonata (E minor, op. 73) has a Scherzo with bars of 2, 3, 4, and 5 crotchets at random ; thus :—



while the Trio, which is in 3–4 time, is played so *a tempo rubato* as to appear equally timeless with the above. In the Scherzo of the 2nd Sonata (A major, op. 78) occurs an odd effect. For no less than 56 bars the Violin sustains its low G as a pedal, while continuing a bagpipe melody against brilliant running accompaniment. In the Symphonies the 'Dance of Dryads' of the 'Im Walde' is perhaps the best Scherzo, most of the others being too bizarre and artificial.

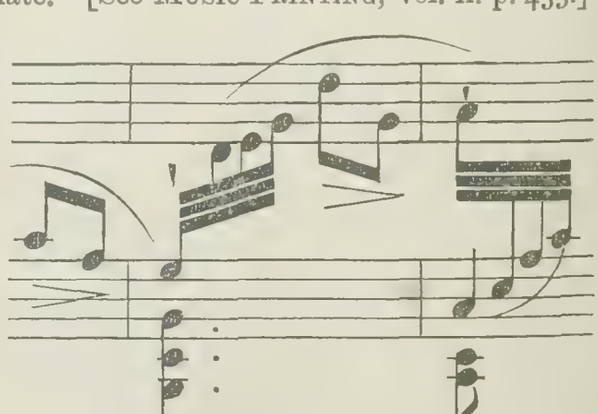
Unlike Schubert and Beethoven, Brahms seldom rises sufficiently from his natural earnestness to write a really bright Scherzo, but he has published one for PF. solo (op. 4) which is very odd and striking. The 2nd Symphony has a movement which is a combination of Minuet and Scherzo, and certainly one of his most charming ideas. On somewhat the same principle is the Scherzo of the 2nd String Sextet (op. 36) which begins in 2–4 as a kind of Gavotte, while the Trio is 3–4 Presto, thus reversing the ordinary practice of making the Trio broader and slower than the rest of the piece.

Quite on a pedestal of their own stand the four Scherzos for piano by Chopin. They are indeed no joke in any sense ; the first has been entitled 'Le Banquet infernal,' and all four are characterised by a wild power and grandeur which their composer seldom attained to.

Among recent productions may be noticed the Scherzo for orchestra by Goldmark, the so-called Intermezzo of Goetz's Symphony, the Scherzos in Dvorak's Sextet, and other chamber works. We have omitted mention of the strangely instrumented 'Queen Mab' Scherzo of Berlioz—more of a joke in orchestration than anything.

The position of the Scherzo in the Symphony—whether second or third of the four movements—is clearly a matter of individual taste, the sole object being contrast. Beethoven, in the large majority of cases, places it third, as affording relief from his mighty slow movements, whereas most modern composers incline to place it as a contrast between the first and slow movements. The matter is purely arbitrary. [F.C.]

SCHEURMANN, Gustav, a native of Prussia, commenced the practical working of his patent processes of type-music-printing in 1856, at 86 Newgate Street, where he had been long established as a music publisher, and keeper of a circulating library of music. Feeling that music-printing was capable of much improvement, he devoted himself with extraordinary zeal to the perfecting of the various features of his patents (May 17, and Oct. 11, 1856). His chief aims were the production of an inexpensive kind of music-type, which would cost less for setting up ; an easy mode of transposing to various keys ; and a marked improvement in the general appearance of the music. Everything was done under his own supervision. Punch-cutters, type-founders, compositors, pressmen, and electrotypers were engaged, and rapid progress made, the various processes being carried out upon the premises. The mode of procedure was to set up the notes and various characters in one 'forme,' and the staves, formed of brass rules, in another, bringing the two together for proofs or printing. The press used for this purpose was one of peculiar construction. Both 'formes' were placed upon the same 'table,' and, by a very simple arrangement, good register secured in two pulls. The main feature of the process consisted in impressing the two 'formes' into one mould, and from that mould producing a perfect electro music-plate. [See Music-Printing, vol. ii. p. 433.]



Nothing could exceed the perfection of the specimens obtained by double printing ; there being no joins, each type represented an entire character.

Large 'spaces,' the depth of the stave, divided the various characters from each other, so that they could be set up and spaced out like ordinary type, a great saving of time being thus effected. In perfecting the process up to double-printing an important stage was reached; but the production of equally good work from the perfected plates, in one printing, proved an insurmountable difficulty, the slightest variation in the impression or register being enough to destroy the beauty of the whole. Machine after machine was tried; Mr. John Rennie, the engineer, giving all the assistance in his power, but without success. The process, up to double-printing, was all that could be desired, as far as appearance was concerned, but was too expensive for the production of cheap music. Mr. Scheurmann risked and lost all he possessed in resolving to be satisfied with nothing less than the full accomplishment of his patent. Messrs. Henderson & Rait, of Marylebone Lane, both of whom had more or less to do with the working of the patents, exhibited all that then remained of the plant at the Caxton Celebration at South Kensington in 1878. The beautiful punches are almost complete; but most of the matrices have disappeared. Although Mr. Scheurmann's efforts were not fully successful, it is not too much to say that, indirectly, he was the means of many improvements being made in the ordinary music founts during the past thirty years. [W.H.]

SCHICHT, Johann Gottfried, born at Reichenau, Zittau, Sept. 29, 1753, owed his education to an uncle; went to Leipzig university intending to study law, but gradually adopted music, and was soon chosen by Adam Hiller as solo clavier player at his concerts. On Hiller's retirement he succeeded him, and at length in 1810 rose to the head of his profession as Cantor of the St. Thomas School. He died Feb. 16, 1823, leaving a good memory and many original large works, as well as a translation of the PF. Schools of Pleyel and Clementi, and of Pellegrini, Celoni's Singing Method, etc., but only one which will live, his edition of J. S. Bach's motets, five for 8 and one for 5 voices (Breitkopf & Härtel 1802, 3), in which however No. 3 'Ich lasse dich nicht' is not by John Sebastian, but by John Christopher, Bach. [G.]

SCHIEDMAYER. There are now two firms of this name in Stuttgart, both enjoying wide reputation as pianoforte-makers, viz. 'Schiedmayer & Sons,' and 'Schiedmayer, Pianofortefabrik; vormals, J. & P. Schiedmayer.' The heads of these firms are the grandsons and great-grandsons of Johann David Schiedmayer, who towards the close of last century was a musical instrument maker at Erlangen, and afterwards at Nuremberg, where he died in 1806. His son Johann Lorenz, went after this for two years to Vienna as a workman, and in 1809 established a business at Stuttgart in partnership with C. F. Dieudonné (who died in 1825). Before that time pianoforte-making was as good as unknown in Stuttgart; those who required satisfactory instruments obtaining them from Vienna. Lorenz Schiedmayer's intelligence and aptness for business gained a position for his firm, and it soon became one of the first in Germany. In 1845 Lorenz united his two eldest sons, Adolf and Hermann, to himself, and 'Schiedmayer & Sons' soon became as well known in foreign countries as in Würtemberg. Lorenz died in 1860 and his son Hermann in 1861. The sons of the brothers Adolf and Hermann, bearing the same Christian names, have been for some years the directors of this firm, which has made both concert and ordinary instruments, and has competed with success in London and Paris and other exhibitions. The two younger sons, Julius and Paul, at first devoted themselves to harmonium-making, a practical knowledge of which, then of recent introduction, had been gained by Paul in Paris. They started together in 1854, but after the death of the father, in 1860, turned to pianoforte-making in competition with the elder firm. Julius died in January 1878, and the younger firm has since been known as 'Schiedmayer, Pianofortefabrik.'

Special mention must be made of Julius Schiedmayer's prominence as an expert in the Juries of the great Exhibitions of London 1862, Paris 1867, Vienna 1873, and Philadelphia 1876. [A.J.H.]

SCHIKANEDER, Emmanuel, theatrical manager, playwright, actor, and singer, born 1751 at Ratisbon, began life as a poor wandering musician, joined some strolling players at Augsburg in 1773, married the adopted daughter of the manager, and at length undertook the direction himself. In 1780 his wanderings brought him to Salzburg, where he fell in with the Mozarts, and at once began to make a profit out of Wolfgang's talents. In 1784 we find him in Vienna, giving with Kumpf a series of excellent performances of German opera, comedy, etc., at the Kärnthnerthor theater. He appeared on the boards both here and at the Burgtheater, where however he did not succeed. He next took the management of the theatre at Ratisbon, but was recalled to Vienna by his wife, who had undertaken the little theatre lately built in the grounds of Prince Starhemberg's house in the suburb of Wieden, for which Schikaneder received a *privilegium* or licence.[1] He had no scruples as to the means to be adopted to make a hit, but in spite of large receipts was continually in difficulty. On one such occasion (March 1791) he had recourse to Mozart, whom he implored to set to music a libretto adapted by himself from a piece by Giesecke, a member of his company. Mozart, always goodnatured, especially to a brother-mason, consented, and from that moment till its completion Schikaneder stuck closely to him, and did all he could to keep him amused over his work. The history of the 'Zauberflöte' is well known; Schikaneder made various suggestions in the composition, took the part of Papageno, and found himself saved from ruin by the success of the opera; but he showed little gratitude to Mozart, and after his death, instead of helping the

[1] It was popularly called Schikaneder's theatre.

widow of the man by whom he had benefitted so materially, contented himself with loud and vain lamentations. In 1800 he entered into partnership with a merchant named Zitterbarth, who at a short distance from the small theatre just mentioned, built the present 'Theater an der Wien,' opened June 13, 1801. Zitterbarth then bought the *privilegium* from Schikaneder, who managed it for him till 1806. His next project was to build, with the assistance of some wealthy friends, a new theatre in the Josephstadt suburb, but this he did not carry out. On his way to Pesth, whither he had been invited to undertake a theatre, he went mad, was brought beck to Vienna, and died in great misery Sept. 21, 1812.

Schikaneder wrote the librettos for many popular operas, Singspiele, and fairy-pieces, the list of which, with year of performance, is here published for the first time:

'Anton der dumme Gärtner' (Schack and Gerl), 1789; 'Die beiden Antons' (with 4 sequels), 'Jakob und Nannerl,' and 'Der Stein der Weisen,' or 'Die Zauberinsel' (Schack and others), 1790; 'Die Zauberflote' (Mozart), 1791; 'Der wohlthätige Derwisch,' or 'Die Schellenkappe' (Schack, Gerl, and others), 1792; 'Die Ersenkönigin,' 'Die Waldmänner,' and 'Der Zauberpfeil' (Lickl), 1793; 'Der Spiegel von Arkadien' (Süssmayer), and 'Die Hirten am Rhein,' 1794; 'Der Scheerenschleifer' (Henneberg), 'Der Königssohn aus Ithaka' (A. F. Hoffmeister), and 'Der Höllenberg' (Wolfl), 1795; 'Der Tyroler Wastel' (Haibel), and a 2nd part 'Oesterreich's treue Brüder,' 1796; 'Das medizinische Consilium' (Haibel), 'Der Löwenbrunnen' (Seyfried), and 'Babylons Pyramiden' (Act. i. Gallus, Act. ii. Peter Winter), 1797; 'Das Labyrinth,' or 'Kampf mit den Elementen' (2nd part of 'Zauberflöte,' Winter), 1798; 'Die Ostindier vom Spittelberg'[1] (Seyfried, Stegmayer, etc.), 'Conrad Langbarth,' or 'Der Burggeist' (Henneberg), 'Minna und Peru,' or 'Königspflicht' (Act i. Henneberg, Act ii. Seyfried), and 'Der Wunderdermann am Wasserfall' (Seyfried), 1799; 'Amors Schäffchen' (Seyfried), 1800, At the Theater an-der-Wien—opening night—'Alexander' (Teyber) and 'Thespis Traum,' and 'Proteus und Arabiens Söhne' (Stegmayer), 1801; 'Tsching! Tsching!' (Haibel), 1802; 'Die Entlarvten,' a continuation of the 'Waldmänner' (Anton Fischer), and 'Pfändung und Personenarrest' (Teyber), 1803; 'Der Stein der Weisen' (Schack and others), 1804; 'Swetards Zauberthal' (Fischer), 1805; 'Die Eisenkönigin' (Henneberg), and 'Die Kurgäste am Sauerbrunnen' (Anton Diabelli), Schikaneder's last piece, given for his benefit, 1806.

[C.F.P.]

SCHILLING, Dr. Gustav, author of a book much esteemed in Germany, though little known in England—'Encyclopädie der gesammten musikalischen Wissenschaften, oder Universal Lexikon der Tonkunst.'[2] He was born Nov. 3, 1805, at Schwiegershausen, Hanover, where his father was clergyman. He was brought up at Göttingen and Halle, and in 1830 settled in Stuttgart as director of Stöpel's Music School. In 1857 he went to America, and is now living in Montreal. He has published several other works bearing on music, but none of the importance of that already mentioned. [G.]

SCHIMON, Adolf, son of an Austrian artist, well-known for his portraits of Beethoven, Weber, Spohr, etc., was born on Feb. 29, 1820, at Vienna. At 16 he went to Paris and entered the Conservatoire as a pupil of Berton and Halévy. In 1844 he brought out an opera called Stradella at the Pergola in Florence. In 1850 he was in London, and took a provincial tour with Balfe, Reeves, and Clara Novello. From 1854 to 59 he was attached to the Italian opera in Paris, and in 1858 produced a comic opera, 'List um List,' which was successful in North Germany. In 1872 we find him again at Florence, where he married Miss Anna Regan. (See below.) From 1874 to 77 he was teacher of singing in the Conservatorium at Leipzig, and from thence was called to Munich, where he is now professor of singing in the Royal Music School. His original compositions embrace quartets, trios, and solos for the PF., and songs in various languages, and he has edited many vocal pieces by Scarlatti, Porpora, Paradies, and other old Italian masters. His wife, Anna Regan-Schimon, was born at Aich, near Carlsbad, Sept. 18, 1841, and was brought up in the house of Dr. Anger in Carlsbad till 1859, when she was placed as a pupil with Mme. Schubert (*née* Maschinka-Schneider) in Dresden. In the following year she accompanied Mad. Sabatier-Ungher, the great contralto, to Florence, where she remained under the care of that eminent artist till Feb. 1864. During this time she made her first attempts on the stage at Siena, her success in which encouraged her in further study. From 1864 to 67 she was engaged at the Court theatre at Hanover. Then as Kammersängerin to the Grand Duchess Helena in St. Petersburg, where she sang at three of the seven concerts given by Berlioz. In 1869 she visited London in company with her old friend and teacher, Mad. Sabatier, sang twice at the Philharmonic and three times at the Crystal Palace, and at Mr. C. Halle's Recitals, etc. From this time till 1875 she was frequently in England, widely-known and much liked for her exquisite delivery of Schubert's and other songs. In 1870 and 71 she visited Vienna with great success, and in 1872 married Dr. Schimon. Since then, excepting two brilliant tournées with Monbelli, Sivori, Trebelli, etc., in the winters of 1872 and 1873, she has almost retired from public appearance, save only at the Gewandhaus Concerts at Leipzig, where she is a regular and very favourite singer. [G.]

SCHINDELMEISSER, Louis, was born at Königsberg, Dec. 8, 1811, and educated at the Gymnasium at Berlin. Music he learned from a French musician named Hostié, and from Gährich. He first adopted the clarinet, but afterwards took a wider range. From 1832 to 1837 he filled Capellmeister's posts at Salzburg, Innspruck, Gratz, then at Berlin (Königstadt theatre), and at Pesth, where he remained for nine years. He at length came to an anchor as Court-capellmeister at Darmstadt, where he died March 30, 1864. His works embrace six operas—'Mathilde,' 'Ten happy days,' 'Peter von Szapary' (Pesth, 1839), 'Malvina' (Pesth, 1851), 'The Avenger,' 'Melusine'; an oratorio, 'S. Boniface'; an overture to 'Uriel Acosta,' and incidental music to various plays; Concerto for clarinet and orchestra; and a concertante for four clarinets and orchestra; songs, PF. pieces etc. The overture to 'Uriel Acosta' was much played in Germany, and was formerly often to be heard at the Crystal Palace. [G.]

[1] A locality in one of the suburbs of Vienna.

[2] Encyclopædia of General Musical Knowledge, or Universal Lexicon of Music (7 vols. 8vo. Stuttgart, 1835–40).

SCHINDLER, ANTON, the devoted friend and biographer of Beethoven, was born in 1769 at Modl, Neustadt, Moravia, where his father was cantor and schoolmaster. He began the study of music and the violin early in life. While quite young he entered the Vienna University to study law, and assiduously kept up his music by practice in an amateur orchestra. His introduction to Beethoven took place accidentally in 1814, when he was asked to take a note from Schuppanzigh to the great composer. This was followed by a ticket to Schuppanzigh's concert, at which Schindler was recognised by Beethoven. Later in the year he played in Beethoven's two concerts of Nov. 29 and Dec. 2; early in 1815 he accepted a situation as teacher at Brunn, but being questioned by the police on his acquaintances at Vienna, and his papers not being in perfect order, he was detained for some weeks, and had to return to Vienna. Beethoven sent for him, and conversed with him on the subject. They met often, Schindler accompanied him in his walks and the intimacy increased until, early in 1819, on the recommendation of Dr. Bach, he became a kind of secretary to Beethoven, and at length, in 1822, took up his residence in the master's house. He then became conductor at the Josephstadt Theatre, where he studied several of Beethoven's great works under his own direction. Beethoven, however, at last began to tire of his young friend, and after much unpleasantness, in 1824, after the failure of the concert of May 23, the breach came. Beethoven behaved with great violence and injustice, and Schindler was driven from him till Dec. 1826, when he arrived in Vienna from Gneixendorf to die. Schindler at once resumed his position, attended him with devotion till his death, wrote several [1] letters to Moscheles on the details of the event, and in company with Breuning took charge of Beethoven's papers. Breuning died, and then the whole came into Schindler's hands.

In 1831 he wrote some interesting articles on Beethoven and Schubert in Bäuerle's Theaterzeitung. In December he left Vienna and became capellmeister to the cathedral at Münster, a post which he exchanged four years later for that of music director at Aix-la-Chapelle. After some years he relinquished this, became first a private teacher and then went entirely into private life. He lived in various towns of Germany, and at length in Bockenheim, near Frankfort, where he died Jan. 16, 1864.

His book on Beethoven was entitled 'Biographie von Ludwig van Beethoven. Mit dem Porträt Beethoven's und zwei Facsimilen' (Münster, 1840, 1 vol. 8vo).[2] This was followed by 'Beethoven in Paris . . . ein Nachtrag zur Biographie Beethoven's' etc. (Münster, 1842; 1 thin vol. 8vo.) and that by a second edition of the 'Biographie' with additions (Münster, 1845, 1 vol. 8vo.). The third, and last, edition appeared in 1860—'Dritte, neu bearbeitete und vermehrte Auflage' (Münster, 1860; in 2 vols.), with a portrait and 2 facsimiles. Being so long about Beethoven he accumulated many autographs and other papers and articles of interest, and these he disposed of to the library at Berlin for an annuity. His sister was a singer, who in the year 1830 was engaged at the Königstadt Theatre, Berlin.

Schindler has been the object of much obloquy and mistrust, but it is satisfactory to know, on the authority of Mr. Thayer, that this is unfounded, and that his honesty and intelligence are both to be trusted. The article in which this is set forth at length and conclusively, arrived too late to be inserted here, but will be printed in the Appendix. The well-known story of his visiting card being engraved 'A. Schindler, Ami de Beethoven,' turns out to be a mere joke. [G.]

SCHIRA,[3] FRANCESCO, long resident and esteemed in London as composer, conductor, and professor of singing, was born at Malta, Sept. 19, 1815, received his early education at Milan,[4] and was placed at the age of nine (1824) in the Conservatorio, where he learned counterpoint under Basily, principal of that institution. At 17, having completed his studies, Francisco was commissioned to write an opera for the Scala, which was produced Nov. 17, 1832. That 'Elena e Malvina'[5] won favourable recognition may be inferred from the fact that a Lisbon *impresario* being at Milan, with the object of forming a company for the Santo Carlos, contracted an engagement with Schira for the forthcoming season as 'Maestro Direttore, Compositore e Conduttore della Musica.' He remained eight years in the Portuguese capital, where he was also appointed Professor of Harmony and Counterpoint at the Conservatory, composing 'I Cavalieri di Valenza' and 'Il Fanatico per la Musica,' for the Santo Carlos, besides ballets, cantatas, etc. During his stay in Portugal he occasionally conducted operatic performances at the Teatro della Città di Oporto.

In January 1842 Schira quitted Lisbon for Paris, with the idea of obtaining some book in the French language which he might set to music. In Paris he made the acquaintance of Mr. Maddox, then in quest of artists for the Princess's Theatre.[6] This led to an offer from the London manager, and Schira was appointed director of music and orchestral chief at that establishment. On Monday, Dec. 26, 1842, the Princess's opened as a lyric theatre, and Schira's appearance at the conductor's desk was his first introduction to the English public. The opera chosen was an English version of 'La Sonnambula,' the leading characters sustained by Mme. Eugenie Garcia, Mme. Feron, Mr. Templeton, Mr. Walton and Mr. Weiss;

[1] Printed in Moscheles's Life, i. 145-179.

[2] This is the book which was translated or adapted by Moscheles (London, Colburn, 1841), strange to say with no mention of Schindler on the title-page.

[3] The name is sometimes spelt Schirra.

[4] He was the youngest of four children, two of them sisters. The 'Biographie Universelle des Musiciens' makes Francesco die of cholera at Lisbon; but Pougin ('Supplement et Complement') more correctly attributes that fate to Vincenzo, the elder, whom Fétis does not mention, confounding the two together as one.

[5] Pougin gives that opera to Vincenzo, but a printed copy of the libretto (in our possession) states explicitly 'musica del maestro *Francesco* Schira.'

[6] Previously known as the Oxford Street Theatre.

Mr. Loder (father of Edward Loder) being principal violin. This was but the commencement of a series of adaptations from foreign works, diversified by novelties from indigenous pens. Among notable incidents during Schira's term of conductorship may be specified the memorable *début* of Anna Thillon in an English version of Auber's 'Diamans de la Couronne' (May 1844), that of Mlle. Nau in 'La Sirène' (Nov. 1844), and the production of two operas by Balfe, originally composed for the Paris Opéra Comique—'Le Puits d'Amour,' rechristened 'Geraldine' (Nov. 1843), and 'Les Quatre Fils d'Aymon,' rechristened 'The Castle of Aymon' (Nov. 1844). At the end of 1844 Schira accepted an engagement from Mr. Alfred Bunn, then lessee of Drury Lane, to fill the place left vacant by Mr. (now Sir Julius) Benedict, who resigned immediately after Balfe's 'Daughter of St. Mark' was brought out. At Drury Lane he remained until the spring of 1847, when Mr. Bunn seceded from the management, the committee having entertained the proposal of M. Jullien to become future lessee; and here several adaptations of foreign operas, besides a good number of works by English composers, were produced. From the latter it will suffice to name Wallace's 'Maritana' and 'Matilda of Hungary,' Macfarren's 'Don Quixote,' Benedict's 'Crusaders,' Lavenu's 'Loretta' (composed for Mme. Anna Bishop), Balfe's 'Enchantress,' etc.; among the former, Flotow's 'Stradella' and 'Martha.' In Sept. 1848 Mr. Bunn took Covent Garden Theatre, and Schira was again appointed conductor. The season only lasted two months, but was not without interest. It comprised the first theatrical engagement after his brilliant success, the year before, at Drury Lane, of Mr. Sims Reeves, for whom an adaptation of Auber's 'Haydée' was produced, the great English tenor assuming the part of Loredano; another English adaptation of Rossini's 'Donna del Lago'; and an entirely new opera, called 'Quentin Durward,' the composition of Mr. Henri Laurent. The success of the enterprise was not in proportion to the expectations of the manager; 'Quentin Durward' was by no means a hit, and though Bunn had lowered his prices the house was prematurely closed. Thus an opera, entitled 'Kenilworth,' from Schira's own pen, which had already been put into rehearsal, with Sims Reeves in the part of Leicester, was lost to the public, and no more English opera was heard at Covent Garden until Miss Pyne and Mr. Harrison migrated from the Lyceum, to carry on their undertaking in a more spacious arena.

Although he had severed his connection with the Princess's as musical director, in which position his worthy successor was Mr. Edward Loder, Schira wrote two original works for the theatre in Oxford Street—'Mina,' produced in 1849, and 'Theresa, or the Orphan of Geneva,' in 1850, both, the latter especially, received with marked favour. The leading singers in 'Mina' were Miss Louisa Pyne, Mme. Weiss, Messrs. W. Harrison, Weiss and H. Corri; in 'Theresa' Miss Louisa Pyne, Messrs. Allen, Weiss, H. Corri, and Wynn (brother of Mr. G. A. Sala, and a humourist in his way). Mr. Bunn, however, having once more become lessee of 'Old Drury,' naturally looked back for his old and tried adviser. Schira was once more engaged as conductor, with W. Lovell Phillips as chorus-master. The theatre opened on Jan. 23, 1852, with an English version of 'Robert le Diable,' succeeded by 'Fra Diavolo,' with Mr. Sims Reeves (Brigand Chief), and Miss Lucombe. The principal incident that marked the season was the production of 'The Sicilian Bride,' by Balfe, in no respect one of his most successful efforts. From this time Schira devoted himself specially to giving instructions in the vocal art. He nevertheless did not neglect composition, as testified in a number of charming songs, duets, trios, etc., some of which have attained wide popularity. He also was busily employed in the composition of a grand opera, called 'Niccolò de' Lappi,' performed with marked applause at Her Majesty's Theatre in May 1863. For the Carnival at Naples, two years later, he wrote another grand opera, entitled 'Selvaggia,' which was given with brilliant success, and represented at Milan, Barcelona and elsewhere. The reception accorded to 'Selvaggia' led to his being asked to write another opera, 'Lia,' for Venice. This, also brought out during the Carnival, was hardly so much to the taste of the Venetians as its precursor. Nevertheless there are amateurs who regard 'Lia' as Schira's *capo di lavóro*.

The managers of the Birmingham Festival having commissioned Schira to write a cantata for the meeting of 1873 the work was undertaken with ready zeal, and performed under the composer's own direction on the evening of the first day (Aug. 26). The cantata is entitled 'The Lord of Burleigh,' the libretto, by Mr. Desmond Lumley Ryan, being founded upon the Laureate's well-known poem, though not a line has been appropriated from Tennyson, save the motto which heads the title-page of the printed edition. The piece was received with distinguished favour, two numbers were encored, and the composer called back with unanimity to the platform. Since then Schira has been almost silent as a producer for the stage, the only exception being an operetta, entitled 'The Ear-ring,' performed at the St. George's Hall Theatre. Anything like a catalogue of his miscellaneous pieces would occupy too much space. Enough that Francesco Schira is a composer of the genuine Italian type; Italian by birth he is also Italian by predilection—a true child of the sunny land to which we owe Piccinni, Cimarosa, Paisiello, Rossini, Bellini and Verdi. His music, while revealing the hand of one who has thoroughly mastered the principles of his art, is free from all pretence, relying upon its unaffected simplicity and grace for the impression it seldom fails to create. His most important works having been referred to, a recapitulation would be superfluous. As an instructor in singing Schira has always maintained a high position, many a public vocalist of note having profited by his counsels. In his own

country and elsewhere abroad, he holds the insignia of several orders of merit, the most prized of which is that of 'Commendatore della Corona d' Italia'—prized the more because conferred by King Humbert, *motu proprio*. [J.W.D.]

SCHIRMACHER, Dora, pianoforte player, born Sept. 1, 1857, at Liverpool, where her father is an esteemed professor of music; early developed an original talent, but was not regularly educated for music till later. At length, after thorough instruction from her father, she went in 1872 to the Conservatorium at Leipzig. After passing with éclat through the course, she played at the Gewandhaus, Feb. 1, 1877. On March 31 of the same year she made her début in London at the Crystal Palace, and at the Monday Popular Concert on Dec. 3. At both these places she has played more than once since those dates. In Liverpool, Manchester, and other provincial English towns, and in Amsterdam, Leipzig, Frankfort, Stuttgart, and other German places, she is often heard, and greatly esteemed for her poetical rendering and her varied répertoire. [G.]

SCHLADEBACH, Julius, born at Dresden, 1810, was brought up as a physician. In 1854 he projected a Universal Lexicon of Music, and published a few numbers of it (Leipzig, 1855–) after which it was completed by Bernsdorf. It contains both music and musicians, and is to a certain point an excellent work. [G.]

SCHLEIFER. See Slide.

SCHLEINITZ, Conrad, Dr. juris, although not a professional musician was, in the words of Ferdinand[1] Hiller, 'one of the most accomplished of living amateurs,' and in any case deserves a high place in a Dictionary of Music, since it was in great measure through his discernment and perseverance that the Gewandhaus Concerts at Leipzig were put into Mendelssohn's hands, and that the arrangements were maintained in such efficiency, whereby an immense impetus was given to orchestral music throughout Europe. He was also greatly instrumental in the foundation of the Conservatorium, of which he was President for many years up to the time of his death.

Dr. Schleinitz was born Oct. 1, 1805, at Zaschwitz in Saxony, and died in his house at Leipzig on the morning of May 13, 1881. He was bred to the law, took the degree of 'Dr. juris,' and is always mentioned in the German papers as 'Herr Advokat Schleinitz,' and it is shown from a letter of Mendelssohn's (Aug. 1, 1838) that his business was at one time a good and improving one. He appears to have been a good tenor singer, and as such we find him among the solo performers at the Festival at Halle in 1830; at Leipzig on Good Friday 1835, and in Mendelssohn's 'Elijah' on the same day, 1848. We may form some idea of the energy and intelligence of his style as a singer, and his general knowledge of music, from Mendelssohn's remarks on the first performance of 'St. Paul' in a letter to him July 5, 1836.

His first communication with Mendelssohn as to the concerts was very early in 1835. Mendelssohn's answer to it, and to a subsequent letter, will be found in his printed Letters, under date Jan. 26, and May 18 of the same year. His first concert was on Oct. 4, 1835, and from that time till his death, in 1847, the intercourse between him and Schleinitz was never interrupted. Schleinitz throughout those twelve years showed himself always the thoughtful, devoted assistant of his great friend, relieving him of anxiety as to the business arrangements of the concerts, and smoothing his path to the best of his ability. That their intercourse did not stop there may be gathered from an expression or two in Mendelssohn's correspondence, and from the recollection of those still living who were in Leipzig at that time. The four printed letters bear no proportion to the mass which were in Dr. Schleinitz's possession, and which the writer was privileged to see when collecting materials for the sketch of Mendelssohn in this Dictionary—some of which will possibly be published. Mendelssohn dedicated the Midsummer Night's Dream music to him, and a book of 6 songs (op. 47) to his wife, and Dr. Schleinitz was in possession of several more or less important pieces of music of his still unpublished. The 'Nachtlied' (op. 71, no. 6) was composed and written for his birthday, Oct. 1, 1847, and is therefore the last[2] work of the great composer. Schleinitz was with his friend when he died, and was one of the Committee for dealing with his unpublished works. In the Allg. mus. Zeitung of Dec. 27, 1848 (the last No. of the old series) he published the statutes of a Mendelssohn Fund, in connexion with the Conservatorium of Leipzig, with a letter from the King approving and authorising the scheme.

In his later years Dr. Schleinitz was nearly blind, but this did not interfere with his devotion to the Conservatorium and the Gewandhaus Concerts, nor, as the writer is glad to mention, with his eager kindness towards those who wished to know about Mendelssohn.

He was a Knight of the Royal Saxon Order of Merit. [G.]

SCHLESINGER. A well-known musical-publishing house in Berlin. It was founded in 1795 by Martin Adolph Schlesinger, a man of very original character and great ability. Among the principal works issued by him is his edition of the Great Passion music (Matthew) of J. S. Bach, one of the fruits of Mendelssohn's revival[3] of it, and an astonishingly bold undertaking for those days—which Schlesinger brought out, according to his favourite expression, 'for the honour of the house.' It was announced in Sept. 1829, and published soon afterwards both in Full and PF. score. He also founded the Berliner Allg. mus. Zeitung, which under the editorship of A. B. Marx had for 7 years (1824–

[1] F. Hiller's 'Mendelssohn,' translated by Miss M. E. von Glehn, p. 152.

[2] See vol. ii. p. 292, note 5.

[3] March 11, 1829. See Marx's 'Erinnerungen,' ii. pp. 50, 87.

30) much influence for good in Germany. [See vol. ii. 430.] He died in 1839.

His second son, HEINRICH (born 1807), carried on the business till his death in 1879. He founded the 'Echo' in 1851, a periodical which remained in his hands till 1865.

The eldest son, MORITZ ADOLPH, left Berlin, and in 1819 entered the bookselling house of Bossange père at Paris. In 1823 he endeavoured to found a similar business for himself. Police difficulties prevented him from carrying out his intention, and he founded a music business instead, which for many years has had the lead among French publishers, and is now nearly as famous as Paris itself. He brought his German tastes with him, and an unusual degree of enterprise. His first serious effort was an edition of Mozart's operas in PF. score, for which Horace Vernet designed the titlepage. This was followed by editions of the complete works of Beethoven, Weber, Hummel, etc., and a 'Collection de chefs d'œuvre' in 24 vols. He published also the full scores of Meyerbeer's 'Robert,' and 'Les Huguenots'; Halévy's 'L'Eclair,' 'La Juive,' 'Les Mousquetaires,' 'La Reine de Chypre,' 'Guido et Ginevra,' 'Charles VI'; Donizetti's 'La Favorite'; Berlioz's 'Symphonie fantastique,' and overture to the 'Carnaval Romain'; the arrangements of Wagner; the chamber-music of Onslow, Reissiger, and a host of other pieces of all descriptions, for which the reader must be referred to the catalogue of the firm. Amongst the educational works the 'Méthode des Méthodes' is conspicuous. On Jan. 5, 1843, he issued the first number of the 'Gazette Musicale,' which in a few months was united to the 'Revue Musicale,' and ran a useful and successful course till its expiry in 1881. [See vol. iii. 121*b*.] In 1846 M. Schlesinger sold the business to MM. Brandus and Dufour, and retired to Baden Baden, where he died in Feb. 1871. [G.]

SCHLOESSER, LOUIS, born at Darmstadt in 1800, learnt music there from Rinck, and in Vienna from Seyfried, Salieri, and Mayseder. In due time he entered the Conservatoire at Paris, and attended the violin class of Kreutzer and the composition class of Lesueur. He then went to Darmstadt and became first leader and then conductor of the Court band. His works comprise 5 operas, a melodrama, music to Faust, a mass, a ballet, and a quantity af instrumental music of all descriptions. His son, CARL WILHELM ADOLPH, was born at Darmstadt Feb. 1, 1830. He was educated by his father, and in 1847 established himself at Frankfort. In 1854 he went to England, where he has been ever since settled in London as an esteemed teacher.

He has published both in England and Germany a great number of PF. works, both solos and duets; including a suite dedicated to Cipriani Potter, and a set of 24 studies; many songs and vocal pieces, including 'Merrily, merrily over the snow' and an 'Ave Maria'—and has many larger works in MS. His 'Schumann Evenings' were well known, and did much to advance the knowledge of Schumann in England. [G.]

SCHMID, ANTON, Custos of the Hofbibliothek in Vienna, born at Pihl, near Leipa in Bohemia, Jan. 30, 1787, entered the Imperial Library at Vienna in 1818, became Scriptor in 1819, Custos in 1844, and died at Salzburg, July 3, 1857. His department as a writer was the history and literature of music and hymns. He contributed to the following works:—Dr. Ferdinand Wolf's 'Ueber die Lais, Sequenzen, und Leiche' (Heidelberg, 1841); Becker's 'Darstellung der musikalischen Literatur' (supplement, Leipzig, 1839); A. Schmidt's 'Allg. Wiener musik. Zeitung' (from 1842 to 48); Dehn's 'Cäcilia' (from 1841 to 48; Mayence, Schott); and the 'Oesterreich. Blätter für Lit. und Kunst' (1844, 45). His independent works are 'Ottaviano dei Petrucci of Fossombrone, the inventor of moveable metal types for printing music, and his successors' (Vienna, Rohrmann, 1845); 'Joseph Haydn und Nicolo Zingarelli,' proving that Haydn was the author of the Austrian national hymn (Vienna, Rohrmann, 1847); 'Christoph Willibald Ritter von Gluck, his life and musical works. A biographical æsthetical study (Leipzig, Fleischer, 1854); also a work on chess, 'Tschaturanga-vidjâ' (Vienna, Gerold, 1847).

Schmid was of a modest and retiring disposition, and distinguished in his official capacity for conscientiousness, industry, and courtesy. To him in the first instance is due the orderly and systematic arrangement of the musical archives of the Hofbibliothek. In recognition of his unwearied industry and research he was made a member of the Historische Verein of Upper Bavaria, of the Dom-Musikverein and the Mozarteum of Salzburg, of the Congregazione ed Accademia Pontifica di Santa Cecilia of Rome, of the Società litteraria dell' Areopago of Genoa, and of the Archæological Societies of Vienna, Nuremberg, etc. [C.F.P.]

SCHMITT, a German musical family. The founder of it was Cantor at Obernburg in Bavaria. His son ALOIS was born at Erlenbach on the Main in 1789, and taught to play by his father; he then learned composition from Andre of Offenbach, and in 1816 established himself in Frankfort as a PF. teacher. After a few successful years there—during which, among others, he had taught Ferdinand Hiller—and much travelling, he migrated to Berlin, then to Hanover, where he held the post of Court Organist, and lastly back to Frankfort, where he died July 25, 1866. His reputation as a teacher was great, though he had a passion for journeys, and his pupils complained of his frequent absences. He composed more than 100 works, chiefly instrumental, of all descriptions, including some useful PF. studies.

His brother JAKOB, born at Obernburg Nov. 2, 1803, was a pupil of Alois. He settled in Hamburg, where he brought out an opera (Alfred the Great) and a prodigious amount of music, including many sonatas for the piano, solo and with violin, variations, three books of studies, etc., in all more than 300 works; and died June 1853.

The son of Alois, GEORG ALOIS, was born Feb. 2, 1827, during his father's residence at Hanover. Music came naturally to him, but it was not till after some time that he decided to follow it. He was then at Heidelberg university, and put himself under Vollweiler to serious study of counterpoint. His first attempt was an operetta called 'Trilby,' which was performed at Frankfort in 1850, with great success. He then passed some years in various towns of Germany, and at length, in 1856, was called by Flotow to Schwerin as Court-capellmeister, where he still resides. In 1860 he visited London, and played with *éclat* before the Queen, and elsewhere. He is much valued through the whole of Mecklenburg, and has kept up the reputation of his family by writing a quantity of music of all classes, from a Festival Cantata (Maienzauber) downwards. Emma Brandes, now Mad. Engelmann, the eminent pianist, was his pupil. His wife, CORNELIA SCHMITT, *née* Csányi, was born in Hungary, Dec. 6, 1851. Her father took a main part in the Revolution, and was imprisoned for 10 years, but the mother, finding remarkable gifts for music in her daughters, found means to take them to Vienna for their education. There Cornelia learnt singing from Caroline Pruckner. Engagements at Pressburg and Schwerin followed, and her marriage was the result. Since then she has left the boards and taken to concert singing. [G.]

SCHNEIDER, FRIEDRICH JOHANN CHRISTIAN, composer, teacher, and conductor, born Jan. 3, 1786, at Alt-Waltersdorf, near Zittau, composed a symphony as early as 10. In 1798 entered the Gymnasium of Zittau, and studied music with Schönfelder, and Unger. In 1804 he published 3 PF. sonatas, and having entered the University of Leipzig in 1805 carried on his musical studies to such purpose that in 1807 he became organist of St. Paul's, in 1810 director of the Seconda opera, and in 1812 organist of St. Thomas's church. There he remained till 1821, when he became Capellmeister to the Duke of Dessau, whose music he much improved, and founded in the town a Singakademie, a schoolmaster's choral society, and a Liedertafel. In 1829 he founded a musical Institute, which succeeded well, and educated several excellent musicians, Robert Franz among the number. Schneider was also an industrious composer, his works comprising oratorios—'Das Weltgericht' (1819), 'Verlorne Paradies' (1824), 'Pharao' (1828), 'Christus das Kind,' and 'Gideon' (1829), 'Getsemane und Golgotha' (1838); 14 masses; Glorias and Te Deums; 25 cantatas; 5 hymns; 13 psalms, 7 operas; 23 symphonies; 60 sonatas; 6 concertos; 400 Lieder for men's voices, and 200 ditto for a single voice—all now forgotten except the men's part-songs. Schneider directed the musical festivals of Magdeburg (1825), Nuremberg (1828), Strasburg (1830), Halle (1830 and 35), Halberstadt (1830), Dessau (1834), Wittenberg (1835), Coethen (1838 and 46), Coblenz and Hamburg (1840), Meissen (1841), Zerbst (1844), and Lübeck (1847). He also published didactic works—'Elementarbuch der Harmonie und Tonsetzkunst' (1820), translated into English (London, (1828); 'Vorschule der Musik' (1827); and 'Handbuch des Organisten' (1829–30). The oratorio of the 'Sündfluth' was translated into English as 'The Deluge' by Professor E. Taylor, published in London and probably performed at one of the Norwich festivals.

Schneider was a doctor of music, and a member of the Berlin and several other Academies. He died Nov. 23, 1853. Some traits of his curious jealous temper will be found in Schubring's Reminiscences of Mendelssohn, in 'Daheim' for 1866, No. 26. He was vexed with Mendelssohn for his revival of Bach's Passion—but the feeling passed away; and in the 'Signale' for 1866, Nos. 46, 47, 48, there are eight letters (1829–45) from Mendelssohn to him showing that they were on very good terms. When Mendelssohn's body passed through Dessau, on its way to Berlin, Schneider met it at the station, with his choir, and a lament was sung, which he had purposely composed, and which will be found in the A.M.Z. for 1847, No. 48. [F.G.]

SCHNEIDER, JOHANN GOTTLOB, the celebrated Dresden organist, brother of the preceding, was born at Alt-gersdorf, Oct. 28, 1789. His musical talent was manifest at the age of 5 years, when he began to learn the organ, pianoforte, violin, and some of the orchestral wind-instruments. His first master for organ was Unger, of Zittau, and in his 22nd year he was appointed organist to the University church at Leipzig. From this period he seems to have aspired to the highest rank as organ-player, and between 1816 and 1820 gave many concerts in Saxony and elsewhere, always being recognised as one of the first organists of the day. At the Elbe Musical Festival held at Magdeburg in 1825 he played so finely as to receive shortly afterwards the appointment of Court organist to the King of Saxony, a post which he held with honour and renown to his death in April 1864. Lovers of music at Dresden will remember among the most interesting and edifying of their experiences there the grand extempore preludes to the opening chorale at the principal Lutheran church, where the great organist might be heard on Sunday mornings. On those occasions that particular form of improvisation which since the time of Bach has been made a special study and feature in Germany, and which is scarcely cultivated in other countries, might be heard to the greatest advantage. The instrument, one of Silbermann's, though old-fashioned as to mechanism is of superb tone, and is well placed in a gallery.[1] As a player of Bach, Schneider was perhaps the first authority of his day, and he possessed a traditional reading of the organ works of that sublime master, with all of which he appeared to be acquainted. As a teacher, it may be recorded of him (by one who was his last pupil) that the elevation and nobility of his style, the exclusion of everything derogatory

[1] For an interesting chapter on Schneider and his organ, see Chorley's Mod. German Music, i. 320.

to the instrument, whether as regards composition or performance, his care in never overlooking an awkwardly fingered or pedalled passage, and his reverence and enthusiasm for the great music he delighted to teach, combined with other eminent qualities to place him in the foremost rank. It was his much-appreciated custom to play any composition by Bach which the pupil might ask to hear after each lesson, which in itself was a practice of priceless value as to inaccurately printed passages, *tempi*, and registration of those glorious works. Having given instruction to some of the first organists of the day, Schneider could relate interesting anecdotes of them and of many great composers, including Mendelssohn, who was one of his most devoted admirers. In the year 1861, the fiftieth of Schneider's artistic career and 73rd of his birth, a remarkable testimony to his powers was shewn in the presentation to him of a 'Jubel-Album für die Orgel,' containing about thirty original pieces, all in classical form, by some of his best pupils, including Töpfer, Van Eyken, Faisst, Fink, Herzog, Merkel, E. F. Richter, Schellenberg, Liszt, A. G. Ritter, Schaab, Hering, Naumann, Schurig, and Schutze (editor). The subscribers were 750, and included the names of the late king and royal family of Saxony.

Schneider's very few published works comprise an 'answer of thanks' to this collection, in the form of a fugal treatment of 'Nun danket alle Gott'; a Fantaisie and Fugue, op. 1; Do. Do. in D minor, op. 3—a masterly work; 'Twelve easy pieces for use at divine service,' op. 4, etc. etc. [H. S. O.]

SCHNYDER VON WARTENSEE, Xavier, so called from his castle at the S.E. end of the Lake of Constance, was born at Lucerne, of a noble family, April 18, 1786. His career would naturally have been one in accordance with his rank, but the Revolution, and a strong inward feeling, drove him in the direction of music. Until 1810 he had no teaching but what he could get from books and practice. In that year he went to Zürich, and then to Vienna, with the wish to become a pupil of Beethoven. He was however compelled to take lessons from Kienlen—perhaps a better teacher than Beethoven would have been. After a few years in the Austrian capital he returned to Switzerland, made the campaign of 1815 against the French, then became teacher in the Pestalozzian institute at Yverdun, and at length in 1817 settled at Frankfort, and lived there as teacher of composition and director of various musical institutions till his death, Aug. 30, 1868. During this latter period he was much esteemed as a teacher, and had many pupils, among them our countryman Pearsall.

Schnyder appears to have been a man of exceptional ability, but his life was too desultory to admit of his leaving anything of permanent value, and there was always a strong amateur element about him. His compositions are numerous and of all classes: an opera 'Fortunatus' (1829), an oratorio for men's voices—both brought to performance, and the opera to publication; symphonies, which were played in Frankfort; solo and part-songs, etc. He wrote much, both poetry and prose, and many of his articles on musical subjects were contributed to the 'Allg. musik. Zeitung' and 'Cæcilia.' He was also a wit, and Hauptmann has preserved one story which is worth repeating, considering the date of its occurrence. After one of the early performances of Tannhäuser, Schnyder was asked his opinion. 'Well, said he, I put Wagner above Goethe and Beethoven. Yes; he composes better than Goethe and writes verse better that Beethoven.' A romance and duet and a song from Fortunatus are given in the A. M. Z. for 1832, and the former of the two is reprinted in the Musical Library, iii. 133. They are both melodious and well accompanied. [G.]

SCHOBER, Franz von, an Austrian poet, the youngest child of four, born at Torup, near Malmoe, in Sweden, May 17, 1798. His mother lost her fortune during the French occupation of Hamburg—the same which drove the Mendelssohns to Berlin—and Franz had but a desultory education. She returned to Austria, and he became tutor in the Festetics and Urmenyi and other Hungarian families. He first knew Schubert as early as 1813, by meeting with some of his songs at the house of Spaun; he at once made his personal acquaintance, and induced Schubert to live with him for a few months, till the return of Schober's brother. This was the beginning of an intimacy which lasted till Schubert's death, and during the greater part of which he had always his room in Schober's house. The two, being so nearly of an age, became very intimate; Schober was devoted to him, and Schubert set several of his poems to music,[1] besides the libretto of 'Alfonso and Estrella.' He was chief mourner at the funeral of his friend in 1828. In 1843 we find him at Weimar with Liszt, and in the service of the Grand Duke. In 1856 he settled in Dresden for a few years; in 1860 removed to Pesth; in 1869 to Munich; and since then has lived in Gratz and other places. His works embrace poems (8vo. 1842, 1865), and various occasional pamphlets. [G.]

SCHOBERLECHNER, Franz, born at Vienna, July 21, 1797. Hummel composed for him his 2nd Concerto, in C, which he performed in public with success when only ten years old. The precocious child was taken under the patronage of Prince Esterhazy, and sent to Vienna, to study under Förster. From 1814 he travelled in Austria and Italy. While at Florence he composed a requiem, and a *buffa* opera, 'I Virtuosi teatrali.' In the next year, having been appointed chapel-master to the Duchess of Lucca, he wrote 'Gli Arabi nelle Gallie,' and subsequently, at Vienna, in 1820, 'Der junge Onkel.' In 1823 he went to Russia. He seems to have written to Beethoven, before starting, for letters of introduction. The *maestro*, however, wrote across his letter, 'an active fellow requires no other recommendation than from one respectable family to another,' and gave it back to

[1] Op. 16, No. 1; 23, No. 4; 88, No. 4; 96, No. 2; 102; 104; 108, No. 2; 109, Nos. 1, 2; 123; Lief. 10, No. 6; 18, No. 1; 21, No. 2; 24, No. 1; 'Trost im Liede.' [F.A.M.]

Schindler, who showed it to Schoberlechner, and, no doubt at his desire, again urged Beethoven to comply with the request. Beethoven however did not know Schoberlechner, and had no very high opinion of him, as he played chiefly bravura pieces, and pompously paraded all his titles and decorations, which gave occasion for many a sarcastic remark from Beethoven.[1]

At St. Petersburg he recommended himself to dall' Occa, a professor of singing, whose daughter he married in 1824. After travelling in Germany and Italy, the pair returned to St. Petersburg in 1827, where Mme. Schoberlechner was engaged for three years at the Italian Opera at a salary of 20,000 roubles. Her husband composed for her an opera, 'Il Barone di Dolzheim,' which had some success. After a few more years wandering, Schoberlechner retired to a country house near Florence. His last opera was 'Rossane,' produced at Milan, Feb. 9, 1839. He died at Berlin on Jan. 7, 1843.

His published works are chiefly for the pianoforte; a list of them is to be found in Fétis's 'Biographie des Musiciens.' His wife,

Madame Sophie Schoberlechner, daughter of Signor dall' Occa, as above stated, was born at St. Petersburg in 1807. She was her father's pupil, and married in 1824. Up to 1827 she appeared only in concerts, but was then engaged at the Italian Opera of St. Petersburg, as we have also already mentioned. She had a very beautiful voice, and for twelve or thirteen years sang with unvarying success in almost all the principal towns of Germany and Italy, but her organ was too delicate for such constant usage. It deteriorated early, and in 1840 she left the stage, retired to her husband's property in Tuscany, and died at Florence in 1863. [F.A.M.]

SCHOBERT—or Chobert in Mozart's orthography[2]—a player on the harpsichord, whose sonatas were the delight of our great-grandmothers. His Christian name does not appear, and little is known of his biography. He is said to have been born and brought up at Strassburg. He settled in Paris before 1761, in which year his first works were published there, where he was in the service of the Prince de Conti. On the occasion of his death, Aug. 1767, Grimm, no mean judge of music, inserts in his 'Correspondance' a very high eulogium on his merits as a player. He praises him for 'his great ability, his brilliant and enchanting execution, and an unequalled facility and clearness. He had not the genius of our Eckard, who is undoubtedly the first master in Paris; but Schobert was more universally liked than Eckard, because he was always agreeable, and because it is not everyone who can feel the power of genius.' This is the description of a pleasant brilliant player who never soared above the heads of his audience. He left 17 sonatas for PF. and violin; 11 for PF., violin and cello; 3 quartets for PF., 2 violins and cello; 6 'sinfonies' for PF., violin and 2 horns; 6 PF. concertos, and 4 books of sonatas for PF. solo.[3] These seem to have been originally published in Paris, but editions of many of them appeared in London between 1770 and 1780. The particulars of his death are given by Grimm. It was occasioned by eating some fungi which he gathered near Paris, and which killed his wife, his children, a friend, the servant, and himself.[4] Schobert and Eckard are alike forgotten by modern musicians. A Minuetto and Allegro molto in Eb have been reprinted in Pauer's 'Alte Meister,' other movements in the 'Maitres du Clavecin,' and a Sonata, so-called, in the Musical Library. These pieces are tuneful and graceful, but very slight in construction, the harmonies consisting chiefly of alternations of tonic and dominant, seldom in more than three parts, often only in two. Burney (Hist. iv. 591, 597) remarks that his music is essentially harpsichord music, and that he was one of the few composers who were not influenced by Emanuel Bach. It is incredible that Fétis can have discovered any likeness between Schobert and Mozart. [G.]

SCHŒLCHER, Victor, French writer and politician, son of a manufacturer of china, was born in Paris, July 21, 1804, educated at the Collége Louis le Grand, and well known as an ultra-republican. On the accession of the Emperor Napoleon III. he was expelled both from France and Belgium, but took refuge in London, where he brought out his 'Histoire des crimes du 2 Décembre' (1853), and an English pamphlet entitled 'Dangers to England of the Alliance with the men of the Coup d'Etat' (1854).

Schœlcher remained in England till August 1870, returning to Paris immediately before the Revolution of Sept. 4. As staff-colonel of the Garde Nationale he commanded the Legion of Artillery throughout the siege of Paris. After Jan. 31, 1871, he was elected to the Assemblée Nationale by the Department of the Seine, Martinique, and Cayenne, and sat for Martinique till elected a life-senator (Dec. 16, 1875).

His claim to a place in this work however is as a distinguished amateur. His devotion to art of all kinds was proved by his articles in 'L'Artiste' (1832), and 'La Revue de Paris' (1833), and he made during his travels a most interesting collection of foreign musical instruments. His long stay in England had a still more remarkable result in his enthusiasm for Handel. Up to 1850 two or three detached choruses from the 'Messiah' and 'Judas Maccabeus' were the only pieces of Handel's known in Paris; M. Schœlcher heard the fine performances of entire oratorios which are native to England, and at once resolved to do something to remove this reproach from France. He accordingly made a collection of Handel's works, and of books and pamphlets bearing on his life and music, a list of which he gives in the beginning of his book. Among them he was fortunate enough to acquire the MS. copies of the scores of the oratorios which had been used by Handel in

[1] See Note to Beethoven's Letters, translated by Lady Wallace, vol. ii. p. 118.

[3] Weitzmann, 'Geschichte des Clavierspiels.'
[4] Grimm (new ed.) vii. 422.

conducting. To the autographs in Buckingham Palace and the Fitzwilliam Museum at Cambridge, and to the copies by Smith now in possession of Mr. H. B. Lennard, he obtained access, and thus provided, published 'The Life of Handel, by Victor Schœlcher,' London, Trübner, 8vo., 1857. The author was materially assisted by Mr. Rophino Lacy,[1] whose labours are amply acknowledged in the preface (p. xxii). The work was written by M. Schœlcher in French and translated by Mr. James Lowe. It contains much information beyond what is indicated in the title, especially with regard to Italian opera and music in general in England during the 18th century. The French MS., 'Handel et son temps,' was handed over to 'La France Musicale,' which (Aug. 19, 1860) published the first four chapters, and the beginning of the fifth (Nov. 2, 1862), but there broke off, doubtless for political reasons. The MS. was supposed to have been destroyed, till May 25, 1881, when it was offered for sale by M. Charavay, and at once bought for the library of the Conservatoire, thus completing M. Schœlcher's magnificent gift (Nov. 1872) of all the works, in print or MS, used by him in preparing the book, and his collection of foreign instruments. He has since added a quantity of music and rare books bearing on the history of Italian opera in London, and on singing and pianoforte-playing in the United Kingdom. The 'Fonds Schœlcher,' as it is called, contains in all 500 volumes uniformly bound with the initials of the donor, and has already been of immense service to French artists and musicologists, whose knowledge of the madrigal writers and pianists of the English school, and indeed of Handel himself, is as a rule but imperfect. [G. C.]

M. Schœlcher's work, though the only modern English biography of Handel, is very inadequate to its purpose. The author was no musician, and was therefore compelled to depend on the labours and judgment of another. His verdicts are deformed by violent and often ludicrous partisanship; and his style, which is extremely French, has had but small assistance from his translator.[2] No man can write a serious book on a great subject without its being of some value, and Mr. Schœlcher's dates and lists are alone enough to make the student grateful to him; but it is to be hoped that before long some one may be found to produce a life of Handel which shall steer midway between the too detailed compilation of Dr. Chrysander and the curious farrago of the French Republican senator. It is a great pity that M. Schœlcher's original French work is not published. [G.]

SCHÖNSTEIN, Carl, Baron von (son of Baron Franz Xaver, who died in 1825), was born June 26, 1797, was Imperial Chamberlain and Ministerial Councillor, was twice married, retired on his pension in 1867, and died July 19, 1876. Schönstein was one of the Esterhazy circle in the time of Franz Schubert, and was noted as being at that time, with the single exception of Vogl, the finest singer of Schubert's songs. He had, says Kreissle, like Vogl, a special set of songs which exactly suited his voice, such as the 'Schöne Müllerin'—dedicated to him—'Ständchen,' 'Der zürnenden Diana,' etc.; while Vogl was more attached to the dramatic and expressive 'Winterreise,' 'Zwerg,' etc. Schönstein's position in society enabled him to introduce Schubert's music into the highest circles. In 1838 Liszt heard him in Vienna, and wrote as follows to the 'Gazette Musicale':—'In the salons here I have often heard Schubert's songs given by the Baron Schönstein, always with the liveliest pleasure, and often with an emotion which moved me to tears. The French version gives but a very poor idea of the manner in which Schubert, the most poetical musician that ever lived, has united his music to the words of these poems, which are often extremely beautiful. The German language is admirable for sentiment, and it is all but impossible for any one not a German to enter into the naïveté and fancy of many of these compositions, their capricious charm, their depth of melancholy. The Baron gives them with the declamatory science of a great artist, and the simple feeling of an amateur who thinks only of his own emotions and forgets the public.' [G.]

SCHOOLS OF COMPOSITION. In Music, as in other Arts, the power of invention, even when displayed in its most original form, has a never-failing tendency to run in certain recognised channels, the study of which enables the technical historian to separate its manifestations into more or less extensive groups, called Schools, the limits of which are as clearly defined as those of the well-known Schools of Painting, or of Sculpture. These Schools naturally arrange themselves in two distinct Classes; the first of which embraces the works of the Polyphonic Composers of the 14th, 15th, and 16th centuries, written for Voices alone; the second, those of Composers of later date, written, either for Instruments alone, or for Voices supported by Instrumental Accompaniments. The critical year, 1600, separates the two classes so distinctly, that it may fairly be said to have witnessed the destruction of the one, and the birth of the other. It is true that some fifty years or more elapsed, before the traditions of the earlier style became entirely extinct; but their survival was rather the result of skilful nursing, than of healthful reproductive energy; while the newer method, when once fairly launched upon its career, kept the gradual development of its limitless resources steadily in view, with a persistency which has not only continued unabated to the present day, but may possibly lead to the accomplishment, in future ages, of results far greater than any that have been yet attained.

The number of distinct Schools into which these two grand Classes may be subdivided is

1 M. Schœlcher's statement as to Mr. Lacy's assistance should materially modify our inferences from his account of his own part in the examination of Handel's MSS., p. xxi.

2 Who did not do his work well. Instead of modifying the natural over-exuberance of the author he has rather exaggerated it, and has allowed a number of sentences to pass which no literary man of any pretension should have written.

very great—so much too great for detailed criticism, that we must content ourselves with a brief notice of those only which have exercised the most important influence upon Art in general. In making a selection of these, we have been guided, before all things, by the principles of æsthetic analogy, though neither local nor chronological coincidences have been overlooked, or could possibly have been overlooked, in the construction of the following scheme, in accordance with which we propose to arrange the order of our leading divisions.

CLASS I. THE POLYPHONIC SCHOOLS.

I. The First Flemish School (1370—1430).
II. The Second Flemish School (1430—1480).
III. The Third Flemish School (1480—1520).

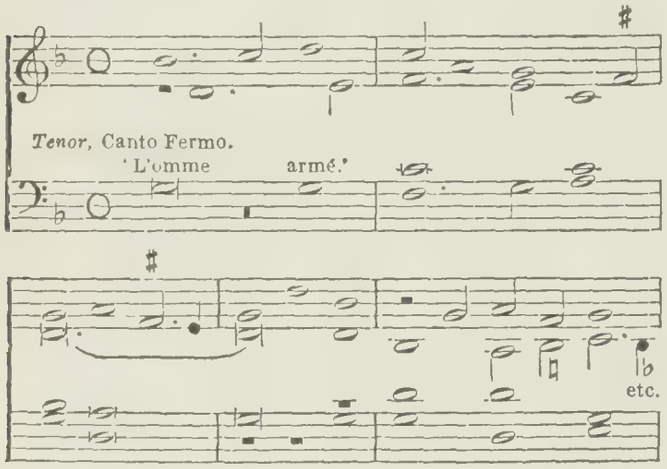
XXXV. The Schools of the Future.

I. The Art of Composition was long supposed to have owed its origin to the intense love of Music which prevailed in the Low Countries, during the latter half of the 14th century. The researches of modern criticism have proved this hypothesis to be groundless, so far as its leading proposition is concerned: yet, it contains so much collateral truth, that, while awaiting the results of farther investigation, we are still justified in representing Flanders as the country whence the cultivation of Polyphony was first disseminated to other lands. If the Netherlanders were not the earliest Composers, they were, at least, the first

Musicians who taught the rest of Europe how to compose. And, with this certain fact before us, we have no hesitation in speaking of THE FIRST FLEMISH SCHOOL as the earliest manifestation of creative genius which can be proved to have exercised a lasting influence upon the history of Art. The force of this assertion is in no wise invalidated by the strong probability that the Faux-bourdon was first sung in France, and exported thence, at a very early period, to Italy. For the primitive Faux-bourdon, though it indicated an immense advance in the practice of Harmony, was, technically considered, no more than a highly-refined development of the extempore Organum, or Discant, of the 11th and 12th centuries, and bore very little relation to the true 'Cantus super librum,' to which, alone, the term Composition can be logically applied. We owe, indeed, a deep debt of gratitude to the Organizers, and Discanters, by whom it was invented; for, without the materials accumulated by their ingenuity and patience, later Composers could have done nothing. They first discovered the harmonic combinations which have been claimed, as common property, by all succeeding Schools. The misfortune was that with the discovery their efforts ceased. Of symmetrical arrangement, based upon the lines of a preconceived design, they had no idea. Their highest aspirations extended no farther than the enrichment of a given Melody with such Harmonies as they were able to improvise at a moment's notice: whereas Composition, properly so called, depends, for its existence, upon the invention—or, at least, the selection—of a definite musical idea, which the genius of the Composer presents, now in one form, and now in another, until the exhaustive discussion of its various aspects produces a work of Art, as consistent, in its integrity, as the conduct of a Scholastic Thesis, or a Dramatic Poem. Upon this plan, the Flemish Composers formed their style. They delighted in selecting their themes from the popular Ditties of the period—little Volkslieder, familiar to men of all ranks, and dear to the hearts of all. These they developed, either into Sæcular Chansons for three or more Voices, or into Masses and Motets of the most solemn and exalted character; with no more thought of irreverence, in the latter case, than the Painter felt, when he depicted Our Lady, resting, during her Flight into Ægypt, amidst the familiar surroundings of a Flemish hostelry. At this period, representing the Infancy of Art, the Subject, or Canto fermo, was almost invariably placed in the Tenor, and sung in long-sustained notes, while two or more supplementary Voices accompanied it with an elaborate Counterpoint, written, like the Canto fermo itself, in one or other of the antient Ecclesiastical Modes, and consisting of Fugal Passages, Points of Imitation, or even Canons, all suggested by the primary idea, and all working together for a common end. This was Composition, in the fullest sense of the word; and, as the truth of the principle upon which it was based has never yet been disputed, the Musicians who so successfully

practised it are entitled to our thanks for the cultivation of a mode of treatment the technical value of which is still universally acknowledged.

The reputed Founder of the School, and unquestionably its greatest Master, was Gulielmus Dufay, a native of Chimay, in Hennegau, who, after successfully practising his Art in his own country, and probably also at Avignon, carried it eventually to Rome, where, in 1380, he obtained an appointment in the Papal Choir, and where he appears to have died, at an advanced age, in 1432, leaving behind him a goodly number of disciples, well worthy of so talented a leader. The most eminent of these were, Egydius Bianchoys, Vincenz Faugues, Egyd Flannel (called L'Enfant), Jean Redois, Jean de Curte (called L'Ami), Jakob Ragot, Eloy, Brasart, and others, many of whom sang in the Papal Chapel, and did their best to encourage the practice of their Art in Italy. A valuable collection of the works of these early Masters is preserved among the Archives of the Sistine Chapel, but very few are to be found elsewhere,[1] with the exception of some interesting fragments printed by Kiesewetter, Ambros, Coussemaker, and some other writers on the History of Music. The following passage from Dufay's 'Missa l'omme armé'—one of the greatest treasures in the Sistine Collection—will serve to exemplify the remarks we have made upon the general style of the period.



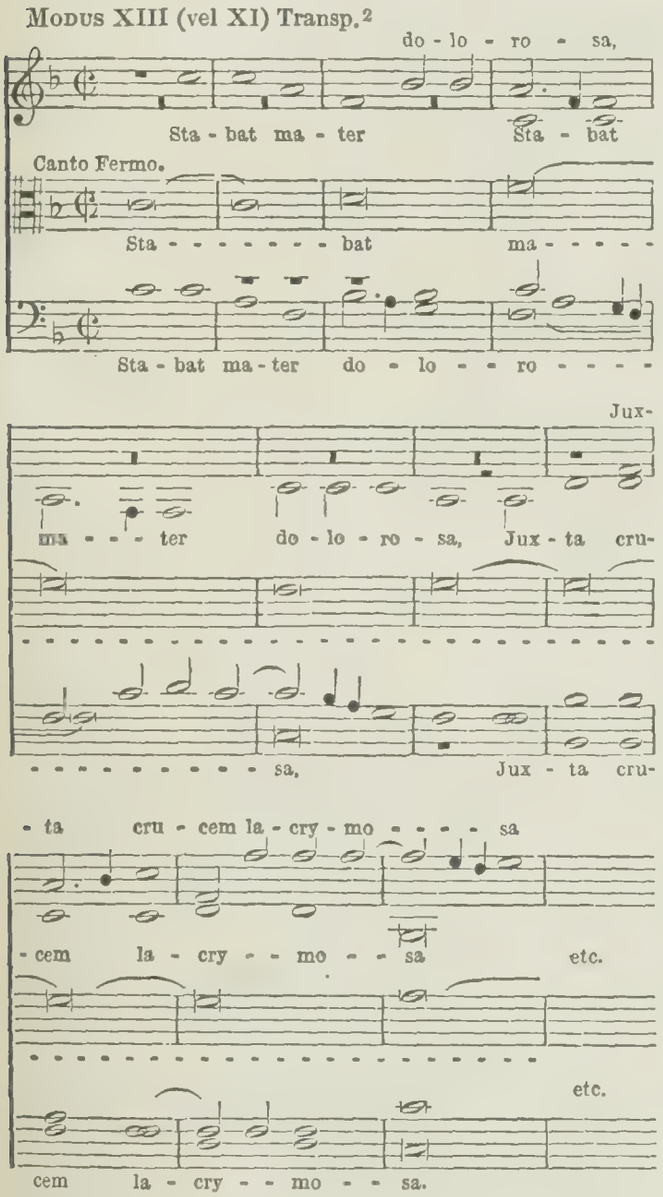
II. The system thus originated was still more fully developed in THE SECOND FLEMISH SCHOOL, under the bold leadership of Joannes Okenheim (or Ockeghem), of whom we first hear, as a member of the Cathedral Choir at Antwerp, in the year 1443. Okenheim's style, like that of his fellow-labourers, Antoine Busnoys,[2] Jakob Hobrecht, Philipp Basiron, Jean Cousin, Jacob Barbireau, Erasmus Lapicida, Antoine and Robert de Fevin, Firmin Caron, Joannes Regis, and others, of nearly equal celebrity, was more elaborate, by far, than that of either Dufay himself, or the most ambitious of his colleagues; and there is little doubt that the industry of these pioneers of Art assisted, materially, in preparing the way for the splendid creations of a later epoch. The ingenuity displayed by the leader of the School in the construction of Canons and Imitations of every conceivable kind, led to the extensive adoption of his method of working by all who were sufficiently advanced to enter into rivalry with him; and, for many years, no other style was tolerated. He, however, maintained his supremacy to the last; and if, in his desire to astonish, he sometimes forgot the higher aims of Art, he at least bequeathed to his successors an amount of technical skill which enabled them to overcome with ease many difficulties, which, without such a leader, would have been insurmountable. The greater number of his Compositions still remain in MS., among the Archives of the Pontifical Chapel, in the Brussels Library, and in other collections; but some curious examples are preserved in Petrucci's 'Odhecaton,' and 'Canti C. No. cento cinquanta,' and in the 'Dodecachordon' of Glareanus; while others, in modern notation, will be found in Burney, vol. ii. pp. 474–479, in vol. i. of Rochlitz's 'Sammlung vorzüglichen Gesangstücke,' and in the Appendix now in course of publication, by Otto Kade, in continuation of Ambros's 'Geschichte der Musik.'

III. To Okenheim was granted the rare privilege, not only of bringing his own School to perfection, but also of educating the orginator of another, which was destined to exercise a still stronger influence upon the future of Polyphony. In his famous disciple, Josquin des Prés, he left behind him a successor, no less learned and ingenious than himself, and infinitely richer in all those great and incommunicable gifts which form the distinguishing characteristics of true genius. All that one man could teach another, he taught the *quondam* Chorister of S. Quentin; but a comparison of the works of the two Composers will clearly show, that the technical perfection beyond which the teacher never dreamed of penetrating was altogether insufficient to satisfy the aspirations of the pupil, in whose Music we first find traces of a desire to please the ear, as well as the understanding. It is the presence of this desire, joined with improved symmetry of form, and increased freedom of development, which distinguishes THE THIRD FLEMISH SCHOOL, of which Josquin was the life and soul, from its ruder predecessors. This was the first School in which any serious attempt was made to use learning as a means of producing harmonious effect; and it was rich in Masters, who, however great their inferiority to their unapproachable leader, caught not a little of his fire. Pierre de la Rue (Petrus Platensis), Antonius Brumel, Alexander Agricola, Loyset Compère, Johann Ghiselin, Du Jardin (Ital. De Orto), Matthäus Pipelare, Nicolaus Craen, and Johann Japart, though the greatest, were by no means the only great writers of the age; and the list of less celebrated names is interminable. The works of these Masters, though not easily

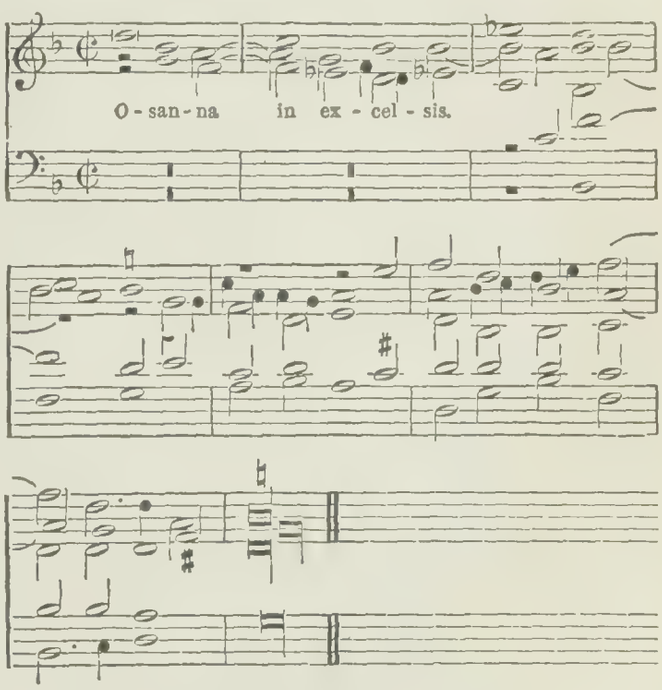
[1] Six of Dufay's Masses are, however, preserved in the Royal Library at Brussels; and the 'Gloria' of another, at Cambray. Rochlitz has printed the 'Kyrie' from his Mass 'Si la face ay pale' in vol. i. of the 'Sammlung vorzüglichsten Gesangstücke.'

[2] Baini places Busnoys among the Masters of the early School. Kiesewetter regards him, with Hobrecht, and Caron, as belonging to a transitional epoch. Ambros describes him as the leader of a distinct School, interposed between those of Dufay and Okenheim. We do not think that the amount of influence he exercised upon Art justifies this last-named arrangement.

accessible to the general reader, are well represented in the 'Dodecachordon.' Petrucci, too, has printed three entire volumes of Josquin's Masses, besides many others by contemporary writers; and the same publisher's 'Odhecaton,' and 'Canti B. and C.' contain a splendid collection of sæcular Chansons by all the best Composers of the period. The most important example, in modern Notation, is Choron's reprint of Josquin's 'Stabat Mater,' the general style of which is well shown in the following brief extract.[1]



IV. The style of The Fourth Flemish School presents a strong contrast to that of its predecessor. The earlier decads of the 16th century did, indeed, produce many writers, who slavishly imitated the ingenuity of Josquin, in utter ignorance of the real secret of his strength; but the best Masters of the time, finding it impossible to compete with him upon his own ground, struck out an entirely new manner, the chief characteristic of which was, extreme simplicity of intention, combined with a greater purity of Harmony than had yet been attempted, and a freedom of melody which lent a fresh charm, both to the Ecclesiastical and the Sæcular Music of the period. The greatest Masters of this School were, Nicolaus Gombert, Cornelius Canis, Philippus de Monte, Jacobus de Kerle, Clemens non Papa; the great Madrigal writers, Philipp Verdelot, Giaches de Wert, Huberto Waelrant, and Jacques Archadelt; Adrian Willaert, the Flemish Founder of the Venetian School; and the last great genius of the Netherlands, Roland de Lattre (Orlando di Lasso), of whose work we shall have occasion to speak at a later period. To these industrious Netherlanders the outer world was even more deeply indebted than to those of the preceding century, for its knowledge of the Art, which, so well nurtured in the Low Countries, spread thence to every Capital in Europe; and it is chiefly by the peculiar richness of their otherwise unpretending Harmonies that their works are distinguished from those of earlier date—a characteristic which is well illustrated in the following example, from Philippus de Monte's 'Missa, Mon cueur se recommande à vous,' and to which we call special attention, as we shall frequently have occasion to refer to it, hereafter, in tracing the relationship between cognate schools.



That the style we have described was the result of a reaction, neither unhealthy in its nature, nor revolutionary in its tendency, though not altogether free from violence, there can be no doubt. Singers were growing weary of the conundrums which had so long been offered to them as substitutes for the truer Music which alone can reach the heart. In the hands of Josquin, these puzzles had never lacked the impress of true genius. In those of his imitators, they were as dry as dust. With him, the solution of the ænigma led always to some harmonious result; while they were perfectly

[1] Performed by the 'Gluck Society' on May 24, 1881; and reprinted in the 'Notenbeilagen' to Ambros's 'Geschichte.'

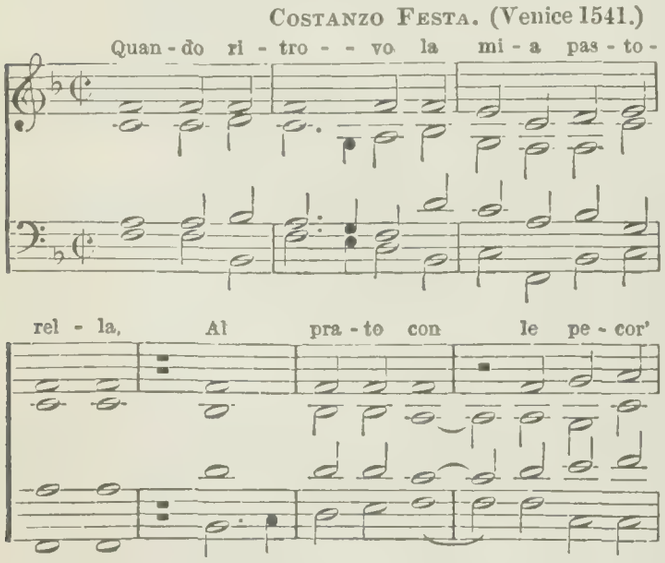
[2] Zarlino quotes this Composition as an example of the Eleventh Mode; the Ionian and Hypoionian Modes being numbered, in his system, XI, and XII, instead of XIII and XIV. [See vol. ii. p. 342 *a*.] Pietro Aron, ignoring the Transposition, and evidently regarding the B♭ as an often-recurring Accidental, speaks of the work as being written in the Fifth Mode. The Student of Antient Music will at once understand that this divergence of opinion involves no theoretical incongruity.

satisfied, provided no rules were unnecessarily broken. The best men of the period, fully alive to the importance of this distinction, aimed at the harmonious effect, and succeeded in attaining it, without the intervention of the conundrum. And thus arose a School, so simple in its construction, that more than one modern critic has accused its leaders of poverty of invention. The injustice of this charge is palpable; for when it answered the purpose of these Composers to write in a more learned manner, they invariably found themselves equal to the occasion, though they cared nothing for ingenuity for its own sake. And the result of their spirit of self-control is, that though their Church Music may be deficient in the breadth and grandeur which were attained, at a later period, in Italy, their Madrigals are among the finest in the world.

Beyond this point, Art made no great advance in Flanders. We must seek for the traces of its farther progress in Italy. [See POLYPHONIA; MASS; MADRIGAL; JOSQUIN; OBRECHT; OKEGHEM; etc. etc.]

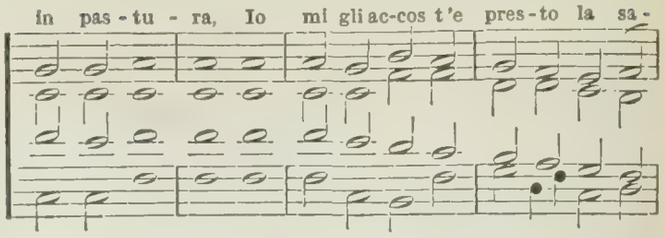
V. The formation of THE EARLY ROMAN SCHOOL was one of the most important, as well as the most obviously natural results of the employment of Flemish Musicians in the Pontifical Chapel. It was not, however, until many years after the return of the Papal Court from Avignon, that Italian Composers were able to hold their ground successfully against their foreign rivals. When they did begin to do so, the style they most affected was so strongly influenced by that then prevalent in the Netherlands, that it is not always easy to distinguish works of the one School from those of the other, as a comparison of the following passage from Costanzo Festa's Madrigal, 'Quando ritrovo la mia pastorella,'[1] with the opening of Archadelt's 'Vaghi pensier,'[2] will sufficiently demonstrate.

COSTANZO FESTA. (Venice 1541.)

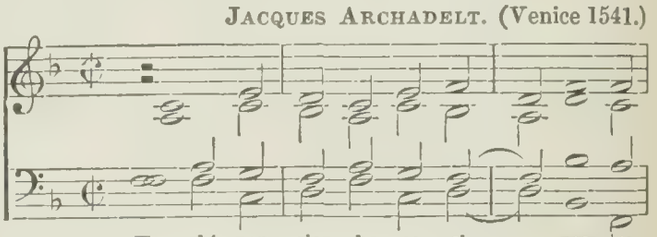


[1] Though this is, probably, the best-known Madrigal in the world, we are unable to find any printed edition, of later date than the 16th century, to which we can refer, in illustration of our remarks. The popular English translation is irreproachable, so far as the verses are concerned; but, the Music is so much altered, to accommodate them, that its rhythm is scarcely recognisable. We therefore give a few of the opening bars, as they stand in the original; referring the reader, for the remainder, to Dr. Burney's MS. Score, in the British Museum. Compare the extract also with the example from Archadelt's 'Il bianco e dolce cigno,' given in vol. ii. pp. 188-9.

[2] This Madrigal will also be found in Archadelt's Third Book.



JACQUES ARCHADELT. (Venice 1541.)



In the distribution of their Vocal Parts, the massive weight of their Harmonies, the persistent crossing of the Melodies by which those Harmonies are produced, the bright swing of their Rhythm, and other similar technicalities, these two examples resemble each other so closely, that, had they been printed anonymously, no one would ever have supposed that they could possibly have belonged to different Schools. The secret is explained by their simultaneous publication in Venice. The Netherlanders had long found a ready market for their Art Treasures, in Italy. The Italians had, by this time, learned how to produce similar treasures for themselves; and Costanzo Festa's talent placed his works at least on a level with those of his instructors, if not above them. His genius was incontestable: he was equally remarkable for his power of adaptation. Though by no means wanting, either in learning, or ingenuity, he here shows himself willing to reduce his Madrigal to the simplicity of a Faux-bourdon, in order to secure the harmonic richness so highly prized at this particular epoch. He did so, constantly, and always with success; for, to the purity of style cultivated by the best of his contemporaries in the North of Europe, Festa

added a Southern grace, which has gained him a high place among the Masters of early Italian Art. He had, indeed, but few rivals among his own countrymen. With the exception of Giovanni Animuccia, and some few Italian writers of lesser note, nearly all the best Composers for the great Roman Choirs, at this period, were Spaniards. Among these, we find the names of Bartolommeo Escobedo, Francesco Salinas, Juan Scribano, Cristofano Morales, Francesco Guerrero, Didaco Ortiz, and Francesco Soto — all Masters of the highest rank, of whom, notwithstanding their close imitation of Flemish models, we shall have occasion to speak again, when treating of the Spanish School; though none of them were so worthy as Festa himself to sustain the honour of this most interesting phase of artistic development—the first in which his country asserted her claim to special notice.

VI. Italy was once represented, by general consent, as the birthplace of all the Arts. We have shown, that, with regard to Polyphony, this was certainly not the case. We are now, however, approaching a period in which she undoubtedly took the lead, and kept it. The middle of the 16th century witnessed a rapid advance towards perfection, in many centres of technical activity; but the triumphs of this, and all preceding epochs, were destined, ere long, to be entirely forgotten in those of THE LATER ROMAN SCHOOL.

We have seen Polyphonic Art nurtured, in its infancy, by the protecting care of Dufay; in its childhood, by that of Okenheim; in the bright years of its promising adolescence, by the stronger support of Josquin, and of Festa. We are now to study it, in its full maturity, enriched by the genius of one, compared with whom all these were but as experimenters, groping in the dark. The train of events which led to the recognition of the School justly held to represent 'The Golden Age of Art' has already been discussed, at some length, [1]elsewhere; but it is necessary that we should refer to it again, in order to render the sequence of our narrative intelligible to the general reader. We have shown that the process of technical development which was gradually bringing the Motet and the Madrigal to absolute perfection of outward form, had never been interrupted. Unhappily, the spirit which should have prompted the Composer of the 16th century to draw the necessary line of demarcation between Ecclesiastical and Sæcular Music, and to render the former as worthy as possible of the purpose for which it was intended, attracted far less attention than the advantage to be derived from structural improvement. Among the successors of Josquin, there were many cold imitators of his mechanism, who, as we have already shown, were totally unable to comprehend the true greatness of his style. By these soulless pedants—more numerous, by far, than their more earnest contemporaries—the Music of the Mass was degraded into a mere learned conundrum; enlivened, constantly, by the introduction, not only of sæcular

[1] See vol. ii. pp. 228-9.

subjects, but of profane words also. Other practices, equally vicious and equally irreverent, were gradually bringing even the primary intention of Religious Art into disrepute. For, surely, if Church Music be not so conceived as to assist in producing devotional feeling, it must be something very much worse than worthless: and, to suppose that any feeling, other than that of hopeless bewilderment, could possibly be produced by a Mass, or Motet, exhibiting a laboured Canon, worked out, upon a long-drawn *Canto fermo*, by four or more Voices, all singing different sets of words entirely unconnected with each other, would be simply absurd. The Council of Trent, dreading the scandal which such a style of Music must necessarily introduce into the public Services of the Church, decided that it would be desirable to interdict the use of Polyphony altogether, rather than suffer the abuse to continue. And the prohibition would actually have been carried into effect, had not Palestrina saved the Art he practised, by showing, in the 'Missa Papæ Marcelli,' how learning as profound as that of Okenheim or Josquin, might be combined with a greater amount of devotional feeling than had ever before been expressed by a Choir of human Voices. It was this great Mass which inaugurated the later Roman School; and the year 1565, in which it was produced, has always been regarded as marking a most important crisis in the history of Art, a crisis which it behoves us to consider very carefully, since its nature has generally been discussed, either so superficially as to give the enquiring student no idea whatever of its distinctive character, or with blind adherence to a foregone conclusion equally fatal to the just appreciation of its import.

A century ago, the genius of Palestrina was very imperfectly understood. The spirit of the *cinquecentisti* no longer animated even the best Composers for the Church; and modern criticism had not, as yet, made any attempt to bring itself *en rapport* with it. Hawkins, less trustworthy as a critic than as an historian, tells us, that the great Composer 'formed a style, so simple, so pathetic, and withal so truly sublime, that his Compositions for the Church are even at this day looked upon as the models of harmonical perfection.' It is quite true that his style is 'truly sublime,' and, where deep feeling is needed, unutterably 'pathetic': but, though it may appear 'simple' to the uninitiated, it is really so learned and ingenious that it needs a highly accomplished contrapuntist to unravel its complications. Burney, though generally no less remarkable for the fairness of his criticism, than for the indefatigable perseverance with which he collected the evidence whereon it rests, tells us, in like manner, that the 'Missa Papæ Marcelli' is 'the most simple of all Palestrina's works': yet, a glance at the Score will suffice to show that much of it is written in Real Fugue, and close Imitation, of so complex a texture as to approach the character of Canon.[2] Not very long ago, this

[2] Ambros (ii. xv) goes so far as to say that 'the Basses in the "Kyrie" are carried on in Canon *all' unisono*.' They do, indeed,

wonderful Mass was supposed to possess certain constructive peculiarities which not only marked it out as the greatest piece of Church Music that ever was conceived—as it undoubtedly is—but which also interposed, between Music written before, and that produced after it, a gulf as unfathomable as that which separates the Polyphony of the 16th century from the Monodia of the 17th. No idea can possibly be more fallacious. The true Ecclesiastical Style, as determined by the 'Missa Papæ Marcelli,' differs from that which preceded it, not in its technical, but in its æsthetic character. In so far as its external mechanism is concerned, it exhibits no contrivances which were not already well known to Okenheim, Josquin des Prés, Goudimel, and a hundred other writers of inferior reputation. It was not for the sake of its faultless symmetry, that it was selected as the model of Ecclesiastical purity. Ambros, indeed, denies that it ever served as a model at all; that it effected any reform whatever in the style of Ecclesiastical Music; or even that any such reform was needed, at the time of its production. This position, however, is untenable. The opinion of a critic so learned, so talented, and, generally, so unprejudiced as Ambros, must not be lightly contravened: but, it is certain that the Council of Trent did not exaggerate the necessity for a reform, immediate, stern, and uncompromising; and, equally so, that that reform was effected by means of this Mass alone. What, then, was the secret of this wondrous revolution? It lay in the subjugation of Art to the service of Nature, of learning to effect, of ingenuity to the laws of beauty. Palestrina was the first great genius who so concealed his learning as to cause it to be absolutely overlooked in the beauty of the resulting effect. If it was given to Okenheim to unite the dry bones of Counterpoint into a wondrously articulated skeleton, and to Josquin to clothe that skeleton with flesh; to Palestrina was committed the infinitely higher privilege of endowing the perfect form with the spirit which enabled it, not only to live, but to give thanks to God in strains such as Polyphony had never before imagined. It was not the beauty of its construction, but the presence of the SOUL within it, that rendered his Music immortal. He was as much a master of contrivance as the most accomplished of his predecessors; but while they loved their clever devices for their own sake, he only cared for them in so far as they served as means for the attainment of something better. And, though his one great object in introducing this new feature as the basis of his School was the regeneration of Church Music, it was impossible that his work should rest there. In establishing the principle that Art could only be rightly used as the handmaid of Nature, he not only provided that the Mass and the Motet should be devotional; but, also, that the Chanson and the Madrigal should be sad, or playful, in accordance with the sentiment of the verses to which they were adapted. His reform, therefore, though first exemplified in the most perfect of Masses, extended afterwards to every branch of Art. The Canzonetta felt it as deeply as the Offertorium; the Frottola, as certainly as the Faux-bourdon. Henceforth, Imitation and Canon, and the endless devices of which they form the groundwork, were estimated at their true value. They were cultivated as precious means, for the attainment of a still more precious end. And, the new life thus infused into the Art of Counterpoint, in Italy, extended, in a wonderfully short space of time, to every contemporary centre of development in Europe; though the great Roman School monopolised, to the last, the one strong characteristic which, more than any other, separates it from all the rest—the absolute perfection of that *ars artem celandi* which is justly regarded as the most difficult of all arts. In this, Palestrina excelled, not only all his predecessors and contemporaries, without exception, but all the Polyphonic Composers who have ever lived. Nor has he ever been rivalled in the perfect equality of his Polyphony. Whatever may be the number of Parts in which he writes, none ever claims precedence of another. Neither is any Voice ever permitted to introduce itself without having something important to say. There is no such thing as a 'filling up of the Harmony' to be found in any one of his Compositions. The Harmony is produced by the interweaving of the separate Subjects; and when, astonished by the unexpected effect of some strangely beautiful Chord, we stop to examine its structure, we invariably find it to be no more than the natural consequence of some little Point of Imitation, or the working out of some melodious Response, which fell into the delicious combination of its own accord. In no other Master is this peculiarity so strikingly noticeable. It is no uncommon thing for a great Composer to delight us with a lovely point of repose. The later Flemish Composers do this continually. But they always put the Chord into its place, on purpose; whereas Palestrina's loveliest Harmonies come of themselves, while he is quietly fitting his Subjects together, without, so far as the most careful criticism can ascertain, a thought beyond the melodic involutions of his vocal phrases. How far the Harmonies form a preconceived element in those involutions is a question too deep for consideration here.

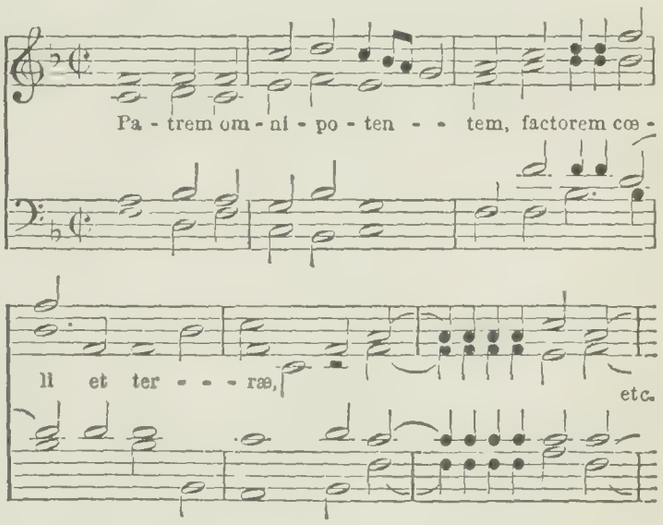
The features to which we have drawn attention, as most strongly characteristic of Palestrina's peculiar style, were imitated, without reserve, by the greatest Composers of his School; and though, in no case, does the Scholar ever approach the perfection reached by the Master, we find the same high qualities pervading the works of Vittoria, Giovanni Maria and Bernadino Nanini, Felice and Francesco Anerio, Luca Marenzio, and all the best writers of the period. The School continued, in full prosperity, until the closing years of the 16th century; and its

move in very close Imitation, answering, in many places, Interval for Interval, with the most perfect exactness: but, as this exactness is not carried out continuously, the passage cannot fairly be called a Canon.

traditions were gratefully followed, even late into the 17th, by a few loyal disciples, whose line closed with Gregorio Allegri, in 1652. These, however, were but the last devoted lovers of an Art which ceased to live within a very few years after the death of the gifted writer who brought it to perfection. With the age of Palestrina, the reign of true Polyphony came to an end. But it took firm root, and bore abundant fruit, during his lifetime, in many distant countries; and the Schools in which it was most successfully cultivated were those which most carefully carried out the principle of his great reform.

VII. The Flemish descent of THE VENETIAN SCHOOL is even more clearly traceable than that of its Roman sister; notwithstanding the well-known fact that Italian Musicians were employed in the service of the Republic, long before the time of Dufay. For, though the Archives of S. Mark's prove the existence of a long line of Organists, stretching back as far as the year 1318, when the office was held by a Venetian, described as Mistro Zuchetto,[1] we meet with no sign of the formation of a School, before the third decad of the 16th century, by which time the Art of the Low Countries had made its mark in every city in Europe. This circumstance, however, reflects no discredit upon the earlier virtuosi, whose extempore performances upon the Organ, though famous enough in their day, left, of course, no permanent record behind them. Even the first Maestro di Cappella, Pietro de Fossis—a Netherlander, of high reputation, who was presented with the appointment, together with that of Master of the Choristers, in 1491—seems to have been less celebrated as a Composer, than as a Singer. At any rate, since no trace of his productions can now be discovered, either printed or in MS., the title of the Founder of the School justly devolves upon his successor, Adriano Willaert, than whom a stronger leader could scarcely have been found. Born, at Bruges, in 1480,[2] and received as a pupil, first, by Okenheim, and afterwards, in Paris, by Josquin des Prés—or, as some imagine, by Mouton—this great representative of Flemish genius succeeded De Fossis, as Maestro di Cappella, in 1527, and, during thirty-five years of unwearied industry, enriched the Library of S. Mark's with a magnificent *repertoire* of Masses, Motets, Psalms, Canticles, and other Ecclesiastical Music, besides delighting the world with innumerable Madrigals, Canzonets, and other sæcular pieces, among which his 'Villanellæ Neapolitanæ,' à 4, stand almost unequalled for prettiness and freedom. His style presents all the best characteristics of the Later Flemish School, tempered by a rich warmth which was doubtless induced by his long residence in the most romantic city in the world. Unfortunately, though many volumes of his works were published during his lifetime, but few have been reproduced in modern Notation. A Motet, à 4, will, however, be found at p. 474, vol. ii. of Hawkins's History. [See WILLAERT.]

Willaert's successors in office were, Cipriano di Rore, who held the appointment from 1563 to 1565; Zarlino, (1565–1590); Baldassare Donati, (1590–1603), and the last great Master of the School, Giovanni dalla Croce, who was unanimously elected in 1603, and died, after five years service, in 1609. These accomplished Musicians, together with Andrea Gabrieli, who played the second Organ from 1566 to 1586, and his nephew, Giovanni, who presided over the first from 1585 to 1612, proved themselves faithful disciples of their venerable leader, cultivating, to the last, a style which combined the rich Harmony of the Netherlands with not a little of the melodic independence which we have described as peculiarly characteristic of the best Roman period. Upon this was engrafted, in the finest examples, a certain tenderness of manner, in which Croce, especially, has scarcely ever been surpassed. Still, it is always evident that the harmonious effect is the result of the Composer's primary intention, and not, as in the greatest works of the Roman School, of the interweaving of still more important melodic elements; a feature which is well illustrated by comparing the extract from the 'Missa Papæ Marcelli,' given at vol. ii. page 230, with the following fragment from Andrea Gabrieli's 'Missa Brevis.'



VIII. THE EARLY FLORENTINE SCHOOL, though far less important than that of Venice, is not destitute of special interest. A gorgeous MS., once the property of Giuliano de' Medici, and still in excellent preservation, contains Compositions by no less than seven Florentine Musicians of the 14th century. Many works of antient date are also extant, in the collections of Petrucci, and other early printers. The beauties of these are, however, entirely forgotten, in those of the more celebrated School, founded by Francesco Corteccia, who, in the earlier half of the 16th century wrote some excellent Church Music, and a number of beautiful Madrigals, the style of which differs, very materially, from that cultivated in other parts of Italy, assimilating, indeed, far less closely to the character of the true Madrigal, than to that of the Frottola—a lighter kind of composition, more nearly allied

[1] One of Mistro (=Magister) Zuchetto's successors, Bernardo di Stefanino Murer, who held the appointment from 1445 to 1459, is accredited with the invention of the Pedal-board. (See Caffi, i. 62.) Ambros calls him Bernhard der Deutsche, and gives 1470 as the date of his discovery (iii. 433). [2] Or, according to Ambros, in 1490.

to the Villanella, or Fa la. On the occasion of the marriage of Cosmo I. de' Medici with Leonora of Toledo, in 1539, Corteccia, in conjunction with Matteo Rampollini, Pietro Masaconi, Baccio Moschini, and the Roman Composer, Costanzo Festa, wrote the Music for an entertainment consisting almost entirely of Madrigals, intermixed with a few Instrumental pieces, the whole of which were printed at Venice, by Antonio Gardane. A similar performance graced the marriage of Francesco de' Medici with Bianca Capello, in 1579, on which occasion Palestrina contributed his Madrigal 'O felice ore.' For such festivities as these, the Florentines were always ready; but their greatest triumph was reserved for a later period, which must be discussed in the second division of our subject.

IX. The Schools of Lombardy were always very closely allied to those of Venice: indeed, the geographical relations of the two Provinces favoured an interchange of Masters which could scarcely fail to produce a close similarity, if not identity of style. Costanzo Porta, the greatest of Lombard Masters, though a native of Cremona, spent the most productive portion of his life at Padua. Orazio Vecchi wrote most of his best works at Modena. Apart from these, the best writers of the School were Ludovico Balbo (Porta's greatest pupil), Giac. Ant. Piccioli, Giuseppe Caimo, Giuseppe Biffi, Paolo Cima, Pietro Pontio, and, lastly, Giangiacomo Gastoldi, who brought the Fa la, the Frottola, and the Balletto, to a degree of perfection which has rarely, if ever, been equalled. The Lombard School also claims as its own the famous Theorist, Franchinus Gafurius, who wrote most of his more important works at Milan, though the earliest known edition of his earliest production appeared at Naples, in 1480.

X. To The Neapolitan School belongs another Theorist of distinction, Joannes Tinctoris, the compiler of the first Musical Dictionary on record.[1] Naples also claims a high place, among her best Composers, for Fabricio Dentice, who lived so long in Rome, that he is usually classed among the Roman Masters, though he was undoubtedly, by birth, a Neapolitan, and a bright ornament of the School; as were also Giov. Leon, Primavera, Luggasco Luggaschi, and other accomplished Madrigalists, whose lighter works take rank with the best Balletti and Frottole of Milan and Florence.

XI. The School of Bologna exhibits so few characteristics of special interest, that we may safely dismiss it, with those of other Italian cities of less importance, from our present enquiry, and proceed to study the progress of Polyphony in other countries.

XII. The Founder of The German Polyphonic School was Adam de Fulda, born about 1460; a learned Monk, more celebrated as a writer on subjects associated with Music, than as a Composer, though his Motet, 'O vera lux et gloria,' printed by Glareanus, shows that his knowledge of Counterpoint was not confined to its theoretical side. This remarkable Composition, like the more numerous works of Heinrich Finck (a contemporary writer, of great and varied talent), Thomas Stolzer, Hermann Finck (a nephew of Heinrich), Heinrich Isaak, Ludwig Senfl, and others long forgotten even by their own countrymen, bears so close an analogy to the style cultivated in the Netherlands, that it is impossible to imagine the German Masters obtaining their knowledge from any other source than that provided by their Flemish neighbours. Isaak—born about 1440—was one of the most learned Contrapuntists of the period, and, in all essential particulars, a follower of the Flemish School; though his talent as a Melodist was altogether exceptional. It seems quite certain that he was the Composer of the grand old Tune, 'Inspruck, ich muss Dich lassen,' afterwards known as 'Nun ruhen alle Wälder,' and 'O Welt, ich muss Dich lassen,' and treated over and over again by Sebastian Bach, in his Cantatas.[2] And this circumstance introduces us to an entirely new and original feature in the German School. The progress of the Reformation undoubtedly retarded the development of the higher branches of Polyphony very seriously. With the discontinuance of the Mass, the demand for ingenuity of construction came to an end; or was, at best, confined to the Sæcular Chanson. But, at the same time, there arose a pressing necessity for that advanced form of the Faux-bourdon which so soon developed itself into the Four-part Choral; and, in this, the German Composers distinguished themselves, if not above all others, at least as the equals of the best contemporary writers—witness the long list of Choral books, from the time of Walther to the close of the 17th century. We all know to what splendid results this new phase of Art eventually led; but, for the time being, it acted only as a hindrance to healthful progress; and, notwithstanding the good work wrought by Nicholas Paminger, the last great Master of the School, who died at Passau in 1608, it would, in all probability, have produced a condition of absolute stagnation, but for an unforeseen infusion of new life from Italy.

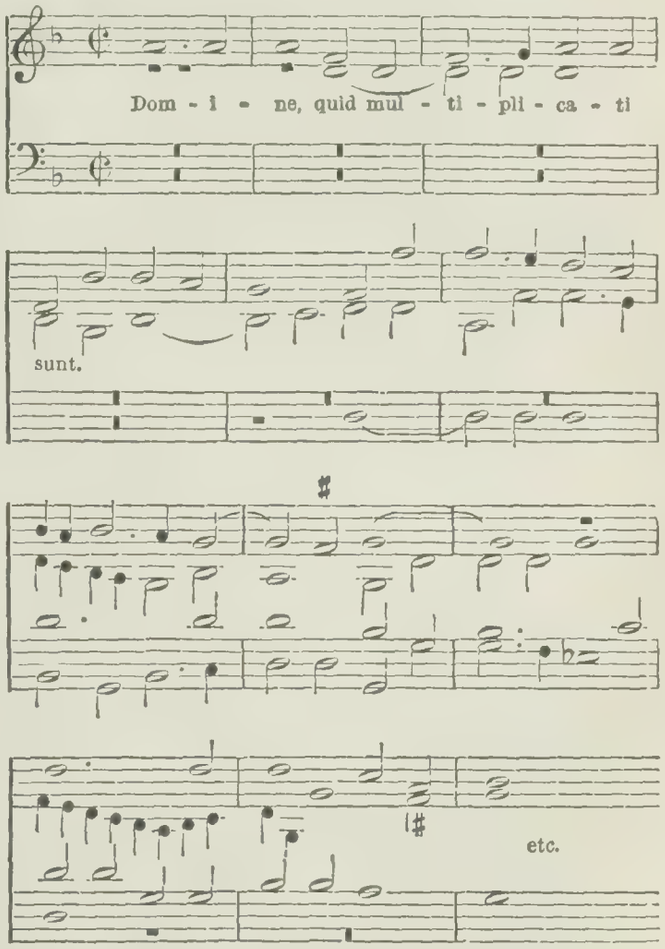
XIII. The Schools of Munich and Nuremberg must be regarded, not as later developments of Teutonic Art, but as foreign importations, to which Germany was indebted for an impulse which afterwards proved of infinite service to her. They were founded, respectively, by Orlando di Lasso, and Hans Leo Hasler; the first a Netherlander, and the last a true German. Of Orlando di Lasso, so much has already been recorded, in our second volume, that it is unnecessary to dilate upon his history here. Suffice it then to say, that, thanks to his long residence in Italy, his style united all the best qualities of the Flemish and the Italian Schools, and enabled him to set an example, at Munich, which the Germans were neither too cold to appreciate, nor too proud to turn to their own

[1] Joan. Tinctoris 'Terminorum Musicæ diffinitorium.' No date. Only a very few copies are believed to be in existence: but a cheap reprint may be had of Messrs. Cocks & Co., New Burlington Street.

[2] See vol. i. p. 761 *b*.

advantage. Hasler was born, at Nuremberg, in 1564; but learned his Art in Venice, under Andrea Gabrieli, whose nephew, Giovanni, was his fellow pupil, and most intimate friend. So thoroughly did he imbibe the principles and manner of the School in which he studied, that the Venetians themselves considered him as one of their own fraternity, Italianising his name into Gianleone. His works possess all the rich Harmony for which Gabrieli himself is so justly famous, and all the Southern softness which the Venetian Composers so sedulously cultivated; and are, moreover, filled with evidences of consummate contrapuntal skill, as are also those of his countrymen, Jakob Händl (=Jacobus Gallus), Adam Gumpeltzheimer, Gregor Aichinger, and many others, who, catching the style from him, spread it abroad throughout the whole of Germany.[1] Of its immediate effect upon the native Schools, we can scarcely speak in more glowing terms than those used by the German historians themselves. Of its influence upon the future we shall have more to say hereafter.

XIV. The history of THE EARLY FRENCH SCHOOL is so closely bound up with that of its Flemish sister, that it is no easy task to separate the two. Indeed, it is sometimes impossible to ascertain whether a Composer, with a French-sounding name, was a true Frenchman, a true Netherlander, or a native of French Flanders. Not only is this the case with the numerous writers whose works are included in the collections published by Pierre Attaignant, Adrian le Roy, and Ballard; but there is a doubt even about the birth of Jean Mouton, who is described by Glareanus as a Frenchman, and by other writers as a Fleming. The doubt, however, involves no critical confusion, since the styles of the two Schools were precisely the same. Both Josquin des Prés and Mouton spent some of the most valuable years of their lives in Paris; and taught their Art to Frenchmen and Netherlanders without distinction. Pierre Carton, Clement Jannequin, Noë Faignient, Eustache du Caurroy, and other Masters of the 16th century, struck out no new line for themselves: while Elziario Genet (Il Carpentrasso), the greatest of all, might easily pass for a born Netherlander. A certain amount of originality was, however, shown by a few clever Composers who attached themselves to the party of the Huguenots, and set the Psalms of Clement Marot and Beza to Music, for the use of the Calvinists, as Walther and his followers had already set Hymns for the Lutherans. The number of these writers was so small, that they cannot lay claim to be classed as a national School; but, few though they were, they carried out their work in a thoroughly artistic spirit. The Psalms of Claudin Lejeune—of which an example will be found in vol. i. p. 762—are no trifles, carelessly thrown off, to serve the purpose of the moment; but finished works of Art, betraying the hand of the Master in every note. Some of the same Psalms were also set by Claude Goudimel, but in a very different style. The Calvinists delighted in singing their Metrical Psalmody to the simplest Melodies they could find; yet these are veritable Motets, exhibiting so little sympathy with Huguenot custom, that, if it be true, as tradition asserts, that their author perished, at Lyons, on S. Bartholomew's Day, 1572, one is driven to the conclusion that he must have been killed, like many a zealous Catholic, by misadventure. He was one of the greatest Composers the French School ever produced, and excelled by very few in the rest of Europe. Scarcely inferior, in technical skill, to Okenheim and Josquin, he was infinitely their superior in fervour of expression, and depth of feeling. His claim to the honour of having instructed Palestrina has already been discussed elsewhere. Considered in connection with that claim, the following specimen of his style, printed, at Antwerp, by Tylman Susato, in 1554, is especially interesting. [See vol. i. p. 612; vol. ii. p. 635.]



XV. The Roman origin of THE SPANISH SCHOOL is so clearly manifest, that it is unnecessary to say more on the subject than has been already said at page 263. After the return of the Papal Court from Avignon, in 1377, Spanish Singers with good Voices were always sure of a warm welcome in Rome; learned Counterpoint, in the Eternal City, first, from the Flemings there domiciled, and afterwards, from the Romans themselves; practised their Art with honour in the Sistine Chapel; and, not unfrequently, carried it back with them to

[1] A comprehensive selection of works of this School will be found in Bodenschatz's 'Florilegium Portense,' and a few fine examples in Proske's 'Musica Divina.' [See vol. i. 253; vol. ii. 411.]

Spain. So completely are the Spaniards identified with the Romans, that the former are necessarily described as disciples of the School of Festa, or that of Palestrina, as the case may be. To the former class belong Bartolomeo Escobedo, Francesco Salinas, Juan Scribano, Cristofano Morales, Francesco Guerrero, and Didaco Ortiz: the greatest genius of the latter was Ludovico da Vittoria, who approached more nearly to Palestrina himself than any other Composer, of any age or country. Many of these great writers—including Vittoria—ended their days in Spain, after long service in the Churches of Rome: and thus it came to pass that the Roman style of Composition was cultivated, in both countries, with equal zeal, and almost equal success.[1]

XVI. Our rapid sketch of the progress of Polyphony on the Continent will serve materially to simplify a similar account of its development in England, in which country it was practised, as we have already promised to show, at an earlier period than even in the Netherlands.

A hundred years ago, when few attempts had been made to arrange the general History of Music in a systematic form, attention was drawn to the curious 'Rota'—or, as we should now call it, Canon—'Sumer is icumen in,' contained in vol. 978 of the Harleian MSS. Burney estimated the date of this, in rough terms, as probably not much later than the 13th or 14th century. His opinion, however, was a mere guess; while that of Hawkins was so vague that it may safely be dismissed as valueless. Ritson, whose authority cannot be lightly set aside, believed the document—now known as 'The Reading MS.'—to be at least as old as the middle of the 13th century; and accused both Burney, and Hawkins, of having intentionally left the question in doubt, from want of the courage necessary for the expression of a positive opinion. Chappell gives the same date; and complains bitterly of Burney's tergiversation. The late Sir Frederick Madden was of opinion that that portion of the MS. which contains the 'Rota' was written about the year 1240, and has left some notes, to that effect, on the fly-leaf of the volume.[2] Ambros, in the second volume of his 'Geschichte der Musik,' published in 1862, referred the MS. to the middle of the 15th century, thus making it exactly synchronous with the Second Flemish School. Meanwhile, Coussemaker,[3] aided by new light thrown upon the subject from other sources, arrived at the conclusion that the disputed page could not have been written later than the year 1226; and that the 'Rota' was certainly composed, by a Monk of Reading, some time before that date: and this position he defended so valiantly, that Ambros, most cautious of critics, accepted the new view, without hesitation, in his third volume, printed in 1868.

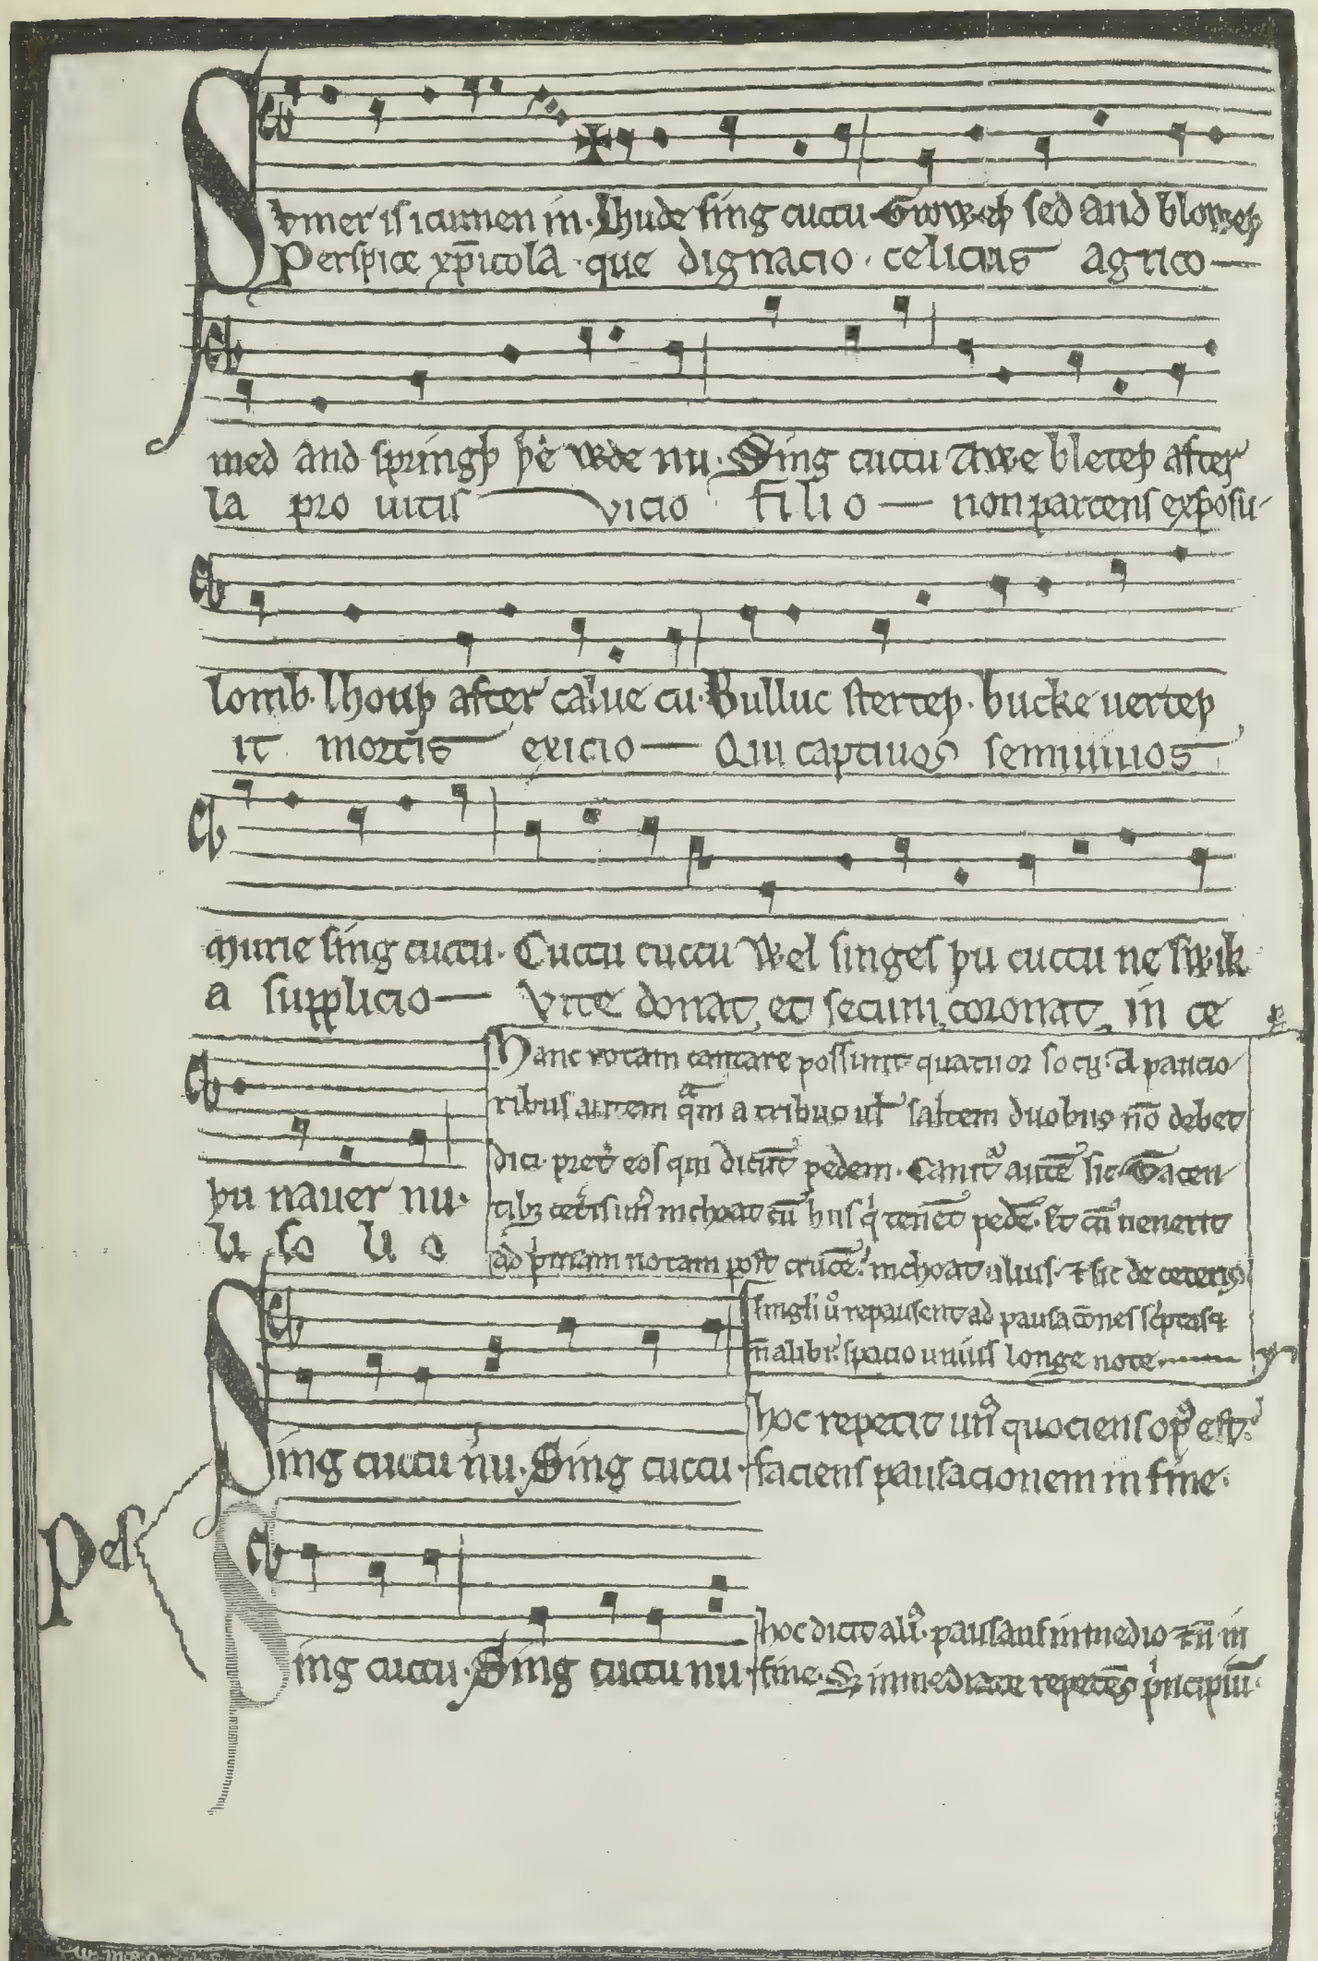
Assuming this view to be correct, THE EARLY ENGLISH SCHOOL was founded a full century and a half before the admission of Dufay to the Pontifical Chapel. But, while giving this discovery its full weight, we must not value it at more than it is worth. It does not absolutely prove that the Art of Composition originated in England. We have already said that the invention of Counterpoint has hitherto eluded all enquiry. It was, in fact, invented nowhere—if we are to use the word 'invention' in the sense in which we should apply it to gunpowder, or the telescope. It was evolved, by slow degrees, from Diaphonia, Discant, and Organum. All we can say about it as yet is, that the oldest known example—or, at least, the oldest example to which a date can be assigned with any approach to probability—is English.[4] An earlier record may be discovered, some day; though, thanks to the two-fold spoliation our Ecclesiastical Libraries have suffered within the last 350 years, it is scarcely likely that it will be found in England. Meanwhile, we must content ourselves with the reflection that, so far as our present knowledge goes, the Early English School is the oldest in the world; though the completeness of the Composition upon which this statement is based, proves that Art must have made immense advances before it was written. For, the 'Reading Rota' is no rude attempt at Vocal Harmony. It is a regular Composition, for six Voices; four of which sing a Canon in the Unison, while the remaining two sing another Canon—called 'Pes'—which forms a kind of Ground Bass to the whole. Both Hawkins and Burney have printed the solution in Score. We think it better to present our readers with an accurate *fac-simile* of the original MS.; leaving them to score it for themselves, in accordance with the directions given in the margin, and to form their own opinion of the evidence afforded by the style of its Caligraphy. In the original copy, the Clefs, Notes, and English words, are written in black; as are also the directions for performance, beginning 'Hanc rotam,' etc. The six Lines of the Stave, the Cross placed to show where the second Voice is to begin, the Latin words, the second initial S, the word Pes, and the directions beginning 'Hoc repetit,' and 'Hoc dicit,' are red. The first initial S is blue, as is also the third. Ambros believes the Latin words, and the directions beginning 'Hanc rotam,' to have been added, at a later period, by another hand. Many years have elapsed since our own attention was first directed to the MS., which we have since subjected to many searching examinations. At one period, we ourselves were very much inclined to believe in

[1] A large collection of the Music of the Spanish School will be found in Eslava's 'Liro sacro-hispaña.' [See vol. i. 494.]

[2] We think it desirable, in so hotly-disputed a case, to give Sir Frederick Madden's remarks, *verbatim*. He first says—'The whole is of the thirteenth century, except some writing on ff. 15-17.—F. M.' And, again—'In all probability, the earlier portion of this volume was written in the Abbey of Reading about the year 1240. Compare the *Obits* in the Calendars with those in the Calendar of the Cartulary of Reading in the MS. Cott. Vesp. E. V.—F. M. April 1862.'

[3] 'L'Art Harmonique aux xii et xiii siècles,' Paris, 1865. pp. 144, 150.

[4] The lately-discovered 'Montpellier MS.' is referred, by Coussemaker, to the last third of the 13th century. To the very antient copy of the 'Prose de l'ane' now in the possession of Sig. Pacchiarotti, of Padua, and sometimes quoted as the oldest specimen of Part-Music in existence, it is absolutely impossible to assign a fixed date with any probability. [See vol. ii. p. 462.]



the presence of a second hand-writing. But, the evidence afforded by a photograph taken during our investigations convinces us that we did not make sufficient allowance for the different appearance of the black and red letters, which, reduced to the same tone by the process of photo-

graphy, resemble each other so closely, that we now feel assured that the entire page was written by the same hand. Coussemaker seems to entertain no doubt that this was the hand of John Fornsete, a Reading Monk, of whom we have intelligence in the Cartulary, down to the year 1236, but no other record later than 1226. It seems rash to append this learned Ecclesiastic's name to the 'Rota,' until some farther evidence shall be forthcoming: but it is gratifying to find that the mystery in which the subject has hitherto been shrouded is gradually disappearing.

Besides the above Rota, and a few specimens of unisonous Plain Chaunt, the volume we have described contains three Motets, 'Regina clemencie,' 'Dum Maria credidit,' and 'Ave gloriosa virginum'—at the end of the last of which are three sets of Parts for 'Cantus superius,' and three for 'Cantus inferius,' added in a different hand-writing; and another Motet, 'Ave gloriosa Mater,' written in Three-Part Score, on a Stave consisting of from thirteen to fifteen lines as occasion demands, with a Quadruplum (or fourth Part), added, in different writing, at the end.[1] Beyond these precious reliques, we possess no authentic record of what may be called the First Period of the development of Art in England. Either the School died out, or its archives have perished.

The Second Period, inaugurated during the earlier half of the 15th century, and therefore contemporary with the School of Dufay, is more fully represented, and boasts some lately-discovered reliques of great interest. Its leader was John of Dunstable, a man of no ordinary talent, whose identity has been more than once confused with that of S. Dunstan! though we have authentic records of his death, in 1453, and burial in the Church of S. Stephen, Walbrook, London. In the time of Burney, it was supposed that two fragments only of his works survived; one quoted by Gafurius, the other by Morley. Baini, however, discovered a set of Sæcular Chansons à 3, in the Vatican Library; and a very valuable codex in the Liceo Filarmonico, at Bologna, is now found to contain four of his Compositions for the Church, besides a number of works by other English Composers of the period, most of whom are otherwise unknown.

The Third Period is more bare of records than the First. No trace of its Compositions can be discovered; and the only interest attaching to it arises from the fact that its leaders, John Hamboys, Mus. Doc., Thomas Saintwix, Mus. Doc., and Henry Habengton, Mus. Bac., who all flourished during the reign of King Edward IV. were the first Musicians ever honoured with special Academical Degrees.

The best writer of the Fourth Period was Dr. Fayrfax, who took his Degree in 1511, and is well represented by some Masses, of considerable merit, in the Music School at Oxford, and a collection of Sæcular Songs, in the well-known 'Fayrfax MS.,' which also contains a number of similar works by Syr John Phelyppes, Gilbert Banester, Rowland Davy, William of Newark, and other writers of the School. The style of these pieces is thoroughly Flemish; but wanting, alike in the ingenuity of Okenheim, and the expression of his followers. Still, the School did its work well. England had not fulfilled the promise of her first efforts; but she now made a new beginning, evidently under Flemish instruction, and never afterwards betrayed her trust.

Good work never fails to produce good fruit. If the labours of Fayrfax and Phelyppes brought forth little that was worth preserving on its own account, they at least prepared the way for the more lasting triumphs of the Fifth Period, the Compositions of which will bear comparison with the best contemporaneous productions, either of Flanders, or of Italy. This epoch extends from the beginning of the 16th century, to the period immediately preceding the appearance of Tallis and Byrd; corresponding, in this country, with the dawn of the æra, known in Rome as 'The Golden Age.' It numbered, among its writers, a magnate of no less celebrity than King Henry VIII, who studied Music, diligently, at that period of his life during which it was supposed that he was destined to fill the See of Canterbury, and never afterwards neglected to practise it. No doubt, this early initiation into the mysteries of Art prompted the imperious monarch to extend a more than ordinary amount of encouragement to its votaries, in later life; and to this fortunate circumstance we are probably largely indebted for that general diffusion of the taste for good Music, so quaintly described by Morley, which, taking such firm hold on the hearts of the people that it was considered disgraceful not to be able to take part in a Madrigal, led, ere long, to the final emergence of our School from the trammels of bare mechanical industry into the freedom which true inspiration alone can give. The Composers who took the most prominent part in this great work were John Thorne, John Redford (Organist of Old St. Paul's), George Etheridge, Robert Johnson, John Taverner, Robert Parsons, John Marbeck (Organist of St. George's Chapel, Windsor), Richard Edwardes, and John Shepherde—all men of mark, and enthusiastic lovers of their Art.

Contemporaries of Archadelt and Waelrant, in Flanders, of Willaert, in Venice, and of Festa, in Rome, these men displayed, in their works, an amount of talent in no degree inferior to that shown by the great Continental Masters.

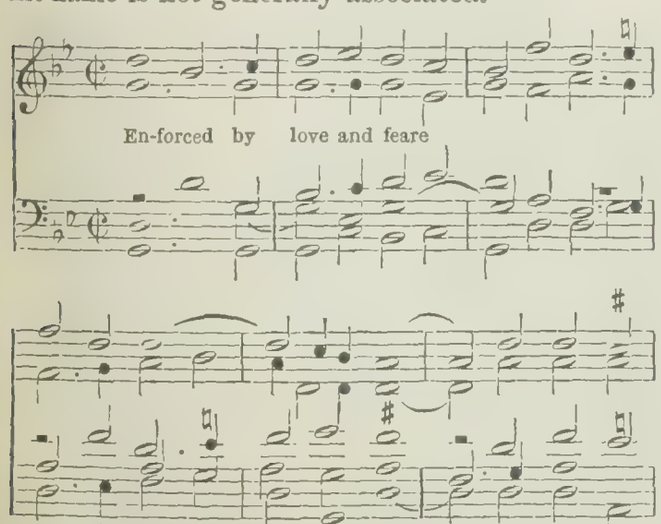
Redford's Anthem, 'Rejoice in the Lord alway,' first printed by Hawkins, and since republished by the Motet Society, is a model of the true Ecclesiastical style, one of the finest specimens of the grand old English School

[1] The 'Regina clemencie' will be found on fol. 4*b* of the MS.; 'Dum Maria credidit,' on fol. 5; 'Ave gloriosa virginum,' on fol. 6; the three sets of Parts for Cantus Superius, and Inferius, on 7*b* and 8; 'Ave gloriosa Mater,' on 8*b*, and 9; and the Rota itself, on fol. 10. All therefore, are included in 'the earlier portion of the MS,' as described by Sir Frederick Madden. (See page 268*a*, note 2.) A later copy of 'Ave gloriosa Mater,' without the added Quadruplum, has been discovered in the 'Montpellier MS.,' and is ascribed, by Coussemaker, to Franco of Cologne.

of Cathedral Music we possess. The graceful contour of its Subjects, the purity of the Harmony produced by their mutual involutions, and, above all, the beauty of its expression, entitle it, not only to the first place among the Compositions of its own period, but to a very high one as compared with those of the still more brilliant epoch which was to follow. That the writer of such an Anthem as this should have been an idle man is impossible. He must have produced a host of other treasures. Yet, it is by this alone that he is known to us; and it is much to be feared that he will nevermore be represented by another work of equal magnitude, though it would be well worth while to collect together the few fragments of his writings which are still preserved in MS.[1]

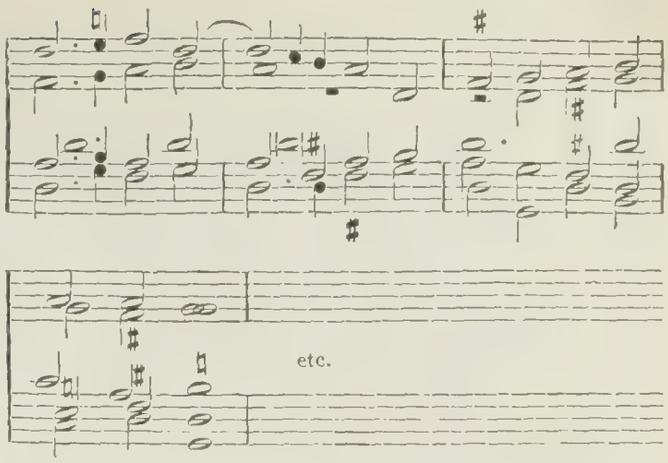
Equally scarce are the works of Richard Edwardes, known chiefly by one of the loveliest Madrigals that ever was written—'In going to my naked bedde.' We have already had occasion to call attention to the beauties of this delightful work,[2] which rivals—we might almost say surpasses—the finest Flemish and Italian Madrigals of the Period, and was certainly never excelled, before the time of Palestrina or Luca Marenzio. For this, also, we have to thank the research and discrimination of Hawkins, who gives it in his fifth volume: but it has since been reprinted, many times; and it is not likely that it will ever again be forgotten.

Johnson was one of the most learned Contrapuntists of the period, and excelled almost all his contemporaries in the art of writing Imitations upon a Canto fermo. Of the writings of Taverner and Parsons, good specimens will be found in the Psalters of Este and Ravenscroft, as well as in the Histories of Burney and Hawkins; while many more remain in MS. Among the latter, a Madrigal for five Voices, by Parsons—'Enforced by love and feare'—preserved in the Library of Christ Church, Oxford, is particularly interesting, as establishing the writer's title to an honourable place among the leaders of a School of Sæcular Music with which his name is not generally associated.

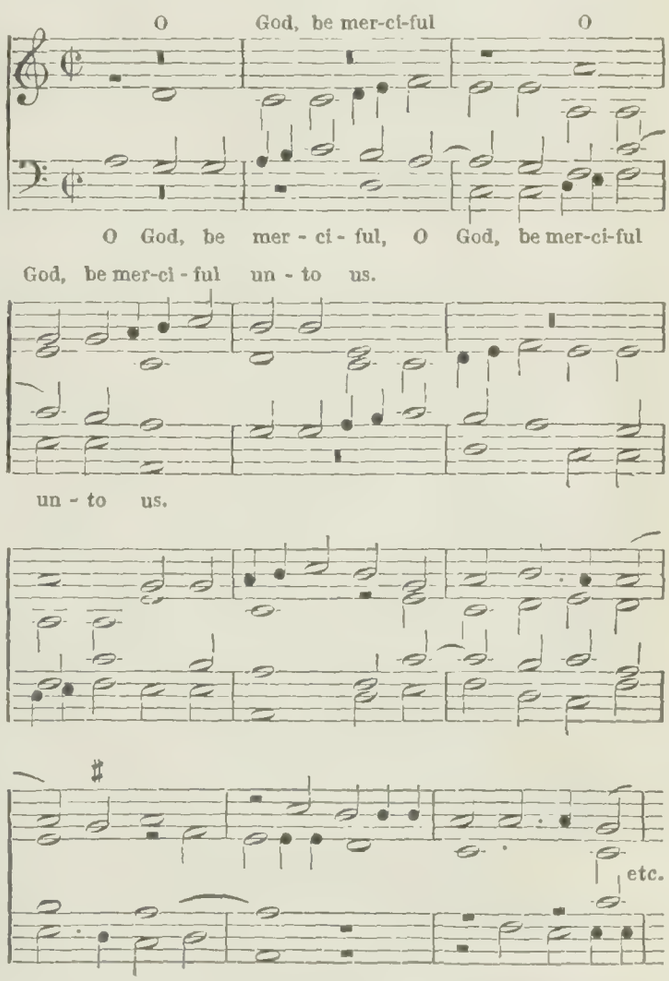


[1] A Motet—Vesti precincti—for five Voices has been found in a set of 16th-century Part-Books, at Christ Church, Oxford; but, unhappily, the Tenor volume is missing.

[2] See vol. ii. p. 192.

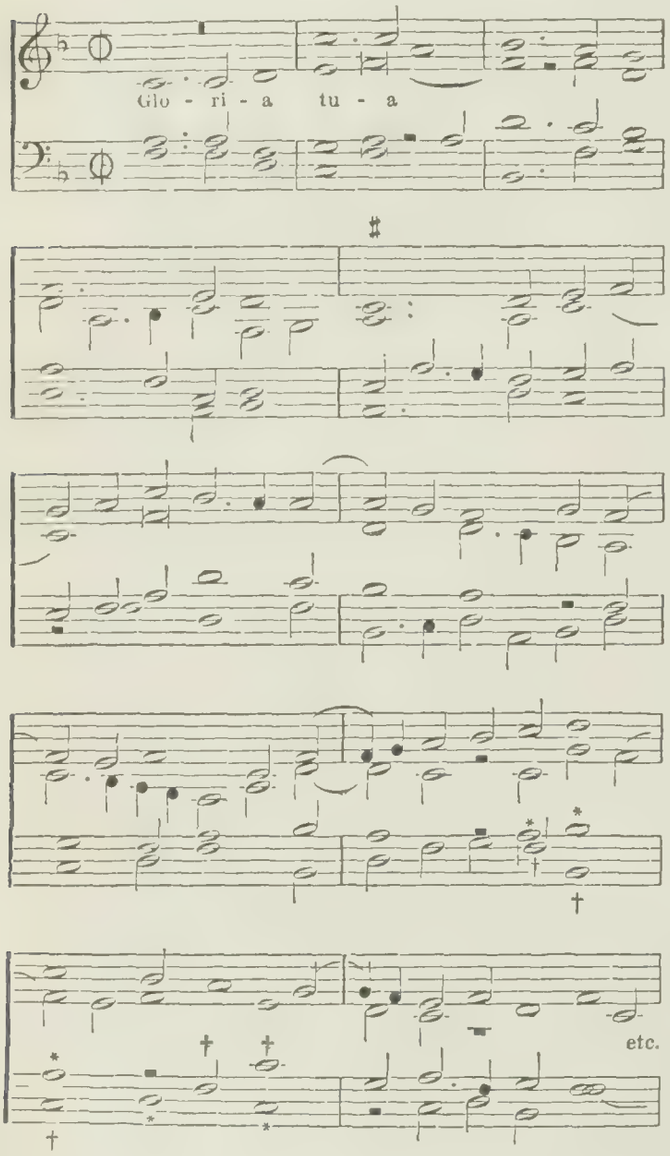


A few of Shepherde's Compositions may be found in a work entitled 'Mornyng and Evenyng Prayer and Communion,' London, 1565. He is also well represented in the Christchurch Library, in a series of MS. Compositions of a very high order of merit. Most of them are Motets, with Latin words; but a few are English Anthems—possibly, adaptations—from one of which we have selected the following example.



Since the restoration of Anglican Plain Chaunt, by the Rev. T. Helmore, Marbeck's name has been a 'household word' among English Churchmen; but only in connection with his strictly unisonous 'Booke of Common Praier noted.' No one seems to know that he was not only a distinguished Contrapuntist, but also one of the most expressive Composers of the English School. The very few specimens of his style which we possess are of no common order of merit. The example selected is from a MS. Mass, 'Missa,

Per arma Justitiæ,' preserved at Oxford, in a set of very incorrectly-written Parts, from which Dr. Burney scored a few extracts. As Marbeck was a zealous follower of the new religion, it is clear that this Mass must have been written during his early life. Where, then, is his English Church Music? It is impossible to believe that so ardent a reformer, and so great a Musician, took no part in the formation of that School of purely English Cathedral Music to which all the best Composers of the period gave so much attention. Surely, some fragments, at least, of his works must remain in our Chapter Libraries.

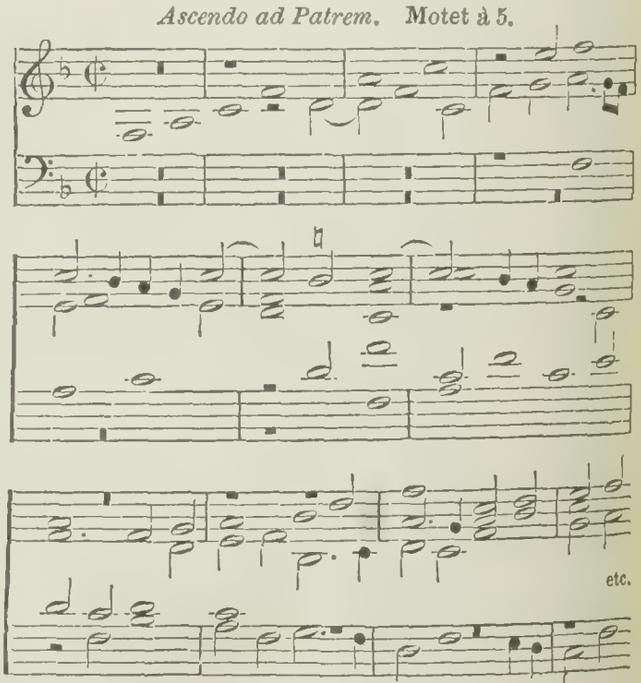


The Notes marked *, are sung by the Bass; those marked †, by the Tenor.

We regret that we can find no room for more numerous, or more extended examples, selected from the works of a period which has not received the attention it deserves from English Musicians: but, we trust that we have said and quoted enough to show that this long-neglected School, supported by the learning of Johnson, the flowing periods of Marbeck, and the incomparable expression of Redford and Edwardes, can hold its own, with honour, against any other of the time; and we are not without hope that our countrymen may some day become alive to the importance of its monuments, and strive to rescue from final oblivion Compositions certainly not unworthy of our regard, as precursors of those which glorified the greatest Period of all —the Period which corresponded with that of the 'Missa Papæ Marcelli' in Italy.

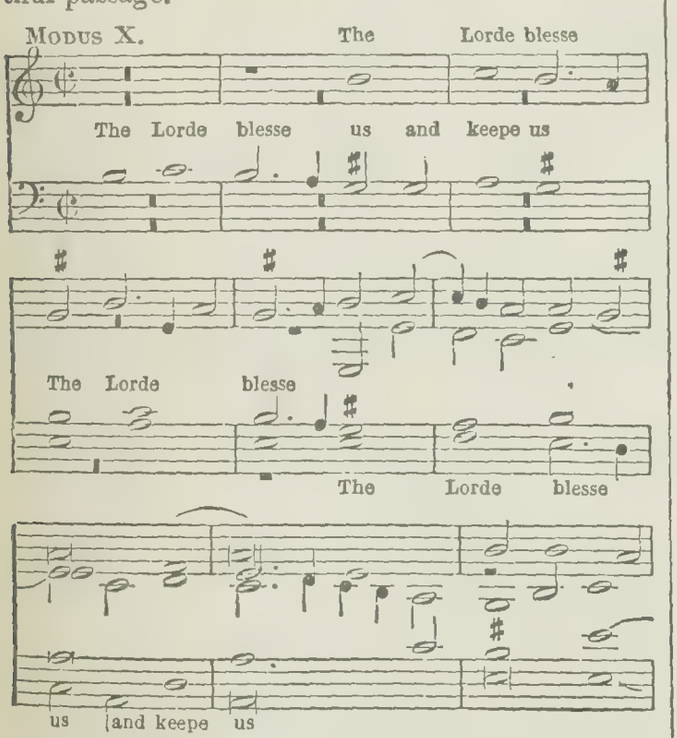
The leader of the Sixth Period was Christopher Tye, whose genius prepared the way, first, for the works of Robert Whyte, and, through these, for those of the two greatest writers who have ever adorned the English School—Thomas Tallis, and William Byrd. Tye's Compositions are very numerous. His best-known work is a Metrical Version of the Acts of the Apostles, in which the simplicity of the Faux-bourdon is combined with a purity of Harmony worthy of the best Flemish Masters, and a spirit all his own. Two of these under other titles—'Sing to the Lord in joyful strains,' and 'Mock not God's Name,' are included in Hullah's 'Part Music,' and well known to Part-singers. Besides these, the Library of Christchurch, Oxford, contains 7 of his Anthems, and 14 Motets, for 3, 4, 5 and 6 Voices; and that of the Music School, a Mass, 'Euge bone,' for 6 Voices, which is, perhaps, the greatest of his surviving works. A portion of the 'Gloria' of this Mass, scored by Dr. Burney, in his second volume, and reprinted in Hullah's 'Vocal Scores,' will well repay careful scrutiny. One of its Subjects corresponds, very curiously, with a fragment, called 'A Poynt,' by John Shepherde, written, most probably, for the instruction of some advanced pupils, and printed by Hawkins. It is interesting to compare the grace of Shepherde's unpretending though charming little example, with the skilfully constructed network of Imitation with which Tye has surrounded the Subject. We need not transcribe the passages, as they may so easily be found in the works we have named; but, the following less easily accessible example of Tye's broad masculine style will serve still better to exemplify both the quiet power and the melodious grace of his accustomed manner.

Ascendo ad Patrem. Motet à 5.



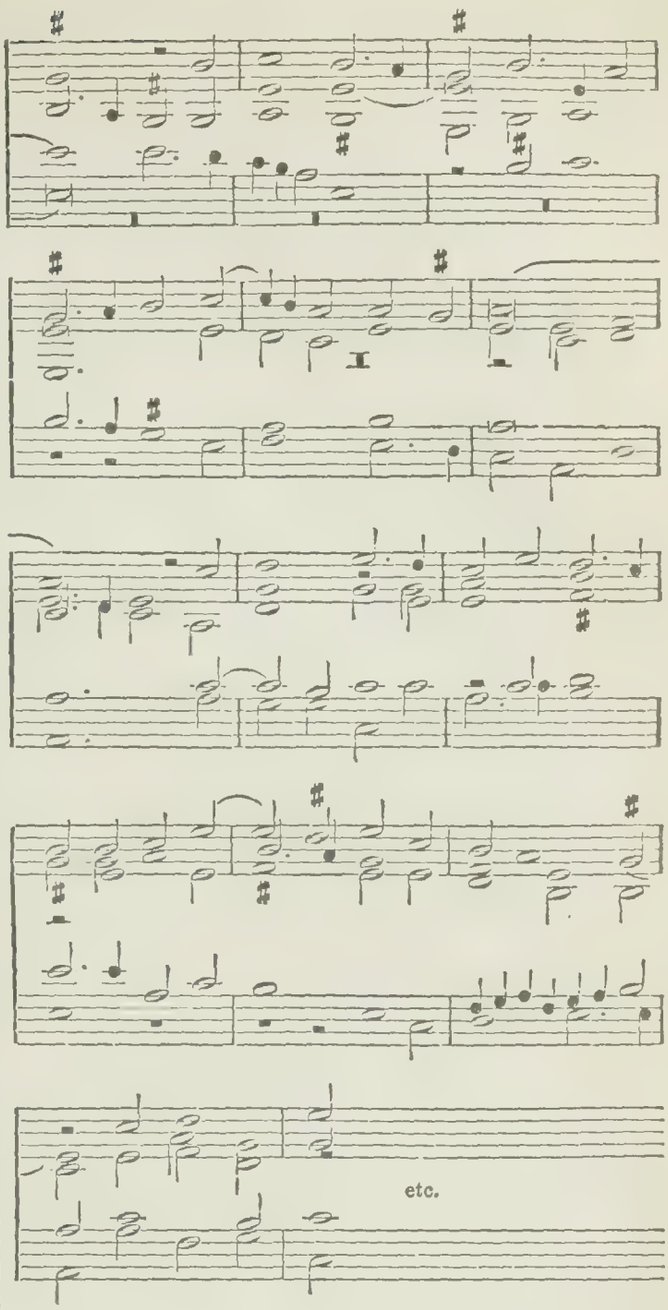
Still greater, in some respects, than Tye, was Robert Whyte; known only—we shame to say

it!—by an Anthem for 5 Voices, 'Lord, who shall dwell in Thy tabernacle?' printed in the third volume of Burney's History, and a few pieces preserved by Barnard; though no less than 35 of his Compositions, comprising 4 Anthems, 25 Motets, and 6 Lamentations, lie in MS. in the Library of Christ Church, Oxford, without hope of publication. These works are models of the best English style, at its best period. Not merely remarkable for their technical perfection, but full of expression and beauty. Yet these fine Compositions have been left to accumulate the dust, while the inspirations of Kent and Jackson have been heard in every Church in England, to say nothing of later Compositions, which would be very much the better for a little infusion of Kent's spontaneity and freshness. In order to give some idea of the tenderness of Whyte's general style, we subjoin an extract from an Anthem—'The Lorde blesse us, and keepe us'—included in Barnard's collection, but neither mentioned in the Christ Church Catalogue, nor noticed by Burney, though it is contained in the valuable and beautifully-transcribed set of Part-Books which furnished him with the text of the only Composition by Whyte that has until now been printed in modern form.[1] The pathetic character of the Hypoæolian Mode was probably never more strongly exhibited than in this beautiful passage.



1 This set of Part-Books, dated 1581, and still in excellent preservation, consists of five small oblong 4to volumes, beautifully transcribed, and embellished with quaint old Latin verses, and mottos, expressed in penmanship so delicate that it might easily be mistaken for copper-plate engraving. It contains 20 Compositions by Whyte, 55 by Byrde, 1 by Bruster, 1 by Dr. John Bull, 2 by Farrant, 1 by Ferrabosco, 1 by W. Giles, 1 by Johnson, 3 by Orlando di Lasso, 1 by Mallorie, 1 by W. Mundaie, 1 by Francesco Mocheni, 8 by R. Parsons, 1 by Phillips, 1 by Shepard, 1 by Strogers, 1 by Tailer, 5 by Tallis, 6 by Dr. Tye, 2 by Woodcock, and 19 by Anonymous Authors. Burney mentions it (Hist. vol. iii. p. 66, *note* o), with a graceful tribute of thanks to the Dean and Chapter, by whose courtesy he was permitted to use it in any way he pleased. We ourselves are indebted to the kindness of the present Librarian for a similar privilege, which has proved of infinite value in the preparation of our analysis of the works of the Early English School.

The same rich Library contains another set of Part-Books, of at least equal interest, one of the six volumes of which—the Tenor—is unhappily missing.



But, neither Tye nor Whyte reached to the height attained by Tallis; who is, perhaps, better known, and more fairly judged, than any other English Composer of the time, though his most popular works are not in all cases his best. To speak to English Organists of his Responses, his Litany, or his Service in the Dorian Mode, would be superfluous. But, how many are equally well acquainted with his Motet, 'Salvator mundi,' or his fearfully intricate Canon, 'Miserere nostri'? How many know that the original of 'I call and cry' is an 'O sacrum convivium' worthy of any Church Composer in the world short of Palestrina himself? How many have looked into the 'Cantiones Sacræ,' which he wrote in conjunction with his pupil Byrd, and the MS. treasures scored in Burney's 'Extracts,' or the 'Matthias Collection'? Yet it is here that we must look for Tallis, if we wish to form any idea of his true greatness. The world has not seen many more accomplished Contrapuntists than he; nor has he ever been excelled in the exquisite 'surprises' of his Harmony. We have said that Palestrina so interwove his phrases together as to give birth to some wonderful Chord at every

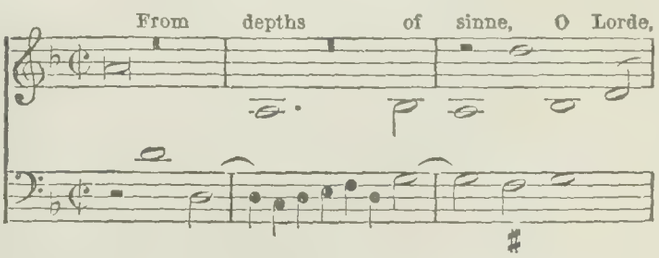
turn. Tallis could not approach the great Italian Master in this. No one ever did. But, he managed to *place* some wonderful Chord, at every turn; and, so to place it, that the ear could not fail to be ravished by its beauty. It is worthy of notice, that those of his Compositions, in which this peculiarity is most strongly developed, are the best known, and the most highly prized. They are, indeed, preëminently beautiful. But, so are many others, of which the very names have long since been forgotten; while some, well known by name, are just as much forgotten, in reality, as the rest. Among these last is one —the famous Motet, 'Spem in alium non habui,' for 40 Voices—which has been very frequently mentioned, though rarely described with the accuracy desirable in a case of such exceptional interest. Hawkins's account of it is too vague to be of any technical value whatever. Burney, though sufficiently minute in his attention to details, seems to have strangely misunderstood his author, in one very important particular. He tells us that the Voices are not arranged in separate Choirs, but treated as a single mass. No statement can possibly be more incorrect than this. The 40 Voices are, beyond all controversy, disposed in eight distinct Five-Part Choirs, which sometimes answer each other antiphonally —one or more whole Choirs resting, for a considerable number of bars together, while others continue the development of the various Subjects —and, sometimes, sing together, in vast 'Quadrigesimal Harmony,' no less real than that which Burney so well describes, but infinitely more complicated, being compounded of eight quintuple masses, each, as a general rule, complete in itself, though cases will be found in which the Bass of one Choir is needed to support the Harmonies sung by another—*e.g.* in the last Bar, where, without the lower G, sung by the Third, Fifth, and Eighth Choirs, the First and Sixth Choirs would present a forbidden Chord of the 6–4, while the Seventh Choir would end with a Chord of the Sixth.[1]

The leading Subject is proposed by the Altus of the First Choir, and answered in turn by the Cantus, the Tenor, the Quintus (in this case represented by a Duplicate Altus), and the Bass. The Second Choir enters, after three and a half bars rest, with the same Subject, answered in the same order. The Third Choir enters, one Voice at a time, in the middle of the eleventh bar; the Fourth, at the beginning of the sixteenth bar; the Fifth, at the twenty-third bar; the Sixth, in the middle of the twenty-fourth bar; the Seventh, at the beginning of the twenty-eighth bar; and the Eighth, at the beginning of the thirty-third bar; no two Parts ever making their entry at the same moment. The whole body of Voices is now employed, for some considerable time, in 40 real Parts. A new Subject is then proposed, and treated in like manner. The final climax is formed by a long and highly elaborate passage of 'Quadrigesimal Harmony,' culminating in a Plagal Cadence of gigantic proportions, and concluding with an Organ Point, of moderate length, which we present to our readers, entire. It would be manifestly impossible to write in so many Parts, without taking an infinity of Licences forbidden in ordinary cases. Many long passages are necessarily formed upon the reiterated notes of a single Harmony; and many progressions are introduced, which, even in eight Parts, would be condemned as licentious. Still, the marvel is, that the Parts are all real. Whatever amount of indulgence may be claimed, no two Voices ever 'double' each other. Whether the effect produced be worth the labour expended upon it, or not, the Composition is, at any rate, exactly what it asserts itself to be—a genuine example of Forty-Part Counterpoint: and the few bars we have selected for our example will show this as clearly as a longer extract.[2] (See opposite page.)

As Tallis is chiefly known by his Litany and Responses, so is his great pupil, William Byrd, by 'Non nobis, Domine,' a 'Service,' and a few Anthems, translated from the Latin; while the greater number of his 'Cantiones Sacræ,' his Mass for 5 Voices, and his delightful Madrigals, are recognised only as antiquarian curiosities. The only known copies of his two Masses for 3 and 4 Voices seem, indeed, to be hopelessly lost; nothing having been heard of them, since they were 'knocked down' to Triphook, at the sale of Bartleman's Library, in 1822. But, a goodly number of his works may very easily be obtained, in print; while larger collections of his MS. productions are preserved in more than one of our Collegiate Libraries. We ought to know more of these fine Compositions, the grave dignity of which has never been surpassed. It is in this characteristic that their chief merit lies. They are less expressive, in one sense, than the more tender inspirations of Tallis; but, while they lose in pathos, they gain in majesty. If they sometimes seem lacking in grace, they never fail to impress us by the solidity of their structure, and the grandeur of their massive proportions. Fux makes Three-Part Counterpoint (*Tricinium*) the test of real power.[3] Was ever more effect produced by three Voices than in the following example, from the 'Songs of Sundrie Natures.' (Lond. 1589.)



[1] A similar licence is taken in Bar 13, and many other places.

[2] A complete Score will be found in the Library of the Sacred Harmonic Society. In a copy, purchased for the British Museum, in 1876, the Music allotted to each Choir is scored separately; and the volume concludes with a complete set of the separate Parts. In both these examples, the original Latin words are wanting, and the Music is adapted to some English doggrel verses of the time of King Charles I or II. An older, and once very famous copy, in the handwriting of John Immyns, seems to have hopelessly disappeared.

The Composition was performed, in London, many years ago, under the direction of the late William Hawes; and again, on May 15, 1879, under that of Mr. Henry Leslie.

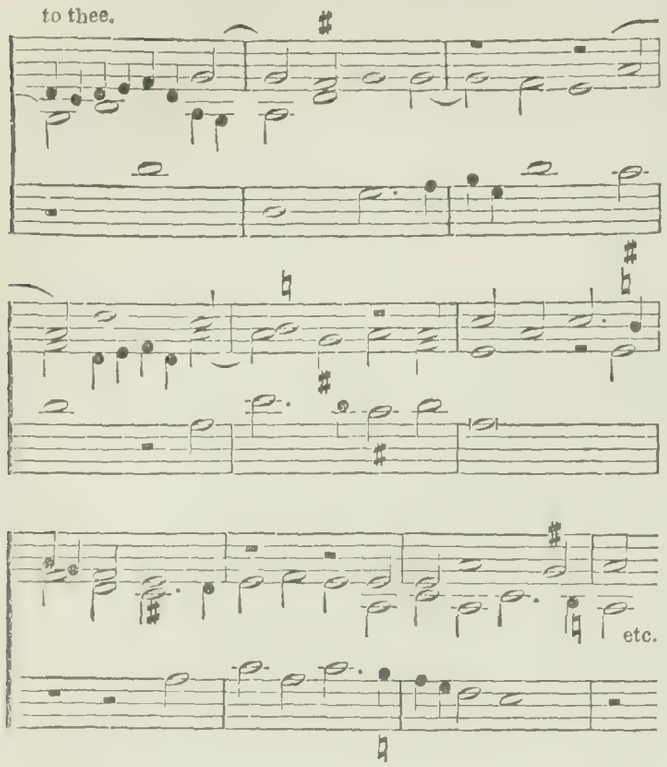
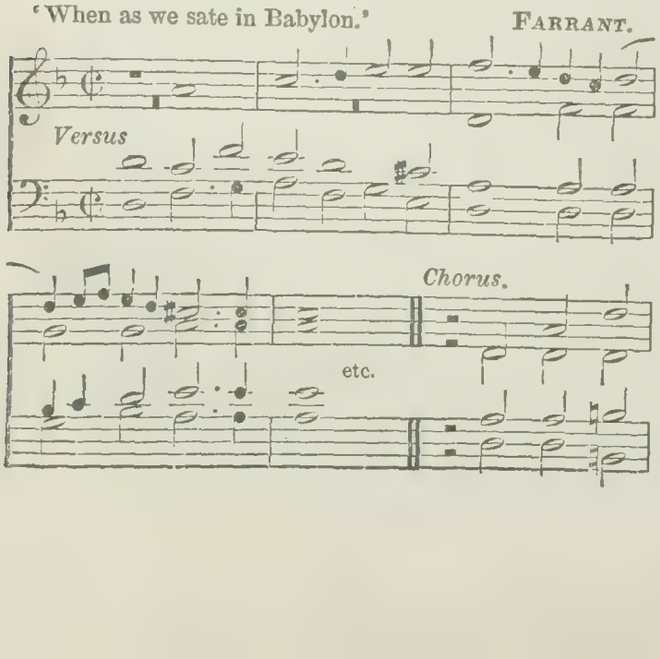
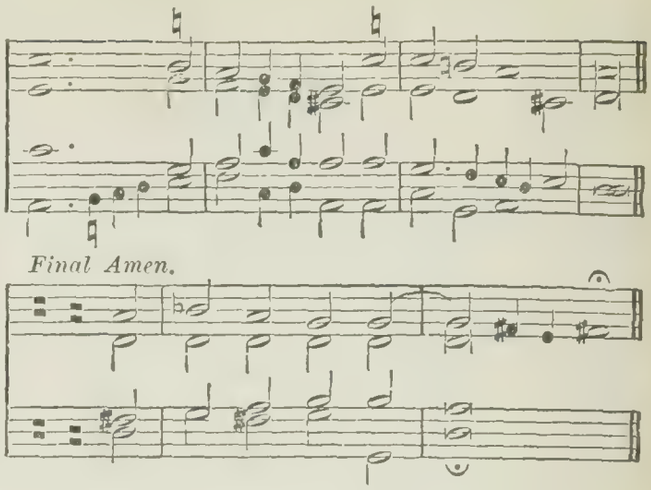
SCHOOLS OF COMPOSITION.



Though Byrd survived the 16th century by more than 20 years, he was not the last great Master who cultivated the true Polyphonic style in England. It was practised, with success, by men who were young when he was old, yet who did not all survive him. We see a very enchanting phase of it, in the few works of Richard Farrant which have been preserved to us. His style is, in every essential particular, Venetian; and so closely resembles that of Giovanni Croce, that one might well imagine the two Masters to have studied together. Farrant is best known by some 'Services,' and three lovely Anthems, the authenticity of one of which—'Lord, for Thy tender mercies' sake'—has lately been questioned, we think on very insufficient grounds, and certainly in defiance of the internal evidence afforded by the character of its Harmonies. Besides these, very few of Farrant's works are known to be in existence. The Organ Part of a Verse-Anthem—'When as we sate in Babylon'—is preserved in the Library at Christ Church; together with two Madrigals, or, rather, one Madrigal in two parts—'Ah! Ah! alas,' and 'You salt sea gods'; but such treasures are exceedingly rare.

'When as we sate in Babylon.' FARRANT.

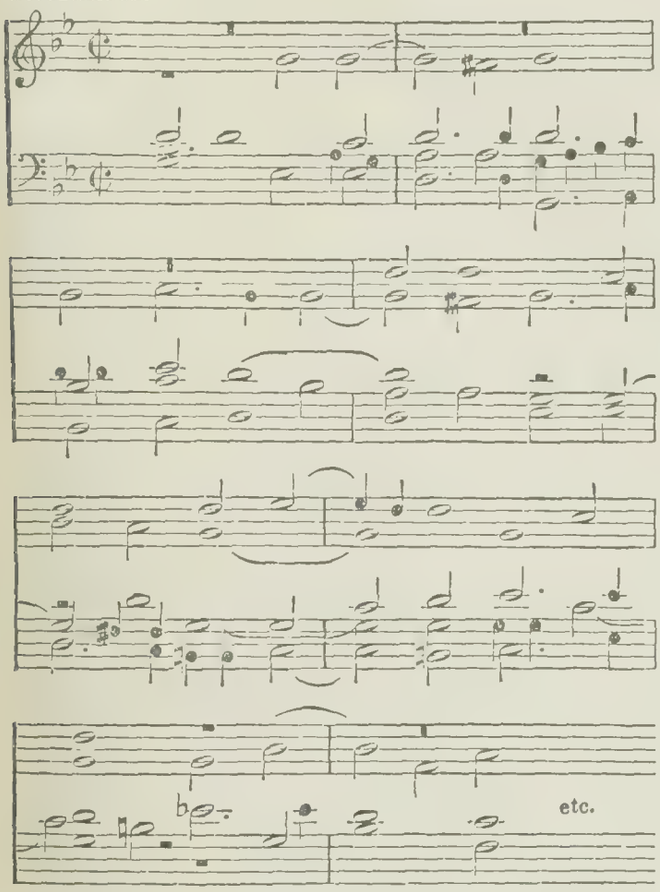




Final Amen.

Farrant died in 1580, three years before the birth of Orlando Gibbons, with whom the School finished gloriously in 1625. By no Composer was the dignity of English Cathedral Music more nobly maintained than by this true Polyphonist; who adhered to the good old rules, while other writers were striving only to exceed each other in the boldness of their licences. He took licences also. No really great Master was ever afraid of them. Josquin wrote Consecutive Fifths. Palestrina is known to have proceeded from an Imperfect to a Perfect Concord, by Similar Motion, in Two-part Counterpoint. Luca Marenzio has written whole chains of Ligatures, which, if reduced to Plain Counterpoint, in accordance with the stern test demanded by Fux, would produce a dozen Consecutive Fifths in succession. Orlando Gibbons has claimed no less freedom, in these matters, than his predecessors. In the 'Sanctus' of his 'Service in F,' he wrote, between bars 4 and 5, the most deliberate Fifths that ever broke the rule. But he has never degraded the pure Polyphonic style by the admixture of foreign elements incompatible with its inmost essence. He had the good taste to feel what the later Italian Polyphonists never did feel, and never could be made to understand—that the oil of the old system could never, by any possibility, be persuaded to combine with the wine of the new. Of the nauseous mixtures, compounded by Monteverde and the Prince of Venosa, we find no trace, in any one of his writings. Free to choose whichever style he pleased, he attached himself to that of the Old Masters, and conscientiously adhered to it, in spite of the temptations by which he was surrounded on every side. That he fully appreciated all that was good in the newer method is sufficiently proved by his Instrumental Music. His 'Fantasies of III Parts for Viols,' and his Pieces for the Virginals, in 'Parthenia,' are full of quaint fancy, and greatly in advance of the age. But in his Vocal Compositions, he was as true a Polyphonist as Tallis himself. Had he taken the opposite course, he would, no doubt, have been equally successful; for he would, most certainly, have been equally consistent. As it was, he not only did honour to the cause he espoused, but he established an incontestable claim to our regard as one of its brightest ornaments. His exquisitely melodious Anthem, for 4 Voices, 'Almighty and everlasting God,'

his 8-part Anthem, 'O clap your hands,' and his magnificent 'Hosanna to the Son of David,' for 6 Voices, are works which would have done honour to the Roman School, in its most brilliant period; and, in purity of intention, and truthfulness of expression, stand almost unrivalled. It is not often that a School ends so nobly: but in England, as in Venice, the last representative of Polyphony was not its weakest champion. No Composer of the period ever wrote anything more worthy of preservation than the too-much-forgotten contents of 'The First Set of Madrigals and Mottets,'[1] from which we have selected the following passage, as strikingly characteristic of the tender pathos with which this great master of expression was wont to temper the breadth of his massive Harmonies, when the sentiment of the words to which they were adapted demanded a more gentle form of treatment than would have been consistent with the sternness of his grander utterances.



It would be manifestly impossible, within the limits of a sketch like the present, to give examples, or even passing notices, of the works of one tenth of the Composers who have adorned the six great Periods of the Early English School. With great reluctance, we must necessarily pass over the names of John Bull, John Mundy, Elway Bevin, Ellis Gibbons, John Hilton, Michael Este, and Adrian Batten; of Douland, Morley, Weelkes, Wilbye, Bennet, Forde, and our noble array of later Madrigal writers; and of many others, too numerous to mention, though much too talented to be forgotten: and we grieve the more to do so, because these men have not been fairly treated, either by their own countrymen or by foreigners.

[1] London, 1612. No trace of the publication of any Second Set can be discovered.

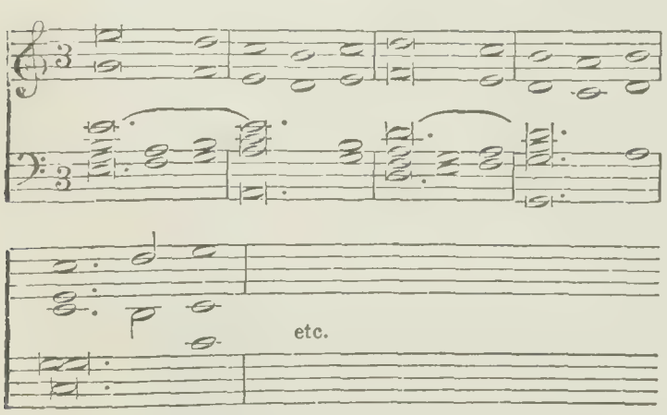
The former have sinned against their School, by neglecting its monuments. The latter, by contemptuously ignoring the subject, without taking the trouble to enquire whether we possess any monuments worth preservation, or not. Time was, when a Venetian Ambassador, writing from the Court of King Henry VIII., could say 'We attended High Mass, which was sung by the Bishop of Durham, with a right noble Choir of Discanters.' And, again, 'The Mass was sung by His Majesty's Choristers, whose Voices are more heavenly than human. They did not chaunt, like men, but gave praise[2] like Angels. I do not believe the grave Bass Voices have their equals anywhere.' If an Italian could thus write of us, in the 16th century, it is clear that we were not always 'an utterly unmusical nation.'[3] And, if we make it possible that such a character should be foisted upon us, now, it can only be, because we have so long lacked the energy to show that we did great things, once, and can—and mean to—do them again. English Musicians are very angry, when foreigners taunt them with want of musical feeling: but, surely, they cannot hope to silence their detractors, while they not only leave the best works of their Old Masters unpublished, and unperformed, but do not even care to cultivate such an acquaintance with them as may at least justify a critical reference to their merits, when the existence of English Art is called in question. We have an early School, of which we need not be ashamed to boast, in presence of those either of Italy, or the Netherlands. If we do not think it worth while to study its productions, we can scarcely expect Italians or Germans to study them for us; nor can we justly complain of German or Italian critics, because, when they hear the inanities too often sung in our most beautiful Cathedrals, they naturally suppose that we have nothing better to set before them. In a later division of our subject, we shall have occasion to speak of wasted opportunities of later date. But we think we have here conclusively proved, that, if our Polyphonic Schools have not obtained due recognition upon the Continent, in modern times, the fault lies, in a great measure, at our own door.[4]

[2] 'Non cantavano, ma giubilavano,' etc.

[3] 'Vom Anbeginn der Dinge, bis auf den heutigen Tag, ein durch und durch unmusikalisches Land.' (Ambros, 'Geschichte der Musik,' Tom. iii. p. 440.) It is true that Ambros gives this, rather as the expression of an universal opinion, on the Continent, than his own; and, that he afterwards criticises our best writers more fairly than any other German author with whose works we are acquainted. But, his Chapter on English Music is little more than an exposition of his own opinion of the light thrown, by modern criticism, upon the statements made by Burney and Hawkins. A stronger instance could hardly be given of the ignorance of the English school on the part of German musicians than the fact that so laborious an investigator as Eitner, in his 'Catalogue of republications of antient music' (Berlin 1871) omits all mention of such important collections as Barnard's 'Selected Church Musick,' Boyce's 'Cathedral Music,' Arnold's 'Cathedral Music,' Novello's 'Fitzwilliam Music,' Hullah's Part Music, Vocal Scores, and Singers' Library: while in his Catalogue of works printed during the 16th and 17th centuries (Berlin, 1877), Tallis and Gibbons are absolutely ignored, and Byrd is mentioned only in connection with two Madrigals in the Collection of Thomas Watson.

Since this article was written, we have met with an advertisement, mentioning the publication, at Leipzig, of 19 Madrigals, by Dowland, Morley, and other English Composers, adapted to German words, and edited by J. J. Meier.

XVII. A long series of progressive triumphs is invariably followed, in the History of Art, by a period of fatal reaction. As a general rule, the seeds of corruption germinate so slowly that their effect is, at first, almost imperceptible. There are, however, exceptions to this law. In the Music Schools of Italy, the inevitable revolution was effected very swiftly. Scarcely had the grave closed over the mortal remains of Palestrina, before the principles upon which he founded his practice were laughed into oblivion by a band of literary savants, themselves incapable of writing an artistic Bass to a Canto fermo.[1] The most eloquent, if not the earliest advocates of 'reform' were, Vincenzo Galilei, and Giovanni Battista Doni: but it was not to them that Polyphony owed its death-blow. The true Founder of THE SCHOOLS OF THE DECADENCE was Claudio Monteverde, in whose Madrigals the rule which forbids the use of Unprepared Discords in Strict Counterpoint was first openly disregarded. In the next division of our subject, we shall have occasion to describe this once celebrated Composer as a genius of the highest order: but we cannot so speak, here, of the ruthless destroyer of a system which, after so many years of earnest striving for perfection, attained it, at last, in the Later Roman School. It was in building up a new School, on a new foundation, that Monteverde showed his greatness, not in his attempts to improve upon the praxis of the Polyphonic Composers. Without good Counterpoint, good Polyphony cannot exist: and his Counterpoint, even before he boldly set its laws at defiance, was so defective, that the conclusion that he discarded it, in despair of ever satisfactorily mastering its difficulties, is inevitable. It is, indeed, much to be regretted that he did not give up the struggle at an earlier period, and devote to the advancement of Monodia the energies, which, when brought to bear upon the work of his immediate predecessors, were productive of nothing but evil: for, however gratefully we may welcome his contributions to the Lyric Drama, we cannot quite so cordially thank him for such attempts to 'rival the harmonies of midnight cats,' as the following passage from his 'Vesperæ,' composed for the Cathedral of S. Mark—a triumph of cacophony which the Prince of Venosa himself might justly have envied.



1 See MONODIA; MONTEVERDE; MASS, vol. ii. p. 231.

In one country alone did the Period of the Decadence produce fruit worthy of preservation. Its effect upon Venetian Music is shown in these 'Vesperæ.' In Rome, it formed so serious an hindrance to productive power, that it contributed absolutely nothing to the *répertoire* of the Pontifical Chapel. But, in England, it gave birth to the Glee, a form of Composition quite distinct from the German Part-Song, and of infinitely higher interest; and of so truly national a character, that it has never, in one single instance, been produced in any other country than our own, or set to other than English words, for which reasons it is doubtful whether full justice could be done to it by any but English Singers. The true relation of the Glee to the older forms of Polyphony will be best understood by comparing the latest English Madrigals with the works of the earliest Glee writers; using the Canzonets of such Composers as Dowland and Ford, as connecting links between the productions of Weelkes, Bateson, and Morley, on the one hand, and those of Battishill, Stevens, and Cooke, on the other. This will show, that, notwithstanding the length of time interposed between the two styles, and the consequent divergence of their tonalities—the use of the Antient Modes having died out with the Madrigal—the newer form could by no possibility have come into existence except upon the ruins of the older one; and it is strange that this last remnant of Polyphony should be found in the country which boasts the earliest specimen of the Art that has as yet been brought to light.

With this beautiful creation, the old *régime* came absolutely to an end: and it now remains for us to trace the rise and progress of the Monodic Schools.

XVIII. THE MONODIC SCHOOL OF FLORENCE presents one of the strangest anomalies to be found in the annals of Art; inasmuch as it originated in no natural process of development, but owed its existence to a theory, which, though altogether wild and visionary in itself, led to results both practical and enduring, and culminated in the invention of the Lyric Drama.[2] The Founders of the School were Peri and Caccini, with whom its first period expired. Its principles were so violently opposed to those by which alone the greatest Composers of the two preceding centuries had been guided, that we can only look upon it as an entirely new manifestation of genius—a new beginning, cut off, by an impassable gulf, from all that had previously existed. Its disciples, holding Counterpoint in undisguised contempt, substituted, in its place, a simple form of irregularly-constructed Melody, easy to sing, but stiff and unattractive to the last degree, and supported only by a Thorough-bass, as simple as itself, and, if possible, still more devoid of interest. This, as exemplified in the 'Nuove Musiche' of Caccini, and Peri's 'Euridice,' was a poor exchange, indeed, for the glories of Polyphony. But, the life and soul of the School lay in its declamatory power. By means

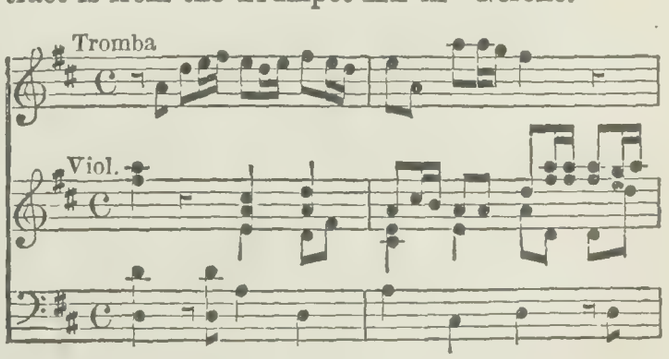
2 See vol. ii. pp. 497–500. Also, MONODIA, PERI, CACCINI.

of this, its leaders appealed, at once, to the hearts of their hearers. If they did not, themselves, attain to the expression of deep pathos, or grand dramatic truth, they led the way to both. And, in this new feature, lay the secret, not only of their own immediate success, in Florence, but, of the amazing rapidity with which their principles gained ground, elsewhere, and the avidity with which they were received by the most talented writers of the period. In spite of its monotony, its crudeness, its poverty, its faults of every conceivable kind, the Monodic School of Florence, dowered with this one virtue, was enabled, even in its infancy, to make an impression upon Art which has never yet been obliterated: and nowhere is that impression more clearly traceable than upon the latest productions of our own enlightened age.

XIX. Of THE SCHOOL OF MANTUA, Monteverde was the beginning, and the end.[1] Though he did not originate the idea of the Opera, he won for it such high distinction, at the Court of Vincenzo Gonzaga, that the efforts of its Florentine parents attracted, thenceforward, but very little notice. In presence of his 'Orfeo' it was impossible that Peri's 'Euridice' could continue to live. Neither in dramatic power, nor in command of the heterogeneous orchestra of the period, did any contemporaneous writer approach him; and to this circumstance he was mainly indebted for his most brilliant successes. He seemed to have been created for the age, and the age for him. Since the Florentine Masters had shown that dramatic effect was possible, Artists saw a new world open to them; and, in their eagerness to enter it, were ready to cast down and destroy every obstacle that lay in their way. Monteverde had wisdom enough to seize the opportunity, and genius enough to use it splendidly. He wrote with growing appreciation of the capabilities of the Stage; and introduced new ideas into every new work. And therefore it is, that, though the School of Mantua boasts only a very few achievements, and these all by one Composer, we look upon it as one of the most important Schools that have ever existed.

XX. THE VENETIAN DRAMATIC SCHOOL was founded, in the year 1637, by Benedetto Ferrari, and Francesco Manelli, whose labours were crowned, from the first, with abundant success, though the merits of their Compositions were eclipsed in 1639 by the triumphant reception of Monteverde's 'L'Adone,' and an almost equally popular work, 'Le Nozze di Peleo e di Tetide,' by his pupil Cavalli.[2] The veteran Monteverde, then Maestro di Cappella at S. Mark's, won scarcely less honour in Venice than he had already earned at Mantua. Cavalli proved himself a worthy disciple of so distinguished a Master; and, though he found a formidable rival in Marc Antonio Cesti, one of Carissimi's most talented pupils, he secured to himself a long-enduring fame. Monteverde died in 1643; but under Cesti and Cavalli, and a long line of successors fully capable of carrying on their work, the School retained, for many years, the prestige of its early successes, and was long regarded as the best in Italy. During its reign, a more flowing style of Melody gradually replaced the monotonous Recitative of Caccini and Peri. The Ritornello[3] was accepted as an adjunct to the Aria. And many other improvements were added, from time to time, until, by the close of the century, the Lyric Drama had attained a position in Venice which excited the envy of every rival School in Europe.

XXI. The early records of THE NEAPOLITAN DRAMATIC SCHOOL are very imperfect; but, our ignorance of the work effected by its older Masters is of little importance, in the presence of its most brilliant ornament, Alessandro Scarlatti, who, though he laboured so long in Rome, is justly claimed by the Neapolitans as their own inalienable property. The vocal works of this great genius are known, to most of us, only through a few fragmentary Songs, which, though they delight all who hear them, have not yet tempted any publisher to issue a more extended selection from his works, very few of which were printed, even during his own lifetime. It is only by a very rare chance that one is fortunate enough, nowadays, to meet with an Opera by Scarlatti, even in MS. We have, however, a few trustworthy Scores, in some of our public libraries. A complete copy of 'Il Prigioniero fortunato' will be found among the Dragonetti MSS. in the British Museum; and the Library of Christ Church, Oxford, possesses a Serenata, 12 Cantatas, and three perfect Operas—'Gerone' (dated '1692 *e scritta* 1693'), 'Il Flavio Cuniberto,' and 'La Teodora Augusta,' all deeply interesting to the student, and rich, not only in fine Songs, but also in charming Ritornelli, for the Stringed Band, interposed between the various Scenes of the Drama. 'Il Flavio Cuniberto' begins with a regular Overture, called '*Sinfonia avanti l'Opera*,' and consisting of a Fugue, on two Subjects, in B Minor, and a Minuet, in 6–8 Time, in the same key. 'Gerone,' and 'La Teodora Augusta,' both contain Airs, for Soprano, with Trumpet Obbligato, exhibiting more than the germ of that Art-form which afterwards culminated in 'Hor la tromba,' and 'Let the bright Seraphim.' 'La Teodora' contains a Sinfonia, with an Obbligato Trumpet. The following extract is from the Trumpet Air in 'Gerone.'



[1] See MONTEVERDE. Also, vol. ii. pp. 500-501.
[2] See vol. ii. pp. 502-504.
[3] See vol. iii. p. 137.

Scarcely less talented than Scarlatti himself was Francesco de' Rossi, a Canon of Bari, whose Operas, 'Il Sejano moderno della Tracia,' 'Clorilda,' 'La pena degl' occhi,' and 'Mitrane,' met with great success, in the latter half of the 17th century. 'Mitrane' contains a Scena, 'Ah, rendimi quel core,' far in advance of its age, and even now a great favourite with Contralto Singers equal to its demands.[1] Fr. de' Rossi also wrote much excellent Sacred Music; though, in this he was excelled by Alessandro Stradella, who was certainly a Neapolitan by birth, if not by residence.[2] The earnest labours of these able men prepared the way for still greater work in the future. Not only were Artists alive to the importance of the Musical Drama; but, the people themselves were taught to love it, until it became as dear to them as the fun of the Carnival. And when, in later years, a race of Composers arose, who appealed directly to their sympathies, the Sovereignty of Art was gradually transferred from Venice to Naples, which, in the next century, became a more important centre of production than the City of the Doges.

XXII. The services rendered to the cause of Art by the Polyphonic Schools of Germany seem very poor indeed, compared with the work wrought, at a later period, in her Schools of Instrumental Music, which speedily rose to eminence, after the death of Hans Leo Hasler, of whose long-felt influence we have already spoken in Section XIII of the present Article.

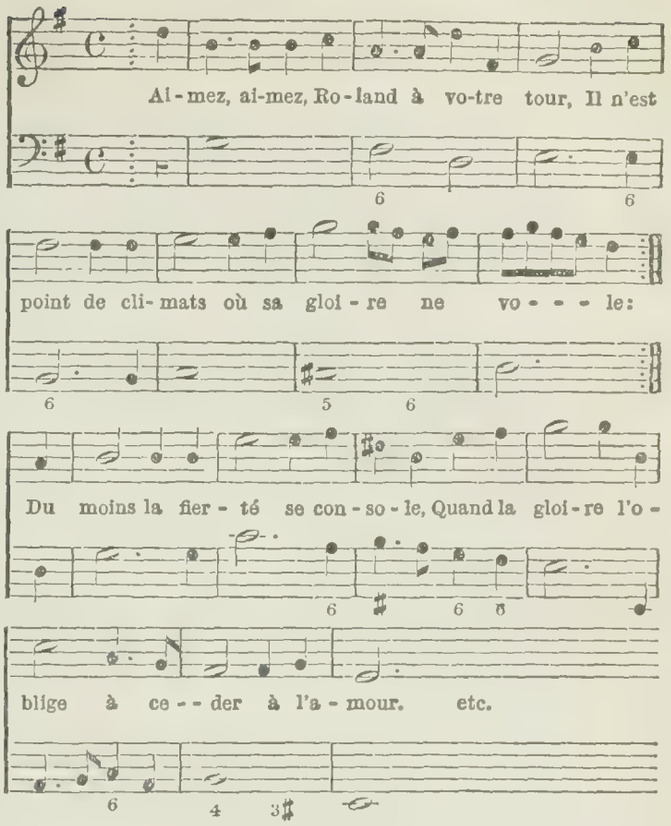
The most noticeable feature in THE GERMAN SCHOOLS OF THE 17TH CENTURY was the great prominence given to the Organ, in all their productions. After the Reformation, the Choral was always supported by an Organ Accompaniment; and the mechanism of the Instrument attained, in Germany, a degree of perfection elsewhere unknown, except perhaps in Venice. But the Organ was not employed alone. The 'Syntagma musicum' of Michael Prætorius, printed in 1612–18, contains descriptions, and engravings, of 'all manner of Instruments' in common use at the time it was written; and thus throws much valuable light, not only upon the progress of Instrumental Music among the author's own countrymen, but, upon the Orchestras employed by the Composers of the Monodic School in Italy. Prætorius himself was an ardent supporter of the rising School, and enriched it with a long list of Compositions, most of which are now utterly unknown; partly, no doubt, on account of the extreme rarity of the original editions, which have never been reprinted; but more, it is to be feared, because critical writers, even in Germany, have been too much blinded by the splendid achievements of Graun, and the Bach family, to give due attention to the period which prepared the way even for Seb. Bach himself. Yet, the annals of this period account for facts in the history of to-day, which, without their help, would be inexplicable. It has long been assumed that Melody and Harmony, form the distinguishing characteristics of Italian and German Music, respectively; and, that this circumstance is to be accounted for by the light and careless nature of the Italians, and the studious habits of the Germans. There may be a certain amount of surface truth involved in the idea: but we, who live in the century which produced an Italian Baini, and a German Offenbach—both types of tolerably large classes—can scarcely be persuaded to receive it unconditionally. The difference between German and Italian Music is traceable, step by step, to a far more definite and satisfactory origin than this. Intoxicated with the prejudices of the Renaissance, the leaders of the Florentine Monodic School held Counterpoint in equal hatred and contempt; not from any logical objection to its laws—which they never troubled themselves to learn—but, because the Art was unknown to Classical Antiquity. They therefore determined to reject, entirely, the experience of the Masters who preceded them, and to build their style upon a new foundation, which demanded nothing beyond a Melody, more or less expressive, supported by a more or less simple Accompaniment; and this principle has been accepted, as the basis of the Italian style, from their day to ours. But, no such principle was ever accepted in Germany. The lithe motion of Hasler's contrapuntal involutions was as much appreciated, in Vienna, as in Nuremberg: and, when the progress of Instrumental Music demanded still greater freedom, the laws of Counterpoint were modified to suit the exigencies of the occasion; the antient Modes were abandoned in favour of more modern tonalities; and just so much innovation as was found absolutely necessary was freely permitted, while everything in the older system not essentially incompatible with the change of circumstances was thankfully retained, not from respect for its antiquity, but from sincere conviction of its lasting value. Unlike Peri, and Monteverde, the German Masters destroyed nothing. They were content to work on, upon the old foundations; introducing, from time to time, whatever changes the spirit of the age dictated, and wholly undisturbed by that visionary restoration of Hellenic Tragedy which formed the mainspring of the Italian revolution. And thus it happened, that the Strict Counterpoint of the 16th century gave place to the modern system of Part-writing, which has, ever since, formed the true strength, not only of every German School, but every German Composer, from Bach to Brahms; while, by confining its attention entirely to Melody, the pedantry of the Renaissance gave birth, in Italy, to another style,

[1] See SCENA, IV, vol. iii. p. 240.
[2] See vol. ii. pp. 504-505, and 537-538.

from which every Italian Composer, from Monteverde to Rossini, has drawn his most graceful inspirations, and his most captivating effects. Let us be equally thankful for both; while, by a careful study of their respective histories, we strive to attain the power of justly appreciating their respective merits.

XXIII. Jean Baptiste Lulli, the founder of THE FRENCH SCHOOL OF THE 17TH CENTURY, though an Italian by birth, was so thoroughly a Frenchman in taste and feeling, as well as by education, that his actual parentage may well be forgotten, in his attachment to the country of his naturalisation. His style, though resembling in certain technical points that of the Monodic School of Italy, differs so widely from it in character and expression, that it can only be fairly judged as an original creation. Moreover, his instrumental works, and especially the Overtures to his dramatic pieces, prove him to have attained considerable proficiency in the modernised form of Counterpoint called Part-writing, and to have known how to use it with so much originality of form, and breadth of effect, that the particular type of Orchestral Prelude which he undoubtedly invented, soon came to be regarded as an indispensable introduction to the Lyric Drama. Technically, this Fugued Prelude brought him into somewhat close relation with the German Schools; yet, his manner was even less German than Italian. In truth, his obligations to the great Masters of other countries were so slight, that the style he gave to France may be described as, in every essential particular, his own. That he trained no body of admiring disciples to follow in his steps will not seem surprising to those who have read his biography; and so it happened, that, for nearly half a century after his death, very little, if any progress was made: yet, he none the less gave France a national School, in which her own children were not slow to distinguish themselves, at a later period. Both the 'Opéra Comique,' and the 'Vaudeville,' though moulded into their now universally accepted forms at a period long subsequent to his decease, owe much of their distinctive character to the impress of his genius; which also exercised a remarkable influence upon the development of the 'Grand Opéra,' not only in its earlier stages, but even after it had made considerable advance towards maturity. Indeed, the principles upon which he worked have undergone wonderfully little radical change since the close of the 17th century; while the general characteristics of his School are clearly recognisable in works which have long been accepted as embodiments of the popular taste of a far more modern epoch. For instance, the following bright little Melody from his once popular Opera, 'Roland,' breathes the spirit of Lutetian gaiety no less freely than many a set of Couplets by Boieldieu, or Hérold, though it was written more than a century before even Gluck's first appearance in Paris.[1]

[1] MS. Scores of 8 of Lulli's Operas will be found in the Dragonetti Collection, in the British Museum.



XXIV. THE ENGLISH SCHOOL OF THE 17TH CENTURY was, in many respects, a very advanced one; though its triumphs were of a varied character. Orlando Gibbons cannot be reckoned among its Masters, because, although he lived until the year 1625, his method, his style, and his predilections, were wholly with the *cinquecentisti*. The period which followed was not promising. The disturbed state of the kingdom, during the reign of Charles I., and the progress of the Great Rebellion, necessarily exercised a fatal influence on the development of Art; yet, the latter half of the century was extraordinarily productive, and the period which we shall distinguish as that of THE SCHOOL OF THE RESTORATION gave birth to a distinct race of Composers of more than ordinary talent, as well as to a new style, which owes so many of its distinguishing features to the political and social changes of the period, that, without recalling these, it would be impossible to explain how it ever came into existence at all.

The healthy and universal love for Art, which, in the beginning of the century, led to the recognition of the Madrigal as a national institution, and the Anthem as an indispensable feature in the Services of the Church, died out completely, during the short but eventful period of neglect and confusion interposed between the death of King Charles I. and the Restoration. The Puritans hated the Music of the Anglican Church most cordially. They regarded the destruction of every Organ and Office-Book which fell into their hands, as a religious duty; and, to the zeal with which they carried out their infamous system of spoliation, we are indebted for the loss of many a treasure bequeathed to us by our older Schools. Condemning all aspirations after the Beautiful as snares of the Evil One, they would not even suffer their children to be

taught to sing; and those who had been taught, in happier times, were speedily losing the youthful freshness of their Voices, now doomed to perpetual silence. This bigotry of the Roundheads put an end to all hope of progress: but, happily, their term of power came to an end, before the traditions of the past were entirely forgotten. Men, who had done good service, before their career was interrupted by the Civil War, were still living, when, in the year 1660, the Restoration of Charles II. inaugurated a brighter future for music; and, to one of these the 'Merrie Monarch' wisely entrusted the reconstruction of the Choir of the Chapel Royal.[1]

Henry Cook, the new 'Master of y^e^ Children,' had himself sung in the Chapel, as a Chorister, in the days of King Charles I.; and afterwards attained some reputation as a Composer: but, on the breaking out of the Rebellion, he relinquished his studies, for the purpose of joining the Royal Army; and in 1642 obtained a Captain's Commission, on which account he was afterwards known as Captain Cook. It has been said that his military prowess was greater than his musical talent; yet it is certain that he trained more than one of the best Composers of the rising School, and trained them well, though not without the assistance of able coadjutors. Among these learned colleagues were three *quondam* Choristers—Edward Lowe, Christopher Gibbons (the son of Orlando), and William Child, who, on the King's return, were appointed joint Organists of the Chapel. Another member of the older staff—Henry Lawes—was restored to Office, as Clerk of the Cheque, and commissioned to compose the Music for the approaching Coronation.[2] The Music played by the 'Sagbutts and Cornets,' during the triumphal Procession from the Tower to Whitehall, was written by an old Chorister of Exeter Cathedral, Matthew Lock. This accomplished Musician performed his task so successfully, that he was immediately promoted to the Office of Composer in ordinary to the King; and, in that capacity, at once began to furnish new Music for the resuscitated Choir, and to assist his trusty fellow-labourers in their endeavour to recover the ground which had been lost. But, there were grave difficulties in the way. So many old Part-Books had been destroyed, that, had it not been for Barnard's 'First Book of Selected Church Musick,'[3] there would have been little left to sing. Moreover, the difficulty of procuring Choir-Boys, in the face of Puritan superstition, was almost insuperable. In many Cathedrals, this dearth of Treble Voices led, not only to the extensive employment of adult *Falsetti*, but even to the substitution of Cornets for the Vocal Parts. Captain Cook, however, was fortunate enough to secure, for the Chapel Royal, a small body of Choristers, of superlative excellence, three of whom—Pelham Humfrey, John Blow, and Michael Wise—came at once to the front, and, before many years had passed, were openly recognised as the Founders of the new School. Strengthened by the Voices of these talented Boys, the Choir could scarcely fail to flourish; though its management was no easy task. The King, whose taste had been formed on the Continent, regarded the grand conceptions of Tallis and Byrd, and the solemn tones of the Organ, with far less favour than the lighter strains of the contemporary French School, and the more brilliant effect of a full Orchestra. He therefore filled the Organ-loft of the Chapel Royal with a band of Viols, Sagbutts, and Cornets; and, in order that they might produce the greater effect, commanded his Composers to intersperse their Anthems with a goodly proportion of cheerful *Ritornelli*, adapted to the powers of the new Instruments. They obeyed, of course, to the best of their ability. But, neither Lowe, nor Chr. Gibbons, nor even the more melodious Child, took kindly to the new French style, which must have sounded strange indeed to ears so long accustomed to the Polyphony of a byegone age. The two first-named Organists, indeed, contributed comparatively little Music of any kind to the *repertoire* of the newly-organised Choir: but Dr. Child was a voluminous Composer; and his works, though they will not bear comparison with those of Orlando Gibbons, retain much of his breadth of manner, and, notwithstanding their flowing vein of melody, show little affinity with the more modern Monodia which the King desired his Musicians to cultivate. Henry Lawes, on the contrary, was a zealous disciple of the Monodic School; and chiefly delighted in the confection of Sæcular Songs, which, though celebrated enough in their own day, and commended, by some of the best Poets of the age, for their prosodial accuracy, lack the genial freshness which alone can invest such works with enduring interest. There can be no doubt that in England, as well as in Italy, the earliest productions of the Monodic æra were pervaded by a perhaps unavoidable spirit of pedantry, which, however valuable it may have been as a preparation for better things, proved fatal to their own longevity. Beyond this transitional point Lawes never soared; and hence it is, that, while his Songs are now known only to the Antiquary, some of those written by his contemporary, Matthew Lock—who was, in every way, a greater Musician, and gifted with an infinitely richer imagination, and a far more liberal share of natural talent—are as popular to-day, as they were 200 years ago. There are, indeed, passages in Lock's Music to Macbeth, which can never grow old. Such Movements as 'When cattle die, about we go,' 'Let's have a dance upon the heath,' and the Echo Chorus, 'At the Night-Raven's dismal voice,' would have been welcomed as delightful novelties, in the days of Sir Henry Bishop; while the dramatic power exhibited in the Music to the Third Act is quite strong enough to give colour to the theory which has been sometimes

[1] That is to say, the Chapel attached to the Palace at Whitehall, destroyed by fire Jan. 5, 1698.

[2] According to Sir Richard Baker's Chronicle, Matthew Lock composed the Music for King Charles's public entry; and Captain Cook, that sung at the Coronation. Probably, Cook and Lawes each contributed a portion of the latter. At any rate, it is certain that Lawes composed the Anthem, 'Zadok the Priest.'

[3] See vol. i. p. 140.

entertained, that Purcell himself made a transcript of the work, in the days of his youth, for purposes of study.[1]

Yet, even this was not enough to meet the demands of the age. Subsequent events proved that the King expected greater things than either Lawes or Lock could produce; and he gained his end by a clever stroke of policy. Attracted by the evident talent of the new 'Children,' he encouraged them, not only to sing their best, but to make attempts at Composition, also. An opportunity for testing their proficiency in this more difficult branch of Art was soon found. To celebrate a Victory over the Dutch Fleet,[2] a Thanksgiving Anthem was needed, at a few hours' notice. The news of the capture of the Enemy's ships arrived on a Saturday; and, finding that the King expected the Music to be performed on the following day, the Composers attached to the Chapel unanimously declined the task of furnishing it. The Choir had, by this time, been reinforced by a second set of Choristers, among whom were Thomas Tudway, William Turner, and the greatest genius of the age, Henry Purcell. Such a company of Choir-Boys had probably never before, and has, certainly, never since, been gathered together. And its youthful members must have been well aware of their own value; for three of them—Humfrey, Blow, and Turner—undertook the task which their elders had declined, and jointly produced the so-called 'Club-Anthem,' 'I will alway give [3] thanks,' Humfrey furnishing the first Movement, Turner the second, and Blow the concluding Chorus. This, at least, is the origin ascribed to that once-famous Composition, by Dr. Tudway: and, though the authority of his personal recollection must be weighed against certain chronological difficulties with which the subject is surrounded,[4] it is clear that the youth of the associated Composers tends in no wise to diminish the credibility of the story; for, as early as Nov. 22, 1663, Pepys tells us that 'The Anthem was good after Sermon, being the 51st Psalme, made for five Voices by one of Captain Cooke's Boys, a pretty Boy. And they say there are four or five of them that can do as much.' The 'pretty Boy' was, in all probability, Pelham himself, then between 15 and 16 years old: and we are quite safe in regarding him, and his 'four or five' fellow-Choristers, as the true Founders of the School of the Restoration.

The basis upon which this School was built was an entirely new Art-form, as original in its conception, and as purely English in its character, as the Glee. What the Motet was, to the School which preceded the change of Religion, and the Full-Anthem to that which immediately followed it, the Verse-Anthem was to the School we are now considering. Designed, in the first instance, to gratify King Charles's 'brisk and airy' taste, this new creation, notwithstanding the name universally applied to it, bore far less resemblance to the Anthem, properly so called, than to the more modern Cantata; from which it differed, chiefly, in that it was written, in most cases, for a greater number of Voices, that it was supported by an Organ Accompaniment, and that it invariably terminated, even if it did not begin, with a Chorus. Its Movements were usually short; and written in a style partaking pretty equally of the more salient features of rhythmic Melody and Accompanied Recitative. Frequent Ritornelli were introduced, in obedience to the King's express command; and the general character of the whole was more florid, by many degrees, than anything that had yet been heard in English Church Music, and so arranged as to display the Solo Voices to the best advantage.

Verse passages—*i.e.* passages for Solo Voices—were also freely introduced into the newer 'Services,' from which the Fugal Imitations of the 16th century were gradually eliminated, in order to prepare the way for a more flowing style of Melody. Sometimes, though not very frequently, these passages were varied, as in the Verse Anthem, by the interpolation of Instrumental Ritornelli; while the venerable Gregorian Psalm-Tones were gradually replaced, first by the Single, and afterwards by the Double Chaunt.

Pelham Humfrey was the first Composer who achieved any real success in this new style of Composition. On the breaking of his Voice, he was sent, at the King's expense, to the Continent, where he studied, for some time, under Lulli. Pepys speaks of his return to England, 'an absolute Monsieur,' in November, 1667. That he was by that time thoroughly imbued, both with the principles and the practice of the French School, there can be no doubt. But, he was no servile imitator, even of Lulli. There is a grace, even in his boldest Licences, that at once proclaims him a true genius; and an originality in his method which would have stamped him for ever as a Master, even had he found no followers to assist him in forming a School. He delighted in the use of the Chromatic Semitone, and other Intervals rigidly excluded from the works of the older Contrapuntists; and produced new, and extremely pleasing effects, by the constant alternation of his Solo Voices, to which he allotted short responsive phrases, contrasted together in delightful variety, and always so contrived as to give due prominence to the meaning of the Sacred Text. All these peculiarities of manner he shared so liberally with his Choir-mate, Michael Wise, that the points of resemblance between the styles of the two Masters are almost innumerable. In flowing grace, and tenderness of expression, they were so nearly equal that it is sometimes impossible to choose between them. In no essential particular does the method of Part-writing originated by the one differ from that adopted by the other. Their works are designed upon an exactly similar plan, and are evidently based upon exactly similar intentions. But, in sustaining power, the advantage was decidedly in Humfrey's favour. His phrases are always compact, and

[1] See vol. ii. pp. 183–185.

[2] Possibly, the capture of 135 Dutch vessels, in 1664, before war was actually declared.

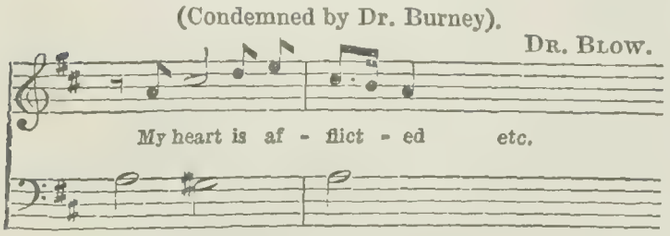
[3] A copy of this Anthem will be found in vol. iii. of the 'Tudway Collection,' in the British Museum.

[4] See vol. i. p. 757, note.

firmly knit together in true logical sequence; while, as a general rule, the Anthems of Wise are broken into an infinity of fragmentary passages, which, despite their pleasing changes of expression, lack the continuity of idea which undoubtedly gives a higher tone to many of Humfrey's more fully developed Movements.

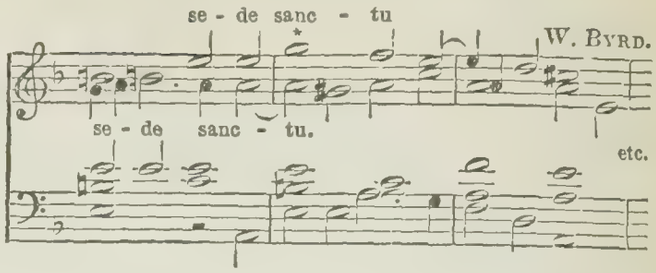
Blow treated the Verse Anthem somewhat differently. Without seriously interfering, either with its general intention, or with the rough outline of its curiously irregular form, he not only developed it at greater length than had before been attempted, but contrived to clothe it with a certain individuality which marks a clear stage on the path of progress. Though unable to compete with Humfrey, or Wise, in gentleness of expression, he was always melodious, and always interesting; and if, in some of his more ambitious works—as, for instance, his two most popular Anthems, 'I was in the spirit,' and, 'I beheld, and lo! a great multitude'—he failed to reach the sublimity of the Text he illustrated, he undoubtedly prepared the way for greater things. His full Anthems—such as 'The Lord hear thee,' and 'God is our hope'—are written in a style more broad and forcible than that of either of his talented rivals; and his Services are admirable: yet he has not always received full justice at the hands of modern critics. Burney, generally so fair, and courteous, even in his censures, fills four crowded pages with examples of 'Dr. Blow's crudities'; a large proportion of which are less harsh, by far, than many a cutting discord in daily use among more modern Composers; while others—like the 'monstrous combinations' so severely condemned by the editor of Byrd's 'Cantiones Sacræ'—are clearly founded upon clerical errors in the older copies. The truth is, neither Burney, nor Horsley, seem to have attached sufficient significance to the fact, that, in the matter of Licences, our English composers were always in advance of their Continental contemporaries.[1] We cannot ignore this peculiarity: and, (making due allowance for self-evident misprints,) it would be much better to accept it as a characteristic of our national style—which it certainly is—than to join with Burney in abusing the taste of our forefathers, or to say, with Horsley, that 'their practice was bad,' with regard to progressions, which, even when satisfactorily proved against them, are found, in many cases, to be perfectly defensible. There is, surely, very little to censure, in the following example from Blow; while the 'monstrous' G♯, in that from Byrd, is evidently intended for E, in response to the Altus in the preceding bar.

(Condemned by Dr. Burney).



1 See vol. ii. p. 192*b*. We must, however, except the progressions affected by Monteverde, and Gesualdo, Prince of Venosa—two Composers whose taste for cacophony has never been rivalled.

(Condemned by W. Horsley.)



Passing on to the second set of Choristers, we find Drs. Turner and Tudway doing good work in their generation, though distinguished by far less brilliant talents than their more illustrious predecessors. But, the works of these really accomplished writers will bear no comparison with those of their great contemporary, Henry Purcell, a genius of whom any country might well have been proud.

It is difficult to say whether the English School owes most to Purcell's Compositions for the Church or for the Theatre; for he wrote with equal success for both; displaying in his Sacred Music the gravity inseparable from a devout appreciation of its true purpose; and in his Operas a greater amount of dramatic power than had ever before been exhibited by any of his countrymen, and more than had often been heard, even in Venice. In every branch of the Art he practised he was invariably in advance of his age; not by a few short decads, but, by little less than a century. This assertion may seem extravagant, but it is capable of plain demonstration. Purcell wrote his Music to 'The Tempest,' including 'Full fathom five' and 'Come unto these yellow sands,' in 1690. Dr. Arne wrote his, including 'Where the bee sucks,' in 1746. Yet, the style is as advanced—we might almost say, as modern—in the one case, as in the other, and as little likely to be set aside as 'old-fashioned.' It may be said that the difference of calibre between Purcell and Arne is too great to justify the mention of their names in the same breath. It may be so. But our argument extends to greater men than Arne. Seb. Bach, who was exactly 10 years and 8 months old on the day of Purcell's death, astonishes us by the flexibility of his Part-writing, in which the most beautiful effects are constantly produced by means of Intervals sedulously avoided by the older Contrapuntists. In all this, Purcell was beforehand with the German Master. In his well-known Anthem, 'O give thanks,' he uses the Diminished Fourth, at the words, 'He is gracious,' with an effect as pathetic as that which Bach draws from it in the 'Passion Music.' We do not say that he was the first to employ this beautiful Interval—for it was used by Orlando Gibbons:[2] but, he was the first to make it a prominent feature; and the first to demonstrate its true place in the Gamut of Expression. Again, in the splendid 'Te Deum' and 'Jubilate' composed for S. Cæcilia's Day, 1694, and afterwards sung, for 18 years successively, in S. Paul's Cathedral, at the Festival of the Sons of the Clergy, there are

2 See the last bar but one of our example, on p. 277 of this volume.

passages of the most advanced character: notably one, beginning at the eighth bar of the introductory Symphony, in which the Discords struck by the Trumpets are resolved by the Violins, and *vice versa*, with a boldness which has never been exceeded.

It would be difficult to find two passages more unlike each other, in detail and expression, than this, and the alternate Chords for Stringed and Wind Instruments in Beethoven's [1] Symphony in C minor: yet, in principle, they are absolutely identical, both owing their origin to a constructive peculiarity which Purcell turned to good account more than a hundred years before the idea suggested itself to Beethoven. And this is not the only remarkable point in the first English 'Te Deum' that was ever enriched with full Orchestral Accompaniments. The alternation of Solo Voices and Chorus is managed with exquisite skill; and sometimes—as at the words 'To Thee Cherubim,' and 'Holy, Holy, Holy,'—produces quite an unexpected, though a perfectly legitimate effect. The Fugal Points, in the more important Choruses, though developed at no great length, are treated with masterly clearness, and a grandeur of conception well worthy of the sublime Poetry to which the Music is wedded. The Instrumentation, too, is admirable, throughout, notwithstanding the limited resources of the Orchestra; the clever management of the Trumpets—the only Wind Instruments employed—producing an endless variety of contrast, which, conspicuous everywhere, reaches its climax in the opening Movement of the 'Jubilate'—an Alto Solo, with Trumpet *obbligato*—in which the colouring is as strongly marked as in the masterpieces of the 18th century. Judged as a whole, this splendid work may fairly be said to unite all the high qualities indispensable to a Composition of the noblest order. The simplicity of its outline could scarcely be exceeded; yet it is conceived on the grandest possible scale, and elaborated with an earnestness of purpose which proves its Composer to have been not merely a learned Musician, and a man of real genius, but also a profound thinker. And it is precisely to this earnestness of purpose, this careful thought, this profound *intention*, that Purcell's Music owes its immeasurable superiority to that of the best of his fellow-labourers. We recognise the influence of a great Ideal in everything he touches; in his simplest Melodies, as clearly as in his more highly finished Cantatas; in his Birthday Odes, and Services, no less than in his magnificent Verse Anthems—the finest examples of the later School of English Cathedral Music we possess. The variety of treatment displayed in these charming Compositions is inexhaustible. Whatever may be the sentiment of the words, the Music is always coloured in accordance with it; and always worthy of its subject. It has been said that he errs, sometimes, in attempting too literal an interpretation of his text, as in the Anthem, 'They that go down to the sea in ships,' which begins with a Solo for the Bass Voice, starting upon the D above the Stave, and descending, by degrees, two whole Octaves, to the D below it. No doubt, this passage is open to a certain amount of censure—or would be so, if it were less artistically put together. Direct imitation of Nature, in Music, like *Onomatopoiea* in Poetry, is incompatible with the highest aspirations of Art. Still, there is scarcely one of our greatest Composers who has not, at some time or other, been tempted to indulge in it—witness Handel's Plague of Flies, Haydn's imitation of the crowing of the [2] Cock, Beethoven's Cuckoo, Quail, and Nightingale, and Mendelssohn's Donkey. We all condemn these passages, in theory, and not without good reason: yet we always listen to them with pleasure. Why? Because, apart from their materialistic aspect, which cannot be defended, they are good and beautiful Music. A listener unacquainted with the song of the Cuckoo, or the bray of the Donkey, would accept them, as conceived in the most perfect taste imaginable. And we have only to ignore the too persistent realism in Purcell's passage also, in order to listen to it with equal satisfaction; for, it is not only grandly conceived, but admirably fitted, by its breadth of design, and dignity of expression, to serve as the opening of an Anthem which teems with noble thoughts, from beginning to end.[3]

This peculiar feature in Purcell's style naturally leads us to the consideration of another, and a very brilliant attribute of his genius—its intense dramatic power. His Operas were no less in advance of the age than his Anthems, his Odes, or his Cantatas, his keen perception of the proprieties of the Stage no less intuitive than Mozart's. The history of his first Opera, 'Dido and Æneas,' written, in 1675, for the pupils at a private boarding-school in Leicester Fields, is very suggestive. Though he produced this fine work at the early age of 17, it not only shows no sign of youthful indecision, but bears testimony, in a very remarkable manner, to the boldness of his genius. Scorning all compromise, he was not content to produce a Play, with incidental Songs,

[1] See vol. ii. p. 570 *b*.

[2] Quoted under OBOE, vol. ii. p. 488 *a*.

[3] The passage was written for the quite exceptional Voice of the Rev. John Gostling, Sub-Dean of S. Paul's. Few Bass singers can do it justice; but many of our readers must remember its admirable interpretation by the late Mr. Adam Leffler.

after the fashion of the times; but set the whole of the Dialogue in Recitative. Now, among the numerous qualifications indispensable to a really great dramatic Composer, the most important, by far, is that innate perception of rhetorical truth without which good declamation is impossible. Perfect elocution is as necessary to the development of scenic power as perfect acting: and Recitative, which, instead of assisting the effective delivery of the text, serves only as an hindrance to it, must be radically bad. Lulli, following the example of the Italian Monodic Composers, bore this carefully in mind, and hence, in great measure, his Operas were so extraordinarily successful. Pelham Humfrey had seen enough of Lulli, in Paris, to understand this position, perfectly; and, no doubt, he imparted much of his experience to his promising pupil: but Purcell, from the very first, took higher ground than either Humfrey, or even Lulli himself. It is not too much to say that the declamatory consistency of his Recitative has never been surpassed. It is so true to Nature, and shows so intimate an acquaintance with the genius of the English language, that no good Singer, resigning himself to its lead, can possibly misconceive his part. Its command of delineation is unlimited. Passing, constantly, from the unaccompanied to the accompanied form, and, from this, to the more highly-wrought phrases of *Recitativo a tempo*, or *Aria parlante*, it becomes, alternately, a vehicle for the expression of profound pathos, or passionate excitement. Moreover, its adaptability to the individual character of the Scene, even in situations of the most powerful dramatic interest, is very remarkable. In many of Purcell's Operas, we meet with very near approaches to the Romantic. And the Music is always equal to the emergency. One of the highest flights he ever attempted, in this particular direction, is to be found in the Frost Scene in 'King Arthur'; in which the shivering Voice of the Genius of Cold is brought into contrast with the bright Song of Cupid, by means as legitimate as those used, in the 'Zauberflöte,' for the purpose of contrasting the 'Hm, hm, hm, hm,' of Papageno with the Voices of the Three Boys. This, however, is only one case, out of many. Wherever the necessity for a master-stroke presents itself, Purcell is invariably found ready to meet it.

In summing up our estimate of the genius of this most gifted writer, we cannot but be struck by its wonderful versatility. His Overtures and Act-Tunes are as interesting as his Choruses. His Instrumental Chamber Music, if inferior to that of Corelli, ranks far above that of any other writer of the period; and, in the difficult art of writing upon a Ground-Bass, he was never even approached, before the time of Handel—the only Composer who has ever yet succeeded in investing that particular form of construction with a perfectly unfettered aspect. That he was largely indebted to Lulli, in the first instance, there can be no doubt; and he himself made no secret of his admiration for the works of the Italian Monodic Composers; but, he passed them all, as Handel passed Ariosti, and Haydn, Porpora. The only one of his contemporaries who can fairly claim to be placed by his side is Alessandro Scarlatti; between whose work and his own a strong analogy may be traced. But, Scarlatti lived 66 years, and Purcell only 37. How he contrived to accomplish so vast an amount of work in so short a life-time is a secret which we shall best understand by comparing his career with that of Schubert, to whom he is very closely allied, by his indefatigable industry, the exhaustless range of his productive power, the spontaneity of his conception, and the intensity of his devotion to an Art which, from first to last, formed the mainspring of his existence.

We have dwelt so long upon the work of our greatest native Musician, that we have but little space left for the consideration of that accomplished by his successors, though some of these have left us Compositions which we could ill afford to lose. We have already spoken of two sets of Choristers, educated in the Chapel Royal. That famous nursery of Art produced yet a third set, educated, for the most part, under Dr. Blow.[1] Among these were, Jeremiah Clarke, and William Croft, Mus.Doc.; the former, celebrated for the exquisite tenderness of his style, which finds its most touching expression in the well-known Anthem, for Treble, Solo, and Chorus, 'How long wilt thou forget me'—an embodiment of pathos only too applicable to the sad history of the Composer's life; the latter, one of the most conscientious, as well as the most prolific of our Cathedral writers, whose Anthems and Services, all characterised by masterly workmanship, true musicianlike feeling, and even—as in 'Cry aloud and shout'—by something approaching sublimity, are little less popular at the present day than they were a hundred years ago. To the names of these Composers must be added those of some excellent Musicians, who, though educated in other Choirs, almost all become Gentlemen of the Chapel Royal in later life; notably, those of Drs. Greene, Boyce, and Nares, John Goldwin, John Weldon, and the clerical amateurs, Drs. Holder, Creyghton, and Aldrich, who all did good service to their Church, and their Art, and are gratefully remembered in every Choir in England. Had Purcell's life been spared, these men would have supplemented his work with no ignoble contributions to the archives of the School. Greene, and Nares, though a little too much inclined to sæcularity of manner, were thorough masters of Melody; the few Compositions we possess, by Creyghton, are marked by an originality which could not but have led to excellent results, had his pen been more productive; while Weldon, Boyce, and Aldrich, needed only a greater breadth of style to raise their works to a more than satisfactory level. But their leader was taken from their head.

[1] After the death of Captain Cook, in 1672, Pelham Humfrey held the Office of Master of the Children, until his early death in 1674. Humfrey was succeeded, in turn, by Dr. Blow, Dr. Croft, J. Church, Bernard Gates, Dr. Nares, and Dr. Ayrton.

Purcell left no one behind him capable of raising the School to a higher level than it had already attained, or even of worthily supporting it at the point indicated by his own magnificent beginning. A period of decadence was, therefore, inevitable; and no more successes were recorded, after his early death, in 1694, until an unexpected importation of foreign talent so changed the aspect of affairs that the brightest triumphs of the past were forgotten in the anticipation of a still more splendid future.

XXV. Though THE ITALIAN SCHOOLS OF THE 18TH CENTURY are most noticeable for the influence they exercised upon the Opera Buffa, in the earlier stages of its development, they also witnessed a steady advance, in Serious Music of all kinds. In the Sacred Music of Leo and Feo, and still more in that of Marcello and Durante, we find the sober gravity of Carissimi and Alessandro Scarlatti clothed with a grace unknown to any of the Composers of the preceding century; a happy union of the best qualities of the Monodic style with the stronger features of a modified system of Counterpoint, not altogether unlike that which was already preparing so great a future for Germany. Leo and Feo—both pupils of Pitoni, one of the last survivors of the Polyphonic æra—inclined most lovingly to the massive combinations which alone can invest a full Chorus with becoming dignity; supporting their Voice Parts by an Instrumental Accompaniment, equally remarkable for the breadth of its conception, and the purity of its effect. Marcello, caring less for the sublime than the beautiful, engrafted upon the softer graces of the Venetian manner a polished ease entirely his own; and, never losing sight of the calm sobriety of treatment without which good Sacred Music cannot exist, invented a style too refined, like that of Durante, to become 'old-fashioned,' even in our own day.[1] Nearly all these Composers, except Durante, wrote for the Theatre, as well as for the Church; as did also their fellow-countrymen, Porpora, Domenico Scarlatti, Vinci, Jomelli, and many others of less celebrity; and their united efforts gradually formed a style which found its way into many distant parts of Europe. Increased attention had long been given to the cultivation of the Voice; and Airs, demanding powers of execution before unnecessary, were now expected, as a matter of course, not only in the Opera, but in the Oratorio. New Divisions were daily invented, for the purpose of exhibiting the dexterity of Singers, who vied with each other in their determination to overcome difficulties before unheard of. *Arie di bravura*[2] were gradually substituted for the more simple and declamatory Melodies of an earlier period. These Airs, however, were always well constructed, enriched by judiciously arranged Accompaniments, and often full of genuine dramatic fire, as may be seen in the following passage from a once famous but long forgotten example by Vinci.

In an age which boasted sufficient facility of invention to produce such passages as these, and Singers capable of doing them justice, the step from Opera Seria to Opera Buffa was but a short one. It needed only the exuberant spirits of some bright Neapolitan Composer to strike out a new idea worth cultivating, and such a Composer was found in Logroscino. We have already mentioned the radical change effected in the constitution of the Lyric Drama by this talented writer's invention of the Concerted Finale.[3] To that, and to the transcendant genius of Pergolesi, and his successors, Galuppi, Sacchini, Piccinni, Paisiello, and Cimarosa, the Neapolitan and other Italian Schools owe the extraordinary excellence of their Opera Buffa. Equally guiltless of the triviality by which its foreign imitations have been degraded on the one hand, and the heaviness which has oppressed them on the other, the lighter forms of Italian Opera have never lost either the sprightly gaiety or the indescribable refinement imparted to them by the Masters who first showed the possibility of presenting Comedy, as well as Tragedy, in a Lyric dress: and hence it is that the true Opera Buffa, notwithstanding its extreme, and sometimes extravagant lightness, still claims an artistic status which cannot fairly be accorded to the Comic Operas produced in any country north of the Alps.

XXVI. In turning from the Italian to THE GERMAN SCHOOLS OF THE 18TH CENTURY, one cannot but be struck by the strange contrasts presented in the history of Sacred Music in the two countries. With Leonardo Leo, the grand Italian style died out. Neither Durante, Pergolesi, nor Jomelli, made any attempt to cultivate it; and the travesties of Guglielmi correspond too closely with the history of his life to conduce to the dignity of Sacred Art. The best period of the grand German style, on the contrary, was, at this epoch, only just beginning to dawn. It originated, as we have seen, in the days of Michael Prætorius, with a growing taste for Vocal Music with Instrumental Accompaniment. The elder Bachs, and their contemporaries, took care that this did not degenerate into the

[1] One of his melodies, from the 22nd Psalm, sounds perfectly in its place when used *notatim* by Rossini in his Overture to the 'Siege of Corinth.'

[2] See vol. ii. p. 510.

[3] See vol. ii. p. 514. One of the earliest known instances of the introduction of the Concerted Finale into Opera Seria occurs in Paisiello's 'Pirro.'

weakness inseparable from unrelieved Monodia. Bearing in mind the lessons imported from Venice by Hasler, they fully appreciated the grandeur of effect producible by the simultaneous motion of a multiplicity of independent Parts; and having learned by experience the secret of accommodating that motion to the varying character of the Instruments they employed, and of justly balancing against each other their masses of Vocal and Instrumental Harmony, they succeeded, within a very short space of time, in laying the foundations of a School the essential features of which have lasted to the present day.

Passing from the works of this transitional period to those produced but a very few years later, we find the more prominent features of the style exhibited, in fullest perfection, in the Compositions of two writers who are sometimes erroneously supposed to have invented it. Sebastian Bach, and Henrich Graun, having passed their infancy among the earlier Masters of this new Polyodic School,[1] had learned its secrets so thoroughly, that, on thei rarrival at an age which enabled them to think for themselves, they found no difficulty in turning them to such account as had never before been contemplated. Among these secrets were two, of greater importance than the rest, which seem simple enough, to us, though their development into fixed principles was a slow one.

(1) That Voices, supported by Instrumental Accompaniment, can sing many Intervals which cannot be safely entrusted to them without the aid of, at least, a Thorough-Bass.

(2) That there are, nevertheless, certain Intervals, which do not produce a good effect, without some kind of Instrumental Accompaniment, even though sung by Voices capable of taking them in tune, without adventitious aid.

No doubt, these two truisms—as we should now call them—had been impressed upon Seb. Bach's mind, from the days of his youth. At any rate, he made such good use of them, that the Diminished Fourth became as practicable and as plastic in his hands, as the Minor Sixth in those of Palestrina. His successors have admitted their validity, also; but not in an equal degree. No objection has ever been raised against the first law: but, neglect of the second has led to the manifest inferiority of the German Part-Song to the English Glee.

Seb. Bach wrote comparatively little Sæcular Music, of any kind, and none for the Theatre. Graun wrote many Operas, both German and Italian. Most of these were successful: but, long before his time, the German Opera had already been established, on a firm basis, at Hamburg, by Reinhard Keiser, an account of whose work will be found at pp. 507-8 of our second volume, with some mention of that effected by Mattheson, and other writers who flourished at the beginning of the century. After their disappearance, the farther development of Serious Opera in Germany depended almost entirely on the exertions of the indefatigable Graun; for Hasse, though he was born in North Germany, and attained his high reputation in Dresden, was as much a disciple of the Neapolitan School as Durante, or Porpora; while Gluck, though equally devoted to the Italian School in early life, achieved his greatest triumph in that of France. Meanwhile, a distinct School of Comic Opera was established, at Leipzig, by Adam Hiller; the originator of that peculiar form of 'Singspiel,' with spoken Dialogue, which represents the German idea of the Musical Drama as distinctly as the 'Dramma per la musica' does the Italian. [Vol. ii. p. 519.]

And no less rich was the Germany of the 18th century in her Instrumental than in her Vocal Schools. The long line of Bachs handed down their victories over the difficulties of the Organ, from father to son, until Johann Sebastian played as no man had ever played before him, brought the Instrumental Fugue to a degree of perfection which has never since been equalled, and dowered, not only the Organ and Harpsichord, but many a Stringed and Wind Instrument also, to say nothing of the full Orchestra, with a whole library of Compositions, the worth of which has not even yet been fully appreciated. No man then living was able to compete on equal terms with the author of these stupendous works; yet there was no dearth of gifted writers, whose readiness to build upon the foundation provided for them by his marvellous industry led to very important results. Johann Christian Bach carried on his father's work, in London, with earnestness, and success. Carl Philipp Emanuel followed it up, still more effectively, in Berlin, and Hamburg; and, by his refined style of playing, no less than by his delightful Compositions, raised the reputation of his favourite Instrument, the Harpsichord, to very nearly the highest point it was destined to attain, before the career of the fine old 'Clavicembalo' was abruptly terminated by the irresistible attractions of the newly-invented Piano-Forte. And thus arose a style of Music, so well adapted to the capabilities of the Keyboard, that we, with the Piano-forte within our reach, are thankful to return to it, and, wearied with the frivolities of a too facile execution, to refresh our ears with passages designed rather to please than to astonish.

XXVII. But, during the second half of the century, the remembrance of all these Masters was completely swept away by the rising fame of Haydn and Mozart—two giants, who placed between THE SCHOOL OF VIENNA and that of the Bachs a fathomless abyss which no amount of

[1] The terms 'Polyodic' and 'Polyphonic,' though etymologically almost interchangeable, are not so in their technical sense. At the beginning of the present century, all Music, whether Vocal or Instrumental, in which the interest was not confined to a single Part, was called 'Polyodic.' The word 'Polyphonic' is of much more recent origin; and is applied exclusively to Vocal Music, without Accompaniment, written in Strict Counterpoint, in which the Melody is equally distributed between all the Parts. No less important is the technical distinction between the terms 'Monodic' and 'Homophonic'; the former being correctly applicable only to Vocal, or Instrumental Music, in which the Melody is confined to a single Part; and the latter, to Vocal Music, without Accompaniment, written in Strict Counterpoint of the First Order—Note against Note. A careful use of the terms Homophonia, Polyphonia, Monodia, and Polyodia, is a great desideratum in musical criticism.

critical ingenuity will ever satisfactorily bridge over.

Of Haydn we shall speak more particularly, when treating of the structural change by which he revolutionised Instrumental Music; though his Dramatic Works, written for Prince Esterhazy's Theatre, deserve more attention than has yet been devoted to them. To Mozart, the German Lyric Drama owes, not only its most precious possessions, but its splendid position at the head of the Schools of Europe. His genius, breaking down all distinctions of manner, whether popular or scholastic, acknowledged no law but that of Nature. By pure instinct he learned so to blend the brightness of Italian Melody with the sterner combinations suggested by German Thought, that it is impossible either to affiliate him to any recognised family of Composers, or to decide upon the nationality of his style. To say, as critics have said, that he was more Italian than German, is absurd: yet the converse would be no nearer the truth. As a dramatic writer he stands alone. He was not the mere creator of a School: he was the School itself—the source of its inspiration, its moving principle, its inmost soul. He did not even invent it, in the ordinary sense of the word. It came to him as a part of his nature—a wealth of genius, which, added to that bequeathed by Haydn and Beethoven, made the School of Vienna the richest in the world. If ever there was a case in which the glorious freedom of natural talent carried all before it, it was his. The dry formality, too often engendered by the cultivation of learning at the expense of feeling and expression, vanished, in his presence, like mist before a sunbeam. Learned he was, indeed, beyond the wisest of his contemporaries: yet he wrote, not from the head, but from the heart; and almost always produced his happiest effects by means before untried. Whether we study him in his instrumental or vocal phrases, in his Symphonies or his Masses, his Quartets or his Operas, we always find him pressing resolutely forward, on untrodden paths, in pursuit of some new ideal beauty which he alone had power to conceive. One good thing only did he condescend to borrow. For the outward form of his Instrumental Movements he was indebted to the ingenuity of another mind, as fertile as his own: a mind which exercised so vast an influence over the whole realm of Art, that it is impossible to exaggerate the importance, either of the principles it enuntiated, or the mission it accomplished.

And here it is that Haydn asserts his claim to notice, as one of the greatest musical reformers of any age.

Sebastian Bach died in 1750, when the Composer of 'The Creation' was just eighteen years and five months old—a chronological certainty to which, if it rested on internal evidence, we should refuse credence. With the 'Suites Françaises' of the one Master, and the 'Twelve Grand Symphonies' of the other, before us, we might well expect to find two such works separated by at least a century of thought and progress. Yet Bach was still alive, while Haydn, in his garret in the Kohlmarkt, was patiently working out, by his own unaided genius, that justly famous 'Sonata-form,' which holds, in Music, a place analogous to that of the Vertebrate Skeleton in the Animal Kingdom, serving, in one or other of its countless modifications, as the basis of every great Instrumental Composition that has been given to the world since it was first evolved from the 'Allemande,' the 'Courante,' and the 'Allegro' of the old 'Suite de Pièces.' We need not stay to analyse this ingenious device, which is fully described elsewhere.[1] Our present purpose extends no farther than the indication of its just position in the technical History of Music. No gift so precious has since been offered at the Shrine of Art. Its value has been acknowledged by the practice of every great Composer, from Mozart's day to our own: and it is noticeable that every Composer is seen at his greatest, when he most freely acknowledges his obligation to the 'Father of the Symphony.' This argues no want of originality among later Masters. For 'Papa Haydn's' invention is founded upon a great principle: and, until some still greater one shall be discovered, the Composer who ignores it runs the risk of producing an ill-planned Movement, the defects of which can no more be condoned by the perfection of its details, than the monstrosities of an ill-formed skeleton can be concealed by the softness of the fur which covers it. The 18th century may therefore be said to govern the Instrumental Schools of the present day, by means of this invaluable contrivance, not only in Germany, but throughout Europe.

XXVIII. The history of THE FRENCH SCHOOL OF THE 18TH CENTURY divides itself into two distinct periods, quite unconnected with each other.

Too jealous to endure the thought of a rival, the Italian, Lulli, worked for himself alone, and left neither disciple nor worthy successor. It is true that his fame long outlived him; but, meanwhile, Art was at a stand-still: and it was not until many years after his death that France herself produced a genius capable of advancing his work. The right man was found at last in Rameau, who was recognised as one of the most learned Theorists in Europe, long before he attempted to lay the foundation of a new School of Dramatic Composition, and was, therefore, the better fitted to carry out his task with dignity. Yet, notwithstanding his reputation, he found it difficult to obtain a hearing: and it was not until the production of his 'Hippolyte et Aricie,' in 1733, that his talent received its due reward. Then, indeed, his name became deservedly popular; and, in his 'Castor et Pollux,' 'Dardanus,' and many later Operas, he introduced improvements in form, expression, management of the Orchestra, and general dramatic effect, which Lulli had never anticipated, and which soon raised the French Opera to a level it had never before seemed likely to attain. The suddenness of his success was probably in a great measure due to the strongly-marked character of his well-arranged ideas. The 'Rigaudon'[2]

[1] See vol. i. p. 547 *et seq.*; also SONATA.

[2] Recently reprinted by Messrs. Cocks & Co.

in 'Dardanus' is as full of genuine fire as a Bourrée from the Suites of Seb. Bach. One can readily understand how such Movements as this must have taken the Parisians, accustomed to the dead-level of Lulli's poorest imitators, by storm. The misfortune was, that Rameau, like Lulli, found no one to succeed him; and it was not until ten years after his death that French Opera owed another regeneration to another foreigner.

The arrival of Gluck in Paris, in 1774, marks one of the most important epochs in the History of Music, and one of the most curious anomalies in that of national Schools. Born a German, with all a German's love for solid Harmony, Gluck studied in Italy, wrote Italian Operas, conceived the first idea of his great reform in England, tried in vain to introduce it in his own country, and finally, with the aid of a French Librettist, achieved his greatest triumph in French Opera, at Paris. The history of that triumph is too well known to need repetition.[1] But it is impossible to lay too much stress upon the fact, that, from circumstance, and not from choice, it was French Opera that Gluck reformed. Germany would have nothing to say to his improvements. France received them. And, notwithstanding the opposition of the Piccinists, it was the French School that reaped the first benefit of a movement which will probably leave its mark upon Art as long as the Opera shall last. What is this mark? It is necessary that we should be able to recognise, not only its outward form, but the spirit of which that form is the symbol: for, if rightly understood, it will furnish us with a key to more than one very difficult problem connected with our present position; whereas, if misinterpreted, it cannot fail to lead us into fatal error.

From the moment in which he first entertained the idea of remodelling the Lyric Drama, until that of his greatest triumph, Gluck had but one end in view—the presentment of pure dramatic truth. To secure this, he was willing to sacrifice symmetry of Form, continuity of Melody, regularity of Rhythm, flexibility of Voice, or any other means of effect which he felt to be unsuited to the situation with which he had to deal. But, under no circumstances whatever was he prepared to sacrifice euphony. Neither in his practice, nor in the detailed exposition of his theory which he has given to the world, does he ever hint at the possibility of this. Yet it has become a common thing to cite his authority in justification of enormities which would have made his hair stand on end. The best answer to this misconstruction will be found in the Operas he wrote after he had cast aside the trammels of conventional treatment, and learned to think for himself. In these great works, planned in full accordance with the principles laid down in his preface to 'Alceste,' he does indeed, over and over again, refrain from introducing a telling Melody into a Score unsuited to its character; but he takes care that the Music which supplies its place shall always be good and beautiful; and it is precisely because this condition is too often neglected, by some who profess themselves his most devoted admirers, that we feel bound to lay more than ordinary stress upon it here. In discussing the peculiarities of later Schools, we shall probably refer to the subject once more. Meanwhile, let it be clearly understood, that, whatever may be the opinion of more modern authorities, Gluck, at least, never believed ideal beauty to be incompatible with dramatic truth.

XXIX. The English School of the 18th Century also owes its chief glories to a foreigner, who, naturalised in this country, found his attempts to meet and lead the taste of an English audience rewarded by inspirations grander than any with which he had been previously visited.

Handel made his first public appearance in London on Feb. 24, 1711, fifteen years and three months after the sad day on which the brightest prospects of the School of the Restoration had been clouded by the death of Henry Purcell. During this period of respectable stagnation, no native Musician had ventured, either to strike out a new path, or to take up the work, on the old lines, where Purcell had left it. Yet it is certain that, notwithstanding this, the national taste had not deteriorated. Purcell had so far raised its standard, that, when Handel demanded a hearing, he found an intelligent and thoroughly appreciative audience only too glad to do him justice. He achieved his earliest successes at the Queen's Theatre, in the Haymarket. But we need not speak of these. Had we not already described his Operas[2] we should scarcely feel justified in classing them among the productions of an English School: for, though composed in England, for an English audience, performed at an English theatre, and printed exclusively (until within the last few years) by English music-sellers, they were written in the Italian language, to be sung by Italian Vocalists. But, side by side with these Italian pieces grew up a collection of English works, in a style which has never yet been fully appreciated, save in the land of its birth. A style more impressive than any that had been conceived, since the decadence of Polyphony; more colossal in its proportions than the grandest combinations of Leo, or Colonna, or the most elaborate productions of the German Polyodic period; and more true to Nature, in its endless varieties of expression, than any form of Dramatic Music previously cultivated. We first find this new phase of thought distinctly asserted in the 'Utrecht Te Deum and Jubilate,' composed in 1713—though traces of it are not wanting in the 'Birthday Ode,' produced a few months earlier. In the twelve 'Chandos Anthems,' written in 1718–20, for the Chapel at Cannons, it is present throughout; and, in 'Esther,' and 'Acis and Galatea,' com-

[1] See vol. i. pp. 601-603; ii. pp. 514-517.

[2] See vol. ii. p. 507.

posed for the Duke of Chandos in 1720 and 1721, we should feel inclined to say that it had reached its full perfection, but for the still greater degree of sublimity attained in 'Deborah,' in 1733. After this, Handel's genius never flagged. Though his works succeeded each other with astonishing rapidity, no weakness or haste was perceptible in any of them: and, in all his Oratorios, Odes, Anthems, and other choral works, with English words, this massive style was used as the basis of everything. It differed from the method of Seb. Bach, in many essential particulars; and may easily be distinguished from that of synchronous Masters by its stupendous breadth, and its scrupulous avoidance of harsh collisions. Its grandest effects are almost always produced when the means used seem the most simple: for Handel never wrote a multitude of notes when a few would answer his purpose. And hence it is that his Music bears, towards the greatest monuments of German Art, a relation not unlike that which Lord Prudhoe's Lions bear to those in Trafalgar Square—a single touch, in the one, producing the effect which, in the other, cost fifty. Yet the touches were never rough. No less conspicuous than their strength was their unbroken *Wohlklang*—their never-failing pleasantness of sound. Even throughout the part of Polyphemus—and, surely, we may look upon that as an extreme case—the actual progressions are as smooth as Art can make them; and produce their effect, without the aid of that strange power of drawing Harmony out of Discord which forms so prominent a feature in the method of Seb. Bach. It is to the joint effect of this perfect Harmony and gigantic scale, that the style owes the recognition it has so long commanded. It is certain that our great-great-grandfathers liked it; and it says much for the audiences of the 18th century, that they were able to take pleasure in the unadorned sublimity of many a grand conception, which can only be made endurable to the general public in the 19th, by the aid of a Regimental Band.[1] No School can possibly be formed, where there are no willing listeners: and, in this case, the genius of the Founder met its complement in the appreciative power of the audiences that gathered around him, at the King's Theatre, and Vauxhall, and the Chapel of the Foundling Hospital. But, as with Lulli in France, so it was with Handel in England. The School died out with the Master. Arne was in earnest, and did his best: yet, how could a man of ordinary stature carry on the work of a giant? Arnold and the Hayes family were pigmies, even compared with Arne. There was no one else to take the lead in Sacred Music: but the Opera was not altogether neglected. In the hands of Storace, Dibdin, Hook, and Shield—four talented Composers, whose fresh and graceful Melodies earned for them a vast popularity—it assumed a form quite different from that practised in any Continental School, yet by no means destitute of merits. Encumbered with a superfluity of spoken Dialogue, in which nearly the whole of the action was carried on, it contented itself with an artistic status far below that of the German 'Singspiel,' or the French 'Opéra Comique': but it yielded to neither in the spontaneity of its conception; and, if it fell beneath them in breadth of design, it was their equal in freshness of idea and geniality of treatment. Its Melodies were essentially English: so much so, that we still cherish many of them, as the happiest and most expressive Ballads we possess. But its one great fault was the almost total absence of dramatic power. Where this is wanting, the Lyric Drama can never achieve real greatness: and, that it was wanting here, must be evident to all who study the period. But for this, it is probable that the School we are describing might have led to something very much better. As it is, it has passed away for ever.

We have dwelt thus long upon the history of the 18th century, because it was as much the 'Golden Age' of Modern Music as the 16th was of Polyphony. It witnessed the early efforts of all the greatest of the Great Masters—the bluest blood of Art—with one exception only; and the culminating point in the career of all but two. Its records are those of the brightest triumphs of the later development. No new principles have been discovered since its close; no new types devised; and no new form of expression, save that of 'Romanticism,' conceived. The work of the 19th century has been the fuller illustration of truths set forth in the 18th. That work is still in progress; and we have now to consider its influence upon a few of the leading Schools of Europe.

XXX. One great name connects itself so closely with THE GERMAN SCHOOLS OF THE 19TH CENTURY, and exercises so lordly a dominion over them, that, like the Jupiter of the system, it makes us forget the size of inferior Planets, by the immensity of its own huge mass. Let us try to put away from us all thought of hero-worship, and, with all possible fairness to later authors, consider, not Beethoven's own merits, but his influence upon the School he founded. We shall be able to do this the more satisfactorily, if we go back one generation, and enquire what influence the preceding School had upon him.

Beginners, who find some difficulty in correcting Consecutive Fifths, and still more in detecting their presence, are never weary of parading Beethoven's 'contempt for rules,' in justification of their own ignorance of the first principles of Art. Yet we possess, even now, no less than 245 of his exercises, written, under Haydn's guidance,[2] on Fux's 'Gradus ad Parnassum,' besides 263, written on Albrechtsberger's 'Anweisung zur Composition,' under the super-

[1] When, during the latter half of the century, some few of Handel's works were produced at Vienna, it was with Mozart's 'Additional Accompaniments.' Still, it must not be forgotten that these Accompaniments were written under the pressure of a real necessity. There was no Organ in the Orchestra; and it was absolutely indispensable that the Harmonies should be supported by some Instrument possessing both greater volume of tone, and greater sustaining power, than the Pianoforte.

[2] Many of these Exercises are written in the old Ecclesiastical Modes, upon the study of which it is clear that Haydn insisted, no less strongly than Fux.

intendence of its author. It is plain, therefore, that he took care to study the rules, before he broke them: and, that his Counterpoint, at any rate, was not uninfluenced by his predecessors. In like manner, he is constantly glorified for his 'freedom from set forms.' Yet no one ever more thoroughly understood, or more deeply valued, the orthodox Sonata-form, than he. Here, again, he was neither ashamed to learn from his predecessors, nor to acknowledge the obligation. How, then, can a writer, who hands down no new principle, be said to have founded a new School? Our answer to this question involves no anomaly: for, the School of which we are now speaking differed from those which preceded it in its æsthetic character only. Beethoven was, emphatically, a Child of Genius—not a Votary of Science. His fathomless Imagination—the most prominent feature of his style—was the free gift of Nature. His power of conception cost him nothing. But, for the Art which enabled him to set forth his ideas with such perfect logical accuracy that no intelligent mind can fail to understand them, he found it necessary to work—and that with the most indefatigable industry. And, in acquiring that Art, he discovered what no one else had before suspected—that the Sonata-form was not only the most symmetrical, but also the most elastic in existence. These considerations enable us to sum up the results of our enquiry in a very few words. In his mechanism, Beethoven was influenced by the Schools of the 18th century. In his imaginative power, he stood alone. In the elasticity he imparted to the Forms of his predecessors, he laid the foundation of a Style before unknown. And the influence of that Style not only separated the later School of Vienna from every system that had preceded it, but extended rapidly to every other centre of production in Europe, and before many years had passed, exercised an authority which may fairly be described as universal.

XXXI. The Romantic School followed the profoundly Imaginative Style of which we have been speaking, so closely, that it may almost be said to form part of it. We have, indeed, mentioned Weber as the undoubted Founder of Romantic Opera. But, Romanticism exhibits itself in Instrumental, as well as in Dramatic Music: and, without the elasticity of Form suggested by Beethoven, its manifestation, in the Sonata, the Symphony, or even the Overture, would have been impossible.[1]

Let us clearly understand the distinction between Romantic Music, properly so called, and Music that is purely Imaginative. In poetical expression, in depth of feeling, in direct appeal to the varied emotions which excite the human soul to highest exaltation or profoundest depression, the two styles possess so many attributes in common, that the superficial observer is in constant danger of mistaking the one for the other: but no careful critic can be thus easily misled, for, even when both styles are present—as they very frequently are—in the same work, they are separated by a line of demarcation as clearly recognisable as that which distinguishes the Major from the Minor Mode. The actual thought may be as wild, as visionary, as mysterious, as far removed from the surroundings of ordinary life, in the one case, as in the other. The Imaginative Composer's idea is frequently even more 'romantic'—using the word in its every-day sense—than that of his brother Artist. But, it is not treated in the same way. The Romantic Composer paints his picture with the richest colours his orchestral palette can command; horrifies us with the depth of his sombre shadows; enthrals our senses with his most delicious fancies; excites us to delirium with a crash of Trumpets; or drives us to despair with the roll of a muffled Drum. If he be a true Master, he depicts the Scene before him with such exceeding clearness that it becomes a visible reality to the dullest of his hearers; a living truth presented to the eye, through the medium of the ear. But, he neither expects nor desires that his audience shall see the picture in any other light than that in which he presents it: and, in point of fact, his influence over others will generally be found to bear a direct relation to the clearness of his power of definition. The Imaginative Composer, on the other hand, defines nothing. The Scene he would depict has no real existence. Its details, drawn entirely from the region of his own individual Fancy, can be comprehended only by those who are able to follow him into that region. Unable to communicate the thought which underlies them, in words, he expresses it in Music; enduing sound with all the passionate yearnings denied to human language; conveying his hearers into a world filled with utterances of a meaning too subtle to be clothed in speech; and thus for ever dwelling in depths of Poetry accessible only to those who can think, and feel, while the vulgar are content to stare. There is nothing antagonistic between these two great phases of modern musical thought. They both have the same high aim; and they both deal with the same lofty subjects. But, the treatment of the one is objective; and that of the other, subjective. The one busies itself with the Seen; the other, with the Unseen. Yet, strange to say, the greatest Masters have been Masters of both. We need only cite two Symphonies of Beethoven, in illustration of our meaning. The man who, listening to the 'Sinfonia Pastorale,' cannot see the beautiful landscape, sit down beside the brook, dance with the peasants, get drenched through and through with the storm, and give thanks to God when the rainbow first gleams in the sky, must be dead alike to every sense of Poetry and of Art. How different is the Symphony in A! We cannot tell—no human tongue can tell, in words—the meaning of the wonderful Allegretto. No language can express the depth of thought enshrined in that awful episode in the delicious Scherzo, universally recognised as the highest manifestation of the Sublime as yet afforded by

[1] See vol. ii. pp. 520-522; vol. iii. pp. 148-152.

the Art-life of the 19th century. But, we can *understand* it. It speaks to us in accents far stronger than words. And, in listening to it, we are brought into closer communion with the Composer's inmost soul than we could have gained through any amount of personal intercourse with him during his life-time.

We have thought it necessary to call attention to these æsthetic subtleties, with more than ordinary earnestness, because, without a full appreciation of their import, it would be absolutely impossible to attain a clear understanding of our present position with regard to the great Masters who originated the dual train of thought we have endeavoured to describe—the teachers who first directed their inventive powers into two well-defined channels, which, running side by side, and sometimes even intermingling, have never lost one particle of the individuality bestowed on them when they first parted at the fountain head.

Upon these two Schools—the Imaginative and the Romantic—the German Music of the present century almost entirely depends for its distinctive character. Schubert identified himself with both; and was enabled, by the freshness and spontaneity of his ideas, and the inexhaustible extent of his inventive power, to use the strongest points of both so profitably, that it is impossible to determine the side towards which his natural bias most forcibly attracted him. Perhaps we shall not be far wrong, if we say that, as a general rule, his Vocal Music is most freely pervaded by the spirit of Romanticism, while that of Imagination is more clearly discernible in his Instrumental Compositions. Without instancing such works as 'Die junge Nonne,' or 'Der Erl-König,' the very first bar of which transports us into the Region of Romance before we have heard the first word of the Poetry, we need only point, in confirmation of this view, to some of the least pretentious of his shorter Songs —those gorgeous 'trifles,' which, like the sketches of Raffaelle, contain, sometimes, more Art than many a more elaborate work. 'Ueber allen Gipfeln ist Ruh' is as true a Romance as Schiller's 'Fridolin': while the 'Impromptus,' and 'Momens Musicals,' so often played, and so rarely interpreted, contain passages as deeply imaginative as those in the Ottet, or the Symphony in C major. We quote these well-known examples, in the hope of tempting our readers to seek out others for themselves: and they will find no difficulty in doing so; for it is impossible to take up a volume of Schubert's Compositions, without finding, on every page, evidence to prove that he was equally ready, at any moment, to pursue the course of either stream, or to exchange it for its fellow channel.

Every really great German Master—Weber, Spohr, Marschner, Schumann, Mendelssohn, Brahms, Raff, Goetz, Wagner,—has more or less strictly carried out the same principle to its legitimate conclusion, and used either the ideal freedom of Imagination, or that of Romanticism, as a stepping-stone to his own individual greatness.

Weber's strongest sympathies were with the Romantic School. As a rule, his Instrumental Music—excepting, of course, the Overtures to his matchless dramatic inspirations—is brilliant, rather than imaginative; presenting, at every turn, some sparkling passage suggestive, of all that is light, and bright, and beautiful, in Nature, and thus continually hovering around the borders of Romanticism, though rarely descending towards those sombre depths in which Beethoven so frequently delighted to dwell. But, in his dramatic works, no sooner does some weird idea present itself to his mind, than he yields himself to its influence, body and soul, and paints it in such wild fantastic colours, that his audience cannot choose but dream, or shrink, or shudder, at his will.

Spohr's genius led him into quite another path. Like Schubert, he was equally ready to clothe his ideas in the language either of Imagination or Romanticism, or even of both together. A deeper Philosopher than Weber, he exercised, in a certain sense, a stronger power over the minds of his hearers: but, he could not terrify them, as Weber could; simply because he was, himself, too deep a Philosopher to feel terrified, even when dealing with the Supernatural in its ghastliest and most unholy manifestations. In one respect, however, the two were entirely of the same mind. They both knew the value of Form too well to neglect it, either in their greater works, or in those of comparatively small pretension; and, for this reason, their writings are invaluable, as examples of the unlimited freedom of thought which may be made compatible with the most perfect structural symmetry.

Heinrich Marschner, though neither so inspired a poet as Weber, nor so deep a philosopher as Spohr, did good service, in his generation, to the cause of Romantic Opera. His two greatest works, 'Der Vampyr,' and 'Der Templer und die Jüdin,' though fast losing their popularity, even in the land of their birth, might be studied, with advantage, by some who are not likely to equal, either their richness of imagery or their musician-like structure. There are passages, in the former Opera, grim enough to make the hearer shudder; while the latter breathes the pure spirit of Chivalry in every Scene. The passage which describes the midnight carousal of The Black Knight and Friar Tuck, is a stroke of genius not lightly to be consigned to oblivion.

If Schumann cared less for accepted forms than Weber or Spohr, it was only because his rich vein of original thought enabled him to strike out new modifications of a general design, compacted together with no less care than that adopted by his predecessors, though arranged on lines peculiarly his own. It would seem, sometimes, as if the richness—one might almost say the redundancy—of his inventive power tempted him to overleap the bounds within which the most gifted of his associates was perfectly contented to dwell. But he neither underrated the value of self-restraint, nor refrained from turning it to account, in some of his best and most

important works. And hence it is, that, with all his freedom of expression, his contempt for conventionality, and his inexhaustible fancy, he is one of the last to be cited as an authority by those who recognise no law beyond their own caprice.

It would be difficult to imagine two lines of thought more divergent than those pursued by Schumann and Mendelssohn. The difference may be partly explained by the different circumstances under which the two Masters were trained. The course of Schumann's education was so changeful, so irregular, that nothing short of unconquerable determination would have enabled him to profit by it at all. Mendelssohn, on the contrary, enjoyed every advantage that care and counsel could place at his disposal. From his earliest youth he was made to understand that natural gifts, untrained by study, would sooner or later develope themselves into dangerous snares. And he understood this so well, that, even in his earliest works, we find an obedience to law, as strict as that which distinguished him in his prime. To his well-ordered mind, this subjection to fixed principles conveyed no idea in the least degree inconsistent with perfect moral freedom. The right to think for himself had never been denied to him; nor could he, under any circumstances, have forborne to exercise it. But he was equally ready, even in his full maturity, to study the thoughts of others, and to learn from them all that it is given to man to learn from his fellow. And so it was, that, while maintaining, throughout, his own strong masterful individuality, he drew, from the accumulated experience of his predecessors, a store of knowledge well fitted to serve as a bulwark against the self-sufficiency which too often ruins a youthful genius, before his talents have had time to produce the effect that might fairly have been expected from them. From Haydn he learned that perfection of Form which, from his first work to his last, clothed the sequence of his ideas with logical consistency. From Mozart and Beethoven he learned a system of Instrumentation which, like a wheel within a wheel, enabled him to work out another system, entirely his own. From Seb. Bach he learned that admirable method of Part-writing which raised his Compositions far above the level attained by the best Masters of the period, and entitled him to rank beside men whose position had long been regarded as impregnable. Dowered with this store of technical resources, his natural genius carried everything before it, and, while yet a youth, he was unanimously accepted as the leader of the German Schools. Reading his history with the experience of half a century to guide us, we can now understand the true bearings of many things which could not possibly have been foreseen during the eventful years of his early residence at Berlin. Times have changed very much since then. The freedom from restraint which we are now taught to reverence, would have been condemned as midsummer madness, in 1830. Mendelssohn was no pedant; but, he never encouraged the slightest approach to this licentious anomaly. Bad Part-writing he could not endure; and, by way of safeguard against so miserable an error he has not only shown us that Bach's grand style of Part-writing is perfectly compatible with Haydn's clear principle of symmetrical design; but has so entwined the two, that they have enabled him to form a style, which, drawing its strength from both, presents an aspect so free from borrowed charms that we are compelled to accept it as an original creation. Not a whit less dangerous is the doctrine that clearness of design is by no means indispensable, provided its absence be duly compensated by the expression of some mystic sentiment, which, if necessary, may be explained, in so many words, at the beginning of a work, with a perspicacity worthy of the limner who wrote beneath his picture, 'This is a house.' Against this heresy Mendelssohn waged implacable war; and he has left us, in his four Concert Overtures, an antidote sufficiently strong to neutralise its poison to the end of time. We need only point to one of them. The Overture to 'A Midsummer Night's Dream' contains, in its first ten bars, more Poetry, more Imagination, more Romance, more Fancy, than a hundred thousand pages of the jargon which is forced upon us under the garb of modern æstheticism; though its design is as symmetrical as that of the Overture to 'Figaro,' and as clear as that of 'La Reine de France.' Yet nowhere is the Form permitted to obscure, or be obscured by, the primary intention of the Composition; which aims at nothing lower than the perfect illustration of Shakespeare's meaning. If, then, Mendelssohn could make shapeliness of contour, and purity of Harmony, smoothness of Part-writing, and clearness of Instrumentation, subserve the purposes of an aim so lofty as this, there must surely be something wrong in the theory which represents these qualities as intrinsically opposed to all advance beyond the rudest forms of pedantry —the 'rule-and-compass work' suggestive of a return to the period when Art was in its infancy, and its union with Poetry impossible.

Had Mendelssohn lived long enough to endow THE SCHOOL OF LEIPZIG with a patrimony as rich as that possessed by its Viennese progenitor, his earnest work must necessarily have exerted a purifying influence upon every centre of Art in Europe. Even now, we cannot say that it has wholly failed to do so; for there are men still living, who have made his principles their own, and—allowing fair scope for individuality—are conscientiously striving to work them out, whether the outer world cares to accept them or not. First among these stands Gade, who, though by birth, education, and national sympathies, a Dane, spent so interesting a portion of his life in Leipzig, and worked so earnestly there, in conjunction with Mendelssohn, that it is impossible to overlook his relationship to the Classical German School. This relationship, however, extends no farther than technical construction. In their inner life, his Compositions are too intensely Scandinavian to assimilate with those of any German author, antient or modern. His Overture,

'Nachklänge aus Ossian' is a Runic Poem, worthy of recitation in the Walhalla. Its bold fierce Subject breathes the spirit of the Northern Myth so clearly, that we may safely accept it—in common with the lovely Melodies of 'Comala,' which form its natural complement—as an inspiration from the land of the Aurora borealis and the Midnight Sun. But, in the matter of outward form, he has thought it no treason to enter into an openly-confessed alliance with his German neighbours. Strikingly original in his system of Instrumentation, he has never suffered it to lead him into extravagance or confusion; nor has he ever used his glowing vein of Poetry as an excuse for negligent arrangement of his harmonic combinations, or for rudeness of design. In all that concerns the *technique* of his delightful productions, he has been loyal, from first to last, to the principles he adopted on his first entrance into the artistic world; and there is good hope that his work will outlive the caprice of fashion which has brought these principles, for the moment, into something very nearly allied to contempt.

It was of immense advantage to the cause of Art, that Mendelssohn's interpretation of its classical form and spirit should be perpetuated by men like Gade, and Hauptmann, and Hiller, and Sterndale Bennett; that his memory should be reverenced by Schumann, and the proselytes of a newer faith; and, that his works should be held, both in Germany and England, in higher reputation than those of any other writer of the age. But they were not destined to escape hostile criticism. Before the production of 'Elijah,' more than one promising young Composer had ventured to claim the right of thinking for himself. One of the most talented of these was Johannes Brahms; from whom great things were expected, even before his views were sufficiently matured to enable him to stand forth as the originator of a special line of thought. Though attached to the Conservative Party by many noble sympathies, his conceptions were too original, and his individuality too strong, to admit of his working on any other lines than those laid down by himself. It soon became evident that his affections were entirely with the Imaginative School; and his attachment to it has remained undiminished. Like all earnest sympathisers with its aim and spirit, he has used elasticity of Form freely; but always with a healthy recognition of the boundary line which distinguishes elasticity from distortion. His First Symphony, in C minor (op. 68)—a work produced after his genius had attained its full maturity—is a case in point. Departing, in no essential particular, from the accepted model, it presents so many traits of original thought, so many welcome novelties, both of idea and construction, that, while recognising it as a legitimate descendant of the Schools of Leipzig and Vienna, we cannot but feel that it leads us into regions hitherto unexplored. The fertility of invention which forms one of its most prominent characteristics could scarcely have failed to tempt a Composer of ordinary calibre into hopeless departure from a consistent line of argument; but it did not so tempt Brahms. With all its wealth of imagery, the work proclaims its *raison d'être* in the first seven bars of its introductory 'Un poco sostenuto'; and, from the thesis there proposed, it never diverges. The text is illustrated, at every turn, by some unexpected comment, often extremely beautiful, and always pertinent and welcome; but it works out its appointed meaning, without interruption, from beginning to end; and by no means in unorthodox fashion. The First Part of the Allegro is duly repeated; the customary return to the primary Subject is made in the accustomed manner; and the Movement fulfils all the needful conditions of Classical Form, while the Composer gives free scope to his Imagination, throughout. The 'Andante sostenuto,' in the unexpected Key of E Major, fulfils the same conditions to the letter. The 'Un poco Allegretto e grazioso,' in A♭, takes the place, and satisfactorily performs the office, of the Scherzo. And the work concludes with a noble Finale, in C major, which forms a fitting climax to the whole. But here, again, the author introduces an unexpected feature. The Finale is so constructed, that it would scarcely have made the logical sequence of the intended climax apparent, had it fallen into its place in the usual way. Therefore the Composer has prepared it by an introductory 'Adagio,' perhaps the most interesting member of the entire work. As the whole essence of the First Allegro was compressed into the opening bars of its Preface, so is the whole essence of the Finale compressed into this beautiful Adagio, which thus forms the support of the entire work, the clue to its consistent interpretation, and the most important link in the chain of continuity which binds its elements together so closely, that, to understand it at all, we must understand it as the natural development of a single thought. In the Second Symphony, in D (op. 73), we find the same regularity of design, the same fixity of purpose, the same exuberance of subsidiary ideas, and the same depth of Imagination. The same broad characteristics are exhibited, in a marked degree, in the 'Tragic Overture' (op. 81), in combination with a direct and irresistible appeal to feelings, which, though subjectively treated in the Score, may be very easily invested with an objective sense by the hearer, who has only to connect the Music with some deeply tragic history of his own invention, in order to transfer it from the Imaginative to the Romantic School—a curious illustration of the line which parts the School to which Brahms has attached himself from that adopted by some other German writers of whom we shall speak presently.

The beauty of all these Compositions is greatly enhanced by the character of their Instrumentation. A Score by Brahms presents, at the first glance, an appearance not unlike that of a Vocal Composition for several distinct Choirs. The masses of Stringed and Wind Instruments are so often treated antiphonally, that the contrasts presented by their differences of tone serve as a valuable means of imparting clearness to passages

which, without such aid, would lose force through their too great complexity. While the balance between these subdivisions of the Orchestra is always maintained, the Stringed foundation is so solidified as to afford, at all times, a sufficient support to the entire mass of Harmony; and the whole is thus invested with a dignity too real to be injured by the constant variety of effect, which, if less artistically managed, would degenerate into restlessness. In the intermediate 'Adagio' of the First Symphony, the Violins are employed *con sordini*, and the Tenors, *divisi*, with a delicacy of effect which has sometimes led to a comparison of the Movement with similar passages by Wagner. But, in truth, the arrangement has long been received as common property; and it is only by marked novelty of treatment that it can be justly claimed as a private possession.

We have already described Brahms's most important Choral Composition—the 'Deutsches Requiem'—at some considerable length.[1] Many more of his Vocal works are well worth separate examination; but it must be confessed that his real greatness shines forth most clearly in his Instrumental Music. His choral passages—often furiously difficult, and sometimes all but impossible—are, as a general rule, constructed with so little consideration for the Singer, that, even when their crudities are successfully overcome, they fail to produce an effect worth the labour of mastering them. This misfortune is the more to be regretted, because, in some of these very works, the Orchestral Accompaniments embody his best conceptions. There are but few passages in the 'Schicksalslied'—for example—which would fail to produce a very striking effect, though the Vocal Parts were eliminated from the Score. But surely it cannot be right, that, when Voices are employed, they should be treated with less consideration than the Instruments which accompany them. This evil, however, is too general to admit of discussion here; and is, unhappily, gaining ground everywhere.

While Brahms, as yet unknown beyond the limits of a small circle of admirers, was steadily working out the theories upon which his adopted style was based, Joachim Raff's strong sympathy with the Romantic School led him into a very different path, and necessarily tempted him to demand a considerable amount of freedom from scholastic restraint. But, he has never allied himself with the advocates of lawlessness. Nor has he claimed exemption from established formulæ, except when compelled to follow out a self-imposed rule of conduct by the character of the subject he designed to treat. His Fourth Symphony, in G minor (op. 167), is a miracle of regularity—making due allowance for the age in which it was produced. Save only that the First Part of the Allegro is not repeated, it might serve as a model of the orthodox mode of treatment. If its Subjects are not strikingly original, they are surrounded by so much new and varied Instrumentation, and so much careful and ingenious Part-writing, that they are constantly presented in an original aspect. The Andante flows on, in an uninterrupted stream of Melody, from beginning to end; and the strongest points of the Allegro are reflected, with increased interest, in the spirited Finale. This particular work, however, cannot be accepted as the true reflex of the Composer's favourite style. He is never so happy as when, with some weird Legend in his mind, he throws his whole soul into the task of depicting its shadowy incidents. And the tints in which he presents them are rich indeed; for his power of tone-painting is unbounded, and his command of orchestral colouring unlimited.

In the 'Lenore Symphony' (op. 177), we see all these qualities exhibited to perfection. The wayward character of Bürger's heroine is painted to the life. The first two Movements present the varying phases of her feverish love, in moods, all more or less earnest, yet always savouring rather of the passionate caprice of a self-willed child than the modest affection of a well-trained maiden. Then comes the parting. The soldier-lover is summoned to the war. In the midst of the March which describes his departure, the unhappy girl bemoans her misery before all the world, while the young hero vainly strives to comfort her, in accents as gentle and sensuous as her own. It is the same wild passion over again. We knew, all along, that she would lose all self-control when the moment of trial came.

But this is only the preamble to the story. The Finale takes it up, at the moment in which Bürger's Ballad begins. The lurid sunrise brings no comfort to the wretched dreamer. We hear her sighs, interrupted by the approach of the Spectre Bridegroom, whose identity with the Lover of the previous Scene is proclaimed by a shadowy allusion to the March. Then follows the invitation to the wedding feast. The Phantom Charger paws the ground, impatient to be gone. The Lovers mount; and he carries them off, in an infernal gallop which introduces us to the finest part of the Symphony. The ghastly ride is described by the Violoncellos, in persistent groups of a Quaver and two Semiquavers, which never cease until the catastrophe of the story is at hand. This passage forms the life of the picture, throughout. Constant in its rhythmic ictus, though not confined to any fixed series of notes, it represents the entire course of the fearful journey; thus intensifying in the Music, the idea of headlong speed, which, in the Poem, is so powerfully enforced by the reiteration of its most famous Stanza. When the excitement of the situation increases, the Violoncellos are strengthened by the Violas. When a climax is reached, the Figure is taken up by the entire Stringed Band. When the expression of some particular incident demands its retirement, it fades into *pianissimo*. Meanwhile, the scenery of the eldritch phantasmagoria is pictured by the Wind Instruments. The shrieks of the nightbirds, by long shrill trills upon the Wood Wind. The ghostly Funeral, by a Hymn for the Dead, first sadly moaned by the Trombones,

[1] See vol. iii. p. 112.

and then repeated with the united strength of the full Orchestra, while the dæmoniac gallop rushes on, through it all. The fetter-dance of the gibbetted malefactors is represented by a transient change to Triple Time, the rhythm of the gallop remaining undisturbed. At times, when these unholy sounds are hushed, the terrified, yet still unsubdued Lenore murmurs soft reminiscences of the love-passages in the earlier Movements; and, sometimes, she and her grisly Bridegroom discourse in little passages of well-constructed Canon. At last, when dawn begins to break, the gallop ceases; the Fiery Steed melts into vapour; and an awful moment of silence ensues. The lonely Churchyard is reached. Again, we have another and a far more solemn Funeral Hymn, this time sung for Lenore herself. The soft etherial motion of the accompanying Violins gives it a celestial meaning, impossible to be mistaken. And, as in the closing lines of the Poem itself, we are told that the sinner is forgiven.

The same power is proclaimed in Raff's Third Symphony, 'Im Walde' (op. 153). The First Movement depicts the Woods in their noontide beauty. The Second, their appearance in the Twilight. The Third, a Dance of Dryads. The Finale, the deepening shades of Night. These shades, however, are haunted by a horror as gruesome as that in 'Lenore.' The stillness of the Forest is represented by a quiet Fugal Subject, treated with exceeding ingenuity and skill, and suggestive of repose, unbroken by the rustling of a leaf. Suddenly, the weird notes of a hellish tumult are faintly heard in the distance. The Wild Huntsman, with his spectral Host, is approaching. He draws nearer and nearer, until the whole air is filled with the yells of his unearthly followers. We hear them above our heads, behind, around, and everywhere, until the hideous throng has passed, and its howls have died away in the distance. The silence of night descends once more upon the Forest, but again, in strict accordance with the Legend, the Fiendish Rout returns, draws nearer, as before, and vanishes in the opposite direction: after which, the Symphony concludes with a burst of Sunrise. And here, whether consciously or unconsciously we cannot tell, but with equal merit in either case, Raff has established a great Romantic truth. The Wild Huntsman first became identified with modern Art, in 'Der Freischütz.' At the casting of the Fifth Bullet, he is represented, on the Stage, with the best effect permitted by circumstances, and, in the Orchestra, with such consummate power of Instrumental imagery, that we need not look towards the Stage, in order to realise his presence. Now, Raff's Music bears no external resemblance whatever to Weber's; yet, it brings us face to face with *the same Wild Huntsman*. We recognise him at a glance; and that, in the absence of the slightest taint of plagiarism. Had Titian, and Giorgione, been commissioned to paint the portrait of the same Doge, they would each have enabled us to recognise the individual, though their pictures would have been altogether different. So it is in this case. And we cannot but think, that, though Weber's conceptions stand unrivalled, Raff also has shown himself a consummate Master.

Brahms and Raff may be accepted as the greatest living representatives of the Imaginative and Romantic Schools, respectively. But they do not stand alone. Another young Composer has been called away, too soon, alas! for Art; though not before he had attained a solid reputation. Goetz first attracted public attention by the production of a clever Comic Opera, 'The Taming of the Shrew,' performed at Mannheim in 1874, under the title of 'Der Widerspänstigen Zähmung,' a work planned neither upon the old lines nor the new. It differs from the traditional form of Comic Opera in being written for full Orchestra, throughout, without either *Recitativo secco*, or spoken dialogue; in passing continuously from Scene to Scene, with no break whatever, until the fall of the Curtain at the end of an Act; in dispensing, for the most part, with symmetrical Movements of the older forms; and, in substituting for them long passages of Accompanied Recitative. On the other hand, it departs from the principles laid down by the latest leaders of fashion, in that it relieves the monotony of its declamatory passages by frequent long strains of tuneful Measured Music, consisting, not of mere snatches of Melody, but of continuous and well-constructed phrases, so consistently put together, as to invest the whole chain of Movements with a character not unlike that of an unnaturally developed Finale. Moreover, it is something to be able to say that the vocal passages are always really vocal, and framed with real care for the Voice. That we miss, even in the most broadly comic Scenes the racy *abandon* of the Italian Opera Buffa—the refined sense of humour which would have made such a subject, in the hands of Cimarosa, or Rossini, simply irresistible—is to be attributed rather to the effect of national than individual temperament. In fact, there are reasons for believing, that, had the Composer's life been prolonged, he would have distinguished himself more highly in Serious than in Comic Opera. His greater Instrumental Works are pervaded by a tone of earnest thought which promise much for the future. His Symphony in F (op. 9), is full of feeling, clear in design, and abounding in passages of rich and varied Instrumentation. In some respects, his Pianoforte Concerto in B♭ (op. 18), is still finer; and, though less homogeneous in structure, even more full of interest, in its treatment, both of the Solo Instrument and the Orchestra. Still we cannot believe that any of these works, or even the unfinished Opera 'Francesca di Rimini,' indicate, either the full extent of the young Composer's ideal, or the point he was capable of reaching; though they prove how much we have lost by his early death.

Anton Rubinstein, first known to the world as a Pianist of altogether exceptional power, and afterwards as a writer of Pianoforte Music of more than ordinary interest, now claims our

attention as the Composer of a long succession of works, designed on a scale much grander than that foreshadowed in his earlier efforts, and worthy of much more serious study—as furnishing clearer indications of the principles by which he is guided. Unmoved by the revolutionary tendencies of an age which has identified itself with swift progress and violent reform, Rubinstein has consistently abstained from fraternising with any prominent party: not, like a dry pedant, blindly following in the wake of greater men than himself; but, as an original thinker, honestly convinced, that, within certain limits, classical forms are the best forms, and expressing this conviction, in his works, with a boldness which has secured him the respect of many advanced 'reformers' who are very far from agreeing either with his practice or his principles. These latter may be briefly described as the unconscious result of a determination to reject, as heterodox, no means of developing the capabilities of an original idea, provided only that neither the idea nor the mode of treatment refuse to submit to some sort of orderly arrangement. The effects of this determination are as patent in Rubinstein's Chamber Music, as in his Concertos or his Symphonies. All are essentially modern in style, and, it must be confessed, marred not unfrequently by a violence of expression savouring rather of impulse than of careful thought. Yet the design, even of his 'Ocean Symphony'—probably the finest, and certainly the most imaginative of all—betrays a familiarity with classical models which the descriptive character of the piece may disguise, but certainly does not neutralise. Though his latest Opera, 'Demonio,' is so strikingly original, that it has been described as belonging to no School whatever, its strong dramatic character, tinged with a curiously Tartar colouring, in illustration of the story, does not prevent him from using many familiar forms, consecrated, by long tradition, to the Lyric Stage, and thus making the Music valuable, for its own sake, apart from its primary office of assisting the Action of the piece. It is impossible but that the well-planned conduct of such Music should tend to its longevity; though, at present, public opinion runs strongly in the opposite direction.

We speak of Rubinstein in our notice of the German School, because, notwithstanding his nationality, his sympathies are evidently with the greatest German Masters. For the same reason we speak of Anton [1]Dvořák—another strong advocate for the retention of the principles by which the great family of Classical Composers has so long been guided. The numerous instrumental works of this talented Bohemian prove him to be one of the greatest Masters of modern Part-writing now living; and are remarkable for a continuity of treatment, inexpressibly refreshing in these days of spasmodic phrasing and broken Melody, suggestive rather of the unfinished sentences of a faltering orator than of a well-studied work of Art. The most marked characteristic of Dvořák's style is singularly antagonistic to that of Brahms. We have said that Brahms delights in illustrating his Subject with a copious embroidery of lateral *motivi*. Dvořák, on the contrary, makes his Subject illustrate itself, to the almost total exclusion of all ideas not directly traceable to its outward configuration. In both cases, the device is legitimate, and valuable; and, in both, it clearly emanates from a source inseparable from the Composer's natural temperament.

Did space permit, we would gladly speak, in detail, of Hiller, the friend of Mendelssohn and Chopin; of Kiel, whose 'Second Requiem' has lately produced so marked an effect in Berlin; of Brüll, Goldmark and Scharwenka; of Reinecke, R. Franz, Julius Röntgen, and many another worshipper at the Shrine of Art. But it is time that we should turn to a class of Composers whose works have attracted more attention than those of any other writers of the present day.

Chopin's close sympathy with the Imaginative School is evident at a glance; yet it is with its inner life alone that he claims relationship. Not only does he utterly repudiate its external mechanism, its harmonic combinations, its methods of development, one and all; but, he does not even accord with it in his manner of expressing a simple idea. The more closely we study his works, the more plainly shall we see, that, with him, the idea and its treatment invariably owed their origin to the inspiration of a single thought. Both suggested themselves at the same moment; and therefore remained for ever indivisible. To this, his writings are indebted for a personality which sets imitation at defiance. He stands alone. But, the inspirations of his loneliness are open to all who are capable of sympathising with the Poetry of Art; and, for these, the charm of his Music will never pass away.

A certain analogy is traceable between the genius of Chopin and that of Liszt. A strong feeling of personality pervades the Music of both. But Chopin's personality has never changed. We see the same man, in his first work and his last; whereas Liszt's Ideal has changed a hundred times. Much of his Music is, in the highest degree, both Romantic, and Imaginative, at the same moment. In technical matters, he submits to no law whatever. The Compositions which seem most faithfully to represent the man himself are absolutely amorphous. Yet one rarely finds, even in them, the spontaneity so obvious in all the works of Chopin. The idea seems to have been worked out—though in some way unknown to the laws of Art. With all this, Liszt stands as much alone as Chopin. He has had, and still has, disciples; but his ideas, and his method of treating them, are too much a part of himself to admit the possibility of his founding a School.

We have already spoken freely of the theories, and productions, of Richard Wagner, in another place.[2] No one who has thought upon the subject at all will attempt to controvert Wagner's main proposition, that Dramatic Truth is the first

[1] Pronounced Dvorshak. [See Appendix, DVOŘÁK.]

[2] See vol. ii. pp. 526-529.

necessity of Dramatic Music; and, that all minor considerations must be sacrificed to it. For this principle Peri fought the Madrigalists, whose true place was clearly not on the Stage. Through his hearty recognition of this, Monteverde became the most popular Composer in Italy. For the sake of re-habilitating this, Gluck forsook his own people, and taught the Parisians what an Opera ought to be. Truly, the considerations these great men were ready to sacrifice were no mean ones. The Italians immolated Polyphony; while Gluck risked the reputation of a life-time, by spurning the popular demand for an Opera, in the guise of a Concert of detached and inconsequent Songs. But, even Gluck was not prepared to sacrifice everything. We have already shown that he was not prepared to sacrifice Euphony.[1] Nor was he willing to dispense with definite form—except when definite form was manifestly out of place. The dullest hearer must have felt that it was lamentably out of place, when, as in the Operas of Hasse, the Action of the Drama was brought to a dead-lock, in order that its hero might amuse his audience with a brilliant Rondo. But, we cannot feel much respect for critics who tell us that the Action of 'Le Nozze di Figaro' is stopped by 'Non più andrai,' or that of 'Il Don Giovanni,' by 'La ci darem.' It is precisely because such pieces as these *carry on* the Action of the Drama so delightfully, that they produce so much more effect on the Stage than in the Concert-Room: and, in the case of 'Non più andrai,' the Rondo form adds immensely to the dramatic interest of the Song. Why, then, eliminate the Rondo form, after Mozart has shown how much can be done with it? Why not rather try to write Rondos as good, as beautiful, and as dramatic, as his? We know one man who could write a Rondo worthy to live for ever, if only he chose to throw his heart into the task; and, unless the experience of all history lies to us, that man will be lovingly remembered, by Senta's Ballad, 'Traft ihr das Schiff,' ages after his Operas have ceased to be performed in their entirety. If evil combinations, and unconnected arguments, and a weary waste of interminable Recitative, be really necessary to the existence of Dramatic Music—so necessary, that genius capable of delighting us with pleasant Harmony, and structural symmetry, and Melodies of acknowledged beauty, must needs deny us these luxuries, in order that the Lyric Drama may rest upon a philosophical basis—there are not a few among us quite ready to vote for the retention of the luxuries, even at the cost of leaving the Lyric Drama in the condition to which Mozart and Weber reduced it. Granted that the combinations are not always evil, the argument not always unconnected, the Recitative not always dreary, nor always unrelieved by tuneful episodes and delicious Instrumentation; still, there must be something radically wrong in a system which admits the introduction of deformity, under any circumstances whatever. Now, deformity—the natural antithesis of shapeliness—can and often does, co-exist with perfect beauty of constituent parts. Whether these parts be, in themselves, ugly, or beautiful, if they be not fitly joined together, they unite to form a monster. It is only when artistically arranged, that euphonious words are transformed into Poetry, or radiant colours into Painting. We have been told, of late years, that this law does not apply to Music, which must not be clothed in the frigid formality peculiar to the Plastic Arts; but this reasoning is false, and would degrade Music to the level of a mere sensual enjoyment. If Music is to reach the intellect, it needs the evidence of a preconceived and carefully-considered design. The symmetrical form of the Eroica Symphony is as necessary to its perfection, as a work of Art intended to appeal to the understanding through the medium of the ear, as the curves of the Venus of Milo are, to one intended to speak to it through the medium of the eye. Without its curves, the statue would be a shapeless block of marble. Without its plan, the Symphony would be a chain of meaningless Chords. And what is true of the Symphony, is true of all other kinds of Music. If it could really be demonstrated that Music, addressed to the intellect by means of the logical development of a well-considered thesis, was antagonistic to the progress of the Lyric Drama, the demonstration would amount to a positive proof that Music and the Drama were incompatible existences; and, this once proved, all subsequent attempts to present them in combination would savour, not merely of æsthetic inconsistency, but of treason to Art itself. Some critics, denying the charge of inconsistency, affirm that the antagonism of which they complain is incontestable. But it is not so. Neither in Instrumental nor Dramatic Music is symmetry incompatible with expression. We need not go back to the classical age, for proofs of so manifest a truism; for, some of the ablest living Composers are proving it, every day. Brahms and Raff are not the only writers who have found full freedom for the inner life of the Imaginative and Romantic Schools, within the limits of strict symphonic propriety. Max Bruch has even gone beyond them, in the same direction. In his Violin Concerto in G minor, dedicated to Joachim, he discusses his Subjects so thoroughly, and with such minute attention to their bearing upon the general design, that his Movements stand forth as a living protest against the crippled invention which mistakes the transposition of some eight or ten inconsequent notes, into so many incongruous keys, for a well ordered and interesting construction. Yet, no one who has listened to the first two pages of the introductory Allegro will deny its imaginative power. In the domain of Dramatic Music, Bruch manifests—as in his Scenic Cantata, 'Odysseus'—a closer and more genuine sympathy with the canons laid down by Gluck, than we find in the works of many writers who profess to look upon Gluck himself as a beginner. All that Gluck has claimed, in connection with the Stage, Bruch has here used, apart from it; and, so well that

[1] See p. 290 *a*.

we miss neither the Scenery nor the Action. This power of writing good Dramatic Music for the Concert-Room is not common. Mendelssohn exhibits it in the 'Walpurgis Nacht,' Gade in 'Comala,' and Bruch in 'Odysseus': but most young aspirants either overshoot the mark, or fall below it. Bruch has fallen into neither error; and, meanwhile, has taken good care that his Music shall not fail through want of constructive cohesion. In citing him as an authority, we are actuated by no controversial spirit, nor desire for an invidious comparison. But the important appointment which Bruch is now filling at Liverpool, gives his works the opportunity of becoming as popular in England as they are in Germany, and thus renders them apt illustrations of the point in question. In many respects, an inferior Composer would have served our purpose equally well. We frequently find many poor ideas grouped together with the most perfect regularity; while rich ones are exhibited in a confused heap, destitute of any arrangement at all. In the one case, the result fails through the weakness of its conception; in the other, through the inconsequence of its argument. The one appeals too little to the senses; the other, too little to the intellect. The senses may be perfectly satisfied, so long as each character in the Drama is labelled with a distinct melodic phrase, as each locality was labelled, in the days of Shakspeare: but, the intellect demands something more than this; and that something more is, a clearness of narration, which, apart from the extraneous influence of new Instruments introduced into the Orchestra, of alternate crashes and tremolos, and of declamation continued *ad nauseam*, shall appeal to the mind as well as to the passions, and thus prevent the Lyric Drama from sinking, eventually, to the level of a Serious Extravaganza, or a Tragic Pantomime.

To sum up our argument, we see that the pedigree, even of this latest development of modern progress, descends to us, in a direct line, from the time of Prætorius, through the chain of the Bachs, Haydn, Mozart, Beethoven, Schubert, Spohr, and Mendelssohn. The modern system of Part-writing, now universally accepted in place of the Counterpoint of the 16th century, originated in the growing taste for Instrumental Music concerning which we learn so much from the details handed down to us in the 'Syntagma.' Under Seb. Bach, this system reached its culminating point, in the Fugue. For this, Haydn substituted the Sonata-form; giving it, in Sæcular Music, the office performed by the Fugue in the Oratorio. Over this form Mozart obtained an absolute mastery: but he did not leave it where he found it. It was he who first invested it with dramatic power, and first succeeded in making that power subservient to the expression of every shade of passion, or of feeling, demanded by his subject. Witness his Overture to 'Il Don Giovanni,' which depicts the determined resistance of the hero of the piece to the warnings of the Statue, the threatenings of Don Ottavio, and the gentler counsels of Zerlina, and Donna Elvira, with such life-like accuracy, that the Movement serves as an epitome of the entire story. Moreover, he showed, in the Overture to 'Die Zauberflöte,' and the Finale to the 'Jupiter Symphony,' that the two great manifestations of the older and the newer systems were neither antagonistic nor incapable of amalgamation: and thus produced, in one splendid inspiration of genius, a third form, identical with neither, though compounded of both—the Symphonic Fugue. Beethoven next demonstrated the permissibility of extending the limits of the Sonata-form, in any desired direction, so widely, that, while offering no restraint whatever to the wildest flights of his Imagination, it enabled him to express his ideas with a clearness of argument which has never been exceeded. His immediate successors accepted this position in its fullest significance: and, attaching themselves either to the Imaginative or to the Romantic School, demanded the freedom from restraint which true Genius claims as its birthright, and which no true Child of Genius has ever yet been known to betray. In so far as this freedom has tended to clothe the comparative meagreness of earlier forms with a richer veil of poetical imagery, its influence has never been otherwise than healthy and invigorating. But, it has not always been thus wisely employed. It has tempted the neophyte to indulge his fancy, when he ought to have been writing Thorough-bass exercises, as Beethoven did before him; and to abuse gifts, which, properly cultured, might have led to something worth preservation. It has tempted false teachers to tell him that the Sonata-form itself is an archaic monstrosity, unworthy of his respect, and only used by Beethoven himself, under the influence of some strange hallucination the root of which it is impossible to discover. That such abuses are only too prevalent, experience has abundantly proved; and it is to be feared that they are inseparable from this peculiar manifestation of artistic power: in which case, their presence must be accepted as a proof that the modern German Schools contain within themselves the elements of their own destruction.

XXXII. In forming THE ITALIAN SCHOOL OF THE 19TH CENTURY, Rossini—perhaps unwittingly—borrowed not a little from his Teutonic brethren. His Instrumental Accompaniments far exceed, both in volume and complication, the modest standard adopted by Cimarosa, and certainly owe something to the influence of Haydn and Mozart. His Harmony, too, is both richer and more varied than that of his Italian contemporaries; and is probably indebted to Vienna for something more than an occasional suggestion. Yet the basis of his style, in all essential particulars, is thoroughly Italian, and thoroughly his own—Italian, in the airy lightness of its Melodies; his own, in its unwonted freshness, even for Italy, and in the passionate expression which adds so much to its dramatic power, without diminishing its brilliancy. What the Romanticism of Weber and Spohr is to the German School, this desperate passion is to the later Schools of Italy. It must always seem extravagant, to those whose

taste is formed on Northern models. But it is no ignoble characteristic; for it is founded upon Nature, as exhibited in the impulsive temperament of the South. And, it is always true. The climax always comes in the right place; and the moment of exhaustion follows, naturally, in due course. Rossini first made it a necessity. Bellini threw his whole soul into it. Donizetti—a more cultivated Musician than Bellini, though, with less exceptional natural gifts—used it no less skilfully than his predecessors. And time has proved that these defenders of the true Italian style were in the right. Mercadante felt this strongly, and turned his conviction to account: while a host of inferior Composers followed the leading of these powerful Chiefs; some doing good work of an inferior grade; others doing their best to vulgarise that which really contains the very essence of refinement; but none venturing to dispute the one great principle, that, deprived of its passionate expression, its melodious grace, and its perfect adaptation of vocal passages to vocal capabilities, their School could no longer exist. When Grisi and Mario were in their prime, and Verdi on his trial, the truth of this principle was universally accepted. Among the most popular Composers then living, there was not one, in any part of Italy, strong enough to set it at defiance. No Italian Opera, destitute of passion, of melody, or of vocal propriety, would have lived through its first night. But, within the last few years, a notable revolution has taken place. It is impossible to say whether the change was due to the Italians themselves; or was imported into Italy from foreign sources. But, it is manifestly unfair to assert, as some have done, that the movement is due to the influence of Wagner. It is true that its promoters have, to a certain extent, adopted the theories proposed by the German Master; inasmuch as they regard the symmetrically-constructed Aria as incompatible with the healthy development of the Lyric Drama, and, on that account, eliminate it, in favour of declamatory Recitative, and Instrumental Tone-painting, subordinating the claims, even of these powerful vehicles of expression, in their turn, to those of the Poetry, the Scenery, and the Action of the Story. But these restrictions, proclaimed by Peri, in the 16th century, and advocated by Gluck, in the 18th, are not altogether ignored by Meyerbeer and Gounod; and, since it is notorious that the best modern Italian Singers have achieved great successes in the Operas of these two Composers, it is more reasonable to believe that the latest Italian writers have been tempted, by this circumstance, to modify their style, than to suppose that they adopted their ideas from Munich. Be this as it may, the movement is a *res facta*; and the present Italian Composers no longer care to write in the true Italian manner.

The standard of revolt was first raised, by Verdi, at Venice, in the year 1857; and the result of his experiment was, the utter failure of his Opera 'Simone Boccanegra.'

But Verdi was not the only believer in the new theory—the hated *avvenerismo* of the Italian dilettanti. A formidable body of young Composers soon joined the insurgent ranks, and laboured so enthusiastically in the cause of 'progress,' that they have already secured a strong revulsion of public feeling in its favour. Foremost amongst these are Arrigo Boïto, Alfredo Catalani, Filippo Marchetti, Amilcare Ponchielli, Anteri-Manzocchi, and the clever Contrabassist, Bottesini; Composers who have all made more or less impression upon the public, and whose works, whether good or bad, have at least sufficient individuality to secure them against the charge of servile plagiarism.

That the success of the Italian reform—if 'reform' it may be called—is almost entirely due to Verdi's clear-sightedness and perseverance, there can be no doubt. Well knowing the goal to which his new ideas must lead, he was not to be deterred from reaching it, by the disapproval of a Venetian audience. His earlier Operas were uniformly indebted, for their reputation, to a few catching Melodies, adapted to the taste of the period; the Music apportioned to the Action of the Drama being put together with so little care that it was difficult for a cultivated audience to listen to it. In 'Simone Boccanegra' the new convert endeavoured to remedy this defect, not by any startling change of style or method, but by devoting serious attention to points which he had too much neglected in his youthful works. These innovations were small indeed compared with those destined to follow. We have seen how the audience received them. We have now to see how Verdi received the judgment of the audience. In his later Operas, he gradually introduced a real change of style. Yet, some of these have achieved a far more lasting success than that which followed the most popular of his earlier efforts. In judging these transitional works, we cannot but see that he still felt doubts as to the mode in which they might be most effectively treated. As time progressed, these doubts merged, one by one, into certainties; until, in 'Aïda,' first produced at Cairo in 1872, we find the fullest enuntiation of the principles at issue, which the Composer has hitherto given to the world. It would not be safe to regard even 'Aïda' in any other light than that of a tentative production; but it at least discloses Verdi's idea of the goal to which the new movement is tending; and it is especially interesting as a proof that his ideal differs, very materially, in one point—the most important of all—from the standard aimed at by the most ambitious and the most prominent of his fellow-reformers. He has given up the orthodox form of the *Aria d'entrata*, the *Cabbaletta*, and the *Canzonetta*; he has welded his Movements together, so as to produce the effect of a continuous dramatic whole; he has centred more interest in his declamatory passages, and his orchestral pictures, than in his passages of flowing Melody—but, that stream of Melody is never wanting. It may be broken into a thousand scattered phrases; it may lack the continuity necessary to ensure a

good effect apart from its Stage surroundings; but it is always there. And so long as Verdi preserves it as an indispensable feature in his work, so long will that work outlive the greatest successes of the best of his imitators. That he means to preserve it is evident; for, not many months ago, he brought out at Milan a revised edition of 'Simone Boccanegra,' with a new Libretto by his friend Boïto, in which the original Melodies are retained, while the dramatic portions of the work are brought into even greater prominence than the corresponding divisions of 'Aïda': and in this form the Opera has achieved an immense success.

Of the 'Requiem,' composed in honour of Manzoni, we shall speak elsewhere. But, whatever our opinion of Verdi's merits, as a Composer of Sacred Music, it seems certain, that, in his later dramatic works, he has proved himself a convert to opinions, which, thirty years ago, he would probably have emphatically condemned.

We have said, that the Libretto of 'Simone Boccanegra' was remodelled, not long ago, by Arrigo Boïto. This profound Scholar, and true Italian Poet, exercises, upon the Lyric Drama of the present day, an influence somewhat analogous to that of Metastasio upon the 'Opera seria' of the 17th century. He it was who furnished Bottesini with the Libretto of 'Hero and Leander,' and Ponchielli with that of 'Gioconda'—both Poems worthy to live for their own sake. It is much to be able to say this; for there are but few Libretti endurable, in the absence of the Music to which they are adapted. But Boïto's Poems are different indeed from those which have served as the basis of most Italian Operas, for many years past. He is a profound thinker, as well as a learned scholar; a Philosopher, as well as a Poet. In a fourth Libretto, more carefully constructed than either of the three we have mentioned, he has given us an Italian illustration of Goethe's 'Faust.' This famous Libretto he has himself set to Music. And here we have to grapple with one of the greatest difficulties with which the later Schools of Dramatic Music are called upon to contend. Their demands upon the individual are excessive. How can one man shine, in the first rank, as a Poet and a Musician, a Philosopher and a Machinist, a *Maestro di Canto* and a designer of Scenery? Had Boïto studied Music as he has studied Poetry, 'Mefistofele' would have been simply immortal. As it is, it can only give pleasure to those who are incapable of listening with patience to 'Fidelio' or 'Il Don Giovanni.' We will not stay to analyse its Music. Suffice it to say that the Libretto has been written with so clear an insight into Goethe's meaning, and so conscientious a desire to do justice to his intention, that it cannot but be regarded as a valuable commentary upon the Poem. It has been said that very great Music may sometimes save a very bad Libretto. It remains to be seen whether the converse of the proposition be equally true.

Among the most conscientious adherents to the principles of the new School, we find a number of young Composers, who have already earned a reputation which bids fair to increase very rapidly. First among these stands Ponchielli, whose three best works, 'I promessi Sposi,' 'Gioconda,' and 'Il Figluol prodigo,' exhibit, in their highest development, the most prominent characteristics of the movement. Bottesini, in his 'Hero and Leander' and 'La Regina del Nepal,' inclines rather to the standard adopted by Verdi, striving hard to attain dramatic power, but refusing to betray the cause of Italian Melody. Catalani, happily for his successful Opera, 'Elda,' produced in 1880, has hitherto chosen the same line of action, which has been even more fully carried out by Anteri-Manzocchi, in his really melodious works 'Dolores' and 'Stella.' Marchetti, on the other hand, has attached himself to the most advanced section of the party, and, in his 'Ruy Blas' and 'Don Giovanni d'Austria,' acts as the champion of its most violent utterances.

Reviewing the School, as a whole, we cannot but see that it must necessarily exercise a powerful influence upon the Future of Dramatic Art. It has its weak points, as well as its strong ones: and, if it is ever to attain real greatness, its supporters must dare to look the former resolutely in the face, and fight with them, hand to hand. Among the weakest of these weak points are three which merit more than ordinary attention: neglect of Melody; neglect of that indispensable care for the Voice, and its possibilities, without which the Opera must eventually degenerate into a mere vulgar crash of Instrumental inanities; and neglect of that careful system of Part-writing, which, in the Italian School of fifty years ago, was less indispensable than it has since become. A very slight knowledge of the Theory of Music sufficed for the enrichment of a graceful Melody with a passable Accompaniment. But the new School aims at higher things than this; and study is needed for their attainment. Hitherto, Part-writing has not been very deeply studied in Italy. It must be cultivated, now; or the School must, sooner or later, collapse. Music has its Grammar as well as Poetry; and the rules of the one can no more be neglected than those of the other. What would the author of 'Mefistofele' think of an Italian Libretto, beginning with the words—

Avi Signor delle Angelo ed della Santi?

What, then, must an educated Musician, accustomed to the Harmonies of Mozart and Beethoven, think of such a passage as the following?

Surely this passage, and a similar one in the Scene at the beginning of the Prologue of 'Mefistofele,' must have been written, like the Scherzo sung by the Cherubim, for fun.

In strange contrast to these crudities, the news is brought to us of the discovery of an unfinished Opera—'Il Duca d'Alba'—by Donizetti. The authenticity of the MS. has been established, beyond all doubt; and the possibility of completing and performing the work has already been discussed. It is to be hoped that the task of supplying the missing portions will be entrusted to an Artist capable of thoroughly sympathising with the intentions of a Composer who never heard of *avvenerismo*, and, if he had, could not have countenanced it; for, its introduction into one of his tuneful inspirations would have been like the introduction of vitriol into the human eye. Should this point be borne in mind, and should the Opera prove to be in the Master's best style, it will come upon us like a Voice from the Dead, and may do much towards the direction of Italian taste into a characteristic Italian channel.

XXXIII. The French School of the 19th Century is a very important one, for it represents the 'Grand Opéra' in a very interesting phase of its development, and the 'Opéra Comique' in the nearest approach it has made to perfection.

The history of the 'Grand Opéra' is remarkable for the long periods of almost unredeemed sterility interposed between its most brilliant triumphs. Forty-six years elapsed between the death of Lulli and the production of Rameau's 'Hippolyte et Aricie'; ten between the death of Rameau' and the first performance of Gluck's 'Iphigénie en Aulide,' and twenty-five between Gluck's last Opera, 'Echo et Narcisse,' and Cherubini's 'Anacreon,' produced in 1803. 'Anacreon' was succeeded, after an interval of four years, by Spontini's 'La Vestale'; and this, two years later, by the same Composer's 'Ferdinand Cortez': works which remained deservedly popular, until the appearance of Rossini's 'Guillaume Tell,' in 1829, caused all earlier successes to be forgotten. It is singular that this beautiful Composition should alone retain its place upon the stage, as the permanent representative of a period which owes more to Cherubini, Spontini, and Rossini, than to any other Composer, whether native or foreign; for even the best productions of later years, notwithstanding their extraordinary popularity, will bear no comparison with those of these three masters, on purely artistic grounds.[1]

Nevertheless, these later works must not be lightly esteemed; nor must the names of the Masters who produced them be passed over without due notice. For many years, Auber and Halévy enjoyed an almost exclusive monopoly of popular favour. The lead was afterwards transferred to Meyerbeer, who, having once obtained a hearing, suffered no rival to approach him. It was no small thing for a German Composer, attracted—like Gluck—at the outset of his career, by the graces of the Italian School, to settle down into a style so well adapted to Parisian tastes that a Librettist, like Scribe, French to the backbone, should find himself immortalised by the connection of his Verses with the stranger's powerful Music. The cosmopolitan spirit that dictated this vigorous course deserved success, and commanded it—being based upon a foundation of undeniable talent. For Meyerbeer's French Operas are no weak rehabilitations of an effete formula. They teem with Melodies which, however eccentric in construction, haunt the ear too effectually to be easily forgotten. Their grasp of the business of the Stage, too comprehensive to overlook the smallest detail, never fails to penetrate the inmost depth of the situation, be it what it may. And—most important of all, when we remember the character of the audiences to which they were originally addressed—they rise, where dramatic truth demands that they should do so, to a climax which carries everything before it. How many Composers could have continued the Action of the Drama, with increasing interest, after the fervid passion of 'Robert toi que j'aime'? Yet 'Robert toi que j'aime' is but an episode in a powerful Duet, which itself is but a single member of a still more exciting Finale. How many, after the 'Blessing of the Poignards,' could have escaped the chill of a wretched anti-climax? Yet it is only after the last crash of Orchestra and Chorus has been silenced, that the Scene begins to work up to its true culminating-point, in the Duet which concludes the Act. Truly these are master-strokes: and the Composer who imagined them deserves to live.

Meyerbeer's legitimate successor is Gounod, a genius of a very different order, but of no mean capability. Like Meyerbeer, he has listened to the counsels of Gluck, and profited by them largely; though, no doubt, in many cases, unconsciously. But, this remark applies only to the theoretical principles by which his practice is guided. In the details of his work, he has taken counsel from no one. His style is essentially his own; and, if it be tinged, sometimes, with a shade of mannerism, the peculiarity is only just strong enough to enable us to recognise our author with pleasure. It is impossible to mistake the tone of his harmonic colouring. Even when he writes progressions which bear not the most distant resemblance to each other, we constantly find him using the Chords he most delights in, for the production of certain sensuous effects, certain shades of pathetic expression, which distinguish his Music so plainly that it cannot be misunderstood. The dramatic power exhibited in 'Faust' is very striking; and much of its Music is quite good enough to live, apart from the Stage—a quality growing daily more and more rare, and regarded, by advanced thinkers, as a sign of weakness, though it is difficult to understand why really good Music should not sound good, anywhere. At any rate, Gounod's inspirations are always welcome, either in the Theatre, or the Concert Room; whether from 'Faust,' or 'Mireille,' or 'La Nonne Sanglante,' or other Operas less known here: and though 'Faust' is the work on which his fame chiefly rests, he has done so much, in other ways, that we cannot believe he will remain contented with the laurels he has already

[1] See vol. ii. p. 525.

won. The difficulty of winning such laurels, on a Stage which has witnessed so many shipwrecks, is no slight one. Ambroise Thomas had succeeded, over and over again, in lighter pieces, before he established his reputation by the production of 'Hamlet'; and the '*chute éclatante*' of Berlioz's 'Benvenuto Cellini,' meant nothing less than ruin. But we have not yet seen the last of the traditional 'Grand Opéra.'

The 'Opéra Comique,' still more prosperous, in some respects, than its graver sister at the 'Académie,' was raised to a high æsthetic level by Boieldieu, Grétry, and Méhul, at a very early period; and, even before the 19th century began, had given fair promise of a brilliant future, destined to be speedily realised by the genius of Cherubini, whose 'Lodoiska,' 'Elise,' 'Medée,' 'Faniska,' and, above all, 'Les deux Journeés,' rise far above his best contributions to the *répertoire* of the 'Grand Opéra.' In these great works, the triumphs of this form of the Lyric Drama culminate. No one has attempted to compete with their author, in his own style; and no new style has been conceived worthy to be discussed in connection with it.[1] The train of thought pursued by Hérold, Auber, and their countless followers, led them in so different a direction, that one is tempted to wish some more appropriate name had been invented, to distinguish their respective styles, and thus prevent the appearance of an unfair comparison of works which bear no nearer relation to each other than the Tragedy bears to the Ballad. Nevertheless, the number of successes achieved, of late years, in the lighter style, is very great. Six years ago, the hopes of French Musicians were excited by the production of Bizet's 'Carmen'; than which no work of similar character could possibly have been more exactly adapted to the one great need of the present crisis—the support, and continuation, of a long-established School. Pleasing enough to attract, yet not sufficiently so to stifle the memory of standard successes; original enough to command attention, yet not so new as to suggest the birth of a newer School; it takes its place among the best productions of its class, and honourably maintains it, without disturbing the relations of existing styles. A School in Music bears a very close analogy to a Species in Zoology. Its line of demarcation is a very elastic one. Countless modifications of form may be introduced without transgressing its limits. But, there is a point which cannot be overstepped. We have seen that Wagner has placed himself beyond the pale of the Romantic School; and Boïto, beyond that of the Italian School of Melody. Bizet has thought for himself; but has not overstepped the boundaries of the 'Opéra Comique.' With sufficient character to stamp them as his own, his ideas evince sufficient originality to entitle them to consideration, as belonging to a School already formed. His power of expressing passion is very remarkable: not Italian passion; but the agitation which goads a soul to madness. And the quaint piquancy of some of his lighter conceptions is delightfully refreshing; as in the Chorus of *Gamins*, in the First Act—a *jeu d'esprit* which makes us long to know how he would have treated such a character as Petit Gavroche, had it fallen in his way. But, alas! like Goetz, he lived only just long enough to see his talent appreciated.

Notwithstanding the associations connected with its title, it is by no means *de rigueur* that the subject of the 'Opéra comique' should be a ludicrous, or even a cheerful one: but, this indulgence is not extended to the lighter form of entertainment called the 'Opéra bouffe,' now so extravagantly popular in Paris, and so frequently presented, elsewhere, in the guise of an English or German translation. In general design, the 'Opéra bouffe' bears much the same relation to the Farce, that the 'Opéra comique' bears to legitimate Comedy; but it also borrows largely from the Ballet and the Melodrama, and not a little from the Extravaganza and Burlesque. Its Music is, as a general rule, too trivial for serious criticism; though, within the last few years, much of it has attained almost unexampled popularity in the hands of Offenbach, Hervé, Lecocq, and other aspirants for public favour.

Though the French School has produced innumerable Instrumentalists, of European reputation, it has given birth to comparatively few Instrumental Composers. It is true, that the Orchestral Preludes to Cherubini's Operas rank among the finest inspirations of his genius; but, they stand almost alone. Neither the Quartet nor the Sonata have ever found a congenial home in France; nor can the Symphony be said to have firmly taken root in that country, though the meteor-like genius of Berlioz invested it, for a moment, with a passing interest of altogether exceptional character. The style of this irrepressible free-lance differs, root and branch, from that of every other known Composer, German, French, English, or Italian; yet its most salient features may be summed up in a very few words. It is a French paraphrase of the most pronounced development of the German Romantic School: German, in its deep cogitation, its philosophical moods, its wild imagery, its power of Tone-painting, and its new and finished system of Instrumentation—French, in its violent outbursts, its fervid excitement, its uncontrollable agitation, its polished refinement, and, above all, its ineffable *bizarreries*. Its analogue, in Literature, would be a paraphrase of 'Faust,' by Victor Hugo. It exceeds all previous revolutionary manifestations, in its mad contempt for all authority, save that dictated by its own caprice. In the fearlessness of its conceptions, it stands unrivalled. And, in painting its vivid pictures, it avails itself at one moment of the deepest Poetry, and at another of the grossest Realism, with a calm assurance which sets all sober criticism at defiance, but seldom fails to hit its mark. Are we not made to feel, instinctively, in 'Le Carnaval Romain,' that the shower

[1] See vol. ii. pp. 522, 523.

of *confetti* is a sham? that the *bon-bons* are fictitious, and probably aimed at our eyes? Can the coldest of us listen, unmoved, to the March in 'La Damnation de Faust'? In 'Harold en Italie,' the finest picture of all, does not the Viola *obbligata* impersonate the hero of the Poem, as he could have been impersonated by no other means? Could we obtain a clearer insight into his morbid train of thought, if we were permitted to converse with him in the flesh? It has been said, that genius, capable of producing such works as these, would expire if trammelled by the conventional Rules of Art. We do not believe it. We believe, that, if Berlioz had worked at those Rules, as hard as Beethoven did, he might have taken rank among the greatest writers of the century. Casting them aside, he shines forth as the producer of works which may astonish, and even delight, for the moment, but which cannot last, because, like the caprices of the author himself, they can never be thoroughly understood.

Another bright ornament of the Modern French School, Camille Saint Saëns, has also given much attention to this particular branch of Art; though it is not generally in his purely descriptive Music that he shows himself at his best. For instance, his Pianoforte Concerto in E♭—which, notwithstanding its charmingly picturesque character, claims no connection whatever with the Romantic School—strikes out an idea, so original, so reasonable, and so full of artistic interest, that one cannot but regard it as marking a distinct stage of progress in the development of Instrumental Composition. Its grasp of the mutual relations existing between the Solo Instrument and the Orchestra, its exact measurement of the capabilities of both, and its skilful adaptation of the one to the other, unite in producing a variety of effect, which is heightened every moment by the introduction of some new and unexpected combination; while the richness of the general tone is not a little enhanced by the excellence of the 'writing,' throughout. Saint Saëns has written many other works on a scale as extended as this, and rarely failed to strike out some original idea well worth remembering; but this Concerto carries out a principle so valuable, that we cannot doubt that it will take its place among the accepted truths of Art. On the other hand, the meaning of his descriptive works is often very obscure. For instance, his Poème Symphonique, 'Le Rouet d'Omphale,' is lamentably deficient in the clearness which is indispensable in a work of the advanced Romantic School. Even with prefatorial references to guide us to the exact bars in which we are to look for 'Hercules groaning under the bonds which he cannot break,' and 'Omphale deriding his efforts,' we fail to recognise the true moral of the Scene; while the passage for Stringed Instruments which represents the motion of the Wheel, is, after all, no more than the repetition of an idea already worked out to perfection in the First Movement of Spohr's 'Weihe der Töne.' But, if the Composer has mistaken his strong point in this, he has announced it so forcibly in other works, that French orchestral Composers must be apathetic indeed if they do not follow his example, in striving to secure some share of the fame which has hitherto been exclusively reserved, in Paris, for writers of Dramatic Music.

XXXIV. The English Schools of the 19th Century have passed through so many, and such various transitions, that it would be impossible to give a mere general sketch of their history. They must be treated in detail, or not at all.

We have seen that the death of Handel was followed by a long period of comparative inaction, relieved only by the introduction of a new School of Dramatic Music, essentially English in character, and, though overflowing with Melody, sadly deficient in scenic power. This School did not die out with the 18th century, but was carried well into the 19th, by Dibdin and Shield; and in the hands of Braham, C. E. Horn, and Bishop, became even more popular than before. Braham, indeed, did little for it, beyond the introduction of some spirited Songs, to which his matchless Voice, and perfect method of phrasing, lent a charm which atoned for much weak Instrumentation, and many still more serious shortcomings. But Bishop was a thorough Musician, a perfect master of the Orchestra, and, in many respects, a true genius. His invention was unlimited. His Melodies were always graceful, and pleasing; and his Concerted Pieces were skilfully put together, with that instinctive tact, which never fails to produce the best effect attainable with the means at its command. Witness that delightful Finale in 'Guy Mannering,' in which the Comic and the Sentimental are blended together, with such exquisite perception, that one can only wonder how the Composer failed to take rank as the greatest dramatic writer of the period. Rooke followed, worthily, with 'Amilie, or The Love-test,' 'Henrique, or The Love-pilgrim,' and 'Cagliostro'—works full of merit, though no more likely to be revived than their predecessors. If then, even when reinforced by such exceptional talent, the old English Opera rose to no satisfactory artistic level, it must clearly have been in consequence of some radical defect in its constitution. And this was the exact truth. It demanded, for its effective representation, a practical impossibility. Due justice could only be rendered to the impersonation of its principal characters, by a company of performers, equally accomplished as Vocalists and Rhetoricians. And hence it was, that, when 'Guy Mannering' was revived, some five and thirty years ago, at the Princess's Theatre, the piece owed its success entirely to the wonderful delineation of the parts of Meg Merrilies and Dominie Sampson by two celebrated Comedians, neither of whom could sing a single note—in other words, it succeeded, not as an Opera, but as a Play. Neither in Germany nor France, would this perversion of styles have been possible: for, neither in the modern form of the 'Singspiel,' nor in the 'Opéra comique,' is any really important part of the Action of the Drama transacted in spoken Dialogue. The approach of

a scenic climax is always heralded by a return to the more powerful language of Music; and it was simply to the neglect of this condition that the older School of English Opera owed its ruin. A foolish prejudice against English Recitative had long been prevalent in musical circles; and had, by this time, become so general, that when 'Der Freischütz' was produced at Covent Garden in 1824, it was mutilated in the most shameless manner to meet the popular taste, the last grand Finale being represented solely by its concluding Chorus. Even the Libretto of 'Oberon' (by Planché) contained scenes in which the whole interest was centred in the Dialogue; and, when German, Italian, or French Operas, were 'adapted to the English Stage,' their finest movements were excised, in obedience to this Procrustean law. What wonder that a School based on so false a foundation should fall to the ground!

Without one tithe of Bishop's talent, or a vestige of his reverence for Art, Balfe saw this weak point; and remedied it, by substituting Music for Dialogue, in the more important situations of the Drama, and thus assimilating it more nearly to the lighter phases of the 'Opéra comique.' In this he certainly did well. Compared with Bishop's, his Music was worthless. But, by introducing it in the right places, he saved the English Opera—a work in which he was ably supported by Benedict, whose earlier Operas were based upon similar views. Wallace followed with 'Maritana' and 'Lurline'; Lucas, with 'The Regicide'; Lavenu, with 'Loretta'; Howard Glover, with 'Ruy Blas,' 'Aminta,' 'Once too often,' and 'The Coquette'; Henry Smart with 'The Gnome of Harzburg'; Hatton, with 'Pascal Bruno'—produced at Vienna—and 'Rose, or Love's Ransom'; Mellon, with 'Victorine'; and Edward Loder, with 'The Night-Dancers.' Our best Composers were, by this time, fully convinced, that, if any good was to be effected for the English Lyric Drama, it could only be by the full recognition of principles, which, ages before, had been received as canons of Art in every other country in Europe. The performances of a German Opera Company, in London, in 1840–1842, did much towards the illustration of these principles, in a form both practical and instructive. The German 'Singspiel' was heard, in its normal purity, interpreted by German Singers of highest rank. The objectors to English Recitative were put out of Court; for the Dialogue of the 'Singspiel' is spoken. We know, now, that this is a mistake; and, that the only true principle is that maintained by the Italians, who insist that everything must be sung, or nothing. But, in those days, it was a great thing that even the German theory should be accepted; and its acceptance was followed by great results.

The eyes of John Barnett had already been opened to the necessity of this modification of form, as early as 1834, when he brought out his best Opera, 'The Mountain Sylph,' at the Lyceum. Before this, he had produced a lengthy series of dramatic works, abounding in beautiful Songs, but based upon the approved English model, and therefore doomed to speedy extinction. But in 'The Mountain Sylph' he proved himself the possessor of an unsuspected amount of dramatic power; and, while faithful to his melodic talent, took care to employ it—as in the clever Trio, 'This magic-wove scarf'—in combination with sufficient Action to ensure its good effect. But, though the Opera proved a great success, the new principle was not followed up, until, after the arrival of the German Company, English audiences became alive to its immense importance. Then it was that George Macfarren appeared upon the scene, with his 'Don Quixote'; a delightful work, which was received at Drury Lane in 1846 with acclamation. No less successful were his 'Charles the Second,' produced at the Princess's Theatre in 1849, and 'Robin Hood,' at 'Her Majesty's Theatre' in 1860. These, and some later works of similar tendency, are all written in true English style; but with an honest appreciation of the form which prevailed uninterruptedly in Germany, from the time of Mozart until the first outbreak of the revolution which has condemned it as a relique of the dark ages. With this revolution, Macfarren has never shown the slightest sympathy, either in theory or practice: but, honestly striving to carry out the principles which underlie 'Der Freischütz,' 'Die Entführung,' and 'Les deux Journées,' he has accomplished a work which may possibly be more fully appreciated after a certain inevitable reaction has set in, than it is now.

Not many English Operas of note have been produced in London since Macfarren's later works; but within the last few years a taste has been developed for a lighter kind of Operetta, the success of which has surpassed anything that the most devoted admirers of playful Music could have anticipated. In nothing does a true Artist declare himself more unmistakeably, than in his power of adapting himself to circumstances. We all know that Opera buffa is a lower form of Art than Opera seria; yet Cimarosa and Rossini achieved some success in it, to say nothing of Mozart. In like manner, though we do not say that English Comic Operetta is, in itself, a noble conception, we do say, that, since the English public is determined to have it, Arthur Sullivan has proved himself a true Artist, by meeting the demand in so conscientious a spirit that his reputation as a Musician will rest, eventually, on his Operettas, as much as on his more serious Compositions. A strong affinity may be traced between these pretty trifles, and the older forms of Italian Opera buffa. The Tunes are catching, in the highest degree. If they were not so, no Operetta would live a week. But, they are also put together with so much genuine Musician-like feeling, that, though they may be ground on the barrel-organ, and whistled in the street, they can never sound vulgar. And, the brightest fun of the piece, the real *vis comica*, lies—as in 'Il Barbiere,' and 'La Cenerentola'—not in the words, but in the Music. 'Hardly ever' would not have passed into a proverb, if it had been spoken. It makes us laugh, only

because, like all the other good things in 'H.M.S. Pinafore,' it is so set to Music that the Singer has no choice but to turn it into fun. And it is exactly the same with 'Patience,' and 'Cox and Box.' Their Music overflows with witty passages; passages which would make the words sound witty, were they ever so tame. The fun of very clever people is always the richest fun of all. Its refinement is a thousand times more telling than the coarser utterances of ordinary humour. And so it has always been with the greatest Masters of Opera buffa. Paisiello and Cimarosa are accepted as Classical Composers; yet their sprightliness exceeds that of all the farce-writers that ever existed. Arthur Sullivan has made every one in London laugh; yet, the predominating quality in the Music of 'H.M.S. Pinafore' is reverence for Art—conscientious observance of its laws, in little things. It may sound absurd to say so: but, no one who takes the trouble to examine the Score can deny the fact.

It is said that the Composer of these popular Operettas is contemplating a Serious Opera, planned upon an extensive scale. It is to be hoped that the report may prove true; for, with his great reputation, he can hardly fail to obtain a hearing, though there is not much hope, in England, for aspirants of lesser celebrity. That Stanford's 'Veiled Prophet' should have been performed, for the first time, at Hanover, in the form of a German translation, is a reproach to our national taste. Had the work proceeded from an untried hand, managers might have been forgiven for refusing to risk the production of a piece demanding such costly scenic preparation. But Stanford's name was not unknown; and 'The Veiled Prophet' proved to be something better than a poor commonplace imitation of foreign models. Though original, in the best sense of the word, it never descends to eccentricity. While giving free expression to any amount of necessary dramatic colouring, the Composer never forgets that there is another side to the question—that even dramatic colouring must conform to laws which have been ordained in order that Art may never degrade herself by the presentation of that which is hideous, or even unlovely. This wholesome restraint is exemplified, in a very remarkable way, in the Music allotted to Mokanna. The temptation to represent physical ugliness by ugly progressions would have been too strong for many a young Composer to resist; yet, here, with no suspicion of such revolting symbolism, we are still made to realise the horror of the Scene in its fullest significance. There is a determined character about the Watchman's Song which stamps it, throughout, as an original inspiration. The same may be said of the Music designed to accompany the rising of the magic moon; while the more regularly developed Movements—such as the Duet between Zelica and Azim, in the Second Act—show evidence of a preconceived design, which greatly augments the musical interest of the piece. Judged as a whole, the Opera takes rank as a legitimate product of the Romantic School, original enough to claim our hearty recognition, on its own merits, yet obedient enough to scholastic law to show that its author has not neglected the study of classical models.

Want of space compels us to pass over the Dramatic Works of Cowen, and Alfred Cellier, and many another rising Artist, without detailed notice; but, with so many young Composers in the full strength of their artistic life, and so many clever librettists ready to cast in their lot with them, we cannot but think that there is good hope for the future of English Opera.

During the earlier decads of the 19th century, England did but little for Sacred Music. In one important point, however, she was faithful to tradition. She alone kept alive that love for Handel which was elsewhere absolutely extinct. The Cæcilian Society, and, after it, the Sacred Harmonic Society, did more good than could have been achieved by any number of lukewarm Composers. It is not too much to say that some of the finest Music we possess must have been delivered over to oblivion, had it not been kept before the world by these two Associations, until its beauties were recognised elsewhere, and Germany began that splendid edition of Handel's works, which ought, years ago, to have been printed in London. All honour to Dr. Chrysander for his labour of love! But we must not forget that the English were the first to promote, in one way, the work which Germany is now promoting in another; for it is to the enterprise of London publishers that we owe those octavo editions of Handel's Oratorios, the cheapness of which places them in the hands of every one, while their enormous circulation shows how wonderfully the taste for good Music must be on the increase. Moreover, the weakness, which, fifty or sixty years ago, lowered the tone of English Sacred Music so deplorably, has given place to a more promising power of healthy production. There can be no doubt that this reaction is mainly traceable to the first performance, in 1846, of Mendelssohn's 'Elijah,' an event which impressed the British public with a deeper reverence for the higher branches of Art than it had previously entertained. The audiences assembling at Exeter Hall knew some dozen Oratorios—the finest in the world—and honestly appreciated them. But, they did not care to hear anything they did not know. They were afraid to pass judgment on Music with which they were not familiar, lest, by criticising it too favourably, they should compromise their taste. The appearance of 'Elijah' put an end to this unsatisfactory state of things. The Oratorio proved to be superb; and no one was afraid to acknowledge it. The reaction was complete. The eyes of a large section of the Musical public were opened; and many who had never before entertained the idea of such a question, began to ask whether the creative faculty might not still be found within the pale of the English School. It was found; and, one by one, works were produced, quite strong enough to give fair promise of the ultimate formation of a new School of English Oratorio. To Sterndale

Bennett we owe 'The Woman of Samaria'; to C. E. Horsley, 'David,' 'Joseph,' and 'Gideon'; to Macfarren, 'S. John the Baptist,' 'The Resurrection,' and 'Joseph'; to Benedict, 'Saint Cæcilia' and 'S. Peter'; to Ouseley, 'Saint Polycarp' and 'Hagar'; to Sullivan, 'The Prodigal Son' and 'The Light of the World'; to John Francis Barnett, 'The Raising of Lazarus'; to Bexfield, 'Israel restored'; to Chipp, 'Job' and 'Naomi'; to Dearle, 'Israel in the Wilderness'; to Costa, 'Eli' and 'Naaman'; to Henry Leslie, 'Immanuel' and 'Judith'; to Barnby, 'Rebekah'; to Joseph Parry, 'Emanuel'; to Bridge, 'Mount Moriah'; to Armes, 'Saint John the Evangelist'; to Pierson, 'Jerusalem,' and the unfinished Oratorio 'Hezekiah.' Were we to speak of these works, or any of them, as on a level with 'Saint Paul,' or 'Elijah,' their Composers would be the first to contradict us. But we do say, that, with such a list before us—a list far from complete—it would be absurd to speak of the English Oratorio as extinct.

In order to supply a pressing need at our Provincial Musical Festivals, the Oratorio has been supplemented, of late years, by the Choral Cantata, in which some of our best English Composers have attained considerable success. Among the best examples produced within the last thirty years, we may mention Dr. Stainer's 'Daughter of Jairus'; Caldicott's 'Widow of Nain'; Dr. Bridge's 'Boadicea'; Macfarren's 'Lenora,' 'May Day,' 'The Sleeper awakened,' 'Christmas,' and 'The Lady of the Lake'; Sterndale Bennett's 'May Queen'; Benedict's 'Undine' and 'Richard Cœur de Lion'; John Francis Barnett's 'Paradise and the Peri,' 'The Ancient Mariner,' and 'The Building of the Ship'; Hodson's 'Golden Legend'; Hubert Parry's 'Prometheus Unbound'; Cowen's 'Corsair,' 'S. Ursula,' and 'The Rose Maiden'; Madame Sainton-Dolby's 'Legend of Saint Dorothea,' 'The Story of the Faithful Soul,' and 'Thalassa'; Gadsby's 'Alcestis,' and 'The Lord of the Isles'; Prout's 'Hereward'; Leslie's 'Holyrood,' and 'The Daughter of the Isles'; H. Smart's 'Jacob,' 'Bride of Dunkerron,' 'King René's daughter,' and 'The Fisher Maidens'; Mackenzie's 'The Bride'; Sullivan's 'Kenilworth' and 'Martyr of Antioch'; and many others.

The extraordinary number of these ambitious works may be partly explained by the increasing zeal for the cultivation of Part-Singing manifested by all classes of English Society. Forty years ago, the Art was scarcely known beyond the limits of the Sacred Harmonic Society, and the Choirs assembling at the greater Provincial Festivals. But, in 1840, Mr. Hullah—already well known to the public by his 'Village Coquettes' and some other Operas—first set on foot the famous Classes, which, beginning at the Training College at Battersea, have since spread to the remotest parts of the country; insomuch that there are few parishes in England, which have not, at some time or other, boasted a Class on the 'Hullah System,' and few towns destitute of a respectable 'Choral Society.' So great was the success of the movement, that, aided by his friend, E. C. May, and other coadjutors, Mr. Hullah was able, within a very few years, to raise the system of training to a standard much higher than that which he had originally contemplated; and, drafting his best pupils into a more advanced Choir, to perform the Oratorios of Handel, and other great works, first at Exeter Hall, and then at S. Martin's, in a style which did honour to the Association, even in the face of the Sacred Harmonic Society. The effect of these energetic proceedings was to educate, not only the taste, but the Voices of the people, also, to a point which prepared the way for the Choirs founded by Leslie, Barnby, and others, for smaller gatherings, for the Gluck Society, and for the now firmly established Bach Choir, which, under the able direction of Otto Goldschmidt, with Madame Lind-Goldschmidt consenting, from pure love of Art, to lead its Sopranos, has achieved its well-known success in the interpretation of choral works of the highest order. Moreover, this increased and increasing love for Choral Singing has already led to the production of countless Anthems, Services, and other pieces of Choral Music, many of which are in favour with our Church Choirs.

During the first half of the 19th century Instrumental Music was chiefly represented, in England, by Clementi, John Field, John Cramer, the elder Wesley, Dr. Crotch, Thos. Attwood, G. E. Griffin, and B. Jacob. To these succeeded Moscheles and Cipriani Potter; after whose retirement a newer style was developed, under the leadership of Sterndale Bennett. He first showed us how, to the refined *technique* of his predecessors, a new grace might be added more captivating than all the rest: and, crystallising this, in his written works, he has breathed a spirit into English Music which will not be soon forgotten. It is not too much to say, that, in perfection of form, clearness of design, symmetry of proportion, and delicacy of detail, his style has never been rivalled, since the death of Mendelssohn. These four great qualities—especially the last—distinguish it from all contemporary methods. And these qualities served him, even before he left the Royal Academy, as a fortress, under shelter of which he might safely give free scope to his genius, in any desired direction. Protected by this, he fearlessly suffered his Fancy to lead him into the very heart of the Romantic School. Not towards the spectre-haunted region so familiar to Weber and Marschner, but into the bright realm of Nymphs, and Sprites, and Faeries, and all the beautiful creatures of the woods; the dwellers in lonely streams; the dancers in the moonlit meadow; ethereal essences which he knew how to paint in colours as bright and beautiful as themselves. Where Weber shows us a Dragon, Bennett points to the gambols of a Squirrel; but it is only just to say that we are made to see the one picture as clearly as the other. Still, Bennett was no realist. He painted his pictures with an exactness of definition which compels our instant recognition; but, he dealt with the Unseen, as well as with the Seen, and

thus affiliated himself to the Imaginative School as closely as to her Romantic sister. There are thoughts in his Concertos, in the Symphony in G Minor, and in many of his pieces of Chamber Music, which neither words, nor pictures, can communicate from mind to mind; thoughts which can only be rendered intelligible through the medium of Music, and which, so communicated, unite the inmost soul of the hearer with that of the Composer.[1] No doubt, this is the highest result that Music can hope to reach—certainly, the most intellectual. But, this view of the case detracts nothing, either from the merit, or the charm, of Romantic pictures, so delicately painted as the Overtures to 'The Naiads,' 'The Wood-nymphs,' 'Paradise and the Peri,' or 'Parisina'—in which last sad inspiration the deepest depths of Tragedy are reached as certainly as the perfection of beauty is reached in the others. The 'Three Musical Sketches' stand forth like three little Water Colour Drawings from the pencil of Turner, who himself could have thrown no more poetical expression into the calm ripple on 'The Lake,' the rush of 'The Mill-stream,' or the brilliant sparkle of 'The Fountain,' than Bennett has done by means of the simplest possible form of Tone-Painting. Yet, even from these, the taint of vulgar realism is entirely excluded. The only satisfactory test that can be applied, in such cases, is the question, 'Would the Music sound good, and beautiful, and interesting, to a man who had never seen, or heard of, a Lake, a Mill-stream, or a Fountain?' And there can be only one answer—of course it would. Bennett never once, during the whole course of his artistic life, descended to anything that was beneath the dignity of his Art. One may read *noblesse oblige* in every bar he ever wrote. And we, who knew him intimately, can confidently assert, that, though his whole heart was full of gentleness, the kindness of his disposition never tempted him to condone, in others, what he would himself have rejected as unworthy of an Artist. On the other hand, if he could not tolerate bad Part-writing, or vicious Harmony, or hideous malformation disguised under the title of freedom from archaic bondage, he never refused to do justice to a grand idea, because it was new. Indeed, so far removed was his loyal Conservatism from the blindness which can see no good in anything not yet consecrated by the lapse of time, that he himself was always ready to welcome new ideas; and to deal with them in such sort, that, in many respects, his Music was very much in advance of its age.

Under such a leader, it would have been shameful if the English School had produced no Instrumental Music. It has produced much. Macfarren's Overtures to 'Chevy Chase,' 'The Merchant of Venice,' 'Romeo and Juliet,' 'Hamlet,' and 'Don Carlos'; John Francis Barnett's 'Symphony in A Minor,' 'Overture Symphonique,' Overture to 'A Winter's Tale,' and 'Concerto in D minor'; Stanford's Symphonies, his Sonata for Pianoforte and Violin, in D (op. 11), his Violoncello Sonata, in A (op. 9), and his other pieces for the Chamber, are all works worthy of recognition. Best's Organ Music, even apart from its Musician-like construction, and pure artistic feeling, shows an intimate acquaintance with the character and capabilities of the Instrument, which cannot but secure for it a long term of favour. Meanwhile, we owe much to a large and daily increasing class of Organists, once led by Drs. Gauntlett and S. S. Wesley, and now well represented by E. J. Hopkins, W. Rea, Drs. Stainer, Bridge, Gladstone, and many talented associates, whose executive power, and knowledge of practical Organ-building, have, for many years past, reacted upon each other, producing, in the end, a School of Organ-playing, the excellence of which is not surpassed in any part of Europe.

Arthur Sullivan, who has done so much for the lighter forms of Opera, and for Vocal Music of almost every class, has not been idle with regard to Instrumental Music, but has produced works—such as his Music in 'The Tempest' and the 'Merchant of Venice,' his Symphony in E, his Overtures 'di Ballo,' and 'In Memoriam,'—which show that, if he would, he might rival any one in this department of the art. His treatment of the Orchestra shows an intimate acquaintance with the nature of its Instruments, and a genius for their combination, such as few contemporary masters have surpassed; and we sincerely trust that the success of no possible number of Operettas may prevent him from continuing to labour in the more serious field in which he has already won so many honours.

Frederick Cowen is also worthily supplementing his Choral works, and his early and successful Opera, 'Pauline,' by numerous Instrumental Compositions, some of which have received marks of special favour at the Philharmonic Society and elsewhere. Among the most important of these are his 3 Symphonies, his Sinfonietta, and his Orchestral Suite—a series of significant productions, though not all of equal pretension. In close sympathy with the modern system of Tone-painting, Cowen delights in connecting his work by a thread of Romance, which, weaving itself through the entire sequence of Movements, gives a clue to the intention of the whole: but, with a wholesome dread of realism, he usually leaves his audience to fill in the details of the picture for themselves. For instance, in his Orchestral Suite, 'The Language of Flowers'—where distinct imitation of Nature, if not impossible, would have bordered upon the ludicrous—poetical symbolism is used, with excellent and perfectly intelligible effect. The Scandinavian Symphony (No. 3, in C minor), though confessedly a more descriptive work, owes more to the effect of subtle suggestion than to the presentation of a definite picture. It is true that we are introduced, in the Slow Movement, to a merry boating-party; and, in the Scherzo, to the incidents of a sleigh journey: but, in the opening Allegro, we are invited to contemplate the sombre

[1] See Mendelssohn's Letter to Souchay, Oct. 15, 1842.

scenery of the North, and, in the Finale, to dream of its heroic Legends, with no assistance from the Composer beyond the suggestion of a fitting frame of mind, which we cannot mistake, but which, nevertheless, leaves our fancy unfettered. It is by this fixity of intention, rather than by any more material quality, that we must measure the true value of Cowen's works, which, already very numerous, will, we trust, continue to multiply and advance.[1]

Hubert Parry, pursuing the path least likely to lead to evanescent popularity, has published a Pianoforte Trio in E minor, some Sonatas[2] full of earnest thought, and a Grand Duo for two Pianofortes, in which the twin Instruments are made to 'play up to each other' by means of a very much greater amount of ingenious Part-writing than one generally expects to find in Compositions of this class, while the well-marked character of the Subjects employed enhances its interest as a contribution to our store of advanced Pianoforte Music. He has also written an Overture, a Pianoforte Concerto, and other pieces, which, though several times performed in London, remain still in MS.

Of the works of Henry Smart, Walter Macfarren, Hatton, Goss, Ouseley, Leslie—whose Symphony in D, entitled 'Chivalry,' has lately been successfully performed—and a score of other Composers of the day, we would gladly speak in detail did our space permit. Our object, however, is not to call attention to the productions of individual writers, however excellent and interesting they may be in themselves; but, to show, by reference to actual facts, the present position of our English School, as compared with the Schools of other countries. We have proved that its descent is as pure as that of any School in Europe: that we can trace back its pedigree, link by link, from its living representatives, through Sterndale Bennett, Horn, Bishop, Dibdin, Arne, Boyce, Purcell, and the School of the Restoration, to the Polyphonic Composers, Gibbons, Tallis, Byrd, Whyte, Tye, Edwardes, Fayrfax, and John of Dunstable, and back, through these, to the oldest Composer of whom the world has any record, that John of Fornsete to whom we owe the most antient example of Polyphonic Composition yet discovered. We have shown—and shall presently show more plainly still—that, at the present moment, it is more active than it has ever been before; doing excellent work; and giving rich promise for the future. There has never been a time at which English Composers have more faithfully fulfilled the trust committed to them than now. They have conducted us, step by step, to a very high position indeed. We shall be cowards, if we recede from it. In order to prevent such a disaster, we have only to bear the work of our forefathers in mind; and, so long as this is healthily remembered, we need entertain but little dread of retrogression.

XXXV. Is retrogression then possible, in THE SCHOOLS OF THE FUTURE, after the wonderful advances that have already been made?

[1] For list, see vol. i. p. 413.

[2] For list, see vol. ii. p. 651.

Undoubtedly it is. By hard work, and continued perseverance, we may postpone its advent to an indefinite date. But, sooner or later, it will certainly come upon us. If the History of Art prove nothing else, it most certainly will never cease to prove this, to the end of time: and we have written to small purpose, if we have failed to establish the fact. After more than two centuries of steady progress, Polyphony attained perfection, in the School of Palestrina; and, within fifty years after his death, became a thing of the past. In the fourth half-century of its existence, the Monodic School received, at the hands of Rossini, so notable an infusion of German power, that, in its later phases, its essential principles, scarcely less dead than those of Polyphony, are barely recognisable. Not only have the Polyodic Schools of Handel and Bach languished, for lack of disciples; but it is even doubtful whether any Composer of the present day would care to make common cause with them, if he could. The same thing has happened in the case of every direct manifestation of a special form of Art. Is the School of Beethoven—which has served, more or less, as the basis of all the best work done during the last fifty years—condemned to suffer with the rest? It must so suffer, or contradict the experience of all past history. The question is, not whether it is doomed to extinction—for of that we are firmly assured—but, whether it has already reached its culminating point. Is room still left for greater work than any that has as yet been accomplished in this direction? If so, we may hope, that, sooner or later, a Master will arise among us, great enough to accomplish it. If not, the period of decadence cannot be very far distant: for, no School can exist, for any length of time, upon a dead level. If it be not progressing towards greater things, it must be dying out; and the sooner some new manifestation of genius supersedes it, the better. Let us try to cast aside all prejudice, in either direction; and dispassionately weigh our chance of advancement on the old lines against that of the discovery of a new path.

The most sanguine believer in progress will scarcely venture to assert that the labours of the last fifty years have effected any improvement in the Symphony, the Quartet, or the Sonata. Yet, the average efficiency of Instrumentalists, of all kinds, and in all countries, is probably greater, at this moment, than it has ever been before. Setting aside Paganini, as an exceptional phenomenon, rather than a Classical Virtuoso, no greater Violinist than Joachim has ever lived; nor, bearing his great Concerto and other important works in mind, can we speak lightly of him as a Composer. Except for his unrivalled powers, which admit of no comparison with those of any other Artist, there are many others whom we should thankfully place in the highest rank of all; and who really are second to him alone. It is doubtful whether the Violoncello was ever played as it is now played by Piatti; and those who do not remember Dragonetti will be quite prepared to believe the same of Bottesini and

the Double-Bass. What Joachim is to the Violin, Clara Schumann is to the Pianoforte—the most poetical interpreter now living of the great works of the Classical Schools; and, judging as well as we can by the traditions handed down to us, the most perfect, in some respects, on record. Scarcely less remarkable, as the representative of a newer School, is Hans von Bülow, who, notwithstanding his strong predilections in favour of Liszt and Wagner, is rivalled by few in his reading of the works of the older Masters, from Bach to Beethoven. Even Liszt himself, the Paganini of the Pianoforte, and the greatest executant of the century, still possesses powers, which, despite his seventy years, one sometimes half expects to welcome once more in all the glories of a second youth; and of which we do, in a manner, see a strange revival in the performances of Rubinstein. We speak of the giants only, having no room to chronicle the facts at our command. Yet who can forget the names of Halle, and Madame Norman-Neruda, of Arabella Goddard, Agnes Zimmermann, Marie Krebs, and a hundred other conservative Artists who delight us every day; and not these only, but a host of players on every Orchestral Instrument, so accomplished in their generation, that many of the Second Violins of to-day would have been thankfully accepted as Leaders, not so very many years ago. Whence, then, in presence of so splendid an array of Virtuosi, the manifest decline in Instrumental Compositions of the highest order? We shall best explain it by an illustration drawn from the history of another Art. The Instrumental Movements of Beethoven and Schumann, present, towards those of Haydn and Mozart, a contrast curiously analogous to that which the voluptuous *chiaroscuro* of Correggio presents to the clearer definitions of Pietro Perugino, and the youthful Raffaelle. Now Correggio was, himself, so consummate a draughtsman, that, knowing, to a hair's breadth, where his contours would fall, he could afford to throw them into shadow, whenever he pleased, without running the slightest risk of injuring his 'drawing.' But, among his would-be imitators were certain very poor draughtsmen, who found it much easier to throw in a shadow, than to fix the place of a correct outline. So, the contours of the early Masters were condemned, as 'hard'; and the *chiaroscuro* of Correggio was used to cover a multitude of incorrect outlines; and so it came to pass, that a notable degradation of Art was once referred to this great Master's School. In like manner, Beethoven, having a perfect symmetrical form at command, could afford to clothe it, to any extent, with those deeply imaginative passages which formed the very essence of his genius, without running the slightest risk of distorting its fair proportions. But, among some later Composers, this reverence for form has either passed unnoticed, or fallen into contempt, as a relique of barbarism; and the stringing together of passages, supposed to be imaginative, has been held to be all that is necessary for the production of a Work of Art. There can be no more fatal error than this: and Beethoven's own history proves it. We know that he worked hard at Fux's 'Gradus,' and Albrechtsberger's 'Anweisung'; and that, *afterwards*, he produced many wonderful works. And we know that some of his followers, whose works are not at all wonderful, have not worked hard, either at Albrechtsberger or Fux. Of course, this may be merely a coincidence. The merest beginner will tell us, now-a-days, that Fux and Albrechtsberger were superseded, long ago. No doubt, Beethoven used their miserable books as the basis of his method, because no better ones had then been published. Still, he seems to have got some small amount of good out of them. At any rate, so far as the Symphony is concerned—to go no farther—there is 'writing' in the immortal Nine which has not yet been equalled, but which, nevertheless, must be more than equalled, if the School has not yet entered upon the period of its decline.

In considering the future of Sacred Music, it is difficult to arrive at a satisfactory conclusion, with regard to the coming history, either of the Oratorio or the Mass. We cannot but look forward with deep interest to the production of Gounod's new work, 'The Redemption,' at the Birmingham Festival of 1882; nor can we doubt that it will be worthy of its Composer's reputation. Still, it must be evident to every one, that, since the year 1846, the Oratorio has not shown a tendency to rise, either in England or in Germany, to a higher Ideal than that which was presented to us at the memorable Birmingham Festival of that year. Many reasons may be adduced for this—among them, a technical one, of trenchant force. The chief strength of an Oratorio lies in its Choruses. Where these are weak, no amount of beautiful Airs will save the work. And, they always will be weak, unless they rest upon a firm contrapuntal foundation. This fact enables us to predict, without fear of contradiction, that, *cæteris paribus*, the best Contrapuntist will write, not only the best Oratorio, but the best Mass; for the same law applies, with equal force, to the modern Mass with Orchestral Accompaniments. No one will attempt to say that the sensuous beauty, either of Rossini's 'Messe Solennelle,' or Gounod's, is the highest type of perfection to which a Choral Composer can aspire. Verdi's 'Requiem' is as theatrical as 'Aïda'—far more so than 'Il Trovatore,' or 'La Traviata.' Anomalies such as these invariably present themselves, in Sacred Music, where contrapuntal skill is wanting; for, in this kind of Composition, inventive power will prove of no avail, without an equal amount of constructive power to support it. How is this power to be acquired? At this moment, there is no Master in Europe capable of taking Hauptmann's place, as a teacher of Counterpoint; and, were such a Master to arise among us, it is doubtful whether, in the present state of public feeling, his learning would meet with adequate recognition. This is an evil, the continuance of which no School can survive. If the Oratorio is to rise higher than it has yet done, our next generation

of Composers must take the difficulty into serious consideration, and not affect to think lightly of the only means by which success has hitherto been attained.

Since the downfall of the Polyphonic Schools, the true Church Style—the 'Stilo alla Cappella' of the 16th century—has lain entirely dormant: but, within the last few years, attempts have been made to revive it, both in Germany, in France, and in England. In Germany, the movement was begun in 1853 by Dr. Karl Proske, who printed a large collection of the finest works of the 16th century,[1] and introduced them, with great effect, into the Services of the Cathedral at Regensburg, of which he was Canon, and Kapellmeister. After his death the work was carried on by the 'Cæcilien Verein,' which has done much towards the dissemination of a taste for the productions of the true Polyphonic School, and led to their constant performance in all parts of Germany.

In France, the increased love for Plain Chaunt, which manifested itself, some thirty years ago, in the Dioceses of Paris, Rouen, Rheims, Cambrai, and other parts of the country, has, to a great extent, supplanted the frivolous style of Music once so miserably popular.

In England, the movement began, about thirty-five years ago, with the introduction of Gregorian Tones to the Psalms, at Margaret Street Chapel, S. Paul's, Knightsbridge, S. Barnabas', Pimlico, and some other London Churches, including the Chapel of S. Mark's College, Chelsea. After a time, and mainly through the zeal of the Rev. Thomas Helmore, the taste for this kind of Music spread rapidly; and this taste—assisted, perhaps, by party feeling—soon made 'Gregorians' so popular, that it would be impossible to number the Churches in which they were sung. Unhappily, the present leaders of the movement seem utterly blind to the fact that 'Gregorians' cannot, without entirely losing their distinctive character, be sung with modern Harmonies fit only for the Theatre. The only hope for success lies in the stern prohibition of this vulgar and intolerable abuse; the perpetuation of which would be a far greater evil than an immediate return to the 'Double Chaunt' of fifty years ago.

But, the most interesting question at present is that which concerns the future prospects of the Lyric Drama. We have seen, that Wagner, and Boïto, the leaders of the extreme section of the Neo-Teutonic, and Neo-Italian parties, are in favour of sacrificing everything to dramatic effect; of substituting an elaborate form of Recitative for continuous Melody; of heightening the effect of this by rich and varied Orchestral Accompaniments; and, of supplying the place of regular form by allotting certain special phrases to every character in the Drama.[2] We have seen, that, within a comparatively short space of time, they have almost entirely banished the older forms of Italian and German Opera from the Stage; and, that even Verdi, who once depended wholly upon Melody for his success, has, to a certain extent, adopted their principles.[3] On the other hand, we have seen that a more moderate party, numbering among its ranks some young Composers of acknowledged merit, is neither prepared to sacrifice dramatic truth to musical symmetry, nor musical symmetry to dramatic truth: but is determined to use Melody, Harmony, and Form, as means of enforcing Expression, Action, and the varied demands of scenic propriety—not as hindrances to them; and, in so doing, to work out the main principles adopted by Mozart and Weber, without committing itself to any peculiarities of style, or method, beyond those dictated by the talent or fancy of the writer. There is much hope that these reasonable views may lead to a careful reconsideration of many things, which, in the heat of recent controversy, have been too violently debated on both sides. That a reaction of some kind must take place, sooner or later, seems certain; and it is of immense importance that it should be a temperate one, otherwise it will leave us in greater doubt than ever.

In passing from the future of Dramatic Music to that of Vocal Music generally, we find ourselves face to face with a new difficulty. On every Instrument in use, except the common Slide-Trumpet, we have attained a facility of execution, infinitely in advance of that which prevailed fifty years ago. But, within the same period, our Schools of Vocalisation have sensibly degenerated. Leaving Catalani, Pasta, Sontag, and Jenny Lind out of the question, there is no Theatre in Europe which, at this moment, could bring together such a body of Singers as formed the average Company of Her Majesty's Theatre, under the Lumley management. Where can we hear 'Il Don Giovanni' sung, as it used to be sung, season after season, by Grisi, Persiani, Rubini, Tamburini, and Lablache? There is no such Quintet attainable: not so much from lack of Voices as from lack of method. A good many of us are to blame for this. Our 'Maestri di canto,' in the first instance, of course; and our Singers also. But, are our Composers guiltless? Was there ever a period at which the capabilities of the Voice were so contemptuously disregarded, as they are at this moment? The evil began in Germany. We dare hardly write the name of the giant who originated it; but, if Beethoven's disregard of vocal capabilities has materially hindered—as it most certainly has—the performance of two, at least, of his greatest works, how can men of ordinary genius hope to succeed in spite of it? Time was, when Composers regarded the study of the Voice as indispensable to their education; and surely, the course of study which led to such splendid results, in the cases of Handel, Haydn, Mozart, Cimarosa, and Rossini, must have reacted upon the Singers for whom they wrote, and tended to perpetuate a School of Vocalists capable of doing full justice to their Music. We know that it did so; since it was

[1] See MUSICA DIVINA, vol. ii. p. 411. [2] See LEITMOTIF. [3] See p. 301 b.

not until after Rossini retired from public life, that the degradation of which we complain began. Composers, and performers, who thoroughly understand and sympathise with each other, may accomplish anything: but, what can be expected from a Singer who finds his Voice treated like a Clarinet? It is scarcely worth his while even to try to find out what his Voice can do, and what it cannot.

In summing up the results of our enquiry, we cannot fail to see that a glorious Future lies open before us, if we will only take the pains to work for it. There is a greater amount of activity in the musical world, at this moment, than the longest-lived among us has ever known before; probably more than ever before existed. One remarkable sign of it is to be found in the unceasing demand for the works of the Great Masters, which leads to their continual republication, in every conceivable form, in Germany, in France, and in England. Augener's cheap editions of the Pianoforte Classics; the 8vo Oratorios and Cantatas published by Novello, and R. Cocks; the enormous collection of standard works issued by Litolff, Richault, Peters, etc.; Breitkopf & Härtel's complete editions of Palestrina, Handel, Bach, Mozart, and Beethoven; Michaelis's of the early French Operas—these, and many like collections, all have their tale to tell. If we do not play and sing grand Music, it is not from the difficulty of obtaining copies. And not less remarkable are the additions to our Musical Literature. The publication, in English, of such works as Jahn's 'Life of Mozart,' Holmes's volume on the same subject, Spitta's 'Life of Bach,' Hensel's 'Mendelssohn Family,' and other important treatises on Musical Science and Biography, is very significant.

But this is only one manifestation of energy. Whatever may be our own peculiar views, we must admit that the amount of zeal displayed by Wagner, Richter, von Bülow, and other prominent members of the advanced party, in Germany, is enormous. Brahms, Raff, and Hiller, are all doing something. Liszt is busy, in his own peculiar way; while the chiefs of the rising Dramatic School are equally so, in theirs. Gounod, Saint Saëns, and Delibes, are active in France, and many clever musicians in America. [See UNITED STATES.] We do not say that all this feverish exertion will last. It cannot. Nor is it even desirable that it should. But it is a sign of immense vitality. To go no farther than our own country, the daily life of Art among us is almost incredible. In every Cathedral in England, and many Parish Churches, there are two full Choral Services every day. At Oxford, and still more at Cambridge, the study of Music is enthusiastically prosecuted. Not very long ago, Music was unknown at our Public Schools; now, it is fully recognised at Eton, and Harrow, and many others. Our Provincial Festivals, once brought into notice by Sir George Smart and Prof. E. Taylor, and now spread even to Scotland, are not only more numerous and successful than ever, but are more wisely managed, in every way, and rarely pass without bringing forward some new work, not always of the highest order, but always worth listening to, if only as a sign that some young Composer is trying to do his best. To this must be added, the work done in London, at the two Italian Opera Houses, during the Season, and, in the Winter, by Carl Rosa's spirited Company; the enormous amount of Orchestral and Choral Music presented to the public by the Philharmonic, the New Philharmonic, the Crystal Palace Concerts, the Sacred Harmonic Society, the Bach Choir, and the Richter Concerts; the Performances directed by Barnby, and Henry Leslie; the Musical Union, which, under Ella's direction, first introduced to London in 1845 that most instructive key to the better understanding of our Classical Concerts, the 'Analytical Programme,' and has since given a hearty welcome to all the best Continental Virtuosi who have visited this country; and the perfect Chamber Music at the Monday and Saturday Popular Concerts, Chas. Halle's Recitals, and Dannreuther's Musical Evenings. Nor do our rulers grudge the money necessary for the encouragement of Music among those who are unable to provide the luxury for themselves. We do not say that the money voted by Parliament for this purpose is so well spent as it might be. That the grant is strangely misapplied there can be no doubt. But, these are not days in which confusion of any kind can be long continued. The matter must, and most certainly will, be carefully considered; and the grant so used as to ensure the utmost amount of good fruit that can be extracted from it. Meanwhile, the fact remains, that, whether the result of the expenditure be satisfactory, or not, the astounding sum of £130,000 is annually voted by Government, for the purpose of elementary musical education; and the time surely cannot be far distant, when it will be so applied as to produce a proportionate result. The reports on the state of Music, in England, and on the Continent, drawn up by Dr. Hullah, for the Education Department, show the great interest with which the subject is regarded by those who have it in their power to exert a lasting influence upon the time to come. Lastly, a more hopeful sign of life than any we have mentioned is to be found in the proposal for a Royal College of Music. Discussed, then dropped, resumed, dropped again, but always advancing a little nearer to maturity, the scheme has now, for some considerable time, attracted the attention of lovers of Art, who are thoroughly in earnest in their devotion to its interests; and, at last, there seems good hope of bringing the discussion to a successful issue. The late great meeting at Manchester, in which three members of the Royal Family took so prominent a part, has done much towards the attainment of this end. In fact, should the scheme be put into execution, on a suitable scale, as there is every reason to hope it will, our English School will maintain itself, in such sort as not only to do credit to its early ancestry, but to bring forward a later generation capable of

winning for it a more honourable name than it has ever yet boasted.

But, the greater our privileges, the greater our responsibilities, and the more arduous our duties. We must first work for our College, in order that our School may have a worthy home. Having secured that, we must work for our School; and our School must work for Art. It is here that the difficulty lies; not only in England, but in every School in Europe. If the actual work accomplished, during the last thirty years, bore any reasonable proportion to the zeal and activity displayed, we should indeed have good cause for present thankfulness, and hope for the time to come. But it does not. In spite of all that has been done—and we have not been slow to acknowledge the value of this—a million times more has been left undone. We have been too easily tempted to mistake activity for progress, and zeal for honest labour: too readily beguiled by the mad desire to rush into print, into the Orchestra, the Theatre, the Cathedral itself, when we ought to have known that our proper place was in the school-room. To remedy this misguided enthusiasm, we need a centre of study, governed by a body of Professors possessing sufficient experience to justify our fullest confidence, and sufficient learning to give it an authority to which the rising generation may bow without endangering its own independence. This point is of immense importance. At the present moment, we have no Court of Appeal, in the competency of which our younger Composers feel any confidence whatever. It is indispensable that we should establish such a Court, in order that we may centralise both the ripe experience and the rising talent of the country; thus using the one as a means of indefinitely increasing the value and efficiency of the other. With such a *point d'appui*, there is no reason why England should not take the lead, and keep it. If, when our College is established, on a firm and reasonable basis, its Professors will consistently inculcate the superiority of law to anarchy; of reverence to conceit; of common-sense to dreams, and fogs, and rhapsodies *à tue tête*; there is nothing to prevent it from satisfactorily working out the problem on which the Art-life of the forthcoming twenty years depends, for its triumph or its downfall. We have shown that, if the experience of the Past be worth anything at all, there are but two Paths by which the glories of the Future can be reached. Now it is certain that no sign of a new path has as yet been vouchsafed to us. It may be discovered, any day; but it has not been discovered, yet: and, as we have maintained throughout, the boldest attempt hitherto made to discover it has only led back to a very old path indeed.[1] For the present, therefore, our chief hope lies in going onwards: and, surely, should we succeed in founding the Institution in question, we ought to do something in this direction! We have greater facilities for study than ever before were placed within the reach of the happiest neophyte; so clear an insight into the history of the Past, that the experience of centuries is open to every one of us; so vast a collection of examples, in every style, that the poorest of us may buy, for a few shillings, works which our fathers were thankful to copy out, for themselves, when they could get the chance. In return for all this, one thing only is required of us—hard study. The study of History—that we may learn what led to success, in times past, and what did not. The study of Counterpoint—that we may be able to write, in the language of Art, and not in a *patois* fit only for a rustic merry-making. The study of Form—that we may learn how to present our ideas in intelligible sequence, and to emulate, in so doing, the conciseness of true logicians. The study of Style—that we may not only learn to distinguish works of one School from those of another, but may be able, also, to seize upon that which is good, wheresoever it may present itself to our notice, while we reject that which is evil. We need entertain no fear for the Future, so long as these things are conscientiously studied by those who are destined to be its leaders. But if, in the absence of such studies, the work which ought to be done by the intellect be entrusted to the ear—in accordance with a vicious practice, which, defended by a still more vicious theory, seems to be daily gaining ground—no reasonable hope will be left to us. And, in that case, it would be infinitely to our advantage that Composers should cease to produce anything at all, and leave us to subsist upon the heirlooms which have, from time to time, been handed down to us by our forefathers, until some new and worthy manifestation shall declare itself. The Great Masters have left us quite enough to live upon: but, we cannot live upon the produce of a School of Mediocrity. [W.S.R.]

[1] See vol. ii. p. 527.

SCHOTT, ANTON, born June 25, 1846, at Staufeneck in Suabia, was educated at the military academy at Ludwigsburg, Würtemberg, and served as an artillery officer through the war of 1866. Some time after, his voice attracted the attention of Pischek, and of the wife of Professor David Strauss, well known in Germany before her marriage as Agnes Schebest, a singer of note, from the latter of whom he had much instruction preparatory to his appearance on the stage. On May 8, 1870, Herr Schott made his début at Frankfort, as Max in 'Der Freischütz,' with such success that he determined to abandon the army in favour of music, though prevented for a time by the outbreak of the war of 1870, through which he served and obtained his captaincy. At the close of the war he left the army and appeared at the opera in Berlin, Schwerin, and Hanover, where he is now engaged. He has also played in Vienna and elsewhere in Germany and Austria, with great success. He sang in England, June 16, 1879, at a piano recital given by Dr. von Bülow at St. James's Hall, at a second recital, and at a New Philharmonic concert, in all which he was well received. He appeared Jan. 10, 1880, at Her Majesty's Theatre (Carl Rosa), as Rienzi, and afterwards as Lohengrin; but though his

appearance and voice are both magnificent, his singing had hardly the success which might have been expected from his reputation in Germany. There he is regarded as one of the best operatic tenors of the day, especially in 'heroic parts'; his répertoire is large, and consists, besides those mentioned, of Tannhäuser, John of Leyden, Raoul, Robert, Vasco di Gama, Manrico, Masaniello, Ferdinand Cortez, and Benvenuto Cellini —the last on its production at Hanover under Dr. Hans von Bülow. More recently he has studied further with Professor Blume, and on Feb. 8, 1881, created the part of Azim in Stanford's 'Veiled Prophet of Khorassan,' on its production at Hanover. [A.C.]

SCHOTT (B. SCHOTT'S SÖHNE), the well-known firm of music-publishers at Mayence. This business, the largest of the kind except Breitkopf & Härtel's, was founded in 1773 by BERNHARD SCHOTT, and carried on after his death in 1817 by his sons ANDREAS (born 1781, died 1840), and JOHANN JOSEPH (born 1782, died 1855), who in the early part of this century set up a house of their own at Antwerp (afterwards removed to Brussels) which gave them an advantage both in suppressing pirated editions, and in dealing with the French and Italian composers then in vogue. In 1838 they founded a branch in London, superintended by a third brother, ADAM, and conducted with great success since 1849 by J. B. Wolf (born 1815, died 1881). Another branch in Paris soon followed. PETER, a younger brother of FRANZ PHILIPP, and grandson of Bernhard, lived in Brussels and managed the business of the branches there and in Paris, forwarding at the same time the circulation of the Mayence publications. Besides these four independent houses the firm has depôts in Leipzig, Rotterdam, and New York. FRANZ PHILIPP (born 1811), grandson of Bernhard, took part in the business from 1825, and managed it after the death of his father Andreas, first in partnership with his uncle Johann Joseph, and after his death by himself. Since his death in Milan in 1874 the business has been carried on with the old traditions by PETER SCHOTT (a son of the Brussels Peter), FRANZ VON LANDWEHR (a nephew of the family), and DR. L. STRECKER. The Schotts have for long been music-publishers to the court.

At a time when the book and music trade was regulated by no fixed laws, the correct and elegant editions of Mayence found a ready entrance into foreign countries, and the firm was thus stimulated to keep ahead of rivals by making constant improvements in music-printing and engraving. They were the first to use lithography for this purpose, an important turning-point in the printing of music. Their copyright publications now amount to over 23,000, including Beethoven's latest quartets, 9th Symphony, and Mass in D, nearly all the operas of Donizetti, Rossini, Adam, and Auber, most of Rink's organ-music, and, to come to later times, Wagner's 'Meistersinger' and 'Ring des Nibelungen.' The establishment has been enlarged by the addition of a printing-office (where have been printed, among others, Gottfried Weber's theoretical works, the periodical 'Cäcilia,' 1824-1848, etc.) and in 1829 of a piano-factory, which however was given up in 1860 on account of the extension of the main business.

The Schotts, besides innumerable services to art and artists, have done good work in a smaller circle by fostering music in Mayence itself. Franz and his wife Betty (*née* Braunrasch, born 1820, died 1875) left a considerable sum for the maintenance of a permanent orchestra and conductor of eminence, in order that Mayence might hold its own in music with the richer cities of the Rhine provinces. [C.F.P.]

SCHOTTISCHE ('The Scotch dance'), a round dance very similar to the polka. It must not be confounded with the Ecossaise, which was a country dance of Scotch origin introduced into France towards the end of the last century. The Schottische was first danced in England in 1848, when it was also known as the German Polka. It does not seem to have been danced in Paris, as Cellarius (La Danse des Salons, Paris 1847) does not include it amongst the dances he describes. The music is almost the same as that of the polka, but should be played rather slower. The following is the tune to which it was originally danced in England.

[W.B.S.]

SCHRÖDER-DEVRIENT, WILHELMINE, a highly-gifted dramatic singer, was born at Hamburg, December 1804.[1] Her father, Friedrich Schröder—who died in 1818—had been an excellent baritone singer, a favourite in many operas, especially in Mozart's 'Don Juan,' which he was the first to act in German. Her mother was Antoinette Sophie Bürger, a celebrated actress, sometimes called 'die grosse Schröder' and 'the German Siddons.'

Wilhelmine was the eldest of four children. She enjoyed great advantages of training; dancing lessons, and public appearances in ballets in early childhood, helped her to mastery of attitude and elasticity of movement; afterwards, when her parents' wanderings led them to Vienna, she took such parts as Ophelia, and Aricia (Schiller's 'Phädra'), at the Hofburgtheater, receiving careful instruction in gesture and delivery

[1] According to her own account, as quoted in Glümer's 'Erinnerungen,' and not in October 1805, as stated by Fétis.

from her mother, who afterwards superintended her study of operatic parts.

Thus there was no trace of the débutante, when, in 1821, Wilhelmine made a brilliant first appearance at the Vienna opera-house in 'Die Zauberflöte.' The freshness of her well-developed soprano, her purity of intonation and certainty of attack, astonished the public. 'It was as if a singer had fallen from the clouds.' Other early triumphs were Emmeline (Weigl's 'Schweizerfamilie'), where the representation was described as 'masterly, ideal and full of truth; in dress and bearing idyllically picturesque'; Marie (Grétry's 'Barbe bleu'[1]), where she showed herself worthy of all praise 'as well in singing as in acting, especially in parts demanding passionate expression.' As Agathe (Der Freischütz) her glorious voice and charming appearance won great approval, not only from the public 'who already loved her,' but from Weber, who presided over the performance at Vienna, March 7, 1822. But her great achievement was the creation of the part of Leonore, on the revival of 'Fidelio' at Vienna later in the year. Hitherto connoisseurs had failed to discover the merits of Beethoven's opera. Mdlle. Schröder's impersonation of the heroine, besides laying the foundation of her own fame, redeemed the music from the imputation of coldness, won for the work the praise so long withheld, and achieved its ultimate popularity by repeated performances in Germany, London, and Paris. The story of her first appearance in the part has often been quoted from Glümer's 'Erinnerungen an Wilhelmine Schröder Devrient.' Beethoven was present at the performance. 'He sat behind the conductor, and had wrapped himself so closely in the folds of his cloak than only his eyes could be seen flashing from it.' Schröder's natural anxiety only heightened the effect of her play. A breathless stillness filled the house until Leonore fell into the arms of her husband, when a storm of applause broke out which seemed unceasing. To Beethoven also had his Leonore been revealed in the glowing life of Schröder's representation. He smilingly patted her cheek, thanked her, and promised to write an opera for her. Would that he had!

In 1823 she went to Dresden to fulfil a contract to sing at the Court Theatre for two years, at a salary of 2000 thalers. (At a later period she received 4000 thalers at the same house, for her connection with Dresden never entirely ceased as long as she was on the stage.) She married Karl Devrient, an excellent actor whom she met in Berlin during an engagement there that year. Four children were born, but the marriage was not a happy one, and was dissolved in 1828. During the next eight years she delighted her audiences by her appearance in the great classical characters which ever remained her most successful parts. In Weber's operas, as Preciosa, Euryanthe and Reiza, she is said to have thrown a new light over both story and music, gradually heightening the interest of the work until a torrent of inspiration carried all before it. In Spontini's 'Vestale,' she was the very personification of the spirit of the antique. Yet no less did she succeed, in Paer's comic opera, 'Sargino' in singing with so much finish, and acting with so much humour, that it became a matter of dispute whether tragedy or comedy was her forte.

In 1820 she passed through Weimar and sang to Goethe on her way to Paris to join Röckel's German company. With an exalted sense of the importance of her mission, she wrote: 'I had to think not only of my own reputation, but to establish German music, *My* failure would have been injurious to the music of Beethoven, Mozart and Weber.' This date was an epoch in the history of music in Paris. Bouquets—then an extraordinary manifestation of approval—were showered upon the triumphant singer. In her subsequent visits to Paris, 1831 and 32, she sang in Italian opera.

In 1832, Schröder-Devrient was heard at the King's Theatre in London, engaging with Mr. Monck Mason to sing ten times monthly during May, June and July, for £800 and a benefit. Chelard was conductor. 'Fidelio,' 'Don Juan,' and Chelard's 'Macbeth' were repeatedly given, but Chorley ('Musical Recollections') says, 'Fidelio was the solitary success of a disastrous enterprise.... The sensation is not to be forgotten. The Italians (not very strong that year), were beaten out of the field by the Germans. The intense musical vigour of Beethoven's opera was felt to be a startling variety, wrought out as it was in its principal part by a vocalist of a class entirely new to England. This was Madame Schröder-Devrient. Within the conditions of her own school she was a remarkable artist..... She was a pale woman; her face, a thoroughly German one, though plain, was pleasing, from the intensity of expression which her large features and deep tender eyes conveyed. She had profuse fair hair, the value of which she thoroughly understood, delighting, in moments of great emotion, to fling it loose with the wild vehemence of a Mænad. Her figure was superb though full, and she rejoiced in its display. Her voice was a strong soprano, not comparable in quality to some other German voices of its class..... but with an inherent expressiveness of tone which made it more attractive on the stage than many a more faultless organ..... Her tones were delivered without any care, save to give them due force. Her execution was bad and heavy. There was an air of strain and spasm throughout her performance.'

The 'Queen of Tears' (so she was styled) was heard next season in 'Der Freischütz,' 'Die Zauberflöte,' 'Euryanthe,' and 'Otello.' The engagement was to sing for Mr. Bunn at Covent Garden twenty-four times at £40 a night, and once for the benefit of the speculators. However, all London was under the spell of Taglioni and of Fanny Elsler. Malibran in the English opera; Pasta, Cinti-Damoreau, Rubini, and Tamburini, in the Italian opera, sang to empty houses. Again in 1837, after Malibran's death, Mr. Bunn

[1] 'Raoul Barbe bleu' (1789), Germanized into 'Raoul der Blaubart.'

engaged Schröder-Devrient at a double salary. 'Fidelio,' 'La Sonnambula' and 'Norma' were performed in English. She broke down in health before the season was over. It is said that Bunn forced himself into her sick-room one night, to insist on her showing herself in character upon the stage for one moment, to enable him to put off the performance 'on account of the sudden indisposition of the singer'—and yet keep the entrance money. After a rest, too short to be beneficial, she resumed her work, and was carried home insensible from the theatre. She was able however to give a farewell performance of 'Fidelio,' with the last act of the 'Montecchi e Capuletti,' and then discovered that Mr. Bunn had declared himself bankrupt and could pay her nothing. In his book, 'The Stage both before and behind the Curtain,' Mr. Bunn complains of the singer's attempts at extortion; says that she demanded the fourth part of the proceeds of each night, but on this sum proving to fall short of the fixed salary, asked for £100.

From 1837 a gradual decline in power was observed in Madame Schröder-Devrient, though she continued to delight her audiences all over Germany in the parts she had identified herself with. Of Wagner's operas she only appeared in 'Rienzi,' as Adriano Colonna, in 'Der fliegende Holländer,' as Senta, and in 'Tannhäuser,' as Venus. His later dramas would have been a fitting field for her dramatic genius. Gluck's masterpieces were among her latest studies. Her last appearance in Dresden was in his 'Iphigenie in Aulis,' in 1847; her last appearance on any stage took place at Riga, where she played Romeo. Her concert singing was greatly admired, and one of the liveliest passages in Mendelssohn's letters[1] describes the *furore* caused by her impromptu execution of 'Adelaide' in her ordinary travelling dress at the Gewandhaus Concert of Feb. 11, 1841.

Madame Schröder-Devrient had made a second marriage with Herr von Döring, a worthless person, who immediately seized upon his wife's earnings and pension, and left her almost destitute, to recover what she could in a long lawsuit. The marriage was dissolved at her wish. In 1850 she again married Herr von Bock, a man of culture, who took her to his property in Livonia. The union promised great happiness, and Madame von Bock entered with ardour on her new duties. But she found herself unfitted for a quiet country life, and sought relief in travelling. Passing through Dresden, she was arrested on account of the sympathy she had shown with the revolution of 1848. An examination in Berlin resulted in her being forbidden to return to Saxony; in the meantime she was exiled from Russia. Her husband's exertions and sacrifices secured a reversal of this sentence. In 1856 she visited some German towns, singing Lieder in public concerts. Her interpretations of Beethoven's 'Adelaide' and of Schubert's and Schumann's songs were immensely admired, though by some thought too dramatic. When at Leipzig her strength succumbed to a painful illness. She was devotedly nursed by a sister and a friend at Coburg, and died Jan. 21, 1860.

Schröder-Devrient's voice, even in her best days, was of no extraordinary compass, but, to the last, the tones of the middle notes were of exceptionally fine quality. Mazatti's teaching, with further instruction from Radichi and from Miksch (the Dresden Chorus-master), had not been sufficient training for the young girl, who had besides been disinclined to the drudgery of scale-singing. The neglect of system and of careful vocal exercise resulted in faulty execution and too early loss of the high notes. This might have been less observable had she kept to such simple rôles as Pamina and Agathe. But there seemed a discrepancy between the delicate organization of her voice and the passionate energy of her temperament. By force of will she accomplished more than was warranted by her natural powers. 'A portion of her life was exhausted in every song.' As a musical instrument the voice was not under her command; as a vehicle of expression it was completely so. It was the dramatic genius of this artist which won for her an European reputation. She infused a terrible earnestness[2] into the more pathetic impersonations, while an almost unerring instinct of artistic fitness, combined with a conscientious study of the parts, secured a perfection of performance which reached every detail of bye-play. It could be said of her that she never ceased learning, for she toiled at her art to the end. She once wrote as follows: 'Art is an eternal race, and the artist is destroyed for art as soon as he entertains the delusion that he is at the goal. It were certainly comfortable to lay down the task with the costume, and let it rest until its turn comes round again in the répertoire. I have never been able to do this. How often, when the public have shouted approval and showered bouquets on me, have I retired in confusion, asking myself: "Wilhelmine, what have you been about again?"—then there would be no peace for me, but brooding the livelong days and nights until I had hit upon something better.'

Her good faith and earnestness led her to condemn a fellow-actress for disrespect to her art when she carelessly threw down behind the scenes a handkerchief which had served on the stage as a Signal of Love. Schröder-Devrient's play generally inspired others with her own spirit. On one occasion it moved a Bluebeard to forget the ordinary artifice used in dragging his Marie off the stage, and to take her literally by the hair. 'Almost unconscious with pain and covered with blood, the artist endured this torture rather than spoil the effect of the tableau.'

[1] Letter, Feb. 14, 1841.

[2] Sometimes perhaps a trifle too much, as indeed Mendelssohn hints in the sequel of the passage quoted above. Even in the Concert-room this was so. 'The old *Declamatrice*,' writes Mendelssohn, on Nov. 28, 1842, 'thoroughly delighted us all by the great strength and vigour of her voice and her whole style.'

It was easier for her to forgive an injury arising thus from excess of feeling, than to tolerate the inadequate support of a first tenor, 'half sponge, half wood'; or to allow the sleepy play of a prima donna to go unpunished: as when, in Romeo, she was guilty of tickling the feet of a too unemotional Giulietta, during the caresses of the last scene of Bellini's opera. (See also Moscheles' Life, i. 270.) An audience of 'lederne Seelen' was her abhorrence, and the ignorance of fashionable London forty years ago tried her sorely. (Ib. 263.)

In his 'Modern German Music,' Chorley enters upon an analysis of some of Madame Schröder-Devrient's parts. He and Berlioz (the latter in letters to the Journal des Débats, 1843) concur in condemning the mannerisms which grew upon her as time went on. Rellstab has devoted an article to her ('Ges. Schriften,' ix.). A. von Wolzogen's 'Wilh. Schroeder-Devrient' (Leipzig, 1863) is the best life, and gives a circumstantial, impartial, and interesting account; while Wagner's 'Ueber Schauspieler und Sänger' eulogises her depth of feeling and power of interpretation. [L. M. M.]

SCHROETER, Christoph Gottlieb, born at Hohenstein, Saxony, Aug. 10, 1699, long enjoyed in Germany the honour of having invented the pianoforte. His claims, first published by himself in Mitzler's 'Musikalische Bibliothek' (Leipzig, 1738) and repeated in Marpurg's 'Kritische Briefe' (Berlin, 1764) have been examined and set aside in favour of Cristofori. [See Pianoforte, vol. ii. p. 712.] We learn from Schroeter's autobiography that at seven years of age he was placed as a chorister at Dresden, under Kapellmeister Schmidt, and that Graun was his companion. The clavichord early became his greatest pleasure. When he lost his voice he entered the Kreuz-schule to study thorough-bass, that is, accompaniment as then practised, and learned to quill and tune harpsichords, which led him to the monochord and systems of temperament. On the wish of his mother that he should study theology, he went to Leipzig for that purpose in 1717, but after her death resumed music, returned to Dresden, and was accepted by Lotti to copy for him, and write his middle parts. It was at this time that he endeavoured to combine the characteristics of the harpsichord and clavichord, by inventing two hammer actions, the models of which he deposited at the Saxon Court in 1721; but immediately afterwards he left Dresden, taking service with a Baron whom he does not name, to travel in Germany, Holland, and England. In 1724 he went to the University of Jena and began writing upon musical subjects; in 1726 he took the organist's place at Minden, removing in 1732 to Nordhausen, where he remained until his death in 1782. A complete list of his numerous writings is to be found in Gerber's Lexicon der Tonkünstler (Leipzig, 1792), ii. 454–5. [A. J. H.]

SCHROETER, Johann Samuel, an esteemed pianoforte-player and composer for that instrument, was born in 1750 of German parents at Warsaw, where his father, Johann Friedric was oboist in the royal orchestra. About 17 he accompanied his father and sister to Leipzi and sang there in the Gewandhaus Concert On the breaking of his voice he devoted himse entirely to the piano, and travelled with h father, brother and sister, performing as the went, through Holland to London. There the made their *début* in the concerts of Bach an Abel at the Thatched House, St. James's Stree May 2, 1772, Schroeter playing a concerto o the 'Forte Piano,' which J. Christian Bach ha first performed in 1767, the brother John Hen on the violin, and the sister, Corona, afterward a celebrated vocalist, singing. Burney (in Rees' Cyclopædia) says that 'he may be said to hav been the first who brought into England th true art of treating that instrument.' Afte J. C. Bach's death in 1782, he succeeded hin as music-master to the Queen. 'Six Sonata for the harpsichord or piano forte' are an nounced by W. Napier in the 'Public Adver tiser' in 1776 as his op. 1. This was followed in 1778 by op. 3, 'Six Concertos with an accom paniment for 2 violins and a bass'; and this again by op. 5 (Berlin), op. 6 (Paris), op. 2, six trios (Amsterdam), op. 9 two ditto (Do.). The 'A B C Dario' (p. 144) says of him, 'He has composed the harpsichord parts of some concertos; the accompaniments are by Bach; they are neither new nor very striking. He plays in an elegant and masterly style; his cadences are well imagined, and if his *penchant* was not rather to play rapidly than *al core*, he would excel on the pianoforte.' Burney, on the other hand (in Rees), says, 'He became one of the neatest and most expressive players of his time, and his style of composition, highly polished, resembles that of Abel more than any other. It was graceful and in good taste, but so chaste as sometimes to seem deficient in fire and invention.' He did not remain long before the public in consequence of his marriage with one of his pupils, a young lady of birth and fortune, after which he played only at the concerts of the Prince of Wales and a few others of the nobility. He died Nov. 2, 1788, in his own house at Pimlico, having lost his voice some years before by a severe cold. His marriage was a clandestine one, and brought him into collision with his wife's family, the result of which was his surrendering all his rights for an annuity of £500. She is the lady who took lessons from Haydn during his residence in London, and fell violently in love with him. Haydn spoke of her many years after as a very attractive woman, and still handsome, though over sixty; 'had I been free,' said the patriarch, 'I should certainly have married her'—she was then a widow. He dedicated to her three clavier trios (B. & H., Nos. 1, 2, 6). [See vol. i. p. 711.] [C.F.P.]

SCHUBART, Christian Friedrich Daniel, born at Obersontheim in Suabia, Nov. 22, 1743, and brought up, not as a musician, at Nördlingen, Nuremberg, and Erlangen. In 1768 we find him as organist at Ludwigsburg. His life

seems to have been a very wild and irregular one, but he must have been a man of great talent and energy to justify the eulogies on him so frequent in the early volumes of the Allg. musikalische Zeitung of Leipzig (see ii. 78, 98, etc.), and the constant references of Otto Jahn in his Life of Mozart. He lived in Mannheim, Munich, Augsburg, and Ulm; was more than once in confinement for his misdeeds, and at length was imprisoned from 1777 to 1787 at Hohenasperg. He died shortly after his release, Oct. 10, 1797. His compositions are few and unimportant. A work of his on musical æsthetics, 'Ideen zu einer Aesthetik der Tonkust,' was published after his death by his son Ludwig (Vienna, 1806). From the notices of it in the A. M. Z. (viii. 801, xiii. 53, etc.) and Jahn's citations, it appears to be partly a dissertation on the styles, abilities, and characteristics of great musicians and artists. It also contains some fanciful descriptions of the various keys, which Schumann notices (Ges. Schriften, i. 180) only to condemn. But Schubart will always be known as the author of the words of one of F. Schubert's most favourite songs—'Die Forelle' (op. 32). The words of 'An den Tod' and 'Grablied auf einen Soldaten' are also his. His son further published 2 vols. of his 'Vermischte Schriften' (Zürich, 1812). [G.]

SCHUBERT,[1] Franz Peter, the one great composer native to Vienna, was born Jan. 31, 1797, in the district called Lichtenthal, at the house which is now[2] numbered 54 of the Nussdorfer Strasse, on the right, going out from Vienna. There is now a gray marble tablet over the door, with the words 'Franz Schuberts Geburtshaus' in the centre; on the left side a lyre crowned with a star, and on the right a chaplet of leaves containing the words, '31 Jänner 1797.' He came of a country stock, originally belonging to Zukmantel in Austrian Silesia. His father, Franz, the son of a peasant at Neudorf in Moravia, was born about 1764, studied in Vienna, and in 1784 became assistant to his brother, who kept a school in the Leopoldstadt. His ability and integrity raised him in 1786 to be parish schoolmaster in the parish of the 'Twelve holy helpers' in the Lichtenthal, a post which he kept till 1817 or 18, when he was appointed to the parish school in the adjoining district of the Rossau, and there he remained till his death, July 9, 1830. He married early, while still helping his brother, probably in 1783, Elisabeth Vitz, or Fitz, a Silesian, who was in service in Vienna, and was, like Beethoven's mother, a cook. Their first child, Ignaz, was born in 1784. Then came a long gap, possibly filled by children who died in infancy—of which they lost nine in all; then, Oct. 19, 1794, another boy, Ferdinand; then in 96, Karl, then Franz, and lastly, a daughter, Theresia, Sept. 17, 1801, who died Aug. 7, 1878. The hard-worked mother of these 14 children lived till 1812. Soon after her death her husband was married again, to Anna Klayenbök, a Viennese, and had a second family of 5 children, of whom 3 grew up, viz. Josefa (+1861), Andreas, an accountant in one of the public offices, and Anton, a Benedictine priest, 'Father [3] Hermann'—the last two still living (1881).

Ignaz and Ferdinand followed their father's calling, and inherited with it the integrity, frugality, and modesty, which had gained him such respect. Of the former we do not hear much; the one letter by him that is preserved (Oct. 12, 1818), shows him very free-thinking, very tired of schoolmastering, very much attached to his home and his brother.[4] He remained at the Rossau school till his death in 1844. Ferdinand, on the other hand, rose to be director of the chief normal school of St. Anna in Vienna, and played a considerable part in the life of his celebrated brother, by whom he was fondly loved, to whom he was deeply attached, and whose eyes it was given to him to close in death.

Little Franz was no doubt well grounded by his father, and to that early training probably owed the methodical habit which stuck to him more or less closely through life, of dating his pieces, a practice which makes the investigation of them doubly interesting.[5] As schoolmasters the father and his two eldest sons were all more or less musical. Ignaz and Ferdinand had learned the violin with other rudiments from the father, and Franz was also taught it by him in his turn, and the 'clavier' (*i. e.* probably the pianoforte—for Beethoven's op. 31 was published before Schubert had passed his 6th year) by Ignaz, who was twelve years his senior. But his high vocation quickly revealed itself; he soon outstripped these simple teachers, and was put under Michael Holzer, the choirmaster of the parish, for both violin and piano, as well as for singing, the organ, and thorough bass. On this good man, who long outlived him, he made a deep impression. 'When I wished to teach him anything fresh,' he would say, 'he always knew it already. I have often listened to him in astonishment.'[6] Holzer would give him subjects to extemporise upon,

[1] The following abbreviations are used in the notes to this article:—
K.H. = Kreissle von Hellborn. The first reference to the German edition; the second, in brackets, to Coleridge's translation.
Ferd. = Ferdinand Schubert, in his biographical sketch in Schumann's Neue Zeitschrift für die Musik, x. p. 129, etc.
A.M.Z. = Allgemeine Musikalische Zeitung.
N.Z.M. = Neue Zeitschritt für Musik.
W.Z.K. = Wiener Zeitschrift für Kunst, etc.

[2] The Nussdorfer Strasse runs north and south. At the time of Schubert's birth it was called 'Auf dem Himmelpfortgrund,' and the house was No. 72. The 'Himmelpfortgrund' itself (the 'gate of heaven') was a short street running out of it westwards towards the fortifications—the same which is now the 'Säulengasse.' The present Schubertgasse did not then exist beyond the opening into the main street. I find all this on a large map of the date in the British Museum.

[3] Author of a sermon on the 1400th anniversary of the birth of St. Benedict (Vienna, 1880), in which he is styled 'Capitularpriester des Stiftes Schotten; Curat und Prediger an der Stiftspfarre; Besitzer des gold. Verdienstkreuzes m. d. Krone.'

[4] K.H. 146 (i. 149).

[5] His usual practice was to write the title of the piece, the date, and his name, '*Frz Schubert Mpia*,' at the head of the first page, on beginning to compose. In his earlier years he added the full date of completion at the end, even when it was the same day. See nos. 1, 2, and 5 of the '6 Lieder' (Müller)—all three belonging to 1813, as given in Nottebohm's Catalogue, p. 243. Sometimes he has dated each movement, as in the String Quartet in B♭ (op. 168), described under 1814. With 1815, however, this minute dating in great measure ceases, and as a rule we find the year or at most the month stated.

[6] N.Z.M.

and then his joy would know no bounds, and he would cry 'the lad has got harmony at his fingers' ends.'[1] Such astonishment was natural enough, but it would have been far better if he had taught him counterpoint. Ignaz too—and an elder brother is not always a lenient judge of his junior—bears similar testimony. 'I was much astonished,' says he, 'when after a few months he told me that he had no more need of any help from me, but would go on by himself; and indeed I soon had to acknowledge that he had far surpassed me, beyond hope of competition.'

Before he became eleven he was first soprano in the Lichtenthal choir, noted for the beauty for his voice and the appropriateness of his expression. He played the violin solos when they occurred in the service, and at home composed little songs, and pieces for strings or for PF. For a child so gifted, of people in the position of the Schuberts, the next step was naturally the Imperial *Convict*, or school[2] for educating the choristers for the Court-chapel; and to the *Convict* accordingly Franz was sent in Oct. 1808, when 11 years and 8 months old. He went up with a batch of other boys, who, while waiting, made themselves merry over his gray suit, calling him a miller, and otherwise cracking jokes. But the laugh soon ceased when the 'miller' came under the examiners, the Court-capellmeisters Salieri and Eybler, and Korner the singing-master. He sang the trial-pieces in such a style that he was at once received, and henceforth the gray frock was exchanged for the gold-laced uniform of the imperial choristers. The music in the *Convict* had been a good deal dropt in consequence of the war, but after the signing of the treaty of peace, Oct. 14, 1809, it regained its old footing, and then Franz soon took his right place in the music-school. There was an orchestra formed from the boys, which practised daily symphonies and overtures of Haydn, Mozart, Krommer, Kozeluch, Méhul, Cherubini, etc., and occasionally Beethoven. Here his home practice put him on a level with older boys than himself. The leader of the band, behind whom he sat, several years his senior, turned round the first day to see who it was that was playing so cleverly, and found it to be 'a small boy in spectacles named Franz Schubert.'[3] The big fellow's name was Spaun, and he soon became intimate with his little neighbour. Franz was extremely sensitive, and one day admitted to his friend, very confused and blushing deeply, that he had already composed much; that indeed he could not help it, and should do it every day if he could afford to get music-paper. Spaun saw the state of matters, and took care that music-paper should be forthcoming; for which and other kindnesses his name will be long remembered. Franz in time became first violin, and when Ruzicka, the regular conductor, was absent, he took his place. The orchestral music must have been a great delight to him, but we only hear that he preferred Kozeluch to Krommer, and that his particular favourites were some adagios of Haydn's, Mozart's G minor Symphony, in which he said 'you could hear the angels singing,' and the overtures to Figaro and the Zauberflöte. It is also evident from his earliest symphonies that the overture to Prometheus had made its mark on his mind. On Sundays and holidays he went home, and then the great delight of the family was to play quartets, his own or those of other writers, in which the father took the cello, Ferdinand and Ignaz the first and second violins, and Franz the viola, as Mozart did before him, and Mendelssohn after him. The father would now and then make a mistake; on the first occasion Franz took no notice, but if it recurred he would say with a smile, in a timid way, 'Herr Vater, something must be wrong there.'

From a very early date Beethoven was an object of his deepest reverence. Shortly before he entered the School the boys' orchestra had been taken to Schönbrunn for a performance in Beethoven's presence, and Franz was never tired of hearing the details of the story from those who were there. A few months later, after some of his boyish songs to Klopstock's words had been sung, he asked a friend if it was possible that he himself ever would do anything; and on the friend replying that he could already do a great deal, answered, 'Perhaps: I sometimes have dreams of that sort; but who can do anything after Beethoven?'[4] With this feeling it is doubly strange that his juvenile works should show so few traces of Beethoven's direct influence.

The instruction in the *Convict* was by no means only musical. There was a Curator, a Director (Rev. Innocenz Lang), a Sub-director, an Inspector, a staff of preachers and catechists; and there were teachers of mathematics, history and geography, poetry, writing, drawing, French, and Italian.[5] In fact it was a school, apart from its music department. Franz of course took his part in all this instruction, and for the first year is said to have acquitted himself with credit, but his reputation in the school fell off as it increased in the musical department. The extraordinary thirst for composition, which is so remarkable throughout his life, began to assert itself at this time, and appears to have been limited only by his power of obtaining paper; and it not unnaturally interfered with his general lessons. His first pianoforte piece of any dimensions, and apparently his earliest existing composition, was a 4-hand phantasia, containing more than a dozen movements, all of different characters, and occupying 32 pages of very small writing. It is dated 8 April—1 May 1810, and was followed by two smaller ones.[6] His brother remarks that not one of the three ends in the key

[3] From a sketch by von Köchel, entitled 'Nachruf an Joseph von Spaun,' Vienna (privately printed), 1866. I owe the sight of this to my excellent friend Mr. Pohl.

[4] See K.H. 258 (i. 260).

[5] See the list of names in K.H. 13 (i. 13).

[6] Ferd. p. 133. Reissmann (p. 7) gives the inscriptions—'Den 8. April angefangen. Den 1. May vollbracht. 1810.'

in which it began. The next is a long vocal piece for voice and PF., called 'Hagars Klage'—Hagar's lament over her dying son—dated March 30, 1811, also containing 12 movements, with curious unconnected changes of key; and another, of even grimmer character, attributed to the same year, is called 'Leichenfantasie,' or Corpse-fantasia, to the words of Schiller's gruesome juvenile poem of the same name:—

Mit erstorbnem Scheinen
Steht der Mond auf todtenstillen Hainen,
Seufzend streicht der Nachtgeist durch die Luft—
Nebenvolken schauern,
Sterne trauern
Bleich herab, wie Lampen in der Gruft.

With a deathlike glimmer
Stands the moon above the dying trees,
Sighing wails the Spirit through the night;
Mists are creeping,
Stars are peeping
Pale aloft like torches in a cave.

and so forth. This has 17 movements, and is quite as erratic in its changes of key and disregard of the compass of the voice as the preceding.[1] The reminiscences of Haydn's 'Creation,' Mozart's opera airs, and Beethoven's Andantes, are frequent in both. A fourth is 'Der Vatermörder'—the Parricide—for voice and PF., '26 December, 1811,' a pleasant Christmas piece! a decided advance on the two previous songs in individuality of style, and connection. 1811 also saw the composition of a quintet-overture, a string quartet, a second phantasia for 4 hands, and many songs.[2] For 1812 the list is more instrumental. It contains an overture for orchestra in D; a quartet overture in B♭; string quartets in C, B♭, and [3]D; a sonata for PF., violin, and cello; variations in E♭, and an andante, both for PF.; a Salve Regina and a Kyrie. In 1813 an octet[4] for wind; 3 string quartets in C, B♭, E♭ and D; minuets and trios for orchestra and for PF.; a third phantasia for the PF. 4 hands; several songs, terzets, and canons; a cantata in two movements, for 3 male voices and guitar, for his father's birthday, Sept. 27—both words and music his own; and his first symphony in [5]D, intended to celebrate the birthday of Dr. Lang, and finished on Oct. 28. With this very important work his time at the *Convict* ended. He might have remained longer; for it is said that the Emperor, who took an interest in the lads of his chapel, had specially watched the progress of this gifted boy with the lovely voice and fine expression, and that a special decision had been registered in his favour on Oct. 21, assuring him a foundation scholarship in the school, provided that during the vacation he should study sufficiently to pass an examination.[6] This however he declined, possibly at the instigation of Körner the poet, who was in Vienna at this time, and is known to have influenced him in deciding to throw himself entirely into music.[7] He accordingly left the *Convict* (between Oct. 26 and Nov. 6), and returned home. His mother died in 1812, but we hear nothing of the event, unless the octet just named refers to it. The father married again in about a year, and the new wife, as we shall see, did her duty to her stepson Franz fully, and apparently with affection.

Franz was now just completing his seventeenth year, and what has been rightly called the first period of his life. The *Convict* has much to answer for in regard to Schubert. It was entrusted with the most poetical genius of modern times, and it appears to have allowed him to take his own course in the matter of composition almost unrestrained. Had but a portion of the pains been spent on the musical education of Schubert that was lavished on that of Mozart or of Mendelssohn, we can hardly doubt that even his transcendent ability would have been enhanced by it, that he would have gained that control over the prodigious spontaneity of his genius which is his only want, and have risen to the very highest level in all departments of composition, as he did in song-writing. But though Eybler and Salieri were the conductors of the choir in chapel, it does not appear that they had any duties in the school, and Ruzicka, the thorough-bass master, like Holzer, was so prostrated by Schubert's facility as to content himself with exclaiming that his pupil already knew all he could teach him, and must have 'learned direct from heaven.' If all masters adopted this attitude towards their pupils, what would have become of some of the greatest geniuses? The discomforts of the school appear to have been great even for that day of roughness. One of the pupils speaks of the cold of the practice-room as 'dreadful' (*schauerlich*); and Schubert's own earliest letter, dated Nov. 24, 1812, to his brother Ferdinand, shows that these young growing lads were allowed to go without food for 8½ hours, between 'a poor dinner and a wretched supper.' There was not even sufficient music paper provided for the scholars, and Schubert was, as we have seen, dependent on the bounty of the richer pupils.

On the other hand, the motets and masses in the service, the rehearsals in the school, such teaching as there was, and the daily practisings, must have been both stimulating and improving, and with all its roughness a good deal of knowledge could not but have been obtainable. One advantage Schubert reaped from the *Convict*—the friends which he made there, many of them for life, Spaun, Senn, Holzapfel, Stadler, and others, all afterwards more or less eminent, who attached themselves to him as every one did who

[1] The autographs of both are in possession of Herr Nicholas Dumba of Vienna.

[2] Ferd. p. 138.

[3] Kreissle expressly states this (p. 550) and gives the date—'Nov. 19, 1812.'

[4] This octet, dated Sept. 19, is said to be mentioned by Ferdinand Schubert as 'Franz Schubert's Leichenbegängniss' (funeral ceremony). It is supposed by Kreissle (p. 31) to have been composed for the funeral of his mother; but it is difficult to believe that the words which he wrote for his father's birthday ode, eight days later, would have had no reference to the mother's death—which they certainly have not—if it had occurred at that date.

[5] Adagio and Allegro vivace (D); Andante (G); Minuet and Trio (D); Finale, Allegro vivace (D). The work was played from MS. at the Crystal Palace, Feb. 5, 1881. The autograph is in possession of Herr Dumba, Vienna.

[6] K.H. 33 (i. 33).

[7] On Spaun's authority. There is no mention of Schubert in Körner's letters from Vienna.

came into contact with him; a band of young adorers, eager to play, or sing, or copy anything that he composed; the earnest of the devoted friends who surrounded him in later years, and helped to force his music on an ignorant and preoccupied public. Nor did the enthusiasm cease with his departure; for some years afterwards the orchestral pieces which he had written while at the school were still played by the boys from his own MS. copies. Outside the school he had sometimes opportunities of going to the opera. The first opera which he is said to have heard was Weigl's 'Waisenhaus,' played Dec. 12, 1810; but this was eclipsed by the 'Schweitzer-familie' of the same composer, July 8, 1811; that again by Spontini's 'Vestalin,' with Milder, Oct. 1, 1812; and all of them by Gluck's 'Iphigenie auf Tauris,' which he probably heard first April 5, 1815, with Milder and Vogl in the two principal parts, and which made a deep and ineffaceable impression upon him, and drove him to the study of Gluck's scores.[1] During the same years there were also many concerts, including those at which Beethoven produced his 5th, 6th, and 7th Symphonies, the Choral Fantasia, portions of the Mass in C, the Overture to Coriolan, and others of his greatest compositions. Schubert probably heard all these works, but it is very doubtful whether he heard them with the same predilection as the operas just mentioned. We might infer with certainty from the three earliest of his symphonies, that Beethoven's style had as yet taken but little hold on him, notwithstanding the personal fascination which he seems to have felt for the great master from first to last. But, indeed, we have his own express declaration to that effect. Coming home after a performance of an oratorio of Salieri's, June 16, 1816, he speaks of the music in terms which can only refer to Beethoven, as 'of simple natural expression, free from all that *bizarrerie* which prevails in most of the composers of our time, and for which we have almost solely to thank one of our greatest German artists; that *bizarrerie* which unites the tragic and the comic, the agreeable and the repulsive, the heroic and the petty, the Holiest and a harlequin; infuriates those who hear it instead of dissolving them in love, and makes them laugh instead of raising them heavenwards.' Mozart was at the time his ideal composer; this too is plain from the symphonies, but here also he leaves us in no doubt. Three days earlier we find in the same [2] diary, à propos to one of the quintets of that great master:—'Gently, as if out of the distance, did the magic tones of Mozart's music strike my ears. With what inconceivable alternate force and tenderness did Schlesinger's masterly playing impress it deep, deep, into my heart! Such lovely impressions remain on the soul, there to work for good, past all power of time or circumstances. In the darkness of this life they reveal a clear, bright, beautiful prospect, inspiring confidence and hope. O Mozart, immortal Mozart! what countless consolatory images of a bright better world hast thou stamped on our souls.' There is no doubt to which of these two great masters he was most attached at the time he wrote this.

We have seen what a scourge the conscription proved in the case of Ries (iii. 131*a*), and the uneasiness of Mendelssohn's family till the risk of it was over in his case (ii. 262*b*). To avoid a similar danger[3] Schubert elected to enter his father's school, and after the necessary study for a few months at the Normal School of St. Anna, did so, and actually remained there for three years as teacher of the lowest class. The duties were odious, but he discharged them with strict regularity, and not with greater severity than might reasonably be expected from the irritable temperament of a musician condemned to such drudgery. The picture of Pegasus thus in vile harness, and the absence of any remark on the anomaly, throws a curious light on the beginnings of a great composer. Out of school hours, however, he had his relaxations. There was a family in the Lichtenthal named Grob—a mother, son, and daughter—whose relations to him were somewhat like those of the Breunings to Beethoven (i. 164 *a*). The house was higher in the scale than his father's, and he was quite at home there. Therese, the daughter, had a fine high soprano voice, and Heinrich Grob played both PF. and cello; the mother was a woman of taste, and a great deal of music was made. It is not impossible that Therese inspired him with a softer feeling.[4] The choir of the Lichtenthal church, where his old friend Holzer was still choirmaster, was his resort on Sundays and feast days, and for it he wrote his first mass, in F—begun May 17, finished July 22, 1814—a fitting pendant to the symphony of the previous October. He was not yet eighteen, and the mass is pronounced by a trustworthy critic[5] to be the most remarkable first mass ever produced, excepting Beethoven's in C, and as striking an instance of the precocity of genius as Mendelssohn's Overture to the Midsummer Night's Dream. It seems to have been first performed on Oct. 16, the first Sunday after St. Theresa's day, 1814—Mayseder, then 25, and an acknowledged virtuoso, leading the first violins; and was repeated at the Augustine Church ten days after. This second performance was quite an event. Franz conducted, Holzer led the choir, Ferdinand took the organ, Therese Grob sang, the enthusiasm of the family and friends was great, and the proud father presented his happy son with a five-octave piano.[6] Salieri was present and loud in his praises, and claimed Schubert as his pupil. He had indeed begun to take some interest in the lad before [7] he left the *Convict*, and continued it by daily lessons 'for a [8] long time.' That interest was probably much the same

that he had shown to Beethoven 15 years before, making him write to Metastasio's words, and correcting the prosody of his music. But there must have been some curious attraction about the old man, to attach two such original geniuses as Beethoven and Schubert to him, and make them willing to style themselves 'scholars of Salieri.'[1] His permanent influence on Schubert may be measured by the fact that he warned him against Goethe and Schiller, a warning which Schubert attended to so far as to compose 67 songs of the one poet, and 54 of the other!

Franz's next effort was an opera—a light and absurd supernatural 'opéra comique' in 3 acts, 'Des Teufels Lustschloss,' words by Kotzebue. He probably began it while at the *Convict*, the first act having been completed Jan. 11, 1814; the second, March 16; and the third, May 15. Two days afterwards he began the mass. That over, he had leisure to look again at the earlier work. The experience gained in writing the mass probably revealed many an imperfection in the opera. He at once rewrote it, and finished the redaction of it on Oct. 22. The work has never been performed, nor can it now ever be so, since the second act, like the MS. of the first volume of Carlyle's French Revolution, was used by an officious maid-servant for lighting the fires as late as 1848. With all these and other labours he found time to visit the [2]*Convict* in the evenings, take part in the practices, and try over his new compositions. Besides the pieces already mentioned, the productions of 1814 embrace a Salve Regina for tenor and orchestra. Also 2 string-quartets in D and C minor, still in MS., and a third in B♭, published as op. 168, and remarkable for the circumstances of its composition. It was begun as a string trio, and ten lines were written in that form. It was then begun again and finished as a quartet. The movements are more fully dated than usual.[3] Also 5 minuets and 6 Deutsche (or waltzes) for strings and horns; and 17 songs, among them 'Gretchen am Spinnrade' (Oct. 19), and Schiller's 'Der Taucher,' a composition of enormous length, begun Sept. 1813, and finished in the following August. On Dec. 10 he began his second symphony, in B♭.[4] The autograph shows that the short Introduction and Allegro vivace were finished by the 26th of the same month, but its completion falls in 1815. Before the year closed he made the acquaintance of Mayrhofer, a man of eccentric, almost hypochondriac character, and a poet of grand and gloomy cast, who became his firm friend, and 54 of whose [5]poems (besides the operas of 'Adrast' and 'Die beiden Freunde von Salamanca'), fortunately for Mayrhofer's immortality, he set to music—some of them among his very finest songs. The acquaintance began by Schubert's setting Mayrhofer's 'Am See.' He composed it on the 7th December, and a few days afterwards visited the poet at his lodgings in the Wipplinger Strasse 420 (since destroyed), a small dark room rendered illustrious by being the residence of Theodore Körner, and afterwards of Schubert, who lived there in 1819 and 20. The visit was the beginning of a friendship which ended only with Schubert's death.

1815 is literally crowded with compositions. Two orchestral symphonies of full dimensions, Nos. 2 and 3 (that in B♭ ended March 24, that in [6]D, May 24–July 19); a string quartet in G minor (March 25–April 1); PF. sonatas in C, F, E (Feb. 11) and E (Feb. 18); an adagio in G (April 8), 12 Wiener Deutsche, 8 Ecossaises (Oct. 3), and 10 variations for PF. solo; 2 masses, in G[7] (Mar. 2–7) and B♭ (Nov. 11–); a new 'Dona'[8] for the mass in F; a Stabat Mater in G minor (April 4); a Salve Regina (July 5); 5 large dramatic pieces—'Der vierjährige Posten, 1-act operetta (ended May 16); 'Fernando,' 1-act Singspiel (July 3–9); 'Claudine von Villabella,' 3-act Singspiel (Act 1, July 26–Aug. 5), originally composed complete, but Acts 2 and 3 perished in the same manner as the 'Teufels Lustschloss'; 'Die beiden Freunde von Salamanca,' a 2-act Singspiel by Mayrhofer (Nov. 18–Dec. 31); 'Der Spiegelritter,' 3-act opera, of which 8 numbers are with the Gesellschaft der Musikfreunde at Vienna; perhaps also a Singspiel called Die 'Minnesänger,' and 'Adrast,' an opera by Mayrhofer, of which but two numbers exist.[9] In addition to all these there are no less than 137 songs—67 printed, and 70 still in MS. In August alone there are 29, of which 8 are dated the 15th, and 7 the 19th! And of these 137 songs some are of such enormous length as would seem to have prevented their publication. 'Minona' (MS., Feb. 8), the first one of the year, contains 16, and 'Adelwold and Emma' (MS., June 5) no less than 55 closely written sides. Of those published, 'Die Bürgschaft' ('Aug. 1815') fills 22 pages of Litolff's edition, 'Elysium' 13, and 'Loda's Gespenst' 15 of the same. It was the length of such compositions as these—'pas une histoire, mais des histoires'—that caused Beethoven's exclamation on his deathbed: 'Such long poems, many of them containing ten others,' by which he meant as long as ten. [See p. 346 *b*.] And this mass of music was produced in the mere intervals of his

[1] For Beethoven see vol. i. p. 168 *a*. Schubert so styles himself on the title-pages of his 'Fernando' and 'Claudine von Villabella.'

[2] K.H. 18 (i. 19).

[3] The Allegro has at beginning '5 Sept. 1814,' at end 'den 6 Sept. in 4½ Stunden angefertigt,' apparently implying that it was dashed off before and after 12 o'clock at night. Andante, at beginning 'den 6 Sept. 1814,' at end 'den 10 Sept. 1814.' Minuet, at end '11 Sept. 1814.' Finale, at end 'den 13 Sept. 1814.' Autograph with Spina.

[4] At beginning, '10 Dec. 1814'; at end of Allegro, '26 Dec. 1814'; at beginning of Finale, '25 Feb. 1815,' and at end, '24 March 1815.' The movements are Largo and Allegro vivace (B♭); Andante (E♭); Minuet and Trio (C minor); Finale, Presto vivace (B♭). Played from MS. at the Crystal Palace, Oct. 20, 1877. Autograph with Herr Dumba.

[5] 48 published, and 6 in MS.

[6] It is in the usual number of movements: Adagio maestoso and Allegro con brio (D); Allegretto (G); Minuet and Trio (D); Finale, Presto vivace (D). Dates:—Allegro, at beginning, '24 May 1815'; end, 'July 12, 1815.' Allegretto, at beginning, 'July 15, 1815.' End of Finale, 'July 19, 1815.' Autograph with Herr Dumba.

[7] Published by M Berra, of Prague, in 1846, as the composition of R. Führer. [See vol. i. 566 *b*.] The fraud was not exposed till 1847, when it was announced by Ferd. Schubert in the Allg. Wiener Musikzeitung of Dec. 14. Ferdinand mentions this mass in his list under 1815. A copy, evidently copied closely from the autograph, but with the addition of oboes (or clarinets) and bassoons by Ferd. Schubert (July 23, 1847), is in the Library of the Gesellschaft der Musikfreunde.

[8] Mentioned by Ferdinand, 139 *a*.

[9] Autographs of Fernando, Teufels Lustschloss, and Adrast, are with Herr Dumba.

school drudgery! Well might his brother say that the rapidity of his writing was marvellous.

Amidst all this work and, one might be tempted to believe, all this hurry, it is astonishing to find that some of the songs of these boyish years are amongst the most permanent of his productions. 'Gretchen am Spinnrade,' a song full of the passion and experience of a lifetime, was written (as we have said) in Oct. 1814, when he was 17. The 'Erl King' itself in its original form (with a few slight [1] differences) belongs to the winter of 1815, and the immortal songs of the 'Heidenröslein,' 'Rastlose Liebe,' 'Schäfers Klagelied,' the grand Ossian songs, and others of his better-known works, fall within this year. The Mass in G, too, though composed for a very limited orchestra, and not without tokens of hurry, is a masterpiece. The dramatic works contain many beautiful movements, and are full of striking things, but the librettos are so bad, that in their present condition they can never be put on the stage. The symphonies, though not original, are not without original points; and are so sustained throughout, so full of fresh melody and interesting harmony, and so extraordinarily scored considering their date, that in these respects a man of double Schubert's age might be proud to claim them.

The habit of writing to whatever words came in his way was one of Schubert's characteristics, especially in the earlier part of his career. With his incessant desire to sing; with an abundant fountain of melody and harmony always welling up in him and endeavouring to escape, no wonder that he grasped at any words, and tried any forms, that came in his way, and seemed to afford a channel for his thoughts. If good, well; if bad, well too. The reason why he wrote 8 operas in one year was no doubt in great measure because he happened to meet with 8 librettos; had it been 4 or 12 instead of 8 the result would have been the same. The variety in the productions even of this early year is truly extraordinary. A glance at the list is sufficient to show that he tried nearly every form of composition, while the songs he set range from gems like Goethe's 'Meeresstille' and Schiller's 'Freudvoll und leidvoll,' to the noisy ballads of Bertrand; from Mayrhofer's stern classicality and the gloomy romance of Ossian, to the mild sentiment of Klopstock. No doubt, as Schumann says, he could have set a [2] placard to music. The spectacle of so insatiable a desire to produce has never before been seen; of a genius thrown naked into the world and compelled to explore for himself all paths and channels in order to discover by exhaustion which was the best—and then to die.

During this year he taught diligently and punctually in his father's school, and attended Salieri's lessons. His relations to the Lichtenthal remained as before. The Mass in G, like that in F, was written for the parish church, and according to the testimony of one [3] of his old friends was especially intended for those of his companions who had been pupils of Holzer's with him. A pleasant relic of his home life exists in a piece of music written for his father's birthday, Sept. 27, 1815, for 4 voices and orchestra—'Erhabner, verehrter Freund der Jugend.' [4] He kept up his intercourse also with the *Convict*, and when he had written anything special it was one of the first places to which he would take it. There possibly his Symphonies were tried, though it is doubtful if a juvenile orchestra would contain clarinets, bassoons, trumpets, and horns, all which are present in the scores of the first four Symphonies. There, thanks to the memorandum of another old 'Convicter,' we can assist at the first hearing of the Erl King. Spaun happened to call one afternoon, in this very winter, at the elder Schubert's house in the Himmelpfortgrund, and found Franz in his room, in a state of inspiration over Goethe's ballad, which he had just seen for the first time. A few times reading had been sufficient to evoke the music, which in the rage of inspiration he was whelming down [5] on to the paper at the moment of Spaun's arrival; indeed it was already perfect except the mere filling in of the accompaniment. This was quickly done; and it was finished in the form in which we can now see it in the Berlin [6] Library. In the evening Schubert brought it to the *Convict*, and there first he and then Holzapfel sang it through. It was not altogether well received. No wonder; the form was too new, the dramatic spirit too strong, even for that circle of young Schubert-admirers. At the words 'Mein Vater, mein Vater, jetzt fasst er mich an!' where G♭, F♮ and E♭ all come together, there was some dissent, and Ruzicka, as teacher of harmony, had to explain to his pupils, as best he might, a combination which now seems perfectly natural and appropriate.

1816 was passed much as 1815 had been, in a marvellous round of incessant work. The drudgery of the school however had become so insupportable that Schubert seized the opportunity of the opening of a government school of music, at Laibach, near Trieste, to apply for the post of director, with a salary of 500 Vienna florins—£21 a year. The testimonials which he sent-in in April from Salieri, and from Joseph Spendou, Chief Superintendent of Schools, were so cold in tone as to imply that however much they valued Schubert, they believed his qualifications not to be those of the head of a large establishment. [7] At any rate he failed, and the post

[1] The Berlin Library possesses an autograph of the earlier form, and Mad. Schumann one of the later (with triplet accompaniment). The former was published in facsimile by Espagne (Berlin, Müller).

[2] 'Qu'on me donne la Gazette de Hollande,' says Rameau. But Schubert could have thrown poetry into an advertisement! 'Give me the words,' said Mozart, 'and I'll put the poetry to them.'

[3] Herr Doppler. I cannot refrain from mentioning this gentleman, who in 1867 was shopman at Spina's (formerly Diabelli's). I shall never forget the droll shock I received when on asking him if he knew Schubert, he replied, 'Know him? I was at his christening! Kreissle's Life is indebted to him for many a trait which would otherwise have been lost.

[4] Now in the Imperial Library, Berlin. No doubt there was one every year, though that of 1814 has been lost.

[5] *Hinzuwühlend* is Kreissle's word, doubtless from Spaun's lips.

[6] If indeed this be the actually first original. The omission of bar 8, and its subsequent insertion, however, as well as the clean regular look of the whole, seem to point to its being a transcript.

[7] K.H. 107 (i. 109).

was given, on the recommendation of Salieri, to a certain Jacob Schaufl. Schubert found compensation, however, in the friendship of Franz von Schober, a young man of good birth and some small means, who had met with his songs at the house of the Spauns at Linz, and had ever since longed to make his personal acquaintance. Coming to Vienna to enter the University, apparently soon after the Laibach rebuff, he called on Schubert, found him in his father's house, overwhelmed with his school duties, and with apparently no time for music. There, however, were the piles of manuscript—operas, masses, symphonies, songs, heaped up around the young schoolmaster composer, and Schober saw at once that some step must be taken to put an end to this cruel anomaly, and give Schubert time to devote himself wholly to the Art of which he was so full. Schober proposed that his new friend should live with him; Franz's father—possibly not[1] oversatisfied with his son's performances as a teacher of the alphabet to infants—consented to the plan, and the two young men (Schober was some four months Franz's junior) went off to keep house together at Schober's lodgings in the Landkrongasse. A trace of this change is found on two MS. songs in the Musik Verein at Vienna, 'Leiden der Trennung' and 'Lebenslied,' inscribed 'In Herr v. Schober's lodging,' and dated Nov. 1816. Schubert began to give a few lessons, but soon threw them[2] up, and the household must have been maintained at Schober's expense, since there was obviously as yet no sale for Schubert's compositions. He had good friends, as Beethoven had had at the same age, though not so high in rank —Hofrath von Kiesewetter, Matthäus von Collin, Graf Moritz Dietrichstein, Hofrath Hammer von Purgstall, Pyrker, afterwards Patriarch of Venice and Archbishop of Erlau, Frau Caroline Pichler —all ready and anxious to help him had they had the opportunity. But Schubert never gave them the opportunity. He was a true Viennese, born in the lowest ranks, without either the art or the taste for 'imposing' on the aristocracy (Beethoven's[3] favourite phrase) that Beethoven had; loving the society of his own class, shrinking from praise or notice of any kind, and with an absolute detestation of teaching or any other stated duties.

But to know him was to love and value him. Three little events, which slightly diversify the course of this year, are of moment as showing the position which Schubert took amongst his acquaintances. The first was the 50th anniversary of Salieri's arrival in Vienna, which he had entered as a boy on June 16, 1766. [See SALIERI, iii. 218*b*.] On Sunday, June 16, 1816, the old Italian was invested with the Imperial gold medal and chain of honour, in the presence of the whole body of Court-musicians; and in the evening a concert took place at his own house, in which, surrounded by his pupils, Weigl, Assmayer, Anna Fröhlich, Schubert, and many[4] others, both male and female, he snuffed up the incense of his worshippers, and listened to compositions in his honour by his scholars past and present. Among these were pieces sent by Hummel and Moscheles, and a short cantata, both words and music by Schubert.[5]

Eight days afterwards, on July 24, there was another festivity in honour of the birthday of a certain [6] Herr Heinrich Watteroth, a distinguished official person, for which Schubert had been employed to write a cantata on the subject of Prometheus, words by Philipp Dräxler, another official person. The cantata has disappeared; but from a description of it by Leopold Sonnleithner, communicated to 'Zellner's Blätter für Theater,' etc. (no. 19), and reprinted[7] separately, it seems to have been written for two solo voices, soprano (Gäa), and bass (Prometheus), chorus, and orchestra, and to have contained a duet in recitative, two choruses for mixed and one for male voices (the disciples of Prometheus). This last is described as having been in the form of a slow march, with original and interesting treatment. The performance took place in the garden of Watteroth's house in the Erdberg suburb of Vienna. As all the persons concerned in the festivity were people of some consideration, and as the music was very well received, it may have been an important introduction for the young composer. A congratulatory poem by von Schlechta, addressed to Schubert, appeared a day or two later in the 'Theaterzeitung.' Schubert had already, in the previous year, set a song of Schlechta's—'Auf einem Kirchhof' (Lief. 49, no. 2), and he promptly acknowledged the compliment by adopting one of more moment from Schlechta's 'Diego Manzanares,' 'Wo irrst du durch einsame Schatten?' (40 Lieder, no. 25), his setting of which is dated July 30, 1816.[8] Schubert evidently was fond of his cantata. It was performed at Innspruck by Gänsbacher, and at Vienna by Sonnleithner in 1819. Schubert wished to give it at the Augarten in 1820, and had sent it somewhere for performance at the time of his death. He was paid 100 florins, Vienna currency (or £4) for it, and he notes in his journal that it was the first time he had composed for money.

The third event was the composition of a cantata on a larger scale than either of the others. It was addressed to Dr. Joseph Spendou, in his character of Founder and Principal of the Schoolmasters' Widows' Fund, and contained 8 numbers, with solos for two sopranos and bass, a quartet and choruses, all with orchestral accompaniment. Whether it was performed or not is uncertain,

1 There is ground for this supposition.

2 Bauernfeld, W.Z.K. 3 *Imponiren*. Thayer, ii. 313.

4 There was a Liszt among Salieri's pupils at this time, but hardly the future Abbé, who was then but five years old. Franz Liszt and Schubert met once—in the curious collection of variations on Diabelli's waltz, to which 50 Austrian composers contributed, Beethoven's contribution being the 33 variations, op. 120. Liszt's variation is No. 24, and Schubert's No. 38. Liszt has been throughout an indefatigable champion for Schubert.

5 The autograph of this little curiosity was sold in Paris, by auction, May 14, 1881. The words are given by Kreissle, p. 82 (i. 83), but are not worth quoting. They do not possess the individuality of thought which makes Schubert's later verses so interesting, in spite of the crudity of their expression.

6 His birthday was July 12, but the performance was put off on account of the weather.

7 I am indebted for this reprint to my ever-kind friend Mr. C. F. Pohl, of the Gesellschaft der Musikfreunde, Vienna.

8 He returned to this poet in 1820, 1825, 1826, 1828.

but it was published in 1830 in PF. score by Diabelli, as op. 128. The other compositions of the year 1816 are as numerous as usual. A fine trio for S.S.A. and PF. to the words of Klopstock's 'grosses Halleluja' (Lf. 41, no. 2); a Salve Regina in F, to German words, for 4 voices and organ[1] (Feb. 21, 1816); the Angels' chorus from Faust, 'Christ ist erstanden,'[2] dated June 1816—are also among the printed works. A Stabat Mater in F minor, to Klopstock's German words, dated Feb. 28, 1816, is still in MS. It is written for soprano, tenor, and bass solo, and chorus, and for an orchestra of the usual strings, 2 flutes, 2 oboes, 2 bassoons, 1 contra-bassoon, 2 horns, 3 trombones, 2 trumpets and drums. These however are not uniformly employed: the trumpets and drums only appear for a few chords in Nos. 9 and 12; No. 5, an 8-part chorus, is accompanied by the wind alone, and No. 6, a tenor air, by the strings, with oboe solo. This interesting looking work was performed in 1841 by the Musik-Verein of Vienna, and in 1863 at the Altlerchenfelder church there, but has not yet been published. Two other MS. works are a Magnificat in C, for solos, chorus, and orchestra, dated Oct. 1816, and a duet for soprano and tenor with orchestra, to Latin words, 'Auguste jam Cœlestium,' dated Sept. 1816, both much tinctured by Mozart. There is also a 'Tantum ergo' in C for 4 voices and orchestra, Aug. 1816, and a fragment of a Requiem in E♭, July 1816; the first pages are wanting, and it ends with the 2nd bar of the 2nd Kyrie.[3]

Of operas we find only one in 1816, probably because only one libretto came in his way. It is called 'Die Bürgschaft,' and is in 3 acts. The author of the words is not known; and the quotations in Kreissle show that they are in great part absolute rubbish. Schubert continued his task to the 3rd act, 15 numbers, and there stopped. The autograph, in Herr Dumba's possession, is dated May 1816, and no portion of it is printed.

The Symphonies of 1816 are two—the 4th, in C minor,[4] entitled 'Tragic Symphony,' and dated April 1816; and the 5th, in B♭, for[5] small orchestra, dated Sept. 1816—Oct. 3, 1816. The first of these—hardly 'tragic' so much as 'pathetic'—is a great advance on its predecessors; the Andante is individual and very beautiful, and the Finale wonderfully spirited. The other, though full of Mozart, is as gay and untrammelled as all Schubert's orchestral music of that day. It is sometimes entitled 'without Trumpets or Drums,' and is said to have been composed for the orchestra at the Gundelhof, which grew out of the Schubert Sunday afternoon quartets.[6] Neither work has yet been published in[7] score, but they have often been played at the Crystal Palace, under Mr. Manns's direction, and are among the favourite works in the *répertoire* of that establishment. A string quartet in F; a string trio in B♭, apparently very good; a rondo in A for violin solo and quartet (June 1816); a violin concerto in C; 3 sonatinas for PF. and violin (op. 137); a PF. sonata in F, two movements of another in E; various marches for PF.; 12 Deutsche (waltzes); 6 Ecossaises, with the inscriptions 'Composed while a prisoner in my room at Erdberg' and 'Thank God'—probably the relic of some practical joke—are still existing.

Very little of the above, however interesting, can be said to be of real, first-rate, permanent value. But when we approach the songs of 1816 the case is altered. There are not quite so many with this date as there were with that of 1815, but there are 99 in all—41 printed and 58 in MS. Of Goethe there are splendid specimens, the three songs of the Harper, in 'Wilhelm Meister' (op. 12, Sept. 6), Mignon's 'Sehnsucht' song (op. 62, no. 4); Der Fischer; Der König in Thule (op. 5, no. 5), Jägers Abendlied, and Schäfers klagelied (op. 3), Wanderer's Nachtlied (op. 4), Schwager Kronos (op. 19). Of Schiller there are the beautiful Ritter Toggenburg, Thekla's song (op. 58), etc., and to name only one other, the far-famed 'Wanderer,' by Schmidt of Lubeck.

These magnificent pieces are well known to every lover of Schubert, but they are not more valued than such exquisitely simple and touching little effusions as 'An eine Quelle' of Claudius (op. 109, no. 3), 'Der Abend' of Kosegarten (op. 118, no. 2), or 'Der Leidende' of Hölty (Lief. 50, no. 2), all equally bearing his stamp.

The lists of the songs of these two years throw a curious light on Schubert's musical activity and mode of proceeding. Dr. Johnson was said when he got hold of a book to 'tear the heart out of it,' and with Schubert it was very much the same. To read a poem, and at once to fasten upon it and transcribe it in music, seems to have been his natural course; and having done one he went at once to the next. A volume of Hölty, or Claudius, or Kosegarten came into his hands; he tore from it in a moment what struck him, and was not content with one song, but must have three, four, or five. Thus, in Oct. 1815, he evidently meets with Kosegarten's poems, and between the 15th and 19th sets seven of them. In March 1816 he sets five songs by Salis; in May, six by Hölty; in November, four by Claudius, three by Mayrhofer, and so on. To read these lists gives one a kind of visible image of the almost fierce eagerness with which he attacked his poetry, and of the inspiration with which the music rushed from his heart and through his pen—'everything that he touched,' says Schumann, 'turning into music.' Thus, at a later date, calling accidentally on Randhartinger, and his friend being summoned from the room, Schubert, to amuse himself in the

2 First printed by Schumann as Appendix to his newspaper, the N.Z.M., for June 18, 1839.

3 In Mr. Brahms's possession. The date is quoted from the Catalogue of the accurate Nottebohm. I am bound to say that I saw no date, and Mr. Brahms judged it to be later than 1816.

4 April 1816.—*Adagio molto* and *Allegretto vivace* in C minor; Andante in A♭; Menuet and Trio in E♭; Finale in C.—The autograph has vanished.

5 Sept. 1816.—Fine den 3 Oct. 1816. Allegro B♭; Andante con moto E♭; Menuet and Trio G minor and G major; Finale Allegretto vivace B♭. Autograph with Peters & Co.

6 Hanslick, 'Concertwesen,' 142.

7 Except the Andante of the 'Tragic,' which is published in score by Peters, No. 1004.

interval, took up a little volume which lay on the table. It interested him; and as his friend did not return he carried it off with him. Anxious for his book, Randhartinger called next morning at Schubert's lodgings, and found that he had already set several pieces in it to music. The volume was Wilhelm Müller's poems; the songs were part of the 'Schöne Müllerin.' A year or two after this, in July 1826—it is his old friend Doppler who tells the story—returning from a Sunday stroll with some friends through the village of Währing, he saw a friend sitting at a table in the beer-garden of one of the taverns. The friend, when they joined him, had a volume of Shakespeare on the table. Schubert seized it, and began to read; but before he had turned over many pages pointed to 'Hark, hark, the lark,' and exclaimed, 'Such a lovely melody has come into my head, if I had but some music paper.' Some one drew a few staves on the back of a bill of fare, and there, amid the hubbub of the beer-garden, that beautiful song, so perfectly fitting the words, so skilful and so happy in its accompaniment, came into perfect existence. Two others from the same poet not improbably followed in the evening.[1]

It has been said that Schubert never heard his Symphonies played. This is no doubt true of the beautiful unfinished one in B minor, of the Gastein Symphony, and of the great one in C, no. 10; but of the first six it is not so correct. There was always the pupils' band at the *Convict*, where, as we have seen, parts in his handwriting are said to have lingered; and there was also a flourishing amateur society, which, though their execution may not have had the precision of first-rate artists, yet probably played well enough to enable a composer to judge if his effects were what he intended them to be. Vienna amateurs were by no means contemptible. A society who met at the Mehlgrube even ventured on bringing out such works as Beethoven's Overture to Coriolan for the first time. Another, assembling at the Römische Kaiser, performed the Mount of Olives, Beethoven himself conducting.

It seems that the Quartet afternoons at the house of Schubert the elder had gradually extended themselves into performances of Haydn's Symphonies, arranged as quartets and played with doubled parts, players of ability and name joined, and a few hearers were admitted. After a time, the modest room became inconveniently crowded, and then the little society migrated to the house of a tradesman named Frischling (Dorotheengasse 1105), wind instruments were added, and the smaller works of Pleyel, Haydn, and Mozart were attacked. In the winter of 1815 another move became necessary, to the house of Otto Hatwig, one of the violins of the Burgtheater, at the Schottenthor, and in the spring of 1818, to his new residence in the Gundelhof, and later still at Pettenkofer's house in the Bauernmarkt. The band now contained some good professional players, and could venture even on Beethoven's two first symphonies, and the overtures of Cherubini, Spontini, Boieldieu, Weigl, etc. Schubert belonged to it all through, playing the viola, and it was probably with the view to their performance by the society that he wrote the two symphonies of 1816 (nos. 4 and 5), two overtures in the winter of 1817, and his 6th symphony in the spring of 1818.

Schober and Mayrhofer were Schubert's first friends outside the immediate circle of his youthful associates. He was now to acquire a third, destined to be of more active service than either of the others. This was Vogl. He was 20 years Franz's senior, and at the time of their meeting was a famous singer at the Vienna Opera, admired more for his intellectual gifts than for the technical perfection of his singing, and really great in such parts as Orestes in 'Iphigenie,' Almaviva in 'Figaro,' Creon in 'Medea,' and Telasko in the 'Vestalin.' About the year 1816 —the date is not precisely given—Vogl was induced by Schober to come to their lodgings, and see the young fellow of whom Schober was always raving, but who had no access to any of the circles which Vogl adorned and beautified by his presence. The room as usual was strewed with music. Schubert was confused and awkward; Vogl, the great actor and man of the world, gay, and at his ease. The first song he took up —probably the first music of Schubert's he had ever seen—was Schubart's 'Augenlied' (Lf. 50, no. 3). He hummed it through, and thought it melodious, but slight—which it is. 'Ganymed' and the 'Schäfersklage' made a deeper impression; others followed, and he left with the somewhat patronising but true remark, 'There is stuff in you; but you squander your fine thoughts instead of making the most of them.' But the impression remained, he talked of Schubert with astonishment, soon returned, and the acquaintance grew and ripened till they became almost inseparable, and until in their performances of Schubert's songs, 'the two seemed,' in Schubert's own words, 'for the moment to be one.' In those days songs were rarely if ever sung in concert-rooms; but Vogl had the entrée to all the great musical houses of Vienna, and before long his performances of the Erl King, the Wanderer, Ganymed, Der Kampf, etc., with the composer's accompaniment, were well known. What Vogl's opinion of him ultimately became, may be learnt from a passage in his diary:—'Nothing shows so plainly the want of a good school of singing as Schubert's songs. Otherwise, what an enormous and universal effect must have been produced throughout the world, wherever the German language is understood, by these truly divine inspirations, these utterances of a musical *clairvoyance*! How many would have comprehended, probably for the first time, the meaning of such expressions as 'speech and poetry in music,' 'words in harmony,' 'ideas clothed in music,' etc., and would have learnt that the finest poems of our greatest poets may be enhanced and even transcended when

[1] The drinking-song from Antony and Cleopatra (marked 'Währing, July 26'), and the lovely 'Sylvia' ('July 1826'). The anecdote is in Kreissle.

translated into musical language? Numberless examples may be named, but I will only mention The Erl King, Gretchen, Schwager Kronos, the Mignon and Harper's songs, Schiller's Sehnsucht, Der Pilgrim, and Die Bürgschaft.'

This extract shows how justly Vogl estimated Schubert, and how, at that early date, his discernment enabled him to pass a judgment which even now it would be difficult to excel. The word *clairvoyance*, too, shows that he thoroughly entered into Schubert's great characteristic. In hearing Schubert's compositions it is often as if one were brought more immediately and closely into contact with music itself than is the case in the works of others; as if in his pieces the stream from the great heavenly reservoir were dashing over us, or flowing through us, more directly, with less admixture of any medium or channel, than it does in those of any other writer—even of Beethoven himself. And this immediate communication with the origin of music really seems to have happened to him. No sketches, no delay, no anxious period of preparation, no revision, appear to have been necessary. He had but to read the poem, to surrender himself to the torrent, and to put down what was given him to say, as it rushed through his mind. This was the true 'inspiration of dictation,' as much so as in the utterance of any Hebrew prophet or seer. We have seen one instance in the case of the Erl King. The poem of the Wanderer attracted him in the same way, and the song was completed in one evening. In a third case, that of Goethe's 'Rastlose Liebe,' the paroxysm of inspiration was so fierce that Schubert never forgot it, but reticent as he often was, talked of it years afterwards.[1] It would seem that the results did not always fix themselves in the composer's memory as permanently as if they had been the effect of longer and more painful elaboration. Vogl[2] tells an anecdote about this which is very much to the point. On one occasion he received from Schubert some new songs, but being otherwise occupied could not try them over at the moment. When he was able to do so he was particularly pleased with one of them, but as it was too high for his voice, he had it copied in a lower key. About a fortnight afterwards they were again making music together, and Vogl placed the transposed song before Schubert on the desk of the piano. Schubert tried it through, liked it, and said, in his Vienna dialect, 'I say! the song's not so bad; *whose is it*?' so completely, in a fortnight, had it vanished from his mind! Sir Walter Scott attributed a song of his own to Byron; but this was in 1828, after his mind had begun to fail.[3]

1817 was comparatively an idle year. Its great musical event was the arrival of Rossini's music in Vienna. 'L'Inganno felice' was produced at the Hof theatre, Nov. 26, 1816, and 'Tancredi,' Dec. 17; 'L'Italiana in Algeri,' Feb. 1, 1817, and 'Ciro in Babilonia,' June 18; and the enthusiasm of the Viennese—like that of all to whom these fresh and animated strains were brought—knew no bounds. Schubert admired Rossini's melody and spirit, but rather made fun of his orchestral music, and a story is told—not impossibly[4] apocryphal—of his having written an overture in imitation of Rossini, before supper, after returning from 'Tancredi.' At any rate he has left two 'Overtures in the Italian style' in D and C, dated Sept.[5] and Nov. 1817 respectively, which were much played at the time. Schubert made 4-hand PF. arrangements of both, and that in C has been since published in score and parts as op. 170, and has been played at the Crystal Palace (Dec. 1, 66, etc.) and elsewhere. Its caricature of Rossini's salient points, including of course the inevitable *crescendo*, is obvious enough; but nothing could transform Schubert into an Italian, and the overture has individual and characteristic beauties which are immediately recognisable. The influence of Rossini was no mere passing fancy, but may be traced in the 6th Symphony, mentioned below, and in music of his later life—in the two Marches (op. 121), the Finale to the Quartet in G (op. 161), and elsewhere.

A third Overture in D belongs to 1817, and though still in MS., has also been played at the Crystal Palace (Feb. 6, 69, etc.). It is in two movements, Adagio, and Allo. giusto, and the former is almost a draft of the analogous movement in the overture known as 'Rosamunde' (op. 26), though really the 'Zauberharfe.' There the resemblance ceases.—What led Schubert to the pianoforte this year in so marked a manner is not known, but his devotion to it is obvious, for no fewer than 6 sonatas belong to this period. Of these, 3 are published—op. 122, in E♭; op. 147,[6] in B (August); op. 164, in A minor.[7] Those still in MS. are in F, A♭, and E minor (June).

Schubert's 6th Symphony, in C,[8] completed in February 1818, appears to have been begun in the preceding October. It is the first one which he has marked as 'Grand'—'Grosse Sinfonie'—though hardly with reason, as both in form and orchestra it is the same as the early ones. It is an advance on the others, and the Scherzo shows the first decided signs of Beethoven's influence. Passages may also be traced to Rossini and the Italian opera.

The catalogue of the instrumental compositions of this year closes with 2 sonatas for PF. and violin, op. 137, nos. 1 (March) and 2; a string Trio[9] and a Polonaise for the violin, both in MS. In the number of the vocal compositions of 1817 there is an equal falling off. Rossini's popularity for the time shut the door against all other composers, and even Schubert's appetite for bad librettos was compelled to wait. Not only, however, are there no operas this year, there is no church music, and but 47 songs (32 printed, and 15 in MS.). In quality, however, there is no deterioration in the

songs. The astonishing 'Gruppe aus dem Tartarus,' and the 'Pilgrim' of Schiller; the 'Ganymed' of Goethe; the 'Fahrt zum Hades,' 'Memnon,' and 'Erlafsee' of Mayrhofer; and 'an die Musik' of Schober, are equal to any that come before them. Among the MS. songs is one showing the straits to which Schubert was sometimes put, either by the want of materials or by the sudden call of his inspiration. It is the beginning of a setting of Schiller's 'Entzückung an Laura,' and is written on the front page of the 2nd violin part of a duet-fugue by Fux, the words 'Fuga. Duetto. Violino Secundo. Del: Sing:[1] Fux.' appearing in the copyist's formal handwriting through Schubert's hasty notes. It is superscribed 'Entzückung an Laura Abschied August 1817. Schubert Mpia'—interesting as showing that in 'Abschied,' he has added his own comment to Schiller's words; that he dated his pieces at the moment of beginning them; and that he sometimes signed his name without the 'Franz.'

His circle of intimate friends was increased about this date by Anselm and Joseph Hüttenbrenner and Joseph Gahy. Anselm, four years his senior, was a pupil of Salieri's, and there they had met in 1815. With the younger brother, Joseph, he became acquainted in the summer of 1817.[2] Both were men of independent means, and Anselm was a musician by profession. Gahy was in the government employment, an excellent pianoforte player, of whom Schubert was for long very fond. The younger Hüttenbrenner was bewitched by Schubert, much as Krumpholz and Schindler were by Beethoven; and was ever ready to fetch and carry for his idol, and to praise whatever he did, till the idol would turn on his worshipper, and be so cruel as to get the nickname of 'The Tyrant' from the rest of the set.

How Schubert existed since he threw up his place at the school and left his father's house is a point on which we are in entire ignorance. His wants were few, but how even those few were supplied is a mystery. We have seen that he lived rent-free with Schober for a few months in 1816, but the return of Schober's brother put an end to the [3]arrangement, and from that date he must have been indebted to Spaun, or some friend better off than himself, for lodgings, for existence, and for his visits to the theatre, for there is no trace of his earning anything by teaching in 1817, and the few pounds paid him for the Watteroth cantata is the only sum which he seems to have earned up to this date.

In the summer of 1818, however, on the recommendation of Unger, the father of Mad. Unger-Sabatier, the great singer, Schubert accepted an engagement as teacher of music in the family of Count Johann Esterhazy, to pass the summer at his country seat at Zelész, in Hungary, on the Waag, some distance east of Vienna, and the winter in town. He was to be a member of the establishment and to receive two gulden for every lesson. The family consisted of the Count and Countess, two daughters, Marie, 13, and Caroline, 11, and a boy of 5. All were musical. The Count sang bass, the Countess and Caroline contralto, Marie had a fine soprano, and both daughters played the piano. Baron von Schönstein, their intimate friend, slightly older than Schubert, a singer of the highest qualities, with a noble baritone voice, made up the party, which certainly promised all the elements of enjoyment. It was a pang to Schubert to part from the circle of his companions, to whom he was devoted, but it is not difficult to imagine how pleasant he must have found the comfort and generous living of the Esterhazy house, while at the same time there would be opportunities of retirement, and abundant means of diversion in a beautiful country, a new people, and the Hungarian and gipsy melodies.

When they left town does not appear.[4] Schubert's Mass in [5]C, his 4th, written like the others, for Holzer, is dated 'July, 1818'; but there is nothing to show whether it was finished in Vienna or in the country. A set of MS. Solfeggi for the Countess Marie, also dated July, is perhaps evidence that by that time they were settled at Zelész. Two letters to Schober are printed by [6]Bauernfeld, and are dated Aug. 3, and Sept. 18, 1818. The first is addressed to his home circle, his 'dearest fondest friends . . Spaun, Schober, Mayrhofer, and Senn . . . you who are everything to me.' There are messages also to Vogl, and to Schober's mother and sister, and to 'all possible acquaintances,' and an urgent entreaty to write soon—'every syllable of yours is dear to me.' He is thoroughly well and happy, and 'composing like a god. . . Mayrhofer's Einsamkeit is ready, and I believe it to be the best thing I have yet done, for I was *without anxiety*' (*ohne Sorge*—the italics are his own). 'Einsamkeit' (Lf. 32) is a long ballad, filling 19 close pages of print, with a dozen changes of tempo and as many of signature; perhaps not quite coming up to his own estimate of it, though both words and music are often very striking. The length of this and other ballads will probably always hinder their wealth of melody, dramatic effects, and other striking beauties, from being known by the world at large.

The other letter, seven weeks later, throws more light on his position at Zelész, 'as composer, manager, audience, everything, in one.' 'No one here cares for true Art, unless it be now and then the Countess; so I am left alone with my beloved, and have to hide her in my room, or my

[1] For 'Sign.' A facsimile is given by Reissmann.

[2] So Kreissle, i. 128. But does not the dedication of the song, 'Die Erwartung,' composed Feb. 27, 1815,—'to his friend' J. H.—show that the acquaintance was of much earlier date? True, it was not published till the April after Schubert's death; and the song may have been prepared by him for publication shortly before, and the dedication added then.

[3] K.H. 109 (i. 112).

[4] There is an interesting autograph copy of the 'Forelle' song dated at A. Hüttenbrenner's Lodgings (in Vienna) midnight Feb. 21, 1818, and besprinkled with ink instead of sand. It has been published in photography. But the 'Forelle' really dates from 1817. (Nottebohm, in the Them. Catalogue.)

[5] Published in 1826 as op. 48. Schubert wrote a new and most beautiful Benedictus to it in 1828, only a few months before his death.

[6] In 'Die Presse,' Vienna, Ap. 17, 1869. Reprinted in the 'Signale,' Nov. 15, 1869.

piano, or my own breast. If this often makes me sad, on the other hand it often elevates me all the more. Several songs have lately come into existence, and I hope very successful ones.' He is evidently more at home in the servants' hall than the drawing-room. 'The cook is a pleasant fellow; the ladies'-maid is thirty; the housemaid very pretty, and often pays me a visit; the nurse is somewhat ancient; the butler is my rival; the two grooms get on better with the horses than with us. The Count is a little rough; the Countess proud, but not without heart; the young ladies good children. I need not tell you, who know me so well, that with my natural frankness I am good friends with everybody.' The letter ends with an affectionate message to his parents.

The only songs which can be fixed to this autumn, and which are therefore doubtless those just referred to, besides the great 'Einsamkeit,' are the 'Blumenbrief' (Lief. 21, no. 1), 'Blondel und Maria,' 'Das Marienbild' and 'Litaney,' 'Das Abendroth'—for a contralto, evidently composed for the Countess; 'Vom Mitleiden Mariä,' and three Sonnets from Petrarch (MS.). The Hungarian national songs left their mark in the '36 original dances,' or 'First Waltzes' (op. 9), some of which were written down in the course of the next year. The 'Divertissement à la hongroise,' and the Quartet in A minor (op. 29), in which the Hungarian influence is so strong, belong—the first apparently, the second certainly—to a much later period.

A third letter of this date, hitherto unprinted, with which the writer has been honoured by the granddaughter[1] of Ferdinand Schubert, to whom it was addressed, is not without interest, and is here printed entire. The Requiem referred to was by Ferdinand, and had evidently been sent to his brother for revision. The letter throws a pleasant light on the strong link existing between Franz and his old home, and suggests that assistance more solid than 'linen' may often have reached him from his fond step-mother in his poverty in Vienna. In considering the pecuniary result of the engagement, it must be remembered that the florin was at that time only worth a franc, instead of two shillings. The month's pay therefore, instead of being £20, was really only about £8. Still, for Schubert that was a fortune.

24 Aug. 1818.

Dear brother Ferdinand,

It is half-past 11 at night, and your Requiem is ready. It has made me sorrowful, as you may believe, for I sang it with all my heart. What is wanting you can fill in, and put the words under the music and the signs above. And if you want much rehearsal you must do it yourself, without asking me in Zelész. Things are not going well with you; I wish you could change with me, so that for once you might be happy. You should find all your heavy burdens gone, dear brother; I heartily wish it could be so.—My foot is asleep, and I am mad with it. If the fool could only write it wouldn't go to sleep!

Good morning, my boy, I have been asleep with my foot, and now go on with my letter at 8 o'clock on the 25th. I have one request to make in answer to yours. Give my love to my dear parents, brothers, sisters, friends, and acquaintances, especially not forgetting Carl. Didn't he mention me in his letter? As for my friends in the town, bully them, or get some one to bully them well, till they write to me. Tell my mother that my linen is well looked after, and that I am well off, thanks to her motherly care. If I could have some more linen I should very much like her to send me a second batch of pocket-handkerchiefs, cravats, and stockings. Also I am much in want of two pair of kerseymere trowsers. Hart can get the measure wherever he likes. I would send the money very soon. For July, with the journey-money, I got 200 florins.

It is beginning already to be cold, and yet we shall not start for Vienna before the middle of October. Next month I hope to have a few weeks at Freystadt, which belongs to Count Erdödy, the uncle of my count. The country there is said to be extraordinarily beautiful. Also I hope to get to Pesth while we are at the vintage at Bosczmedj, which is not far off. It would be delightful if I should happen to meet Herr Administrator Taigele there. I am delighted at the thought of the vintage, for I have heard so much that is pleasant about it. The harvest also is beautiful here. They don't stow the corn into barns as they do in Austria, but make immense heaps out in the fields, which they call *Tristen*. They are often 80 to 100 yards long, and 30 to 40 high, and are laid together so cleverly that the rain all runs off without doing any harm. Oats and so on they bury in the ground.

Though I am so well and happy, and every one so good to me, yet I shall be immensely glad when the moment arrives for going to Vienna. Beloved Vienna, all that is dear and valuable to me is there, and nothing but the actual sight of it will stop my longing! Again entreating you to attend to all my requests, I remain, with much love to all, your true and sincere,

Franz Mpia.

A thousand greetings to your good wife and dear Resi, and a very hearty one to aunt Schubert and her daughter.

The inscription 'Zelész, Nov. 1818' on the song 'Das Abendroth' shows that the return to Vienna was not till nearly the end of the year. He found the theatre more than ever in possession of Rossini. To the former operas, 'Elisabetta' was added in the autumn, and 'Otello' early in Jan. 1819. But one of the good traits in Schubert's character was his freedom from jealousy, and his determination to enjoy what was good, from whatever quarter it came, or however much it was against his own interest. A letter of his to Hüttenbrenner, written just after the production of 'Otello,' puts this in very good light. 'Otello is far better and more characteristic than Tancredi. Extraordinary genius it is impossible to deny him. His orchestration is often most original, and so is his melody; and except the usual Italian gallopades, and a few reminiscences of Tancredi, there is nothing to object to.' But he was not content to be excluded from the theatre by every one, and the letter goes on to abuse the 'canaille of Weigls and Treitschkes,' and 'other rubbish, enough to make your hair stand on end,' all which were keeping his operettas off the boards. Still, it is very good-natured abuse, and so little is he really disheartened, that he ends by begging Hüttenbrenner for a libretto; nay, he had actually just completed a little piece called 'Die Zwillingsbrüder' ('the Twins'), translated by Hofmann from the French—a Singspiel in one act, containing an overture and 10 numbers. He finished it on Jan. 19, 1819, and it came to performance before many months were over.

Of his daily life at this time we know nothing. We must suppose that he had regular duties with his pupils at the Esterhazys' town house.

[1] Fräulein Caroline Geisler, daughter of Linus Geisler and Ferdinand's second daughter, Elise.

but there is nothing to say so. We gather[1] that he joined Mayrhofer in his lodgings, 420 in the Wipplingerstrasse, early in the year. It was not a prepossessing apartment. 'The lane was gloomy; both room and furniture were the worse for wear; the ceiling drooped; the light was shut out by a big building opposite—a worn-out piano, and a shabby bookcase.' The only relief is the name of the landlady—Sanssouci, a Frenchwoman. No wonder that Mayrhofer's poems—he was ten years Schubert's senior—were of a gloomy cast.

The two friends were on the most intimate terms, and addressed each other by nicknames. What Mayrhofer's appellation may have been we do not know, but Schubert, now and later, was called 'the Tyrant,' for his treatment of Hüttenbrenner; also 'Bertl,' 'Schwammerl,' and, best of all, 'Kanevas'—because when a stranger came into their circle his first question always was, 'Kann er was?' 'Can he do anything?' Their humour took all sorts of shapes, and odd stories are told of their sham fights, their howls, their rough jokes and repartees.[2] Mayrhofer was a Government employé, and went to his office early, leaving his fellow-lodger behind. Schubert began work directly he awoke, and even slept in his spectacles to save trouble; he got at once to his writing, sometimes in bed, but usually at his desk. It was so still, when Hiller[3] called on him eight years later. 'Do you write much?' said the boy, looking at the manuscript on the standing desk—they evidently knew little in North Germany of Schubert's fertility. 'I compose every morning, was the reply; and when one piece is done, I begin another.' And yet this was the *musicien le plus poète que jamais*—it might have been the answer of a mere Czerny! Add to this a trait, communicated to the writer by Schubert's friend, Franz Lachner, of Munich, that when he had completed a piece, and heard it sung or played, he locked it up in a drawer, and often never thought about it again.

This close work went on till dinner-time—two o'clock—after which, as a rule, he was free for the day, and spent the remainder either in a country walk with friends, or in visits—as to Sofie Müller, and Mad. Lacsny Buchwieser, whom we shall encounter further on; or at Schober's rooms, or some coffee-house—in his later days it was Bogner's Café in the Singerstrasse, where the droll cry of a waiter was a never-ending pleasure to him. But no hour or place was proof against the sudden attack of inspiration when anything happened to excite it. An instance occurs at this very time, Nov. 1819, in an overture for 4 hands in F (op. 34), which he has inscribed as 'written in Joseph Hüttenbrenner's room at the City Hospital in the inside of three hours; and dinner missed in consequence.'[4] If the weather was fine he would stay in the country till late, regardless of any engagement that he might have made in town.

The only compositions that can be fixed to the spring of 1819 are 5 songs dated February, and one dated March; a very fine quintet for equal voices, to the 'Sehnsucht' song in 'Wilhelm Meister'—a song which he had already set for a single voice in 1816, and was to set twice more in the course of his life (thus rivalling Beethoven, who also set the same words four times); an equally fine quartet for men's voices, 'Ruhe, schönstes Glück der Erde,' dated April; and four sacred songs by Novalis, dated May.

The earnings of the previous summer allowed him to make an expedition this year on his own account. Mayrhofer remained in Vienna, and Vogl and Schubert appear to have gone together to Upper Austria. Steyr was the first point in the journey, a town beautifully situated on the Enns, not far south of Linz. They reached it early in July; it was Vogl's native place, and he had the pleasure of introducing his friend to the chief amateurs of the town, Paumgartner, Koller, Dornfeld, Schellmann—substantial citizens of the town, with wives and daughters, 'Pepi Koller,' 'Frizi Dornfeld,' 'the eight Schellmann girls,' etc., who all welcomed the musician with real Austrian hospitality, heard his songs with enthusiasm, and themselves helped to make music with him. His friend Albert Stadler was there also with his sister Kathi. How thoroughly Schubert enjoyed himself in this congenial *bourgeois* society, and in such lovely country—he mentions its beauties each time he writes—we have ample proof in two letters.[5] Among other drolleries the Erl King was sung with the parts distributed amongst Vogl, Schubert, and Pepi Koller. Perhaps too Schubert gave them his favourite version of it on a comb. Vogl's birthday (Aug. 10) was celebrated by a cantata in C, containing a terzet, 2 soprano and 2 tenor solos, and a finale in canon, pointed by allusions to his various operatic triumphs, words by Stadler, and music by Schubert.[6] After this the two friends strolled on to Linz, the home of the Spauns, and of Kenner and Ottenwald, whose verses Franz had set in his earlier days; and thence perhaps to Salzburg, returning to Steyr about the end of the month. Nor did the joviality of these good Austrians interfere with composition. Besides the impromptu cantata just mentioned, the well-known PF. quintet (op. 114), in which the air of 'Die Forelle' is used as the theme of the Andantino, was written at Steyr, possibly as a commission from the good Paumgartner, and was performed by the Paumgartner party. Schubert achieved in it the same feat which is somewhere ascribed to Mozart, of writing out the separate parts without first making a score, and no doubt played the pianoforte part by heart. The date of their departure, Sept. 14, is marked by an entry in the album of Miss Stadler, when Schubert delivered himself of the following highly correct sentiment:—'Enjoy the present so wisely, that

[1] In a letter to Mayrhofer from Linz, dated Aug. 19, 1819, he says, 'Let the bearer have my bed while he stays with you.' K.H. 159 (i. 160). The bed must have been his before he left town.

[2] K.H. 51 (i. 51).

[3] In Hiller's 'Künstlerleben,' p. 49.

[4] K.H. 160 (i. 162).

[5] K.H. 158–159 (i. 159, 160).

[6] Published to other words, 'Herrlich prangt,' as op. 158.

the past may be pleasant to recollect, and the future not alarming to contemplate.' This may pair off with a sentence written by Mozart, in English, in the Album of an English Freemason, which has not yet been printed:—'Patience and tranquility of mind contribute more to cure our distempers as the whole art of medicine. Wien, den 30te März 1787.'[1]

A few days more saw them again settled in Vienna. Each of the two letters preserved from the journey contains an obvious allusion to some love affair; but nothing is known of it. He could hardly have adopted a more effectual diversion from such sorrows than the composition of a mass, on an extended scale; that namely in A♭—his 5th—which he began this month under the serious title of 'Missa Solemnis'; but he seems to have dawdled over it more than over any other of his works; as it was not finished till Sept. 1822, and contains many marks of indecision.

The most pregnant musical event of this year is the fact that on Feb. 28, 1819, a song of Schubert's was sung in public—the 'Schäfers Klagelied,' sung by Jäger at Jäll's concert, at 5 p.m. at the 'Römische Kaiser,' Vienna. It was Schubert's first appearance before the public in any capacity, and is noticed by the Leipzig A. M. Z. in these terms:—'Goethe's Schäfers Klagelied set to music by Herr Franz Schubert—the touching and feeling composition of this talented young man was sung by Herr Jäger in a similar spirit.' Such is the first utterance of the press on one who has since evoked so much enthusiasm! In the course of this year Schubert appears to have forwarded the three songs, 'Schwager Kronos,' 'Ueber Thal' (Mignon), and 'Ganymed,'—afterwards published as op. 19,—to Goethe; but no notice was taken by the poet of one who was to give some of his songs a wider popularity than they could otherwise have enjoyed, a popularity independent of country or language; nor does Schubert's name once occur in all the 6 vols. of Goethe's correspondence with Zelter.[2]

1820 was again a year of great activity. Owing to Vogl's influence, Schubert was gradually attracting the attention of the managers. The 'Zwillingsbrüder' had been written for the Kärnthnerthor theatre (see p. 330 *b*), and it was not long before the *regisseur* of the rival opera-house, the Theatre an-der-Wien, suggested to him a libretto called the 'Zauberharfe,' or 'Magic harp,' a melodrama in 3 acts, by the same Hofmann who had translated the former piece. To receive such a proposal and to act upon it was a matter of course with Schubert, and the 'Zauberharfe' is said to have been completed in a fortnight.[3] But before this, early in the year, he had met with the works of A. H. Niemeyer, Professor of Theology at Halle, and had adopted the poem of 'Lazarus, or the Feast of the Resurrection' for an Easter Cantata. Easter fell that year on April 2, and his work is dated 'February,' so that he was in ample time. The poem—or drama, for there are seven distinct characters—is in three parts. 1. The sickness and death. 2. The burial and elegy. 3. The resurrection. Of these the 1st and a large portion of the 2nd were completed by Schubert, apparently without the knowledge of any of his friends. Ferdinand mentions the first part in his list,[4] but the existence of the second was unknown, till, through the instrumentality of Mr. Thayer, it was unearthed in 1861. These have been [5]published, but no trace of the 3rd act has yet been found, and the work was not performed till long after the composer's death—viz. in 1863.

On June 14 the 'Zwillingsbrüder' or 'Zwillinge' was produced at the Kärnthnerthor theatre. It is a comic operetta ('Posse'), with spoken dialogue, in one act, containing an overture and 10 numbers, and turns on the same plot that has done duty in 'Box and Cox' and a dozen other farces, the confusion between two twin-brothers, who were both acted by Vogl. The overture was encored on the first night, and Vogl's two songs were much applauded, but the piece was virtually a *fiasco*, and was withdrawn after six representations. Schubert took so little interest in its production that, like Mendelssohn at the 'Wedding of Camacho,' he did not even stay in the house, and Vogl had to appear instead of him in front of the curtain. The libretto, though overburdened with characters, is sadly deficient in proportion, and contains very little action. Schubert's music, on the other hand, is light, fresh, and melodious, pointed, unusually compact, and interesting throughout. In the concerted numbers there is evidence of great dramatic power. To condemn it, as the critics of the day do, as wanting in melody, and constantly striving after originality, is to contradict Schubert's most marked characteristics, and is contrary to the facts. There is possibly more justice in the complaint that the accompaniments were too loud, though that is certainly not the fault in his masses, his only other published works with orchestral accompaniments anterior to this date. The work has been published in vocal score by Peters (1872).

On August 19 the Zauberharfe was produced at the Theatre an-der-Wien. It is said to consist chiefly of chorus and melodrama, with only a few solos, among them a romance for tenor which was highly praised. There is a fine overture (in C), original, characteristic, and full of beauty, which was published before 1828 as op. 26, under the name of 'Rosamunde,' to which it seems to have no [6]claim. The piece was occasionally brought forward till the winter, and was then dropped. These three vocal works appear so far to have whetted Schubert's appetite that in the autumn he attacked the more important libretto of 'Sakontala,' a regular opera in 3 acts, by P. H. Neumann, founded on the Indian drama of that name. He sketched 2 acts, and there it remains; the MS. is in Herr Dumba's possession.

1 I owe this to my good friend Mr. Pohl, of Vienna.

2 Search should be made in the *Goethe Archiv* at Weimar for the autograph of these songs, and the letter which doubtless accompanied them.

3 Autograph in Herr Dumba's collection.

4 N.Z.M. 139 *a*.

5 In 1866, by Spina.

6 The overture played to the Rosamunde music is in D minor, and was afterwards published as 'Alfonso & Estrella.' There is perhaps another in existence. See the letter to von Mosel quoted further on.

Another important and very beautiful piece is the 23rd [1] Psalm, set for 2 sopranos and 2 altos with PF. accompaniment, at the instigation of the sisters Fröhlich, and dated at the beginning '23 Dec. 1820'—perhaps with a view to some private concerts given, now or later, at the old hall of the Musikverein. Another is the 'Gesang der Geister über den Wassern' of Goethe (op. 167). This fine and mystical poem had a strong attraction for Schubert. He set it for 4 equal voices in 1817; then he reset it for 4 tenors and 4 basses with 2 violas, 2 cellos, and bass, in Dec. 1820; and lastly revised this in Feb. 1821. It was first produced on March 7, 1821, and found no favour, to Schubert's disgust. It was again performed on March 30, before a more receptive audience, with a far better result. It was revived at Vienna in 1858 by Herbeck, and in England was performed with success on March 22, 1881, under the direction of Mr. Prout. It is enormously difficult, and, though perfectly in character with the poem, will probably never be attractive to a mixed audience. Another work of 1820 were some antiphons (op. 113) for Palm Sunday (March 26), composed for Ferdinand, who had been recently appointed Choirmaster at the Altlerchenfelder Church, and found the duties rather too much for him. They are written with black chalk, on coarse gray wrapping-paper; and the tradition is that they and two motets were written in great haste, just in time for the service. On Easter Sunday Franz attended and conducted the mass for his brother.

The Fantasie in C for PF. solo (op. 15), containing Variations on Schubert's own 'Wanderer,' is probably a work of this year. It was written for von Liebenberg, a PF. player, to whom Schubert dedicated it. This fine piece has lately been brought into vogue by Liszt's arrangement of it for PF. and orchestra as a concerto; but it is doubtful if it is improved by the process. Schubert never could play it; he always stuck fast in the last movement; and on one occasion jumped up and cried 'let the devil himself play it!' Another piece is an Allegro for strings in C minor, dated Dec. 1820, the first movement of a quartet, of which there exist besides 41 bars of the Andante, in A♭. The Allegro is of first-rate quality, and Schubert in every bar. It was published in 1868 by Senff. The MS. is in Mr. Brahms's fine collection of autographs.

The songs of 1820, 17 in all, though not so numerous as those of previous years, are very fine. They contain 'Der Jüngling auf dem Hügel' (op. 8, no. 1), 'Der Schiffer' (Lf. 33, no. 1), 'Liebeslauschen' (Lf. 15, no. 2), 3 grand songs to Mayrhofer's words, 'Orest auf Tauris,' 'Der entsühnte Orest,' and 'Freiwilliges Versinken' (Lf. 11), and 4 Italian Canti, written for Frl. von Romer, who afterwards married Schubert's friend Spaun, and since published with one which was probably written under Salieri's eye as early as 1813. The most remarkable of all is 'Im Walde' or 'Waldesnacht' (Lf. 16), a very long song of extraordinary beauty, variety, force, and imagination.

[1] To Moses Mendelssohn's translation.

With February 1821 Schubert entered his 25th year, and it was a good omen to receive such a birthday present as the three testimonials of this date which Kreissle has [2] preserved. The first is from von Mosel, then Court Secretary; the second from Weigl, Director of the Court Opera, Salieri, and von Eichthal; the third from Moritz Count Dietrichstein, whom Beethoven addresses as 'Hofmusikgraf,' and who appears to have been a sort of Jupiter-Apollo with general sway over all Court music. These influential personages warmly recognise his eminent ability, industry, knowledge, feeling, and taste, and profess the best intentions towards him. The three documents were enclosed by the Count in a letter to Vogl, full of good wishes for the future of his friend. Still more gratifying was the prospect, which now at last opened, of the publication of his songs. It was the first good epoch in Schubert's hitherto struggling life. He had now been writing for more than seven years, with an industry and disregard of consequences which are really fearful to contemplate; and yet, as far as fame or profit were concerned, might almost as well have remained absolutely idle. Here at length was a break in the cloud. It was not less welcome because it was mainly due to his faithful friends, the Sonnleithners, who had made his acquaintance through the accident of Leopold Sonnleithner's being at school with him, and ever since cherished it in the most faithful and practical way, Ignaz, the father, having, since 1815, had large periodical music-meetings of artists and amateurs in his house at the Gundelberg, which were nothing less than Schubert propaganda. Here, before large audiences of thoroughly musical people, Schubert's pieces were repeatedly performed, and at length, on Dec. 1, 1820, the 'Erl King' was sung by Gymnich, a well-known amateur, with a spirit which fired every one of the audience with the desire to possess the song, and appears to have suggested to Leopold and Gymnich the possibility of finding a publisher for the inspirations which had for so long been their delight and astonishment. They applied to Diabelli and Haslinger, the leading houses of Vienna, but without success; the main objections being the insignificance of the composer, and the difficulty of his PF. accompaniments. On this they resolved to take the matter into their own hands; and, probably not without misgivings, had the 'Erl King' engraved. The fact was announced at the next Concert at the Gundelberg, and a hundred copies were at once subscribed for in the room—sufficient to defray the cost of the engraving and printing, and of engraving a second song as well. Meantime the 'Erl King' had been sung in public (for the concerts at the Gundelberg were, strictly speaking, private, limited to the friends of the host) by Gymnich, at an evening concert of the Musikverein, in one of the public rooms of the city, on Jan. 25, 1821, Schubert himself appearing on the platform, and playing

[2] K.H. 201 (i. 203).

the accompaniment. Everything was done by the young enthusiasts to foster the Schubert *furore*, even to the publication of a set of 'Erl King waltzes' by A. Hüttenbrenner, which at any rate must have made the name familiar, though they provoked Schubert, and drew from him some satirical hexameters and pentameters which may be read in Kreissle.[1] On Feb. 8 the programme of the Musikverein Concert included three songs of his, the 'Sehnsucht' by Schiller, 'Gretchen am Spinnrade,' and 'Der Jüngling auf dem Hügel'; and on March 8 the 'Gruppe aus dem Tartarus.' On March 7 the 'Erl King' was again sung, this time by Vogl himself, at an unmistakeable public concert, at the Kärnthnerthor theatre, a concert supported by all the most distinguished ladies of the Court, who received the song with loud applause. Think what the first appearance of these godlike pieces must have been! It was the rising of the Sun! He is now an every-day sight to us; but how was it the first time that he burst in all his brightness on the eyes of mortals? In the midst of all this enthusiasm the 'Erl King' was published on the 1st of April, 1821, by Cappi and Diabelli, on commission. It was dedicated to Count Moritz Dietrichstein, whose kindness well deserved that recognition. On April 30, 'Gretchen am Spinnrade' appeared as op. 2. The succeeding publications—each made to depend on the success of the last—were as follows:—

May 29.	Op. 3. Schäfers Klagelied; Meeres-Stille; Heidenröslein; Jägers Abendlied.
Do.	Op. 4. Der Wanderer; Morgenlied; Wanderers Nachtlied.
July 9.	Op. 5. Rastlose Liebe; Nähe des Geliebten; Der Fischer; Erster Verlust; Der König in Thule.
Aug. 23.	Op. 6. Memnon; Antigone und Oedip; Am Grabe Anselmos.
Nov. 27.	Op. 7. Die abgeblühte Linde; Der Flug der Zeit; Der Tod und das Mädchen.

Here the publication by commission stopped, the Diabellis being evidently convinced that the risk might be profitably assumed; and accordingly op. 8 appears on May 9, 1822, as 'the property of the publishers.' The dedications of the first seven numbers no doubt furnish the names of Schubert's most influential supporters: 1. Graf von Dietrichstein; 2. Reichsgraf Moritz von Fries; 3. Ignaz von Mosel; 4. Johann Ladislaus Pyrker, Patriarch of Venice; 5. Salieri; 6. Michael Vogl; 7. Graf Ludwig Széchényi. It must be admitted that the above are very good lists, and that if Schubert had waited long for the publication of his works, the issue of twenty songs in eight months, under the patronage of seven such eminent personages, was a substantial compensation. We do not hear, however, that much money came into his hands from the publication. The favourable impression made by the publication may be gathered from the long, intelligent, and sympathetic criticism, 'Blick auf Schuberts Lieder,' by F. von Hentl, which appeared in the 'Wiener Zeitschrift für Kunst,' etc.—a periodical belonging to Diabelli's rivals, Steiner & Co.—for March 23, 1822.

Schubert was now a good deal about the theatre, and when it was determined to produce a German version of Hérold's 'Clochette,' as 'Das Zauberglöckchen,' at the Court-opera, he was not unnaturally called upon to insert a couple of pieces to suit the Vienna audience. It was what Mozart often did for the Italian operas of his day—what indeed we know Shakspeare to have done in more than one case. The opera was produced on June 20. The interpolated pieces were a long air for tenor,[2] in 3 movements—Maestoso, Andante, and Allegro—full of passion and imagination, and a comic duet (said to be very comic) between the princes B flat and C natural (Bedur and Cedur). They were more applauded than anything else in the work, but Schubert's name was not divulged; the opera as a whole did not please, and was soon withdrawn.

The little Variation which he contributed, as no. 38, to Diabelli's collection of 50 Variations — the same for which Beethoven wrote his 33 (op. 120) — should not be overlooked. Though not published till 1823, the autograph, now in the Hofbibliothek at Vienna, is dated 'March 1821.' The variation is fresh and pretty, in the minor of the theme, but is more noticeable from its situation than from its own qualities. A few dances for PF. solo are dated '8th March' and 'July' in this year, and a collection of 36, containing those alluded to, and others of 1816 and 1819, was published by Cappi and Diabelli on Nov. 29, as op. 18. Some of these are inscribed in the autograph 'Atzenbrucker Deutsche, July 1821,' indicating a visit to Atzenbruck, the seat of an uncle of Schober's, near Abstetten, between Vienna and St. Pölten, where a three days' annual festivity was held, to which artists of all kinds were invited, and where Schubert's presence and music were regarded as indispensable.

Whether after this he and Schober returned to Vienna we know not, no letters remain; but the next event of which any record remains is the composition of a Symphony, his seventh, in E, which is marked, without note of place, as begun in August. He did not complete the writing of it, and indeed it is probable that it did not occupy him more than a few hours; but the autograph, which is in the writer's possession,[3] is a very curious manuscript, probably quite unique, even among Schubert's feats of composition. It occupies 167 pages of 42 sheets, (10 quires of 4, and 1 of 2), and is in the usual movements—Adagio in E minor, and Allegro in E major; Andante in A; Scherzo in C, and Trio in A; and Allegro giusto in E major. The Introduction and a portion of the Allegro are fully scored and marked; but at the 110th bar

[1] Hanslick, 'Concertwesen,' 284; and K. H. 60 (i. 60).

[2] Introduced into 'Alfonso und Estrella' in 1881 by Joh. Fuchs.

[3] I received it in 1868 from the late Paul Mendelssohn, Felix's brother, into whose hands it came after his brother's death. Felix Mendelssohn had it from Ferdinand Schubert direct.

—the end of a page—Schubert appears to have grown impatient of this regular proceeding, and from that point to the end of the work has made merely memoranda. But these memoranda are, in their way, perfectly complete and orderly to the end of the Finale. Every bar is drawn-in ; the *tempi* and names of the instruments are fully written at the beginning of each movement; the *nuances* are all marked; the very double bars and flourishes are gravely added at the end of the sections, and 'Fine' at the conclusion of the whole; and Schubert evidently regarded the work as no less complete on the paper than it was in his mind. And complete it virtually is; for each subject is given at full length, with a bit of bass or accompaniment-figure, or *fugato* passage. There is not a bar from beginning to end that does not contain the part of one or more instruments; at all crucial places the scoring is much fuller; and it would no doubt be possible to complete it as Schubert himself intended. It is said that Mendelssohn contemplated doing so, but this is probably a mere legend, and Mendelssohn was too practical to give his time to a work which at the best could only be regarded as a curiosity. Though containing much that is original, and as deeply imbued throughout with melody and spirit as any of the preceding six, this symphony is, like them, virtually a work of the old school, and it required another year before Schubert could break with the past, and in the two movements of his unfinished 8th Symphony in B minor, and the great Entr'acte to 'Rosamunde,' in the same key, appear in the orchestra in his own individual and native shape, as he had done in the Song so many years before.[1]

We next find the two friends at the castle of Ochsenburg, a few miles south of St. Pölten, the seat of the Bishop, who was a relative of Schober's; and there and in St. Pölten itself they passed a thoroughly happy and healthy holiday of some weeks in September and October. The Bishop and Baron Mink, a local magnate, were congenial hosts, and the visit of the two clever young men was the signal for various festivities, in which all the aristocracy of the country-side—'a princess, two countesses, and three baronesses,' in Schober's enumeration—took part, and in which the music and drollery of Schubert and his friend delighted every one. The great result of the visit however was the composition of an opera to Schober's words, on a romantic subject of battles, love, conspiracy, hunting, peasant life, and everything else, so natural in opera librettos, so impossible in real life. It was called 'Alfonso and Estrella,' and two acts were completed before their return to town. The first act is dated at the end of the autograph Sept. 20, and the second Oct. 20. A week later they were back again in Vienna.

[1] The change in this symphony from the Scherzo in C to the Trio in A, by an E in octaves in the oboes lasting 4 bars, is an anticipation of the similar change in the same place in the great C major Symphony of 1828, and a curious instance of the singular way in which many of Schubert's earlier symphonies lead up to his crowning effort.

The songs composed in 1821 are very important, and comprise some of his very finest, and in the most various styles. It is sufficient to name among the published ones 'Grenzen der Menschheit' (Feb., Lf. 14, no. 1); 'Geheimes' (March, op. 14, no. 2); Suleika's two songs (ops. 14, 31); 'Sey mir gegrüsst' (op. 20, no. 1); and 'Die Nachtigal,' for four men's voices (op. 11, no. 2)—all of the very highest excellence, of astonishing variety, and enough of themselves to make the fame of any ordinary composer. A fine setting of 'Mahomet's song,' by Goethe, for bass (possibly for Lablache), was begun in March, but remains a MS. fragment.

The third act of 'Alfonso and Estrella' was finished on Feb. 27, 1822. The fact that a thoroughly worldly, mercenary, money-making manager like Barbaja, who was at the same time a firm believer in Rossini, had become lessee of the two principal theatres of Vienna, augured badly for Schubert's chance of success in that direction. But indeed the new piece seems to have been calculated to baffle any manager, not only in Vienna, but everywhere else. It caused, as we shall see, a violent dispute, eighteen months later, between Schubert and Weber, which but for Schubert's good temper would have led to a permanent quarrel. Anna Milder, to whom Schubert sent a copy of the work in 1825, tells him, in a letter full of kindness and enthusiasm, that the libretto will not suit the taste of the Berliners, 'who are accustomed to the grand tragic opera, or the French opéra comique.' Nor was the libretto the only drawback. Schubert, like Beethoven in 'Fidelio,' was in advance of the modest execution of those days. At Gratz, the abode of the Hüttenbrenners, where there was a *foyer* of Schubert-enthusiasts, the opera got as far as rehearsal, and would probably have reached the stage, if the accompaniments had not proved impossible for the band.[2] No performance took place until twenty-six years after poor Schubert's death, namely at Weimar, on June 24, 1854, under the direction of Liszt, who, with all his devotion to the master, had to reduce it much for performance. It was very carefully studied, and yet the success, even in that classical town, and with all Liszt's enthusiasm and influence, seems to have been practically *nil*. At last, however, its time came. Twenty-five years later, in 1879, it was again taken in hand by Capellmeister Johann Fuchs of the Court opera, Vienna, who entirely rewrote the libretto, and greatly curtailed the work; and in this form it was brought to performance at Carlsruhe in March 1881, with great success. Several numbers were extremely applauded, and the opera now bids fair to become a stock piece in the German, and let us hope the English, theatres.

But to return to Schubert and 1822. Early in the year he made the acquaintance[3] of

[2] K.H. 249 (i. 252).

[3] For their meeting we have the authority of Weber's son in his biography, ii. 420. But his statement that Schubert was alienated from Weber by Weber's criticism on Rosamunde is more than doubtful, because Rosamunde was probably not composed till some 19 months later, and because it was not Schubert's habit to take offence at criticism.

Weber, who spent a few weeks of February and March in Vienna to arrange for the production of his Euryanthe. No particulars of their intercourse on this occasion survive. With Beethoven Schubert had as yet hardly exchanged words. And this is hardly to be wondered at, because, though Vienna was not a large city, yet the paths of the two men were quite separate. Apart from the great difference in their ages, and from Beethoven's peculiar position in the town, his habits were fixed, his deafness was a great obstacle to intercourse, and, for the last five or six years, what with the lawsuits into which his nephew dragged him, and the severe labour entailed by the composition of the Mass in D, and of the Sonatas ops. 106, 109, 110, and 111—works which by no means flowed from him with the ease that masses and sonatas did from Schubert—he was very inaccessible. Any stranger arriving from abroad, with a letter of introduction, was seen and treated civilly. But Schubert was a born Viennese, and at the time of which we speak, Beethoven was as much a part of Vienna as St. Stephen's tower, and to visit him required some special reason, and more than special resolution.

A remark of Rochlitz's[1] in the July of this year shows that Schubert was in the habit of going to the same restaurant with Beethoven, and worshipping at a distance; but the first direct evidence of their coming into contact occurs at this date. On April 19, 1822, he published a set of Variations on a French air as op. 10, and dedicated them to Beethoven as 'his admirer and worshipper' (*sein Verehrer und Bewunderer*). The Variations were written in the preceding winter, and Schubert presented them in person to the great master. There are two versions of the interview,[2] Schindler's and J. Hüttenbrenner's. Schindler was constantly about Beethoven. He was devoted to Schubert, and is very unlikely to have given a depreciating account of him. There is therefore no reason for doubting his statement, especially as his own interest or vanity were not concerned. It is the first time we meet Schubert face to face. He was accompanied by Diabelli, who was just beginning to find out his commercial value, and would naturally be anxious for his success. Beethoven was at home, and we know the somewhat overwhelming courtesy with which he welcomed a stranger. Schubert was more bashful and retiring than ever; and when the great man handed him the sheaf of paper and the carpenter's pencil provided for the replies of his visitors, could not collect himself sufficiently to write a word. Then the Variations were produced, with their enthusiastic dedication, which probably added to Beethoven's good humour. He opened them and looked through them, and seeing something that startled him, naturally pointed it out. At this Schubert's last remnant of self-control seems to have deserted him, and he rushed from the room. When he got into the street, and was out of the magic of Beethoven's personality, his presence of mind returned, and all that he might have said flashed upon him, but it was too late. The story is perfectly natural, and we ought to thank Beethoven's Boswell for it. Which of us would not have done the same? Beethoven kept the Variations and liked them; and it must have been some consolation to the bashful Franz to hear that he often played them with his nephew. Hüttenbrenner's[3] story is that Schubert called, but found Beethoven out; which may have been an invention of Diabelli's to shield his young client.

This autumn Schubert again took up the Mass in A♭, which was begun in 1819; finished it, and inscribed it '*im 7b 822 beendet.*'[4] Not that that was the final redaction; for, contrary to his usual practice—in fact it is almost a solitary instance—he took it up again before his death, and made material improvements[5] both in the position of the voice-parts and in the instrumentation, as may be seen from the autograph score now in the Library of the Gesellschaft der Musikfreunde.

This year seems to have been passed entirely in Vienna, at least there are no traces of any journey; and the imprisonment in the broiling city, away from the nature he so dearly loved, was not likely to improve his spirits. What events or circumstances are alluded to in the interesting piece called 'My[6] dream,' dated 'July 1822,' it is hard to guess. It may not improbably have been occasioned by some dispute on religious subjects of the nature of those hinted at in his brother Ignaz's letter[7] of Oct. 12, 1818. At any rate it is deeply pathetic and poetical.

During this summer Joseph Hüttenbrenner was active in the cause of his friend. He made no less than four endeavours to bring out the 'Teufels Lustschloss'—at the Josefstadt and Court theatres of Vienna, at Munich, and at Prague. At Prague alone was there a gleam of hope. Hollbein, the manager there, requests to have the score and parts sent to him, at the same time regretting that during a month which he had passed in Vienna, Schubert had not once come near him. Hüttenbrenner also urged Schubert on Peters, the publisher, of Leipzig, who in a tedious egotistical letter, dated Nov. 14, 1822, gives the usual sound reasons of a cautious publisher against taking up with an unknown composer—for in North Germany Schubert was

3 K.H. 261 (i. 264).

4 7b stands for September.

5 This was kindly pointed out to the writer by Mr. Brahms, who has an early copy of the score, made by Ferdinand Schubert from the autograph in its original condition. In this shape Mr. Brahms rehearsed the mass, but found many portions unsatisfactory, and was interested to discover subsequently from the autograph that Schubert had altered the very passages alluded to, and made them practicable.—He made three attempts at the 'Cum Sancto' before succeeding, each time in fugue, and always with a different subject. Of the first there are 4 bars; of the second 199; the third is that printed in Schreiber's edition. This edition is unfortunately very incorrect. Not only does it swarm with misprints, but whole passages, and those most important ones (as in the Horns and Trombones of the Dona), are clean omitted. The *nuances* also are shamefully treated.

6 First printed by R. Schumann in the 'Neue Zeitschrift für Musik' for Feb. 5, 1839. See also K.H. 333 (ii. 16).

7 K.H. 146 (i. 148).

still all but unknown. One is sorry to hear of a little rebuff which he sustained at this time from the Gesellschaft der Musikfreunde of Vienna, to whom he applied to be admitted as a practising member (on the viola), but who refused him on the ground of his being a professional, and therefore outside their rules.[1] A somewhat similar repulse was experienced by Haydn from the Tonkünstler Societät. [See vol. i. 707 *a*.] On the other hand, the musical societies both of Linz and Gratz elected him an honorary member. To the latter of these distinctions we owe the two beautiful movements of the Symphony No. 8, in B minor, which was begun at Vienna on Oct. 30, 1822, and intended as a return for the compliment. The Allegro and Andante alone are finished, but these are of singular beauty and the greatest originality. In them, for the first time in orchestral composition, Schubert exhibits a style absolutely his own, untinged by any predecessor, and full of that strangely direct appeal to the hearer of which we have already spoken. It is certain that he never heard the music played, and that the new and delicate effects and orchestral combinations with which it is crowded, were the result of his imagination alone. The first movement is sadly full of agitation and distress. It lay hidden at Gratz for many years, until obtained from Anselm Hüttenbrenner by Herbeck, who first produced it in Vienna at one of the Gesellschaft concerts in 1865.[2] It was published by the excellent Spina early in 1867; was played at the Crystal Palace, Sydenham, April 6, 1867, and elsewhere in England, and always with increasing success. In fact no one can hear it without being captivated by it.

The Songs composed in 1822—14 printed and 2 in MS.—comprise 'Epistel von Collin' (Lf. 46; Jan.); 'Heliopolis' (Lf. 37, no. 1; April); 'Todesmusik,' with a magnificent opening (op. 108, no. 2; Sept.); 'Schatzgräbers Begehr' (op. 23, no. 4; Nov.) with its stately bass; 'Willkommen und Abschied' (op. 56, no. 1; Dec.); 'Die Rose' (op. 73) and 'Der Musensohn' (op. 92). The concerted pieces, 'Constitutionslied' (op. 157; Jan.), 'Geist der Liebe' (op. 11, No. 3), 'Gott in der Natur' (op. 133), and 'Des Tages Weihe' (op. 146), all belong to this year.

Publication went on in 1822, though not so briskly as before. The Variations dedicated to Beethoven (op. 10) were first to appear, on April 19. They were followed by op. 8 (4 songs) on May 9, and op. 11 (3 part-songs) on June 12. Then came a long gap till Dec. 13, on which day ops. 12, 13, and 14, all songs, appeared at once. We have not space to name them. But with such accumulated treasures to draw upon, it is unnecessary to say that they are all of the first class. The pecuniary result of the publications of 1821 had been good; 2000 gulden were realised, and of the 'Erl King' alone more than 800 copies had been sold; and if Schubert had been provident enough to keep his works in his own possession he would soon have been out of the reach of want. This however he did not do. Pressed by the want of money, in an incautious moment he sold the first 12 of his [3] works to Diabelli for 800 silver gulden (£80), and entered into some injudicious arrangement with the same firm for future publications. His old and kind friend Count Dietrichstein about this time offered him a post as organist to the Court Chapel, but he refused it, and he was probably right, though in so doing he greatly distressed his methodical old father. His habits, like Beethoven's, made it absurd for him to undertake any duties requiring strict attendance.

The Vienna Theatre being closed to Alfonso and Estrella, Schubert turned his thoughts in the direction of Dresden, where his admirer Anna Milder was living, and where Weber was Director of the Opera; and we find him in a letter of Feb. 28, 1823 (recently published [4] for the first time) asking his old patron Herr von Mosel for a letter of recommendation to Weber. He is confined to the house by illness, and apologises for not being able to call. There are no traces of reply to this application, but it probably led to nothing, for, as we shall see, the score of the opera was still in his hands in October. He was evidently now set upon opera. In the letter just mentioned he implores von Mosel to entrust him with a libretto 'suitable for his littleness'; and though he seems never to have obtained this, he went on with the best he could get, and 1823 saw the birth of no less than three dramatic pieces. The first was a one-act play with dialogue, adapted from the French by Castelli, and called 'die Verschworenen,' or 'the Conspirators.' The play was published in the 'Dramatic Garland'—an annual collection of dramas—for 1823. Schubert must have seen it soon after publication, and by April had finished the composition of it. The autograph, in the British Museum, has at the end the words 'Aprill 1823. F. Schubert, Ende der Oper.' It contains an overture and 11 numbers, and appears from Bauernfeld's testimony to have been composed with a view to representation at the Court-theatre. The libretto is a very poor one, with but few dramatic points, and confines the composer mainly to the Chorus. The licensers changed its title to the less suspicious one of 'Die häusliche Krieg' or 'The domestic Struggle,' and it was duly sent in to the management, but it returned in twelve months without examination. It did not come to performance at all during Schubert's lifetime, nor till 1861. In that year it was given, under Herbeck's direction, by the Musikverein, Vienna, on March 1 and 22; and on the stage at Frankfort on Aug. 29; since then at the Court-theatre, Vienna, at Munich, Salzburg, and other German towns; in Paris, Feb. 3, 1868, as 'La Croisade des Dames,' and at the Crystal Palace, Sydenham, March 2, 1872 as 'The Conspirators.' In less than two months after throwing off

[3] So say the books; but the works published on commission were ops. 1—7, containing 20 songs.

[4] In the Neue Freie Presse of Vienna, Nov. 19, 1881. The letter, though formal in style, is curiously free in some of its expressions. It mentions the overture to the 1st Act of Alfonso and Estrella. What can this be? The overture known under that name (op. 69) is dated 'Dec. 1823,' and is said to have been written for Rosamunde.

this lively Singspiel, Schubert had embarked in something far more serious, a regular 3-act opera of the 'heroico-romantic' pattern—also with spoken dialogue—the scene laid in Spain, with Moors, knights, a king, a king's daughter, and all the usual furniture of these dreary compilations. The libretto of 'Fierabras,' by Josef Kupelwieser—enough of itself to justify all [1] Wagner's charges against the opera books of the old school—was commissioned by Barbaja for the Court-theatre. The book was passed by the Censure on July 21; but Schubert had by that time advanced far in his labours, and had in fact completed more than half of the piece. He began it, as his own date tells us, on May 25. Act 1, filling 304 pages of large oblong paper,[2] was completely scored by the 31st of the month; Act 2, in 5 days more, by June 5; and the whole 3 acts, fully 1000 pages, and containing an overture and 23 numbers, were entirely out of hand by Oct. 2. And all for nothing! Schubert was not even kept long in suspense, for early in the following year he learnt that the work had been dismissed. The ground for its rejection was the badness of the libretto; but knowing Barbaja's character, and seeing that Kupelwieser was secretary to a rival house (the Josefstadt), it is difficult not to suspect that the commission had been given by the wily Italian, merely to facilitate the progress of some piece of business between the two establishments.

It is, as Liszt has remarked, extraordinary that Schubert, who was brought up from his youth on the finest poetry, should have unhesitatingly accepted the absurd and impracticable librettos which he did, and which have kept in oblivion so much of his splendid music. His devotion to his friends, and his irrepressible desire to utter what was in him, no doubt help to explain the anomaly, but an anomaly it will always remain. It is absolutely distressing to think of such extraordinary ability, and such still more extraordinary powers of work, being so cruelly thrown away, and of the sickening disappointment which these repeated failures must have entailed on so simple and sensitive a heart as his. Fortunately for us the strains in which he vents his griefs are as beautiful and endearing as those in which he celebrates his joys:—

> He wore no less a loving face
> Because so broken hearted.

His work this summer was not however to be all disappointment. If the theatre turned a deaf ear to his strains there were always his beloved songs to confide in, and they never deceived him. Of the Song in Schubert's hands we may say what Wordsworth so well says of the Sonnet:—

> With this key
> Shakespeare unlocked his heart; the melody
> Of this small lute gave ease to Petrarch's wound.
> . . . . . .
> . . . . . and when a damp
> Fell round the path of Milton, in his hand
> The thing became a trumpet, whence he blew
> Soul-animating strains, alas too few!

—with the notable difference that it was given to Schubert to gather up and express, in his one person and his one art, all the various moods and passions which Wordsworth has divided amongst so many mighty poets.

And now, in the midst of the overwhelming tumult and absorption which inevitably accompany the production of so large a work of imagination as a three-act opera, brought into being at so extraordinarily rapid a pace, he was to stop, and to indite a set of songs, which though not of greater worth than many others of his, are yet so intelligible, so expressive, address themselves to such universal feelings, and form so attractive a whole, that they have certainly become more popular, and are more widely and permanently beloved, than any similar production by any other composer. We have already described the incident through which Schubert made acquaintance with the Müller-lieder [3] of Wilhelm Müller, twenty of which he selected for the beautiful series or 'Cyclus,' so widely known as the 'Schöne Müllerin.' We have seen the enduring impatience with which he attacked a book when it took his fancy, and the eagerness with which he began upon this particular one. We know that the Müller-lieder were all composed this year; that some of them were written in hospital; that No. 15 is dated 'October'; that a considerable interval elapsed between the 2nd and 3rd Act of 'Fierabras'—probably the best part of July and August. Putting these facts together it seems to follow that the call on Randhartinger (see p. 327 *a*) and the composition of the first numbers of the 'Schöne Müllerin' took place in May, before he became immersed in 'Fierabras.' Then came the first two Acts of that opera; then his illness, and his sojourn in the hospital, and more songs; then the third Act of the opera; and lastly the completion of the Lieder.

Be this as it may, there was no lack of occupation for Schubert after he had put 'Fierabras' out of hand. Weber arrived in Vienna late in September 1823, and on Oct. 3 began the rehearsals of 'Euryanthe'; and for a month the musical world of Austria was in a ferment. After the first performance, on Oct. 25, Weber and Schubert came somewhat into collision. Schubert, with characteristic frankness, asserted that the new work wanted the geniality and grace of 'Der Freischütz,' that its merit lay mainly in its harmony,[4] and that he was prepared to prove that the score did not contain a single original melody. Weber had been much tried by the rehearsals, by the growing conviction that his work was too long, and by the imperfect success of the performance; and with a combination of ignorance and insolence which does him no credit replied, 'Let the fool learn something himself before he criticises me.' Schubert's answer to this was to

1 Hanslick, 'Concertsaal,' 150.

2 The autograph was shown to Mr. Sullivan and the writer by that energetic Schubert apostle, Herr Johann Herbeck, in 1868.

3 The Müller-lieder, 23 in number, with Prologue and Epilogue in addition, are contained in the 1st vol. of the 'Gedichte aus den hinterlassenen Papieren eines reisenden Waldhornisten' (Poems found among the papers of a travelling French-horn-player), which were first published at Dessau, 1821. Schubert has omitted the Prologue and Epilogue, and 3 poems—'Das Mühlenleben' after 'Der Neugierige'; 'Erster Schmerz, letzter Scherz,' after 'Eifersucht und Stolz'; and 'Blümlein Vergissmein' after 'Die böse Farbe.'

4 See Mendelssohn's opinion, in 'The Mendelssohn Family,' i. 237.

go off to Weber with the score of 'Alfonso and Estrella.' When they had looked through this, Weber returned to Schubert's criticisms on 'Euryanthe,' and finding that the honest Franz stuck to his point, was absurd enough to lose his temper, and say, in the obvious belief that the score before him was Schubert's first attempt, 'I tell you the first puppies and the first operas are always drowned.' Franz, it is unnecessary to say, bore no malice, even for so galling a speech, and it is due to Weber to state that he took some pains later to have the work adopted at the Dresden theatre.[1]

Schubert did not yet know the fate which awaited 'Fierabras'; all was at present *couleur de rose*; and the fascination of the theatre, the desire innate in all musicians, even one so self-contained as Schubert, to address a large public, sharpened not improbably by the chance recently enjoyed by the stranger, was too strong to be resisted, and he again, for the third time in ten months, turned towards the stage. This time the temptation came in the shape of 'Rosamunde, Princess of Cyprus,' a play of ultra-romantic character, by Madame von Chezy, authoress of 'Euryanthe,' a librettist whose lot seems to have been to drag down the musicians connected with her. The book of 'Rosamunde' must have been at least as inefficient as that with which Weber had been struggling, to cause the failure of such magnificent and interesting music as Schubert made for it. The drama has disappeared, but Kreissle[2] gives the plot, and it is both tedious and improbable. It had moreover the disadvantage of competition with a sensational spectacular piece, written expressly to suit the taste of the suburban house, the Theatre an-der-Wien, at which 'Rosamunde' was produced, and which, since the time when Schikaneder induced Mozart to join him in the 'Magic[3] Flute,' had a reputation for such extravaganzas. Schubert completed the music in five days.[4] It consists of an [5]Overture in D, since published as 'Alfonso and Estrella,' op. 69; 3 Entr'actes; 2 numbers of ballet music; a little piece for clarinets, horns, and bassoons, called a 'Shepherds' Melody,' of bewitching beauty; a Romance for soprano solo, and 3 Choruses. The Romance (op. 26), the Shepherds' Chorus, the Entr'acte in B♭, and the Air de Ballet in G, are not only very beautiful but very attractive; and the Entr'acte in B minor, of a grand, gloomy, and highly imaginative cast, is one of the finest pieces of music existing. The play was brought out on Dec. 20, 1823; the overture, though the entire orchestral part of the music had only one rehearsal of two hours, was twice redemanded, other numbers were loudly applauded, and Schubert himself was called for at the close; but it only survived one more representation, and then the parts were tied up and forgotten till the year 1867, when they were discovered by two English travellers in Vienna.

[3] Produced at the Theatre an-der-Wien, Sept. 30, 1791.
[4] So says Wilhelm von Chezy, the son of the librettist, who was on terms with Schubert. See his Journal, 'Erinnerungen,' etc. 1863.
[5] The autograph is dated 'Dec. 1823.'

Besides the Müllerlieder several independent songs of remarkable beauty belong to 1823. Conspicuous among these are 'Viola' (Schneeglöcklein; op. 123), a long composition full of the most romantic tenderness and delicacy, with all the finish of Meissonnier's pictures, and all his breadth and dignity. Also the 'Zwerg' (op. 22, no. 1), by Matthias von Collin, in which Schubert has immortalised the one brother, as Beethoven, in his overture to 'Coriolan,' did the other. This long, dramatic, and most pathetic ballad, which but few can hear unmoved, was written absolutely *à l'improviste*, without note or sketch, at the top of his speed, talking all the while to Randhartinger, who was waiting to take him out for a walk.[6] Equal, if not superior, to these in merit, though of smaller dimensions, are 'Dass sie hier gewesen' (op. 59, no. 2); 'Du bist die Ruh' (do. no. 3); the Barcarolle, 'Auf dem Wasser zu singen' (op. 72), to which no nearer date than '1823' can be given. Below these again, though still fine songs, are 'Der zürnende Barde' (Lf. 9, no. 1; Feb.); 'Drang in die Ferne' (op. 71; Mar. 25); 'Pilgerweise' (Lf. 18, no. 1; April); 'Vergissmeinnicht' (Lf. 21, no. 2; May). The fine Sonata in A minor for PF. solo, published as op. 143, is dated Feb. 1823, and the sketch of a scena for tenor solo and chorus of men's voices with orchestra, dated May 1823. The latter was completed by Herbeck, and published in 1868 by Spina as 'Rüdiger's Heimkehr.'

Ten works (op. 15–24) were published in 1823. The earliest was a collection of dances, viz. 12 Waltzes, 9 Ecossaises, and 17 Ländler, op. 18, published Feb. 5; the PF. Fantasia, op. 15, followed on Feb. 24. The rest are songs, either solo—op. 20, April 10; op. 22, May 27; op. 23, Aug. 4; op. 24, Oct. 7; op. 16, Oct. 9; op. 19, 21 (no dates)—or part-songs, op. 17, Oct. 9. With op. 20, the names of Sauer & Leidesdorf first occur as publishers.

The year 1824 began almost exclusively with instrumental compositions. An Introduction and Variations for PF. and flute (op. 160), on the 'Trockne Blumen' of the 'Schöne Müllerin,' are dated 'January,' and were followed by the famous Octet (op. 166), for clarinet, horn, bassoon, 2 violins, viola, cello, and contrabass, which is marked as begun in February, and finished on March 1. It was written—not, let us hope, without adequate remuneration, though that was probably the last thing of which its author thought—for Count F. Troyer, chief officer of the household to the Archduke Rudolph, Beethoven's patron. In this beautiful composition Schubert indulges his love of extension. It contains, like Beethoven's Septet, 8 movements; but, unlike the Septet, it occupies more than an hour in performance. But though long, no one can call it tedious.[7] The Count played the clarinet, and must have been delighted with the expressive melody allotted to him in the Andante. The work was performed immediately after its

[6] Kreissle, Sketch, p. 154 *note*.
[7] Published by Spina in 1854. It is a great favourite at the Popular Concerts in London, having been played 18 times since March 4, 1867.

composition, with Schuppanzigh, Weiss, and Linke, three of the famous Rassomofsky quartet, amongst the players. His association with the members of this celebrated party may well have led Schubert to write string-quartets; at any rate he himself tells us that he had written two before the 31st March,[1] and these are doubtless those in Eb and E (op. 125), since the only other quartet bearing the date of 1824—that in A minor—has so strong a Hungarian flavour as to point to his visit to Zselész later in the year. How powerfully his thoughts were running at present on orchestral music is evident from the fact that he mentions both octet and quartets as [2]studies for 'the Grand Symphony,' which was then his goal, though he did not reach it till eighteen months later.

A bitter disappointment however was awaiting him in the rejection of 'Fierabras,' which, as already mentioned, was returned by Barbaja, ostensibly on account of the badness of its libretto. Two full-sized operas—this and 'Alfonso and Estrella'—to be laid on the shelf without even a rehearsal! Whatever the cause, the blow must have been equally severe to our simple, genuine, composer, who had no doubt been expecting, not without reason, day by day for the last four months, to hear of the acceptance of his work. His picture of himself under this temporary eclipse of hope is mournful in the extreme, though natural enough to the easily depressed temperament of a man of genius. After speaking of himself as 'the most unfortunate, most miserable being on earth,' he goes on to say, 'think of a man whose health can never be restored, and who from sheer despair makes matters worse instead of better. Think, I say, of a man whose brightest hopes have come to nothing, to whom love and friendship are but torture, and whose enthusiasm for the beautiful is fast vanishing; and ask yourself if such a man is not truly unhappy.

> My peace is gone, my heart is sore,
> Gone for ever and evermore.

This is my daily cry; for every night I go to sleep hoping never again to wake, and every morning only brings back the torment of the day before. Thus joylessly and friendlessly would pass my days, if Schwind did not often look in, and give me a glimpse of the old happy times. . . . Your brother's opera'—this is a letter to Kupelwieser the painter, and the allusion is to Fierabras—'turns out to be impracticable, and my music is therefore wasted. Castelli's 'Verschworenen' has been set in Berlin by a composer there, and produced with success. Thus I have composed two operas for nothing.' This sad mood, real enough at the moment, was only natural after such repulses. It was assisted, as Schubert's depression always was, by the absence of many of his friends, and also, as he himself confesses, by his acquaintance with Leidesdorf the publisher (in Beethoven's banter 'Dorf des Leides,' a very 'village of sorrow'), whom he describes as a thoroughly good, trustworthy fellow, 'but so very melancholy that I begin to fear I may have learnt too much from him in that direction.' It must surely have been after an evening with this worthy that he made the touching entries in his journal which have been preserved; *e.g.* 'Grief sharpens the understanding and strengthens the soul: Joy on the other hand seldom troubles itself about the one, and makes the other effeminate or frivolous.' 'My musical works are the product of my genius and my misery, and what the public most relish is that which has given me the greatest distress.' Fortunately, in men of the genuine composer-temperament, the various moods of mind follow one another rapidly. As soon as they begin to compose the demon flies and heaven opens. That gloomy document called 'Beethoven's Will,' to which even Schubert's most wretched letters must yield the palm, was written at the very time that he was pouring out the gay and healthy strains of his 2nd Symphony. Schubert left town with the Esterhazys in a few weeks after these distressing utterances, and for a time forgot his troubles in the distractions of country life in Hungary. At Zselész he remained for six months, but his life there is almost entirely a blank to us. We can only estimate it by the compositions which are attributable to the period, and by the scanty information conveyed by his letters, which, though fuller of complaint than those of 1818, are even less communicative of facts and occurrences. To this visit is to be ascribed that noble composition known as the 'Grand Duo' (op. 140), though designated by himself as 'Sonata for the PF. for four hands. Zselés, June 1824'; a piece which, though recalling in one movement Beethoven's 2nd, and in another his 7th Symphony, is yet full of the individuality of its author; a symphonic work in every sense of the word, which, through Joachim's instrumentation, has now become an orchestral symphony, and a very fine one. To Zselész also is due the Sonata in Bb (op. 30, May or June), the Variations in Ab (op. 35, 'middle of 1824'), 2 Waltzes (in op. 33, '1824, July'), and 4 Ländler ('July, 1824,' Nott. p. 215)—all for PF. 4 hands; other Waltzes and Ländler in the same collections for 2 hands; and the 'Gebet' of Lamotte Fouqué (op. 139*a*), signed 'Sept. 1824, at Zelész in Hungary'—all evidently arising from the necessity of providing music for the Count's family circle. The young Countesses were now nineteen and seventeen, and doubtless good performers, as is implied in the duet-form of the pianoforte works. We are probably right in also attributing the lovely String Quartet in A minor (op. 29), and the 4-hand 'Divertissement à la hongroise' (op. 54), to this visit, at any rate to its immediate influence. Both are steeped in the Hungarian spirit, and the Divertissement contains a succession of real national tunes, one of which he heard from the lips of a maidservant as he passed the kitchen with Baron Schönstein in returning from a walk. For the Baron was
